J. COOPER, Weston, Isle of Wight, Builder.—G. R. PRIER, Bart., M.P., Stratton-street, Piccadilly, and Foxley, Herefordshire, Iron manufacturer.

BANKRUPTS.

N. WARD, Farringdon market, Cheesemonger.—A. J. PHILLIPS, Oakley street, Chelsea, shipowner.—J. TAYLOR jun., Woolwich, licensed victualler.—L. GUNTON, Leeds, Sale Cry, grocer.—T. HADDON, Church-place, Islington, and Exeter, Surrey.—J. J. LOUD, jun., and C. J. SCHALLER, Chester-street, Middlesex Hospital, auctioneers.—T. BAKER, Bonchurch-lane, Leadenhall-street.—J. Jones, Upper Holloway, iron-merchant.—J. J. DIAPER, Wimbledon, Surrey, victualler.—G. STANTON, Portland-terrace, North Town, wood-log-dealer.—D. DAVIES, Bute Docks, Glamorganshire, provision dealer.—H. HARRISON, Liverpool, wine merchant.

SCOTCH SEQUESTRATIONS.

J. WATT, Glasgow, outfitter.—J. KORRISON, Dunblane, builder.—T. TULLIS, Glasgow, builder.

### FRIDAY, APRIL 18.

WAR DEPARTMENT, APRIL 1.

5th Dragoon Guards: Lieut. H. L. Payne to be Lieutenant.

2nd Light Dragoons: Lieut. R. P. Tildley to be Captain.

9th: Lieut. A. G. B. Martin to be Lieutenant.

[illegible] Movant to be Cornet.

[illegible] Cornet Garland to be Quartermaster.

[illegible] Ensigns T. H. Townshend, G. Turner, R. L. Roberts, to be Lieutenants.

[illegible] Ensign J. S. Keddie, H. Gandy to be Lieutenants, G. L. Huyshe to be Ensign.

[illegible] Ensigns J. S. Keddie, H Gandy to be Lieutenants, G. L. Huyshe to be Ensign.

[illegible] Ensign H. Dobbs to be Adjutant.

3rd West India Regiment: Ensign M. Howland to be Lieutenant.

[illegible] Ensign C. B. Mansfield to be Adjutant.

[illegible] Surgeon [illegible] to be Assistant-Surgeon.

ARMY TRANSPORT CORPS.—O. Williams, R. H. James, W. Stevens, J. Scott, R. Boyd, to be Paymasters.

DEPOTAL STAFF.—Assistant-Surgeon R. Frank, M.D., to be Assistant-Surgeon to the Forces.

BREVET.—Major-General Sir H. R. Rose, K.C.B., to have the local rank of Lieutenant-General in Turkey, Captains S. J. Hiva and A. G. C. Sutherland to be Majors in the Army, Major Hawtayne to be Lieutenant-Colonel in the Army, the rank being honorary only.

BANKRUPTCIES ANNULLED.

W. S. GLATER, Birkenhead, timber merchant.—T. SIMPSON, Kingston-upon-Hull, warehouseman.

BANKRUPTS.

J. L. BARVEY, Chester-place, Kennington-road, draper.—S. THOMAS, Wigan, cabinet-maker.—J. GODFREY, late of Taunton, Somersetshire, [illegible] of Creech, St. Michael, Somersetshire.—R. ROBERTS, Holyhead, Anglesea, shipbuilder.—W. JAN. Yeovil, grocer and grocer.—E. HOLKARD, Dr. [illegible], grocer.—R. THOMPSON [illegible] Mark Lane, Tower, paperhanger.—J. YOUNG, Sun-court, Cornhill, Cap Maker, and Liverpool, ship and insurance broker, underwriter, and merchant.—J. F. ADAMS, Commercial-place, Pentonville, jeweller.—C. SCHOLEFIELD, Romiley, Cheshire, coal dealer and commission agent.—J. F. B. L. SHIPPLER, and A. ALGER, Isworth, Cogguehall, Essex, steam-engine makers, millwrights, and machinists.

## BIRTHS.

On the 4th inst., at 69, Bath-street, Glasgow, the wife of Francis Murray, Esq., of a daughter.

On the 12th inst., at the Rectory, Towerdleigh, Devon, the wife of the Rev. Peter Gunning, of a son.

At Frampton Hall, Lincolnshire, the lady of Major Moore, High Sheriff of the county, of a son.

## MARRIAGES.

On the 16th inst., at All Souls, Marylebone, by the Rev. Arthur R. Godson, M.A., John Llewellyn Harrison, Esq., of Hull, to Mary, only daughter of the late Matthew Thackeray, Esq., Lieutenant of H.M. 39th Regiment, and of Calendine, Harrogate.

On the 15th inst., at the Scottish Church, Crown-court, Lettigrew, by the Rev. J. Weir, Mr. Charles William Speight, to Hephzibah, eldest daughter of Mr. John Watts, of Albion-place, Bank-buy-road.

On Tuesday last, at the Church, in Zierow, in Mecklenburg Schwerin, Baron de Billow, eldest son of the Excellency the late Baron de Billow of Gurzow, Herzoth [illegible] Mecklenburg, to Mary, eldest daughter of Baron Carl Ludwig von Bibl, of Zierow [illegible] Baron Albrecht de Maltzahn, eldest son of Baron Christian Ludwig von Maltzahn, in Black embargo, to Caroline, second daughter of Baron de Bibl, of Zierow

## DEATHS.

April 12th, at Polstead Rectory, William Coyte, Esq., M.R.C.S., second son of the Rev. James Coyte, Rector of Polstead in the county of Suffolk, in the 34th year of his age.

On the 13th inst., at his residence, Trumbley, near Bristol, General John Greenstreet, H.E.I.C.S., in the 76th year of his age.

## THE IMPERIAL PRINCE IN HIS CRADLE.

WE have engraved upon page 408, the Imperial Prince, photographed by Mr. Richebourg, as the infant lay in his superb Cradle, in one of the apartments of the Tuileries. The Cradle has already been described in the ILLUSTRATED LONDON NEWS for March 22, p. 298.

It now appears certain that the ceremony of the baptism of the Imperial Prince is fixed for Monday, the 9th of June. In this solemnity the usual forms will be observed as were adopted in the baptism of the King of Rome. The religious ceremony will take place at Notre Dame at four o'clock in the afternoon, and the young Prince will be afterwards taken to St. Cloud. The Emperor and Empress, on their part, will attend a grand banquet at the Hotel de Ville, to be followed by a splendid fête. Other fêtes will be given in succession at Versailles, St. Cloud, and in other Imperial residences.

## AMUSEMENTS, &c.

HER MAJESTY'S THEATRE.—It is respectfully announced that HER MAJESTY'S THEATRE will REOPEN early in May. Engagements of great interest have been offered, both in Opera and Ballet, and the best exertions are used to make the arrangements worthy of the occasion. The pr spectus will immediately be issued. The subscribers and friends of Her Majesty's Theatre who feel an interest in the success of this great establishment are respectfully invited to forward early intimation of their wish for tickets to subscribe. The season will consist of thirty nights, and the prices will be as follows:—Pit Boxes, 120 to 150 guineas; Grand Tier, 100 to 200 guineas; One Pair, 190 to 150 guineas; Two Pair, 75 to 100 guineas; Pit Stalls, 25 guineas.—The Hon.-office is now open.

THEATRE ROYAL, HAYMARKET.—MONDAY (APRIL 21, and during the Week, the new Comedy of THE TWO ANGELS. the renowned PEPITA PEREA, with MANUEL PEREZ and the Spanish Dancers, in the New Bal-a-Pantomime of KILGARMIRA, with GRIMSHAW, HASSHAW, and BRADSHAW, with Mr. Buckstone in his original character: Miss TALBOT'S Third Appearance; and THE FOOTMAN'S KNOCK.

The Diorama is painted by Messrs. Richard Leitch, Harrison Weir, George Thomas, Wolf, Charles Hughes, and Nelson Ellis, and conducted by Mr. Louis Haghe and Mr. Absalon Wilson. Admittance is, 2s., and Children half price in the Reserved Seats and Stalls. The Museum is open GRATIS during the Day from Eleven till Six (Saturdays excepted), containing one of the most interesting and remarkable collections [illegible] Literary Gazette.

THE ROYAL PANOPTICON, Leicester-square.—Monday Evening Concerts Admission, One Shilling. Lower Gallery, One Shilling and Sixpence; and stalls half price. On MONDAY, APRIL 21, 1856, Mendelssohn's Oratorio, ELIJAH. Principal singers, Miss Stabbach, Mrs. Theodore Hagan, and Mrs. Lockey; Mr Lawler, Mr. Lockey, with an increased and powerful Chorus Mr. E. G. Chipp will preside at the grand Organ. To commence at half-past Seven precisely After the Oratorio, the Gymnasium and Circassian Fountain will be exhibited

CANTERBURY HALL, Westminster-road, Open every Evening.—The following Company of talented Vocalists are permanently engaged for the performance of Ballads from the popular Operas, Messrs. Chrisnell, Churass, Sr. Aubyn, Pearce, Miss Somers, Miss B [illegible] as well as to assist in the efforts of Caulfield, Percy F. Jonghmans J Shirwin, C. Farrant, Sidney, Mathews, Mr. Phillips, Mr. Richard Lee, and Mr. Frederick Fitz Gibbon, Messrs. and Rungett. Mr [illegible] and Mr. J. Mackney Pianiste, Mr. J. Harrison, Mr. [illegible] Harmonium, Mr. J. Caulfield, [illegible] Lavelee, Mr [illegible] commence at Seven o'Clock. Surgeon, &c., until Twelve.

CRYSTAL PALACE, Sydenham.—The Palace on Tuesday, Wednesday, [illegible] who can [illegible] the admission is 1s. Closing each day at [illegible] Admission by railway, may be obtained at the London-bridge Station, and at the several Agents in London. Trains run from London-bridge to the Crystal Palace Station at 9.0 a.m., 9.0 a.m., and every half-hour [illegible] to 6.0 p.m., and at 8.35, 9.35, and 5.00 p.m.; returning from the Crystal Palace at short intervals throughout the day up to 7 45 p.m.

THE CAMPAIGN in the CRIMEA.—The important Collection of WATER-COLOUR DRAWINGS [illegible] CAPTAIN [illegible] Crimea, during the [illegible] Russian [illegible] of the Allies, [illegible] Sebastopol, [illegible] Balaclava, [illegible] Inkerman, [illegible] Alma, [illegible] Redan, [illegible] Malakoff, [illegible] Tchernaya, [illegible] Kertch, [illegible] Kinburn, [illegible] Sea of Azoff, [illegible] Baltic, [illegible] Bomarsund, [illegible] Sweaborg, [illegible] Gulf of Bothnia, [illegible] Aland Islands, [illegible] Gulf of Finland, [illegible] Cronstadt, [illegible] Revel, [illegible] Dantzic, [illegible] Memel, [illegible] Pillau, [illegible] Frische Haff, [illegible] Konigsberg, [illegible] Russian Lithuania, [illegible] Poland, [illegible] Vistula, [illegible] Warsaw, [illegible] Gallicia, [illegible] Austrian Frontier, [illegible] Bessarabia, [illegible] Danube, [illegible] Wallachia, [illegible] Bucharest, [illegible] Turkey, [illegible] Constantinople, [illegible] Scutari, [illegible] Varna, [illegible] Shumla, [illegible] Rustchuk, [illegible] Silistria, [illegible] Kalafat, [illegible] Giurgevo, [illegible] Bulgaria, [illegible] Servia, [illegible] Belgrade, [illegible] Hungary, [illegible] Austria, [illegible] Transylvania, [illegible] Bucharest, [illegible] Wallachia

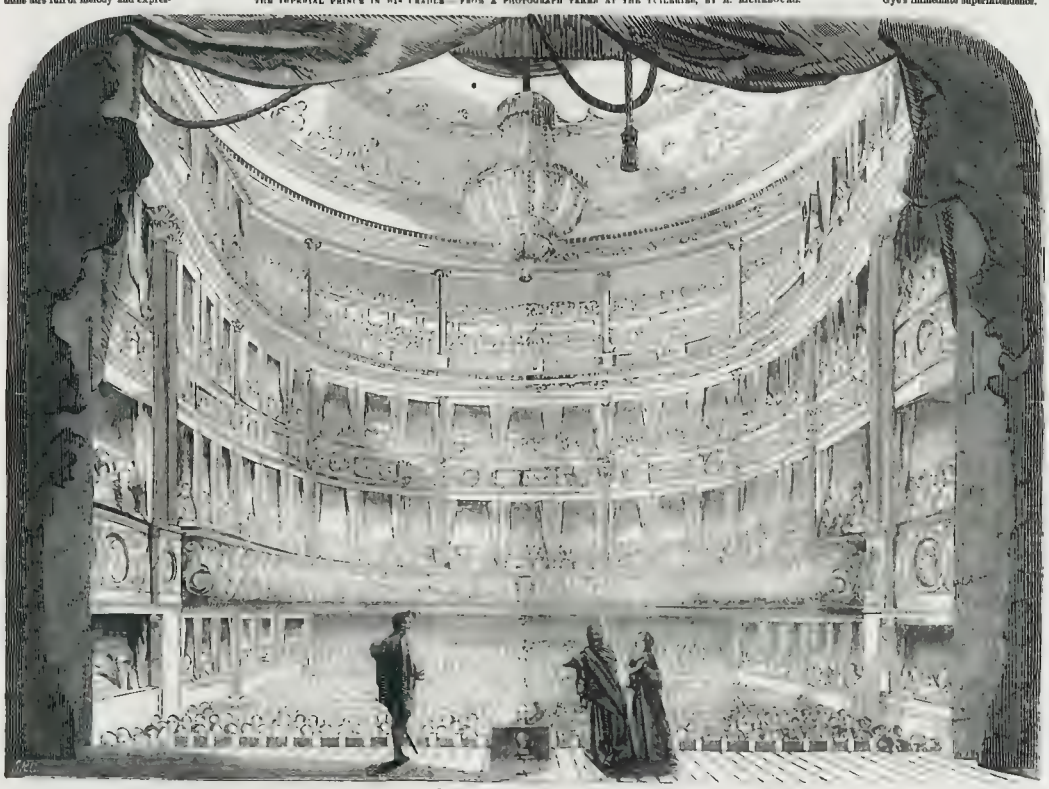
## THE ROYAL ITALIAN OPERA, LYCEUM.

The Royal Italian Opera has begun its season in its temporary domicile, the Lyceum Theatre. We say temporary, because, whatever may be the future destination of this establishment, its sojourn in its present abode must be of brief duration. It may do as a *pis-aller* under the present pressure of adverse circumstances; nothing better could be done, and what is done has been done admirably. But no amount of ingenuity or activity can ever convert the little Lyceum into a house befitting the Royal Italian Opera. The present season, be the theatre managed ever so well, must entail a heavy loss on the lessee; and of this Mr. Gye, who is as clear-sighted as he is enterprising, must be fully aware. But if he is enabled to keep his unequalled company together, and to prevent the substance of his vast establishment from being scattered to the winds, a great object will be gained, worthy of the cost at which it is purchased. Since Mr. Gye has obtained the occupation of the Lyceum Theatre he has done wonders in its renovation. The whole aspect of its interior has been changed, and those who have been most familiar with it, going into it now, would not know it again. There are two tiers of boxes, exactly like those of Covent Garden, on a diminished scale; below them, one each side, there are pit-boxes, and above them is the amphitheatre or gallery. The area of the pit has been all converted into stalls, with the exception of two or three rows at the back, which are all that remains of what is properly the pit. This arrangement, however necessary to make the theatre as remunerative as possible, will have the effect of giving it an exclusive character. The space allotted to the public is so very scanty that the audience will consist almost wholly of the fashionable occupants of the boxes and the stalls. This disadvantage, however (for it certainly is one), is, under present circumstances, more to be regretted than found fault with. The house is beautifully decorated; it is clean and comfortable; and nothing can be more cheerful and elegant than its whole appearance.

The opera was the "Trovatore," a piece of which enough has been already said by our contemporaries and ourselves. It is generally admitted to be one of Verdi's best operas as a musical composition; and, as a dramatic poem, one of his worst. In this last respect it is far inferior to the "Lombardi," "Ernani," or the "Foscari," while it is superior to any of these in its music. It contains airs full of melody and expression, and masterly concerted pieces, especially in the last act; but its effect is weakened by its association with incidents which (though gloomy and horrid) rouse no interest, and with personages whose passions and feelings create little sympathy. The performance of Tuesday evening was similar to that of last season in all material respects save one. The gipsy *Azucena*, the real heroine of the piece, was personated by Mdlle. Didiée, instead of Madame Viardot. Mdlle. Didiée is a praiseworthy young singer with a contralto voice; she is, moreover, an improving performer, and exerted herself with greater effect than we had expected; but she fell far short of her gifted predecessor, whose absence is the more remarkable seeing that she is on the eve of arriving in London, where, we understand, she will spend the season. In the part of *Leonora*, Madame Jenny Ney even deepened the impression which she made last year. Her performance was at once a superb display of vocal power and a piece of beautiful and pathetic acting. This is the only part she has yet performed in London, her long illness and subsequent departure last year having prevented her appearing in any other; and we confess that we long to see her in some character of greater interest. Tamberlik (whose engagement is for a very short period) acted and sang, as *Manrico*, with his usual energy and effect; but his old defect of tremulousness was more apparent than last year. Graziani, as *Conte de Luna*, had great success. His air, "Il balen del suo sorriso," called forth the only encore of the evening. We have only to add that the orchestra was positively improved by the diminution of its numbers; and that the opera, notwithstanding the comparative smallness of the stage, was got up with a completeness and splendour worthy of the Royal Italian Opera.

Our Artist has sketched the auditory of the Theatre, showing the alterations. The whole of the front of the boxes has undergone complete regilding and painting; the grand tier of boxes has a white arabesque ornament upon a blue ground, the upper portion carrying a gilded wreath. The two upper tiers have a pale blue ground, with gilded ornaments. All the original boxes have been divided into three by a slender partition: they are lined with crimson paper, and fitted with crimson damask hangings. The small chandeliers which hung in front of the boxes have been removed, and a central chandelier of ample dimensions substituted: it has been supplied by Kirby, of Greek street. The decoration of the house is by Ponsonby, of Piccadilly; executed under Mr Gye's immediate superintendence.

THE IMPERIAL PRINCE IN HIS CRADLE.—FROM A PHOTOGRAPH TAKEN AT THE TUILERIES, BY M. BISCHBOURG.



THE ROYAL ITALIAN OPERA, LYCEUM.

MR. H. HUNT PAINTS AGNES KATHERINE—(SEE NEXT PAGE.)

## ZIGZAGS OF HUNTING.

### PRINCE ALBERT'S HARRIERS.

THE other day we went down to Windsor to see the Prince's harriers, and had a very pleasant day. The South-Western Rail made a very good hack up to the Castle station, where the voluble Wyse of Eton had one of his hard-worked, useful hunters ready to trot us away to the meet at Shalhill. This plan saved all trouble, although it is of course as ungenteel to hire a hunter as it is "slow" to own, without apology, that you have been "a hunting a hare." Nevertheless, there are some two hundred packs of harriers in England and Wales, and we dare not guess how many well-dressed gentlemen who save horse-box travelling expenses and risk when they get out of their own country by riding as well as they can at the rate of £2 2s. a day. If it were not so, there would be thin fields in some good counties.

As to harriers, the people who sneer at them are ludicrously ignorant of the history of modern foxhunting, which is altogether founded on the experience and maxims of harehunters. The two oldest foxhound packs in England—the Brocklesby and the Cheshire—were originally formed for harehunting. The best book ever written on hounds and hunting—a text-book to every master of hounds to this day—is by Beckford, who learned all he knew as master of a pack of harriers.

The great Meynell and Warwickshire Corbett both entered their young hounds to hare—a practice which cannot, however, be approved. The late Parson Froude, in North Devon—than whom a keener sportsman never holloaed to hounds, and the breeder of one of the best packs for showing sport ever seen—hunted hare, fox, deer, and even polecats, sooner than not keep his darlings doing something; and, while his hounds would puzzle out the faintest scent, there were among the leaders several that, with admirable dash, jumped every gate, disdaining to creep. Some of this stock are still hunting on Exmoor. There are at present several very good M.F.H. who began with harehounds.

We are afraid that the intense pretentious snobbishness of the age has something to do with the mysterious manner in which many men, blushing, own that they have been out with harriers. In the first place, as a rule, harriers are slow; although there are days when, with a stout, well-fed, straight-running hare, the best men will have enough to do to keep their place in the field; over the dinner-table that is always an easy task; but in this fast, competitive age the man who can contrive to stick on a good horse can show in front without having the least idea of the meaning of hunting. To such, harriers afford no amusement. Then again, harrier packs are of all degrees, from the perfection of the Blackmore Vale, the Brookleas, and some Devon or Welsh packs with unpronounceable names, down to the little scratch packs of six or seven couple kept among jovial farmers in out-of-the-way places, or for the amusement of Sheffield cutlers running afoot. The same failing that makes a considerable class reverently worship an Alderman or a City Baronet until they can get on speaking terms with a Peer leads others to boast of foxhunting when the Brighton harriers are more than they can comfortably manage.

With good nerves, plenty of time, and a strong stud, to the true sportsman there can be nothing better than a season with a first-rate pack of foxhounds in a fine scent-holding country. But, after hard town-work and grey hairs have told on the pulse, a couple of hours a week on a thirty-pound hack may be made pleasant and profitable, with a cry of little currant-jelly dogs. Air, exercise, music, and occupation may be all combined.

That Prince Albert should never have taken to the Royal stag-hounds is not at all suprising. It requires to be "to the manner born" to endure the vast jostling, shouting, thrusting mob of gentlemen and horsedealers, "legs" and horsebreakers, that whirl away after the unhorsed stag, as they do now very often, or the hounds, as they ought to do—but the Prince's horse's tail.

Prince Albert's harriers are in the strictest sense of the term a private pack, kept by his Royal Highness for his own amusement, under the management of Colonel Hood. The meets are not advertised. The fields consist, in addition to the Royal and official party from the Castle, of a few neighbouring gentlemen and farmers, the hunting establishment of a huntsman and one whip, both splendidly mounted, and a boy on foot—at least we presume that he is attached to the hunt, as he wears the livery, and otherwise would never have put on a pair of kerseymere bags to scramble through hedges, instead of the time-honoured leather gallygaskins of the pedestrian harehunter. The costume of the hunt is a very dark green cloth coat, made double-breasted, with the Prince's gilt button, brown cords, and velvet cap.

On the day we were out the huntsman rode Malakoff, the horse which was sold for £360 at Sir Richard Sutton's sale. The hounds were about fifteen couple, of medium size, with considerable variety of true colours, inclining to the lemon-pencil stamp, very honest hunters. On each run the lead was taken by a hound of peculiar and uncommon marking—black and tan, but the tan so far spreading that the black was reduced to merely a saddle. We remember seeing a Welsh pack of true long-eared harriers of nearly the same colour.

The day was rather too bright, perhaps, for the scent to lie well; but there was the better opportunity for seeing the hounds work, which they did most admirably, without any assistance. It is one of the advantages of a pack like this that no one presumes to interfere and do the business of either the huntsman or hounds. The first hare was found on land apparently recently inclosed near Eton; but, after two hours' perseverance, it was impossible to make anything of the scent over ploughed land.

We then crossed the railway into some fields, partly in grass, divided by broad ditches full of water, with plenty of willow stumps on the banks, and partly arable on higher, sloping ground, divided by fair growing fences into large square inclosures. Here we soon found a stout hare that gave us an opportunity of seeing and admiring the qualities of the pack. After the first short burst there was a quarter of an hour of slow hunting, when the hounds, left entirely to themselves, did their work beautifully. At length, as the sun went behind clouds, the scent improved; the hounds got on good terms with puss, and rattled away at a pace, and over a line of big fields and undeniable fences, that soon found out the slows and the nags that don't face shining very honest hunters. Short checks of a few minutes gave puss a short respite; then followed a full cry, and soon a view. Over a score of big fields the pack raced within a dozen yards of pussy's scent, without gaining a yard, the black-tanned leading hound almost coursing his game; but this was too fast to last; and, just as we were squaring our shoulders and settling down to take a very uncompromising hedge with evident signs of a broad ditch of running water on the other side, the hounds threw up their heads; poor puss had shuffled through the fence into the brook, and sunk like a stone.

We must, at the risk of being considered spoony, own that there is something painful about the helpless finish with a hare. A fox dies snarling and fighting; but one often wishes the hare to get away. The hounds and horses of our Illustration, from the pen of Mr. Harrison Weir, were, by the kindness of Colonel Hood, studied at leisure at the kennels.

We may loyally venture to hope that before many years pass by we may see the Prince of Wales and his Royal brothers following their own pack of foxhounds in Windsor Forest, drowning the inevitable cares of State in a hearty, healthy, manly, and truly English sport.

THE FUSIONISTS AND THE ENGLISH ALLIANCE.—The *Assemblée Nationale* contains an article intimating the conditions on which the fusionists could approve the alliance of France and England:—"If the alliance of England obliges us to tolerate a permanent state of revolution and anarchy in Spain, we are not for the English alliance. If France will be compelled, in order to remain the ally of England, to permit revolution to introduce itself into Italy, to overthrow the kingdom of the Two Sicilies—to plant itself in Palermo—to menace the Sovereign Pontiff in Rome—then we are not in favour of the English alliance. If in Switzerland the oppression of honest folk—the despotism of the multitude—anarchy in the heart of power, are the conditions of the English alliance, we find that at that price it is too dear. But give us, instead of revolutionary England abroad, the old and loyal England of the past, conservative abroad as at home, armed for the defence of right and the maintenance of principles on which reposes European order, then will the English alliance have no more zealous partisans, no more ardent defenders than ourselves."

## A FEW WORDS ABOUT OMNIBUSES AND THE LONDON GENERAL OMNIBUS COMPANY.

As a large majority of the citizens of London undoubtedly prefer the vehicular to the pedestrian mode of locomotion, they may be fairly supposed to entertain some curiosity respecting the details of a system which undertakes to gratify their migratory propensities to the very utmost. We are so much accustomed in this most practical of all possible countries to sing the praises of commercial competition, that it requires some moral courage to demand public applause in favour of an avowed monopoly. And yet, as the exception is said to prove the rule, it should not be subject of special wonder that circumstances may combine to justify an occasional doubt as to the correctness of the national theory. It has, indeed, become almost a proverbial remark that "they manage such and such things better in France;" and this is usually in reference to matters that seem peculiarly open to competition. For instance, no one who has ever travelled in a Paris omnibus can question its superiority to the narrow, low-roofed, ill-ventilated, and over-crowded conveyance which constitutes the principal nuisance in the streets of London. The time was, and at no remote date, when our "lively neighbours" were subjected to the same inconveniences that are now grumblingly endured in our own metropolis. The evil at length attracted the attention of M. Foucauld, who directed his great administrative ability to the improvement of the people's vehicle. His task was the more easy that he succeeded in obtaining the intervention of the Government. An absolute decree went forth, competition ceased, an amalgamation was effected, and passengers were made comfortable in spite of the mute protest of Liberty.

Encouraged by his success, M. Foucauld resolved to do as much for the Londoners as he had achieved for his own countrymen. He could expect no assistance from Government. He, therefore, boldly appealed to the common sense of the antagonistic proprietors; and, wonderful to relate, they listened to his appeal without prejudice or impatience.

The inconveniences of the English system were no notorious that no one was found to argue in their defence and recommend their perpetuation. An amalgamated Company was accordingly formed, which was joined by several of the most influential omnibus proprietors. Terms were speedily arranged for the transfer of upwards of six hundred carriages, with their "times," or goodwill, to the new Company. As the total number of omnibuses plying in London, and its environs, is stated at 810, it will be seen that two-thirds of the entire traffic was nearly to change hands. Owing, however, to the pressure on the Money Market, it was found necessary to postpone for a time the purchase of so great a number, and a commencement was made on a much smaller scale. At present about 430 have been taken up, though not all at work.

Within three months of its opening day the Company has so far extended its operations that it employs fully 1300 men and 5000 horses. Each carriage costs, on an average, £110; and it is worked by ten horses, valued at £20 a head. Six years is considered a fair period of servitude for the poor animal, during which time he seldom fails to perform his daily task of twelve miles; so that in six years a pair of horses accomplish a feat equal to drawing an omnibus round the meridian of the globe. The daily allowance of each consists of 16lb. of oats, 8lb. of beans, 11lb. of hay, and 5lb. of straw. The stables hold from fifty to one hundred horses, and are conveniently scattered over the metropolis.

To every omnibus there is a driver and a conductor, working fourteen hours per diem, and earning respectively 5s. 6d. and 4s. a day. When the Company shall attain its full development, it is in contemplation to establish provident institutions for the benefit of the men, in case of sickness, accident, or superannuation. By that time, it is expected, the working staff will not fall short of 8000 persons, a number that will afford a firm basis for a fund by which retiring pensions and temporary allowances will be provided. This desirable consummation must be the work of time; but already great progress is being made in carrying out the objects of the Company, as may be seen by a comparison of three weeks' returns at monthly intervals:—

| Week ending. | Omnibuses at Work. | Traffic Returns. | Miles Run. |
|---|---|---|---|
| 2nd Feb. ... | 241 ... | £1230 17 4 ... | .. |
| 1st March ... | 324 ... | 6822 16 0 ... | 118,118½ |
| 29th do. ... | 384 ... | 7141 13 11 ... | 144,773½ |

Perhaps the most important, certainly the most novel, feature in this scheme is the proposed introduction of the correspondence system, by which a single payment will entitle a passenger to be carried from one extremity to another of this vast metropolis. The Whitechapel butcher-boy may then ride for 4d. to Hampstead, Richmond, or Clapham; nor need he tremble at the prospect of an arbitrary increase to the expenses of his trip during the pleasant months of summer. But some delay in carrying out this improvement is inevitable, owing to the immense extent to be traversed. The leading thoroughfares alone exceed a straight line of fifteen hundred miles, or five times the length of the distance possible in Paris.

Another point to which much consideration has been devoted is the improvement of the carriages. We all know, by sad experience, the discomforts attendant on a ride in a 'bus. The crushing of hats, the trampling upon toes, the poking in the eye or ribs as the clumsy gentleman or timid lady flounders into the narrow van. Nor does the adventurous youth who climbs, hand over hand, to a seat on the knife-board fail to repent of his rash audacity, when at each spasmodic jerk he is flung upon his right shoulder or his left. All this is to be changed. The Company are about to start several new carriages of various designs to be submitted to the decision of the public. They will also introduce a few similar to those employed in Glasgow and Manchester, though their great weight is much against them, as necessitating the draught of three horses; and a "unicorn" in the crowded streets of London is quite as troublesome as his caricature is ridiculous when grimacing at the British lion across the Royal crown; and three horses abreast would be still worse. A prize, indeed, was offered for the design of a carriage that should combine roominess and ventilation with lightness of construction; but this is still a desideratum; none of the plans handed in coming up to the required point of excellence.

There is yet one other point—the impertinence, or rather the insolence, of conductors has passed into a proverb. To remedy this the new Company proposes to introduce wounded soldiers for that distinguished post. The unprotected female need, therefore, be no longer a strong-minded individual to travel per 'bus; and even anxious parents will henceforth hazard their fond pledges of mutual affection without disagreeable associations connected with chimneysweeps or dealers in Norfolk sausages.

SNOW-SHOE RACES IN CANADA WEST.—These subscription races came off on the 20th of February, at Kingston, in the New Park, which slopes towards the river St. Lawrence and Lake Ontario. The weather was highly propitious, and the snow in the park averaged from two to three feet, and presented a very level surface over the entire course. The most keenly-contested sport was the hurdle-race.

It is estimated that if a steam-packet communication could be established between this country and Australia, by which such communication could be effected in forty-four or forty-five days, that £100,000 a year would be saved in interest of money on Australian gold sent to England.

## *EPITOME OF NEWS—FOREIGN AND DOMESTIC.*

His Royal Highness Prince Albert will, it is said, pay a short visit to Paris in the course of the summer. The object of the Prince Consort's visit will be to represent her Majesty at the baptism of the Imperial Prince.

A paragraph has been going the rounds respecting "a grand celebration of the peace" in Hyde-park, on her Majesty's birthday. There is no foundation whatever for the statement.

The 9th of June is the day fixed for the baptism of the Imperial Prince. The programme of the baptism of the King of Rome will be adopted for this occasion. The ceremony will take place in Notre Dame.

His Imperial Highness Prince Jerome Napoleon, having recovered from the malady with which he was attacked, went out on Sunday last for the first airing, to make a visit to their Imperial Majesties the Emperor and Empress, and to the Prince Imperial.

The Earl of Clarendon intended to take his departure from Paris for London to-day (Saturday), accompanied by the Countess of Clarendon.

The marriage of the Princess Louise of Prussia with the Prince Regent of Baden is to take place on the 11th of June, the wedding-day of her parents.

Don Ferdinand of Portugal is expected in Belgium to arrange a marriage between his son, Don Pedro V., the reigning Sovereign, and the Princess Charlotte of Belgium.

There has been some gossip in the papers about a matrimonia connexion between the Royal family of Naples and the Ducal family of Tuscany. The rumour is without foundation. In fact, the eldest daughter of the Grand Duke is only twelve years of age.

The Earl of Coventry and Lord Skelmorsdale have commenced their studies at the University of Oxford. Both noblemen made their first appearance at Christ Church, to which College they belong, for the purpose of keeping term, a few days since.

The Duke de Nemours has gone to Turin with the Prince of Saxe-Cobourg. The Count de Chambord, who had proceeded from Venice to Parma to attend the anniversary funeral ceremony of the tragical death of Charles III. of Bourbon, left his sister's capital on the following day. After visiting his aunt, the Duchess of Neuilly, at Nervi, he went on to Genoa.

General Williams will be honoured with the mission to arrange the Asiatic frontier.

The *Pays* says that King Otho is expected to make a visit to Western Europe this spring.

A grand reception at Court took place at St. Petersburg on the 6th, being the fete of the Annunciation of the Virgin, according to the Russian calendar. A "Te Deum" has been sung for the peace concluded between the belligerent Powers.

Sir James Hudson, the British Ambassador, is now at Genoa. He has obtained from the King the use of the Falcone theatre for a few nights, and is giving English theatrical representations.

The fleet being fitted out at Cronstadt for the conveyance of the Emperor to England and France turns out to be a flotilla to conduct the Empress-Mother to Stettin, on her way to visit her family in Berlin. It is believed that she will return to be present at the coronation solemnities in Moscow, and repair again to Palermo, where she will spend the winter.

Lord and Lady Ely have arrived at Brussels from Paris, on their way to the Hague. Her Ladyship added to the knot of distinguished and brilliant English women who attended the Royal ball last week.

Sir Allan M'Nab, who has suffered severely from gout for a long time past, has virtually retired from the Premiership of the Canadian Cabinet, and is succeeded by Hon. John A. Macdonald, Attorney-General.

The Marquis de Villamarina, Minister of Piedmont at Paris, gave a grand dinner on the 10th inst., at which the Countess of Montijo, the Duchess of Alba, M.M. Troplong and Baroche, Count Orloff, and Baron de Brunnow were present.

It is expected that the ratification of the Treaty of the 30th ult. by the Sultan, will be sent off from Constantinople to Paris by a steamer, which would leave on the 16th. It is therefore calculated that it will reach Paris between the 26th and the 30th inst.

The Queen of Spain has presented Ronconi with a valuable crown of gold representing leaves of laurel, and ornamented with brilliants; the directors of the Circo have also presented him with a crown in silver, with their names, four in number, engraved on it

The health of the Bishop of Norwich is now so far re-established that his Lordship has resumed the active duties of his diocese, which his severe and continued indisposition compelled him to relinquish.

The *Civilta Cattolica*, enlarging upon the friendly disposition which the Emperor Alexander II. manifests in favour of the Roman Catholics of his empire, announces that M. de Bressier, Russian Minister at Rome, will be charged to negotiate a new Concordat upon more liberal bases than that which was granted some years ago.

The medal sent over by the French Emperor to the English soldiers for valiant service in the Crimea, is not, like our medals, to be bestowed on all who took part in the campaign. It is the ordinary *médaille militaire*—a decoration much prized in the French army, and second only to the Legion of Honour.

A subscription has been entered into by the British residents of Hamburg, for the purpose of presenting Miss Nightingale with a *souvenir*, expressive of their admiration of her noble and disinterested conduct in the East.

The Geographical Society at Paris has awarded its prize for the most important discovery during the last year to Dr. Heinrich Barth. The next prize of a golden medal was adjudged to Mr. G. Squier, of the United States, for his Central American researches

The Right Hon. William Keogh has been sworn in before the Lord Chancellor as one of her Majesty's Justices for the Court of Common Pleas. He is the youngest judge who ever sat on the bench in Ireland. Richard Charles M'Nevin, Esq., has been appointed his registrar.

Shortly after the death of Herr von Hinckeldy his family returned to the Russian Minister in Berlin an order richly set with diamonds, that the late Emperor Nicholas had presented to the deceased. Very recently, however, the Russian Minister received instructions to restore it to the family in the name of the present Emperor.

M. de Munckansen, the second of the late M. de Hinckeldy in the fatal duel, has resumed his functions at the Ministry of the Interior. M. de Rochow, it is stated, is preparing a statement in justification of his conduct.

A monument to William Roscoe, the historian, has been erected in the Unitarian Chapel, Renshaw-street, Liverpool, where all that was mortal of Roscoe was interred. It consists of a fine bust of the historian placed in a niche of grey marble.

A Berlin tailor, a lively speculator, exhibits a full Paris Congress costume for fashionable attraction. It consists of an Orloff great coat, a Walewski standing frock, a Cavour waistcoat, Carendon small-clothes, and Manteuffel cravat; with Aali Pacha shirt front, and a Buol claque.

The Government diver has discovered in Hamoaze the hull of a ship, supposed to be the frigate *Amphion*, blown up on the 22nd of September, 1796. Some efforts are to be made to raise portions of the wreck.

The *Montreal Herald* computes the number of runaway slaves in Canada as high as 30,000, which were worth to the States from which they escaped 24,000,000 dollars. It is said that the escapes into Canada averaged twenty per day

A board of directors has been nominated to form a company for the construction of a railroad from Vera Cruz to Mexico, by the plains of Apam and Puebla.

Gas was first introduced into the houses in Melbourne on the 1st of January. There were great rejoicings on the occasion.

In consequence of the unfavourable accounts from Paraguay relative to the manner in which emigrants are there treated, the French Government has suspended, until further orders, the granting of passports for that country.

Wall and Carr, the two men left at Liverpool to be hanged for the murder of a seaman by strangulation, have had their sentence commuted to transportation for life.

A grand agricultural exhibition will take place at Nicolaieff in May, 1857, to which will be admitted the productions of the governments of Kherson, Ekaterinoslav, the Taurida, and the province of Bessarabia. This will be the first time an exhibition has ever taken place on so large a scale, as it will comprise the productions of all Southern Russia.

Advices from the Sandwich Islands state that the lava stream from the great volcano was slowly winding towards Hilo, which it was feared it must eventually overwhelm.

An Act of Parliament was passed on Monday, by which the office of the Poor-law Secretary in Ireland is abolished.

Several batteries of artillery, just returned from the Crimea, were received in triumph on Sunday last at Strasbourg, to which garrison they had been sent. It is said that 20,000 citizens marched a mile out of the town to meet the troops.

The Cunard steamer *Persia* has performed the most rapid easterly passage on record. The length of her run has been nine days twelve hours—a surprising feat, considering the condition of the Atlantic at present.

# Memorabilia,

## LITERARY, ANTIQUARIAN, SCIENTIFIC, AND ARTISTIC.

*"A little chink may let in much light."*—Old Proverb.

### LETTERS OF SIR WALTER RALEIGH.

In the Excerpta from the Burleigh Papers in the British Museum, Add MSS 6177-6178, are several extremely interesting letters from and concerning Sir Walter Raleigh. Many of these, though of historical importance, have never, we believe, been printed; and those which have, for the most part only in works accessible to the scholar and antiquarian.

The following, dated May 3rd, 1592, and addressed to Sir Robert Cecil, must have been written only a day or two before Raleigh set sail on his memorable expedition against the Spanish Plate fleet. In this design he had been lavish of his means to fit out a suitable force, and had left no efforts untried to persuade his friends to join in the undertaking. The results, however, as History shows, were, like those of many of his great enterprises, sadly disproportioned to the endeavours used and the expectations excited.

"*Sir W. Raleigh to Sr. Ro. Cecyll, Privy Counsellor.* 1592, *May* 3.

" Sir,—May it please you to vouchsaufe to send for Mr. Burroughe the controler of the Admeralye, and to geve charge unto hime to repaire to Blackwale and to Ratcliffe to comand away thos Jlebotts [fly-boats] and other shipps that remayne, who cann best informe you of the possebilitey of these things. I am not able to leve to row up and down every tyde from Graveed to London, and he yt lies here att Rackleif can easely Judge when the rest and how the rest of the shipps may sale downe. I am cum up agayne as farr as Blackwall and would attend yow if I knew how or where: the names of those whom yt refuse to serve her Ma.stye, I have delivered to pope Marshall of the Admiralye, the rest shall also be sent hym: the names of the shipps remaynnge I will send to Mr. Burroughe use. I humble pray you to speake with all to hesten more greved than ever I was in anything of this woorld for this cross weather I humble take my leave, from Blackwale ready to go down again this tyde.

" Your honors to do yow service,

" The 3rd of May " W Ralegh "

A few weeks after Sir Walter Raleigh was recalled from leading this expedition he fell under the displeasure of the Queen on account of certain love passages between him and the beautiful Elizabeth Throgmorton, one of the Maids of Honour. For the offence he was incarcerated for eight weeks in the Tower. Upon his liberation he married Elizabeth Throgmorton, and retired, to indulge his genius for ornamental gardening, to his Castle of Sherburne, in Dorsetshire.* It was probably from this place that Lady Raleigh addressed the subjoined letter to Sir Robert Cecil.

"*Lady Raleigh to Sir Robert Cecil*, 1593, *Feb.*

" Sur,—I reseved your tabells of no less rare device than the scntans within was comfortable, if faith wear broken with me I was yet fare away, but I fear that my Mistress if all harts were opene, and all dreames known, might without so great curiosetye of desciphering read her owne desteni in a playne alphebet, but wee are bothe great belevers, and ther in wee flatter ourselves, and unclose our owne mindes with what we would: now our for the rest, I hope for my sake you will rather draw fur water towards the Est then healp hyme forward toward the soon sett, if ani respecke to me, or love to him be not forgotten; but everi months hashe his flower and even season his contentment and yon great Counsenors are so full of new councels as you ar steddi in nothing, but wee poore soules that have bought sorrow at a high price, desar & can be pleased with the same misforten wee hold, fering alterncations will but multiply miseri of wich wee have allredi faire sufficent. I knoo only your parswadins ar of effecte with him and hild as orrekeins † tied to them by love, therefur I humbelie beseuch you rather stay him than further him; by the wich you shall bind me for ever, as yet you have ever geveng me cans.—As chee that hounereth you most,

" E. Ralegh."

### NOTES.

When cigars are smok'd, and 'bacco's spent,
Then hemp it is most excellent.

Lilly, in the history of his life and times, says that the Rev. Wm. Beeding, Vicar of Thornton, in Buckinghamshire, was so fond of smoking, that when he had no tobacco he cut the church bell-ropes and smoked them. If the bells had been made of a smokable material, no doubt this inveterate fumigator would have smoked them also.

Did Jeffrey and Wordsworth ever Meet?—This question was put to a relative of Mr. Wordsworth in 1850, and his answer (which I have not met with among some old letters) seems worthy of preservation: "It gives me great pleasure to be able to answer your question at once from personal recollection. Mr. Wordsworth and Lord Jeffrey *did* meet. They met in London at the house of Sir James Mackintosh, in Great Conduit-street, where, at an evening party, and, at Lord J.'s request, the critic was introduced to the poet by Sir James. This was in June 1828. Mr. Wordsworth, with his wife and daughter, was then on a visit at my house in Beyanston-street; and Sir James and Mr. W. being then near neighbours, saw a great deal of each other. But I do not think there was any personal intercourse between Jeffrey and Wordsworth beyond that formal presentation to each other. An odd circumstance occurred lately. An American clergyman, a Mr. K——, had a letter of introduction to the poet at Rydal, who after reading it said they had found him an eccentric entertaining person. A few days afterwards Mr. Wordsworth received a letter from one of a committee of a Mechanics' Institute (at Manchester, I think) where this clergyman had been lecturing, and in the lecture he gave an account of his visit to Mr. W., his conversation with him, and, among other things, of Mr. Wordsworth having called Lord Jeffrey a puppy; and this, as it unluckily happened, but two or three days before Lord Jeffrey's death. Now, had Mr. W. chosen to let the world know that he thought Lord J. a puppy, he certainly would not have done so by deputy, and least of all through a stranger. He could not dream of the possibility of a clergyman's reporting in public a casual remark dropped at his own fireside. But he was not at all annoyed at it on his own account. He said he was only sorry for the foolish man who took so unusual a liberty, and that it was a pity it should have happened about the time of Lord Jeffrey's decease.—L.

The Swan as an Emblem in Art.—Venus, in classic art, is represented as drawn in a car by swans (Ovid Met. x. 717. Hor. Carm. iii, 28 v. 13. Stat. Sylv iii., 4, v 29); or as seated on the back of a swan about to take flight (Combe. Num. Vet. Pop. et Ur. tab xiv. fig 3. Middleton, Antiquitatis Eruditæ Monumenta. tab. xv. Description of the Ancient Terracottas in the Brit Museum. p. 36.) The last position may indicate the transitory nature of beauty or pleasure. The swan is usually represented in motion, indicating that something beautiful or pleasant was about to follow; for example, the swan in the act of rising to drink out of the tazza might indicate the pleasure which drinking out of it would give—that is, Venus follows the swan. But a poetical feeling of art must exist if these beautiful mythic emblems are to be interpreted in the allegorical sense of antiquity. Their expositor must even transcend Winckelmann, if not in the knowledge of art, at least in the poetico-allegorical principles of its interpretation. The name of owner or artist was sometimes indicated by these emblems, as in the vase Κύκνος ἐνοίησε might be meant (Winckelmann, Versuch einer Allegorie, c. v., pp. 167-180). In the Townley Gallery, room 2., No. 9, is a marble vase with two upright double handles springing from the necks of swans.—T. J. Buckton, Lichfield.

* There is an old story well known in Dorsetshire respecting this castle, to the effect that Osmund, one of William the Conqueror's Knights, who had been rewarded, among other possessions, with the Castle and Barony of Sherburn, in the decline of his life resigned his temporal honours and resolved to dedicate himself to religion. In pursuance of this object he obtained the Bishopric of Sarum, and gave Sherburn, with certain lands to the Bishopric, suneering to the gut the following curse:—"That whosoever should take those lands from the Bishopric, or diminish them in great or small, should be accursed not only in this world but in the world to come, unless in his lifetime he made restitution thereof." Upon his death, the castle and lands were possessed by the next Bishop, Roger Niger, who was dispossessed of them by King Stephen; after the Stephen, they came into the hands of the Montagues, all of whom, it is pretended, so long as they held, were subjected to grievous disasters, insomuch that the male line became altogether extinct. About two hundred years from this time the lands again reverted to the Church: but in the reign of Edward VI. the Castle of Sherburn was conveyed by the then Bishop of Sarum to the Duke of Somerset, who lost his head on Tower-hill. King Edward then gave the lands to Sir John Horsley; but the same Bishop alleging that he had conveyed them to the Duke under menaces and threats, they were decreed again to the Bishopric, with which they remained until the time of Sir Walter Raleigh, who, not having the fear of the present curse before his eyes, obtained them from those entertaining papers last week there is a slight hypercritical error which mars the meaning of a passage. In the exclamation of the Prussian officer to his King, the word "Sire" is spelt "Zire." The passage should run—"O, Sire, mad vous être mon Roy."

† Oracles.

### QUERIES.

Sodor and Man.—I should feel much obliged if you could enlighten me as to the meaning of the word "Sodor" in connection with the Isle of Man. The "Bishop of Sodor and Man" is a phrase we are all accustomed to; but where the former is situated, and why it has the first place in connection with Man, I have never been able to learn.—E. Q. V.

[The Bishopric of Man (established by St. Patrick, A.D. 400) formerly comprised the twenty-two Hebrides Islands, which were called "Insulæ Sodorenses." They were subsequently detached, but the title Sodor and Man was retained. There is a small island, formerly called Holm, now Peel, which has also borne the name Sodor, that is still within the diocese of Man. It is within a musket-shot of the Isle of Man. In a grant made by an Earl of Derby to a Bishop of Man in 1505, the Earl makes over "Ecclesiam Cathedralem Insulæ Sodorensis, cum suis Pertinentiis." The word Sodor is probably derived from the Saxon sud, or suth—meaning south, because the Hebrides were the southernmost islands met with by the northern marauders, who had to pass round the north of Scotland. In the Swedish language Sodder was south.]

Saffron Walden.—Can any of your correspondents inform me of the existence of any notice or tradition of Saffron Walden in Essex having been originally a Celtic colony? The learned Adelung, in his "Mithridates, or General Philology," gives a specimen of the dialect of Walden in Essex; "whose inhabitants," he adds, "are undoubtedly a Celtic colony." The language of the specimen, varying somewhat in orthography, is almost identical with that of the Highlands.—Fordington.

By Hook or by Crook.—What is the Origin of this Saying?—J. Houlton.

[A story has long been current that the saying took its origin from two Judges in the time of Charles I., one named Hook and the other Crook; but this is a vulgar error. The expression occurs nearly a century earlier in the works of Spenser, and before that in the writings of Archbishop Cranmer. It is nothing more than a facetious mode of expression; as we say one will pay a man "in meal or in malt," &c.]

Lord Pembroke's Port Wine.—Can any of your readers give to the public the receipt for the above, which was mentioned a few days since by Lord Palmerston? Perhaps his Lordship will favour—A Housekeeper!

### ANSWERS.

The Carthaginian Women.—Rollin, who gives the story of the Carthaginian women cutting off their hair to make ropes, refers to Strabo and Appian. On consulting these, I find as follows:—Strabo, lib. xvii., p. 833: Τρίχα δὲ τοῖς κατασκάπτουσι ἀι θεράπαιναι παρέχουν ("Their handmaidens gave their hair for the catapultæ"). Appian de bello Punico, p. 65: Καὶ κατασκάπτειν ἔσεσθαι τὸ τεῖχος. Ἐς δὲ τὰς ἐντάσεις αὐτῶν ἀπέκειραν αἱ γυναῖκες, τριχῶν ἑτέρων ἀπορίᾳ ("And they constructed as many catapults as they could. And to keep them taut they shaved their women's heads, in default of other material").—Q. V. Q., Oxford.

Why is the Isle of Man so Called?—The discovery of the marvellous inscription of Kirk Braddyn furnishes an answer that would delight the author of the "Vestiges" himself. But does your querist doubt the authority of the Scandinavian bard Snorrwykch, or the veracity of his informant, the Druid Drafyah? Does he question the development of the noble simiæ through the quadrumana into man? And will he favour us, through your columns, with a facsimile of this rare specimen of Celtic literature? With respect to the natural productions of the island, your querist forgets that in those distant ages the monkey isle must have been tropical, and its fruits appropriate to the noble simiæ; and unless, in the course of his researches in that interesting island, he is rewarded by the discovery of some redundant of a tail among its present inhabitants, I fear that science will be at fault in its investigation of the properties of the modern productions of its degenerate soil. But was this Isle of Monkeys really the Mona of the ancients? It is true that Cæsar's Mona was said to lie midway between Britain and Ireland; but surely Cæsar's Mona was the Mona of Tacitus also; and I doubt whether Suetonius could have persuaded "his choicest auxiliaries"—good swimmers as they were, even his gallant 11th—to have charged the Isle of Man from the mainland, in face of a motley array of armed men and Druids, under a flanking fire of execrations from female furies (Tac. An. L. 14, 29) armed with torches. No, the Mona of Tacitus was Anglesey, strange as it may seem that the stronghold of British Druidism should have lost all traces of its ancient masters, and be only known as the Isle of Angles.—Fordington.

Beggar-Bangor.—One of your correspondents asks if the office of Beggar-banger was known elsewhere than in the place he named. I can tell him, that previous to the introduction of Poor-laws in Ireland, both at Belfast and Ballymena, there were what were called county mendicant officers appointed by the grand jury and giving badges to the deserving, entitling them to beg; and in each town there was a kind of beadle called a bang-beggar, to take up or chase mendicants away from the locality.—Hibernicus.

In the parish books of St. Werburgh, Derby, under date 1735, appears a minute of the appointment of one James Alsop as "Bang-beggar" for the parish; and the office was known under that name within easy memory in Lancashire, if not elsewhere.—Derbyshire Club.

The town of Lancaster had an officer called the "Bat-beggar," or "Beat the beggar," whose office was to keep the town-hall, fish-stores, &c., and to put by unruly rogue into the black hole, which in Lancaster is denominated the "Kid-cote."—Edwd. D. Scott, Vicarage, Carisbrook, Isle of Wight.

Arms at Boston Vicarage.—"The arms of Bardney Abbey were sable, a crosier in pale between two crowns towards the chief, being run through an annulet towards the top, or, and a snake enwrapped at the bottom, arg."—*Ode MS.*, viii. 8. The church of St. Botolph, Boston, belonged to the Abbey of St. Mary, at York, and probably the arms are those of one of the abbots. I should not wonder if they proved to be those of Pigott, of the family who carried "Gu. a fesse arg. between three bezants."—Mackenzie Walcott, M.A.

Legacy of a Bed.—A bed was sometimes left as a bequest. To Bishop Braybrooke William of Wykeham left his state bed at Wolvesey Castle, with the set of crimson tapestry which belonged to it.—Mackenzie Walcott, M.A.

Culver Rent (Boston), *culvertage*, or *culvertagium* according to Mat. Paris, was explained by some authorities to be derived from *culum* and *vertere* to turn tail, *culvert* meaning a coward. According to other authorities the word signified the confiscation of an estate, or forfeiture of the vassal lands to the lord. Now as the tenant or vassal was bound by the nature of the tenure under which he held, to fight for his lord in the wars, and to neglect to do so, or to desert his lord in the field of battle before the latter was mortally wounded, would have caused a forfeiture of his estate, it is probable that the rent mentioned by your correspondent was in its origin a monetary commutation for the military service, and in those warlike days might have received the appellation of coward's rent.—Gar.

### TO CORRESPONDENTS.

Carabaya is requested to communicate his address to the Rev. John Mason, Sherburn Vicarage, Malton, Yorkshire.

G. Jones.—According to the age of the parents.

J. S.—From Addison's "Cato."

G. C., James-street, must be good enough to repeat the question. We have no recollection of it.

G. H.—It was given in our last Christmas Number.

Idiocta; W. Brown, Newcastle.—Your way of making what are called "April fools" is very ancient and very general. It is prevalent even in India; but the origin is not known.

Hibernicus.—The characters named are in Hirsall's novel of "Gindogby."

The Constable Family.—If "Antiquarius" will send his name and address, a correspondent promises to furnish him with some information relative to this family.

Charles Kean.—Your communication upon the subject of the Marriage Service would require much more space than we can spare.

Genesta writes us likely that sun-hail of the verses quoted on "New Year's Water" are undoubtedly

C. C. V. What is the origin?

Subscriber should give his name and address.

Musica.—The music of "Rule Britannia" was composed by Dr Arne for the masque of "Alfred," and first performed in the gardens of Cliefden house, Aug 1, 1740.

Sassenach.—The name of "Brentford's Parliament" may be observed in Satirical and Practical Relicks of the Welch Bards," by Edward Jones, vol. i., p. 163, fol. 1794; but he gives no account of its date or history.

Tom Pinch.—We must refer you to "Brand's Popular Antiquities" for an account of Easter eggs, commonly called Pasche eggs, or Paste eggs.

J. B. Thanks. But your note leaves no additional light on the subject.

Dean, Burnley.—The use of the pronoun his, as Grosswood Au book, &c., was merely a mannerism of English writers at one time. The genitive or possessive case, both in the ancient Saxon and in the modern German, in certain declensions terminates in es, and that is what we have retained in modern English

Burliophier.—Can our correspondent favour us with a sight of the Latin poem containing the suggestion of an electric telegraph? It will be carefully preserved and returned.

Egmont Diary.—"An Acquaintance of the late Earl" is thanked for the suggestion

Egmont Diary.—In our extracts from those entertaining papers last week there is a slight hypercritical error which mars the meaning of a passage. In the exclamation of the Prussian officer to his King, the word "Sire" is spelt "Zire." The passage should run—"O, Sire, mad vous être mon Roy."

Cuthbert Bede.—Received with thanks.

A. P., A Subscriber.—We cannot afford space or the verses.

J. S., Paris.—We are obliged by your explanations, but the letter containing them is too lengthy for this part of the paper.

Received.—Sologinesis Alumnus, F. G. R., J. W. W., Sevenoaks; A Saxon, J. M. C., Birmingham; Oar, R. B., Deborah, A Native of Ireland, A. P., Falconer, Mons. J. ## CHESS.

### TO CORRESPONDENTS.

W. C. C.—Stalemate makes a drawn game. It is to be hoped that when the new Chess Laws are published, we shall be spared the necessity of answering this and similar questions.

T., Boulogne.—We are still uninformed of the state of the contest between MM. St. Amant and De Rivière. Our last Circa news from the French caps al announces the arrival of M. La Rochu, and speaks of a match on the cards between this eminent player and M. de Rivière, but gives no particulars.

R. F. West Bromwich.—Many congratulations to be acknowledged the same week should reach our office by Tuesday morning.

Sigma.—To take the King's Pawn with Pawn.

C. L., North Carolina.—It shall have due attention. Your former Problem we believe was published but we cannot at the moment tell when.

C. B., Dundee; H. T. B., J. B., W. G.—In the Examiner's hands.

A. L., Melbourne.—Thanks for your very interesting communication. We do regret to hear that a taste for Chess is rapidly developing itself in the gold colony, and upon that every encouragement we have given to that and all other amusements of a finely and intellectual tendency. The Problems—Chess Problems from the Diggings—shall have a corner, if only for the novelty of their birthplace, though they deserve it probably for their merit!

J. H. P., Hatton-garden; C. T., of Brighton.—Under consideration.

J. G., Ipswich.—Some of the Games you mention, if we mistake not, were published, at the time they were played, in this Journal.

Solutions of Problem No. 633, by Alex. T. W. S., C. J. B., Argus, Q. B. of Sandesland, R. F., are correct.

Solutions of Problem No. 634, by F. R. S., Ernest, T. Simpson, W. T. B., Q. Yorke, Derby, Onyx, Madge, Old Salt, Murdoch, Phil-Chess, M. P., Major, Gregory, William, Unanimous, D. D., Perseus, Outcast, E. F. Norwood, D. T. N., Argent, W. H. Moss, Digby, C. H. D., Princess, are correct.

Solutions of Problem No. 634, by Dunwon, F. R., of Norwich; A. B. C., Delta, G. H. T., Miranda, Fred. T., Derby, J. de Hilton, W. H. Moss, are correct. All others are wrong.

Ehrmann.—In the notice to H. D., in our last week's Chess Column, instead of "an *officinal* and trustworthy Secretary," read "an efficient and trustworthy Secretary."

### SOLUTION OF PROBLEM NO. 632.

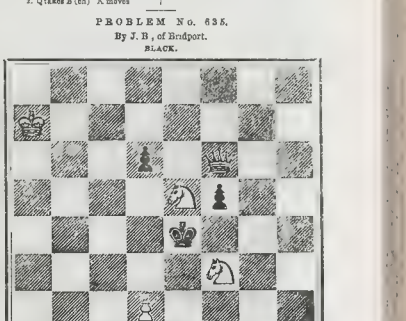
### PROBLEM NO. 635.

By J. B., of Bridport.

BLACK.



WHITE.

White to play, and mate in three moves.

### A GAME OF CHESS WITHOUT SIGHT OF THE BOARD.

*(Concluded from our last Number.)*

The following day, the vanquished, having returned from Blanc, we were assembled at La Cholière taking of heavens and earth, of the prowess of our soldiers and sailors in and near the Crimea, of the price of meat at Paris, of the cheap living in France, &c.,—when a cousin of M. de Rivière, who had been present the evening before, said, "Well, Armand, you won yesterday, it is true, and I saw with inexpressible astonishment the facility with which you unravelled the complications of each move; but it must be admitted that your adversaries did not defend themselves very well." "Oh, my dear cousin," said M. de Rivière, joyously, "when I was planning myself on my glory, you wish to detract from it!" "That is ill done, I see, as Molière says,—

' Les cadeaux mourront, mais non jamais l'envie.'"

"No, my friend, I have no desire to lessen your glory: but if I had the game before my eyes, I would show you that they might have defended themselves better." "The game! What have you forgotten it?" said M. de Rivière, "I will play it over to you." Having played every move over to his astonished cousin, M. de B. requested him to point out where the defence could be improved, and the cousin remarked that at the seventh move, instead of taking the Kt with the Bishop, he should have played—7. Kt to Q B 4th.* Upon this M. de Riviere played—8. Q to K 3rd, and the game proceeded thus—

| | | | |
|---|---|---|---|
| 8. | Q B to K 3rd | 16. Q to her 3rd | R to K sq |
| 9. P to Q Kt 4th | K Kt to Q 2nd | 17. B to K Kt 4th | Q to K 4th |
| 10. P takes P | K B takes P | 18. Q to K R 3rd | K to K 2nd |
| 11. K Kt to Q 4th | Q to K B 3rd | 19. P to K Kt 3rd | Q to K 6th |
| 12. Q B to Q 3rd | K B to K 4th | 20. Q Kt to Q 2nd | Q takes Q B P |
| 13. Kt takes Q B | B takes B | 21. Q Kt to Q Kt 3rd | B to Q Kt 7th |
| 14. Kt takes Q R P | K to Q sq | 22. R to Q sq | Q to Q B 3rd |
| | (double ch) | 23. Q Kt to Q B 5th | R to Q B 6th |
| 15. Kt takes Q R | B takes Q R | | |

Thus stood the game, and in a position sufficiently complicated; still, M. de Rivière's opponent felicitated himself upon having succeeded so well, when the cousin remarked. After dinner, when the evening was pretty far advanced, the cousin once more alluded to the game, and expressed a desire to finish it, challenging M. de R. to accompany him to the drawing-room, where the game was resumed as they had left it. But M. de R. replied "Go you to the board, I will answer your moves here. I have the game in my head. It is my turn to play, and I move

| | | | |
|---|---|---|---|
| 24. B takes Kt | B takes Q | 30. Q takes Q R P | R to Q Kt 5th |
| 25. Q to K B 5th | B takes Q Kt P | 31. Q to K 3rd (ch) | K to K sq |
| 26. Q to K B 4th | R to K 8th (ch) | 32. R to Q Kt 8th | Q to Q B 3rd |
| 27. R takes R | B takes R | 33. P to K R 4th | Q to K 3rd |
| 28. Kt takes Kt | Q takes Kt | 34. Q to Q R 3rd (ch) | K to Kt sq |
| 29. Q to Q Kt 8th (ch) | K to K 2nd | 35. Q takes B | Q to B 5th (ch) |
| | | 36. K to K 2nd, and wins. | |

It must be remarked that White's 33rd move was a subtle snare on the part of the blindfold player; for if Black, thinking to win the Kt, had played B to Q 8 4th, he must have lost a piece, because the Queen would have taken the Bishop; and if Black took the Q, the Kt would have checked K and Q, &c. It must also be noticed that Black's mistake at move 33 was caused by a servant entering to tell the player that some one wished to speak to him. He had observed the stratagem of his adversary, and complimented him upon it; but in his eagerness to go out, he rose hastily, played his move without reflection, and thus lost a game which would probably have terminated as a drawn battle.—

*Abridged from an article in La Régence*

Huddersfield Chess-Club.—The annual meeting of this flourishing club was held at the Imperial Hotel on Saturday, March 29th. The rooms were open for the evening, when a match was commenced between the leading members of the Huddersfield and Wakefield Clubs: the former town being represented by Messrs John Watkinson, D. Marsden, — Tarn, and G. H. Shepherd; and the latter, by Messrs. E. Shepherd, W. Jo. Robinson, W. Hunter, and C. S. Bennett. It was agreed that two games should be played between each couple of competitors (inclusive of drawn games), and that the players, as nearly as possible, should be matched according to their respective strength, when they stood as follows:—

| Huddersfield | | Wakefield. |
|---|---|---|
| Mr. T. Watkinson | against | Mr. Sir-pherd |
| ,, D. Marsden | ,, | ,, Robinson |
| ,, — Tarn | ,, | ,, Hunter |
| ,, G. H. Taylor | ,, | ,, Bennett |

Mr. Watkinson won the first game of Mr. Shepherd, and drew the second. Both the games between Messrs. Marsden and Robinson were drawn. Messrs. Tarn and Hunter each succeeded in winning one game; and Mr. Taylor drew the first, and won the second game from Mr. Bennett. The total score thus giving—

| Huddersfield, 3. | Wakefield, 1. | Drawn games, 4. |
|---|---|---|

We understand this is the first match that the Huddersfield Club have engaged in, and the result must be very gratifying to them, matched as they were against such veteran players. At seven p.m. the company adjourned for refreshment; after which chess play was kept up between the members of the two clubs with great animation until a late hour of the evening.

* For the opening moves see our last week's number.

# THE FALKLAND ISLANDS.

STANLEY HARBOUR, PORT WILLIAM.

The Falkland Islands form an extensive group, situated between the parallels of 51 deg. and 52 deg. 25 min. south lat., and 57 deg. 42 min. and 61 deg. 30 min. west longitude. They consist of two large islands, separated by a strait called Falkland Sound, and there are nearly 200 smaller islands studding the coasts, more particularly on the east and west sides. The climate is, although subject to frequent gales of wind, mild as to temperature—the thermometer rarely falling under 25 deg. Fahr. in the winter, and seldom exceeding 72 deg. in the summer. European vegetables and green crops succeed well, but from want of shelter the attempts to raise corn have not been successful.

Their first discovery is claimed by Davis, Hawkins, and others, about the close of the sixteenth century, who seem to have visited them in their exploring expeditions round Cape Horn to the western coasts of South America; but no attempt was made to found settlements until 1763, when, almost simultaneously, England, France, and Spain took possession of them in different situations, and, after serious disputes as to their rights, Spain purchased the cession of the French claims, and dispossessed forcibly the English from Port Egmont. To revenge this insult a strong squadron was fitted out in England; but when nearly ready to sail the quarrel was compromised by Spain giving up her occupation of Port Egmont and by abandonment of the islands. The English flag was rehoisted; but subsequently England withdrew her establishment and suspended any further attempts at that time to colonise.

Until about 1825 the Falkland Islands seem to have been resorted to by Spanish, English, French, and American whaling and sealing vessels indiscriminately, without any of them exercising recognised sovereignty. About that period, however, some cattle and horses which had been put on the east island by Monsieur de Bougainville (during his occupation as leader of the French settlement in 1764) attracted notice from their greatly increased numbers, showing evidently that the climate and the pasturage were favourable for those animals; and the Buenos Ayres Government, pretending to claim the islands as successor to the rights of Spain in those latitudes, established a small colony under Don Luis Vernet at the old settlement of Port Louis in Berkeley Sound. This gentleman attempted to maintain with a strong hand the unwarrantable authority which he held, and seized two United States' American schooners which were sealing on the rookeries, which he claimed as the property of Buenos Ayres. The condemnation of these schooners, the confinement of the crews by Monsieur Vernet, and the subsequent destruction of his settlement by a United States' ship of war, the *Lexington* followed shortly afterwards. On hearing of those events, the British Government sent H.M.S. *Clio*, in 1833, to resume possession of the islands, asserting that England had only suspended occupation, but had never abandoned the rights of sovereignty which she claimed by priority of discovery, and which had been acknowledged by France and Spain by treaty in 1774.

Until 1842 a naval officer, with a small vessel of war in charge of the flag, kept possession at Port Louis; when Lord John Russell determined to

THE SPANISH-AMERICAN GUACHOS CATCHING WILD HORSES, IN THE FALKLAND ISLANDS

# THE FALKLAND ISLANDS.

ENCOUNTER OF A SEALER WITH A SEA-LION, IN A TUSSAC BOG.

prepare for constituting the Falkland Islands a British colony; and an officer of Engineers, now Colonel Moody, was sent out as Lieutenant-Governor. In 1845 a Royal charter incorporated the islands formally as a British colony, and promoted the Lieutenant-Governor to full governmental powers. The settlement at Port Louis having been found difficult of access for damaged ships against the prevailing westerly winds, it was resolved about the same time to remove the seat of Government to Stanley Harbour, Port William, on the extreme easterly point of the East Island (See the first Engraving). The entrance to Port William is made conspicuous by a handsome cast-iron lighthouse lately erected on Cape Pembroke, showing a steady, brilliant light; and about five miles up Port William is a narrow entrance of deep water into Port Stanley, which is five miles long by half a mile broad, with excellent anchorage for large ships close to the town. The principal value of these islands to Great Britain consists in their geographical position, forming the only half-way touching port, or port of refuge for the whole of the outward-bound trade to the Pacific and the west coasts of the Americas, and in the direct homeward track of the Australian and New Zealand commerce.

The port of Stanley is entirely free for ships of all nations. No Custom dues are levied, and, from the facility of entrance, pilotage is optional; nor are any anchorage or port charges whatsoever exacted. Supplies of all kinds, with the means of refitting damaged vessels, are readily procurable, and at much more reasonable prices than in the South American ports.

Besides wild cattle, horses, and pigs, sheep have been of late years introduced, and the growth of wool commenced under promising aspects. The islands abound with wild fowl of various kinds, and rabbits in myriads; whales, sea-elephants, and seals are plentiful around the coasts, and large quantities of mullet are caught in the creeks.

In the foreground of this View there are plants of the Tussac grass (*Dactylis cæspitosa*) and Balsam bogs (*Bolax glebaria*). The latter is thus described by Sir W. Hooker:—

Living or dead and dried, it could not but be desirable that so remarkable a vegetable production should be brought to England; but all our attempts to procure it were in vain till the present time (February, 1856), when the late Governor of the Falkland Islands, George Rennie, Esq., had the extreme kindness, and with no small labour and expense, to bring home with him a very fine specimen for the museum of the Royal Gardens, Kew, and in the most perfect state of preservation. At the railway station the single box, with its solitary specimen, including the soft packing materials (filamentous lichens) was found to weigh 547 lbs. Deducting the strong case, 234 lbs., and the soft packing, 10 lbs., we have 303 lbs. as the actual weight of the specimen. It was an interesting occupation for stay-at-home travellers to witness the opening of the case. The very packing stuff had charms for the cryptogamic botanist, consisting, as just observed, of the filamentous lichens of the country. They

SEA-LIONS, IN THE FALKLAND ISLANDS.

consist[illegible] [illegible] [illegible] *Usnea barbata*, a species both arctic and antarctic, and inhabiting the highest mountains of the Andes, even under the Equator: several species of the ubiquitous *Ramalina scopulorum*, severally in copious fructification; and no better package could possibly have been employed. They retained a certain degree of moisture, were soft and elastic, not in the least disposed to heat or decay; all looked as fresh and as bright-coloured as if they had been but just gathered from their native rocks—a lesson for those who have occasion to pack many living plants for long voyages.

On the removal of the lichens, the hummock of the *Bolax gleberia* came fully into view. Its broad base rested firmly on the bottom of the box; it required four men to remove it. Its shape is an irregular hemisphere, 2 feet high, [illegible] feet broad in its greatest diameter; the circumference at the base is 10 feet, and it measured from side to side, carrying the line over the summit, 6 feet. The whole is composed of innumerable green cones, consisting of the stellated, or rosulated ultimate shoots of the plant, so closely packed that not a pin's breadth of vacancy can be perceived between them. Beneath is a cavity—how deep we know not—occupied by decayed vegetable matter the detritus of former years, root, and stem, and leaves—a perfectly black soft mould. This has not only afforded nutriment to the surviving limbs of the parent plant, but to a foreigner also. These has emerged from the side of the crust, near the base, a very fine specimen of the *Empetrum rubrum* (an exact representation of our northern cranberry, *Empetrum nigrum*, only bearing red instead of black berries), a tuft a foot in length; and from the very summit of the bolax rises another specimen of *Empetrum*, forming a crest to the hummock."—*Abridged from the "Transactions of the Zoo Manton."*

The second illustration shows the mode in which the wild horses are caught in the Falkland Islands by the Spanish-American Gauchos, who are chiefly employed in cattle-farming operations. Taking in his hand two or three stone or lead balls, attached each to the end of a strong cord, the other ends of which are fastened together, the Gaucho gives chase on horseback to the wild animals, swinging the balls round his head in a circle, and, when near enough, he throws them at the hind legs of the horse he selects. The balls, by the centrifugal force, twist round the legs of the animal, who rolls over and is immediately secured. In the landscape may be seen one of those remarkable streams of stones, so frequently met with in the Falkland Islands, crossing the quartz strata of the mountains. They resemble macadamised roads in many respects, although the stones are of Brobdignag dimensions, varying in size from 1 cwt. to five tons in weight. At a distance they frequently resemble streams of water with small islands and cascades.

The third engraving represents an encounter of a sealer with a sea-lion in a Tussac bog. The male of the Falkland seal resembles in no slight degree in the head and mane the king of the forest. He is, when full grown, about ten feet long, and, although not disposed to make an attack, is a most formidable antagonist to come upon unawares in the thick groves of the Tussac, where, more particularly in the breeding seasons, he with his family are found. The female is scarcely one-half the size of the male, and is more gentle in disposition.

In some of the smaller islands, which are generally covered with Tussac grass, the seals congregate in great numbers, called rookeries, and, to avoid the danger of attacking them under cover, the sealers set fire to the grass, which, of course, obliges the alarmed inhabitants to scamper helter-skelter down their pathways to the sea, on the road to which they are attacked and slain in great numbers for their oil and skins. A group of sea-lions is engraved in the fourth illustration.

We are indebted for the accompanying Sketches to the courtesy of Mr. George Rennie, F.S.S., late Governor of the Falkland Islands.

## ARCTIC EXPLORATION.

THE following important and interesting paper, by Mr. R. White of East Cowes, has lately been read before the Royal Geographical Society, communicated by John Barrow, Esq., F.R.S., &c., Admiralty:—

The return of Dr. Kane's American expedition having furnished us with a corroboration of our long-entertained opinions of an "open Polar Sea," induces me to lay before you a model and diagrams illustrating the subject; not that it is not familiar to our scientific and able navigators who have severally expressed their opinions on the subject; but the reason why such opinions were not more freely have not been generally known and published.

I desire, therefore, to lay before you, in a very simple manner, some of the principal reasons why, from known "physical causes," such an open Polar Sea should be the "fact;" and—

1st. I would mention the inclination of the earth from the Pole of 23½ degrees in its revolution round the sun (causing our seasons) will of itself show the poles of cold at the northern and southern extremities of the globe must be 23½ degrees from the actual Pole or axis of the globe, in consequence of its diurnal revolution around the inclined Pole instead of around a centre directly opposite the sun,—supposing the configuration of land and sea to be equal, and the currents of the ocean not to affect it. That they do so does not affect the principle, but illustrate it. The model on the table shows the action of the sun at both Poles—the northern hemisphere being enlightened while the southern is in darkness. The globe has been cut in two at 23½ degrees, the better to show the subject at one view.

DIAGRAM NO. 1, SHOWING THE INCLINATION OF THE AXIS OF THE EARTH TO THE SUN, VIZ. 23½ DEGREES.

The Gulf Stream, as seen in Diagram No. 1, passing to the north of the Hebrides, and entering the Polar Sea between the North Cape and Spitzbergen, carrying with it its heat acquired in the tropics causes a milder temperature on the shores of Great Britain and Norway; and, entering the Great Polar Sea, makes its circuit along the Russian shores, past Behring's Strait, and returns by McClure's Strait, Barrow's Strait, and its tributary straits, Byam Martin's Strait and Wellington Channel, into Baffin's Bay and Davis's Strait to the North Atlantic Ocean. The outlet at Behring's Strait being so narrow, and the depth of water across its entrance so shallow—from seventeen to twenty fathoms only—causes their drift to be arrested, and to form the impenetrable pack-ice, not possible for any sailing ships to pass through (steam has not been tried), except in open lanes between the grounded ice and the shore. The drift ice set loose from the Great Polar Basin, is thus compelled to return by the route before mentioned. This has been proved by the difficulties the whalers and all the expeditions have experienced in forcing their passage upwards against the current and masses of drift ice and enormous icebergs of land formation that are yearly detached from the shore to drift with the downward current till the combined action of the sun and water gradually cause them to disappear about the parallel of Newfoundland (though sometimes they are fallen in with by the American packet-ships on their passage to New York); but by the drift in the pack of Sir James Ross's expedition from Leopold Island in 1849; by the winter drift of the American expedition, *Rescue* and *Advance*, from Wellington Channel to Disco in 1850; and now the still later drift of the *Resolute*, Captain Kellet's ship, from Melville Sound, where she was abandoned in 1854, and picked up by the *American*, in 1855, in Davis's Strait, and towed in safety into New London, in America. That it is a constant stream, except when disturbed by adverse winds, the voyages of Captains McClure and Collinson abundantly show; they having succeeded in navigating their deeply-laden sailing ships along that coast without meeting with so much annual difficulty as has been experienced in Melville Bay; and had they had the advantage of steam-power, no doubt would have accomplished much more.

*The length of the day at the Pole*, as shown in Diagram No. 2, from the time of the sun's rising to its setting, is six months of constant daylight; during which time, from its first appearance above the horizon, it shines in one direction, rising gradually in a perpendicular direction for three months, until it has attained its greatest altitude, and then sinking daily until it disappears entirely for the next six months. The heat that would arise from such constant action in one direct line (though its altitude is small) must be great; and from its constantly infusing heat in one direction, sufficient to melt any quantity of ice in its vicinity. Every degree we come from it, as the earth revolves

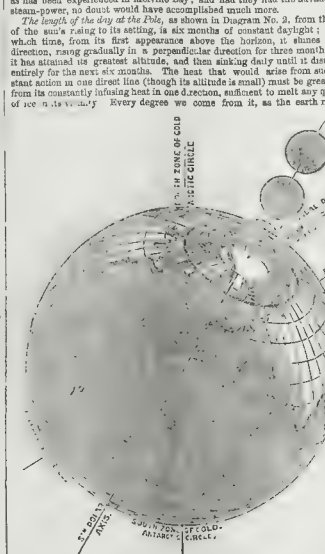


DIAGRAM NO. 2, SHOWING THE POSITIONS OF THE SUN AT THE NORTH POLE DURING THE SUMMER MONTHS.

round its axis daily, causes an apparent motion of the sun, and a consequent loss of power, and when we get beyond 23½ deg., where it sinks below the horizon daily, the loss is total; for the time of its absence, and the absorption of heat during that time by the atmosphere has to be replaced on its rising before it regains the temperature it had lost and can receive any permanent addition. The latent heat required to be infused into ice to heat it 1 deg., so that it will melt into water at a temperature of 32 deg., or the freezing point, is 140 deg.; or water will gain 140 deg. of heat, while ice is merely melted into water at 32 deg. (see Arnott's Elements of Physics, section "Heat," p. 88). Had the latent heat of water been only 1 or 2 deg., instead of 140 deg., the earth, except in its tropical regions, would have been scarcely habitable. The cold of a single night might have frozen an ocean, and the heat of a single day have converted the accumulated snows of a winter into one sudden and frightful inundation; the Mer de Glace, in Switzerland might be melted in a summer's day, and cause destruction to the country around. As the fact is, however, both changes are beautifully gradual, and easily controlled or prepared for.

The latent heat of 140 degrees, required before ice will melt, has thus to be reproduced at each sunrise, and the work to be done over again every day. While at the Pole itself, and wherever the sun does not sink below the horizon within the Arctic circle, from the time of its making its appearance, it gives heat, and continues gaining power of melting the ice without such loss or diminution. These causes alone would seem to be a sufficient reason to account for the open water seen by Barentz when wintering at Nova Zembla, in 1597 (See "Beechey's Voyages by the North and East," from page 162). "On the 22nd of February, when they saw much open water in the sea, and on the 8th of March, with a south-west storm, and great store of snow, whereby we could see no ice north-east nor round about in the sea, whereby we were of opinion that north-east from us there was a great sea, but not towards Tartaria to the southward. And on the 10th, it was clear weather, the wind north, at which time we saw quite an open sea, whereon we said one to another that, if the ship were loose, we might venture to sail away.

The same appearances of an open sea have since been seen by Captain Penny and Sir Edward Belcher in Victoria Channel, and now by Dr. Kane to such an extent as to make it questionable whether at the Pole the sea ever freezes to any great depth.

Could being but the absence of heat, while the great natural source of heat is the sun, the heat from whose rays is a sensible reality,—it follows that such heat, continued for six months without loss or diminution, as previously named, would, after melting the surface ice of an ocean of any considerable depth, raise the temperature of such ocean, increasing also as the depth from the natural heat of the earth, as we descend, so considerably, that it would require a long time for the air to abstract its latent heat of 140 degrees, so as to form a surface ice. As ice expands by crystallising in the process of freezing, and thus acquiring bulk rises to the surface, it forms a natural barrier to the further absorption of heat by the atmosphere, and keeps the water below it from losing its temperature. Thus it is not probable ice can under such circumstances form to any great thickness in an open sea, and would require the presence of land to accumulate glaciers of frozen snow of sufficient thickness to resist the returning action of the sun's rays.

In Colonel Sabine's account of Baron Wrangel's voyages from Siberia to the Polar Sea, he says the thickness of ice formed in a single season (where we consider the greatest cold to be) is about nine and a half feet, and those to the north and west of Spitzbergen to be from nine to ten feet in thickness. Baron Wrangel's endeavours, by means of sledges in the spring, to cross this ice to the northward, repeated during three years and from many different points, terminated in his conducting them to an open and navigable sea. From whatever point of the coast their departure was taken, the result was invariably the same. After an ice journey of more or less continuance, they arrived where further progress was impossible; where, to use the words of Baron Wrangel, "We beheld the wide unmeasurable ocean spread before our gaze—a fearful and magnificent, but to us a melancholy spectacle. Fragments of ice of enormous size floated on the surface of the agitated ocean, and were thrown by the waves against the edge of the ice-field, on the further side of the channel before us. We could go no further. According to my reckoning, we were in 70.31 N., and 175.27. We had 22½ fathoms water, with a clay bottom!

Again in Captain Parry's adventurous voyage to cross the ice in boat sledges from Spitzbergen to the northward,—the greatest distance from the ship reached was 172 miles, to reach which they had travelled 668 miles, and there the continued drift of the body of the ice showed that there was an open space both in the direction of its course and in that it had drifted from. The sea was 800 fathoms deep, and there seemed to be nothing more to impede a vessel's course than there was met with near the margin—that is, a sea covered with broken fields of ice, which might open or close with the tide. We may infer from the modern day after day, in a south-westerly direction, that there must be a considerable space of open water in its "rear."

It is seen from this that the great obstacle which obstructed Parry and Buchan's progress was a barrier of drifting ice stretching from Spitzbergen to Greenland, and generally in motion. Southward no such barrier exists on the Nova Zembla side, where the Gulf Stream enters, and it still remains to see what with the aid of steam can be accomplished there, where none have followed since Barentz led the way.

I cannot conclude without hoping, now that the return of the Hudson's Bay expedition has brought no further intelligence than the confirmation of a *boat* party having reached and perished at Montreal Island, some further steps will be taken (as the only memorial we can do) to recover the lost records of the missing expedition. The remains of the ship cannot be far off, and can be reached, and no doubt valuable records found. I doubt not such men as Captain Collinson and Captain Osborne would find no difficulty in doing so; and, if I am correctly informed, they have expressed their opinions to that effect. If they cannot be spared, there are others who are ready; and surely we must all wish to bear this last tribute to the memory of Sir John Franklin and his gallant companions.

R. WHITE.

UNIVERSAL AGRICULTURAL EXHIBITION AT PARIS.—Between the 23rd May and 7th June next an Exhibition of Foreign and French Breeding Stock, Agricultural Implements, and Products, will take place in Paris, on a scale of great magnificence and liberality. For English cattle the following prizes are offered, viz.—for Shorthorns, eight premiums, amounting to £193; Herefords, four premiums, amounting to £162; Devon, Sussex, and analagous breeds four premiums, amounting to £102; Ayrshire, Alderney, and analagous breeds, £170, in £10 premiums; and for all other English, Scotch, and Irish breeds not specified, £122, in six premiums. Handsome premiums are also offered for the following foreign breeds, all, without exception, dairying stock, viz.—Dutch and analagous breeds; Swiss—viz., Fribourg, Berne, and analagous stock; Agricultural Implements

Catalogue of tunes, &c., gratis, and sent free on application.

TOLKIEN'S 25-GUINEA Royal MINUTO PIANOFORTES. H T., the original maker of a 21-Guinea Pianoforte, has by the care he has devoted to all branches of the manufacture, obtained the highest reputation throughout the country for his instrument, unequalled in durability and delicacy of touch, more especially for their excellence in standing in tune in the various climates of our colonies. In elegant walnut, rosewood, and mahogany. Cases packed for abroad for £3 10s. extra. H. Tolkien's Manufactory, 76 to 84, Bridge-road, Hammersmith, London.

GEORGE CASE'S CONCERTINAS.—These unrivalled instruments are manufactured solely by BOOSEY and SONS, 71 Ho ex-street. Central sh-square. Prices from 4 to 12 guineas each, with 48 keys, and in a variety of woods. Full particulars gratis. Just published, a third edition of Mr. Case's Concertina Instructions, price 5s.; and La Sonnambula, complete for Concertina, 4s. Also, the Concertina Miscellany, by George Case, published every month, price 6d.

BOOSEY'S ROTARY CORNET-A-PISTONS. This beautiful instrument has taken its high position as superior to all other models, both as regards perfect intonation and equality of blowing. Price seven guineas with valves, or nine guineas with keys and finders. The largest and most varied stock of Cornets-à-Pistons by Boosey and Besson will be found in Boosey and Sons' extensive Musical Repository, 24, Holles-street. Prices from 2 to 10 guineas each, in brass, silver, and gold. Just ready, Boosey's New Sacred Tunes, price 3d., and the Sacred Miscellany, by Thomas Harper, published every month, price 3d.

CHAPPELL'S FOREIGN MODEL PIANOFORTE, Price Fifty Guineas. This instrument has (unlike the ordinary Pianoforte) Three Strings, and the fullest possible compass of Seven Octaves. It is strengthened by every possible means to endure the greatest amount of wear, and to stand perfectly in any climate. The workmanship is of the best description, the tone is round, full, and rich, and the power equal to that of a Richord Grand. The case is of the most elegant construction in rosewood, the touch elastic, and the repetition very rapid. Every possible precaution has been taken to ensure its standing well in tune. Mr. Chappell especially invites the attention of the public, the profession, and merchants to the Foreign Model, feeling assured that no Pianoforte, in all respects comparable, has hitherto been made in England at the same price. Every instrument will be warranted, and if desired, exchanged within twelve months of the purchase.—50, New Bond-street, London.

From Dr. C. W. LEVER, Esq., M.D., Physician, Accoucheur, Guy's Hospital, Fellow Royal Med. Chir. Society, &c. &c.
"I perceive you have introduced the Quinine into the Cod-Liver Oil in the most elegant and effective manner. I have prescribed it in many cases of debility, and I have no hesitation in saying it is a valuable addition to the Pharmacopœia."
From Dr. ROBERT BENTLEY TODD, F.R.S., Professor of Physiology and Pathology in King's College, London, and Physician to King's College Hospital.
"I have frequently prescribed your Quinine and Cod-Liver Oil, and have found it a valuable combination, and one which such cases as I have had to treat require."
From Dr. ALEXANDER SHARPEY, F.R.S., Professor of Physiology, Anatomy, and Medicine, University College, London.
"I have had to do in three or four cases of debility with persons for whom the Cod-Liver Oil was prescribed, and I have found the addition of Quinine to it very beneficial."
Sold in bottles at 2s. 6d., 4s. 6d., and 10s. each, by all persons for the Proprietors, B. DREW and Co., 91, Blackman-street, Borough, London.

DR. DE JONGH'S
**LIGHT BROWN COD-LIVER OIL,**
prescribed with complete confidence by the Faculty for its purity, speedy and uniform efficacy, entire freedom from nauseous flavour, and marked superiority over every other variety

EXTRACTS FROM RECENT MEDICAL OPINIONS.
The late JONATHAN PEREIRA, M.D., F.R.S.,
Professor at the University of London, &c., &c.
"It was fitting that the author of the best analysis and investigations into the properties of this oil should himself be the purveyor of this important medicine. I am satisfied that for medicinal purposes no finer oil can be procured."

DR. LETHEBY,
Medical Officer of Health to the City of London, &c., &c.
"The Dr. Jongh's oil is in all its characters with the analysis of Hull, Brunn' and described as the best variety in the masterly treatise of Dr. De Jongh. From my investigations, I have no doubt of its being a pure and unadulterated article."

ARTHUR H. HASSALL, Esq., M.D., F.L.S.,
Chief Analyst of the Sanitary Commission of the "Lancet," &c., &c.
"So great is my confidence in the article, that I usually prescribe it in preference to any other, in order to make sure of obtaining the remedy in its purest and best condition."

Sold by ANSAR, HARFORD, and CO., 77, Strand, London, By De Jongh's sole British Consignees; IN THE COUNTRY by many respectable Chemists.
Half-pints (10 ounces), 2s. 6d.; Pints (20 ounces), 4s. 9d.; Quarts (40 ounces), 9s. IMPERIAL MEASURE.
CAUTION—Each bottle is sealed with a stamped metallic capsule, and bears Dr. De Jongh's signature and Stamp under a label with Dr. De Jongh's stamp and signature. All Oils offered as Dr. de Jongh's, or as of the same kind, without such marks, are fraudulent impositions

**FOR the COMPLEXION.—GOWLAND'S** LOTION.—All persons exposed to the weather at this season will immediately on the application of this celebrated herbal preparation experience its extraordinary genial qualities. It produces and sustains great purity, delicacy, and vivacity of complexion; removes freckles, spots, and pimples; and promotes healthy action, and elasticity of the skin. Sold by all Chemists and Perfumers, price 2s 9d., 5s. 6d., and 8s. 6d. per bottle.

**MODERATOR LAMPS.**—Simplicity, strength, and general good finish, continue to recommend the Lamps BY PEARCE and SON above every other kind. The Patterns are allowed to be the best in the Trade. They are new, very uncommon, and in the best taste; most of them—especially those for suspending—are chiefly to this house—being works of Art of high merit.—Thomas Pearce and Son, 23, Ludgate-hill.

**WALNUT DRAWING-ROOM SUITE** of FURNITURE, very superior secondhand, in perfect condition—a great bargain, consists of its excellent spring-seat couch covered in rich satin tabaret, spring-stuffed settee, and easy chair en suite; a set of fluted chairs loose cover for dining; handsome loo-table on carved pillar and a new, an occasional table; chiffonier, with richly carved top and centre, drawers, fitted with plate-glass and ormolu mirror back; papier maché occasional chairs, inlaid with pearl; and a large-size chimney-glass, in carved wood, gilt frame. Price for the whole 24l. To be seen at LEWIN CRAWCOUR and CO.'S, Upholsterers, 7, Queen's-buildings, Knightsbridge (seven doors west of Sloane-street).

MANUFACTURERS BY SPECIAL APPOINTMENT TO THE QUEEN.
Obtained the Prize Medal Great Exhibition, 1851.
**J. S. FRY and SONS have all the advantages** which experience and a manufactory on a large scale can command. FRY'S FRENCH CHOCOLATES, which are used at the ROYAL TABLE, and by the FIRST NOBILITY, are delicious both taken as a beverage, and for eating. Those who wish a cup of really fine, delicious, well-flavoured Chocolate, to pass softly off the palate, should obtain these articles. Important directions are contained in each package. Most persons have never tasted the beverage in perfection. Fry's Chocolate Bonbons are delicious and nutritious confectionery for the nursery, for invalids, for the nursery, and the fashionable table, and especially adapted for presents. Their celebrated cocoatine Cocoa is so moderate in price that no one has any reason to other makers. It will go farther than inferior qualities; those purchasers obtain most for their money by using Fry and Sons' Soluble Cocoa, in green and gold, or in hexagon packets, will be found of excellent quality. Fry's Homœopathic, Dietetic, and Granulated Cocoa possess perfect solubility—light, nutritious, and delicate articles—to invalids invaluable. J. S. Fry and Sons' name on the label of their Cocoa Nibs will warrant them perfect purity. Fry's Patent Cocoa possesses a full flavour. J. S. Fry and Sons, Bristol, Manufacturers to all Lands of Chocolate and Cocoa. Fry's Chocolate and Cocoa Paste, Chocolate Powder, Broma, and Soluble Chocolate, require no boiling. Sold by Teadealers, Grocers, and Druggists in Great Britain and Ireland. Be careful to observe that the name of "Fry and Sons" is on the packet of each article. Inquire at all Grocers for "Fry and Sons' book on Cocoa, gratis. To Soluble Cocoa Drinkers: use Fry's Hexagon Packets.

DECLARATION OF BONUS.
**ROYAL EXCHANGE ASSURANCE** OFFICE, London, January, 1856
The Governors and Directors have to announce to the holders of Life Policies effected on the system of Participation in Profits adopted by the Corporation in December 1844, that a Second Septennial Bonus has been declared in respect of the surplus realised on that account. Such Bonus attaches to all Policies—effected subsequently to 1841 for the whole term of life, on the participating scale of premium—which were subsisting up to the close of the 31st day of December, 1855, and on which three or more annual Premiums had then been paid.
The following Table shows the amount of Reversionary Bonus added to British Policies of fourteen years' standing, for the sum of £1000 each:—

| Age when Assured. | Addition to Sum Assured. 1848. | Further Addition in 1855. | Total Addition. | Per Cent per Annum on the Sum Assured. | Per Cent on the Premium paid. |
|---|---|---|---|---|---|
| | £ | £ | £ | | |
| 20 | 102 | 113 | 214 | 1·13 | 9·2 |
| 25 | 106 | 121 | 227 | 1·34 | 10·4 |
| 30 | 113 | 121 | 234 | 1·47 | 10·5 |
| 35 | 121 | 130 | 251 | 1·72 | 12·0 |
| 40 | 133 | 140 | 273 | 1·98 | 13·0 |
| 45 | 149 | 154 | 303 | 2·16 | 13·9 |
| 50 | 165 | 174 | 340 | 2·43 | 15·2 |

Equivalent Reductions have been made in the Annual Premiums payable by those persons who preferred that form of Policy.
The future divisions of Profit will take place every Five Years.
Any sum not exceeding £10,000 may be insured on the same Life.
The Corporation affords to the Assured a liberal participation in Profits, with exemption from the liabilities of Partnership.
Rates of Bonus equal to the average returns of Mutual Societies, with the guarantee of a large invested Capital Stock;—the advantage of modern practice, with the security of an Office whose resources have been tested by the experience of nearly a century and a half.
Fire and Marine Assurances are granted on liberal terms.
Tables of Premium and other particulars may be obtained at the Chief Office of the Corporation, in the Royal Exchange, London; at the Branch Office, No. 29, Pall-Mall; or from the Agents appointed in the principal Towns in the United Kingdom.
JOHN A. HIGMAN, Actuary and Secretary.

## NEW MUSIC, &c.

**THE WHITE DOVE.** An easy Song, specially composed for Youthful Perform ers. By HENRY ROE, Highbury

No. 795.—VOL. XXVIII.] SATURDAY, APRIL 26, 1856. [WITH TWO SUPPLEMENTS, TENPENCE.

## THE GREAT NAVAL REVIEW.

THE splendid demonstration of which, on Wednesday last, the waters of the Solent were the scene, and of which at least a quarter of a million of people were the spectators, was scarcely needed to impress either natives or foreigners with due respect and admiration for the might and majesty of Great Britain. A fleet carrying more guns than were mounted on the formidable batteries of Sebastopol and Cronstadt—a fleet manned by upwards of thirty thousand of the finest and bravest sailors in the world—a fleet ready at a day's notice to carry into effect the behest of the nation that aspires to be, and is, the undisputed Mistress of the Seas, whether that behest be one of peace or of war—is a fact which is well calculated to administer consolation to that wounded pride which has suffered so many rubs in the Crimea; and which still endures some disagreeable after-qualms in the investigations yet pending in Chelsea Hospital. No one who beheld the glorious spectacle of these two hundred and forty steam-vessels, which covered, lying peaceably at anchor, a space of no less than twelve miles—of those immense floating fortresses of which each carried upwards of one hundred guns and a thousand men—and of that new-born flotilla of agile gun-boats constructed especially for the shallow waters of the Baltic—can have doubted how much they contributed—though without firing a shot—to that present solution of the difficulties of Europe which the British people are called upon to confirm. If a real peace have been gained, that fleet did more to gain it than any other effort made by the nation. The capture of the Malakoff was a noble deed. The British Navy was not only ready and willing, but able, to overtop even that crowning achievement, and to inscribe the more splendid name of Cronstadt on that long list of victories which already includes such names as St. Vincent, La Hogue, Copenhagen, the Nile, and Trafalgar. That it was not permitted to do so may be due to the wisdom and the prudence of the Emperor Alexander,—or it may be due to the lukewarmness of an ally who had made his own calculations, and did not greatly care for ours,—or it may be mainly owing, as some assert, to the unstatesmanlike alacrity of those to whom the destinies of Great Britain were confided, who were slow to make war, and quick to make peace. On these points it is possibly premature to express an opinion; but none can deny the truth, that, be the peace good or bad, stable or unstable, it would not have been made if Great Britain had not been ready with an armament such as that which has just made holiday in the Solent.

The duty of the people and of the Government, having such a fleet, is to maintain it in full efficiency, until the political horizon is cleared of the dark clouds that yet brood over it, betokening storm and thunder. Though we have got our peace with Russia, we have not succeeded in assuring the repose of Europe. For many a long year it will not be prudent for this country to listen to the voice of those syrens of Manchester—and elsewhere—who sing of retrenchment and of economy in military and naval expenditure, and whose talk is ever of the blessings of peace and of the miseries of war—blessings which none deny and all prize, and miseries of which no tongue or pen attempts to extenuate the horror. We cannot maintain a standing army, but we can and must maintain a standing fleet, if we expect the voice of Great Britain to be properly heard or respected in the councils of Europe, amid the calamities and complications which the next few years are certain to bring forth. The peace has, by the confession of those who made it, settled nothing but the future relationship of Russia toward Turkey. To the Emperor of the French, and perhaps to the present Government of Great Britain, this settlement may appear to be sufficient; but it is abundantly evident to nine men out of ten throughout France, England, Germany, Italy, Hungary, and Scandinavia, who may or may not have their doubts as to the satisfactory adjustment even of this limited cause of dispute, that Europe still heaves with embryo revolutions, and that there is scarcely one nation within its boundaries which has not an account to settle with one or other of the great military monarchies which weigh like incubi upon the independence and freedom of the people. Had the British fleet been permitted by diplomacy to do this year the work for which it was intended, it is more than probable that other knotty questions besides that of Turkey would have received a permanent and a satisfactory solution—that Italy would have been relieved of the temporal sovereignty of the Pope—that Lombardy and Venice would have been made happy and free—that Scandinavia would have recovered her long-lost Finland—that Turkey, in whose behalf the war was supposed to be undertaken, would have received from her thoroughly-defeated foe some indemnity for the enormous outlay which she has been compelled to make in defence of her independence so outrageously assailed;—and that all Europe, and Germany more particularly, would have been freed for fifty years—perhaps for ever—from the dead weight of Russian influence. Every one of the states and countries we have enumerated, in addition to Poland and Hungary, feels that Russian influence is fatal to the freedom and progress of the nations, that it is inimical to every form of government but that of brute force, and favourable only to the repression of all intellect but that which sells itself as a slave to tyranny, and waxes fat on the degradation of humanity.

There is on every hand much yet to be done before the sword

THE PEACE PLENIPOTENTIARIES.—FROM A PHOTOGRAPH BY MAYER BROTHERS, AND PIERSON, OF PARIS.—(SEE NEXT PAGE.)

can be turned into the ploughshare, or the spear into the pruning-hook, or before wise and far-seeing statesmen can fold their hands in security, and indulge in the pleasing hope that the nations of Europe can disband their armies, and study war no more. The peace, even under its more favourable aspect, is but the "beginning of the end." No one can justifiably act on the supposition that Italy will not be in a state of convulsion from end to end before the leaves of the present spring shall grow yellow in the sun of autumn. England has got a mighty fleet, and if she be wise she will keep it, and make the most of it.

## THE PEACE PLENIPOTENTIARIES, AT PARIS.

As an interesting portrait memorial of the Congress at Paris, by whose members the Treaty of Peace with Russia has been definitively arranged, MM. Mayer Brothers and Pierson, of Paris and London, have *photography'ked* their Excellencies in one group, which we have engraved upon the preceding page. Of the majority of these diplomatists biographical memoirs have already appeared in the ILLUSTRATED LONDON NEWS; so that it will be sufficient, in order to add to the personal interest of the Illustration, for us to indicate the respective members of the group. Thus, in the first line (seated) in the centre, is Count Walewski (France); on his right are Lord Clarendon (Great Britain), Aali Pacha (Turkey), and Baron de Hubner (Austria). On the left of M. Walewski are seated Count Orloff (Russia), Baron de Bourqueney (France), and Lord Cowley (Great Britain). Of the line of standing figures, commencing from the left, are the Count de Cavour and the Marquis de Villamarina (Sardinia), Count de Hatzfeldt (Prussia), M. Bédélemi (France), *redacteur des protocoles*, Mehemmed Djevik Bey (Turkey), Baron de Brunnow (Russia), Baron de Manteuffel (Prussia), Count Buol (Austria).

In addition to this group, Messrs. Mayer Brothers and Pierson have at their establishments in Paris and at No. 153, Regent-street, London, portraits of each member of the Peace Congress, photographed on a large scale, which are fine specimens of the application of photography to the characteristic illustration of the greatest national event of our time.

## *FOREIGN AND COLONIAL NEWS.*

### FRANCE.

(*From our own Correspondent.*)

PARIS, Thursday.

CONSIDERABLE preparations are being made at St. Cloud for the reception of the Court, which removes thither shortly, to the great satisfaction of the Empress, whose long confinement at the Tuileries—a mode of life so opposed to the active tastes and habits of her Majesty—has proved very tedious to her. At St. Cloud, Versailles, and other places, are, later in the season, to be held a series of brilliant fêtes. At the time of Queen Victoria's visit to France the Emperor and Empress conceded for her use the apartments they habitually occupied in the Palace of St. Cloud, themselves residing on the ground-floor. These, which open on the Orangery—rendered so famous as being the theatre of the *coup d'état* which commenced the Consulate, and finally led the First Napoleon to the Empire—have pleased their Majesties so much that they have resolved to inhabit them in future in preference to those above, and have had them fitted up with the taste and elegance suitable to an Imperial residence.

It is only now (commencing from the 21st) that the ladies of the corps diplomatique are admitted to see and offer their felicitations to the Empress. Since the birth of the Prince Imperial, the Princesse d'Essling, the Duchesse de Bassano, and the Amirale Brust wear, instead of the former insigne of their office, which consisted of a cipher in diamonds attached to the shoulder, the portrait of her Majesty, with that of the Emperor on the reverse, surrounded with brilliants: it is worn lower down than the former decoration, and nearer the heart.

The late elections at the Academy have been a subject of much surprise and general dissatisfaction. That of M. Biot is considered absurd: his age, his position wholly unfitted him to fill the *fauteuil* of M. de Lacretelle, and the Academicians themselves expected the strongest opposition to his nomination; yet, strange to say, he passed with much more ease and earlier than M. de Falloux, who, though also warmly opposed, was imagined to be considerably more likely to obtain success.

The Préfets of the different departments are occupied at present in collecting statistical accounts of the cases of hydrophobia occurring in the provinces during the last year, and the Maire of each commune is, during the course of the present year, to signalise every instance of this frightful and common malady to his Préfet by a special and immediate despatch, in order to seek the means to diminish "this hideous disease, which every year causes such ravages in the country." And while these means are being adopted on the one side, the removal of the dog-tax is seriously contemplated on the other!

Among other projects of improvement, the Emperor is earnestly occupied in studying the plans submitted to him for the establishment of a regular seaport at Paris. The attempts already made by certain vessels of considerable tonnage to mount the Seine have proved sufficiently successful to give the idea considerable consistence; and there seems much reason to suppose that the energetic and enterprising spirit of Napoleon will bring it to bear.

It appears that the researches of the Commission appointed to collect and publish all the letters, instructions, reflections, and documents in general of the late Emperor have led to the discovery of a mass of papers of which the extent is enormous, and the interest greater than one well be imagined by those as yet ignorant of their contents. It is said that the materials already brought together might fill a hundred quarto volumes, and that the appearance of such as are to be published will go far to alter the aspect of the history of the times. M. Thiers, to whom some of these documents have been submitted, remarked on concluding them, "I shall have to add twelve volumes of postscript to my 'History of the Empire.'" As may be supposed, much of this matter will have, however, at present to be suppressed. The times are too recent, the actors too near, to render it safe or right to give to the world all that concerns them; but even what is to be presented to the eyes of the public is of a nature and extent to create no less a tonishment than interest.

One of the most brilliant balls of the season was that given a few nights ago by M. de Morny to each of the members of the Congress as are still in Paris. The dancing was kept up with great spirit until a very late hour. Report says that M. de Morny will be selected as the representative of France at the Court of the Emperor of Russia.

The accounts of the state of the vines are very satisfactory: this year (1856) bears a great resemblance in point of atmosphere with 1811 the famous year of the appearance of the comet, and that which witnessed the birth of the King of Rome. There were thunder and lightning in the month of April as there were this year: and they consider these peculiarities as most favourable to the harvest in general, and to the vines in particular.

The report that M. de Lamartine was about to take his departure for America is quite unfounded.

The *reveuilles* of the Empress, which had been fixed for the 19th, has been put off till the 30th of the month; her Majesty not feeling strong enough, and the physicians advising that this ceremony should be delayed.

Count Creptowitch is spoken of as the new Russian Ambassador at Paris.

### THE DANUBIAN PRINCIPALITIES.

A despatch from Constantinople states that the Grand Council of the Ottoman Empire has pronounced the deposition of the two Hospodars of Moldavia and Wallachia. The former of these Princes, Gregory Alexander Ghika, had anticipated this measure by recently sending in his resignation; but the latter, Demetrius Stirbey, clung to power, and to him this will be a heavy blow. While depriving the two Hospodars of office, the Grand Council appointed a Caimacam, or Viceroy, of the Sultan, to govern each of the two provinces, in the name of his Highness, until their reorganisation under the treaty. The Caimacam selected for Moldavia (Grand Ban Constantine Ghika, and for Moldavia the Grand Logothete Balcha. Finally, at the self same sitting, the Grand Council named as Commissioner of the Porte in the Principalities, and probably as the future representative of turkey in the mixed Commission just alluded to, Safet Effendi, the present Mustechar of the Grand Vizier. He is said to be a man of merit.

### OPENING OF THE TRADE WITH RUSSIA.

An extraordinary supplement to the *Journal d'Odessa*, issued on the 7th inst., contains the following notification by order of Count Sirogonoff, the Governor-General of New Russia and Bessarabia:

In virtue of an Imperial rescript this day received, foreign exportation is permitted, according to the regulations, of all kinds of corn, of sheepskins, meats of all kinds, cloths, horned cattle, horses, wine, brandies and wines, ropes and string, canvas and hay. Commercial relations with France, England, Sardinia, and Turkey are re-established on the old bases.

Two merchant vessels, one Austrian and the other Sardinian, entered the port of Odessa on the 6th. The Sardinian vessel immediately accepted freight for Marseilles, at the rate of four francs per load of wheat.

### AMERICA.

The United States' mail steam-ship *Atlantic*, Capt. O. Eldridge, which left New York on the 12th inst., arrived at Liverpool on Wednesday.

In the Senate, on the 7th, Mr. Mason, from the Committee on Foreign Relations, reported a resolution to the effect that no further legislation was necessary in order to put an end to the treaty with Denmark regulating the Sound Dues, and the subject was made a special order for discussion.

Mr. Seyer, as the sole representative of the State of Missouri, referring to the Kansas discussion, said that the circumstances under which the debate was inaugurated seemed to indicate a purpose to make political capital out of the Kansas disturbances with a view of controlling the coming national and state elections. In such a controversy he had no disposition to engage; it was, however, his duty to defend his constituents against the grave and serious charges brought against them. He then proceeded to consider the constitutional aspect of the slavery question, contending that the power of Congress to make all needful rules and regulations in regard to the territory and other property of the United States extends to the public domain only, and not to the domestic affairs or institutions of the territory.

In the House of Representatives Mr. Hughston earnestly condemned the violation of the Missouri restrictions, and expressed as his opinion that the rights of the people of Kansas had been u-n ped by invaders.

Mr. Boyce argued that Great Britain had violated their neutrality in the enlistment case; they should insist by negotiation on reparation, which would be forthcoming when a future British Administration attained power, for the present one could not make reparation without condemning itself. He objected to Great Britain's pretence to the Mosquito protectorate and occupation of Ruatan. War was not a means for the settlement of the question, their policy being peace.

On the motion of Mr. Humphrey Marshall, the Committee on Foreign Affairs was instructed to inquire into the expediency of declaring the engagement of American vessels in the Chinese coolie-trade to be illegal, and a sufficient cause of forfeiture to the captors of the ship engaged therein.

It was resolved on this subject, on the motion of Mr. Pringle, of New York, that the President be requested to communicate what information he may possess in regard to citizens of the United States being engaged in the slave-trade or the transportation in American ships of coolies from China to Cuba and other countries, with the intension of placing or continuing them in a state of slavery or servitude; and whether such traffic is not, in his opinion, a violation of the spirit of existing treaties, rendering those engaged in it liable to indictment for piracy? and especially that he be requested to communicate to the House the facts and circumstances attending the shipment from China of some 300 coolies in the *Sea Witch*, of New York, a vessel lately wrecked on the coast of Cuba.

The *New York Herald* states that—

The South Carolinians are rushing for Kansas. A second company of 28 emigrants left Charleston on the 27th ultimo for the territory, and a company from Edgefield, under Captain Ball, was to leave on the 1st instant for Columbus, Ga., there to join Major Buford, who heads a formidable expedition. Abbeville is moving, her citizens having subscribed a large sum of money to fit out emigrants, twelve of whom have proposed going. Nearly every district in the state is endeavouring to raise and equip a company. The efforts of the Emigrant Aid Societies of the Abolitionists are likely to be completely neutralised, the *Herald* thinks, by such energetic exertions in the South.

### THE NICARAGUAN WAR.

On the 10th of March Walker issued a proclamation. It says:—

Nothing is left for the Americans in Nicaragua but hostility to the Servile throughout Central America. A very large proportion of the so-called Legitimists of the state are either open or secret enemies to our presence on the soil. They owe to the benignant influence of the Americans their lives and property; they have paid us with ingratitude and treachery. Against the Servile parties and Servile Governments of Central America the Americans in Nicaragua are bound, by the common law of self-protection, to declare eterna enmity. Our prefect friendship has been rejected. We can only make them feel that our enmity may be as dangerous and destructive as our friendship is faithful and true.

A further decree directed the troops to assume the red ribbon, the badge of war. On the 9th of March there arrived from New York, New Orleans, and California, 205 recruits, who on Tuesday, the 11th, received orders to march. On the 11th President Rivas issued a decree to the various prefects of departments, announcing the rupture with Costa Rica, and casting on it the odium of having plunged Central America into war. Ubaldo Herrera, ex-President of the Republic, also issued an address to the people, calling upon his countrymen to support Walker in defending the honour and interests of Nicaragua, and to range themselves on the democratic side.

On the 13th Colonel Schlessinger commenced his march with about 400 soldiers on the city of Guanacaste, forty-five miles from the boundary in the State of Costa Rica. On the same day a decree was issued placing the department of Nicaragua, containing Guanacaste, under martial law, and summoning all the inhabitants to arms. It was also rumoured that an attack would immediately be made on Punta Arenas.

On Sunday, March 2, amid the roar of guns, the ringing of bells, &c., there was elevated, for the first time, on the Plaza (the guard standing to arms), the present free flag of Nicaragua. A white centre, with blue on either side, and on the white is a raised shield representing a sunburst over five volcanoes.

While these preparations have been progressing in Nicaragua, the Costa Ricans appear to have been equally on the alert.

In the Costa Rica *Boletin* of the 1st of March is a decree declaring that the Republic of Costa Rica does not recognise the so called Provisional Government of Nicaragua created by the adventurers which dominate over the country; but, on the contrary, is determined at all hazards to root them out. The *Boletin* says:—

With this important end in view, the army of the Republic will immediately march, and not only all Costa Ricans, but all other Centra. Americans who reside in the country, are obliged to take up arms under present circumstances, and give all requisite help until the nationality of Nicaragua shall be established, and the independence of Central America secured.

The decree further orders the cantons, towns, provinces, and districts to provide the necessary provisions and men, &c.; and denounces the severest penalties against traitors, who will be immediately tried by court martial and shot in the most summary manner. Another decree in the same journal orders a national loan of 100,000 dols. to be raised among the native capitalists.

General Mora, President of Costa Rica, issued an address to the people, dated March 1, calling upon them to march on Nicaragua to war with the Filibusters, who had reduced her to the most opprobrious slavery.

The *Central American*, March 15, states:—3000 Costa Rican troops are under way, headed by General Cañas, the Commander-in Chief. Baron Bulow is in the field with 800 men. We are informed that the Transit Company have been notified to stop running their boats upon the river, or Costa Rica will not be responsible for the consequences.

In the meantime, according to the latest despatch from the Foreign Minister of San Salvador to the Government of Nicaragua, it would not seem that the relations between these two republics are really friendly. San Salvador positively objects to the largearmy of Nicaragua, and thinks that the fact of its being composed of Americans is a standing menace to the peace and union of the Central American States. The Government of Nicaragua is also called upon to enter into explanations respecting its position and policy.

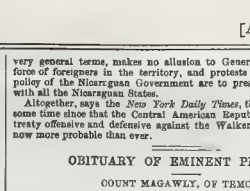
The reply to this document from the Nicaraguan Minister is couched in very general terms, makes no allusion to General Walker or the large force of foreigners in the territory, and protests that the intention and policy of the Nicaraguan Government are to preserve friendly relations with all the Nicaraguan States.

Altogether, says the *New York Daily Times*, the announcement made some time since that the Central American Republics had entered into a treaty offensive and defensive against the Walker administration seems now more probable than ever.

## OBITUARY OF EMINENT PERSONS.

### COUNT MAGAWLY, OF TEMORA

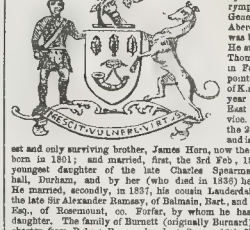
VALERIO MAGAWLY CERRATI, of Temora, is the King's County, Ireland, a Count of the Holy Roman or Germano Empire, Inspector-General of Prisons in Parma, was assassinated in the streets of the city of Parma, on the evening of the 4th ult., as he was walking home from the theatre, accompanied by his wife and sister. The Magawlys—of whom the late Count was the last resident in these counties—are noticed in Sir Bernard Burke's recent



edition of the Peerage, amongst the British subjects enjoying titles of foreign nobility with the assent of Sovereign, as a family of great quality in Ireland, where they were styled "Princes of Calry," in the counties now known as Meath and Westmeath, and where they were proprietors of large estates until the reign of William and Mary, when, remaining firm in their allegiance to James II., the greater portion of these lands came within the grasp of the confiscator. In 1694 the Emperor Charles VI. conferred upon Field-Marshal Philip Henry Magawly (who married Margaret D'Este of Austria) the dignity of Count of the Holy Roman Empire, and the rank and privileges of a Grandee of Spain. The Marshal's great-grandnephew, Francis Philip, the third Count, married in 1806 Clara, only child of Giuseppe, Count Mazzuchi-di-Guido-Bono. This Francis, Count Magawly, was accredited in 1812 Envoy from Pope Pius VII. to Napoleon, and was subsequently Regent of the Duchies of Parma and Piacenza, until those States were apportioned to the ex-Empress Maria Louisa in 1815, he was her Prime Minister until 1823, and was also Chamberlain to Francis I. of Austria, who conferred many favours upon him. In 1824 he returned to Ireland, and took up his residence at his family mansion at Temora, in the King's County, where he lived until his death in 1835; when he was succeeded by his eldest son, Valerio, the fourth Count, the subject of this notice, whose dreadful murder has created so general and painful a sensation. Valerio, Count Magawly, was born in Italy, the 4th August, 1809: he resided for several years at his Irish family seat, and was there much beloved and respected as a magistrate and country gentleman. He, in 1845, unfortunately for himself, returned to Italy, where the services of his family were at once appreciated and rewarded; he obtained the responsible position of Mayor of Parma, with the rank of Major in the Army, during the eventful year of 1848; he was afterwards appointed Chamberlain to the Archduchess Regent, and Director of the Central House of Detention. The Count married, the 17th November, 1831, his first cousin, Jane, only child of Andrew Gheoghegan, Esq., of Ballymagivey, county Westmeath, by whom he leaves an only son, Francis Philip Richard, now the fifth Count. Count Valerio's remains were interred, on the 9th ult., in the Church of the Holy Trinity at Parma, the last resting-place of the Cerrati family.

### SIR ALEXANDER BURNETT, BART

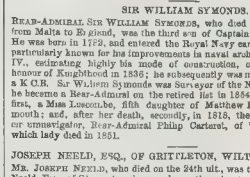
SIR ALEXANDER BURNETT, the ninth Baronet, of Leys, Kincardineshire, was the second son of Sir R bert Burnett, the seventh Baronet, by his wife, Margaret Dalrymple, fourth daughter of General Elphinstone, of Logie, Aberdeenshire. Sir Alexander was born the 17th Dec., 1789. He succeeded his brother, Sir Thomas, the eighth Baronet, in Feb., 1849, and was appointed a Deputy Lieutenant of Kincardineshire in the same year. He was formerly in the East India Company's service. He died unmarried, on the 20th ult., in Edinburgh; and is succeeded by his young-



est and only surviving brother, James Horn, now the tenth Baronet, who was born in 1801, and married, first, the 3rd Feb., 1831, Caroline Margaret, youngest daughter of the late Charles Spearman, Esq., of Tunstall-hall, Durham, and by her (who died in 1836) he has one surviving son. He married, secondly, in 1837, his cousin Lauderdale, youngest daughter of the late Sir Alexander Ramsay, of Balmain, Bart., and widow of David Duncan, Esq., of Rosemount, Forfar, by whom he has issue two sons and a daughter. The family of Burnett (originally Burnard) enjoy their lands under charter from Robert Bruce, dated at Scone, 17th Nov., 1358. The first Baronet, Sir Thomas Burnett, received his title 21st April, 1625. The present Baronet is the twenty-first Burnett inheritor of Leys.

### SIR E. H. LECHMERE, BART.

SIR EDMUND HUNGERFORD LECHMERE, second Baronet, of the Rhyd, county Worcester, died suddenly on he 2rd inst., at his seat, the Rhyd. Sir Edmond was the elder son of Sir Anthony Lechmere, the first Baronet, by his first wife, Mary, daughter and heiress of Joseph Berwick, of Hallow Park, Worcestershire. He was born on the 25th of May, 1782, and succeeded his father as second Baronet on the 30th of March, 1840. He married, in 1819, Maria Cass, daughter of the late Hon. David Murray, and has had issue a son and two daughters, the elder of whom is married to E. P. Shirley, Esq., M.P. Sir Edmund is succeeded by his son, Edmund Anthony Harley, now the third Baronet, who was born on the 25th of December, 1845. The Lechmeres are a very ancient family, originally from the Low Countries. They derive from Joscelyne de Lechmere, who acquired from William the Conqueror a grant of land in Hanley Worcestershire.



### SIR WILLIAM SYMONDS.

REAR-ADMIRAL SIR WILLIAM SYMONDS, who died recently on his passage from Malta to England, was the third son of Captain Thomas Symonds, R.N. He was born in 1782, and entered the Royal Navy early in life. He became particularly known for his improvements in naval architecture. King William IV., estimating highly his mode of construction, conferred upon him the honour of Knighthood in 1836; he subsequently was made a C.B (civil), and a K.C.B. Sir William Symonds was Surveyor of the Navy from 1832 to 1847; he became a Rear-Admiral on the retired list in 1854. Sir William married, first, a Miss Luscombe, fifth daughter of Matthew Luscombe, Esq., of Pynworth; and, after her death, secondly, in 1818, the eldest daughter of the late unmarigator, Rear-Admiral Philip Carteret, of Trinity Manor, Jersey, which lady died in 1851.

### JOSEPH NEELD, ESQ., OF GRITTLETON, WILTS, M.P., F.S.A., F.L.S.

MR. JOSEPH NEELD, who died on the 24th ult., was the eldest son of Joseph Neeld, Esq., of Gloucester-place, and was the inheritor of a large fortune. He was born in 1789. He married, the 1st Jan., 1831, the Lady Caroline Mary, eldest daughter of Cropley, sixth Earl, and sister of Anthony, ninth and present Earl of Shaftesbury. Mr. Neeld was a Magistrate and Deputy Lieutenant for the county of Wilts, High Steward of Malmesbury, and one of the Gentlemen of her Majesty's Privy Chamber. His connexion with the wealthy firm of Messrs. Hunt and Bridge is well known. He was also an extensive proprietor of Bank and East India Stock. Mr. Neeld was first returned to Parliament for the borough of Chippenham in 1823, from which period he continued to sit as its representative in the House of Commons. He was a staunch supporter of High Church and Conservative principles, and voted for agricultural protection against Sir Robert Peel in 1846. His public and private charity were very extensive, and he was much regarded and respected by all classes. Mr. Joseph Neeld's brother, Mr. John Neeld, has represented Cricklade for twenty years; and his sister's husband Captain Boldero, was his colleague in the representation of Chippenham.

The operative stonemasons of York have struck for an advance of wages, demanding 27s. per week, instead of 24s. The master masons have determined to resist the advance.

## THOUGHTS IN THOROUGHFARES.

Some people may think it a piece of unpardonable vanity on my part to assume the title of philosopher; but, considering that the chief business of philosophy is to reconcile one with disappointments, console one under failures, and to make the very best of a bad lot in life, the man who calls himself a philosopher may possibly have very little more than his philosophy to brag about. When one has failed in every other pursuit, and has lost all his fortune—if he ever had any; and exhausted all his credit—if any body ever trusted him; the individual who can get a-trotting out of other people's pockets may claim to put his hands into his own and at once turn philosopher. If matters have gone hard with him, and he wishes to get into easy circumstances, the best way to improve his condition, and to make it easy, is to take it easy by the aid of philosophy. It is a calling for which no capital is required; and, indeed, the less a man possesses of worldly goods the more he may be supposed to have of worldly ills, which form the stock on which his philosophy may be exercised. There are some who may be said to trade on borrowed capital, for they are far more philosophical over the troubles of other people than they are over their own; but a series of generous philosophical transactions can only be carried on in the mind by means of our own calamities. It follows, therefore, that he who is the most unsuccessful in everything else may be the most successful in the practice of philosophy. Even Aristotle is said to have taken to it as a business when he had failed in a variety of other schemes, for he had been a soldier and a druggist before he began to deal in philosophy, which, commercially speaking, has been always looked upon as a drug in the market.

I am in one respect a follower of Aristotle, who was at the head of the peripatetics, or walking philosophers, who are said to have taken the title from the habit they had of listening to lectures while walking in the public thoroughfares. I do not patronise this system of open-air teaching, which, though apparently harmless, is often a very expensive mode of obtaining information, for the pupil sometimes pays for the lesson he learns in a crowd with the whole contents of his pocket. It is certainly better that those who think while they walk should write while those who run may read, than that those who stand to preach should afford facilities for gathering the purses and handkerchiefs of those who stop to listen. I am in the constant habit of thinking as I pass along, and, as there is scarcely any one who has not at some time or other been offered "a penny for his thoughts,' I flatter myself that mine may not be wholly without value. One of my present subjects of contemplation is the new wooden building that adorns, or rather disfigures, the north side of the Green-park, which has been the cause of a great deal of what the Government may consider very impertinent (though by no means idle, but, on the contrary, rather busy) curiosity. Rumour, who is always prepared with a variety of guesses for every riddle, had already assigned the building to a variety of uses, one of which was that of a booth for dramatic performances; another was that of a reception-room for the "Allied Sovereigns," who, it was said, were about to assemble on the spot, but for what purpose not even Rumour had ventured to insinuate. At length, however, the curiosity of the House of Commons could no longer be restrained, and the Government, having been called on for an explanation, has announced its intention to give a brilliant display of fireworks. This kind of thing seems to me to be less adapted to the conclusion of a peace than to the termination of a pantomime. Ministers, however, tell us gravely that fireworks are to be let off by way of public rejoicing, as if the people delighted in nothing so much as in squibs and crackers. If this were the case, an Englishman, when he wanted to be particularly happy, would purchase a firework to take it home, and exhilarate his household by letting it off in the bosom of his family. If Government has truly estimated the national character in supposing that the country will derive pleasure from a pyrotechnic display, it is strange that the people will only be happy on the 5th of November, which is the only day when the Government notion of national felicity is not all generally realised. Some people are of opinion that waterworks would be more appropriate to the damp thrown on British spirits by the unsatisfactory mode in which, according to the views of many, the war has been finished. There are certain members of Parliament who speak the sense of a great many of those "out of doors," and who have asked "What are the fireworks for?" and there has been some very natural hesitation shown by the Government to answer the question. It must be rather an awkward position for a man of mature age to get up and declare that it is intended the public satisfaction shall explode in fireworks. The present is an age requiring somewhat better lights than those afforded by Roman candles. If there is really a public demand for fireworks, there are plenty of persons whose business it is to furnish a supply; and the Government might safely have left the matter in the hands of the managers of Cremorne-gardens, or the Surrey Zoological, where those who wished for the excitement might have, at the same time, enjoyed and paid for it. Ministers should have something better to do in these days than attempt to rival the former glories of Vauxhall; and they should be satisfied with the explosions and blowings up to which they are liable in a political sense, without running the risk of dealing in pyrotechnic playthings. The chief, indeed the only, excuse that has been offered for the course that has been adopted is that it is "strictly according to precedent." If a piece of foolery has been perpetrated fifty years ago, there is surely no reason for repeating it. There cannot be a more melancholy proof of the imbecility of a number of individuals who are called on to act than their being afraid to do anything except that which was done half a century ago on a somewhat similar occasion. If precedence is really to be strictly followed, why are not barges broadsided from Woolwich, as they were in 1814, for a sham sea-fight in the metropolitan reservoirs? Perhaps, in allowing the precedents of that day, it will be thought necessary to issue a proclamation calling on the people "not to listen to those who are the constant enemies of all public joy," but to "indulge in the full participation of happiness." Far be it from me to check the exuberance of the national felicity if the country can make itself happy with fireworks—a theory which seems to justify the managers of theatres in their notions of an "abode of bliss," or "a garden of delight," in which blue and red fire always predominate. Precedent may be as usefully employed in teaching what to avoid as in showing what to imitate. Everything that has been already done, if is not found to be utterly unworthy of being done again, may at any rate be always improved upon; but the authorities, restrained by the fetters of routine, look to the past too much as a model to be slavishly copied.

After all, it may happen that the proposed mode of celebrating the peace is not altogether inappropriate, for, considering the number of reputations that have gone up like the rockets, to come down like the sticks, there is very much in the late war that may be aptly commemorated by fireworks.

A Walking Philosopher.

---

The ship-painters of Liverpool have been on strike since the 7th inst., claiming wages at 3*d.* instead of 4*d.* 4*d.* a day. Some of the masters have given the advance.

## *METROPOLITAN NEWS.*

The Judges and Corporation at St. Paul's.—Sunday last being the first Sunday in Easter Term, the ancient ceremony of "Churching the Judges" took place in St Paul's Cathedral. Shortly before three o'clock the representatives of the judicial bench, who upon this occasion were Lord Chief Justice Campbell, Mr. Baron Alderson, Mr. Justice Wightman, Mr. Justice Williams, and Mr. Justice Crompton, assembled at Serjeants'-inn, Chancery-lane, where they were met by the City Marshal, and escorted to the Metropolitan Cathedral. They were received at the southern door by Alderman Sir Francis Graham Moon, Bart. (acting for the Lord Mayor), Alderman Lucas, Sheriff Kennedy, Alderman and Sheriff Rose, Alderman Finnis, Alderman Lawrence, Alderman Eagleton, the Dean of St. Paul's, and a large number of members of the Court of Common-council. A procession was then formed, which moved into the choir, where full service was performed, and a sermon preached by the Rev. Canon Champneys, M.A., Rector of Whitechapel.

Hampstead-heath.—On Monday evening a public meeting of the inhabitants of St. Pancras parish was held at the Vestry Hall, Camden-town. Mr. F. W. Streeten in the chair—when resolutions favourable to the maintenance of Hampstead-heath in its unincloséd state, and condemnatory of the Metropolitan Board of Works for not acceding to the matter, were agreed to. Sir B. Hall attended the meeting, and supported the resolution. Sir Thomas M. Wilson's bill in the Commons has been postponed, and in the interval meetings will be held to ascertain the feeling of the metropolitan parishes on this subject. Hitherto the meetings have been confined to the adjoining districts of the heath, but the whole of the metropolis is concerned in preventing the inclosure of this place; and, therefore, it has been urged that the expense of a "compromise" should not fall on one or two parishes, but that a metropolitan rate should be made to obtain the boon now asked for the benefit of the public generally.

Horticultural Garden at Chiswick.—The subscription for the preservation of this popular garden, now threatened with destruction unless a sum of £5000 is raised for its purchase, has already reached nearly £3000, and there seems little doubt if the list is kept open for another month that the full amount required will be forthcoming. Among the subscriptions already announced are £100 from the Duke of Devonshire; £100 from the Duke of North umberland; and, which deserves especial notice, £100 from H. Behrens, Esq., a foreigner resident near Lubeck.

Health of London During the Week.—The rate of mortality declines as the temperature rises with the beginning of the spring months. The deaths in London, which had in the two previous weeks been 1286 and 1115 respectively, fell last week to 1042. In the corresponding week of ten previous years, 1846-55, the average was 1041. The same rate of mortality in the present increased population would produce 1185; and a comparison of the real with the estimated result shows a difference in favour of last week to the extent of 143. Whilst the population has increased 11 per cent since 1841, the registered deaths have risen but 2 per cent in the last ten years. Hence, as the births are more than sufficient to supply the places of the dead and increase the number of inhabitants by 884. The deaths of 563 males and 480 females were registered. 238 boys and girls died without completing their first year; at the other extreme of life 35 men and women died who were eighty years old and upwards. Two aged persons, both widows—one in Somers-town, the other in Clapton—attained the respective ages of 94 and 96 years.

Improvements at Gloucester-gate, Regent's-park.—Orders have been issued from the office of the Chief Commissioner of Public Works for the removal of the present diminutive and unsightly lodge at Gloucester-gate, near Albany-street, and the erection of a new and handsome structure. The object is to widen this entrance to the Regent's-park to more than double its present extent, and with a view to keep pace with the improvement, so as to make a fine opening to Park-street, Camden-town, the local authorities of St. Pancras have been requested to lend their aid in widening the present narrow and dangerous bridge which crosses the Regent's Canal, near the York and Albany Tavern. The latter body, however, demur to this, and contend that, as the bridge is upon the Crown property, the Office of Works is the proper department to bear the expense, and the committee of works of the St. Pancras vestry have appointed a deputation to wait upon Sir B. Hall.

Three Children Burned to Death.—On Wednesday afternoon the wife of a cabinetmaker named Gilinda, residing at 92, Longalley, Sun-street, Finsbury, went to make some trifling purchases; and, before leaving the house, locked her three children in the second-floor front room. On her return in a short time she found smoke issuing from the crevices of the door, which was immediately broken open, when the room was found to be on fire, while the children were in a helpless state. A strong force from the brigade stations succeeded in confining the fire to the room in which it broke out.

Novel Wager.—On Monday afternoon many thousands of persons were attracted to the banks of the Surrey Canal, to witness the novel conclusion of a wager for £5 between Mr. J. Harris and M. Garrett, the well-known Clowns. The terms of the wager were—to sail in a washing-tub, drawn by four geese, for 500 yards on the canal, between Sailors' and Bucks' bridges, and the first to arrive at the second floor front room. On her return in a short time she found smoke issuing from the crevices of the door, which was immediately broken open, when the room was found to be on fire, while the children were in a helpless state. A strong force from the brigade stations succeeded in confining the fire to the room in which it broke out.

Novel Wager.—On Monday afternoon many thousands of persons were attracted to the banks of the Surrey Canal, to witness the novel conclusion of a wager for £5 between Mr. J. Harris and M. Garrett, the well-known Clowns. The terms of the wager were—to sail in a washing-tub, drawn by four geese, for 500 yards on the canal, between Sailors' and Bucks' bridges, and the first to arrive at the second-floor front room. On her return in a short time she found smoke issuing from the crevices of the door, which was immediately broken open, when the room was found to be on fire, while the children were in a helpless state. A strong force from the brigade stations succeeded in confining the fire to the room in which it broke out.

Filial Piety Rewarded.—Three brothers, John Ingram Owen, George Smith Owen, and Edward Owen, whom the police have been in search of for eighteen months, were brought up at Marlborough-street Police Court on Saturday last, charged with injury or petty larceny, of a rather ingenious character. The prisoner John is a dismissed custom house clerk, and George held office in a wholesale druggist's. The other had been in business as a woollen-merchant at Norwich. It is called the Sock Exchange." A recent case of forgery on their part was committed at Frome. The telegraph does not extend all the way to that town, and, the message being carried part of the way by steam, it was delayed. A guinea umbrella was selected, and both parties took leave, mutually pleased with their morning's work. Mr. Rutter immediately settled the affair to his friends as a fine fruit in human nature. The party found its re-establishing a parent's credit and character, all the views on the subject sustained a disagreeable revulsion by the discovery of the forged cheque and a communication from the police, and he opened eye to the fact that he had lost £7 10s. and a guinea umbrella, but had gained a new "wrinkle." Aided by Mr. Rutter, the detectives Smith and Williamson followed one of the brothers into Liverpool-street Railway public-house, where a second brother made his appearance. Detective Smith followed, and to his great gratification found all three brothers in the room. Edward was with his back to him, and John was reading the paper; and George was drinking ale. Detective Smith walked up to the fireplace, and touching Edward said, "Ha, Edward how do you do?" The brother thus addressed, with his usual cheerful look as much like a foreigner as possible, replied in some kind of gibberish "Come, drop that now," said Smith. "I belong to the detectives. The three brothers were lodged in the station-house, and on Saturday a preliminary examination took place before Mr. Bingham. The amounts known to have been obtained by the prisoners are—by forgeries on Goulds, £600; on Mr. Jenkyn, £310; Mr. Douglas, £113; London and Westminster, £200; Mr. Hall, £200; Messrs. Herries, £115; Messrs. Prescott, £150; Taunton Bank, £200; Salisbury Bank, £150; Poole Bank, £218, besides smaller amounts, the number of which is very considerable.

Run upon St. Martin's Savings-Bank.—On Monday last, in consequence of reports circulated declaring the Provident Institution Savings-Bank, St Martin's-lane (of which H.R.H. Prince Albert is president) to be in an insolvent condition from serious defalcations, there was a complete panic, and crowds of persons assembled both outside and in the bank to withdraw their deposits. The manager, Mr. Boodle, issued a notice that on the 3rd of April instant there was a meeting of the trustees—the President, Prince Albert, in the chair—at which several persons had been dismissed for misconduct, but not for dishonesty, and that these individuals the injurious rumours had been traced. The Government certificate of the state of the funds was also exhibited in the bank, showing them to be quite satisfactory. But still numbers appeared to have their doubts, and preferred having their money.

Printers' Pension Society.—The anniversary dinner of this society was celebrated at the London Tavern on Tuesday. Sir R. I. Murchison in the chair. The company included Colonel Sykes, Mr. Sheriff Kennedy, Mr. Kaye, Mr. Murray, Professor Rawsay, Mr. Fulkm, Mr. Nicholay, Mr. Forbes, Mr. Baxendale, Mr. Hodgson, Mr. Francis, &c. After the usual loyal and constitutional toasts, the Chairman proposed the toast of the evening—"Continued Prosperity to the Printers' Pension Society." It had been truly said that printing was the telescope of the soul. There was no one in this country who should not protect and befriend the soldiers of the great and peaceful army of mind who were marshalled by Gutemberg (Hear). It was their duty to remember the rank and file of that army (Hear). But, though this was their bounden duty, he regretted that in high places, and even amongst the middle class, there was great ignorance of the printing-press (Hear, hear). Very few amongst those classes were aware of the superiority of in ellect and discernment required of the printer, or of the distress into which printers were thrown by no fault of their own, but from accidental and unforeseen circumstances (Cheers). It so happened that circumstances made him intimately acquainted with the position of the printer, because from indifferent and hurried writing, in antediluvian characters, he was sure he had given more trouble to the printer than any man in the present century (Laughter). No man, therefore, was in a better position to appreciate the readiness, the ability, and the intelligence of the printer than he. They had all heard of a "printer's devil," but he was ready to acknowledge himself, as an author, a real and great devil (Laughter)—a *maximus diabolus*, whilst the unfortunate printer was, in comparison, an angelic being (Laughter). But few knew the distressing position which the printer was subjected. The first of all was blindness, and most truly could he, a sexagenarian—and he did not wish to say how much more sympathise with them, for he could no longer peruse the contents of facsimile under his feet which enabled him to know something of the world in which he lived, and therefore he felt for the poor printer when his eyes suffered, and were no longer able to discover the small pica which procured him bread (Cheers). If it was true that the mineral with which the poor printer dealt was deleterious to his sight, it was the duty of the discoverer either to find something more innocuous or to subscribe largely to this institution (Cheers). He hoped he had said enough to induce the descendants of Caxton to subscribe liberally to this most excellent and self supporting institution. Although great statesmen and great poets had occupied the chair he now filled, he did not believe that, from the time when Lord J. Russell presided here to the present hour, one more anxious to promote the prosperity of the Printers' Pension Society had filled the chair (Cheers). The toast was drunk with all the honours. The other toasts of the evening were, "The Chairman," "The Press," "The Stewards," &c. Mr. George presided over the musical department, and Mr. Higgs officiated as toastmaster. The subscriptions amounted to £400.

Metropolis Local Management Act.—On Tuesday last a deputation of metropolitan members of Parliament waited, by arrangement, upon the Right Hon. Sir Benjamin Hall, Bart., and Sir Alexander Cockburn (the Attorney-General), at the office of the Chief Commissioner of Public Works, in Whitehall place, for the purpose of considering certain objections which had been raised by some of the metropolitan parishes to the Act for the Better Local Management of the Metropolis, as also to the bill which had been introduced into Parliament to amend that Act by the Attorney-General. The sum of the statements of the deputation seemed to be that the parishes had no objection to the system of representative vestries being continued under Sir Benjamin Hall's Act, if powers were given to the ratepayers upon the suffrage established by that Act to elect annually their churchwardens and overseers, and make poor-rates and church-rates. Sir Benjamin Hall said he was in favour of the representative principle, because he believed it worked well, and he was prepared to meet the deputation to this extent. The election of the present vestries should remain as they now were, one-third going out annually; that the liberal system of suffrage should be extended to the compound householders, and that those entitled under that suffrage should, at the same time and in the same way as they elected their authorities, have the power of electing their churchwardens and overseers of the poor, and also of deciding upon the question of a church-rate; but he could not consent to deprive the elected body of the power of making a rate, because there was a pledge given to the Poor-law Board that the management of the poor should not be interfered with, and it might result in injury to the poor themselves, supposing the ratepayers should meet together in large numbers and refuse a poor-rate. After a conference of nearly three hours, on the motion of Mr. Williams, M.P., a vote of thanks was passed to Sir B. Hall, and the deputation retired.

The Attempted Assassination in Rupert-street.—The Government has offered a reward of £100 for the apprehension of Foschini, the Italian, who stabbed his four countrymen as a coffee-house in Rupert-street, on the night of the 17th inst. He is described as being about twenty-three years of age, and about five feet five inches in height, with light hair and small thin beard and mustachios. He is slightly built and good-looking, and on the night in question was dressed in dark trousers and light grey coat, with four plain white buttons. His unfortunate victims are still lying in a very dangerous state at the Charing-cross Hospital.

---

## THE REVIEW AT ALDERSHOTT.

On Saturday last her Majesty, accompanied by his Royal Highness Prince Albert, his Royal Highness the Duke of Cambridge, and the Princess Royal, had a grand parade inspection of the troops at Aldershott, with a review and sham battle. The Queen left town on Friday afternoon, and did not reach Aldersott till five o'clock, much too late for anything in the way of a review to be attempted. A mere parade inspection of the most ordinary and formal nature was all that took place.

Her Majesty and the Prince Consort slept in the Camp during Friday night, in the building which has been erected for the use of the Royal Family, and which, we understand, has cost anything but economy with the nature of a tent. It is situated to the south of the South Camp about half a mile from the Basing-toke Canal, and about the same distance to the east of the Winchester road. The building forms three sides of a square, and in its ground-plan resembles Buckingham Palace as it used to exhibit the late improvements. It has another point of resemblance also to its London compeer, viz., it is bald, cold, and ugly to an extreme. The whole Pavilion is built entirely of wood. We believe that, except in one or two cases, the foundation was not a single brick has been used in the whole structure. The entrance is from the south. On the ground floor is a breakfast-room, sitting-room, good-sized dining-room, and saloon. The upper rooms are of course all used as bed chambers and dressing-rooms for the Royal family. The two wings are for the different noblemen and ladies in attendance upon her Majesty. The walls and ceilings of the different apartments are all formed by canvas stretched on frames and papered over. On every side there is merely a waste boggy moor, dreary and repellant in its aspect. In the distance are the black huts of the Camp, quite in keeping with the moor on which they stand; and in the foreground is a long narrow piece of muddy water called the Basing-toke Canal, into which occasionally the waters of the surrounding bogs drain. Near the Pavilion are the huts erected for General Knollys (commanding the Camp), Viscount Hardinge, and Lord Panmure.

His Royal Highness the Duke of Cambridge, and her Royal Highness the Princess Royal and the Princess Alice arrived at Aldershott at an early hour, and proceeded to the Queen's Pavilion, where they partook of slight refreshment before proceeding to the ground.

All the regiments turned out before ten o'clock. Each corps was inspected by its regimental officers, and then, moving by sections of four, they gained the Camp by various routes leading along the Winchester road to the south. After marching over the wild, rough moorland for about three miles, the troops approached a broad eminence of considerable extent, called "Cesar's Camp." In some parts the sides are so steep as to be almost precipitous, and the table-land on the summit is well defended by a ditch within the last twenty years. The summit of this relic of our conquerors is from forty to forty-five acres in extent. On the plateau extending from the summit of this camp the troops halted in lines of brigade, and in this position awaited the arrival of the Queen.

Her Majesty left the Pavilion on horseback shortly before eleven o'clock, and rode directly to the review ground. The Prince Consort and the Duke of Cambridge accompanied the Queen on horseback, and the Princess followed in a pony phaëton. Sir Frederic Smith, K.B., Viscount Hardinge, General Knollys, Brigadier-General Hutchinson, Colonel Grey, Lord Alfred Paget, &c., were in attendance on the illustrious party. As the Queen approached the line the whole of the regiments presented arms and lowered their colours, the united bands playing the National Anthem. Her Majesty first inspected the whole line, after which the forces were

VISIT OF HER MAJESTY TO THE CAMP, AT ALDERSHOTT.

divided into brigades and marched into position, as if for the purpose of repulsing a flank and rear attack of an enemy. One brigade was detached along the Winchester road, and, after making a considerable *detour*, wound round by another part of the heath, and took up its position in open column of companies on the right flank of the steep Roman camp. It there threw out a detachment of skirmishers, while the rest of the troops were moved on the hill which formed the centre of the position taken up, and extended down its left flank in line, with skirmishers in front, and support in column

The Royal party having dismounted on an elevated position, General Knolleys put himself at the head of the troops, and the mimic engagement began by a sharp skirmishing fire from the Rifles on the right flank of the position. After a few minutes the skirmishing became hotter, and ran along the centre and left. The Rifles kept up this fire for some time, but at last gave way, and were driven in on the right flank. The brigade stationed in the rear immediately supported them by deploying into line, and, after closing up more to their centre, began a file firing. They were, however, not able to maintain their ground, and supports were dispatched from the centre to cover their retreat. As this manœuvre exposed the force on the hill to be taken in rear, these troops were compelled to shift their front. The skirmishers were called in from the centre of the position—the Roman camp—and the centre and right fell back at double time, only covering their movements with the Rifles, who broke up and skirmished in beautiful order. The centre and right of the force then fell back nearly a mile, retreating in regular lines, with supports in open column. Each ditch and bank was lined by skirmishers to cover the backward movement, and each regiment and brigade took ground to the rear and left of their former position. By these manœuvres the left wing of the force, which had not yet been in action, was left to bear the enemy's attack, while the right and centre re formed up in their rear. The left wing accordingly sent out its skirmishers while their main body advanced to the crest of a ridge, taking ground still more to the left. As fast as the left wing moved, the right and centre sent up spare regiments to extend its front, till a line was formed of upwards of a mile in length. This now opened file fire, and or about ten minutes the rattle was deafening, and dense masses of smoke obscured the sky. When the smoke had cleared off the defeated right and centre wings had formed another extended line in support of the left, with powerful reinforcements in the rear. This display of force was overpowering; and the enemy, presumed to be daunted, pursued their success no further.

A keen wind and slight mist, which threatened heavier rain, terminated the engagement earlier than was originally intended. During the evolutions the troops marched and counte marched a considerable distance, and over this ground the Royal party followed on foot, over hills and across valleys. When the engagement was over, the troops formed in contiguous line of open columns of companies, and marched past her Majesty. The appearance of the men, while executing this manœuvre, reflected the highest credit upon all the officers connected with the management of the Camp. The Royal party now rode back to the Pavilion, and, after partaking of luncheon, returned to Farnborough station, and from thence by train to London.

HER MAJESTY REVIEWING THE TROOPS AT ALDERSHOTT.

## PRESENTATION TO THE VISCOUNTESS DUNGANNON, AT BELFAST.

The Victoria Hall in Belfast was on the 3rd instant the scene of a very gratifying demonstration of feeling, by the tenantry of Lord Dungannon's Irish estates, presenting an admirable portrait of his Lordship to the noble Viscountess, his lady.

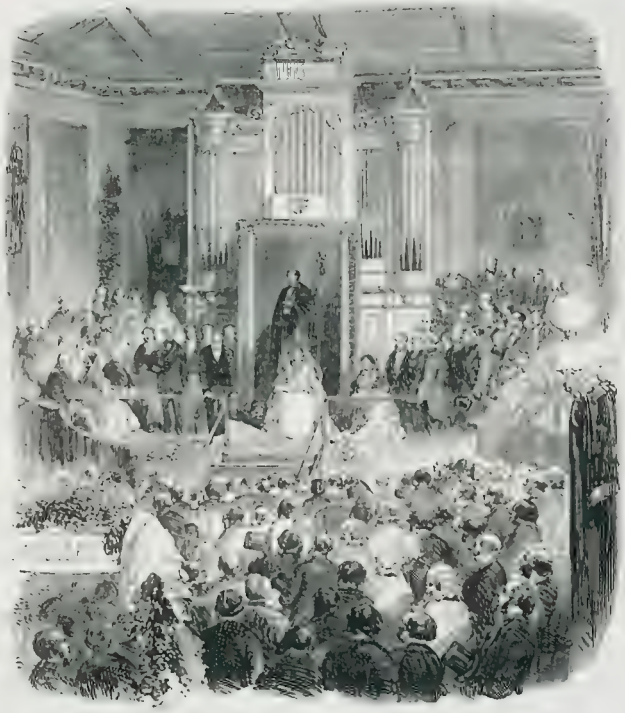
The Hall was elegantly and appropriately decorated. On the platform and in front of the majestic organ, was placed the portrait intended for presentation. It is a full-length likeness of the noble Viscount, who is represented standing in the midst of wild mountain scenery, and wrapped in a cloak; and it is due to Mr. Catterson Smith, the painter of the portrait, to say that the whole large assembly on their entrance instantly recognised the familiar characteristics of the noble Viscount. On each side of the picture were placed large vases filled with beautiful bouquets of exotics. In front of the orchestra were other vases, of wire-work, containing some fine specimens of native heaths and other flowering shrubs. On the right of the orchestra was displayed a large picture of a harper, with the motto above, "Cuish la machree;" and beneath, "Welcome to Ireland." Opposite to this, on the left wall, was a magnificent grouping of national and military flags. The walls on each side through their whole extent were gracefully decorated with festoons of evergreens, flags, and cartoons, bearing the Dungannon arms. The gallery, which was filled by a goodly company of fashionables, was similarly ornamented. In the centre of the hall was a floral arch, richly laden with fragrant shrubs, flags, &c., and containing large inscriptions on each front—one of them being "Long Life to our Landlord," and the other, "Long Life to Lady Dungannon." In the side gallery was stationed Mr. Hart's excellent quadrille band.

At one o'clock the Hall was completely filled by the tenantry, with their female relatives, numbering eight hundred. The platform was also crowded with ladies and gentlemen.

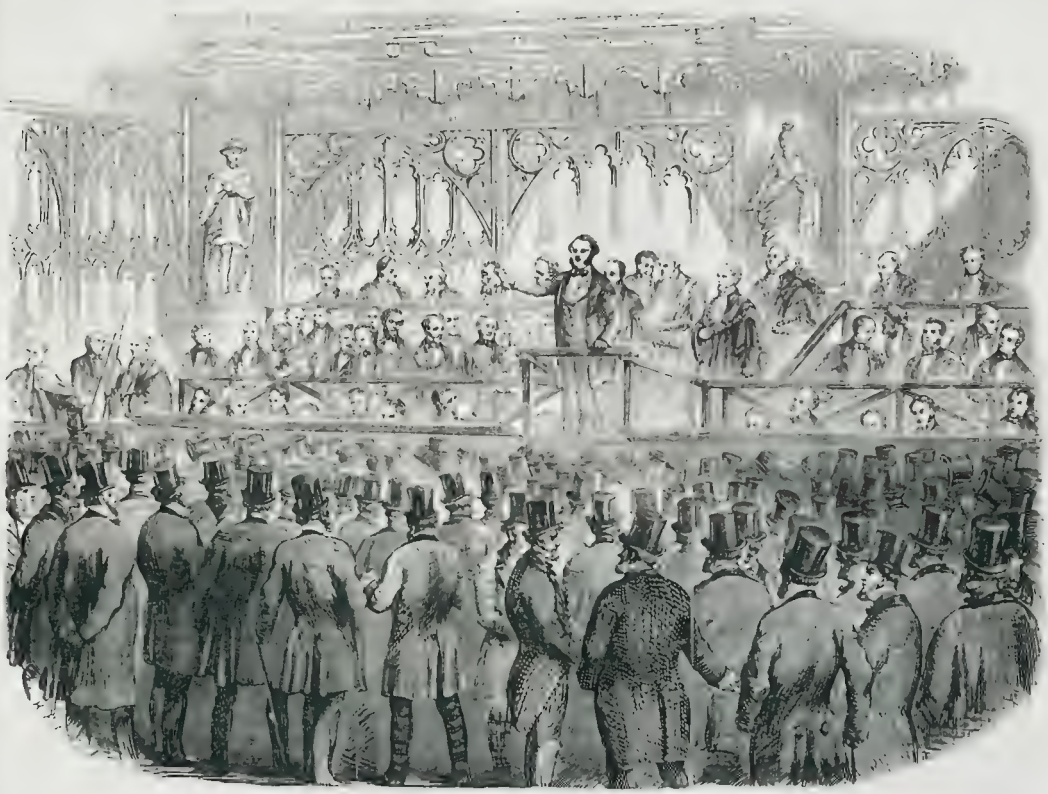
Very shortly after the assemblage had fully collected a loud cheer announced the arrival of Lord and Lady Dungannon and of Miss Letitia D'Arcy Irvine her Ladyship's sister, who, accompanied by George Posnett, Esq., J.P., his Lordship's respected and esteemed agent, were received with the most gratifying demonstrations of welcome.

As soon as the noble Viscount and his lady had taken their seats, Mr. Posnett came forward and addressed Lady Dungannon on behalf of the tenantry, requesting her Ladyship to receive the portrait as a lasting memorial of the esteem in which Lord Dungannon was held by them, and as a pleasing reminiscence of the first visit of her Ladyship to his Lordship's Irish estates. He (Mr. Posnett) trusted he might be permitted to observe that such a compliment was as graceful as it was unprecedented, coming, as it did, from a body of men that any landlord should feel proud of. The men now assembled before them constituted a portion of the farming class of this country, of whom it was well said that they formed the strength and staple of this great empire. On [illegible] occasions the tenantry now b[illegible] them had rendered themselves [illegible]ue for their devoted loyalty to their sovereign, and were always the firm supporters of the law, the maintenance of which ensured to the nation contentment and happiness. They now requested her Ladyship's acceptance of the testimonial before her, in the hope that posterity would recognise it as evincing the strong necessity for a right feeling to exist between landlord and tenant, as being conducive to the prosperity of both. Gratifying as the proceeding was, and honourable as it was to their feelings as tenants, he trusted it would go far to solve the problem of which Tenant-right was the theory,—that tenants, however tenacious they were of their rights, by respecting the rights of their landlord, and appealing to him in their difficulties for advice, would give the best proof that the well-being and prosperity of the landlord and tenant were identical.

The Viscountess Dungannon then rose, and presented herself in front of the pia forte. Her Ladyship was greeted with an enthusiastic burst of cordial welcome. She said—"I beg you will accept the warmest thanks a grateful heart can offer for your reception of me this day, and for this touching tribute of your affection for Lord Dungannon, which I am proud to receive at your hands (Applause). You must not consider me a total stranger. If I ever felt proud of the land of my birth, it is on the present occasion, when once more treading my native soil, and receiving from a body of Irish tenantry this portrait so faithfully executed by an Irish artist (Cheers). No mode of evincing your affection towards your landlord could be more gratifying to myself; and I can assure you the recollection



PRESENTATION TO VISCOUNTESS DUNGANNON, IN VICTORIA HALL, BELFAST.—FROM A PHOTOGRAPH BY CLYDE, OF BELFAST.



THE COMMON HALL ON CORPORATION REFORM, IN GUILDHALL.—(SEE NEXT PAGE.)

of this day's proceedings will be cherished till the latest hour of my existence (Much applause). Again and again I thank you, and I sincerely pray that a kind Providence may watch over yourselves and your families, and grant you every happiness both here and hereafter." Her Ladyship, having bowed to the audience, resumed her seat, amidst loud cheers.

Viscount Dungannon then rose, amidst loud cheers. When silence was restored, his Lordship addressed the assembly in an eloquent speech, thanking them for the magnificent present.

The Rev. Dr. Montgomery then spoke in feeling terms of the honourable position and substantial prosperity of the farmers of Ulster, a great deal of which, the Rev Doctor maintained, had been derived from that industry with which they pursue their own rights and interests, and that respect which they have always paid to the landlord to whom they feel themselves indebted for favourable opportunities of following out that industry. The Doctor then adverted to the misrepresentation of the Irish landlords, maintaining that the good landlord is the rule, the bad one the very rare exception; adding that the tenants themselves are the best judges of the value of property, and are ever ready, when the opportunity of purchasing a farm occurs, to give a very large sum of money for the tenant-right of it demonstrating to what extent they participate in the landed property of the country. The Doctor concluded his address amidst loud cheers, the band playing "Auld Lang Syne."

Lord and Lady Dungannon then, having received the congratulations of the company on the platform, and having had several presentations made to them, retired. The tenantry then partook of a *déjeûner* in the Music Hall, to wind up the happy proceedings of the day.

## LONDON CORPORATION BILL.—THE GUILDHALL MEETING.

THE Common Hall of the Liverymen of the City, which was held on Tuesday week, in the Guildhall, to oppose the London Corporation Bill, was one of the most numerous that has assembled there for some time. The Right Hon. the Lord Mayor took the chair at ten minutes past one precisely, and the proceedings commenced by the Serjeant-at-Mace calling out that those who were not liverymen were to leave the hall on pain of imprisonment—an announcement which was received with loud laughter.

The Lord Mayor then stood forward, and said that he had called them together in consequence of a requisition, numerously signed, to take into consideration the bill which was now before the House of Commons. That bill struck at the root of their ancient and valuable privileges. For himself, he was no party to the proceedings beyond calling them together, according to duty as chief magistrate of their city, attending to their requisition. He could say, that though the bill professed to widen the electoral basis of the Corporation, in other respects it was a total extinction of those rights which they had possessed for many years past. The question deeply concerned themselves, and he hoped they would deal with it and discuss it in a manner well calculated to support the dignity of the city of London.

Mr J. Laurence, who proposed the first resolution, said the bill had been called a moderate measure. That moderation was the moderation of the bold pickpocket, who took so much as he could in one fell swoop, leaving the remainder for a future incursion; it was the moderation of the pickpocket, who stole a man's purse and then thought him well off that he left him his hat and coat; it was the moderation of the housebreaker, who, after taking away plate and money, thought the owner of it had no reason to complain so long as his life was spared (Cheers). After alluding to those portions of the bill which he conceived would interfere with the rights and privileges of the Corporation and of the livery, he concluded by proposing the following resolution:—

That the bill lately introduced into the House of Commons purporting to be for the better regulation of the Corporation of the city of London, although professing to abolish such customs and privileges as injuriously affect trade, ignores the whole body of the livery, is destructive of its privileges, extinguishes its municipal existence, and is a perverse subversion of the ancient rights, properties, and liberties of the Corporation, and that this Common Hall determines to give the most earnest opposition to the passing of such bill (Cheers)

Mr Finden seconded the resolution.

Mr Bennoch (whose presence was by no means welcomed) said that as a citizen and a liveryman, he felt that he might venture to say a few words upon the subject of the meeting. The history of the Corporation of London was the history of civilisation and of liberty all over the world. In times of peril it had stood forward protecting the Crown, and it had also stood forward against the Crown to protect the people (Hear, hear). It was well known that ancient things would sometimes become corroded and fall into partial decay. It was therefore the duty of the meeting calmly to look at the position of the Corporation of London at the present time, and to ascertain for themselves as liverymen whether the proposed measure was likely to be destructive of the privileges of the citizens of London and of civil liberty, or whether it was not a bill for the purpose of amending things which were becoming obsolete, and of remedying certain defects so as to place the Corporation of London in better harmony with other municipalities throughout the kingdom (Cries of "No, no," and much confusion). [The Lord Mayor here stepped forward and begged of the livery to give Mr Bennoch a fair hearing upon which that gentleman continued.] The bill did not destroy a single privilege enjoyed by the livery and actually extended privileges to other of their fellow-citizens. For the last twenty years the Corporation had tried to reform itself, but it had never succeeded in doing so. The resolutions declared that the bill would extinguish the municipal existence of the city of London. He (Mr. Bennoch) denied this, as the bill in express terms declared that it would change and reduce, but it did not destroy in any one particular (Oh, oh!" and great confusion). The bill reduced the number of the Common-council from 206 to 80, and the Aldermen from 26 to 16, and when he found gentlemen who had for twenty years brought the subject before the Common-council periodically, for the purpose of carrying certain reforms—when he found that in every wardmote in London, for nearly twenty years, the reformation of the Corporation had been a great question—when he remembered that the Corporation itself, not very long ago, tabooed the livery, and brought in a measure of reformation more destructive to that body than the bill was—he could not understand how the Corporation could, with common decency or common modesty or honesty, ask the livery to come forward and support them in their opposition to the Government measure. He, therefore, now asked the livery to support the Government in carrying a measure which, if destructive to the Corporation, was salvation to themselves. The city of London had a population of 128 000. How much money did they suppose was expended in the administration of the affairs of the Corporation itself? It cost the taxpayers, through the Corporation, £114 000 in the mere administration. The revenue of London was rather under £400,000, and it cost those who lived in London, and paid taxes, £114 000 to administer that sum of money (Cries of "Shame, shame!"). In Liverpool, with a population of 376 000, a fund was annually administered of close upon £600.000, the cost of the administration being under £30,000. In Manchester, which had a population of 320,000, a revenue was expended of £485,000, the cost of administration being £8750. He wanted to know whether some portion of the £114,000 expended by the Corporation might not as well be saved, and asked whether it was their desire to get rid of so large a sum as that for doing what could be better done for £20 000? His only objection to the proposed measure was that it was too moderate: it did not go quite far enough. The measure, in order to have been complete, ought to have gone a little further, and included the manner in which the large funds of the Corporation ought to be administered and disposed of (Loud cries of "No, no"). The expenditure of nearly £120,000 for the administration of their affairs, in a population of only 128,000, was the most gigantic piece of extravagance that the world had ever witnessed, and the bill now before Parliament, if passed into law, would at once and for ever destroy the unanswerable, indecent, and extravagant system at present in existence. Mr. Bennoch concluded by proposing the following amendment:—

That the bill lately introduced into the House of Commons for the better regulation of the Corporation of the City of London is wise and moderate, and this Common Hall determines to give its most earnest support to secure the passing of such bill.

Mr Bateman seconded the amendment.

Alderman Sidney was at a loss to conceive how his friend Mr. Bennoch could stand up in such an assembly as that and say that the proposed measure was a wise and moderate one. He had always understood both the mover and seconder to be what were termed advocates of liberty (Hear, hear). He had always understood Mr. Bennoch to be far advanced in what was called the Liberal school of politics, and he found to his astonishment that that Liberal leader of a Liberal age sought to commit an outrage upon popular rights by transferring from that assembly those rights which they had possessed for centuries to an oligarchical body, composed of ninety-six (Cheers). He should most fervently support the original motion, and trusted that it would receive the almost unanimous approval of the meeting (Loud cheering).

Mr. Clark spoke in favour of the original motion.

The Lord Mayor then put the amendment, which was negatived, only three hands being held up in favour of it.

The original motion was then carried amid loud cheering, as were several other resolutions condemnatory of the bill, and pledging the Corporation to resist its being adopted by the Legislature by every means in their power.

## CALENDAR FOR THE WEEK.

SUNDAY, April 27.—Rogation Sunday. Sir W. Jones died, 1794.
MONDAY, 28.—Mutiny of the Bounty, 1789
TUESDAY, 29.—Loud'n University founded, 1827.
WEDNESDAY, 30.—James Montgomery, the poet, died, 1854.
THURSDAY, May 1.—Ascension Day. Duke of Wellington born, 1769.
FRIDAY, 2.—Columbus discovered Jamaica, 1494.
SATURDAY, 3.—Napoleon sent to Elba, 1814. English took Jamaica, 1655.

*LONDON, SATURDAY, APRIL 26, 1856*

## THE TREATY OF PEACE.

WE have transferred to our columns from those of the *Daily News* a translation of the text of the Treaty of Peace which the world owes to the labours of the diplomatists recently assembled at Paris. The Treaty justifies the predictions that were made of it. It ends the war between Russia and Turkey; but takes no account of the general circumstances of Europe, or of the possibilities—not to say the probabilities—of war that exist in other quarters. As a settlement of the disputes between Russia and the Porte, the Treaty is satisfactory in every respect but one. It does not compel the aggressive Power to pay any portion of the costs of the war which it unrighteously provoked. In every other point of view—considered as a question between those two Powers in the first instance, and between those two Powers and the rest of Europe in the second—the terms of the Treaty are highly favourable to the Ottoman empire, and to the Allies who took up arms to resist a particular act of aggression. Sebastopol cannot be again rebuilt to overawe Constantinople, and to control the Euxine, without compelling every Power who signed the Treaty to unite with Great Britain, France, and Turkey in levelling it to the ground. No fortresses can be constructed on any portion of the seaboard or littoral of that region, Circassia included. The Black Sea is to be free to the commerce of the world; the mouths of the Danube are no longer to be under the guardianship or control of Russia, but to be as open to the ships of all nations as the Atlantic or the Pacific. The Consuls of European Powers are to be admitted into every port of the Euxine, so that secret armaments on the part of Russia will no longer be possible. The Russians are to evacuate Kars—the Austrians, Moldavia and Wallachia—and the British, French, and Sardinians, the Crimea, and every portion both of Russian and Turkish territory. So far all is plain, tangible, and just. With what has been done there is no room to cavil; and Turkey, if she have any strength and vitality yet remaining in her people, or any capacity whatever for development and progress in her institutions, will have the opportunity of meriting that place in the European system which the fortune of war has assigned her. The stronger and richer she becomes, the more she attaches to her dominion those Christian populations whose existence she formerly ignored except for purposes of taxation, the less likelihood there will be that Russia will seek to pick a quarrel with her, and the better it will be for her own happiness and the repose of the world. Turkey may well rejoice that the war has been brought to such a conclusion. She can afford to forego indemnity for the expenses of the war much better than her ancient enemy can afford to pay it. That of itself is no small triumph. The provoker of war has suffered most by it. The supposed victim has emerged from it with resources but little impaired, with a fair future before her, and with the good wishes of all Europe for her strength and prosperity, while the aggressive power has lost *prestige* and dominion, and been driven back half a century in her schemes of conquest.

It remains for future years—perhaps for months only—to disclose whether the Powers who were parties to the pacification of Paris were wise in restricting their labours and their supervision to the original cause of the war; and whether, having the rare opportunity of settling other disputed points of the international relationship, they acted with common prudence and sagacity when they refused to consider any other questions. Great Britain and France invited all the Powers of Europe to join their alliance, and two secondary Powers responded to the call. The one entered into a treaty with them;—the other went further, and not only joined their alliance by the stipulations of written contract, but by actual participation in all the penalties, hardships, and glories of the war. Sweden and Sardinia did not care so much for Turkey in this business as they did for themselves. They were not in the position of England and France. They were not mighty Powers taking up arms or assuming responsibilities for the vindication of the public law of the world; but they were minor States, desirous, the one of being relieved from the incubus of Russian dictation, and Russian occupation of territory justly Swedish; and the other of taking that rank and being of that consequence in Italy which all Italy wished her to assume. The Swedish question will, perhaps, not press very severely or very promptly on the attention of the world; but it is evident to any one who studies the events of the day, or who has eyes to see or ears to hear what is happening, that the Italian question wears a very different aspect. The Turkish complication has passed for a time out of the field of the political kaleidoscope, but only to give place to the newer complications of the question of Italy. The alliance formed by Sardinia with Great Britain and France stirred the heart of the whole peninsula; and from end to end of it, and from sea to sea, the Italians have awakened to the discouraging conclusion that their cause has been timidly, if not foolishly, abandoned. While this is the state of feeling, it is impossible to justify the assertions of those *couleur de rose* statesmen of the French capital who tell us that peace is secured for a dozen years at least, if not for fifty. The death of the Pope, for instance, would open the great sluices of difficulty and danger. Detested by its subjects—a palpable and oppressive anachronism—a curse to the country over which it rules, and only maintained on its uneasy and undignified seat by the bayonets of one Prince, who would like to be King of Italy, and by those of another Prince, who dreads nothing so much as that the Italians or any class or state should be free, the Papacy is not only at the mercy of such chances as may remove from the world the present occupant of the Papal throne, but of a thousand other contingencies, in Rome itself and in Naples, as well as in Vienna and Paris. As a temporal Power it is impossible that the Papacy can last. No one knows this more thoroughly than the Emperor of the French; and for this reason he but nurses and feeds the power of Pio Nono, as the authorities of Newgate nurse and feed the criminal condemned to public execution, until the hour appointed for his sacrifice. Austria is in the same predicament. Fearing for Lombardy and Venice, she makes friends with the Sovereign Pontiff to secure the hold over Italy which threatens to slip from her grasp. What France achieves by the strong right hand, Austria aims to achieve by religious submission, and sells herself as a slave to the spiritual domination of that Pope whom as a Sovereign she despises, and whom she could depose to-morrow if she felt inclined, supposing always that France would permit the consummation. It was a dispute about the rival Churches of Greece and Rome that led to the late war. Another dispute, of which the Church of Rome will be the prime cause, looms ominously before Europe. Perhaps England and Russia will not be on opposite sides on that occasion. Russia will have no object in supporting the Pope; and Great Britain, both on religious and political grounds, will rejoice at his downfal and at the freedom of Italy, which will be one of its first results. Until that question be settled, Europe cannot be considered safe. It might have been settled at Paris within the last month, if the majority of the diplomatists there assembled had known how to look an inch before their noses. The mere fact that the question was mooted and discussed, and that the whole future of Italy was brought forward by the representative of Sardinia, and tabooed, although with due respect, is a fact that will fructify in every portion of the peninsula. The hopes thus excited will not be allayed by the civil speeches of the Emperor of the French, or by the cold courtesies of the Government of

Great Britain. The Italian mind is as volcanic as the soil; and there are political as well as physical Etnas in Italy that will heave and overflow at the time appointed.

THE modern relations between the British colonies and the mother country are cast in the mould of independence. They are no longer ruled in the spirit of Roman Proconsulship. Representative government is established among them, and, to a great extent, they have the management of their own local affairs. Downing-street, however, still exercises a rigid control over their external commerce, and that reserved authority is beginning to excite some discontent. It was, indeed, relaxed in 1850, when a treaty of reciprocity, after protracted negotiations, was effected between the United States and our North American colonies, which has been attended with the happiest results; and the success of that experiment has created a desire in Canada to extend the system of reciprocity to some of the West India Islands; to which policy we shall presently refer. We have before us the last report forwarded to Congress by the American Secretary of State, which contains comparative tables exhibiting the value of trade between the United States and the British American possessions during the years 1851, 1852, 1853, 1854, and 1855. These are instructive documents; being unanswerable protests against the restrictive system. We shall select as illustrations of the benefit of free or reciprocal commerce the tables belonging to the first and last years of the series:—

| 1851. | | | | Dollars. |
|---|---|---|---|---|
| American exports to Canada | ... | .. | ... | 7,929,140 |
| To other British American possessions | | | ... | 4,085,783 |
| | Total | ... | ... | 12,014,923 |
| 1851. | | | | Dollars. |
| Imports from Canada | ... | ... | ... | 4,956,471 |
| From other possessions | ... | ... | ... | 1,736,651 |
| | Total | ... | ... | 6,693,122 |

Thus, the first year produced an interchange of commodities valued at 12,708,045 dollars, where no such trade at all had previously existed. This was equivalent to the discovery of a gold mine.

| 1855. | | | | Dollars. |
|---|---|---|---|---|
| American exports to Canada | ... | ... | ... | 16,730,344 |
| To other British American possessions | | | ... | 9,085,676 |
| | Total | .. | | 27,806,020 |
| 1855. | | | | Dollars. |
| Imports from Canada fm | ... | ... | ... | 12,182,314 |
| From other British American possessions | | | .. | 2,954,420 |
| | Total | ... | ... | 15,136,734 |

Thus, the reciprocal trade between the two countries in the last year of the new system amounted to 42,942,754 dollars. In this short period, from 1851 to 1855, the augmentation in the traffic has been about 300 per cent, and both have been enriched by the operation. Has the trade between the mother country and British North America declined in consequence of this arrangement, so long resisted, and with so much difficulty accomplished? Quite the reverse, as shown by the last statistical abstract of the United Kingdom. We take the same years of comparison, and the following is the result:—

| | | | |
|---|---|---|---|
| British exports to British North America in 1851 | ... | £3,813,707 |
| ,, ,, ,, | 1852 | ... | 3,965,864 |
| ,, ,, ,, | 1853 | ... | 4,896,544 |
| ,, ,, ,, | 1854 | ... | 5,878,092 |

The statistical abstract does not include the year 1855 in the section (No. 14) of the declared value of British and Irish produce exported from the United Kingdom to foreign countries and British possessions.

This prosperous commerce between the United States and British North America has excited in Canada the desire of intercolonial trade on a principle of reciprocity; for which purpose that province made overtures to British Guiana, which were accepted, but on which the Home Government put a negative. The plan, however, was strongly recommended by Sir William Colebrooke, a gentleman of great and varied experience. Many years since he was Governor of Antigua; he was then promoted to the Governorship of New Brunswick, and afterwards removed in the same high capacity to the Windward Islands. He therefore possesses an intimate knowledge of the requirements both of North America and the West Indies. We have before us his letter of the 11th September, 1855, dated Barbadoes, in which he shows the advantage which has accrued to Mauritius from finding a new market for its sugar in Australia. In Mauritius the increase in the production of sugar, as Sir William points out, has been considerable since the gold mines were discovered, it being estimated, prior to the discovery, at 200,000,000 lb. (142,800 hogsheads); and since, with an annual addition of 20,000,000 lb. (or 14,280 hogsheads), which, he says, "could not have been attained, even with the aid of 100,000 coolies, without the stimulus derived from the profits of the Australian markets." But, notwithstanding this partial revival in Mauritius, Sir William adds, "Unfortunately, in the present condition of the colonies, all classes are suffering to a degree which renders some measures of relief of the greatest urgency; for, exposed to the competition of the Spanish colonies, stimulated by the Slave-trade, and at the same time subject to the highest pressure of the present high duties in the United Kingdom, the reduction of profits has checked the employment of capital."

The present proposition of Canada is to effect an intercolonial treaty of trade with such of the West India Islands as may be disposed to reciprocate with her. To those islands she desires to send flour, butter, beef, pork, biscuit, fish, deals, staves, spars, shingles, and planks, receiving in exchange sugar, coffee, molasses, and similar produce. It is presumed that this traffic would be one almost purely of barter, without the intervention of coin. Under the British Trade Regulations now existing Canada is compelled to take her West India produce through the United States, for which she pays in cash; while the British West Indies are compelled to get their provisions from the United States, for which they also pay in cash; and Sir William Colebrooke states, in the letter already quoted, that this money "is employed by the Americans in the purchase of sugars at Cuba and Porto Rico, thereby abstracting capital from the British colonies to the encouragement of the Slave-trade, to which they are exposed in competition in the British as well as in the American markets." He advocates the intercolonial plan proposed, and concludes his correspondence with this remark:—"I fully anticipate the command of the American markets would give a similar impulse to these colonies to that which the Mauritius has received from its proximity to Australia."

This letter of Sir William Colebrooke was an answer to a circular forwarded to him by the late Sir William Molesworth, dated 11th August, 1855, in which that lamented Colonial Minister, after observing that the attention of her Majesty's Government had been called to a proposal made for the mutual abolition of customs duties upon the productions of Canada and the West India colonies, meets it with a negative on the following grounds:—First, that it would separate, commercially, so far as such an arrangement was involved, the colonies who entered into it from the rest of the empire. Secondly, that it would be injurious not only to the interest of consumers in the colonies which were parties to the arrangement, but to the interests of producers in every other part of the empire. Thirdly, that it would be inconsistent with the Imperial policy of Free-trade. Sir William Molesworth added that such a policy as Canada and British Guiana demanded "tended to form the colonies into separate groups, with peculiar and exceptional commercial relations."

On the 26th June, 1855, the Lords of Committee of Privy Council for Trade had opposed this intercolonial proposition, and referring, in their circular, to the treaty concluded between her Majesty's Government and the United States, providing for the mutual admission, duty free, into the United States and the North American provinces, of certain articles of their respective produce, stated that they had deviated, in that instance, from the fundamental rule of recent commercial policy from a *political* motive, though that motive is not mentioned.

Such is the substance of this varied correspondence, which we have culled from official sources. A question of delicacy and difficulty is involved. The days of colonial coercion are past, and it may be dangerous to check the spirit of conciliation. The West Indies are depressed, and the motto of Canada is "Forward," and if she sees an outlet for her trade which Imperial policy obstructs the bond of union may be weakened. Let us hope that the subject will receive the attention of Parliament.

*The range of temperature during the week* was 31·6°.

*The Weather.*—On the 16th, fine; 17th, dull, rain after 9½ p.m.; 18th, fine from 9 a.m. till 8 p.m., then rain; 19th to 22nd, fine.

*The direction of the wind* was—on 16th, N.E. by N., becoming N.E. at 6 p.m., changing to N.N.E. at 9½ p.m.; on 17th, to N.E. at 6¾ a.m.; on 18th, to E.N.E. at 1¾ a.m., to N. at 10 p.m., to N.E. at 2 p.m., to N.N.E. at 6 p.m., to N.W. at 7½ p.m., to W. at 9 p.m.; to N.W. at ¼ a.m., on 19th, to N.W. at ½ a.m., through N. to E.N.E. at 2¾ a.m., to N.E. at 4¾ a.m., to N.N.E. at 7 a.m., to N.W. by W. at 12½ a.m.; on 20th, to W. at 3¼ a.m., to S.S.W. at 9¼ a.m., to S. at 1 p.m., to E.S.E. at 11¼ p.m., to E. at 2¼ p.m., changed through N. to W.N.W. at 8¾ p.m., to N.W. at ½ p.m., to W. at 7¾ a.m. on 21st, to S.S.W. at 8¾ a.m., to W. at ¼ a.m., to W. at 1¼ p.m., to S.W. at 2½ p.m., changed through S. to E.N.E. at 2½ p.m., becoming E.S.E. at 8¼ p.m., to S.E. at 1¾ a.m., S.S.E. at 11¼ a.m., S.S.W. at 11¾ a.m., S.W. at noon, S. 1 p.m., W.S.W. at 12½ p.m., S.W. at 2 p.m., W.S.W. at 4 p.m., and S.W. at 11½ p.m. The wind was rough on the 16th, brisk on the 17th, after which mostly calm.

Gentiana alpina and the Black-horn came into bloom on the 16th.

E. J. LOWE.

A COALPIT FLOODED.—TWO LIVES LOST.—On Saturday last a good deal of consternation was created at Cumberworth, near Holmfirth, by the irruption of a large quantity of water from some old workings into the Kirkstairs Colliery, situate at Cumberworth half, near Denby. On Saturday, while some of the miners were working, it is supposed they went too near the old coalpit, when the water, which had been accumulating for years, rushed into the works in large quantities. An alarm was raised among the miners; all rushed towards the bottom of the shaft, and in a very short time every person in the pit, with two exceptions, a lad of fifteen and a young man aged nineteen, succeeded in getting into an upper pit or bed of coal. The event has caused a good deal of excitement, and on Sunday several thousands of persons from the neighbouring towns and villages visited the place.

WIFE-BEATING.—Last week the Mayor of Oxford sentenced one of his own servants, named William Whiting, to six months' imprisonment, and ordered him at the expiration of that period to find sureties for his good behaviour, for kicking and beating his wife in a most disgraceful manner.

THE ALLEGED POISONING IN STAFFORDSHIRE.—On Monday last the adjourned inquest relative to the death of Mrs. Catherine Ashmall, wife of Mr. Joseph Ashmall, farmer, of Edtall, near Lichfield, was held before Mr. W. Ward, coroner, at the Star Inn, Burntwood. An analysis of the contents of the stomach by Professor Taylor proved that no poison was found in them, and that there was nothing in the symptoms attendant on deceased's last illness inconsistent with death from natural causes. The jury returned a verdict of "Death from Natural Causes."

SCOTCH COLLIERS' STRIKE.—This strike continues and extends without the slightest prospect of an amicable adjustment. The wages of the men were advanced from 4s. to 5s. per day in autumn last. Recently the employers, or at least the majority of them, intimated their intention to bring back the wages to the old standard, and this the colliers have generally resisted. The men state that coal and iron maintain their former rate of price; while the masters aver, on the other hand, that at the wages of 5s. per day they were producing coal and iron at a loss. This state of matters has led to a strike over all the western counties of Scotland, and it is said that nearly 30,000 men are now idle from this cause. The masters are meeting the resistance by blowing out their furnaces. Already about 20 per cent are out of blast, and they threaten to extinguish the whole of them. A few hundreds are working here and there—some at the reduced rate of 4s., and others at the old rate of 5s., per day; but in the aggregate these numbers are trifling compared with those who are on strike. Hitherto the men have, generally speaking, conducted themselves in an orderly manner; but it is needless to dispute that such a large body of men, ranging over the country, and assembling daily in masses of from 2000 to 12,000, is likely to lead to mischief, and calculated at least to excite great uneasiness. The authorities are accordingly taking measures to meet any disorder that may be threatened, or put down with a firm hand any attempt at disturbance which may take place. Meanwhile a detachment of 270 men of the 1st Lanarkshire Regiment of Militia was marched on Saturday from Hamilton to Airdrie, the centre of the strike. On Sunday the Commissary of Lieutenancy for the county of Lanark served an order upon the yeomanry cavalry, both of the upper and lower wards, to hold themselves in readiness to support the civil authorities. These two regiments muster 600 sabres. On Sunday night a regimental order, of which the following is a copy, was served upon every member of the Glasgow Queen's Own:—"Queen's Own Royal Regiment of Glasgow Yeomanry Cavalry:—Regimental Order.—Her Majesty's Commissioners of Lieutenancy of the county having ordered the regiment to be in readiness to act in aid of the civil power, members of the corps are therefore directed to see that their arms are in good order, and hold themselves prepared to turn out in marching order (spike in helmet) without any delay, upon receiving notice to that effect. Stable-jacket, forage-cap, and other necessaries, to be packed in the valise. *** The drill to be continued on the green as usual.—By order, THOS. PATERSON, Adjt.—Glasgow, April 20, 1856."

## NOTES OF THE WEEK.

THE topic of the week, even in presence of the Treaty of Peace, is only one of the means by which peace has been achieved. But the magnificent fleet which blockaded the enemy in all his ports, and, but for his justifiable terrors, would as assuredly have "prevented all chance of future collisions" in the Baltic as he boasts to have done in the Euxine, offers so splendid an excuse for attention to means instead of an end that the coldest logician can hardly quarrel with the illogical quarter of a million who witnessed Wednesday's review, especially if that frigid reasoner were among them. Elsewhere we have said so much of the glorious spectacle that, beyond marshalling the incident in its place in the hebdomadal record, we need add little here, except that the whole world was delighted, with the inappreciable exception of the Lords and Commons who, somehow, were out of their places all day, and will have grumbled in their places before these lines are published.

The Treaty of Paris has appeared in an unofficial but, no doubt, a generally accurate form. We write before Lord Clarendon's explanatory statement can be made; but it can add little substantial information to that already before us. There are thirty-four articles in the treaty, which declares peace; provides for the mutual evacuation of whatever places either belligerent has taken; but, in consideration of the restitution of Sebastopol and the other captured Russian possessions, the Emperor surrenders a portion of Bessarabia, to be added to Moldavia. Several of the articles refer to the improved position of the Christian subjects of the Sultan; but great care is taken to explain that his Majesty's concessions are voluntary, and to assert the "independence," to secure which the war was undertaken. The Danube is declared free; and a Commission of European Powers is to put it into navigable and commercial order; and probably the Danube will be reformed long before the Thames—two years being the time spoken of. The Asiatic boundaries of Russia and Turkey are to be as heretofore. There is much of the good in all this; and it is no use asking, now, whether we could not have obtained more by carrying on the war. England is in the position of a man who has a general grudge against another for his habitually bad character, but by some flagrant outrage is compelled to take the law into his own hands, and to thrash the evil-doer, *pro re nata*. If the culprit flings himself on the ground, offers to make reparation, and promises better things for the future, the Man with the Stick cannot well go on beating him until he affirms his general repentance of all his errors, and undertakes, like the bully thrashed into religion by the Methodist boxer, "to come to meeting next Sabbath, clean shaved, and with a contrite heart." The Man with the Stick has done his work for the present.

But for the fireworks, the popular mind has not as yet pronounced itself very eager. On the whole, however, the exhibition may be considered a desirable one. The money is a trifle in a war that has cost forty millions, and is even a trifle compared to the sums which have been wasted by military or administrative blunderers, who have afterwards been thanked and decorated. The humbler classes have contributed much, and not complainingly, to the war, and should share in any festivities with which it is seen fit to close it.

The glorious scene of Spithead was not for the million the distance and the expense excluded them; and even if a mechanic chose to go down he was compelled to leave his family at home. So that a spectacle for the working classes is really their due, and, perhaps, nothing could answer the purpose better than the three hours of fireworks promised by Sir Charles Wood. We are glad to see that the claims of the East-enders and others are not to be neglected—there will be four exhibitions, in the Parks, in Victoria-park, and on Primrose-hill. This will save much crowding and much fatigue to women and children. We are by no means so convinced of the wisdom of a general holiday to precede the shows, inasmuch as the people will be tired out before dark, and will be inclined to have recourse to stimulants to help them through the evening. The holiday, which is always kept with order and propriety when there is no interference, should be on a separate day, and another evening given to the fireworks. We have every confidence in the good sense and good feeling of the English multitude; but, if Government insists upon its doing a great deal too much, the fault of any irregularities will not be with the people. There was a time when thoughts of this kind on the part of the authorities would have been ridiculed, but that vulgarity at least is abolished; and, however inadequately the Executive may carry out suggestions for the comfort of the many, it does not deride them—a good sign and a pregnant one.

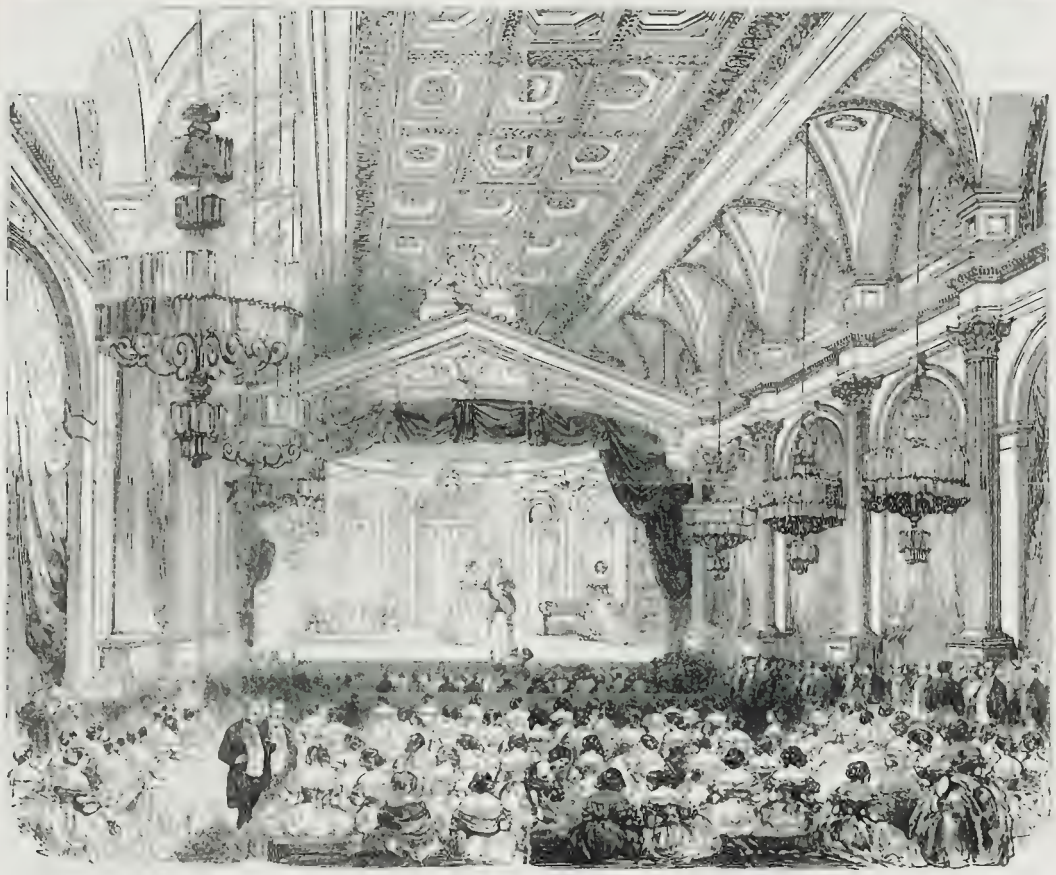
The movement for restoring one of the most noble ecclesiastical monuments in the kingdom—we mean St. Alban's Abbey—is, we are glad to hear, advancing satisfactorily; but no lover of archæology, of architectural splendour, or of the religious traditions of his country, should lose an opportunity of co-operation. There are few Londoners, one would imagine, who are not acquainted with this grand old church; but to those who desire an explanation of the enthusiasm felt for it by others we would commend a run down to the now virtuous borough. It is not touched by one railway; but then two lines go very near it, and either from the Watford station, or that at Hatfield, a short and very pleasant ride through a delightful country takes you to the site where a church was raised in the time of Constantine in honour of Alban, the first British martyr. Take with you Mr. Scott's admirable report upon the building—a sketch of all that has been done, from the time of King Offa to that of Queen Victoria, for the memory of the martyr, and of what ought to be done to transmit the noble memorial to our descendants. And an hour among those stern old columns in the majestic nave will send the stranger home as determined a restorer as any of the noblemen and gentlemen who came forward with open hands and earnest hearts at the very interesting meeting on the 3rd of this month. About £12,000 is all that is demanded but to make St. Alban's Abbey a thing for the next thousand years. £50,000 might well be spent by the Englishmen of 1856. That we may be as practical as is desirable, let us add that when the stranger returns home, and draws his cheque, he can pay it to Messrs. Hoare, and that the report we have commended to him may be obtained from Mr. Austin, the Hertford publisher.

The recent run upon the Provident Institution in St. Martin's-lane is rather to be deplored than wondered at. The institution is one of perfect safety, and its affairs are in a flourishing condition; but this is known to the well informed only, whereas the public know that many savings-banks have been ruined, that the Government does nothing for the depositors, and that a great number of people with great names have of late years been abominable swindlers, and have suffered punishment therefor. It is not, therefore, astonishing that some discharged and vindictive servants of this bank, knowing well in what direction to work, should have been able to terrify the humbler depositors into a panic. We trust, however, that many who have withdrawn their money will redeposit it; and it might not be amiss if the Prince Albert, president of the institution, were to deem it within the sphere of his presidential duties to invite there to whose interests he extends implied protection to a meeting, where a few straightforward, kindly, sensible words, such as his Royal Highness can always command, would not only restore the confidence of those depositors, but would commend the system of savings-banks to the working classes in a way that has never yet been done.

## H.M. SCREW STEAM DISPATCH GUN-VESSEL "FLYING FISH,"

THIS fine vessel, of 6 guns, 850 tons, 350 h. p., Commander Rhoderick Dew, belongs to the largest class of dispatch gun-vessels, which are intended to have great speed, at the same time to carry a heavy armament. They carry two 68-pounder pivot guns, and four 32-pounder broadside guns. The pivot guns are placed one abaft the foremast, and one between the funnels. The *Flying Fish* is No. 1 of the Red Division of gun-boats.

HER MAJESTY'S GUN-BOAT, "FLYING-FISH."—(SEE PRECEDING PAGE.)



GRAND FETE AND THEATRICAL REPRESENTATION AT THE HOTEL DE VILLE, PARIS, IN HONOUR OF THE PEACE PLENIPOTENTIARIES.—(SEE NEXT PAGE)

FIREWORKS BUILDING FOR THE PEACE CELEBRATION, IN HYDE-PARK.—(SEE NEXT PAGE.)

## GRAND FETE AT THE HOTEL DE VILLE, PARIS.

THE Hôtel de Ville, which has acquired a just celebrity for the magnificence of its fêtes, was, on Monday week, the 14th inst., the scene of a beautiful entertainment in honour of the Plenipotentiaries at the Paris Congress. First there was a grand dinner. The company consisted of Count Orloff, the Earl of Clarendon, Count Buol, Baron de Manteuffel, Count de Cavour, Auli Pacha, and Baron de Bourqueney; of the Presidents of the Senate, Legislative Body, and Council of State; the Ministers, the Marshals and Admirals; Presidents of the various Law Courts; the principal dignitaries of State; a certain number of Senators and Deputies; and a few foreigners of eminence. Madame Haussmann had on her right Count Orloff, and on her left Auli Pacha; the Prefect having Lord Clarendon on his right, and Count Buol on his left.

After dinner the company entered the large suite of rooms, in which were assembled the guests invited to a brilliant spectacle, from 1600 to 2000 persons being present. For this performance one-third of the Galerie des Fêtes was cut off, and converted into a temporary theatre. The decorations were of the most tasteful character. The walls at each side of the staircase and of the landing-places were hid in gilt trellis-work, through which was interwoven the freshest green foliage, while, wherever they could be placed, were to be met corbeil-les of the rarest flowers with illumined globes intermingled. In the Salle du Spectacle the central seats were assigned exclusively to ladies, under the delicate light of a milky ray of eighteen crystal lustres. The gentlemen, who had to find places at the sides. The orchestra was hidden by a mass of camellias. The play selected was the "Concert à la Cour," for the evident reason that it admitted the introduction of singers, musical performers, and ballet-dancers, without breaking up the unity of the whole. Alboni sang enchantingly, Rossi danced exquisitely, and M. Alard fascinated the audience with that king of instruments—the violin. M. Bottesini appeared with his violoncello, which the master, as he ran his hands up and down the strings, kept close to his ear as if he were listening to the sweetest melodious sighs. The sprightly Caroline Duprez sang an appropriate song in the four languages of the Congress, a polyglot composition much applauded.

The fête lasted till near two o'clock.

## THE PEACE REJOICINGS.

IN the House of Commons on Friday se'nnight the Chancellor of the Exchequer explained that the large temporary erections which have during the past week arisen in the Green-park and Hyde-park were intended to be used in connection with the public rejoicings for the conclusion of peace. This was the first official announcement of any intention on the part of the Government to follow the course adopted on the conclusion of peace in 1814. It is rately that the Government of this country takes the initiative in any matters of public rejoicing, and the public will naturally feel considerable interest to learn the details of the plan which, in the present instance, is about to be adopted. The grand peace fête will consist almost exclusively of a display of pyrotechnic art, of the most magnificent and unprecedented character. All the available resources of Woolwich Arsenal have been for some time past directed to the making up of enormous quantities of every description of fire-works. The public offices will be illuminated, and no doubt the example set by the Government will be very generally followed by the inhabitants of the metropolis.

There will not be, on the present occasion, any mimic fleet, constructed at enormous expense, for the purpose of manœuvring on the Serpentine water, as was the case in 1814; nor will there, so far as we can learn, be any ornamental bridges, or Temples of Peace, nor any dreary illumination of the trees in the mall of St. James's-park, such as were gazed upon at the conclusion of the war with Napoleon. It is, however, to be, as it is stated, a grand review by the Queen in person of a large military force in Hyde-park. The displays of fireworks will take place in Hyde-park, the Green-park, on the summit of Primrose-hill, and in the Victoria-park, at the east end of the metropolis. A general holiday will also be announced, probably in the course of the next week. In the Green-park, as well as in Hyde-park, a large number of workmen have been busily engaged during the past week in constructing a temporary wooden shed of enormous dimensions, which is to serve as the place of deposit for the fire-works, and also for their preparation and mounting previously to their discharge. These erections are totally devoid of any thing like an architectural character, nor are they intended to produce any effect in the celebration of the fête. The building in the Green-park is 200 feet in length, 25 feet in height to the eaves, and 30 feet wide. The front of the building faces the St. James's-park, and is at present perfectly open, with the exception of the framework necessary to carry the roof. It will be covered in with tarpaulin while the workmen are making the necessary preparations. The back of the building towards Piccadilly is boarded up, but a row of eighteen widows, twelve feet in length and containing seven lengths of glass, afford light to the interior when the front is closed up. A short 100 feet in advance of the building, and extending the whole length of the build ng, and ten feet in height, is erected, which will prevent the movements of the workmen being seen by the crowds of spectators. Beyond this screen, again, and distant about 200 yards, strong wooden rails have been put up, which extend in an elliptical form from the rails in Piccadilly at the east side of the park to its extreme western end, close by the Wellington statue. Within this vast inclosure no persons will be admitted except those actually employed. The rails of the railings on the north side of the park, extending along Piccadilly, have been closely boarded up, and the pavement will be occupied by a strong body of police, who will prevent persons crowding in that direction. Police will also be stationed around the water-basins. The site occupied by this building is close to the old reservoir, and, being upon the top of the rising ground, the spectators will be afforded an admirable view of the extraordinary and magnificent display of fire-works.

In Hyde-park the same active preparations are going on. The building erected there is of the same dimensions as the one in the Green park, and its front faces Grosvenor gate. It is four hundred yards from the Marble Arch on the north west side of the park. In front of the shed there is a screen as in the other park, ten feet in height, and an immense area of three hundred yards square will be railed off, and which will be kept clear of spectators. The whole of the iron hurdles on the side of the thoroughfares throughout the park are in course of removal, so as to afford greater facilities for the movements of the spectators, and to prevent the probability of any accidents arising from pressure against them. The display of pyrotechny in Hyde-park may be seen readily from the Edgware-road, and also thence embracing the whole of the interior as far round as the Albert-gate on the Knightsbridge side. The building in Hyde park is of the greatest strength, and the roof is covered with painted calico for protection against the weather.

A building of the same size and description was commenced on Monday in the Victoria-park, and is to be completed within a week. On the top of Primrose-hill a similar structure is to be erected, and stages to be provided for the discharge of an enormous number of rockets. By this arrangement the inhabitants of each part of the metropolis will be afforded an opportunity of witnessing in their own neighbourhood these extraordinary displays of pyrotechny, and will not be under the necessity of undergoing the fatigue of walking from one end of London to the other. It was intended to have had a fifth display at Battersea-park; but that idea has, we understand, been abandoned.

PHOTOGALVANOGRAPHY.—On Wednesday a paper was read to the Society of Arts "On Photogalvanography, or Engraving by Light and Electricity," by Herr Paul Pretsch, late manager of the Imperial Printing-office, Vienna. The author, after hearing testimony to the valuable labours of Dr. Berres, of Vienna, Messrs. W. B. Grove, F.R.S., Fizeau, Niepce, de St. Victor, Lerebours, Barreswil, Lemercier, Fox Talbot, F.R.S., Hulleur, and others, proceeded to describe his own processes by which he obtains on a glass or other plate covered with various substances mixed with photographic materials a raised or sunk design which may be copied by the electrotype process so as to produce plates for printing purposes. His process is based on the action of light on a film of glue mixed with bichromate of potash, nitrate of silver, and iodide of potassium. After exposure the plate is washed with water, a solution of borax, or carbonate of soda. The image then comes out in relief. When the image is thus sufficiently developed the plate is washed with spirits of wine, then covered with copal varnish, which is afterwards removed with spirits of turpentine, and then the plate is washed with a weak solution of tannin. It is then ready for copying by the electrotype process. A sunk design is produced by a slight warmth being used after washing with the spirit of wine. A number of specimens were exhibited of plates of three different stages, together with prints of them. After the reading of the paper a discussion took place, in which Mr. S. A. Malone Mr. Hanbart, Mr. Claudet, Mr. Thurston Thompson, and the chairman took part.

HOSPITAL FOR CONSUMPTION, BROMPTON.—The New Philharmonic Society intend giving a concert in aid of the funds of the above valuable institution. The bazaar on the grounds of the Toxophilite society in Regent's-park announced in behalf of the same benevolent object is to take place early in June. It is to be hoped that every success will attend the efforts of the committee, as they have recently enlarged the hospital to more than double its former extent, and they have consequently a far greater responsibility.

## *IMPERIAL PARLIAMENT.*

### HOUSE OF LORDS.—FRIDAY, APRIL 18.

TICKET-OF-LEAVE SYSTEM.—The Marquis of SALISBURY, in moving for some papers, called attention to the ticket-of-leave system, which he contended required immediate revision, having proved an almost total failure.—The Lord Chief Justice and Mr. Hill had referred to judicial authorities in support of his assumption that the experiment in question had not broken down to the extent alleged by its opponents. He offered no opposition to the production of the documents asked for respecting the tickets of leave, but submitted that the system should not be condemned without a more ample and deliberate trial.—Earl STANHOPE having commented upon the general question of secondary punishments, the subject was followed up with some prolonged remarks from Earl Granville, Lord Lyttelton, Earl Grey, the Earl of Derby, and Lord Harrowby. Ultimately Lord Stanhope gave notice that on some early day he should move the appointment of a Select Committee to investigate the subject.

### HOUSE OF COMMONS.—FRIDAY, APRIL 18.

INDIAN REVENUE.—On the motion for going into Committee of Supply Sir Stafford Northcote invited attention to the finances of the Indian empire, which, he observed, presented a constant and increasing deficit as compared with the expenses of that empire. Parliament was interested in the question, since the payment of three millions per annum to British proprietors of Indian Stocks depended upon the solvency of the Indian Government; and if the existing deficiency remained uncorrected much longer the revenue of the mother country would in various ways be drawn upon to meet the accruing liabilities. The hon. and learned member proceeded to trace the causes which had produced this inequality between the receipt and expenditure of our Indian empire, assigning the chief place among these sources of fiscal embarrassment to the voracious appetite for territory, and the enormous system of taxation which had characterised the administration of India for many generations of governors general.—Mr. V. SMITH deprecated the introduction of so extensive a topic upon an indirect motion, contending that a more appropriate opportunity could speedily have been afforded when the Indian Budget was brought forward for discussion. He denied the facts and questioned the conclusions set forth by Sir E. Perry, defending the policy which had led to vast additions of territory, especially those accomplished by the Marquis of Dalhousie, on whose able and energetic administration he passed a high eulogium. The newly-acquired provinces would, he believed, ultimately prove profitable; and, with regard to the existing deficit, declared that it had chiefly arisen from the large expenditure upon public works. This deficiency was also now rapidly diminishing, and in the accounts for the last financial year would be shown to amount to only £1,900,000 instead of £2,500,000, as had been asserted. Mr. OTWAY reiterated at much length the charges of ambition, ill faith, and improvidence which had been brought against the East India Company.—Mr J. W. HOGG analysed in detail the balance-sheet of revenue and expenditure received from India, contending that the financial position which they exhibited was perfectly sound, and that the existing deficit arose merely from temporary causes.—Mr. J. G. PHILLIMORE having denounced with much warmth the policy of annexation, the subject was allowed to drop.

The House then went into Committee of Supply, and the discussion of various votes belonging to the Civil Service Estimates chiefly occupied the remainder of the sitting.

### HOUSE OF LORDS.—MONDAY.

Captain HANDCOCK took the oaths and his seat as member for Athlone.

PETITIONS.

Mr. MASTERMAN presented petitions from several of the City companies against the Corporation of London Reform Bill.

The following petitions were also presented —

For the Abolition of the Maynooth Grant.—By Mr. Shirley, from Warwickshire; by Sir S. Scott, from Dumfriesshire.

Against the Total Abolition of Church Rates. By Mr. Shirley, from Warwickshire; by Lord H. Cholmondeley, from Droxford; by Sir G. Tyler, from Carmarthen and Glamorganshire.

Against the Corporation of London Reform Bill.—By Mr. Kendall, from the Carpenters' Company of the City of London; by Mr. Murrough, from the Tanners' Company of Cork.

Against Opening the British Museum, &c., on Sunday.—By Mr. Baxter, from Nairn; by Mr. Shirley, from Warwickshire

From Boards of Guardians, Parishes, and Tradesmen.—Against further grants for State Education; against religious grants in Ireland; for increased remuneration to Medical Officers in the Vaccination Bill, &c., &c.

ST. JAMES'S PARK.

Earl GRANVILLE, in reply to the Marquis of Clanricarde, said it was not the intention of Government to proceed this year with any other plan than that of the opening from Pall-mall into St. James's-park by the German Chapel.

CHURCH DISCIPLINE BILL.

The second reading of the Church Discipline Bill was moved by the Lord CHANCELLOR, who described the construction and authority of the tribunal which the measure proposed to establish for the adjudication of clerical controversies and the punishment of doctrinal errors.

The bill was opposed by the Archbishop of CANTERBURY, who moved as an amendment that the second reading should be deferred for six months.

In the ensuing discussion the measure was supported by the Bishop of DURHAM, the Earl of HARROWBY, the Bishop of Cashel, the Bishop of EXETER, the Earl of Derby, the Bishop of Bangor, and the Bishop of OXFORD, supported the amendment.

On a division there appeared for the second reading of the bill—Contents, 33: Non-contents, 41—8. The bill is consequently lost.

### HOUSE OF COMMONS.—MONDAY.

CELEBRATION OF PEACE. The preparations making in the parks and elsewhere to celebrate the conclusion of peace furnished topics for a lively conversation. Various queries were urged respecting the purpose, science, authority, and cost of these displays; and upon the motion that the House, on rising, should adjourn to Thursday next, the subject was revived and the date postponed in a more formal shape. Mr. Monsell, the Chancellor of the Exchequer, and Sir G. Grey interposed many explanations and vindicatory remarks; stating, among other facts, that the pyrotechnic exhibitions in question were ordered by the War Department, and would cost about £5,000, would be paid for out of the vote for war expenditure, and would be extended to the Victoria-park, so as to enable the dwellers in the eastern districts of London to participate in the show. In the discussion upon this topic some lively comments upon the reported terms of the Treaty of Peace were enunciated by Mr. I. Buncombe, Lord J. Manners, and other members; chiefly in replies from the Home Secretary and the Chancellor of the Exchequer. The question was at length allowed to drop.

THE DEFECTIVE MORTARS.—Mr. MALINS defended Messrs. Grissell and Co from the serious imputations of the War Minister and the Clerk of the Ordnance (Mr. Monsell) respecting the alleged defects in certain mortars furnished by that firm to the Government. Examining in detail the charges which the Master-General had been assuming guilty of a fraudulent concealment of the defects in the iron castings in question, he contended that the facts of the case did not substantiate any allegation of criminality from them. It was denied that the mortars were imperfect; but he should come to the conclusion that the imperfections were either immaterial or unavoidable.—Mr. MONSELL urged that the Messrs. Grissell were blamed, not so much for the defects of the mortars they had supplied as for the attempt to conceal and disguise them. This view of the case he supported by citing the report of various qualified officers who had especially inspected that arm in question.—Mr. G. DUNDAS expressed his conviction—arrived at, he said, after a full investigation—that the Messrs. Grissell were perfectly guiltless of the fraud laid to their charge. Further evidence in exculpation of the contractors were offered by Colonel Boldero, Mr. Lovell, Mr. Alderman Cubitt, Sir J. Pakington, and Mr. Tite.—The subject then dropped; and the motion for adjourning over until Thursday was agreed to.

The House afterwards went into Committee of Supply on the Civil Service and Miscellaneous Estimates.

BRITISH MUSEUM.—On the vote of £60,000 for the British Museum, which was moved by Lord J. Russell, a prolonged discussion arose. The previous claimants of Mr. Panizzi was especially censured by Mr. M. Milnes, who considered the selection of a foreigner for the chief administration of the Museum as an undeserved disparagement of British literary men. The appointment in question was defended by the SPEAKER, who declared that in selecting Mr. Panizzi as chief librarian the only object that had been kept in view was his personal fitness for that office. The only bar to native-born subject of England constituted, he submitted, no sufficient disqualification, and he pointed out as matter of fact that two previous librarians had been foreigners. Mr. GOULBURN, in vindicating the claims

## SALES OF AUTOGRAPH LETTERS.

There are certain fragments of the mutilated wisdom of our ancestors which retain their proverbial after they have lost their representative character, and are good as aphorisms when they are extinct as truths. Among these *dejecta membra* may be reckoned that comfortable fiction by which an Englishman is still made to persuade himself, in terms, that his house is his castle. This dogma, which had once a moral as well as a legal significance—won for us originally out of that natural sense of the home sanctities which is a part of our island temperament, and fostered in its turn a host of social inviolabilities that constitute its actual life—can scarcely be insisted on as a portion of our true prerogative in a day when the collector finds his way to our firesides by so many unexpected avenues:—taking stock of the furnitures of our private strongholds, and assessing the very feelings which at times are as our household gods. Among these collectors it is startling to find that there are some who make their levies not by virtue of any "warrant by the justices to them directed;" that we are occasionally paying moral income-tax quite unsuspiciously, and to parties having no competent authority to gather it. The fact is, we are giving up too much of our home defences. Our houses have a great deal too many doors for our moral security. We long to fall back on our domestic seigniories. The Englishman wants back his "castle;" and we must direct his attention to certain of the drawbridges that need lifting for its protection. Society amongst us is becoming morally Paxton-ised. We are all tending towards life in glass houses, where the world may look in at us through all the walls. The condition is unwholesome. There is too much light for moral health; and we must insist on returning to our invaded privacies —our *sancta sanctorum*, and our Jerusalem Chambers.

There are probably few of our readers who have not reflected painfully on the tendency which our literature has exhibited for many years past towards this invasion of the sanctities and immunities of private life. The manner in which men of letters have too often pandered to the morbid desire that exists to take the valet's place and undress the great man has been a dishonouring feature in the literature of our age; but the case is far worse when this tampering with the social privacies has been a traffic originating in motives far meaner than a diseased curiosity or the desire to feed it. The question, like most questions, is not without difficulties at its boundaries. It is not easy strictly to define the line between what may be considered public property, and what is strictly private, in the lives of public men, nor is it quite a matter of course to determine who are public men in the sense which allows some latitude of interpretation as regards the former question, on behalf of the public, for the sake of public policy. But, leaving such extreme cases to be severally dealt with after their own niceties, and as they arise,—and merely remarking that in some recent instances the questions involved have been handled very unsatisfactorily,—there are cases in which the wrong implied in compelled public presentation is of so concentrated a kind as to admit of no doubt and no palliation whatever. It is not very long, for instance, since we saw advertised a priced catalogue of autograph letters addressed by the poet Moore to his music-publisher, Mr. Power—letters which, for the most part, were little more than business negotiations, and of a confidential, and some portion of which we know from other sources must necessarily have been of a delicate and painful kind; and here, in the catalogue of a sale of autograph letters which is advertised to take place at Puttick and Simpson's on Monday next, we have before us a flagrant example of the growing evil to which we have alluded, that we are moved at length to call in the social policeman for its suppression.

The catalogue before us professes to embody the collection of the late Mr. Francis Moore during a residence of nearly fifty years in Paris; and embraces, in the first instance, a great variety of historical documents, many of them purporting to illustrate the relations of France and its people to England and the English. With this department of the collection—of which we may observe, in passing, that it contains some curious papers—we have, in our present object, nothing to do. It is followed by a section made up principally of autograph letters—the collection of the genuine collector, Mr. Moore himself—and which, also, because on the face of them they exhibit indications of being in some sense of a literary and documentary character, we will pass over, that we may come to the evil as it meets us in its intensity in a portion of the catalogue which may be called supplementary. Here we have a wholesale traffic-king in private and unpremeditated communications, that presents this disease in a form in which we venture to hope that its dangerous character will be at once perceived. The case has symptoms of uncommon virulency. The sections included in this supplement are stated to be contributed to the catalogue by another collector than Mr. Francis Moore; and scarcely a writer has been before the public, more or less conspicuously, during the last thirty years who has not unconsciously contributed to this forthcoming performance at Puttick's for the benefit of the collector. The wholesale nature of the collection gives it a very peculiar character. It sweeps into its mass such a variety of names, scarcely likely to have been sought—or to have been sought in their entirety, and found—by a mere collector, that it is difficult to look on this assemblage of letters as a collection in the ordinary and outside sense of the word. The idea is irresistibly suggested of a relation—and even a peculiar one—between the writers and the recipient himself; and thus of a violation of personal confidence, in addition to the other wrongs of publication. There is no evidence in the list itself that the letters have the slightest pretension to be considered documentary. For anything that appears, they are wanting in all the characters which could by possibility justify such a presumption of right on the part of the public to their inspection. They make out no case for their own lawful appearance in the catalogue;—nay, that there may be no mistake in the matter, *that* is occasionally put forward as a bait to purchasers which we insist on as exactly the reason why the appearance of the particular item there in list is an immorality and a wrong. One—we will not give either names or numbers, that we may not add to the scandal, or help the spoil—one item is punctated as being "a receipt;"—a very significant instrument as coming from a poor author, but not a literary document, and an historical one only in exceptional cases. Another letter appeals to unwholesome curiosity, as being "relative to some dispute" with the husband of a literary lady—named. In another letter offered to competitive Paul Pry, an eminent author returns thanks for a review of one of his works so named. In one letter the lover of scandal may buy another well-known author's apology "for some indiscretion committed after the previous night's jollification."

The writer of another letter out of which this collector hopes to make money "promises payment of some claim in next pay-day," and confesses to his correspondent (but probably had no intention of telling by auction) that he is "as poor as a rat." This is a very ingenious case. Here the poverty of the writer is to be money's worth to the receiver—a form of interest certainly not contemplated at the time when the letter was written. Another letter has a strong claim to the biddings of the quidnuncs; but for this Mr. Moore, or rather they who sell in his name, must be held responsible. It "sets forth his accumulated distresses"—"Je suis sans vêtement, sans linges, sans chaussures, sans changeans, sans draps, n'y couverture dans mon lit." The writer of this letter is a poor music publisher, whose rank does not make his sufferings history, like Milton's blindness, and so justify this painful exposure.

Now, what right has any man to make his harvest out of all these faded sorrows, and to feed on all these mouldy scraps? They who are familiar with our manufacturing towns learn sometimes, with surprise, by what strange and out-of-the-way industries money is made. Surely not one of the labourers there, is a more strange collector than the literary *chiffonier* who scrapes together these rags,—dirty, some of them, perhaps with the writer's tears, including such scraps as "Autograph Orders of Peers for Admission to the Gallery of the House of Lords," and "Envelopes directed by illustrious personages,"—to make the materials of a future bank-note for his own behoof. We have heard, it is true, of an improvement in the method of conducting even this industry, but which we think is suggested almost as a matter of course out of the industry itself. We have heard of Peers being *applied* to for orders, and men of letters so addressed as to ensure an answer, with an express view to the collection in question as a commercial speculation—a form of the begging letter imposture to which we have call this article, for the authorities engaged in its suppression. But what we are particularly struck with is the startled sentiment with which this catalogue is likely to be regarded by those of the contributors to its contents who have lived to find themselves thus put up for sale? What, some twenty years ago, perhaps, may they have written, in the trivial confidences of correspondence, which has thus unexpectedly risen into the dignity of document? Doubtless, many of them will feel with considerable alarm that, however eager may have been their aspirations after the immortality which they have since found or missed, they certainly were not consciously writing for immortality by the particular document which is to be sold next week in their name at Puttick's. How little did the writer of lot No. So-and-so suspect, when he sat down to indite some interchange of social compliment, it may be, or confession of poverty, or plea of sickness, that he was drawing an order for 5*s.*, payable to the bearer at a very long date! We can well understand that, for the future, many a man thus startled by the apparition of a forgotten letter in Puttick and Simpson's Dead-letter Office—sold now to defray the expenses of a long keening—will fear to accept a common dinner invitation in black and white, unless, as we have already hinted, the policeman, in the shape of public opinion, will interfere, and bid the auctioneer "move on," as each of these letters is put fruitlessly up to sale.

## *THE COURT.*

The Queen has appeared in two important characters within a week—first passing the night with her soldiers on Aldershott Heath, and secondly reviewing her magnificent fleet at Portsmouth. The interesting details in connection with these events are fully chronicled in another part of this journal. It will therefore suffice here to say that her Majesty returned to Buckingham Palace after the naval review on Thursday in perfect health, and with less appearance of fatigue than might have been anticipated from the exciting nature of the day's proceedings.

Among other movements it may be stated that her Majesty has honoured the Society of Painters in Water Colours with a visit at their gallery in Pall-mall.

On Tuesday the Queen held a Court, at which the Hon. and Rev. Montague Villiers had an audience, and did homage on being appointed Bishop of Carlisle. Her Majesty has several times enjoyed equestrian and driving exercise during the week, and almost daily dinner parties have been given.

The Prince Consort visited the military encampment at Colchester on Monday.

A further announcement of a Drawingroom and a Levee during the onth of June has been made from the Lord Chamberlain's Office.

The Court, it is understood, will leave Buckingham Palace on the 10th of May, to spend between two and three weeks in the Isle of Wight, after which her Majesty will return to Buckingham Palace for her birthday on the 29th, and also to be in town at the celebration of the proposed peace festivities.

The Court will remain at Buckingham Palace until the first week in June, when her Majesty will go to Windsor, to disperse her hospitality to the distinguished company who will receive invitations to the Castle during the Ascot race week.

The Marchioness of Ely has succeeded the Countess of Desart as the Lady in Waiting to the Queen. Lord Byron and General Sir Edward Bowater have relieved Lord De Tabley and the Hon. Mortimer Sackville West in their duties as the Lord and Groom in Waiting to her Majesty.

Her Royal Highness the Duchess of Kent went to Frogmore on Wednesday morning, attended by Lady Fanny Howard and Sir George Couper. Her Royal Highness returned to Clarence-house, St. James's, in the afternoon.

His Excellency the Prussian Minister and the Countess Bernstorff have returned to Carlton-house-terrace from Torquay.

His Excellency M. Tricoupi, the Greek Minister, has returned from Paris to his residence in Portland-place.

The Marchioness of Breadalbane will give a grand ball on the 29th of May, in celebration of her Majesty's birthday.

The Earl of Clarendon arrived at his residence in Grosvenor-crescent on Monday evening from Paris.

The Ladies Elizabeth and Augusta Hay, daughters of the Earl and Countess of Kinnoull, were married at St. George's, Hanover-square, on Thursday—the former to Sir Frederick Arthur, Bart., and the latter to the Hon. John Twistleton Fiennes, eldest son of the Lord Saye and Sele.

## *MUSIC.*

Her Majesty's Theatre.—The lessee of Her Majesty's Theatre has at length issued his prospectus of the season, which is to commence on the 10th May. Its contents have been in a great measure anticipated by the notice which we published last week; but one circumstance of great interest is added. Besides the three great Italian *prime donne* already mentioned—Piccolomini, Alboni and Albertini—Mr Lumley has succeeded in effecting an engagement with the celebrated Johanna Wagner, who will make her first appearance in the beginning of June as *Romeo*, in Bellini's opera "I Capuletti e Montecchi." That Mr Lumley should at length have succeeded in securing the services of that celebrated *prima donna* must be a matter of congratulation to all persons acquainted with the Wagner disputes and law proceedings of 1852. We heartily rejoice at this unlooked-for consummation. In addition to the *per formers* already mentioned, the names of Madame Amadei and Signor Belletti are now inscribed Both will be welcome. The company, in short, will be of extraordinary strength; and the curiosity of the public will be gratified by the appearance of several great stars, as yet known in this country only by reputation. Signor Bonetti, of the Italian Opera in Paris, is to be director of the music and conductor of the orchestra. For the ballet a number of dancers are mentioned, among whom the only ones known in England are Mdlle. Rosati, Mdlle. Marie Taglioni, and M. Paul Taglioni, who is to be the *maître de ballet*. With respect to the other dancers, Mdlles. Boschetti, Lissau, and Katrine, all we can say is that they enjoy a great reputation on the Continent, and cannot fail to attract crowded audiences. Mr. Lumley, in his introductory address, expresses a hope that his patrons and the public will graciously take into consideration the shortness of the time he has had at his disposal; and in most unequivocal language hints at still further engagements. This is rather too modest. After bringing together one of the most pow rful companies ever united on one stage, the lessee sues for grace. No grace, however, will be given him, but most cordial thanks for the spirited and generous manner with which, regardless alike of cost and difficulty, he has carried on the grand idea of the last few years—the re-establishment of the Italian Muse in its ancient temple. What the new engagements may be to which he refers it is impossible to divine; of this, however, the public may be sure, whatever they are they will be brilliant.

"Il Trovatore," with which the Royal Italian Opera began the season on Tuesday last week, was repeated on Thursday and Saturday. On Tuesday last there was a change of performance. The "Elisir d'Amore" was announced, with Madame Bosio, Gardoni, and Ronconi, in their old favourite parts. Bosio, however, was attacked by a sudden cold and hoarseness, which disabled her from singing, and the part of *Adina* was taken at the eleventh hour by Mdle. Marai. This deserving and useful young singer acquitted herself excellently well, and did not leave much room to regret Bosio's absence. She looked and acted the character of the little country coquette with captivating grace and sprightliness, and sang the music delightfully. With a pretty face and figure, intelligence, spirit, and feeling, Mdlle. Marai might hold a first place on the Comic Opera stage, were she possessed of greater strength and richness of voice. Its tones, though sweet and tunable, are thin, and incapable of those strong effects which are called for even in the lightest music. But she never fails to please, and often succeeds in charming the most fastidious audience. *Nemorino* is one of Gardoni's best parts; he is the best *bimbo* of the enamoured country lad, and the music suits him so well that one would imagine it written for him. Ronconi is a perfect specimen of the Italian *buffo*, which is something quite different from the English *buffoon*. His *Dr. Dulcamara* is marvellously clever; so sharp, so whimsical, so eccentric, that it never allows the attention to flag for a moment, and keeps the audience in a constant state of pleasant excitement. Lastly, Signor Tagliafico's portraiture of the gallant *Sergeant Belcore* is inferior only (and not much) to that of Tamburini. So performed, this lively opera was a great treat, heightened by the excellence of the orchestra, of the chorus, and the whole *mise en scène*.

This admirable performance was followed by a *divertissement*, in which several dancers, all with unknown names, made their appearance, and certainly acquitted themselves well. The music, too, was pretty, and there were some splendid scenic displays. But the piece was so immoderately long that few of the audience had patience to sit it out—a lesson, we think, to the management of the theatre.

Mr. Hullah's fourth and last Orchestral Concert was given at St. Martin's Hall on Saturday evening last. These concerts have been fully successful, and, we understand, are discontinued for the present; because, owing to the operas and other musical performances now going on, it is impossible for Mr. Hullah to keep his fine orchestra together. At this concert two flute players (Messrs. Doppler, of Pesth) played a concerto for two flutes, and delighted the audience by their admirable performance.

The Amateur Society had an admirable concert on Monday evening. Its most remarkable feature was a pianoforte concerto, composed and played by the young lady who, under the name of "Angelina," is creating so great a sensation in our musical world.

The Concert of the New Philharmonic Society on Wednesday evening was, on the whole, good and successful. There are always novelties at these concerts; and the novelty on this occasion was symphony by M. Gounod, a young Parisian composer, not unknown to the English public. This symphony excited considerable interest; it has much merit, but lacks the one thing needful—originality. Spohr's violin concerto in E minor was superbly executed by Sainton; and John Barnett, the youthful pianist, greatly pleased the audience by his performance of Beethoven's Concerto in G major. A new overture by Macfarren, entitled "Hamlet," was extremely well played, and received with deserved applause. The singers were Herr Rokitanski and Miss Sherrington.

M. Sigismund Wolowski, a distinguished pianist and composer, gave a morning concert on Monday last at the Beethoven Rooms in Queen Anne-street. He showed himself, by various performances, to be an artist of very remarkable talent. He was assisted by Miss Ransford, Mr. Hansford, Mr. Henry Blagrove, and other eminent performers; and his concert was very satisfactory to a large and fashionable audience.

## *THE THEATRES.*

### PRINCESS.

Mr. Charles Kean has anticipated the production of his great Shakespearean revival of the season, "A Winter's Tale," by the publication of the play as he purposes to produce it, together with a variety of interesting historical and critical notes and authorities for costume. By this plan the public will be enabled to form a distinct notion of the beautiful and imaginative drama, upon which Mr. Kean has bestowed so much labour, taste, research, and expenditure. The preface explains his object, and the illustrative notes mark his anxiety to carry out that object with historical and classical accuracy. It is evident that the play admits of many pictorial effects to heighten the power of the acting, such as have never yet been attempted, and we feel confident that success will reward the labour and zeal of Mr. Kean. The present stage version of "A Winter's Tale" forms a companion to the Princess' version of "Henry VIII.," published last year. It is all become valuable in future years—a lasting proof of the noble manner in which one of the noblest of Shakspeare's imaginative plays was produced upon the stage by one of Shakspeare's most zealous disciples.

The "Winter's Tale" will be produced on Monday next, being the benefit night of Mr. and Mrs. Charles Kean. Syracuse and Bithynia are the places to which they attributed the pictorial and architectural glories with which the audience of the Princess's is to be startled on Monday evening. The pastoral scenes also will receive careful attention; and the celebrated Dionysia will be introduced as part of the festival in which *Perdita* takes so distinguished a part. The scenic illustrations will, in fact, be presented on a scale of unparalelled magnificence, "inviting," to use Mr. Kean's own words, "the accessories of painting, music, and architecture, in conjunction with the rapid movements and multiplied life which belong to the stage." He trusts also that "the combination may be considered less an exhibition of pageantry appealing to the eye, than an illustration of history addressed to the understanding."

Haymarket.—The farce of "Grimshaw, Bagshaw, and Bradshaw" has been transferred to the boards of this theatre, with Mrs Talbot, late of the Lyceum, whose appearance is fitted for the various class of characters that sometimes lends fashionable dignity to pieces slight in structure and depending more on manners than incident. The lady was well received; and the farce itself, aided by the drolleries of Mr. Buckstone, is likely to prove attractive.

Sadler's Wells.—A new actor of remarkable promise made his first appearance on Monday. The piece selected for his début was "Belphegor; or, the Mountebank," the hero of which was performed by Mr. Charles Dillon with more than ordinary success. Those who recollect M. Lemaître as Mr. Webb in the character will appreciate its pathos and variety, and understand the talent required and implied in its assumption. Mr. Dillon will not suffer by comparison with either, and has special merits of his own which entitle him to critical recognition. He is in his style of execution by much the most natural actor that has yet claimed our attention; and, both in voice and gesture, constantly contrives to be expressive without the slightest exaggeration. The former is clear, distinct, flexible, and of sufficient compass, wanting no sustainment from artificial elocution, and speaking without effort from one tone to another, being particularly rich in the lower tones. There is nothing hard, forced, or mechanical in his style; but all is free, flowing, and easy, whether in the more passionate or more familiar passages. In the domestic scenes of the first act Mr. Dillon presented a portrait of *Belphegor* that made the audience at once respect and compassionate the man. As the shadow of evil darkened on his humble prospects, and the feelings of the husband and father broke forth in their joy and their sorrow, the sympathies of the house were strongly excited, while tears attested the triumph of the actor and the pathos of the scene. The curtain fell, and Mr. Dillon was recalled to receive the plaudits of an enraptured audience. The same honour was bestowed on him at the end of the next act; and when the performance concluded the demonstrations in favour of the new candidate for public approbation was placed beyond dispute. Mr. Dillon, we believe, has had much provincial practice, and has not ventured on the London stage without having sufficiently tested his powers and cultivated them to maturity and brilliance. He is manifestly an accomplished artist, armed at all points, and must speedily attain a high and lasting reputation. He was well assisted by his wife, who supported the heroine with much grace and feeling. Mr. Rogers also, in the part of *Fra Francesco*, was a screen by no means to be overlooked. The drama was very respectably acted. The production of an actor so meritorious as an artist is much to the credit of the provisional management that now rules the destinies of this theatre.

## EXHIBITION OF THE NEW SOCIETY OF PAINTERS IN WATER COLOURS.

We are inclined to look upon this, the twenty-second Exhibition of the New Society of Painters in Water Colours, as one of the best the Society has yet had. We have seen, it is true, other exhibitions in the same gallery in which the landscapes were of a higher class, but we cannot call to mind any exhibition in which the inventive powers of the contributors were seen to more advantage.

The strength of the Exhibition is contributed and maintained by three persons: Mr. Bagbe, Mr. Corbould, and Mr. Warren. That strange, but clever medley by Mr. Corbould, "The Lyrnesus, bye Dreame," is full of ingenious invention. Seldom have we seen a better hash of good things. What a marine store shop of thought is that picture! What a museum it is of odd fancies such as dreams are made of! Very admirable is it, too, in point of colour. Not less excellent, though in a different line, is (No. 27) "Griselda," by the same artist—and very characteristic is No. 232, from the old song "Nobodie saxd you, sir, she saide," though the man—Mr. Corbould—is a little too clownish.

Mr. Warren delights us as usual in finding his subjects in the Book of Genesis. He works with true pictorial liking among camels, camel-drivers, yellow sands, and burning effects of mid day sun. His "Rebekah first sees Isaac" is a useful and novel treatment of a well-painted subject. His "Hagar," however (No. 91), is more striking, and will find a purchaser at the price asked—fifty guineas.

Mr Bagbe's three pictures are hung together. Two are interiors, with figures of the old type and excellence; the third is an exterior, a view of Venice. Venice is treated in a manner that convinces but Mr. Bagbe could execute with equal effect. The contrast of colours is marvellously pleasing; the result, a picture of extraordinary excellence.

Mr. Wehnert is not up (we are sorry to say) to his old mark; and Miss Setchell is, alas! still an absentee. Mr. Edmund Warren has made two years' progress in one year; and Mr. Whymper has made a stride from comparative obscurity into a well-earned reputation. The "Nutting" of Mr Edmund Warren (No. 26) is a delightful drawing. Mrs. Margetts excels, as of old, in fruit and flowers. Her "Lilac and Hedge-sparrow's Nest" (No. 295) is perfect in its way.

We shall soon have something more to say about the Exhibition.

## THE FORT AT THORN ISLAND, AT THE ENTRANCE TO MILFORD HAVEN.

THORN ISLAND, or Thorney, is a barren precipitous rock, lying on the southern side of the entrance into Milford Haven, about 200 yards from the main land at Thorn Point, and three or four miles from the light-house at St. Ann's Head, the extreme point of the main land on the northern side. Upon this island rock there has been erected, in the course of the last three years, the fortification of which we now furnish an Illustration. Before that period it had remained desolate and useless, save, perchance, in so far as its narrow dimensions might serve as a break-water to the harbour against the heavy sea which, in stormy weather, forms around it so angrily. The fort is of no specific form, but seems to have been adapted by the architect to the shape of the rock upon which it is built, and, being strongly made of limestone, has a solid, compact appearance, and seems well suited for the purpose designed. The garrison of Thorn is and consists at present of a lieutenant, three non-commissioned officers, and twenty four men of the Pembrokeshire Artillery Militia; and the place is defended by nine guns, all sixty-eight pounders, and is pierced for musketry. Another fort has been also erected, a couple of miles off, upon a similar barren island rock, called "The Stack," which occupies a position more in the interior of the Haven. Stack Rock, not so large as Thorn Island, is now garrisoned by a sergeant's party of fifteen of the Pembrokeshire Militia, and is defended by five guns. Provisions, &c., are brought for these little garrisons thrice a week from Pembroke Dock. A third fort is in course of erection at Dale Point, on the northern side of the entrance to Milford Haven; and it is to be hoped, now that the attention of the authorities has been directed to the protection of this hitherto almost defenceless coast, and the important Royal building-arsenal at Pembroke, that a complete and thoroughly scientific series of fortifications will soon be raised, strong enough to defy and resist any attack that may be made upon them.

MR. FRANCIS PETTIT SMITH,

[FIRST PRACTICAL INTRODUCER OF THE SCREW-PROPELLER.—FROM A PHOTOGRAPH BY LAWRENCE.—(SEE MEMOIR, PAGE 44.)

THORN FORT, MILFORD HAVEN.

## OPENING OF THE SOUTH WALES RAILWAY TO MILFORD HAVEN.

WHEN, in 1853, the projectors of the railway to Milford Haven went to Manchester, to lay before its commercial potentates a few facts relating to the advantages which Milford possesses, in the hope that they might be induced to embark some capital to aid in the formation of certain necessary docks there, they were met by two or three gentlemen, who, in somewhat similar language to that which Shakspeare puts into the mouth of *Cymbeline*—"How far is't to this blessed Milford?"—desired to be shown where Milford is situated on the map. It may, therefore, be perhaps necessary for us to observe, although we can scarcely believe in the possibility of any one being ignorant of the locality of the "far-famed Milford," that it lies almost due west of London, and is in the county of Pembroke. This remote harbour, 282 miles from the metropolis, has, within the last few days, been connected therewith by railway; by means of which it may be reached in nine hours. In the belief that it will speedily become a most important commercial port now that it enjoys speedy inland communication, we present our readers this week with an illustration showing the situation of the Railway Terminus at Neyland, and the appearance it presented at the time of the arrival of the first train on Tuesday, the 15th inst. Neyland is a small village on the north-eastern shore of Milford Haven, where it is considerably narrower than a few miles nearer the sea. The terminus almost faces the Royal Pembroke Dockyard, from which it is distant about a mile and a half. It is four miles from the little town of Milford, and nine from Haverfordwest. Pembroke Dock is at present garrisoned chiefly by the Montgomery, North Gloucester, and Monmouthshire Militia; and our Engraving shows the position of their huts upon the Pembroke side of the Haven. It was at first intended that the leviathan steam-ship now building at Mare and Co.'s, Blackwall, should sail from Neyland; but, partly from a want of proper docks and wharfage at Neyland, and partly from other reasons, it appears probable that Liverpool will be the port from which she will first sail. Money and enterprise are both required before Milford will be furnished with the appliances for carrying on much business. Great, indeed, will be the importance of the South Wales Railway extension to Milford, should the expectation of its shareholders and directors prove well founded; for it is anticipated that it will elevate Milford from being simply a harbour of refuge to the position of an extensive dépôt for maritime commerce. Until now its trade has languished on account of its distance from the manufacturing districts and want of means of transit for merchandise, although its position is more favourable than that of any western port. It may be entered by the largest vessel at almost any period of the tide, and is believed to be capable of affording secure anchorage for the fleets of the entire world. It is said that, compared with Liverpool, a vessel would save in Channel navigation, by making Milford, 180 miles; compared with Bristol, 116 miles; with Southampton, 176 miles; and that it also possesses a considerable advantage as a port over Falmouth and Plymouth. Thousands of vessels annually seek refuge in Milford Haven from the heavy gales encountered in St. George's Channel; and it is so easy and safe of approach that very few casualties have ensued even in instances when it has been entered without a pilot. Nelson pronounced it to be the finest haven in the world, and took especial interest in its advancement.

OPENING OF THE SOUTH WALES EXTENSION RAILWAY, TO MILFORD HAVEN.

THE BAND OF THE ROYAL HORSE-GUARDS, BLUE, PLAYING IN KENSINGTON-GARDENS.—(SEE NEXT PAGE.)

## THE MILITARY BAND IN KENSINGTON GARDENS.

On Sunday last the band of the Blues again played in Kensington Gardens, where the fineness of the weather attracted an enormous crowd. The total number of persons who entered the Gardens during the day was about 80,000. The pieces played were, without exception, of a sacred character; in deference to the general disapproval created by the first Sunday's performance, the very opposite extreme being adopted. Instead of a programme composed of vulgar dance tunes, the band adopted one exclusively devoted to sacred music of the gravest character.

The fault of last Sunday's performance was its extreme monotony. All the compositions were very good, but they were too much of a color. In the selection from the "Stabat Mater," for instance, three long pieces immediately succeeded each other in minor keys—the "Pro peccatis," the "Inflammatus," and the fugued finale. Now, it is more than probable that the difference between major and minor keys, and the precise nature of a fugue, were as far from the comprehension of 99 out of 100 present as the peculiar philosophy of the Rosicrucians; nevertheless, although in scientific discrimination they were as *nowhere* to the multitude, the effect of so great a prevalence of sombre music was *felt*, and the general impression derived from the performances was one of heaviness, if not of actual *bore*. More than one artisan was heard to recognise the choruses of Handel and Haydn; but three long pieces in the minor keys, from Rossini's "Stabat," were evidently oppressive, even to these intelligent persons. Why not contrive an agreeable *mélange*? By no means resort to polkas, galops, and waltzes; but let the pieces from oratorios and masses be discreetly varied with secular music, such as the overtures of Weber, Rossini, Auber, &c; slow movements, or *scherzi*, from the symphonies of Mozart, Beethoven, and Mendelssohn; reminiscences from the operas of Meyerbeer and others which, although what is conventionally termed *profane* music, never, we are convinced, engendered anything worse than harmless delight in the minds of listeners. None would object to passages from the poets being read or pictures of the great painters contemplated on a Sunday; there can therefore be no reason why beautiful music which is just as edifying and just as innocuous—should not be heard with impunity

Let the will, however, be taken for the deed. The intention on Sunday last was good; and the whole proceedings, balancing merits and defects, were entitled to respect. The crowd, though much greater, was quite as well behaved as on the first day, and everything passed off with such unmistakable gratification to all concerned, that there is reason to hope the question, whether the mass of people in this immense metropolis is better employed on Sunday in healthful rest or out of doors than in gloomy and silent seclusion, may be looked upon as at an end.

The following is the official return of the number of persons who entered the Gardens on Sunday last:

| | | |
|---|---|---|
| 1. | Gate near the Palace, south side | 1,292 |
| 2. | Gate near the Palace-gate | 3,505 |
| 3. | Gate near the Horse-barracks | 3,033 |
| 4. | Mount-gate | 1,561 |
| 5. | Ditto, S.E. corner of Gardens, south gate | 2,021 |
| 6. | Ditto, ditto, north gate | 6,222 |
| 7. | Gate on bridge, south end | 1,853 |
| 8. | Archway gate under bridge, south end | 1,430 |
| 9. | New gate on north end of bridge | 13,745 |
| 10. | Gate on north end of bridge | 11,763 |
| 11. | Archway gate under bridge, north end | 1,548 |
| 12. | Bird-cage-hill gate | 17,494 |
| 13. | New gates, Uxbridge-road | 2,973 |
| 14. | Bayswater-gate | 9,443 |
| | Total number of persons entering the Gardens during the day | 79,241 |

Before quitting the subject of the music in Kensington Gardens, we must protest against the unsatisfactoriness of the proceedings. Why should there be only *one* regimental band, when it would be easy to combine two or three?—why should the performers be ill-accommodated? —and why, since it might be effected so easily, and at a mere nominal outlay, is not the platform so constructed as to render the band both visible and audible to the majority? At present it can neither be heard nor seen with anything like distinctness, unless by those who do not care about personal discomfort in the search after pleasure. Since the authorities have decided on granting this concession to popular opinion why not do it in the best possible manner?

We understand that there will henceforth be a musical performance on Sunday afternoons in the Regent's-park, and shortly afterwards in Victoria-park, for the benefit of the inhabitants of the east end of the town. It is also contemplated that, on the return of the Crimean army, similar performances shall take place in the vicinity of the head-quarters of each regiment throughout the country.

At Crystal Palace Gardens, Mr. Simpson followed the Government example, on Sunday, by placing before the public music during the afternoon promenade. The band was selected especially for the occasion, and the pieces chosen were principally from our finest sacred composers. The most marked attention was paid by the visitors, and the most perfect decorum maintained

## *NATIONAL SPORTS.*

The great Newmarket meeting of the year will occupy five days of next week, and, seeing the doubt which the defeats of Cannobie and Ellington and the downfall of Fly by-Night have shed upon speculation, the Two Thousand Guineas, on Tuesday, will be especially interesting. If the late Maldon crack does not go, we conclude that the field will be composed from Peter Wilkins, Pitsford, Bird-in-Hand, Enchanter, Yellow Jack, Polmoodie, Porto Rico, &c. The opinion which the Richmond men have of Bird-in-Hand is patent from the fact that one of the trainers has laid £1000 (some say £10,000) to £20 against him, and will not hedge a penny. We are told, on the other hand, that his owner says that he is in form; but reports of his lameness have been rife, and we expect Porto Rico and Enchanter to be about first and second Yellow Jack we have no belief in. Verdant Green will not improbably come out for the Rowley Mile Stakes on Wednesday; and there are two Lincolnshire lots to be set-to Mr. Greville and the Duke of Bedford, on Wednesday, when Fandango and Riflemen, each with 6lb. extra, are in a three-mile race. Manganese, Mary Copp, Theodora, and Mincepie, are the heroines of the One Thousand Guineas; and it is hinted that the latter will find the distance more to her taste than the Oaks, though Manganese will be difficult to shake off. Wentworth is engaged on Friday in a D M. race with Peter Flat and Wet Langton, and if he cannot win it his private trials will have been a mere will o' the wisp

Lord Zetland had no small luck on the latter days of the Newmarket Craven with Fandango and Tyrus; but the meeting was wholly damped by the award in the Cannobie case, which Lord Glasgow, it is averred, refused to sign. Time saves Messrs. Pedley and Howard a good harvest of success when they appeal to Westminster-hall to overthrow the decision of Lord Anglesey and Admiral Rous. Cannobie is a large staring sort of horse, and was beat for speed by Sarabund, who gave him only 1lb. for his year. Rumour has it that Lord Glasgow has refused 1000 guineas for him, the same sum which he refused for the Riever, and 500 guineas less than he got for Hobbie Noble. There seems some truth in the report that a very enormous sum has been offered for Yellow Jack and Cornet by a gentleman who is believed to have jumped into a £150,000 legacy, but the uncertainty about the matter tends to depress them in the market. Wentworth is still very firm; and the equally dark Fazzaletto, who was highly tried on Monday, has come into good favour for the Two Thousand Guineas, now that Fly-by-Night seems hopelessly gone. The Great Northern Handicap at York fell to the lot of "One Act," a three-year old filly, who never won a race at two years old. Fandango essayed to give her 42 lb for his year; but, thorough racehorse as he is, the attempt was beyond his powers, and he was cleverly beaten by half a length. Lord Zetland is singularly unlucky at York, as this is the seventh second his horses have run there for really good stakes within the last two years. The race for the Zetland Stakes was, perhaps, with the exception that the riders were all young jocks, the most rank that has ever been seen. If the judge had made it a dead heat of five, the crowd would not have been a bit the wiser; but as it was, Magnifier, a really magnificent Derby and St. Leger colt, finished level with the 410 guinea Nougat le Ble, the attempt was beyond his powers, and he was cleverly beaten by half a length. Lord Zetland is singularly unlucky at York, as this is the seventh second his horses have run there for really good stakes within the last two years. The race for the Zetland Stakes was, perhaps, with the exception that the riders were all young jocks, the most rank that has ever been seen. If the judge had made it a dead heat of five, the crowd would not have been a bit the wiser; but as it was, Magnifier, a really magnificent Derby and St. Leger colt, finished level with the 410 guinea Nougat le Ble, Bank Bonny, Meadow Sluggard, and Saunterer, came at "short-head" spaces in the order we have named. The stakes were divided, and Nougat won the Spring Biennial on the Wednesday. In this race Skirmisher again disappointed Lord Zetland. Hospodar, who is said to have broken down, must leave under the hammer, but the Catterick blame has been laid on to Job Marson, who has not had a mount for his Lordship since Ellington, who looked "big," was beaten a head by Fisherman, but he gave him 6lb., and had to make his own running, which was uncommonly slow till the last three quarters of a mile, and he must not be despised for the Derby

Lord Londesborough has taken stables at Hambleton, and his Lordship's string will be trained there, privately, in future, along with Lord Conyngham's. They will, we hear, leave John Scott's directly, but the name of the new trainer has not transpired

The hunting for the season has come to an end at last, though it was said of the Beaufort Hunt last year that they killed foxes, with the exception of June, all the year round, and even then had plenty left. Steeplechasing will last a little longer, and six come off at Westmeath on Monday and Tuesday; three at the Limerick Hunt on Tuesday; and five at Skerries; and two or three at North Tyne (Wark) on Thursday. Sales are beginning to be thick on the ground. Eighteen of Lord Orford's horses come to Tattersall's on Saturday, on which occasion Mr. Sadler's eight of Capt. Lane's. On May 5th the 6000 Guinea Oulston, and seventeen more, will be put up at Tattersall's; the Dudding-hill yearlings' sale is fixed for the 12th; and that of the Pyecroft Lodge stud, half a hundred strong, for the 22nd

The Oxford boat-races commence on Monday; and on Thursday M'Neil and Brown row a sculler's race on the Clyde, the former staking £60 to the latter's £50; while Saturday is appointed for the opening trip of the Royal London Yacht Club—a place to assemble at Greenwich. Racing yachts are beginning to bestir themselves for the summer. Messrs. Fores are shortly about to bring out their quartet of racing pictures after Herring, sen., and the very best that great "master of the horse" ever painted; and THE ILLUSTRATED LONDON NEWS are dividing the honors with The Field, with all its anecdotes of George IV., Lord Darlington, Mr. Kirby, Sam Chifney, &c., on May-morning.

### YORK SPRING MEETING.—TUESDAY

Selling Stakes—Wellington, 1. Brighy, 2.
Great Northern Handicap—One Act, 1. Fandango, 2.

Malton Handicap.—Maid of Derwent, 1. Assayer, 2
Two-year-old Stakes.—Peto, 1. Marmion, 2

THE RUGELEY CASE.—At the Court of Queen's Bench, on Thursday, the rule for the removal of the indictment and depositions against William Palmer from Stafford to the Central criminal Court was made absolute. The trial will take place at the Old Bailey, on the 14th of May, before the learned judges Lord Campbell, Mr. Baron Alderson, and Mr. Justice Cresswell.

THE PITCAIRN ISLANDERS.—At the meeting of the Royal Geographical Society, on Monday, the President, Rear-Admiral P. W. Brenchey, announced the removal of the Pitcairn Islanders to Norfolk Island; and, in answer to enquiries from the chair, the Bishop of Oxford dwelt on the benefits likely to ensue from the removal of these highly moral people to Norfolk Island, particularly to the inhabitants of the neighbouring islands, the more especially if countenanced and helped by the British Government. Sir Thomas Fremantle stated that he had received information from his brother, Captain Fremantle, to the effect that he had proceeded to the Pitcairn Islands to propose that the islanders should remove to Norfolk Island; and that, having assembled the inhabitants, 180 in number, and read the proposals to them, they, after much deliberation, resolved to accept with thanks the offer of the British Government, being convinced that their own island was not large enough for them and their descendants. They, however, that, as they had lived happily with out the access of strangers, they might have the exclusive possession of Norfolk Island.

The new *Catholic Colonial Journal* has been confiscated for inserting the translation of an article of the *Siècle*, relative to M. de Fallour, the Duc de Brigle, and the aristocracy. The *Cross* journal, by way compensation, has been seized at Vienna for an article upon the Concordat.

## MONETARY TRANSACTIONS OF THE WEEK.

*(From our City Correspondent.)*

NOTWITHSTANDING that a very limited business has been transacted in all national securities this week, both for Money and Time, the fluctuations in prices have been trifling. The settlement, however, that up to Wednesday evening, the quotations were rather drooping. The last payment upon the English loan was made on Thursday without difficulty; and we may further state that the supply of money for discount purposes has scarcely increased, but without leading to any change in the rates of discount, either at the Bank of England or in Lombard-street.

The imports of bullion have been very limited—viz, about £70,000 from America, and £20,000—the latter silver—from Belgium. We understand that another parcel of gold has been forwarded to Constantinople; but the demand for the Bank of France appears to have entirely ceased.

The following return shows the extent of the note circulation in the United Kingdom during the four weeks ending the 16th of March:—

| | | | | | | |
|---|---|---|---|---|---|---|
| Bank of England | .. | .. | .. | .. | .. | 18,647,494 |
| Private banks | .. | .. | .. | .. | .. | 3,609,241 |
| Joint-stock banks | .. | .. | .. | .. | .. | 2,995,587 |
| Scotland | .. | .. | .. | .. | .. | 3,5.0,813 |
| Ireland | .. | .. | .. | .. | .. | 6,501,5.3 |
| Total | .. | .. | .. | .. | .. | 35,741,903 |

Compared with March, 1855, the above return shows a decrease in the circulation of £532,102

From a return just issued it appears that the total imports of bullion into England in the first quarter of the present year amounted to £4,194,100—£1,631,000 being from Australia, £568,100 from the United States, and £1,884,800 from Mexico, the West Indies, &c. Compared with the corresponding quarter in 1855, the decrease in the arrivals is £2,089,900

The transactions in the English funds on Monday were wholly confined to small parcels of Stock, as follows:—Bank Stock, 212; Three per Cents Reduced, 92½ to 91½; Three per Cent Consols, 92½ ⅝; Consols for Account, 93½ ⅝; New Three per Cents, 92½ to 93; Long Annuities, 1860, 3⅛; Ditto, 1859, ⅞; Ditto, 1885, 17 1-16; India Stock, 230 to 228; Exchequer Bills, March, 1s. prem.; June, 2s discount; Exchequer Bonds, 98¾. On Tuesday the market was very flat, yet very little change took place in prices. Bank Stock, 211½ to 213; Three per Cents Reduced, 92 to 91½; Three per Cents, 92⅝ to 92⅜; Consols for Account, 93½ ⅜; New Three per Cents, 92½ ⅝; Annuities, 1860, 3 3-16; Ditto, 1885, 17⅛; Exchequer Bills (March), 3s prem. to par; June, 3s. dis to par. There was rather more doing in Consols, on Thursday, and prices had an upward tendency:—The Three per Cents for Transfer were 93 to 93¼; and for the account, 93½ ⅝. The New Three per Cents marked 93¼ to 93⅜; and Reduced 91½ to 92. The March Exchequer Bills were 1s. to 3s. prem.; and the June Ditto, 3s dis. to par. Many of the discount houses took large sums of money on "call," at 5½ per cent.

Most Foreign Bonds have been dull as regards price, but the dealings in them have been limited compared with some previous weeks:—Brazilian Five per Cents have realised 103 to 100; Ditto, Four-and-a-Half per Cents, 94½; Chilian Six per Cents, 104; Ditto, Three per Cents, 69; Mexican Three per Cents, 23½; Peruvian Four-and-a-Half per Cents, 77½; Ditto, Three per Cents, 54; Russian Five per Cents, 106; Ditto, Four-and-a-Half per Cents, 95½; Spanish Five per Cents, 26½; Spanish Three per Cents, 45½ ⅛; Ditto, New Deferred, 24½; Turkish Six per Cents, 98½ ex div; Ditto, Four per Cents, 102; Dutch Two-and-a-Half per Cents, 64½; Dutch Four per Cents, 93½ ex div.; Buenos Ayres Six per Cents 60½; Ecuador, Not Consolidated, 16½; Granada Deferred, 7⅞.

Joint-Stock Bank Shares have been rather heavy, as follows:—Bank of Egypt, 6⅝; Bank of London, 64; City, 64; London and County, 34½; Oriental, 49½; Ottoman Bank, 6⅞; Union of London, 27⅛; Western Bank of London, 20½

There has been a moderate demand for Mis ellaneous Securities, and the quotations have been fully supported:—Canada Company's 6 ds realised 141; Ditto, Government Six per Cents, 103; Crystal Palace, 8⅛; Electric Telegraph, 97⅛; Netherlands Land, 1½; North of Europe Steam, 13⅜; Peninsular and Oriental Steam, 66½; South Australian Land, 3⅜; Ste. Marie Du Rk, 83; Victoria Docks, 19; Berlin Waterworks have marked 7; East London, 1⅝; Kent, 3⅜; Southwark and Vauxhall, 89½; Hungerford-Bridge Shares, 8; Waterloo, New £7, 2s; Yorkshire, 20½.

The market for Railway Shares has been without animation, and, in some instances, prices have ruled lower. The following are the official closing prices on Thursday:—

ORDINARY SHARES AND STOCKS.—Aberdeen, 26½; Chester and Holyhead, 16½; East Anglian 16⅞; Eastern Counties, 10⅛; Eastern Union, B Stock, 24¾; East Lancashire, 77; Edinburgh and Glasgow, 64; Edinburgh, Perth, and Dundee, 78; Great Northern, 94⅜; Ditto, B Stock, 125; Great Western, 62; Lancashire and Yorkshire, 89½; London and Blackwall, 7½; London and North-Western, 100½; Ditto, Fifths, 4⅜; London, Brighton, & South-Coast, 94½; Manchester, Sheffield, and Lincolnshire, 28½; Midland, 74½; Norfolk, 56; North-Eastern—Berwick, 78; Ditto, Leeds, 108; Ditto, York, 96; North Staffordshire, 11⅜; Shropshire, Union, 46½; South Eastern, 72⅜ Waterford and Limerick, 22; West End of London and Crystal Palace, 6½.

LINES LEASED AT FIXED RENTALS.—Buckinghamshire, 90½; London and Greenwich, 12⅜; Northern and Eastern, 87; Shrewsbury and Hereford, 7½

PREFERENCE SHARES.—Aberdeen, Six per Cent, 118; Caledonian, Four-and-a-Half per Cent, 97½; East Anglian, Seven per Cent, 100; Eastern Counties, New Six per Cent, 12½; Great Northern, Five per Cent, 108; Great Western, Four-and-a-Half per Cent, 97; Midland Consolidated, Bristol and Birmingham, 136½; North-Eastern—York, H. and S. Purchase, 9

FOREIGN.—Antwerp and Rotterdam, 5⅜; Bombay and Central India, 8½; Dutch Rhenish, 12½; Eastern of France, 21⅜; East Indian Extension, 28½; Great Central of France, 22½; Great Indian Peninsula, New, 4½; Great Luxembourg Shares, 7; Ditto, Obligations, 3⅝; Great Western of Canada, 26½, ex div.; Ditto, New, 9, ex div; Lyons and Geneva, 22; Paris and Lyons, 36⅞; Sambre and Meuse, 15½; Scinde, 7⅞; West Flanders, 4¾

Mining Shares were firm on Thursday:—Brazilian Imperial were done at 3⅜; Ditto, St. John del Rey, 25⅜; Cobre Copper, 65; Copiapo, 16; Mariq nta, 2; Santiago de Cuba, 3½; South Australian, ⅛; United Mexican, 4.

*Friday Afternoon.*

We have a very inactive market for Consols to-day, and prices are a shade lower than yesterday. The Three per Cents for Money are 92⅝ 93, and for the Account 92⅝ ⅞. The New Three per Cents have marked 93¼ ⅜ and the Reduced, 91⅝. In Foreign Bonds and Railway Shares very little is doing.

## *THE MARKETS.*

CORN EXCHANGE (Friday).—The arrivals of home-grown wheat fresh up to-day were very moderate, and the show of samples was small. The attendance of both town and country buyers was by no means numerous, and the demand for all kinds of wheat of no description ruled inactive at Monday's currency. The imports of foreign wheat was fair, but not to excite. All kinds moved off slowly, on former terms. We had a good demand for barley and malt, at full prices. There was a slight improvement in the oat trade. In pease and beans, we change took place. Beans, peas, and flour were a fair inquiry, at Monday's currency.

*Arrivals this Week.*—English: wheat 2430, barley, 990; malt 2670, oats, 250, flour, 1410. Irish: oats, 770. Foreign: wheat 6320; flour 260; oats 3070, flour, 4100 barrels, 240 sacks.

*English.*—Wheat, Essex and Kent red, 52s to 57s.; ditto white, 59s. to 73s.; Norfolk and Suffolk, red, 51s. to 55s.; rye, 47s. to 48s.; grinding barley 33s to 35s.; distillers ditto, 36s. to 40s.; malting ditto, 48s. to 54s.; Chevalier and Norfolk malt, 77s. to 78s.; brown ditto, 65s. to 68s.; Kingston and Ware, 72s. to 75s. Chevalier, 67s. to 81s.; Yorkshire and Lincolnshire feed oats, 21s. to 22s.; potato ditto, 24s. to 26s.; Youghal and Cork, 19s. to 20s.; Sligo, 18s. to 19s.; thick beans, 34s. to 36s.; grey peas, 34s. to 36s.; maple, 34s. to 36s.; white, 36s to 40s.; boilers, 40s to 42s per quarter. Town-made flour, 50s to 52s per sack. Suffolk, 44s. to 46s.; Stockton and Yorkshire, 45s to 47s per 280lbs. American flour 37s to 37s. per barrel

*Seeds.*—The seed market generally is heavy, and prices continue to give way

Linseed, English, crushing, 53s to 56s.; Mediterranean, 52s to 53s.; homeseed, 54s to 56s. per quarter. Rapeseed, English, 37s. to 39s. per cwt. Brown mustard-seed, 14s to 18s.; white, 12s to 14s.; tares, 7s. 6d. to 9s. 6d. per bushel. English rapeseed, 38s to 39s per quarter. Linseed cakes, English, £12 to £12 10s.; ditto, foreign, £11 5s. to £11 10s. Rape cakes, £5 10s. to £7 0s per ton. Canary, 50s. to 53s per quarter

*Bread.*—The prices of wheaten bread in the metropolis are from 9½d. to 10d of household ditto, 7½d to 8d per 4lbs loaf

*Imperial Weekly Average.*—Wheat, 53s. 8d.; barley, 32s. 2d.; oats, 23s. 7d.; rye, 44s. 7d.; beans, 34s. 9d.; peas, 37s. 4d.

*The Six Weeks' Averages.*—Wheat, 53s. 8d.; barley, 32s. 1d; oats, 23s. 6d.; rye, 44s. 5d.; beans, 34s. 11d.; peas, 36s. 10

*English Grain Sold Last Week.*—Wheat, 114,584; barley, 30,351; oats, 13,281; rye, 91; beans, 998; peas, 768 quarters

*Teas.*—We have to report a better demand for most kinds of teas, and late rates are well supported. Common congou fetches 9½d. per lb

*Sugar.*—There is a much better feeling in the demand for all raw sugars, and, in most transactions, prices have an upward tendency. Good refining qualities have realised 37s. to 41s.; Mauritius, 38s. to 40s.; and Bengal, 42s. to 47s. per cwt Refined goods move off steadily, at 46s. 6d to 50s. per cwt

*Coffee.*—The amount of business doing in this market is very moderate. In prices, however, scarcely any change has taken place Common qualities of Ceylon, 51s. per cwt.

*Rice.*—There is a fair improvement in the demand. But we have no advance to notice in the quotations. The stock is unusually large

*Provisions.*—The transactions in all kinds of butter, this week, have been very moderate, in prices, however, scarcely any change has taken place Hams, in fair request; and prime Waterford, on board, has realised 78s. per cwt. Bacon sides have advanced 2s. to 3s. Lard, 1s. to 2s. per cwt.

*Tallow.*—We have to report a slow sale for all kinds, and prices are a shade easier. P.Y.C., on the spot, 47s. to 47s. 3s. per cwt.

*Oils.*—Linseed oil is selling at 28s 6d. per cwt on the spot. All other oils are dull and lower to purchase. Turpentine moves off slowly, at 2s. to 2s 6d. per cwt. for rough

*Spirits.*—There is a fair sale for rum, at about stationary prices. Proof Leewards, 2s to 2s. 2d.; Jamaica, 2s. 1d to 2s. 3d per gallon. We have no change to notice in the value of brandy. Raw spirit, 10p. 8d; Geneva, 2s. 10d to 2s. 8d. per gallon

*Hops and Hop Grounds.*—Kent pockets, 6l. to 7l. 5s; sweet ditto, 5l. 5s. to 6l 10s; and straw, 4l. to 4l 15s. per load

*Wool.*—The next public sale of colonial wool—at which over 40 000 bales will be offered—are appointed to commence on the 8th proximo. The market continues very firm

*Potatoes.*—The supplies are still coming to hand, and the trade is steady, at from 65s to 95s. per ton.

*Hops (Friday).*—Middling and fine hops move off steadily, at very full prices, but inferior kinds are still neglected, and common to mid ling are in good supplied. The import this week are 16 bales from Hamburg, and 50 from Rotterdam. Mid and East Kent pockets £4 to £6; Weald of Kents, £3 15s to £5 5s; Sussex, £3 to £4 15s. per cwt

*Coals (Friday).*—Hasforth, 18s.; Liddell, 18s.; Eden Main 16s. 6d.; Haswell, 16s. 3d.; Hetton, 16s.; Lamb ton, 17s.; Stewart's, 16s.; Tees, 16s per ton.

*Metropolitan Cattle Market (Monday).*—The market was extensively supplied with beasts. Although the demand for all breeds was in a sluggish state, Monday's improvement in the quotations of sheep was fully maintained, and most breeds were in fair request, at full prices. We were scantily supplied with lambs, which sold heavily, and prices were 2s. per 8lbs lower. The top quotations was 7s per 8lbs. We had a fair demand for calves, at full quotations. In pigs very little was doing. Mitch cows realised from £16 to £20 each. Prime Scots, 4s 10d to 5s 2d; other breeds, 4s 4d to 4s 8d.

Per 8lbs to sink the offal:—Coarse and inferior beasts, 3s. 4d. to 3s. 6d.; second quality ditto, 3s 8d. to 4s.; prime large oxen, 4s 2d. to 4s 6d.; prime Scots, &c., 4s. 8d. to 4s. 10d.; coarse and inferior sheep, 4s. 6d. to 4s. 8d.; second quality ditto, 4s. 8d. to 4s 10d.; prime coarse-woolled sheep, 5s. 2d. to 5s. 4d.; prime Southdowns, 5s 4d. to 5s 6d.; large coarse calves, 4s. 8d. to 5s 2d.; prime small ditto, 5s. 2d. to 5s. 8d.; large hogs, 3s 8s to 3s 10d.; neat small porkers, 4s. 4d. to 4s. 6d.; lambs, 6s. 10d. to 7s. 2d.; suckling calves, 32s to 38s.; and quarter old store pigs, 18s. to 22s. each. Total supply beasts, 1253, cows, 115; sheep and lambs, 6070; calves, 191; pigs 260. Foreign: beasts, 40; calves, 10.

*Newgate and Leadenhall (Friday).*—The supplies of meat were moderate, and the trade was tolerably firm as follows:—

Per 8lbs, by the carcase:—Inferior beef, 2s. 10d. to 3s. 0d.; middling ditto, 3s 2d. to 3s. 6d.; prime large ditto, 3s. 8d. to 4s. 0d.; ditto small ditto, 4s. 2d. to 4s. 4d.; large pork, 3s 8s. to 4s. 10d.; inferior mutton, 3s. 6d. to 4s. 10d., middling ditto, 4s. 0d to 4s. 8d.; prime ditto, 4s. 4d. to 4s. 6d.; veal, 3s. 10d. to 5s. 0d.; small pork, 4s. 0d to 4s. 8d.; lamb 5s 2d. to 6s.

ROBERT HERBERT.

THE GRAND NAVAL REVIEW.—YACHTS TAKING OUT PASSENGERS TO VIEW THE FLEET, SKETCHED FROM SOUTHSEA COMMON.

# THE GRAND NAVAL REVIEW.

## SUPPLEMENT TO THE ILLUSTRATED LONDON NEWS.

No. 796.] SATURDAY, APRIL 26, 1856. [VOL. XXVIII.

### THE GREAT NAVAL REVIEW AT SPITHEAD.

(*From our Special Correspondent.*)

PORTSMOUTH, Tuesday Evening.

FAMILIAR for the past two years with the story of naval and military achievements, we close the period of a successful war by the exhibition of our unimpaired strength, and splendid training. Never at any period of our history have we been able, even at the outbreak of a war, to boast of a fleet as powerful in numbers and metal as that which floats at Spithead. Such a mighty gathering of first-rates and gun-boats may not for years again be witnessed in these waters; and the rehearsal for the benefit of peaceful spectators of a few mimic episodes in real warfare is an appropriate termination to the series of sterner and more dangerous actions in which the English have lately been engaged.

The people who met in 1854 and 1855 to cheer our gallant sailors to their duty, again assemble to cheer them for its performance. Peace has come, and with it—at least for the present—the naval and military labours of the country end. Animated with this sentiment, countless numbers have thronged to Portsmouth, and fill its houses, mingling together in a ceaseless hum the accents of Hampshire and those of distant towns and places. In the same proportion as the fleet of 1856 exceeds that of Lord Howe in 1791, so the number of spectators now exceeds that of seventy-five years since. It was then considered a splendid effort to bring together a single line of ships extending for five miles—from Stokes Bay to Spithead; now we have a double line stretching from off Lee Point to the Nab, whilst hundreds of gun-boats, floating-batteries, and mortar-vessels crown the outer spaces off Ryde and Portsmouth.

On Saturday, after some days spent in evolutions of a preparatory nature, the fleet anchored in a stately line, with the *Duke of Wellington* at its head, bearing the Admiral's ensign. The *Rodney* and *London* had already taken up their positions near the Nab, as pivot-ships, round which the fleet was to sail. In the open spaces, between the two divisions, the water was sprinkled with boats carrying spectators; steamers filled with visitors steering like pigmies through their colossal sisters; gun-boats puffing like locomotive engines; whilst in a mass off Ryde lay a host of craft forming clumps, with their masts relieved in yellow on the houses and trees of the town. At no great distance off Southsea Castle lay the heavy forms of the floating batteries, rising and falling on the swell like whales; and stretching from their vicinity far away past Monckton towards Browndown were the heavy round hulls of the mortar-vessels, reposing in a sort of grim, gray rest, that seemed to have its attractions. The sun shone brightly on the white walls of Southsea Castle, with its tower soaring above the low embankments, bristling with guns, on the varied crowd which covered the esplanade, and on the green embrasures of the main defences. The Sallyport and Blockhouse, the long line of white which joins Fort Monckton to the latter, contrasted but feebly with the pale green water; and the entrance to the harbour was thronged with boats, some of which, filled with merry, bearded faces, were carrying liberty-men from the ships of war to the shore; others were crowded and laden to the thwarts with curious spectators anxious to gain a view from the water. Passenger steamers, gun-boats, and tenders to the fleet, were perpetually passing in and out of harbour, bewildering the eye by the rapidity of their motion and the quick succession of their numbers.

Visitors, numerous enough on Saturday, increased on Sunday, the weather favouring those who came down by the railways from London or elsewhere. Streaming down the streets of the town, curiously viewing the great guns in the embrasures, and peering into their muzzles, they were not induced to pause long before these curiosities; but, rushing to the piers, invaded the steamers which left the quays swaying to and fro with their loads in an alarming manner. Numbers, unable to reach the steamers, or afraid of the crush, loitered about the walls, or peeped at the fleet through the embrasures; or, following in a gentle sort of stream from James's-gate, spread themselves over Southsea Common, and walked up the Clarence Esplanade. Awful in our view as were the two statues of Wellington and Nelson decorating the entrance to this favourite walk, we did not find the mass much disgusted by the enormities here committed in the shape of sculpture—their object, the "cynosure of every eye," was the fleet. From every seaport, great or small, that intervenes between Deal and Portsmouth, strange boats had arrived, and offered their varied attractions to the liege with unceasing pertinacity and noise. The lugger from Ramsgate and cutter from Brighton competed with Portsmouth wherries for the holiday traffic—all sharing in it alike. Whilst liberty-sailors, too glad to be ashore, dis-

ported themselves in the taverns of the town, filled the Hard and neighbouring streets; foreigners in their peculiar costumes, with bags slung round them, rushed away to the shore, mingled with the cooler and more phlegmatic people around them, and contended with obdurate boatmen for a reduction of their exorbitant demands. The day was fine and the fleet motionless; a slight breeze rippled the water and gave it that white sparkle which makes artists despair. The Isle of Wight reposed in a pleasant grey haze, and the holiday folk had their enjoyments without stint.

On Monday again the scene changed. In the morning all Portsmouth was in motion. Sailors in various phases of oblivion or jollity were to go back to their ships; they covered the Hard and quays, forming picturesque and perpetually-changing groups. But as the day wore on these gradually thinned and disappeared, leaving the streets to the busy of every class. There was not a boat in Portsmouth harbour that had not its repairs or adornment to be seen to. Floating things which had found no employment for months were likely to do so now, and their owners were everywhere seen washing, painting, and tarring or mending, patching, and cutting them. The walls were covered with advertisements of vessels preparing to follow the fleet in its evolutions, at charges varying from ten shillings to four guineas. Yachts were for sale or to be let, houses were at the disposal of the highest bidder, and £50 was a modest price for two nights' lodging for a family of three. It is almost needless to say that the usual accommodation to travellers in the shape of hotels and taverns had long been pre-engaged and taken; those who trusted to chance to find a bed being wofully disappointed in the endeavour to discover a resting-place. Every officer in the great fleet lying at Spithead had asked his friends in far greater number than the ships could give room for. Some had twenty, some thirty; others—the lucky ones—less. Fortunately the Admiralty stepped in, and, limiting gun-room officers to about 30-95ths of a visitor each, no doubt cast consternation throughout more than one family circle at a distance. In the midst of all the noise of preparation fresh streams of pleasure-seekers came in hourly, and gave the streets an unusually crowded appearance. A deputation of French officers, recently arrived in the *Duchayla*, and headed by Admiral Jurien de la Gravière, landed during the day, and added their glittering uniforms, cocked hats, and sigullettes to the motley mass which already variegated the streets. The Lieutenant-Governor thought it a fit occasion to have a field day; and the troops, both of the regular and militia regiments, performed a series of evolutions on the common at Southsea. The day being pure and cloudless, like the last, rendered the positions of the ships in the fleet easily distinguishable. But little movement was, however, visible amongst them. The gun-boats alone appeared to be under orders to move, and they were observed for a considerable time throwing off their long stripes of steam, and then finally proceeding in the order of their squadrons—Red, White, Blue, and Striped—down the centre of the line formed by the line-of-battle ships, screw-frigates, and sloops-of-war. A great deal of signalling, and a few mishaps, such as lost bowsprits and damaged rigging, were amongst the unavoidable catastrophes.

Although it was generally known, and had been authoritatively announced, that there would be an attack on the Browndown batteries, and the mortar-vessels in front of them, on Southsea Castle and Fort Monckton, it was not distinctly ascertained what might be the manner of the attack, or its detailed features. In them a laudable desire was entertained of giving to the affair as much of the unforeseen as was possible, consistent with preconcerted arrangement. We saw, however, that great preparations were being made for resisting an enemy both at Browndown and Monckton, as well as at Southsea Castle. Supplies of powder had been forwarded in considerable quantities to those three places; and fatigue parties of artillerymen were diligently employed in extracting from the touchholes the chalk which stops them up and preserves the guns, fixing running gear to the carriages, and oiling the interior of the pieces. Ramrods were taken out of store, wads made—in fact, all the preparations required to repel the enemy with vigour. On board the ships so recently returned from encountering a real enemy we need not say such preparations were not required.

In the vicinity of Southsea Castle a grand stand was in course of erection, and seemed somewhat in close proximity to the fort. It served to give the approaching engagement its true theatrical value, by demonstrating to the eye how little danger was really to be apprehended, at the same time affording the best opportunity of a near view to those who were anxious for one.

To-day the morning broke hazily, and the sky became rapidly overcast. A light wind from the east prevailed, and the day was cool. Still cast. A light wind from the east prevailed, and the day was cool. Still there was no sign of rain, and it was anticipated that fine weather would as usual greet the Queen on her arrival at Portsmouth. The South-Western Railway brought such a stream of new-comers into the town that the streets were filled with people, many of whom being strangers appeared totally at a loss how to spend the night, on account of the difficulty of finding lodgings. Tired groups might be seen wandering from street to street, followed by carpet-bags, and making fruitless attempts at admittance to various houses where the prices of a night's rest seemed too exorbitant for any but millionaires. The beach near the Esplanade was crowded with numerous fresh crews of pleasure-boats from Deal and Southampton; and these little vessels at anchor near the shore formed by themselves a small forest of masts. Booths and tents sprang up in all directions on the Common; and two stands, in addition to that which had first been planned near Southsea Castle, arose as if by enchantment—one of them to the eastward of the fort, the other in rear of the large one already mentioned.

The fleet had not in the mean while made any alterations in its movements, if we except the withdrawal of the *Meander* from Stokes Bay where she had lain—the general belief being until now that she would form one of the points of attack by the gun-boat flotilla. During the day the latter again went through some evolutions, and passed up the lines of the fleet. The ships to-morrow are, it is said, to have six rounds a gun.

PORTSMOUTH, Wednesday.

The day fixed for the grand celebration broke in the brightest and most auspicious manner. It was a cold, grey, silvery dawn that threw every part of the vast scene into a misty tone, increasing the distance of distant objects, and causing the Isle of Wight to assume a pale and dim aspect.

The masses of people of every class which had assembled in Portsmouth had begun early to throng the places where the best view could be gained of the scene. Those who had slept soundly in the various beds furnished by the inhabitants of Portsmouth and the surrounding places; those who had slept less comfortably on chairs and tables at the rate of ten shillings each; those who had not slept at all—and they were the majority—streamed out of Portsmouth towards Southsea Common on the one hand and Gosport Common the other. On the esplanade the boats of every harbour for upwards of a hundred miles on each side of the coast, and many from distant French ports, contended for the favour of the multitude, gaily dressed out in colours, and sails set in readiness for motion. The masses, however, attracted by the idea of an attack on Southsea Castle, took up their positions on the glacis of the works, which they soon covered, leaving not a particle of the white stone forming it unoccupied by their moving bodies. Round and round this centre of attraction crowds moved about and fluttered, the esplanade gradually losing its hue of white for the dark one of the circulating crowd. The grand stand remained for a long time comparatively empty, but many others were filled at an early hour with many people. A careful guard was set over the green earthworks that cover the outer bastions, so that they retained their brightness unsullied by the contact of human feet, and preserved on a distant view the contrasts between budding and luxuriant grass and the weather-beaten towers and steeples that rise at intervals above the low level of the works. In the harbour, the piers crowded with anxious forms desirous of joining the vessels destined for them contended and jostled with each other without ceasing. As each gaily-decorated boat received its complement of people it left the shore and steamed out passing on the bubbling waters many a light skiff heavily laden with people, many a heavy collier's boat filled with men and women, many a graceful cutter or fast wherry dancing along merrily under all sail. For all Portsmouth, all London, and even distant parts of England, this was a holiday; and before eleven o'clock Portsmouth and its attendant suburbs presented the picture of a city deserted by all but the aged and infirm, and only a few belated individuals hastening along, vaguely apprehensive of losing some of the sight.

Whilst the greater part of the crowds streamed away to Southsea Common, another took the direction of Gosport, and, covering the decks of the floating-bridge with its numbers, glided into the sandy level, interspersed with furze bushes and water, which forms the beach between Fort Monckton and Stokes Bay. The neighbourhood of Haslar had also its numbers of spectators, crowded together on foot, in carts on waggons, and every species of accommodation.

The ships lay still as they had remained for a few previous days: the largest men-of-war forming that imposing double column which has already been noticed; the floating batteries and mortar-boats forming a confused line nearer the shore; and the gun-boats in the extreme distance towards Southampton, appearing smaller even than the reality from their distance. The whole dressed out in lines of flags, forming polygons of colour, gave a gaudy appearance to the surrounding water, already so variegated by moving craft of every sort.

Crossing the harbour to the Blockhouse Fort, where the Hampshire Artillery in all the pride of their best costumes stood in groups betokening disappointment rather than any other sentiment, we emerged upon the green meadows of Haslar, learning to our astonishment that the forts were not to fire any salute. Passing onwards through the crowds which were already formed and momentarily increasing, we entered Fort Monckton, where the Hampshire Militia, under Col. Stretton, was drawn out in full array. The bastions showed signs of recent preparation; but, strangely enough, were unmanned by gunners. From Fort Monckton the view extended over every part of the fleet, commanding the egress from the harbour, the esplanade and castle of Southsea, the confused forest of masts and flags marking the position of the floating batteries and mortar-vessels—the line of first-rates stretching up from the vicinity of the Nab to that of Cowes—the flotilla of gun-boats, and all the attendant shipping that covered the waters in every direction. Sunken low on the shore of the point known as Gilkicker, Fort Monckton is surrounded by a ditch, has a large earthwork in its north-western front, and crosses fire with Blockhouse Fort close by. It carries forty long 68 and 32 pounders. West of it are the new batteries of Browndown, all armed with very heavy ordnance, where it was supposed that an attack was intended similar to those arranged against Southsea Castle and Fort Monckton. All the ships in the fleet began early to get up steam, and their white funnels were everywhere vomiting out their volume of vapour before any signs of the Royal party were given. Many of the steamers and pleasure-boats had already taken up a position to windward of the starboard line, before any signs of motion were visible in the neighbourhood of the dockyard. At half-past eleven, however, a Royal salute from the old *Victory*, and the yards of that veteran liner manned with the blue forms of our sailors, proclaimed the arrival of the Queen; and then there was a hush, during which all eyes were turned towards the entrance to Portsmouth Harbour. The tall masts bearing the Royal standard were seen swiftly gliding down the waters, and then as the noble yacht, filled with its Royal freight, emerged from the space between the Blockhouse and the Round Tower, a cheer came rolling to us over the waters proclaiming the joy of the crowds around us looking on at the ceremony. Behind the Queen's yacht followed numerous vessels—the *Fairy*, *Elfin*, a steam-frigate of large proportions, the *Chanticleer*, and others, about thirty in number.

The Foreign Ministers were afloat in the elegant Admiralty steam-yacht *Vivid*. The House of Peers had the *Transit*; the House of Commons was on board that most unlucky of ships the *Perseverance*—many members of the Lower House were in the *Porcupine*. The Board of Admiralty dashed about in their fine yachts *Black Eagle* and *Princess Alice*; while the Port Admiral and the Governor of Portsmouth were cruising slowly along in the *Fire Queen*. Besides these Government vessels there were the *Avon*, the *Wildfire*, *Sprightly*, *Vulcan*, *Himalaya*, *Driver*, *Megæra*, *Prometheus*, *Otter*, *Pigmy*, &c., all with large parties of fashionable visitors on board. But, though these men-of-war were (some of them at least) smart vessels, they were now eclipsed by the magnificent fleet sent out by the various great companies. Of the Peninsular and Oriental Company there were the *Euxine*, *Ripon*, *Sultan*, *Simla*, *Manilla*, and *Alma*—the last with a party of the directors on board. The West India Mail Company turned out such leviathans as the *Atrato*, *La Plata*, *Tay*, and *Trent*. The *Indian* and the *Pacific* were also among the colossal merchantmen; and the steamers *Vivid*, *Garland*, and *Imperatrice*, though not among the largest, were certainly among the fastest present.

As the Royal yacht steamed past the walls the saluting battery fired in her honour, and then the people in the embrasures of the forts, on the slopes of the esplanade from Portsmouth to Southsea, from Blockhouse Fort to Monckton, crowded together to watch her. As she glided past the shore and the glacis of the castle, past the stands and sailing vessels filled with crowds congregated there in masses, cheers burst from them and filled the air, sounds of music then came stealing over the water from the ships to the shore, and added another feature of harmony to the scene. The approach to the Spit Buoy was marked by breathless expectation shown in every face turned anxiously towards the fast-sailing yacht and her attendant steamers. As she rounded the buoy and dashed out into the open water of Spithead, a scene of apparent momentary confusion was noticeable throughout the whole fleet. Dark blue masses rushed up rigging, gliding like wild cats till the very Royal yards were manned with human forms. At the same moment the fleet gave forth their salute—their guns roaring out from deck to deck, from ship to ship—until the air was obscured by the smoke and the fleet was involved in a cloud of vapour. Each vessel, at first partially darkened, then veiled up to the highest truck of its tapering mast, offered a beautiful sight, only equalled in diversity of effect by the partial rolling off of the mist, as the flaws of wind rent and played through them, revealing here a portion of a hull, there some dim tracery of mast and rigging, until finally through a silvery haze the whole fleet again burst into view. The blue jackets mingling their colours with the gaudy hues of the bunting, gave a pretty effect, combining straight lines of spars and rigging with fluttering prismatic tints. As the Queen then proceeded rapidly past between the Starboard line and the Mortar Squadron, thousands of voices cheered and hurrased, bands of music threw out tones that grew mellow as they stole along the waters, and the attendant shipping and spectators joined in the pleasing demonstration.

The Queen's yacht, emerging from the surrounding smoke, proceeded rapidly past Fort Monckton, meeting everywhere the same enthusiastic reception, and, having rounded into a position to return down the centre line, entered the squadron of gun-boats, disposed in double rows on each side of her course, and majestically proceeded on her way. She glided past the small vessels of the flotilla, passed steam-frigates of various strength and speed, passed the giant screw line-of-battle ships, till she reached the *Duke of Wellington*, greeted in all directions by the most enthusiastic cheers. Whilst she passed the gun-boat flotilla had got under way, and was slowly advancing against the tide in double column, the Red and White leading. The manner in which each tiny vessel kept her position and distance, the orderly manner in which each of them weighed anchor, was deserving of the utmost praise. The thin streaks of steam that issued from their high-pressure boilers showed clear against the sides of the ships through whose lines they passed, and added another to the numerous pictorial effects so remarkable during the day. Some time elapsed during the performance of this portion of the day's proceedings, on account as much of the number of gun-boats that had to weigh anchor as because of the comparatively slow speed of the vessels working against the tide. The Queen had passed at the end of the line and remained stationary, when the foremost gun-boats of the Red and White Squadrons were observed to round again and proceed—the first to starboard, the second to port, in the opposite direction to that which they had been taking. Their intricate lines of opposite motion in the midst of the two rows of stationary men-of-war were extremely curious and interesting, giving an appearance of mechanical regularity to the scene which was highly pleasing.

The head of the White Division having anchored abreast of Fort Monckton, the remaining ships of that denomination formed an imposing front of attack against the gun-boats and floating batteries moored parallel to them. These, lolling like porpoises in the water as it was lashed into waves by the screws of their opponents, seemed silently and somewhat contemptuously to look on the preparations made against them. The Red squadron, having sailed up on the other side of the double row of first-rates, was seen taking up a position opposite Browndown, supported by the *Light*, which followed at its heels. At the same moment the Blue squadron made its way in the direction of Southsea Castle, and anchored in line before that work. Undismayed at these hostile preparations, the people who covered the glacis and the numerous boats that plied between the castle and the attacking force seemed rather fixed in their intentions to remain than to have any idea of retreat. It was obvious that they anticipated the disappointment which was about to ensue.

The Light and Blue divisions had not had time to complete their line of attack before we observed the *Duke of Wellington* divesting its masts of the flags with which it had hitherto been dressed. With the speed of lightning every ship followed its example. Fold upon fold of bunting was lowered from view, and slowly the anchors having tripped were weighed, and the grand line of men-of-war began, at first imperceptibly, but instantly after with majestic solemnity, to move in the direction of the Nab. This was the noblest sight of the day. The large broad hulls of the largest ships in tow world moving in this orderly manner, apparently through a mass of smaller craft, whose tiny forms and filmy white streaks of steam everywhere dotted the water, the large tall spars and rigging overtopping the horizon and every smaller object, were splendid in the contrasts which they afforded.

At the head of the imposing squadron was the *Duke of Wellington*, her 131 ports shining in the sun, which showed her enequered sides bright with paint. Behind her the *Orion*, the *James Watt* (one of the most perfect specimens of modern naval architecture), the *Majestic*, the *Exmouth*, *Colossus*, *Brunswick*, *Edinburgh*, *Hogue*, *Blenheim*, *Russell*, and a long list of screw-frigates, corvettes, and paddle-wheel vessels. Abreast of the Port line the *Royal George* led the Starboard, gigantic in proportions as the *Duke*, if not as elegant in form. Then came the *Nile*, the *Conqueror*—superior in most respects to such competitors, noble as they are, as the *Algiers*, *St. Jean d'Acre*, and *Agamemnon*—the *Cressy*, *Cæsar*—almost as large at the stern as a 130-gun ship—the *Algiers*, the lumbering *Sanspareil* of Balaclava celebrity, the *Centurion*, *Ajax*, *Hawke*, *Hastings*, and others which we have not space to mention. The order having been given to steam at five miles an hour, the double column, under the orders of Admiral Sir R. Dundas and Rear-Admiral Baynes, was slow in receding from our view; but it was lost in the smoke and steam of its own creating for some time before the Royal yacht was seen again to emerge from the confused and intricate mass of ships on the horizon. Her masts, distinct from the rest by their tall and tapering forms capped by the heavy folds of the Royal standard, were first visible, and then the hull appeared as she sailed rapidly up to a station near the centre of the intended attacks on Southsea Browndown, and the gun-boats and mortar-vessels. Then, at a signal from the Admiral, the attack was ordered to commence. The bunting in answer was scarcely down from each tiny masthead when a tremendous cannonade commenced. The Blue Squadron opened on Southsea Castle with tremendous roar, heavy guns replying to heavy guns, the sounds of which reverberated through the air with unceasing din. The White Division opened on the gun-boats and mortar-vessels with similar vigour and alacrity; whilst the Red and Light blazed unmercifully at Browndown and Monckton. White clouds of smoke receding before the wind enveloped the crowds covering Southsea Castle and glacis; the thousands who filled the beach and common, the grand stands, and carts and booths, were enveloped in wreaths of smoke, which relieved themselves in light on a bank of heavy dark smoke floating in the rear from the funnels of the first-rates then coming up to their anchorages. Over that black bank of smoke again came rushing that of the flotilla, attacking the mortar-vessels, the stream of their steam blowing off, and puffs from their guns mingling together, and obscuring the space through which the tall spars of the Queen's yacht might still be seen, as she took advantage of the attack to make the best of her way homeward. Opposite Monckton Fort and Browndown the effect of the action was less visible, because the ships were not so clustered; but the energies of the crews of the gun-boats were unflagging, so long as their six rounds of ammunition per gun lasted. While, however, with the energy which real action had imparted to our sailors, they hurled their fire at the walls of the Portsmouth defences, those works remained entirely silent in return. The great pivot-guns on the walls, the 32-pounders in the embrasures, were all silent, the ammunition

# THE GRAND NAVAL REVIEW, AT SPITHEAD.

THE FLEET FROM THE SOUTH.—SKETCHED BY J. W. CARMICHAEL.

MAIN-DECK OF "THE BLENHEIM."—SKETCHED BY J. W. CARMICHAEL.

# THE GRAND NAVAL REVIEW, AT SPITHEAD.

GETTING UNDER WAY, AND MANNING THE YARDS.

made ready for days previously was not expended, and the soldiers in the redoubts looked on in grim disappointment at the attack, which they were not at liberty to return. The only explanation we obtained of this was that the order to fire had been countermanded at all the forts, in consequence of the discovery that the Lieutenant-Governor of Portsmouth would be obliged to pay for every shot fired on the occasion. A parallel instance cited was that of General Don, at Gibraltar, who on one occasion fired three rounds from several guns, and had to pay for all the ammunition expended.

After about half an hour's firing the whole scene was enveloped in smoke and darkness, leaving nothing to gratify the eye but a heavy mist, impenetrable and choking. Her Majesty had already taken the van and steamed into harbour as the last guns of the attack boomed over the waters. She was speedily followed by all the steamers afloat, whilst at the same time the crowds of spectators wandered home; the fleet meanwhile proceeding to resume the quiescent state at anchor in which we left it.

## DEPARTURE OF HER MAJESTY AND THE LORDS AND COMMONS.

The London stations of the South-Western Railway were the scene of great excitement on Wednesday morning. Long before the sun was up the vicinity of the terminus in Waterloo-road was in a commotion, owing to the thousands of persons which literally besieged this place of departure. Trains, each following the other in quick succession, and all apparently surcharged, were dispatched as early as five o'clock. Peers and commoners, regardless each of his position and state, or quality, were there intermingled in one only object—the obtaining a position in the train whereby to be conveyed to the place of embarkation. Coronated carriages private phaetons, and numbered cabs were converging to the one common centre. The Waterloo-road, Lambeth, has never presented such an appearance since the opening of the terminus as at four o'clock, owing to the continued arrival of carriages and hackney-cabs. At one time there were upwards of 2000 vehicles of different descriptions at the terminus and along the Waterloo-road; in fact, so crowded was the thoroughfare, that it was impossible for anything like one-half of the carriages to drive into the courtyard of the station. "Noble Lords" and "honourable members," whose train left for Southampton at seven o'clock, although unused to being thus early astir, had managed to "shake off" their soporific indulgences, and appeared at the prearranged hour. The foreign Ambassadors in official costume excited some degree of admiration and amusement to the bystanders, and one or two of them were re-elved with anything but a courteous reception.

The arrangements made both by the police and railway officials were of so effective a character that, notwithstanding the immense concourse of persons, not the slightest confusion ensued. Ladies and gentlemen, regardless of the danger, never hesitated for a moment in crossing the rails whilst the trains were being made up; but such was the vigilance of the railway authorities, under Mr. Young, the superintendent, and Messrs. Inspectors Narwood, Parker, and Bent, with a powerful body of the L division of police, that no accident took place.

Precisely at five o'clock the first train was started, considerably sooner than the time advertised. This was in reality a "monster train;" but it is only justice to the company to state that none of the carriages contained more than the regular number of persons. In a quarter of an hour afterwards another train, as large as the former, was started, filled with company; and at each succeeding quarter of an hour up to eight o'clock other trains left the terminus. In addition to the above a special train left at 6.45, containing the Cabinet Ministers and Foreign Ambassadors. At seven o'clock another special train, containing the members of the Houses of Peers and Commons, started; and at half-past seven the whole of the Queen's household left in a special train.

It had been arranged that the Royal train should leave by the Nine Elms station; and accordingly, at about half-past eight o'clock, her Majesty, the Prince Consort, and the Royal children, attended by a brilliant retinue, arrived at the Nine Elms Royal private station of the London and South-Western Railway, Vauxhall, at which place the Royal party were received by the directors and other of the company's officials. The Royal train, which was drawn by a powerful engine, named the "Duke," was intrusted to the charge of Mr. G. Anwell, consisting of two state carriages, which left the Nine Elms station at 8.45, and proceeded to Gosport; whence the Royal party, after embarkation, proceeded to Spithead. The news of the safe arrival of the Royal train at its destination, as well as that of each of the other passenger trains dispatched, was forwarded to London by electric telegraph.

Not fewer than 867 carriages, some containing as many as forty passengers each, left the Waterloo station on Tuesday; and during the three hours on Wednesday morning almost as many more left. The receipts of the company for the two days it was stated would exceed £18,000.

## ILLUMINATION OF THE FLEET.

The most interesting and only novel feature in the day's movements was that reserved for the night, as an Emeralder might say; and was a thorough novelty to such of the present generation as accidentally witnessed it. We say "accidentally," because no notice of an intention to illuminate was given in the Admiralty's programme, and consequently thousands who had borne the cold and languor of the day had left on their return to distant homes before the ships made this grand and brilliant demonstration. This was effected by simultaneously lighting up the yards and portholes with bluelights. At nine o'clock, gun fire, the whole fleet at anchor burst into light as by magic; the jets one above another, maintopmast high aloft, and the ports of each opened at once, showing a vivid glare between decks, caused an unusual roar of cheering from the shore, which was echoed and given back with interest from the boats of the legion afloat. This in the stillness of the calm night had an effect as imposing as it was rare, and cheer upon cheer applauded the spectacle. From nine to ten rockets were sent up thickly from the ships, and rained a golden shower upon the "floating capital." The Commander-in-Chief, Sir George Seymour, entertained the Admirals, Captains, and other officers of the fleet at the Admiralty-house in the evening, where the French Admiral and staff were the honoured guests. The *Erebus*, one of the three monster floating batteries built of wrought iron by Napier, arrived at Spithead, from Glasgow, just in time to be a feature in the finale.

THE DECIMAL SYSTEM IN SWEDEN.—Sweden has adopted the decimal system, the denominations of the old coins being at the same time maintained. The rixdaler (If 40c.) will still be the base of the monetary system; but, instead of being divided into forty-eight shillings, will be composed of 100 ort. Formerly there were four different kinds of rixdalers; but three of them will be abolished. As to measure, the foot will in future be of ten inches instead of twelve, whilst the inch will be divided into ten fractions, to be called lines. The base of liquid measure will be the cubic foot, called kanna. In weight, the former pound will be divided into 100 orts, and the ort into 100 stones. The definitive introduction of this system will not, however, take place before five years, in order to accustom the nation gradually to the change.

The *Journal de St. Petersbourg* of the 15th April publishes a despatch from General Luders, to the effect that since the declaration of peace the greatest friendship exists between the Russian and French soldiers.

## THE REVIEW OF THE FLEET AT SPITHEAD BY THE QUEEN.

*(From another Correspondent.)*

NEVER had Monarch a greater opportunity of witnessing a people's loyalty and devotion than our august and beloved Queen (whom God save!) had on the occasion of her reviewing her mighty and magnificent fleet on Wednesday last. The moment of her Majesty's appearance in the port was a signal for that enthusiasm which is always displayed whenever she is graciously pleased to appear among her subjects. Simultaneous cheers burst from tens of thousands of loyal hearts, showing the hearty welcome of our "Sea Queen" by her delighted people.

The review of such a fleet as the world never before beheld, equipped with an efficiency which all the newest appliances of art and science have enabled us to give to each of these powerful engines of war which composed it, and manned by seamen whose services our vast commercial wealth enables us to command without limit, was most gratifying to all who witnessed it. This gorgeous and truly national pageant was a fitting spectacle in celebration of peace, and one which illustrates the greatness of our triumph, the immensity of our resources, and the solid basis of our strength.

The fleet, as it appeared at anchor on the morning of the review, extending in a line east and west from pivot-ship to pivot-ship, covered a space of more than twelve miles, and comprised, in line-of-battle-ships, frigates, corvettes, sloops, floating batteries, mortar-ships, mortar-boats, and gun-boats, upwards of 240 sail, of which not more than ten were without steam power. There never was a time when the British Navy was more efficient than it is at present. Whatever may have been done in former days by our sailing vessels, however great the deeds they may have achieved, it is clear that for the future they cannot form the chief body of our naval power. It is, indeed, scarcely a question whether they should not be altogether superseded. The employment of steam-ships reduces them (the sailing ones) to the subaltern position of the siege artillery of an army by land. It is true, by the employment of a squadron of steamers a certain object in an expedition may be carried into effect by means of these sailing vessels—namely, when it is necessary to act against a fort or fortified maritime city, which must be destroyed by bringing together a large mass of cannon to bear upon one point. Beyond that no other service can be required of them. Here, again, the same service can be rendered with greater efficacy by the substitution of large steam-vessels like the line-of-battle ships forming part of the present fleet.

Too much credit cannot be given to the various Boards of Admiralty under whose directions the old instruments of the naval power of this country have been discarded, and replaced by other and far more powerful ones. Most assuredly, if anywhere it were desirable to uphold squadrons of sailing vessels, it must must have been in the councils of the British Admiralty; but they have listened to the voice of experience, and they have found that sailing vessels become useless when a new power capable of effecting every object in spite of them has entered into competition. We find there is in this fleet alone 230 steam-vessels of all classes, from the powerful three-decker, with her 131 guns and 1100 men, to the small gun-boat of 2 guns and 25 men. But this is not all. To give an idea of the real power of this steam fleet, it is necessary to inspect closely all that its armaments possess of the appropriate and formidable, and with what clever foresight the whole has been studied. The war-steamers of England have not been built for all services indiscriminately: in their construction there has been but one idea, one aim—that of war: they unite with wonderful aptitude to the things peculiarly belonging to the sea—extreme swiftness, powerful artillery, and great space for the occasional conveyance of troops. And yet this armament is indeed formidable, and he who beholds it may truly with the poet exclaim,—

> Britannia needs no bulwarks,
> No towers along the steep,
> Her course is o'er the ocean wave,
> Her home is on the deep.

The following is the list of the fleet, with their order of sailing:—

In addition to the foregoing there was a flotilla of forty mortar-boats and floats. The sailing line-of-battle ships *London* and *Rodney* were placed as the pivot-vessels.

Every precaution was adopted by the Government for the prevention of accidents, and for the safety and convenience of the thousands and tens of thousands of spectators who accompanied the fleet to sea. The Board of Trade issued notices to the masters of steamers cautioning them against carrying more passengers than the number allowed by the Act of Parliament, with the assurance that the pains and penalties under that Act would be fully carried out against all who might be found offending.

For the guidance of the masters of vessels, and to prevent collision between them and the ships of her Majesty's fleet during the Review, the Admiralty issued instructions that steamers, sailing vessels, and boats, were not to attempt to cross the line of the ships-of-war, nor on any account to pass between the columns; nor were they to occupy any part of the man-of-war channel between Spithead and St. Helen's during the evolutions. Steamers were to keep to leeward of the columns of ships in the order of sailing, as their smoke might prevent signals being quickly noticed, thereby causing accident. Vessels were not on any account to pass to windward of the Royal yacht, if it could possibly be avoided. Masters of vessels were reminded that the evolutions of so large a number of men-of-war required a considerable space, and they were, therefore, to steer accordingly, and not close in, to interrupt them, and that they themselves would alone be answerable should any accident occur. Instructions were also issued by the Admiralty that the passenger-steamers should use the anthracite coal, in order to prevent the atmosphere being obscured by the smoke usually evolved from all other description of coal.

In addition to these regulations steam-vessels of the Royal Navy were appointed to clear passages whenever any obstacle might appear likely to impede the progress of the Royal yacht or the manœuvring of the fleet: these vessels carried two balls at the fore as distinguishing marks.

The weather was most suitable. Indeed, so proverbial has it become when the Queen goes forth on any great occasion, that the weather is certain to be fine, that to find it otherwise would be an exception to the rule. And fine it was; for never did a more delightful day shine upon the myriads of spectators congregated at the various points commanding a view of the fleet and its evolutions. And splendid was the sight it was destined to shine upon, for never was there a more magnificent and gorgeous spectacle in ancient or modern times. "The Serpent of the Nile," great Cleopatra, could she have risen from her sarcophagus and been witness to it, would have envied our "Island Queen" her rule of a nation which can boast possession of the greatest and most splendid armament that ever floated.

The town of Portsmouth was crowded to an excess never witnessed before. For days previously the railways had been bringing thousands of visitors from all parts of the kingdom; and steamers from every port on the southern coast, teeming with human freight, had been, day by day, discharging their living cargoes. So great was the influx of persons on the Tuesday evening, the day immediately preceding the review, that hundreds of persons were unable to procure any sleeping accommodation at all; while those who were more fortunate and were able to procure beds did so at great pecuniary sacrifice. The rest of the men on the morning of the review that the town presented the most extraordinary appearance. From a very early hour and up to mid-day thousands of excursionists were seen issuing from the various railway termini, and wending their way in one continued stream towards the shore, to secure a good position to witness the sight. Southsea Common was literally teeming with human beings. From the ramparts, and along the esplanade to a considerable distance beyond Southsea Castle, there was one dense living mass. An immense grand stand was erected on the esplanade for the accommodation of those who preferred witnessing the review from the land. The admission fee was fixed at 10s.—a moderate demand when compared to the prices required for accommodation on board any of the steamers.

But it was not only upon the land that the scene was interesting, for war was the interest confined on the water exclusively to the Royal fleet. There was another flee, important in itself, and which contributed greatly to the splendour of the scene. Our mercantile steamers are of a class that astonish and command the admiration of all who behold them. Among them are some of the largest steamers in the world. Several of these were present—the *Nimla*, *Ripon*, *Alma*, *Manilla*, *Sultan*, and *Euxine*, belonging to the Oriental and Peninsular Steam Navigation Company; and the *Atrato* (the largest paddle-wheel steamer in the world), *La Plata*, *Trent*, and *Tay*, belonging to the Royal Mail Steam-packet Company. These were all thronged with visitors. The directors of the Royal Mail Steam-packet Company, and their friends, were on board the *Atrato*. The steamers of the South-Eastern Company, from Folkestone, and those belonging to the South-Western Company, were also present; together with many others from various ports, far and adjacent, all swarming with passengers. The French steam *L'Imperatrice*, from Calais, with a numerous company of ladies and gentlemen on board, was among the list. She had a splendid brass band, which, on passing the Admiralty yacht off the pier, struck up "Rule Britannia!"—a graceful and by no means an ill-timed compliment. Nearly all the large steamers carried the French flag at the fore in compliment to our gallant Allies.

## ARRIVAL OF HER MAJESTY.

Precisely at half-past eleven o'clock the train conveying her Majesty and suite arrived at the terminus in the Royal Clarence Victualling-yard. She was at once conveyed by her state barge on board the Royal yacht, accompanied by Prince Albert and the other members of the Royal party and suite. The *Victory* and the other ships in the harbour manned yards and fired a salute so soon as the Royal standard was seen flying at the mastnead. Her Majesty was accompanied on board by the Lords of the Admiralty, Sir Edmund Lyons, Admiral De la Gravière, and Mr. Osborne, Secretary to the Admiralty. After a short interval the yacht rapidly steamed out of the harbour, when the forts immediately saluted. The Queen was most enthusiastically cheered by the assembled thousands on the shore as the yacht pursued her course towards the Spit Buoy, on rounding which the whole of the fleet manned their yards and commenced a Royal salute. The scene was most imposing at this period,

The yacht then proceeded rapidly towards the westward, followed by a large fleet of steamers which were desirous to keep pace with her, but which her superior speed rendered a matter of impossibility. She passed to the westward of the fleet, and then proceeded between the two lines to the extreme east, where the flag-ships were at anchor She was followed by the flotilla in the same order in which they lay at anchor. As she passed along the line each of the men-of-war manned their rigging and cheered her Majesty. The French corvette-of-war *La Chevala* manned yards, and joined in the cheer of welcome. When the yacht arrived at the end of the line she lay to a little to the eastward of the flag-ships, until the squadron of gun-boats should have passed, and proceeded to take up their position to attack the forts, and the floating batteries and mortar-vessels. It was originally intended that the flotilla should follow the yacht to the Nab, between the two lines of the fleet, but this arrangement was abandoned.

It was a most singular and novel sight to see a fleet of nearly 150 sail reviewed within a fleet, and by no means the least interesting portion of the day's proceedings. When the flotilla arrived abreast of the Royal yacht the White and Blue Squadrons went round the flag-ship of Admiral Dundas, the *Duke of Wellington*, to port, while the Red and Light Squadrons rounded the *Royal George*, the flag-ship of the Commander-in-Chief, to port. The ease with which these manœuvres were executed spoke well for the officers and crews, as well as for the handiness of the craft themselves.

When the gun-boat flotilla had all passed, signal was made for the fleet to get under way. They were already hove short with their steam up, so that the signal was scarcely conveyed that it was promptly obeyed; and the whole fleet were quietly stealine from their anchorages in the same order in which they lay—the Port Division being headed by the *Duke of Wellington*, bearing the flag of Rear-Admiral Dundas, and the Starboard Division by the *Royal George*, with the flag of the Commander-in-Chief; and her Majesty heading both divisions in the Royal yacht. In this manner they proceeded to the pivot-ships *London* (90) and *Rodney* (90), which were anchored about a mile to the E.N.E of the Nab light, when the Royal yacht hove to ahead of these vessels, while the Starboard Division passed to starboard of the pivot-ship and the Port Division to port, and in this manner returning to their anchorage.

## THE ATTACK.

In the mean time, while the fleet had been steering to the Nab, the gun-boat flotilla had taken up its position for attacking the forts and floating batteries. The Blue Squadron, under the command of Captain Yelverton had anchored in order of battle to attack Seaside Cast e. The White Squadron, commanded by Captain Keppel, was anchored in line to oppose the floating batteries and the forty mortar-vessels, extending upwards of a mile and a half in length. The Red was opposed to the fort in Stokes Bay, and the L ght to Fort Monckton: these were commanded by Captain Codrington and Captain Astley Cooper Key.

The line extended nearly four miles. This fleet is, perhaps, one of the most wonderful of our recent improvements. It has been brought into existence in a most incredibly short time, and is a most formidable engine in shoal water where a line-of-battle ship cannot reach. This will at once be perceived by their description and armament.

The first class of gun-boats is composed of screw-ships of 200 feet length, and carrying six long 68-pounders, provided with engines of 300 horse power, and a crew of a 100 men. This class is intended as subdivisional ships.

The second class are about 150 feet long, and carry four 68-pounders are provided with engines of 200-horse power, and the crew numbers 80 hands.

The third class are about 100 feet long, of 60-horse power engines, armed with one 68-pounder pivot-gun, one 32-pounder pivot-gun, and two brass howitzers, 24-pounders, on the broadside. This class is by far the most useful and numerous of the whole flotilla, their extraordinary light draught (generally averaging from 4 to 6 feet) enabling them to steam in the shallowest creeks and inlets, while their heavy armament renders them effective against the strongest forts. The whole bulwarks are provided with moveable wrought-iron plates, perfectly rifle-proof, and reaching about seven feet above the deck, so as to protect the men from the enemy's riflemen, in case of having to force the passage of narrow rivers defended by sharp-shooters.

The fourth class is also a useful flotilla for very shallow streams and close in-shore service. It comprises vessels of about eighty feet long, the engines averaging 20-horse power; each boat carrying two 32-pounder pivot-guns amidships, the crew usually numbering thirty-six hands, exclusive of officers. These boats are very little larger than the steamers which ply upon the Thames, though they are certainly considerably broader, in order to admit of working the guns without danger to the craft. Their draught of water, with stores, ammunition, provisions, and guns on board, does not exceed from 3½ to 4 feet.

The whole flotilla is provided with high-pressure locomotive boilers, the place necessarily devoted to the machinery rendering this expedient absolutely imperative, to economise the limited area at disposal of the engineers. Yet small as the horse-power appears, the speed of the fleet of gun vessels is by no means contemptible, the average being from seven to nine knots.

Having described the power and armament of the gun-boats, of which there are nearly 200 in existence, it may be as well to explain those of the floating batteries and mortar-vessels, to which the White Squadron are now opposed in mimic warfare. Each of these tremendous floating batteries carries fourteen 68-pounders, and is sheathed from the bulwarks to three feet below the water line with massive plates of wrought iron, 14 feet 6 inches in length, 20 inches wide, and 4½ inches thick; and each of these plates is bolted to the timber sides of the vessel with forty screw-nuts. When French floating batteries of the same construction were used in the combined attack on the fortress of Kinburn one vessel was struck fifty-eight times in the hull without injury, except that where she was hit her wrought-iron plates were dented to depths varying from ¾ to 1¼ inches. The mortar-boats are all most formidable vessels. They are cutter-rigged, with light and small spars. Their tonnage averages 120 tons, while their draught of water is only from four to five feet. Each is about forty feet long and eighteen broad, and armed with one 13-inch mortar, weighing, with stand, &c., nearly nine tons. These terrific ordnance, when mounted in their places, leave no more space than two feet on each side; the most limited at which the gun can be worked. Some idea may be formed of the immense strength of the construction of these boats when it is mentioned that under each discharge the mortar recoils upon the vessel with a pressure of nearly seventy-five tons. That fortress must indeed be strong which could withstand the united attack of these vessels now opposed in mimic warfare against each other.

While the fleet was rapidly returning to anchor the spectators on shore watching with considerable interest the movements of the gun-boats, anxious for the commencement of the attack. The signal was at length made, and the firing was opened by the Blue Squadron against Southsea Castle. The White Squadron next commenced the attack against the mortar-vessels and floating batteries, and almost immediately after the Red and Light Squadrons opened fire against the Fort in Stokes Bay and Fort Monckton. When the firing was commenced against Southsea Castle, there were many thousand persons assembled under its walls, who, although expecting it, appeared considerably astonished as the loud report of the heavy guns suddenly crashed upon their ears. The gun-boats lay right across the entrance of Portsmouth Harbour, from shore to shore, nearly four miles, and the firing from such an extended line of heavy guns had a very imposing effect, though it was considered rather deficient, from the fortresses not returning their fire. After firing a few rounds each against their supposed foes, the gun-boats as well as the spectators were completely enveloped in smoke, which did not clear away until the firing ceased. There is no question that they would have proved most formidable had their services been required in those seas where it was originally intended they were to be sent. Happily, however, peace has reduced the requirements of those services to the display of this day.

After the signal was made to cease firing, the Royal yacht proceeded at speed to the harbour, under the salute of the fleet of ships of-war who had returned to their anchorage. Her Majesty was then conveyed to London by special train, where she arrived about eight o'clock.

## THE TREATY OF PEACE.

(From the *Daily News*)

THE following is an authentic Copy of the Treaty of Peace concluded at Paris :—

[TRANSLATION.]

The Plenipotentiaries, after having exchanged their plenary powers, found to be in good and due form, have agreed upon the following articles :-

ARTICLE 1.

From the day of the exchange of ratifications of the present treaty there shall be peace and friendship between his Majesty the Emperor of the French, her Majesty the Queen of the United Kingdom of Great Britain and Ireland, his Majesty the King of Sardinia, his Majesty the Sultan of the one part, and his Majesty the Emperor of all the Russias of the other part, as well as between their heirs and successors, their respective States, and subjects in perpetuity.

ARTICLE 2.

Peace being happily established between their aforesaid Majesties, the territories conquered or occupied by their armies during the war shall be reciprocally evacuated.

Special arrangements shall regulate the mode of evacuation, which shall be effected as soon as possible (*aussi prompte que faire se pourra*).

ARTICLE 3

His Majesty the Emperor of all the Russias engages to restore to his Majesty the Sultan the town and citadel of Kars, as well as all the other parts of the Ottoman territory of which the Russian troops are in possession.

ARTICLE 4

Their Majesties the Emperor of the French, the Queen of the United Kingdom of Great Britain and Ireland, the King of Sardinia, and the Sultan engage to restore to his Majesty the Emperor of all the Russias the towns and ports of Sebastopol, Balaclava, Kamiesch, Eupatoria, Kertch.

[A vexatious accident occurring at the last moment, has occasioned the loss of two or three slips of this portion of the M.S.]

ARTICLE 9.

His Majesty the Sultan, in his constant anxiety for the well-being of his subjects, having granted (*octroyé*) a firman which, in ameliorating their lot without distinction of religion or race, proves his generous intentions towards the Christian populations of his empire, and desiring to give a further proof of his sentiments in this regard, has resolved to communicate to the contracting Powers the said firman, spontaneously emanating from his sovereign will

The contracting Powers acknowledge (*constatent*) the great value of this communication. It is quite understood that the fact of this communication cannot in any case give to the said Powers a right to interfere, either collectively or separately, in the relations of his Majesty the Sultan with his subjects, or in the internal administration of his empire.

ARTICLE 10.

The Convention of July 13, 1841, which maintains the old regulations of the Ottoman empire relative to the closing of the straits of the Bosphorus and Dardanelles, has been revised by common accord

The act concluded with this view, and conformably to that principle, between the high contracting parties is and remains annexed to the present treaty, and shall have the same force and value as if it had formed an integral part of it.

ARTICLE 11.

The Black Sea is neutralised. Open to the mercantile marine of all nations, its waters and ports are formally and in perpetuity interdicted to flags of war, whether belonging to the bordering Powers (*puissances riveraines*) or to any other Power, save and except the exceptions mentioned in Articles 14 and 19 of the present treaty.

ARTICLE 12.

Freed from all impediments (*entraves*), trade in the ports and waters of the Black Sea shall only be subjected to regulations of health, customs, and police, conceived in a spirit favourable to the development of commercial transactions

In order to give every desirable security to the commercial and maritime interests of all nations, Russia and the Sublime Porte will admit Consuls in ports situated on the coasts (*littoral*) of the Black Sea, conformably to the principles of international law.

ARTICLE 13.

The Black Sea being neutralised according to the terms of Article 11, the maintenance or establishment on its coasts of military-maritime arsenals (*arsenaux militaires-maritimes*) becomes as unnecessary as without object (*devient sans nécessité comme sans objét*). In consequence his Majesty the Emperor of all the Russias and his Majesty the Sultan engage neither to construct nor to preserve any military-maritime arsenal upon that coast.

ARTICLE 14.

Their Majesties the Emperor of all the Russias and the Sultan have concluded a convention for the purpose of determining the force and number of light-vessels necessary for the service of their coasts, which they reserve to themselves the right of keeping up in the Black Sea. The convention is annexed to the present treaty, and shall have the same force and value as if it had formed an integral part of it. This convention can neither be annulled nor modified without the assent of the Powers parties to the present treaty.

ARTICLE 15.

The act of the Congress of Vienna having established the principles destined to regulate the navigation of the rivers which separate or traverse several States, the contracting Powers stipulate between themselves that for the future these principles shall be also applicable to the Danube and to its embouchures. They declare that this disposition constitutes henceforth a part of the public law of Europe, and they take it (the disposition) under their guarantee.

The navigation of the Danube cannot be subjected to any hindrance (*entrave*) or dues (*redevance*) which shall not be expressly provided for by the stipulations contained in the following articles. In consequence no toll (*péage*) shall be taken that may be based solely upon the fact of the navigation of the river, nor any duty (*droit*) upon merchandise which may be on board vessels. The police and quarantine regulations to be established for the security of the States separated or traversed by the river shall be conceived in such a manner as to favour the circulation of vessels as much as possible (*autant que faire se pourra*). Save these regulations, no obstacle whatever shall be placed in the way of the free navigation.

ARTICLE 16.

With the object of realising the dispositions of the preceding article, a commission, in which France, Austria, Great Britain, Prussia, Russia, Sardinia, and Turkey, shall each be represented by a delegate, shall be charged to design and cause to be executed the necessary works from Isatcha downwards (*depuis Isatcha*) in order to clear the mouths of the Danube as well as the neighbouring parts of the sea from the sand and other obstacles which obstruct them, so as to put that part of the river, and the said parts of the sea, in the best possible state of navigability.

To cover the expenses of these works, as well as of the establishments having for their object to assure and facilitate the navigation of the mouths of the Danube, fixed duties at a proper (*convenable*) rate, to be settled by the Commission by a majority of votes, may be levied, on the express conditions that, in this respect, as in all others, the flags of all nations shall be treated on a footing of perfect equality.

ARTICLE 17.

A Commission shall be appointed, composed of delegates of Austria, Bavaria, the Sublime Porte, and Wurtemberg (one for each of these Powers), to which Commission the Commission of the three Danubian Principalities, whose nomination shall have been approved of by the Porte, shall be joined. This Commission, which shall be permanent, will first draw up the regulations of navigation and of fluvial police; secondly, remove the obstacles (*entraves*), of whatever nature they may be, which as yet prevent the application of the dispositions of the treaty of Vienna to the Danube; thirdly, give orders for and cause to be executed the necessary works throughout the whole course of the river (*sur tout le parcours du fleuve*), and, fourthly, after the dissolution of the European Commission, see to the maintenance of the navigability of the mouths of the Danube, and the neighbouring parts of the sea.

ARTICLE 18.

It is understood that the European Commission will have fulfilled its task, and that the bordering (*riveraine*) Commission will have terminated the works designated in the preceding article under the Nos. 1 and 2, within the space of two years. The Powers parties to this treaty, assembled in conference and informed of these facts, will, after having taken note of them (*après en avoir pris acte*), pronounce the dissolution of the European Commission, and henceforth the permanent bordering (*riveraine*) Commission shall enjoy the same powers as those with which the European Commission will have been invested up to that time.

ARTICLE 19.

In order to assure the execution of the regulations which shall have been settled by common accord, in conformity with the principles hereinbefore enumerated, each of the contracting Powers shall have the right at all times to station two light-vessels at the mouths of the Danube.

ARTICLE 20

In exchange for the towns, ports, and territories enumerated in Article 4 of the present treaty, and in order the better to assure the liberty of the navigation of the Danube, his Majesty the Emperor of all the Russias consents to the rectification of his frontier in Bessarabia

The new frontier will start from the Black Sea at one kilometre to the east of Lake Bourna-Sola, will perpendicularly rejoin the Akerman road, follow this road as far as the valley of Trajan, pass to the south of Belgrade, reascend along the river Yalpuck as far as Saratzika, and will terminate at Kakamori on the Pruth. Above this point the old frontier between the two empires will undergo no modification.

Delegates of the contracting Powers will settle, in its details, the boundary line of the new frontier.

ARTICLE 21.

The territory ceded by Russia shall be annexed to the Principality of Moldavia, under the suzerainty of the Sublime Porte.

The inhabitants of this territory will enjoy the rights and privileges assured to the Principalities, and during the space of three years they shall be permitted to remove their domicile elsewhere, freely disposing of their property.

ARTICLE 22.

The Principalities of Wallachia and Moldavia will continue to enjoy, under the suzerainty of the Porte, and under the guarantee of the contracting Powers, the privileges and immunities of which they are in possession. No exclusive protection shall be exercised over them by any one of the guaranteeing Powers. There shall be no private (*particulier*) right of interference with their internal affairs

ARTICLE 24.

The Sublime Porte engages to preserve to the aforesaid Principalities an independent and national administration, as well as full liberty of worship, legislation, commerce, and navigation.

The laws and statutes now in force shall be revised To establish a complete accord as to this revision, a special Commission, with regard to the composition of which the high contracting parties will come to an understanding, will assemble without delay at Bucharest, together with a Commission of the Sublime Porte.

The task of this Commission will be to inquire into the actual state and condition of the Principalities, and to propose the bases of their future organisation.

ARTICLE 24

His Majesty the Sultan promises to convoke immediately in each of the two provinces a divan *ad hoc*, composed in such a manner as to constitute the most exact representation of the interests of all classes of society. These divans are to give expression to the wishes of the population relative to the definitive organisation of the Principalities. An instruction of the Congress will regulate the relations of the Commission with these divans.

ARTICLE 25.

Taking into consideration the opinions expressed by the two divans, the Commission will, without delay, transmit the result of its own labours to the present seat of the Conferences. The final understanding with the Suzerain Power will be recorded (*consacrée*) in a convention concluded at Paris between the high contracting parties, and a hatti-chérif conformable to the stipulations of the convention will definitively constitute the organisation of these provinces—placed thenceforth under the collective guarantee of all the Powers parties to the treaty.

ARTICLE 26.

It is agreed that there shall be in the Principalities an armed national force organised with the object of maintaining the security of the interior, and assuring that of the frontiers. No impediment (*entrave*) is to be placed in the way of such extraordinary measures of defence as, in accordance with the Sublime Porte, the Principalities may be under the necessity of taking (*seraient appelés à prendre*) to repulse any foreign aggression

ARTICLE 27.

If the internal tranquillity of the Principalities should be menaced or compromised, the Sublime Porte will come to an understanding with the other contracting Powers as to the measures to be taken to maintain or re-establish legal order. No armed intervention can take place without a previous accord with these Powers.

ARTICLE 28

The Principality of Servia will continue to be dependent upon (*à relever de*) the Sublime Porte, conformably to the Imperial hattis, which fix and determine its rights and immunities placed henceforth under the collective guarantee of the contracting Powers.

In consequence the said Principality will preserve its independent and national administration, as well as full liberty of worship, legislation, commerce, and navigation.

ARTICLE 29.

The right of garrison of the Sublime Porte, such as is stipulated for by anterior regulations, is maintained. No armed intervention is to take place in Servia without a previous accord between all the contracting Powers.

ARTICLE 30.

His Majesty the Emperor of all the Russias and his Majesty the Sultan keep in his integrity the state of their possessions in Asia, such as it existed legally before the rupture.

In order to prevent any local contest, the boundary of the frontier will be verified, and if need be rectified, but so as that no territorial prejudice shall result to either of the two parties from any such rectification.

With this view a mixed Commission, composed of two Russian Commissioners, two Ottoman Commissioners, one French Commissioner, and one English Commissioner, shall be sent to the locality (*sur les lieux*) immediately after the re-establishment of diplomatic relations between the Court of Russia and the Sublime Porte. The labours of this Commission are to be terminated within the space of eight months, dating from the exchange of the ratifications of the present treaty.

ARTICLE 31.

The territories occupied during the war by the troops of their Majesties the Emperor of the French, the Emperor of Austria, the Queen of the United Kingdom of Great Britain and Ireland, and the King of Sardinia, under the terms of the convention signed at Constantinople on March 12, 1854, between France, Great Britain, and the Sublime Porte, the 14th of June of the same year, between Austria and the Sublime Porte, and the 15th of March, 1855, between Sardinia and the Sublime Porte, shall be evacuated as soon as possible (*aussitôt que faire se pourra*) after the ratification of the present treaty. The time within which the evacuation is to be effected (*les délais*) and the means of execution will be the subject of a convention between the Sublime Porte and the Powers whose troops occupy the territories.

ARTICLE 32.

Until the treaties or conventions which existed before the war between the belligerent Powers shall have been renewed or replaced by new acts, the commerce of importation and exportation shall go on reciprocally upon the footing of the rules in force before the war, and their subjects shall in all other respects (*en toute autre manière*) be respectively treated upon the footing of the most favoured nation.

ARTICLE 33.

The convention concluded this day between their Majesties the Emperor of the French, the Queen of the United Kingdom of Great Britain and Ireland, of the one part, and his Majesty the Emperor of all the Russias of the other part, relative to the Aland Isles, is, and remains, annexed to the present treaty, and shall have the same force and value as if it had made part of it.

ARTICLE 34.

The present treaty shall be ratified, and the ratifications shall be exchanged in Paris within the space of four weeks, or sooner, if possible.

In faith of which the respective Plenipotentiaries have signed it, and have hereto affixed the seal of their arms.

TREASURE TROVE.—A rumour prevails at Cracow of an immense treasure which a young peasant has by chance discovered near Schwez, on the Vistula, the rain having washed away the earth by which it had been covered. His attention was attracted by seeing something shining, and, on closer inspection, he saw a large barrel, with copper hoops, filled with silver coin. It is supposed to be a military chest of the French army, which was buried there in 1813, in order that it might not fall into the hands of the Cossacks. It is known that, about twenty five years ago, several Frenchmen came to Schwez, and for some time were occupied in making search for something in the neighbourhood. —*Augsburg Gazette.*

A sum of £40,000 has already been subscribed as a guarantee fund for the contemplated art exhibition in Manchester.

THE GRAND NAVAL REVIEW.—LIBERTY-MEN GOING ON SHORE.—SKETCHED BY J. W. CARMICHAEL.

# THE GRAND NAVAL REVIEW AT SPITHEAD.

JAMES GATE, PORTSMOUTH.—LIBERTY-MEN RETURNING.

## THE OFFICIAL PROGRAMME.

The following is the Official Programme of the Review, as arranged by the authorities of the Admiralty :—

On the occasion of her Majesty reviewing the fleet the ships will be anchored at Spithead in two columns, at three cables' distance, the ships of the line at one and a half cables apart; smaller ships at one cable. The ships of the line will anchor to the eastward, then the screw frigates, screw corvettes, and paddle-wheel steamers. The divisions of gun-boats will continue the line to the westward two divisions in each line formed each into two subdivisional columns (half a cable apart) to the west of its divisional leader.

The *Meander*, *Belleisle*, floating batteries, exercising brigs and the mortar-vessels, will anchor and form a stationary line rom the Spit Buoy to the western end of Stokes Bay.

The *London* and the *Rodney* will take up a position as pivot-ships to the E.N.E. of the Nab Light, at four cables apart. Two other pivot-vessels will be similarly placed at one mile west of Cowes.

A Royal salute will be fired by the fleet on her Majesty's yacht reaching the Spit Buoy, and the same on her Majesty returning into harbour after the review, but not until the Royal yacht shall have reached the inside of the Spit Buoy. No other salute is to be fired.

The *Meander* and floating batteries will not salute, nor any vessel under the number of guns prescribed by the Admiralty order.

All the ships, while at anchor are to be dressed in colours, and, on the Royal yacht passing, each ship is to man the rigging, and the crews are to cheer The *Meander* and stationary ships are to man yards and cheer.

If the weather is tolerably fine, and there is not much swell in the offing the fleet will have steam ready (but with the fires banked), and be hove short by eleven o'clock in the forenoon.

Her Majesty's yacht, on leaving Portsmouth harbour, will probably steam past Gilkicker Point, and, entering between the columns at the western or Cowes end, will proceed through their whole extent. As soon as her Majesty shall have passed the eastern vessels of the flotilla, the flotilla will weigh and will follow the Queen's yacht between the lines in the same order in which they were anchored, preceded by the officer in command of the division in one of the larger gun-vessels.

On reaching the flag-ships the van and rear squadrons of the flotilla

GUN-BOATS ATTACKING SOUTHSEA CASTLE.—SKETCHED BY E. WESTON.

return in succession to port round the *Duke of Wellington*. The van squadron (White) will take up a position, at anchor, for attacking the *Meander* and stationary line, their right opposite to the floating batteries near the Spit Buoy, extending to the westward in line. The rear squadron (Blue) will place itself to the eastward of the Bonne Buoy, opposite to Southsea Castle, the centre and light squadron of the flotilla will turn in succession to starboard round the *Royal George*, and, passing to the southward of the south column of the line of ships, will cross the westward of both columns. The centre squadron (Red) will take up a position, and anchor their left opposite to the *Meander* and *Belleisle*, in Stokes Bay, and extending thence to the east, and opposite to the mortar-vessels. The light squadron (White and Red) will follow the centre division, and will place itself in opposition between the centre and van squadrons. Gunboats ordered to attack are not to fire more than six rounds.

The whole flotilla will be prepared to open fire on a signal from the Royal yacht or Commander-in Chief. As soon as the flotilla shall have passed the flag ships in the van of the columns the whole fleet will weigh on the signal being made by the Commander-in-Chief, lowering their flags simultaneously with the flag-ship, and will proceed in close order of sailing towards the pivot ships, at such a rate as will allow the prescribed order to be maintained, during the columns to be cable's length apart.

On reaching the pivot ships to E.N.E. of the Nab, each column, after passing between them, will turn outwards round these ships, the starboard turning to starboard, and the port column to port. Manning the rigging, and cheering the Royal yacht as they pass, they will then return to Spithead in the same order—closing their columns after the ships returning westward shall have passed the rear of the fleet, and thus regain their anchorage at Spithead, unless otherwise directed by signal.

Plan to be adopted in case a signal shall be made for the purpose:—

The position of the fleet at anchor as in No. 1, and prepare to weigh, but should the signal be made for the flotilla alone to weigh, accompanied by the signal which will refer to this plan, the gun-boats, after passing round the flag-ship, as in No. 1, instead of proceeding at once to the points of attack, will return to the westward outside the columns; having passed beyond which they will close the squadrons, each of which will remain in their original order of formation, and, passing between the pivot vessels off Cowes, the three flotilla squadrons will turn in succession to starboard and the Red and Light squadrons to port, and return to the eastward. When the whole have passed the pivot vessels, the flotilla will form into single columns of squadrons—White leading, Blue second, Red third, and Light fourth—(which will pass to north of the fleet (which will have remained at anchor), to their respective positions of attack in the order prescribed, and be ready to open their fire on the signal being given for the purpose.

## F. P. SMITH, FIRST PRACTICAL INTRODUCER OF THE SCREW PROPELLER.

*(See Portrait, engraved at page 428.)*

THE magnificent spectacle presented by our screw fleet at the naval review just concluded at Portsmouth naturally directs public attention to the history of the screw propeller—an instrument which though proposed centuries ago for the propulsion of vessels has only lately been reduced to successful practice. Although many persons have aided in the introduction of this important improvement it is mainly to the talent and persistency of one man that we are indebted for its practical realisation; and surely has it fallen to the lot of any one man within his own lifetime to confer upon his country benefits more timely or more momentous That man is Mr. Francis Pettit Smith, the main incidents of whose career we propose here briefly to record, and whose merits are only exceeded by his unpretendedness and very unpretending manners.

Mr. Francis Pettit Smith was born at Hythe, in Kent, on the 9th February, 1808. He is the only son of the late Mr. Charles Smith, who was for upwards of forty years the postmaster of Hythe, in which capacity he manifested so much zeal and integrity as to obtain the marked commendation of his superiors on numerous occasions. At the age of ten young Smith was sent to a school at Ashford, kept by the Rev. Alexander Fowler, and when he grew up to manly estate he adopted the business of a grazing farmer, first in Romney-marsh, in Kent, and afterwards at Hendon, in Middlesex. He had all his life been addicted to the construction of models of boats, and had contrived various modes of propulsion; but in 1834 a model which he had constructed and which was propelled by a screw driven by a spring, answered so well that he arrived at the conclusion that this would be a preferable propeller for vessels to paddles, which at that time were exclusively employed. In 1835 he constructed a larger model, which he performed a great number of experiments on one of the horse ponds of his farm at Heudon and at the Adelaide Gallery; and in 1836 he took out his patent for propelling vessels by the means of a screw revolving beneath the water at the stern. At this stage of the progress he was joined by the late Mr. Wright, the banker, and Mr. C. A. Caldwell, who had the penetration to perceive that the invention was one of much promise, and who were therefore desirous to assist its progress. In 1836 a small steam-vessel of ten tons burden and six horses' power was built, and was tried on the Paddington Canal, and also on the Thames, with satisfactory results. In the construction and working of this boat Mr. Smith was very materially assisted by Mr. Thomas Pilgrim, a clever practical engineer, whom he had engaged, and who subsequently acted as chief engineer of the *Archimedes* and other larger vessels. In 1837 the tiny craft put to sea and visited Dover, Folkestone, &c., encountering some very severe weather, and demonstrating that the screw would answer in rough as well as smooth water. In 1838 the vessel was visited by the Lords of the Admiralty, who considered Mr. Smith's progress to have been so successful that they contemplated trying his invention in the Navy; but before taking this step they were desirous of having it tried by Mr. Smith and his friends in a larger vessel. To meet this requisition the *Archimedes* was built. She was of 237 tons burden, and ninety-horse power; and in October, 1838, she was launched on the Thames at Millwall. It was agreed that her performance would be considered satisfactory, and that the screw would in all probability be adopted in the Navy if she realised a speed of five miles an hour. Near twice that speed was actually obtained.

Up to this point Mr. Smith had been compelled to contend against not merely the physical difficulties which are incidental to all new inventions, but against the almost universal sentiment of the engineering world which regarded the project of propelling vessels by means of a screw as visionary and preposterous. Undaunted, however, by this unfavourable opinion, and undeterred by mechanical difficulties—such as might be expected to spring up in the prosecution of so novel a scheme where there was no experience either of the principle or details, but everything was yet to learn—Mr. Smith laboured steadily onward, maintaining his own faith unshaken, and upholding the faith of those gentlemen who were now associated with him in the prosecution of the invention. Of these, one of the most effective and energetic was Mr. Henry Currie, the banker, who was one of the directors of a small company which was formed to urge forward the application of the screw, and has given to Mr. Smith an earnest support throughout his whole career; and it may well be a source of congratulation to any man to have aided in the introduction of so momentous an improvement as that of screw propelling. The remarkable success achieved by the *Archimedes* took the engineering world by surprise; and, although a vast amount of inertia had yet to be overcome before the screw could be practically introduced in an ocean-going vessel, yet it now became clear that the original unfavourable sentiment regarding it had been erroneous. Of all arts steam navigation is perhaps the most conservative, since the effects of any wrong step are so serious and so irreparable; and, although, therefore, the performance of the *Archimedes* demonstrated the success of the screw propeller, it was a considerable time before any other person would adopt it. Mankind looked on with a vague sentiment of wonder, mingled with doubt; they inquired, paused, and rejected; and several years had to elapse, and a long series of most expensive experiments had to be made before confidence had so far ripened into security as to cause the screw to be practically adopted.

In May, 1839, the *Archimedes* visited Sheerness, Portsmouth, &c., where her performance excited universal admiration. In May, 1840, she was tested by order of the Admiralty, by trying her against some of the best packets on the Dover station; and Captain Chappel, of the Royal Navy, and Mr. Lloyd, Chief Engineer of the Navy, by whom the investigation was conducted, reported in the most favourable manner of her performance. In the same year the *Archimedes* visited every principal port in Great Britain, and crossed the Bay of Biscay to Oporto In 1841 a small vessel, named the *Bee*, was built at Chatham by order of the Admiralty, and was fitted both with paddles and the screw, in order that it might be ascertained which instrument of propulsion gave the best result. In 1842 the *Rattler* was commenced at Sheerness; and in 1843 Mr. Lloyd, assisted by Mr. Smith and Mr. Brunel, made a number of experiments with her, to determine the best proportions of the screw; and the proportions as thus ascertained have ever since been the guide of engineering practice. In 1844 the *Rattler* was commissioned by Captain Henry Smith, R.N., and, in 1845, an elaborate series of experiments was made, with the view of ascertaining the comparative efficacy, under all circumstances of wind and water, of the screw-steamer *Rattler* and the paddle-steamer *Alecto*,—the vessels being purposely constructed from the same lines, and of the same size and power, in order that their relation might be accurately ascertained. The vessels were each of about 800 tons and 200-horse power; and, under nearly all the circumstances, the *Rattler* showed a superiority of performance, which led the Admiralty to order at once H.M. yacht *Fairy*, and twenty other ships of various classes, to be fitted with the screw, under Mr. Smith's advice and superintendence; which has continued till 1850; at which time nearly 100 ships had been built, or ordered to be built, on the screw principle. Meanwhile the fourteen years' patent had expired, and an extension of it for five years had been granted; no returns had yet been obtained from it, but very heavy expenses had been incurred; and, to add to Mr. Smith's perplexities, Brunel's ocean was no sooner made clear, and the principles of the patent in a great measure surmounted, than he was beset by a host of pirates and pretenders who had not been before heard of—who had in no wise contributed to the success or progress of the invention—but who now started from their obscurity to endeavour to wrest from Mr. Smith the fruits of his ingenuity, his endurance, and his toil. Some turned up forgotten patents to show that screw propellers had been proposed before. Others brought evidence to show that they had also tried to propel vessels by a screw, but their efforts ended in failure, and had long been forgotten. As is usual in such cases, both parties went into a court of law, where both the judges and the counsel were supremely ignorant of everything relating to the matter in dispute, and the usual legal sophistries were employed to show that Mr. Smith had done nothing whatever of a useful character. The very same language had been employed in the case of Watt half a century before, when he was beset by pirates, who sought to deprive him of the right to his improvements on the steam-engine; but the indignation of posterity has redressed that injustice, as it will also do in the case before us. Here has been an improvement of great public advantage successfully worked out with great labour, against great incredulity and in the face of difficulties which nobody must have worked it out; and, if Mr. Smith is not the person who has done it, who then is? Any argument which implies that it is to other agency than Mr. Smith's exertions that we are indebted for the practical realisation and present possession of the arts of screw propulsion is clearly untenable, as nearly every engineer who has used the screw, or has given the subject his attention, has for years been an attentive spectator of Mr. Smith's proceedings, and has watched every step of his career. Engineers know whence they obtained their information respecting the screw, whence they first acquired their confidence in its efficacy, and whence they derived those principles and proportions which now regulate their practice. In the face of an experience of this kind all other arguments and pretensions sink into insignificance; and the verdict which the engineering community has already pronounced on this subject is not just as it is irrevocable. Evidence the most incontestable, all pointing to the same conclusion, could easily be collected, but such a proceeding would now be quite superfluous, as the matter has gone beyond this stage, and has passed into the category of admitted facts commanding universal acquiescence.

To enable some approximate estimate to be arrived at of the amount of the benefit which has been conferred by Mr. Smith upon his country by accomplishing the introduction of the principle of screw propulsion into the Navy, it will be useful to recapitulate the following statistics:—There are in all 30 war-steamers with paddle-wheels in the Navy of the collective power of 11,035 horses, and carrying in all 268 guns: so that, taking the average of the whole of the paddle vessels of this class in the Navy, it takes about 41-horse power to carry each gun into action; but if we take only the seven best and most recent paddle vessels as the standard of comparison, then it takes about 25-horse power to take each gun into action. There are in the Navy in all 327 screw vessels, of which 19 are transports and store-ships and 168 gun-boats and floating batteries. Setting these aside, as vessels for special service, there remain 72 sloops and corvettes, 8 frigates, and 43 line-of-battle ships. These vessels, which may be considered the ordinary fighting ships of the Navy, mount collectively 3493 guns; and are propelled by 49,312 collective horses' power, being at the rate of seventeen horse power to bring each gun into action. The speed of the screw vessels is upon the whole much the same as that of the paddle vessels; but in the screw vessels each gun is brought into action with nearly one-third of the power

If these paddle vessels had been in exclusive use in the Navy, nearly 100,000 horse power more of engines would have been required than is at present necessary, the cost of which would have been five or six millions sterling, to which must be added a similar amount for the hulls of a requisite number of ships, and these, together, therefore, would represent the saving of engine power and ships in the Navy achieved by the introduction of the screw propeller. Even this result, however startling it may appear, falls far short of representing the amount of advantage realised, and indeed cannot be asserted, from the facility of introduction and speed, a fleet of the strength and efficiency of that with which the nation is now provided could not have existed at all. In the merchant and naval transport service, the benefits conferred by the introduction of the screw are quite as momentous, and the proof that paddles are now nearly obsolete is the fact that none other than screw vessels are now being built for the navigation of the ocean.

But while Mr. Smith has confessedly rendered such important services to his country by the introduction of the screw, he has not advanced his own private interests—but, on the contrary, has sacrificed them alto gether. He has spent the best years of his life in the prosecution of this undertaking, and has expended upon it the resources of talent and perseverance which, if spent in any of the ordinary pursuits by which wealth is acquired would, in all probability, have raised him to opulence. But partly from the magnitude of the achievement which rendered it necessary to spend so many years before pecuniary success could be reached, and partly from the imperfection of our laws, which place the inventor in *fact* only on the same footing as the inventor on *paper*—the barren propounder of theoretical ideas—Mr. Smith, has never derived any return from his invention. Her Majesty the Queen, it is true, has been pleased, most graciously, to grant Mr. Smith a pension from the Civil List of £200 a year, in consideration of his personal services to the Navy; and the leading engineers of the country, wishing to mark their sense of Mr. Smith's merits, of the great difficulties he has surmounted, and of the weighty benefits he has conferred, have subscribed about two thousand pounds as the commencement of a national testimonial fund, intended to mark the national appreciation of Mr. Smith's exertions But are such slight contributions as these an adequate recompense to such a man and for such an achievement? The people of this country have no interest and no desire that those who render real service to the State should meet with any other than a corresponding recompense, and the national sense of equity would be satisfied unless Mr. Smith received some supplement more commensurate with the arduous nature of the task he has successfully performed and the public benefits he has conferred. Why should not a grant be made to him of thirty or forty thousand pounds? Such a grant would be in accordance with the practice of the country; it cannot be said that it would be too large a sum for the services rendered, and whatever is to be given should be given promptly and with a good grace. It will never do to let it be supposed that plebeian services, however great, must ever be competitively unrewarded. The fact, the honorary distinctions and substantial rewards are being somewhat profusely bestowed for meritorious conduct in the late war seems to be an extremely fitting one so to recognise the result of Mr. Smith's labours, which have contributed so largely to the success of that war, and to the comfort of those who have had the honour to be engaged in it.

The introduction of the screw propeller is an achievement which will appear larger in the eyes of posterity than it does in ours; and those who have had any part in that great work will be remembered in connection with it when other names at present of far greater magnitude in the public eye will have been forgotten. The introduction of a new and important art constitutes an epoch in history, and the name of the man by whom such a boon has been conferred upon humanity looms larger through the mists of time, which, while it obliterates all conventional distinctions, and hides the faint hues of fictitious renown, brings out in grander proportions those great features of progress which give individuality to particular epochs, and by which the destinies of nations are controlled.

THE UNION-JACK.—The British Flag consists of the crosses of St George, St. Andrew, and St. Patrick, united; but the etymology of the term "Union-Jack" has never, it is presumed, been explained, for it does not occur in any lexicon or glossary. The word "Union" obviously arose from the circumstance to which the flag owes its origin (the Union of Ireland, in 1801); and, finally, therefore, is as to the expression "Jack." As the alteration in the banner of St. George occurred in the reign of James I., it may with great probability be presumed to be a corruption of "Jacques." If, however, this hypothesis be rejected, the following is submitted. English sailors were formerly accustomed to wear the cross of St. George on their upper garment; and as it appears from early writers that the upper dress of a horseman, and, according to others, a kind of cassock, was called a "Jack," it admits of the inference that a small flag containing the cross in question was termed "a Jack," when used at sea; after the banner, which, more properly speaking, is confined to the field, fell into comparative disuse. The former of these conjectures appears, however, the more probable.—*Sir Harris Nicolas. From "Things Not Generally Known."*

## *EPITOME OF NEWS—FOREIGN AND DOMESTIC.*

The Empress Eugénie daily takes an airing in the garden of the Tuileries when the weather is fine. The health of her Majesty is rapidly in course of restoration.

A step in the peerage has been offered to the Earl of Clarendon, and respectfully declined by his Lordship.

It is reported at Berlin, semi-officially, that Prince Oscar Frederick, Duke of East Gothland, is about to become a wooer to the Princess Mary of Cambridge. Prince Oscar will accompany the Dowager Queen of Sweden to Paris—where she is to be godmother to the Prince Imperial—and will afterwards present himself to the English Court.

The Emperor Alexander returned to St. Petersburg from Moscow on the 14th inst.

The arrival of the Marquis of Dalhousie from India is hourly expected at Walmer. The castle has been prepared for his reception as the Lord Warden of the Cinque Ports, succeeding the late Duke of Wellington.

General Pelissier is expected at Marseilles about the 27th of the month. A grand banquet will be given to him at that place by the municipal authorities.

The general belief in St. Petersburg is that the coronation of the Emperor will take place on the 30th August, the day of the patron saint of the Emperor Alexander.

The report that the Emperor and Empress of Russia intend to visit Berlin this summer is renewed.

The *Herald* states that Viscount Palmerston and Earl Fortescue are to have the vacant Garters

The thirty-eighth birthday of the Queen of Hanover was celebrated on the 13th inst. at the Hanoverian Court with all possible pomp. There was a drawingroom and ball in the splendid apartments of the old palace.

Lord Clarendon, accompanied by Lady Clarendon and family, arrived at Dover on Monday, from Paris, per the *Vimd*, from Boulogne. After partaking of some refreshment at the Lord Warden Hotel, his Lordship resumed his journey, and travelled to London per express train.

Baron C. Rothschild has left Frankfort for Munich, to form a company for executing several Bavarian railways. The King of Bavaria has conferred on him the Order of St. Michael.

Count Walewski has expressed a wish to obtain possession of the estates which formerly belonged to his family in Russian Poland.

Count Buol and Baron de Manteuffel took leave of the Emperor of the French on the 17th inst., and next day they left Paris together by the early train—the Count for Vienna, the Baron for Berlin.

A letter from Munich states that the King of Greece will visit Germany during the summer, and remain for some time at the Court of his brother.

The Prince and Princess de Joinville, the Count de Neuilly, and the Duke and Duchess d'Aumale, arrived at the Midland Hotel, Derby, on the 17th inst. Next morning their Royal Highnesses took their departure *en route* for Chatsworth

The King of Sardinia and the Prince of Carignan visited the Exhibition of Fine Arts at Turin on the 15th inst., and purchased several works there.

Count Nesselrode will retire from the Department of Foreign Affairs, and be succeeded by Prince Gortschakoff, the late Ambassador at Vienna. Count Nesselrode will preserve his position as Arch-Chancellor of the Empire.

Two sabres and two saddles of the most glittering and costly character have just arrived at the Turkish Embassy in Paris, as a present from the Sultan to the Emperor Napoleon

It has been decided that M. de Morny will represent the Emperor of the French at the coronation of the Czar. It is not yet known who will be the French Ambassador at Constantinople.

The Sultan has authorised the formation of a medical society at Constantinople, and has sanctioned its title as the Imperial Medical Society of Constantinople. The new institution was started by the English medical men at Scutari.

Mr. Greene, M.P. for Lancaster, has signified his intention to retire from Parliament when it dissolves. He has been a representative for the borough for upwards of thirty years

It is now said that M. de Brunnow is to proceed to London after the exchange of ratifications, as Extraordinary Ambassador, to announce to her Majesty the accession of the Emperor to the throne. But it is not decided whether he will be reappointed to the permanent mission

Baron Steiglitz has arrived at Paris. It is generally understood that his mission is connected with monetary transactions, which the financial condition of Russia renders necessary

Lord Panmure has given £100 towards the expense of erecting the theatre at Aldershot Camp.

Marshal Radetzky has permitted MM. Cassick, Hafner, Milich, Malaredi, Count Buresich, Antonibon, and Castrodardo, late officers in the Austrian navy, and political refugees, to return to the Austrian dominions

The *Epoca* says that King Ferdinand of Portugal, whose visit to Berlin several months has been announced, does not intend to visit Madrid, in order to avoid the embarrassments of etiquette, unless, indeed, the Queen shall insist on seeing him.

General Kisseleff goes from St. Petersburg to Rome, to conclude a Concordat with the Papal Court.

General Williams, whose health has now for some time been re-established, is expected to arrive very shortly at Constantinople.

M. Christopoulos, the Greek Minister of Public Instruction, had ordered the researches at the Acropolis to be resumed. They were discontinued in 1846.

Cardinal Viale Prela gave a grand dinner at Vienna on the 15th to the principal members of the Episcopal Conference. On the 17th the Archbishop of Vienna entertained all the archbishops now in that capital at his table

Lord Sydney is to succeed Lord Cowper as Lord Lieutenant of Kent

Baron de Keller will, it is said, represent Austria at the conference which is to take place at Bucharest for the organisation of the Principalities.

Lord Brougham arrived in Paris on the 20th from his seat at Cannes. On Monday he was present at the meeting of the French Academy of Science.

The homœopathic physician of the late Emperor Nicholas, Dr Mayr, who shortly after the death of his Imperial patient retired to Bamberg, in Bavaria, where he has since resided, has been summoned by the Empress Mother to return to Russia and to her the benefit of his medical advice.

General Kuhnawitch, who was made prisoner when Kinburn was taken, and whose conduct was brought before a court-martial, has been honourably acquitted.

Miss Victoria Fowler, of Newry, has been appointed by the Commissioners of the National Board of Education, Dublin, to take charge of the National School at Melbourne, at the salary of £50 a year.

The court-martial at Berlin has given its decision on the affair of the duel between M. de Rochow and M. de Hinckeldy. As, however, the decision is not valid until it has been confirmed by the King, nothing has yet transpired on the subject.

Prince Gortschakoff has announced that large quantities of flour and biscuit will be publicly sold by Government in the kingdom of Poland.

The electors of Bridgwater have signed an address to the members of that borough, calling upon them to support Mr. Ewart for the total repeal of the punishment of death.

The Vienna tribunal has condemned to death by default three political refugees, Drs Antonio Foster, Joseph Goldmark, and Ernest de Violand. These leaders of the Vienna revolution are declared guilty of high treason, and of having been implicated in the murder of M. Latour

The sentence of death passed at the late Devon and Suffolk Assizes upon Mary Weeks and Emma Mussett, both of whom were convicted of murdering their children, has been commuted to transportation for life.

The disarming of the National Militia se Valencia has been effected quietly. Fifteen hundred muskets were obtained.

The site of the new Théâtre du Peuple, which is shortly to be erected in Paris, is charged to the Place du Chatelet

The state apartments at Windsor Castle are now open on Mondays, Tuesdays, Thursdays, and Fridays, between the hours of one and four o'clock, until October 31st.

There are at present no less than five rival competitors in St. Petersburg for the Government concession or license to erect there a monetary institution according to the pattern of the Parisian and other Continental Crédits Mobiliers. Among them is the house of Baging Brothers, the Vienna Bank, and the Parisian Crédits Mobiliers.

## LIMITED LIABILITY.*

We quite agree with Mr. Lindsay that "a mighty race of competition is going on between ourselves, America, France, and other nations—all bidding for the markets of the world." A similar remark is made in an American journal, which sees in the rapid development of industry in Europe one of the present extraordinary phenomena of the Old World. The one great desire now apparently prevalent among the nations—kindred, too, by our own great success—is to obtain wealth and power by manufacturing and commercial activity. Everywhere Banks and all the resources of credit, are called into life; and if we cannot thrive under the most vigorous and enlightened competition we shall sink and decay. It is now, therefore, as Mr. Lindsay also says, "of vast importance to us to use every means in our power to develop our energy and genius." We shall not win in this mighty race if we be unduly weighted; and our peculiar Law of Partnership, which subjects every man who enters into trade to responsibility to the extent of his whole substance, has long been justly deemed to be a most unnecessary encumbrance. To remove it, Mr. Lowe introduced a bill into the House of Commons, "sound in principle," and "simple in detail," as Mr. Lindsay says, but which did not satisfy the House. It did not carry out practically, according to its views, the principle of limited liability, to which the House has given its assent, and Mr. Lowe was obliged to withdraw his bill. Under these circumstances, Mr. Lindsay, an earnest and honest reformer, who much desires to see the principle carried practically into operation, after consulting with Mr. Cobden, and calling in the assistance of Mr. Lavie, a great solicitor in the City, has presented the public with a bill "meant for Cheapside," and "worded in a way that men of business can understand it." Mr. Cobden says—"it seems to carry out what we have in view;" and that Mr. Lindsay, when he states "the difficulty of *marrying* capital to ingenuity under the present law, hits the bull's-eye of the case." Quite poetical this for Cheapside and Manchester; and it adds to the regret we feel at being unable to express entire approbation of a measure—plainly, tersely, and eloquently explained—intended to carry into effect a principle in which we cordially concur.

Mr. Lindsay's bill has for us, in contrast to that of Mr. Lowe, the disadvantage of being a great deal longer. The best legal draughtsman rarely puts twenty-five clauses on paper in the shape of a bill with six paragraphs of preamble without stating something that others will be sure to find discordant. Mr. Lindsay himself does not fully agree in all the clauses drawn up by Mr. Lavie. The twelfth clause, which takes away all the mutual rights of partners against each other, and all their rights as against third parties, unless the partnership be duly registered, and yet makes them liable as general partners to all *bond fide* creditors, seems to us harshly compulsory. Again, the twentieth clause, which renders a partner with limited liability responsible to the extent o. his liability for six months after his retirement from the firm for all the debts existing at the time of his retirement, whatever means he may have adopted to provide for their liquidation, and whatever may have been subsequently done by his partners, would, in our opinion, enact gross injustice. Mr. Lavie, rather than Mr. Lindsay, speaks in these clauses, and they, with some others, seem to us better calculated to suit the purposes of an opponent of limited liability than promote the objects of its advocates.

Mr. Lindsay admits that "he adopts registration, which, when arguing the question on broad principles, he had been forced to condemn." He gives up his own principle, therefore, to conciliate the opponents of limited liability. At the same time he will make registration general. He will call on every trader to record the names of the partners in the firm under which they trade. Every person carrying on business, though there be no partnership, is to be registered. A department of the Customs or Inland Revenue is to require every "House" to make a return. Directories of trade for particular districts or cities would thus be kept at each Custom-house or office of Inland Revenue. A small fee, too, of a shilling ought be charged for the entry. Mr. Lindsay thinks the public have a right to know who form partnerships; and to carry out the principles of limited liability he would accordingly subject ever trader to registration.

We are disposed to deny the right of the public or the State, claimed by Mr. Lindsay, to take any special notice of individuals carrying on business, or maintain a register of them, whatever may be the rights of individuals dealing with them. But we will not discuss such an abstruse question, being disposed to believe that his plan for conciliating the opponents of limited liability is more likely to render its very name hateful than to promote its success with the mercantile body. Our chief objection is to the very principle of concession coming from our side. We believe that we are right. We demand perfect freedom to form partnerships, and employ capital in small or large masses, making ourselves responsible to the extent of any sum we think proper; and why should we, in argument, give up such a principle? Why so concession for ever to be made by those who believe they stand on the right? Reformers have, in fact, no other ground to stand on; and when they quit it, and advocate anything else but the right, they go over to the camp of the enemy and advocate wrong. It is for the opponents of right to make concessions. Something not right, something short of what we consider to be justly due, may be accepted, because something perfectly right cannot be obtained. Such a deference may be necessary in the world, but those who accept the imperfection should never lose sight of what they deem perfection, and never propose what they themselves condemn. We differ from Mr. Lindsay, and from Mr. Cobden if he approve of Mr. Lindsay's bill, as to the propriety of conceding to the opponents of Limited Liability: we differ from them with regret, and with many misgivings as to our own judgment; but we do differ, after careful consideration; and it would be neither honest nor candid did we not, however reluctantly, express our difference.

* Remarks on the Law of Partnership and Limited Liability. By W. S. Lindsay, Esq., M.P. Effingham Wilson.

ORNAMENTAL PAINTING.—The stewards' books for the recent Croydon Park races are very elegant specimens of ornamental printing, executed by Mr. John Day, of Melton, and are entitled to special commendation. The race lists are printing in lace and blue, within a triple gold and colour border, and are headed by the arms of the stewards, properly emblazoned. The cases or covers for the lists are, however, most superb: the design being an oval and corners of embossed gold and silver leaves and stalks, bearing white roses in high relief; the centre oval inclosing the emblazoned arms of the stewards. Then, the first day's list is in gold, with the Rutland scene; and that for the second day is in silver, with the Earl of Wilton's arms; the arms of Lord Forester being at the head of both days' racing.

PROBABLE POPULATION OF KANSAS NEXT AUTUMN.—The St. Louis *Democrat* believes, "from a careful examination of reliable data, that there will be one hundred thousand persons added to the population of that fair and fertile territory before the ripening of the harvest." This seems a pretty large estimate, but perhaps not larger than present indications will justify warrant. The whole country seems to be roused upon the subject, and every quarter north, south, east, and west—companies are forming to [illegible] Kansas their future home. The popular idea seems to be that a country which has been so talked about and fought for must needs be a good one, and no number of ruffians will prevent adventurers from going there. We think there is no question that at least the ninety-five odd thousand required by Mr. Douglas in his bill providing for the admission of Kansas into the Union will be on the ground before next August, and not improbably before the end of the present session of Congress.—*Chicago Democrat.*

## CHESS.

### TO CORRESPONDENTS.

F T B, Dublin University Club.—It shall be inserted on next week.

F. T., Boston. The German "Handbuch," or Register and Diet Lasa.

Byth.—The solution is simple enough. Move the Rook back to Queen's square if the Black be placed to King's square move the Rook to K B sq., and then Mate [illegible] leaves. In like manner, if the Black King be moved to Q B sq., play your Rook to Q Kt sq., &c.

H [illegible]TON; W. GRESHAM; J. B., of Bridport; HERR KLING; W. C., are warmly thanked for their obliging assistance.

J H [illegible] G. T., of Bretton.—Now under consideration.

[illegible] TON.—We [illegible] you are right.

[illegible] have sent all we should like to the composer, J. B., of Bridport.

A Subscriber.—The re-entry of the Provincial Chess Association will take place in a year at Birmingham, in two sections. The annual subscription is five shillings. Full particulars may be learnt on application to the Hon Secretary, Mr. James Pressam, Spring-street, Leamington.

W. [illegible] your opinion, the greater player.

A W [illegible] Mead at once. You have been strangely misinformed. No change, such as you speak of, either in our rules or in the other, has ever taken place.

L. W. S.—A reply has been dispatched by letter.

W. E. A.—The Solution of Enigma 978 is—

| WHITE. | BLACK. | WHITE. | BLACK. |

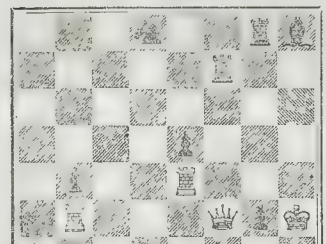
### PROBLEM No. 636.

By Mr. HENRY TURTON.

BLACK.



WHITE.

White, playing first, gives checkmate in four moves.

## CHESS AT LIVERPOOL.

The following is one of the best-contested games at the late tourney between the Clubs of Manchester and Liverpool:

*(Fetrof's Defence to the Kt's Opening)*

| WHITE (Mr. Kipping). | BLACK (Mr. S ul). | WHITE (Mr. Kipping). | BLACK (Mr Soul). |
|---|---|---|---|
| 1. P to K 4th | P to K 4th | 20. Kt to K 2nd | P to Q Kt 3rd |
| 2. K Kt to K B 3rd | K Kt to K B 3rd | 21. B to Q 3rd | P to K t 4th |
| 3. Kt takes K P | P to Q 3 d | 22 K to Kt 2 d | Q R to K sq |
| 4. K Kt to K B 3rd | Kt takes P | 2 Kt takes R | R takes R |
| 5. P to Q 4th | K Kt to K 2 d | 24. Kt to K 4 th | P to K Kt 4th (*a*) |
| 6. K B to Q 3rd | P to Q 4th | 25. P to K R 3rd | Q to K R 4th |
| 7 Castles | Castles | 26. Kt takes K R P (*b*) | R to K 7th |
| 8. P to Q B 4 h | P to Q B 3rd | 27 B to K sq | R to K 5th (ch) |
| 9 K R to K sq | P to K B 4th | 28. K to K B sq | R to Q R 7th (c) |
| 10 Q to Q Kt 3rd | Q Kt to Q R 3rd | 29. K to Kt sq | Q to K 7th |
| 11. P takes Q P | P takes P | 30. K to Kt 2 d | R takes Q Kt P |
| 12 K B takes Kt | P takes B | 31. Q to K B 3rd | Kt to K sq |
| 13 K Kt takes P | K to R sq | 32. R to Q R sq | Q to K 3rd |
| 14. K B to K 6th | K to K B 2nd | 33. R to Q B 3rd | R to K 7th |
| 15 Q Kt to Q 8 3rd | K Kt to Q 3rd | 34. K to K B sq | R takes Q R P |
| 16 K R to K 3rd | Q B to K Kt 5th | 35. R to K sq | Q takes K R P (ch) |
| 17. K Kt to K 5th | P to K R 3rd | | |
| 18 P to K Kt 3rd | Q to K R 6th | 36. K to Kt sq | Q to Q 2nd |
| 19 K Kt takes B | Q takes Kt | 37. R takes Kt (ch), and wins. | |

(*a*) This exposes his King too much. We should have preferred taking off the Kt, and the playing Kt to K 7th.

(*b*) Very hazardous. After this we should take Black's game for choice.

(*c*) Ingenious certainly, but Kt to K 8th would have been sounder, or we are much in error. In that case the game would possibly have been continued in this fashion:—

| | | | |
|---|---|---|---|
| 29. | Kt to K 8th | 30. Q to Q 5th (ch) | R to K 7 h |
| 30. P to K B 3rd | Q to K R 6th | K to K 2nd | |

And White, at best, has a difficult up-hill battle to fight.

## CHESS ENIGMAS.

No. 980 -By C. W., of Sunbury.

*White:* K at K 7th, R at K R 4th, Bs at K Kt 6th and Q R 3rd, Kt at K 2nd, P to Q B 4th.

*Black:* K at K 4th, Rs at K B 7th and Q Kt 8th, B at Q R 2nd, Kt at Q B 4th, P s at K B 3rd, Q R 2nd and 3rd.

White to play, and mate in three moves.

No. 981.—By a YOUNG AMATEUR, of Leeds, only fourteen years of age.

*White:* K at K Kt sq, Rs at K B 6th and Q R 4th, B at Q 2nd, Kt at Q Kt 3rd, P at K B 5th.

*Black:* K at K B 6th Q at K Kt 3rd, P s at K Kt 7th and K B 3rd.

White to play, and mate in four moves.

No. 982. From the *Illustrirte Schachzeitung*

*White:* K at K Kt 4th, R at K Kt 2nd and K 8th, B at K 2nd.

*Black:* K at K R 4th, P s at K R 3rd, K Kt 2nd and 6th.

No. 983.—From the Same.

*White:* K at K 7th, R at K Kt 5th, B at Q 3rd, Kt at Q B 4th and Q B 5th.

*Black:* K at Q R 4th, P s at Q Kt 3rd, R at Q B 8th, P at Q B 2nd.

White to play, and mate in three moves.

REDUCTION OF THE FRENCH ARMY.—The *Moniteur* of Tuesday last contains the first of a series of chapters, decrees by which the French army will be gradually reduced to a peace footing. The 4th Regiment of Chasseurs d'Afrique is disbanded. The 101st and 102nd Regiments of the Line are disbanded. The fourth battalions of the hundred regiments of the Line are suppressed. Like the 101st and 102nd Regiments, these fourth battalions were a creation of recent date. Lastly the 1st and 2nd Foreign Legions are disbanded.

## FASHIONS FOR THE MONTH.

SEVERAL light materials for summer wear have already made their appearance, and among the most beautiful of these fabrics are the new barèges, some of which we will endeavour to describe.

A blue barège has three flounces brocaded with large white heartsease, the jacket having a trimming to correspond.

Another in a less simple style has a variegated chinè cashmere pattern, alternating with a broad stripe of black. The flounces of this dress are cut straight-way from the piece, and are trimmed with fringe or ribbon to correspond with the prevailing colours of the dress. This same pattern is repeated in other dresses, with the substitution of some bright colour for the black stripe.

There is a dove-coloured barège, the flounces of which are edged with a rich brocade of blue in a Greek pattern; and another in a similar style has a violet ground, the brocade being of white. A third barège of the same class has a stone-colour ground, with a mixture of shawl pattern and lozenges of green.

The most elegant barège, however, which we have yet seen, has a white ground, the flounces being edged with a shawl-pattern brocade of rich bright colours, and the dress itself having spots on it of a similar character. The jacket of this dress is ornamented with a trimming to correspond with the flounces, and has braces put on more in the form of a cape than has hitherto been generally adopted.

There is a very pretty chalis dress of a grey ground, with small flowers and green stripes; and there is a thick chalis composed of a mixture of stone-colour and golden brown, another chalis has a black and white shot pattern, with flowers, ornamented with horizontal violet-coloured stripes.

A grenadine jaspé of stone colour has been much admired; it has flounces brocaded in a chiné pattern of green. Another grenadine has a sky-blue ground with cashmere pattern stripes.

The muslins this year are peculiarly tasteful and elegant. There is one with a French-blue ground, the flounces having a border of roses. The pattern is so delicate and beautiful that it looks more like painting than printing. The corsage has, of course, a trimming to correspond.

Another muslin has a white ground with green spots, and flounces the pattern on which is of leaves and butterflies.

A muslin in a similar style has likewise a white ground with spots formed of minute bouquets of flowers, and flounces bordered with an elaborate pattern to correspond.

It is time, however, to fulfil our promise recently made, by describing some evening dresses. For young ladies dresses of thin materials are universally worn, tulle and tarlatan having the preference. They are made with two or three skirts, or else with innumerable flounces, trimmed with bouds and puffings and ribbon. Often coloured velvet trimmings are used, and with flowers to correspond, have a very brilliant effect. For instance, a white tulle dress may be trimmed with narrow scarlet velvet, and the skirts looped up with scarlet geraniums; or bouquets composed of corn-flowers, poppies, and wheat-ears may be adopted instead.

The *coiffure* to accompany a dress of this description always consists of a wreath to correspond with the flowers on the dress; the new wreath, which forms a double circlet, and which we mentioned in our notice of Court dresses, being the favourite.

For ladies, not juvenile enough to wear the sylph-like apparel appropriate to the débutante, we can recommend rich silks of every hue. They are much worn for evening dress, with flounces up to the waist, and richly trimmed with black and white lace, blonde, and flowers. The corsage is made with a point before and behind, and is profusely trimmed. The sleeves are short, and very full

A pink silk dress, with three flounces, each flounce being covered with another flounce of black lace, is in very good taste. The body is trimmed with black lace, narrow black velvet, and pink roses. Head-dress, the double wreath of roses and green leaves

A white silk dress, with several flounces, and trimmed with white blonde and scarlet velvet, has also been much admired.

The double wreaths are sometimes made with a mixture of gold and silver.

An amber silk, with three flounces, may be trimmed with white blonde and pearls; head dress of pearls and rich amber ribbon.

A blue silk dress, with double skirts, is nearly covered with white lace and is ornamented with flowers of blue and silver. The wreath, forming a double circlet, should correspond with the flowers on the dress.

No change has yet been proposed in the mantles which we described a few weeks ago. Black mantles are the favourites, although mantles of quiet colours are sometimes worn when they harmonise with the dress. They are always much trimmed with velvet, fringe, lace, or gimp; and sometimes with a mixture of all these articles.

Bonnets are, perhaps, prettier than ever. We must especially recommend a white chip, trimmed with black velvet and pink roses. Another white chip is profusely trimmed with white blonde, black lace, and blue ribbon. The curtain, which is very deep and full, is composed of these three materials, the ribbon hanging in long loops over the lace and blonde. The inside of the narrow brim has a full blonde cap and blue flowers with black leaves. In both these bonnets the profuse trimming and full binding of the edges of the brim take off from the hard outline which used to render chip bonnets, with all their merits, often unbecoming.

Fancy straw bonnets are presented in a seemingly endless variety. One of these is nearly covered with white tulle; and is trimmed with lilac ribbon, having bunches of lilac so arranged that the flowers outside and inside the brim mingle. A few plain straws are also to be seen. One of these is trimmed with a mixture of broad white sarsenet ribbon, narrow black velvet, and pink roses. Another has blue ribbon, black velvet, and jasmine and blue convolvuli. In both instances the deep curtain is covered with black and white lace.

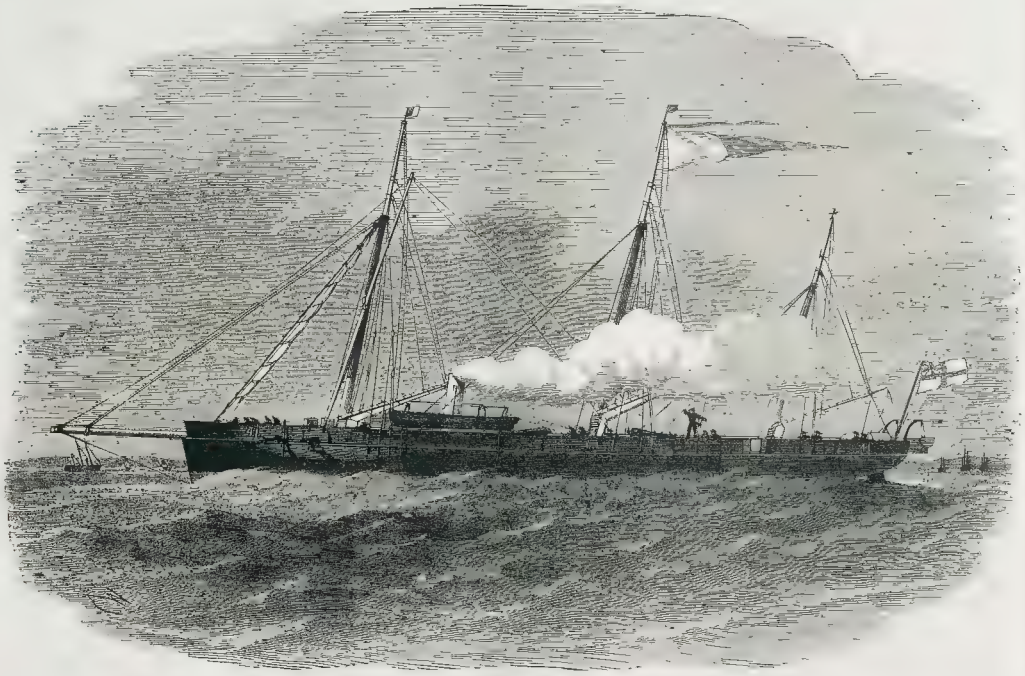
The morning caps this season are extremely pretty. They are usually of lace with trimmings of velvet and ribbon. Caps for demi-toilette are sometimes of blonde with black lace intermixed, and flowers of every description. The union of pink heath and variegated grasses is very pretty, as also the mixture of lilac and white lilac, and sometimes the ribbons used consist of different shades of the same colour.

(For our information on dress and fashion, we are indebted to the courtesy of Madame EINSTLIN DEVY, 78, Grosvenor-street, Grosvenor-square.)

ROYAL FREE HOSPITAL, GRAY'S-INN-ROAD.—It will be remembered that on the demise of his late Royal Highness the Duke of Sussex a subscription was entered into to raise a monument to his memory, and, as a general meeting of the subscribers, it was decided that the most appropriate memorial, and one strictly in accordance with the humane and benevolent character of his Royal Highness, would be the erection of a wing to the Royal Free Hospital. The foundation-stone of the "Sussex Wing" was laid in July last, and the building is now erected; and a colossal statue of the Duke, to be placed in front, is nearly completed. The inauguration of the statue and opening of the new wing will take place on Wednesday, the 18th June next; after which the twenty-eighth anniversary festival of the charity will be held in Freemasons' Hall, the Right Hon. Lord Leigh, Lord Lieutenant of the county of Warwick, in the chair, on which occasion he will be supported by many influential noblemen and gentlemen.

HOW TO MAKE AN ANTIQUARY.—One day, when a little boy, Mr. Joseph Mayer, of Lord-street, Liverpool, went out rabbit-shooting to his father's estate at Leide Manor, in Staffordshire, and when passing through a field where some men were ploughing they saw the men all at once run to the fore part of the plough, and, taking on their knees, began scrambling among the soil. Our little boy, fancying they had discovered a mouse's nest, boy like, was not long in running to the spot to satisfy himself on the point. On coming up to the men, he found they were all busily filling their pockets and smockfrocks with coins. At once he joined in the scramble, and got his own pocket's pretty well filled. The men had turned up with the plough a large Roman urn filled with several hundred Roman second and third brass coins, among which were those of Constantine, Diocletian, Maximilian, Claudius, Constans, and a few other emperors. The rabbit-shooting was abandoned, and, after well searching the ground all round, young Mayer and the relatives returned to Mr. Taylor's, the gentleman on whose farm the coins were discovered, and delivered up to him the treasure trove. After dinner the coins were all spread out upon the table and examined, but the party not being much acquainted with Roman inscriptions, little besides the names of the emperors could be made out. Evening came on, and the visitors returned home, but not without some of the treasure. Mr. Taylor had presented the subject of our narrative with seventeen of the coins and a piece of the terra cotta vase in which they were found, and the grandfather promised to give our embryo antiquarian a crown piece if, in the course of the next month, he would learn to read the inscriptions on the coins. Within the period of a week he was enabled to claim the reward, by giving the schoolmaster to assist him in his task. Thus commenced the career of Mr. Mayer as a lover of antiquities, and he now shows with pride the very coins and bit of vase which were brought by him to be at that time almost fortuitously, and still preserves them in his cabinet. In after years, during his travels on the Continent, and on visiting most of the principal places of Europe, at times when there were few collectors and a still less number of travellers abroad, he was enabled to add to his treasure, for a few small or francs, specimens which would now realise almost fabulous prices; besides securing specimens that are now rarely found save within the walls of some national museum.—*Liverpool Mercury.*

# THE GRAND NAVAL REVIEW, AT SPITHEAD.



LIGHT DRAUGHT GUN-BOATS OF THE WHITE DIVISION OF THE FLOTILLA.—SKETCHED BY E. WEEDON.

The preparations for the grand display were continued throughout Monday and Tuesday. Mortar-vessels and floats at sea, and munition waggons, with trains of artillerymen, following, ashore, and seen frequently as the time for keeping the "engagement" approached, conveyed an imperfect idea of the realities of war's preparations. Vessels continued crowding towards the anchorage from east and west; and, notwithstanding the order that "no smoking would be allowed," their funnels denoted pretty accurately, even afar off, that the craft was from the "north" or the Thames. The very best preparations were made by the directors of the Royal Victoria and Royal Albert piers—the former the place of "taking water" from Portsmouth, and the latter from the town of Portsea—as far as engaging efficient hands, increasing the service staff, and doing all that can be done on their (the piers') circumscribed dimensions to meet the extraordinary demands made upon each. The great bulk of the passenger traffic, both of the privileged and the public, for steamers was encountered at Portsea, where all the packets of the South-Eastern, Brighton, and Dieppe, and other ports, were ordered to embark at the Albert Pier, which, lying in the interior of the harbour and entirely out of the way of the channel of navigation in the direction of the harbour's mouth, was deemed the least likely to be the cause of any obstruction to the naval traffic. The yachts, smaller vessels, and watermen's craft had better facilities at the Victoria Pier and the Sallyport adjoining. The Grand Stand on the edge esplanade near Southsea Castle realised handsomely for the funds of that public promenade. From its seats all who invested 10s. had an unbroken view of the entire sweep of water from the Nab light-vessel, where the easternmost pivot-ships were stationed, down to Lowes, where the westernmost were moored, and the vista down the avenue of masts was one of the most magnificent the gaze can dwell on. The railway companies (South-Western and South Coast) made admirable preparations to regulate the easy distribution of the pressure from within on arrival down, and the same to facilitate the return up the two lines having separate places of egress and ingress, instead of the joint one in common. Superintendent Mountain, at Portsmouth, and Stevens, at Gosport, and those at the principal junctions leading into the great trunks of those railways, were indefatigable in their respective provinces

SOUTHSEA CASTLE, TOWARDS PORTSMOUTH.

THE GRAND NAVAL REVIEW.—EXCURSIONISTS GOING TO VIEW THE FLEET.—SCENE ON THE "HARD."

## TOWN AND TABLE TALK ON LITERATURE, ART, &c.

THE Naval Review, with its unprecedented attractions, had no effect whatever in diminishing the attendance (and that of the best kind) at the private view on Wednesday of the pictures and museum (shall we call it?) of the late Mr. Rogers. We do not remember to have seen in the always well-frequented room of Messrs. Christie and Manson a better gathering of all classes of intellectual men than we saw assembled there on Wednesday last. Peers and commoners—

Chiefs out of war, and statesmen out of place—

met together on Wednesday, catalogue in hand, each to mark his "lot," and discuss the character of the collection. Mr. Christie has had nothing so good in his great room since Sir Simon Clarke's sale. The general impression seems to be, that while certain pictures suffer apparently by their *new setting*, others, again, have gained in an equal proportion by the light in which they are now seen. That magical picture, the "Puck," requires—so it is said by the knowing in the craft—a little "judicious" cleaning. Others again, not less knowing, tremble at the word "cleaning" even with its accompaniment of "judicious." Dealers and cleaners stand before the "Puck" with a desperate longing to be into it and over it. They have no such feeling before the "Strawberry Girl" of the same great painter. *That*, all agree (dealer, cleaner, artist, amateur, virtuoso, and critic), does not want touching. The sale will realize (thanks to our American brethren for that word) £40,000. Was ever pout so rich before? What other poet left in pictures and plate so much behind him?

The vote for the expenses of the British Museum was not allowed to pass without a few sharp words, and those in some degree to the point Thus Mr. Monckton Milnes let fire on the new appointment, Mr. Panizzi He praised Mr. Panizzi (as who does not?), but regretted, in common with many, that the selection for the vacant place of *chief* of the Museum had fallen on a foreigner. The Speaker vindicated the selection. A Lefevre, of course, would like to naturalise a fellow-refugee. There was much good sense in what the Speaker said; but Englishmen regret that he sought to fortify his position by quoting the alien testimony of Mr. W. R. Hamilton, a gentleman, unfortunately, too much mixed up already with a living foreign impostor. To Mr. Hamilton we were indebted for Mr. Pistrucci, to Mr. Hamilton we in part owe Mr. Panizzi. When will Mr. Hamilton take a fancy to Picco?

Authors are laughing at a passage in the speech on Monday last of Mr. Disraeli respecting the Library of the British Museum. Mr. Disraeli, once an author by profession, and the son of an old frequenter of the Museum, described the Library of the Museum as inferior in volumes and value to the libraries of many petty states in Germany! Mr. Panizzi will tell a very different story to Mr. Disraeli. May we not, then, exclaim with Tom Moore and Tom Cribb -

By the fist of thy father, I blush for thee, Ben.

One of the literary curiosities of the week (and a very curious thing it is, indeed) is the reply or remonstrance of the Aldermen of the city of London to the bill before Parliament for the amendment of the laws relating to the City. It is written in a very poetical mood, with a touch in it of the King Cambyses vein. Who can have written it? Has the office of City poet been revived for its production? We are told by the corporate twenty-six that "praise undeserved is satire in disguise;" that Bristol during the Reform riots was "laid in ashes by a lawless mob." Was it laid in ashes? That the same fair city of the west suffered "from the cold shadow of a close corporation." We are then referred to "the foot of ambition's ladder." Is not that fine, Mr. Bennoch? Then we are told that the twenty-six gentlemen in chains and fur will rather part with "the apple of their eye" than with their Wards of Cripplegate Within and Cripplegate Without. "Decent hospitality," we are assured, can only be maintained—cast of Temple-bar—in the Guildhall and the Mansion-house; and then comes that close copying of a fine poem by Edmund Waller: itil is bard, the twenty-six exclaim, that their destruction should be brought about by friends for whom they had done so much—"the arrow that flies by day they fall is sped by the feather from their own pinion." Are we not poetical? Like one of their own City swans, the Corporation is to die singing.

The new number of the *Quarterly* contains a capital article on Southey, in continuation of a paper in the same review by its late editor, Mr. Lockhart. The writer has put some portions of Southey's life and labours in their true light, and concludes his paper by a vindication of the manly dealings of the late Mr. Murray in his whole intercourse with Southey. This vindication was called for, it is said, by some unguarded and unjustifiable expressions made by Southey in a letter written in heat and haste, and never meant for publication.

To any one in any way conversant with the history of English literature during the last fifty years any vindication of the elder Murray from a charge so contrary to his nature and practice as that of want of liberality in his dealings with authors must of course be needless. Southey was apt to be suspicious; and, worse still, was too prone to express those suspicions in writing to his friends. If such accusations as Southey has made were ever to be printed, it is as well that they should appear while men are alive who are able to refute them, as they are here refuted; but the character of the elder Murray, as seen in the printed Lives of Byron, Scott, Crabbe, Campbell, and Moore, does not call for any defence, illiberality was not John Murray's weakness.

Lord Stanhope and Mr. Cardwell have given us a taste, in a few printed lines, of the forthcoming memoir of the late Sir Robert Peel:—

I am not writing a History (Sir Robert writes): this Memoir partakes more of the character of a personal narrative. The motive for writing it is the hope of rescuing hereafter my memory from unjust imputations when I shall have no other means of repelling them than by such an appeal as this to the original documents that are the contemporary and faithful record, not only of the conduct, but of the inmost thoughts of public men.

Ruskin for his artistic heresies and other offences is skinned and salted in the recently-published numbers of the *Quarterly* and *Edinburgh Review*. The article in the *Quarterly* (it is the better of the two) is attributed (we believe correctly) to Sir Charles and Lady Eastlake.

NEAPOLITAN COURT POLITICS.—The grand fête in honour of the birth of an heir to the Imperial throne of France took place at the French Legation on Monday evening. The great feature of the fete was the presence of his Majesty, who, notwithstanding the predictions of the many, came in grand state. His Majesty retires as much as he can from the world, and had refused some short time since an invitation to Sir William Temple's, but the political situation is somewhat changed during this interval, and it is the policy of the King now to conciliate the French Court. The Royal cortège consisted of nine carriages, each of which was preceded and flanked by pages, and surrounded by a body of Guardia Nobile. On arriving, at about half-past ten o'clock, at the French Legation, which was brilliantly illuminated and guarded by cavalry and infantry, M. le Baron Brenier and the Cardwell knew from us a taste, in a few printed lines, of the forthcoming memoir of the late Sir Robert Peel:—

I am not writing a History (Sir Robert writes): this Memoir partakes more of the character of a personal narrative. The motive for writing it is the hope of rescuing hereafter my memory from unjust imputations when I shall have no other means of repelling them than by such an appeal as this to the original documents that are the contemporary and faithful record, not only of the conduct, but of the inmost thoughts of public men.

Ruskin for his artistic heresies and other offences is skinned and salted in the recently-published numbers of the *Quarterly* and *Edinburgh Review*. The article in the *Quarterly* (it is the better of the two) is attributed (we believe correctly) to Sir Charles and Lady Eastlake.

## NEW BOOKS, &c.

THE LATE SIR ROBERT PEEL.
Just published, in two vols. 8vo, price 28s. cloth,
THE POLITICAL LIFE of SIR R. PEEL.
By THOMAS DOUBLEDAY, Author of the "Financial History of England," "The True Law of Population," &c.
"Let all readers, before they take in hand the personal memoirs of Sir Robert Peel, peruse these volumes of Mr. Doubleday's, for they are the statesman's character and public acts are sea yed in the spirit neither of a detractor nor of a panegyrist. This biography is a work of great merit, conscientiously prepared, plain, clear, and practically interesting."—Leader.
"The work possesses a good deal of interest. The reader is enabled to retrace the leading events of the latter part of Sir Peel's career. The author is calm, shrewd, honest, and generally sound in his opinions and judgments."—Spectator.
"The book is the work of an impartial writer. The politician will make it a text-book, the biographer his model."—Weekly Dispatch
London: SMITH, ELDER, and Co., 65, Cornhill.

Just published in two volumes crown 8vo, price 18s., cloth,
THE EUROPEAN REVOLUTIONS of 1848.
By EDWARD CAYLEY.
"A graphic compilation, and a popular narrative of by far the most interesting series of events that have occurred in our time, of which no collective record can anywhere else be found which is at once so readable and so reachable as that now supplied by Mr. Cayley."—Daily News
"Two instructive volumes. The work deserves credit not less for the labour and care bestowed upon its compilation than for the fairness and impartiality with which the facts are stated."—Observer.
London: SMITH, ELDER, and Co., 65, Cornhill.

NEW NOVEL BY THE AUTHOR OF "LENA," &c.
Now ready at all the Libraries,
BEYMINSTER. By the Author of "Lena," "King's Cope," &c.
"We have still some good novel-writers left, and among them is the Author of 'Beyminster.' This novel reminds us in many respects of Madame D'Arblay's 'Cecilia,' in the felicitous delineation of character, the discrimination of motive, and the skilful management of the dialogues. The conduct of the story is excellent and the subordinate parts are so finely sunk in an air of nature and life breathes through the whole. It is a work of unusual merit."—Saturday Review.
"There are admirable points in this novel, and great breadth of humour in the comic scenes. 'Beyminster' is beyond all comparison the best work yet by the author."—Sun.
"There is not a dull page in the book."—Globe.
London: SMITH, ELDER, and Co., 65, Cornhill.

Just published,
MAURICE ELVINGTON; or, One Out of Suits with Fortune. An Autobiography. Edited by WILFRID EAST. 3 vols.
"A very powerfully wrought story. Passion, pathos, and tragedy are handled with artistic skill; and in its development the reader is content be too warmly cajoled, nor too literally recommended."—Weekly Dispatch.
"A story of English life in a variety of phases, which can scarcely fail to interest the English reader."—Examiner
London: SMITH, ELDER, and Co., 65, Cornhill

Just published, price 2s. 6d. each 16mo. cloth, gilt lettered.
Entirely New Editions.
MARIA EDGEWORTH'S "FRANK," collected from the Early Lessons. With Two Steel Plates and Vignette. 16mo. 2s. 6d.

JOHN CASSELL and the EDUCATION of the PEOPLE.
It is very evident that the House of Commons cannot agree as to the principle upon which a system of State education should be based, neither has it been decided whether it is considered with the institution of a free country for the State to undertake any measure of education, especially by compulsory measures; and, until further, it has been shown that the plans proposed all tend to the same end, or the most efficient. It has, however, been pretty correctly estimated that to carry out the resolutions proposed by Lord John Russell would entail upon the people a rating at least equal to that of the poor-rate and county-rate, the annual amount being 4,000,000 per annum. And, after all, the success of the proposed scheme is in the hands of those who are most opposed to it—the Anglican clergy, namely. But while the question of State education remains thus unsettled, the cause of Education itself is advancing. John Cassell, without soliciting the aid of Government or even the voluntary contributions of the benevolent, possesses a plan whereby within the reach of the humblest individuals, and those whose education has been neglected, the means of self-instruction and self-culture. To enable him to still commence the task, in Weekly Numbers 1½d. each, of an entirely New Educational Work, under the title of JOHN CASSELL'S EDUCATIONAL GUIDE. No. 1 to be ready shortly. May 15. The plan which John Cassell has marked out includes—1st, the production of an Educational Course unparalleled for volume, shape, and Weekly Number to contain 32 pages demy octavo; 2nd, the publication of such separate and distinct works as the Course comprises works at the conclusion of the course—persons of limited incomes will find the whole, for a few shillings, subscribed by 1d. weekly, to possess a solid Educational Library; 3, the rendering of education attractive. The first Monthly Part, which will be ready May 31, price 7d., will create in all who purchase and study its pages both surprise and pleasure—surprise at the great progress of self-education by one day's study—pleasure at the ease with which short and plain lessons, at 1d. a week, have been laid before them; and all will know how easy it is to obtain useful knowledge by one hour's daily application. The whole will commence with the first Monthly Part of "John Cassell's Educational Course" as a specimen. The Work will no doubt be received with favour by all classes of the community, and its study will greatly prove highly advantageous. John Cassell's Educational Courses can be ordered of any bookseller.—London: W. KENT and Co., 51 and 52, Paternoster-row

## NEW MUSIC, &c.

THE GRAND NAVAL REVIEW.—EXCURSIONISTS ON THE FLOATING-BRIDGE AT PORTSMOUTH.

A PIC-NIC IN THE BALTIC.—FROM A SKETCH BY [illegible]—SEE NEXT PAGE.

## PICNIC IN THE BALTIC.

A Picnic, sketched by Mr Carmichael, was proposed on board H.M.S. *Hannah*, when she was lying off Nargen, July 30, 1855. The First Lieutenant kindly allowed all the officers leave that could be spared [illegible] landed at ten a.m., and walked four miles inland to a Russian village. Mr Carmichael here gave a Russian girl (the belle of the island, some money to let him sketch her; but he had no sooner opened his sketch book and taken a look at her than she ran right out of the room, threw his money in his face, and ran off as if he had been a cannibal. Near the village they unpacked the provisions, and sat down comfortably and primitively to a most refreshing meal, seasoned by good spirits and all the frolic of a sea-side treat on shore.

## MR. FERGUSSON'S SYSTEM OF FORTIFICATIONS.

### THE DEFENCES OF PORTSMOUTH.*

FORTIFICATION is a difficult subject for civilians to make anything of; yet the public attention having been lately fixed upon operations of attack and defence, as illustrated at Sebastopol, Bomarsund, Sveaborg, Silistria, and other places, has prepared the way for some consideration of the subject even by the general class of readers. It is only about ten years ago, moreover, that some alarm was excited by the rumours of a possible intention on the part of a neighbouring State, now in close friendly alliance with us, to attempt a *coup de main* against Portsmouth; and the very idea of such a project being feasible led to the production of a great deal of war literature, in which emphatic reference was made to the insufficiency of our coast defences to guard against such attacks. In consequence of this movement, Parliament having voted funds for the purpose, works were commenced for the improvement of our defences at the mouths of the Thames and Medway; at Dover; on the Sussex coast; at Portsmouth and Gosport, Portland Harbour, Guernsey and Alderney, Devonport, Milford, and Liverpool; and though the progress made in all these undertakings has not been very marked and rapid, still they must be considered as entering definitively into our scheme of territorial defence. This was, as we all know, when we were content to look with complacency upon our "wooden walls," as our legitimate means of defence against foreign aggression, and with that glorious sight of our fleet, unexampled in numbers and efficiency, now before us, we should for our own part be content to adhere to the same way of feeling, convinced that as long as we maintain so marked a superiority upon the sea, our sea-girt isle has nothing to fear from naval attack. Whilst other nations are reduced occasionally to defend their territories within their frontiers, it is our glorious privilege to meet our enemy beyond the gate; for such a thing as the siege of any place in this country by a foreign Power is, in our opinion, not to be thought of as in the category of possible contingencies. That, unexpectedly, in an unguarded moment and an unguarded quarter, a hostile descent might be suddenly made upon some part of our coasts, attended with all the destructive horrors which it is in the power of unbridled brute force to inflict, is physically quite possible, but, morally, how improbable! How fearful and prompt the retribution which would follow upon such a reckless outrage!

The question, however, is whether the works of fortification which it has been thought advisable to undertake at different points on our coast are judiciously designed and properly executed. The question is a very difficult one, involving a multitude of considerations which might divide the opinions of the most learned and experienced authorities in the art of fortification. It is a question the more difficult and involved inasmuch that the very art itself is one of growth, the result of successive experiences and experiments; and that the truth of its principles depends upon a combination of two opposite and repugnant principles, namely those of Attack and Defence respectively; in each of which, and particularly in the former, new and startling improvements are making every day. In a word, the art of war, so far as it is connected with the attack and defence of fortified positions, is in a transition state, and he who builds upon any basis that published and recognised authorities may afford him, will probably find, when it is too late, that he has built upon sand. It is only four hundred years since the invention of gunpowder occasioned a total change in the very elements of fortified defence; it is only two hundred years since Vauban perfected his famous bastion system, which he himself, in a notable example (at Ath), demolished in a thirteen days' siege. Since then, Coborn, Montalembert, and others have come to the rescue of the defence by the additions of certain new contrivances, amongst which that of casemating the batteries with the purpose of securing them from the effect of the enfilading fire, is the most important. Still, however, it seems to be established—all the experience of war tends to show it—that the defence is, by the very nature of things, in the inferior position; that the attack, supported with adequate material and resource, is a matter of certainty; inasmuch that, under the existing conditions of the art, it is only a question of time how long a place besieged may hold out against an enemy.

This is the state of the case at present; and this we believe, upon consideration of the principles of the art itself, must ever be the case; and we are prepared cheerfully to admit it. All that the art of fortification can do is to offer an obstacle against the assaults of a foe at a particular point, which may successfully keep him at bay till the assaulted party has time to call upon his resources to repulse and punish the assailant. If within its resources perfected by the art enables him to command, the attacked party has no resources to call upon either to raise the siege or create a sufficient diversion elsewhere, the contest is in its essential conditions against him, and must end to his disadvantage. On the other hand, a successful *coup de main* may be made against some weak exposed point on the frontier, by an unscrupulous and reckless marauder which will not at all effect the ultimate relative positions of the parties, except to the disadvantage of the aggressor. We could go at greater length into speculations of this sort, but our limits will not allow it. The above are wish to establish by them are—1. That works of fortification are comparatively unimportant as a defence against conquest and permanent occupation, where the nation has resources of men and arms at command to repel or intercept aggression. 2. That the most formidable works of fortification are vain and useless when there is not sufficient defensive vitality and power within them to resist the aggressive force without. Of the latter position, the whole experience in the Netherlands in the time of Louis XIV. affords striking illustration; and the recent case of Sebastopol is an equally signal example; for it is a positive fact that the latter place was evacuated at a time when the original works of defence—casemated forts, most imposing in appearance—had not even been attacked by the land forces of the Allies. A coat of mail may be impervious to sword and bullet, but what avails it if the man within it is dead, or has lost the use of his limbs?

We come now to say something of Mr. Fergueson, who, although a civilian, has devoted, from his earliest youth, a great deal of attention to the subject of fortification generally, and lately more especially to our coast defences at Portsmouth and the Isle of Wight.

Some of our readers may recollect seeing in one of the galleries of the Great Exhibition in Hyde-park a large model of a fortress constructed upon rather a novel principle, circular in form, and with three successive tiers of ramparts, one above the other, all bristling with cannon. This was an illustration of Mr. Fergusson's new system of fortification; and although the military authorities have, with one or two exceptions, violently opposed its principle, the model itself is still to be seen in the Museum of the United Service Institution in Scotland-yard.

Mr. Fergusson sets out with the conviction that the old systems of fortification are radically fallacious. In the model of a long series constructed experiments he says:—"I invented or tested at least fifty different bastion systems, some more, some less extensive, and it was not till I had exhausted almost every conceivable arrangement, that I became convinced that no existing or invented or extended or refining lines would ever make a good system; and I was forced, one by one, and step by step, to abandon expedient after expedient, till I had reduced fortification to its simplest expression—that 'defence is offence'—and found out that *it was by guns, and not by walls*, that places could be rendered secure; with the corollary of this—that earthworks are better adapted for manœuvring guns than masonry."

We wish at present simply to record Mr. Fergusson's views for the consideration of all who take interest in the subject, without stopping to discuss the points at issue. We, therefore, proceed to see how the general principles he has just propounded are applied in the model fortification we have already mentioned.

The principle of Mr. Fergusson's system is to bring guns, not walls, against the besiegers. To this end, and rejecting all combinations of bastions and ravelins, with their endless details of tenailles, redoubts, places of arms, outworks, and retrenchments, he replaces them with a simple work of curvilinear outline adapted to the form of the ground, constructed as follows:—Digging a deep ditch round the site of the intended work, he procures earth enough to form a mound running round within the said ditch to a height of from 60 to 80 feet. This mound he fashions into four tiers of ramparts—the first on the level of the country, the others rising sixteen feet one above the other. It is calculated that a Fergusson fort, built upon this principle, can bring nearly 100 guns to bear on any point at a distance of 600 yards, if the embrasures are cut to allow a gun to traverse 20 degrees each way. It is claimed as a distinct advantage of the system that it is free from enfilade; but this is flatly disputed by its opponents, who insist that not only is it peculiarly "open to a destructive enfilading and ricochet fire, but that from the magnitude of the mark this fire may be maintained as efficiently by night as by day, while the enfilading batteries would be perfectly protected by thick épaulements from the fire of the fort."

Another objection to the system is, that it would leave the besiegers free from sorties, enabling them undisturbed to carry on their approaches to the very edge of the ditch; but upon this point we may observe that we think that the necessary openings for making sorties might, possibly, be hereafter supplied. A last and stronger objection is that, from the nature of the works and the materials of which it would be composed, it would be peculiarly subject to successful attack by enfilade. Whatever its strategical merits, a very important recommendation of the Fergusson fort would be its cheapness—being estimated, guns and all, at little more than a fourth of an ordinary work in masonry.

We come now particularly to consider the fortifications of Portsmouth and the Isle of Wight; the objections which Mr. Fergusson urges against them, and how he proposes to apply his own system to those places. The land defences of Portsmouth "consist of three separate and distinct lines of fortification—the oldest being those of Portsmouth, the trace of which belongs to the age of Charles II. and William III., though somewhat improved since their days; those of Portsea are of the time of George III., and very far superior both in trace and profile; while those of Gosport are little better than fieldworks, consisting merely of an earthern rampart, unrevetted, and without outworks; the only defence against an attack *de vive force* being a shallow cunette of very miserable dimensions."

Passing over, for the present, the details of the few external defences, we follow Mr. Fergusson in a speculation upon the possibility of a hostile steam squadron forcing its way into Portsmouth harbour. He admits that the thing would not be feasible with sailing ships, owing to their requiring a leading wind; but proceeds:—

But it could be attempted by screw line-of-battle ships; and, if I am not very much mistaken, with every prospect of success. The French now possess four such ships—the *Napoleon*, the *Charlemagne*, the *Austeritz*, and the *Jean Bart*, and are understood to be building others. These vessels carry from 90 to 100 guns of the heaviest [illegible] and though the speed of the *Napoleon* is probably not so great as [illegible]—thirteen or fourteen knots an hour—they are all equal to at least ten knots an hour in smooth water, and with a flood tide in the springs, both of which they would easily command.

At the rate of speed, about ten minutes would elapse from the time they first came within effective range of the guns of Southsea Castle till they were safely past all danger, and anchored within the harbour.

Portsmouth taken in ten minutes, by four French sail of the line! A very pleasant prospect truly; which he enforces still further, by the quotation from General Lewis's "Aids Memoire," of a dogma about ships and batteries, to this effect, that,—

No battery or batteries, however strong, can stop or prevent any ship of war or steamer from entering a harbour when the navigation is free, and the course nearly direct, if she chooses her time.

Upon this position Mr. Fergusson has been very ably met by a writer in the *Edinburgh Review*, for October, 1853, in a passage which we have great satisfaction in quoting. After referring to General Lewis's general assertion of opinion, the writer states:—

We must beg to inform Mr Fergusson that this opinion is very far from supporting his argument, inasmuch as the navigation into Portsmouth harbour is not free, the course is not nearly direct, and she can not choose her time. Although steam is the line of navy for all sorts of steam, pass in or out with their lower-deck guns on board, they can only do so at high water, spring tides; and, in these days of peace, when the ramparts are manned only with a crowd of admiring friends, a ship not of great draught and almost circumspection are required to conduct a heavy ship in safety through the intricate and dangerous channel leading from Spithead into the harbour; even with frigates the period for passing is very limited, and the passage never attempted till the stream of tide has slackened.

If such be the case under favourable circumstances, it is evident that the difficulties must be multiplied many fold were the passage to be attempted during a heavy cannonade between the batteries and the ships: when, even if the pilot could see his way through the clouds of smoke, the helmsman could scarcely comprehend his orders or signs. Let us, however, suppose that the adventurous enemy has reached the commencement of the channel, between the buoys of the Spit and the Boyne: he is then less than a mile from the anchorage at Spithead, about 10,000 yards from the angle of the King's Bastion, and half that distance from Southsea Castle, towards which his bows are directed, until, having rounded the end of the Spit, his course is pretty direct to the harbour's mouth. On arriving within 600 yards of the King's Bastion, and 1300 yards from Blockhouse Fort, which is right ahead, he enters the narrowest part of the channel, now marked by buoys, which assuredly would not be left there to guide a foe, while the leading marks would almost certainly be obscured by smoke. The width of this part is not 300 yards, and if some of the leading ships did not here take the ground, they would be fortunate indeed. But let them pass through that difficulty, and, notwithstanding that they have followed the singular recommendation of Mr. Fergusson, and have "coiled their hemp cables on their bows, and stowed them in the bannocks;" further, suppose that they have not caught fire, and approach the mouth of the harbour. Will they find it a haven of refuge after the perils of the passage, or will they not rather find guns, ships and bookships laid across ready to pour in a storm of shot as one by one they opened that narrow entrance, such as no ships in the world could withstand? They who witnessed the tremendous effect of the concussion shells this summer upon the *York* hulk, will be disposed to think that, instead of our sinking ships to prevent the entrance of an enemy, it would be the sunken foe that would cause an obstruction to ourselves in the mouth of Portsmouth harbour.

Mr. Fergusson, in his last-published pamphlet "Portsmouth Protected; a Sequel to the Peril of Portsmouth," discusses at great length the strategical features of the approaches to this important arsenal, and the existing and contemplated works of defence, which he sweepingly condemns as useless, and, in some instances, worse than useless. In asserting these views he has to contest the ground with several professional men of high authority, including Sir John Burgoyne and a certain "Captain, R.E.," who has published his observations in the columns of a morning paper. Of the general bearings of the case Mr. Fergusson writes as follows:—

If any one will take a map of the Isle of Wight, he will easily be able to understand the value of the position and the relative strategical importance of the two entrances to the Solent. That by the Needles passage is narrow and intricate; that by Spithead wide and easy of access in all weathers, but so broad that it is almost impossible to defend or close it by any conceivable amount of fortification. I know that engineers have been consulted about erecting in the deep water masonry forts like those at Cronstadt; but the enormous expense of such a project has deterred its realisation, and if this war continues it will never be attempted, for it is seen how easily these gigantic works will crumble before our fire whenever fairly attacked. If we must waste a million upon it therefore, as Government and the public are not doing nothing, it will cost us less to try the experiment at Cronstadt than at Spithead.

If there is a fleet at Spithead sufficiently strong to compete with the invader, no fortification is required; if there is no fleet, or one not sufficiently strong, the works at the Needles passage will avail nothing, for no enemy would proceed through a narrow and intricate passage, by which retreat must at all times be dangerous and difficult, while a deep and wide channel is open both for manœuvre and retreat. An army might feel more secure by having its rear protected; but ships and fleets have no rear or front, and it is quite immaterial to them on which side they are attacked. Either, then, it is that an enormous sum of money is about to be spent in fortifying Spithead (as the "Captain, R.E." seems to intimate), or the fortifications at the Needles are useless. But, if the money is spent at Spithead, the tables are turned on these forts at the Needles passage, which must be doubled or quadrupled in extent, or the million spent at the other end is wasted; and, if these should then become the strongest, more money must be spent at Spithead, and so on.

This we see the plan of these Spithead forts it is impossible to reason on them; but we may be able to judge of their probable efficiency by the specimen of this great system of defence which is erected at the other end of the channel.

We will not follow Mr Fergusson in his minute criticisms of the various works by which the Solent passage is to be guarded, and which can only be fully appreciated by those practically acquainted with the subject, and with the peculiarities of the ground. In general the Government plan for improving the defences in this quarter will consist in the erection of a large fort called Victoria Fort on Scance Point; and three principal works, connected by small forts, forming a line of defence from Elson's Head to Stoke's Bay, which will run at a distance of about 2000 yards in front of the Dockyard. Mr. Fergusson examines these works in detail, and condemns them utterly, as well as the system upon which they depend. He says:—

We have thus three systems of coast batteries erected within a very short distance of either time or space from one another:—at Stoke Bay, earthworks, without embrasures; at Southsea and Gilkicker, earthworks, with all the guns in deep embrasures, neither having any defence against assault in front; on the Salting Barrack, masonry, and all the guns *en barbette*. As the guns and carriages are the same in all instances, and the purpose of all the same, all three systems cannot be correct, if indeed any of them are; and all three differ entirely from those at the other end of the Solent, which form two or three more systems—one a close casemated tower in three tiers, the other a compound of casemated and open batteries, with land defences and other expedients fully described above.

And again:—

In every work described above we have had to point out that great pains have been bestowed in strengthening those points where an assault was either impracticable or least likely to take place, but that the really vulnerable points had at the same time been left wholly, or at least partially, unprotected. Unfortunately, this system extends beyond individual works to a whole system of defence, and is being carried out at Portsmouth, so as to neutralise any advantage, however small, that might accrue from the erection of these defences.

If these were mere isolated errors, perhaps some excuse might be found for some of them, and we might hope that better things might possibly be done elsewhere. But it is evident that they are part of a system which pervades the whole; at least, I know for certain that what has recently been done at Plymouth is worse than anything that has been done at Portsmouth. There is no efficient protection against ships entering the harbour, and no defence whatever to prevent an enemy destroying the dockyard from the very point he would naturally choose for that purpose.

I cannot from personal knowledge speak of what has been done at Sheerness or Milford Haven: but, from what can be gathered, the works there are not at all designed as elsewhere; and I know that nothing can be worse than the recent constructions at Liverpool.

For ourselves we confess that the result of a very careful perusal of Mr. Fergusson's strictures would be to induce us to suspend judgment upon them. The "Captain, R.E." goes further, and declares that his "method of criticising each battery individually, without taking the others into account, is no preposterous idea;" (Captain, R.E.) can scarcely believe that he writes according to his own convictions."

Applying his own system to the defence of Portsmouth, Mr. Fergusson proposes to form a line of defence from Frater point on the harbour to Somers' Ponds, on the western extreme of Stoke's Bay. From the front of this line the dockyard would be 4600 yards distant, far beyond the range of shot or shell. The ground is open, and much of it marshy, a ditch, 200 feet wide, with 15 feet water in it, and a covered way in front would afford earth for the ramparts. The line selected being three miles long, there would in four tiers be twelve miles of rampart, capable, if fully armed, of mounting 3000 guns, and in any case certainly able to bring three guns to bear for one of the enemy's. A return on the right to prevent an enemy from turning the works on that flank, and a military canal from the left to Fort Monkton, to prevent a landing in Stoke's Bay, comprises the general outline of Mr. Fergusson's scheme in this part. There are some other works proposed in connection with it on Portsea Island and at Porchester Castle.

But the most important point in this discussion is the one which he ultimately arrives at, and in which we sincerely believe he is right—namely, that, "even with the very best engineering, it is very questionable if this passage could be closed against an invading squadron; if for no other, at least for one simple reason—that the channel is so deep and straight that vessels can easily pass in during the dark, as merchant vessels do every day." If this be true we then necessarily revert to our "wooden walls" as, we stated at the outset, we look upon as our legitimate and all-sufficient defences. When we say "wooden walls," however, we should, perhaps, more properly say "iron walls," for the floating batteries by which our coasts are to be defended should at least be coated with iron some four or five inches thick. Upon this point we quote, by way of conclusion, a passage which is well worthy the attention of all who take pride and interest in the future of our glorious fleet:

I do not know how long it may be before the veterans of Whitehall realise this idea (says Mr. Fergusson), but there is nothing much more certain than that all fighting ships must don the coat of mail. Unless they do we shall find their finest vessels crushed by fortress-looking barges which they despise. But this mail is more important as regards forts than ships. A fleet of floating batteries, such as now exist on both sides of the Channel, could not only pass the forts we have been describing, but could, with their ports closed, steam into Portsmouth harbour without the possibility of our hurting them by such batteries as we possess. They could enter the Medway, or even come up the Thames to London, and we have not a shadow of means of preventing them; nor does the contingency seem to have dawned on either our engineers or our sailors, yet it would, I suspect, puzzle them to say how they would prevent it. So far as can at present be seen, it is only by iron-clad ships that such intruders can be met, and the sooner we set about providing them the better; and in the mean while every shilling spent in building wooden men-of-war is a mere waste of public money. At all events it is tolerably clear that, as the forts we have been describing would hardly stop wooden vessels, they would have no chance against those iron ones which already exist, and are, therefore, worse than useless, in consequence of the money of the country being withdrawn from the best-trained and most indispensable soldiers of the army.

We now take leave of Mr. Fergusson for the present. We have fairly stated the general features of the dispute between this self elected surveyor of fortifications and ordnance and the authorities of Woolwich, and we can only repeat that we should profit from a full and dispassionate consideration of the subject. If it be true that danger threatens our coasts, there is no use in shutting our eyes to the unwelcome fact; if error prevails in the system upon which it is proposed to protect our shores, it is better to discover it now, when the country is at peace with all the world, than at some future moment when war may be imminent.

THEATRICALS IN THE CRIMEA.—(*From a Correspondent.*)—Fusilier Theatre—Light Division. This Evening, Thursday, April 4th, will be performed "Anything for a Change." A Petite Comedy. *Mr. Paul Hornbuff*, Mr. Shaughy, Royal Fusiliers; *Mrs. Snooppington* (his Friend), Mr. Rorke; *Mr Jeremy Cornish*, Mr. Hammer; *Mrs. Honeyhall*, Mr. Kerr. *Margaret* (a Sister-in-law), Mr. Cole; *Eliza* (a servant), Mr. Tobin, Royal Welsh Fusiliers. To conclude with "Box and Cox." *John Box* (a Journeyman Printer), Mr. Bell, Royal Welsh Fusiliers; *James Cox* (a journeyman Hatter), Lord R. B. Browne, Royal Fusiliers; *Mrs. Bouncer* (a Lodging-house Keeper), Mr. Tobin, Royal Welsh Fusiliers. Doors open at Eight o'clock. Performance to commence at half-past precisely. God Save the Queen. The above piece was played for the first time in the Fusilier Theatre, on the 4th, and, notwithstanding the disconfort of a heavy snowstorm, there was a very crowded audience of the élite belonging to the Light Division. Mr. Charles Mathews' character of *Snoppington* was performed by Mr Ricketts; whilst Major Bell and Lord R. Browne kept the audience in roars during the performance. "Box and Cox" a benefit for the sufferers by the late fire at Covent-garden Theatre will shortly take place, and we believe a large number of tickets are already sold to some of our heroes, who are pardie, to a mixture of charity and amusement at the same time.

WHOLESALE POISONING IN AUSTRIA.—The tribunal of Pesth has been engaged since the 1st with the trial of a certain M. C. von B——s, a wholesale poisoner, who is a complete counterpart of the notorious Geschickter, of Bremen, to whom he is said to bear a striking likeness, and, like him, has chosen his victims almost exclusively among his relations. In the space of fifteen years, from 1830 to 1845, he has poisoned seven persons. His first victim, in 1830, was his sister-in-law, Mdlle. M. de K——; next, eight years afterwards, his wife; next, two of her brothers, and a femme de chambre. These crimes were not discovered until after his marriage with a most amiable woman, whose brother he also got rid of. A post-mortem examination of the last-named victim some months after his interment proved that the murderer had used arsenic to accomplish his purpose. C. von Bojanovics on being first charged with these crimes was free from arrest in his quality of a Hungarian noble, and he availed himself of this circumstance to leave Pesth, and he resided unmolested by the Hungarian authorities at Brohl, at Marz bal, and at Gratz. At the close of the Hungarian revolution, on hearing that the charge against him was to be followed up, he fled to Paris. He was there arrested on the demand of the Hungarian authorities, and arrived at Pesth in the autumn of 1854. Notwithstanding the evident proofs of his crimes the prisoner persists in denying his guilt

THE ROYAL MAIL CLIPPER "SCHOMBERG."

## THE WRECK OF THE ROYAL MAIL CLIPPER "SCHOMBERG"

The Melbourne papers received by last Australian mail contain full particulars of the wreck of this splendid ship, of the Black Ball Royal Mail line of clippers. The *Schomberg* sailed from Liverpool on the 6th Oct., and in the early part of the voyage met with light baffling winds, the Equator not being crossed until the 28th day after sailing, and a detention of ten days from calms marking the crossing of the Line. On Christmas-day she first made land at Cape Bridgwater, about one o'clock p m, wind blowing fresh from E S E, driving the ship fast to the north. During that night and the following day the wind continued from the same point, compelling her to tack frequently. On Wednesday, at twelve o'clock, noon, wind blowing fresh, being then about four miles off shore, she stood in again at six p.m., the wind blowing from the same quarter. About half past ten p m land was faintly visible, and the wind fell off to a dead calm. Shortly before eleven o'clock p m, the order was given to "bout ship," the ship partially coming round, and then refusing to answer the helm. It was then tried to wear ship, but a current running westward from three to four knots an hour—of which the captain was ignorant, and of which no mention is made in any existing chart rendered the attempts manœuvrable, and carried the ship into a sandspit about thirty-five miles west of Cape Otway, not laid down in any of the charts.

The captain immediately sent out a boat to ascertain where they could land the passengers, and began to get out the ship's boats. In the mean time all sail was taken in; and rockets and blue lights were let off, and guns fired, in case any sail might be in sight or hearing. The captain was still proceeding with arrangements for landing the passengers when smoke was seen in the distance. He then ordered Mr. Laurie, the second mate, to pick out the best crew on board and intercept the steamer. Captain Doran of the steamer *Queen*, had seen the blue lights, and stood out in the direction where he saw them, and immediately offered to take the whole of the passengers to Melbourne, although on her trip to Portland. He accordingly landed them all safely. Great praise is due to Captain Doran for his extreme kindness and attention to the passengers, and it is very much to the credit of the passengers, twenty in number, on board of his vessel that they willingly consented to go back to Melbourne when within a few miles of the termination of their voyage.

With reference to the performances of the vessel, it is said that she was overloaded, drawing over twenty five feet when she left Liverpool, and that the cargo was chiefly iron and plant for the Geelong railway. This will account for the slow rate of progress she made. It appears that the part of the coast on which the *Schomberg* was driven (about five miles east of the Gellibrand river) is the only spot in the neighbourhood free from sunken rocks, and had the catastrophe occurred on any other part of that coast the ship would have inevitably been broken up at once in which case there would, no doubt, have been considerable loss of life.

The arrival of the Overland Mail places us in possession of the decision arrived at by the officers appointed to hold an inquiry into the charges brought against Captain James Nicol Forbes and Mr. Saxby, the third mate, of the *Schomberg*, belonging to the Black Ball line of packets. The officers holding the inquiry were Lieutenant Pascoe, R.N. (Chairman), Captain Ferguson, and Lieutenant Crawford.

The case of Captain Forbes was first called on. The following was the wording of the information:—"For that he did, on or about the 26th day of December last, being at that time master of the British ship *Schomberg*, by neglect of duty as such master, omit to do certain acts; to wit, let go the anchor, such act, amongst others, being lawful and proper to be done by you in preserving the said ship *Schomberg* from immediate loss, contrary to the form of the statute in that case made and provided."

The evidence of the boatswain and Melville was the most important relating to the charge against Captain Forbes, inasmuch as they state most positively that two hours and a half had elapsed after the vessel struck before the anchors were let go; that the anchors were not ready for sea at the time, being lashed for sea in the forecastle, with no chain bent, and that had the anchors been cast when she missed stays the probability was that the vessel would not have been lost. The boatswain stated that he had seen the vessel on previous occasions miss stays, and was not surprised on the last occasion. This statement was contradicted by the other witnesses, and Captain Mathews who visited the ship shortly after she was ashore, and saw her position, stated as a practical man he would not have thrown the anchor over when the vessel was heading from the land. Where the vessel struck there were no rocks or breakers marked in the charts. Captain Forbes stated that the anchors could easily have been let go; and the reason why he did not order the chains to be bent previously was that it would not occupy more than four or five minutes. This was corroborated by the first officer and carpenter of the ship. The chief officer of the *Guiware*, which was passed by the *Schomberg* the day previously to her wreck, deposed to having seen the port anchor over the rail, and the starboard lying on the lee rail, not at all like as if they had been stowed for sea. Evidence was also given that the boatswain had received money from the passengers as a bribe for giving his evidence and had been promised a Government appointment in case the charge against Captain Forbes could be maintained. It is a matter of suspicion that, although summoned for appearance on the second day of the investigation, he failed in doing so. The proprietor of the British Hotel, where the "indignation meetings" were held, deposed to having seen the passengers subscribing money for the boatswain on several occasions.

After a lengthened investigation, Captain Forbes was committed or trial at the sessions on the charge, but admitted to bail on his own recognisance.

## GREEK AND CRIMEAN TOMBS.

*(From a Correspondent.)*

The Illustrated London News of the 8th December and 19th January contain Engravings representing the ancient buildings excavated by Colonel Munro near Balaclava, and the objects found therein. The writer of the description accompanying them apparently was ignorant of one of the modes adopted by the ancient Greeks in burying their dead in jars practised in Greece, Roumelia, Anatolia, Mytelene, the Ionian Islands, and many other places, or he would not have failed to perceive that the same custom extended to the Crimea, and that the remains found by Colonel Munro were merely those of an ancient burial-place.

The following is a description of tombs of the same kind excavated by myself on the plains of Troy and the Chersonesus of Thrace, and which may tend to remove the erroneous suppositions that the use of the large earthen jars discovered near Balaclava were for the purpose of making wine or keeping grain, or that of receiving the blood of victims sacrificed within the temple. The jars are of all sizes, ranging from about 2 feet 2 inches long by 1 foot 8 inches wide to 6 feet long by 4 feet 7 inches wide, and constructed of coarse red clay, intermixed with gravel. Many of them appear to have been cracked in baking, and are mended with leaden rivets. They are all placed in a horizontal position, sometimes within an excavation made in the rock. A flat micaceous stone covers the mouth, which invariably faces the south or south-east. The unburnt skeletons are found lying on their backs with upraised knees, surrounded by terra-cotta pentates and vases (lecythi and patereæ), many of which are of the best period of the art; also, blue, green, and yellow glass vases, and other small objects. (Vide Sketch.)

Amphoræ are sometimes found within the larger jar, and sometimes without, containing the skeletons of children, accompanied by vases of smaller dimensions. Scarcely one in fifty of the large jars are found in a perfect state; in most cases a small portion only of the lower part remains, the upper being destroyed by the plough, the displacement of the surface soil, or other causes; and those discovered by Colonel Munro appear to have suffered in like manner.

The largest and most perfect jar was found near the site of ancient Dardanus in an extraordinary manner. Some beehunters in search of honey traced a bee to a hole in the ground; they were surprised on digging to find the jar, and the interior of it filled with honeycombs. They removed their prize, but overlooked some vases which I was so fortunate as to discover buried in a little earth which had insinuated itself into the tomb. An idea of the size of the jar may be formed from the fact that, when emptied, six persons entered it together, and it contained them all in a sitting posture.

The slabs mentioned by your Correspondent are evidently those used by the ancients for placing and preparing the bodies preparatory to interment.

Antique Art and Modern Manufacture.—Our readers will, doubtless recollect that in the Illustrated London News for Feb. 16 appeared two engravings of a remarkably elegant vase recently found by the Count of Syracuse, in his excavations at Cumæ, and minutely described in our Correspondent's accompanying communication. We are gratified to learn that Messrs. Alcock, of the Hill Pottery, Burslem, have just had modelled a fac-simile of this very beautiful work of ceramic art. Their object in "publishing" this vase is to second our exertions in placing before the public such representations of antique manufacture as cannot fail to be highly interesting to all who take delight in viewing the productions of former ages in their relation to the arts manufactures of the present day. We should add that some few of the fragments of the original vase which appear to have been lost in the tomb at Cumæ have been supplied by Messrs. Alcock's artist with due regard to the artistic character of the other portions of the vase, in which he has succeeded in reproducing the delicate minuteness and grace which distinguish the original.

## "THE ONLY SON OF HIS MOTHER, AND SHE WAS A WIDOW."

Draw up the blind.
Let me look out for awhile—
Let me see the day's first smile.
I am calm in my mind.
I know to day I can bear
To see the world look fair,
Though I sit in my empty home.
—Peace is come!

Peace is come—Peace! At last
I think that I hold it fast—
I can feel it;—I hear, I see
This shining angel of Fate.
Oh! long did I wait for thee;
Wearily, yearningly, did I wait;
But another angel came to me—
Thou art come—too late!

Oh! the coming time—how glad,
how bright!
Mothers, sisters, wives,
Will you know again your lives,
Shining in this new light?
I am crying for joy with you,—
These are not tears of pain,
I am crying for joy—for joy.

Oh, mothers! your joy is real and true.
They will come home—they are coming home.
But not my boy—not my boy.
My boy I shall not see again
Though Peace is come.

Let the tears fall.
Poor home! it was very fair,
Very dear to me, before
I knew it would see him no more.
Here is his place—his chair—
I can see now, the look he wore
Last time that he sat near there,
Bending his head at the door—
For my boy was so tall.

Hush!—I said I would not grieve,
I said I would be content to live
Even till God shall call me home.
For I have a home other where,
And my boy will greet me there—
In the real home—the blessed home,
So to me Peace will come.

M. J. J.

Russian Diplomatic Movements.—Count Chreptowitch, the Russian Envoy, has proceeded to St. Petersburg to assist, as some say, at a diplomatic conference, whereat the policy of Russia towards Western States is to be discussed and determined. Others believe that the object of the Count's journey is to s licit removal to a higher post. Countess Chreptowitch, who has no predilection for this place, and has not resided here more than two or three months, is above all anxious for this removal. M. de Grote has meantime been appointed to act as Chargé d'Affaires. The Russian colony, having well performed its mission of inoculating the press and aristocratic society with Russian sympathies, is gradually winging its way to more congenial Paris. They say that the country will, however, leave one of its female members here. Mdme. Bodrikoff, a widow, and daughter of a rich Armenian St. Petersburg banker, has accorded her small hand and large fortune to the Marquis d'Anche, head of the ancient but impoverished house of that name.—*Letter from Brussels.*

A Russian Naval Review.—Letters from St. Petersburg state that there will be a grand naval review off Cronstadt during the month of June, and that the Russian fleet will exercise by divisions in the Baltic Sea during the whole summer, as not a man of the fleet has been afloat since the commencement of the war. It is intended, they say, to get rid of all cranky vessels, and to pay more attention than formerly to efficiency than to numbers. Competition upon a most extensive scale, as regards steam traffic with Russian ports is already announced on all sides. France, Holland, and Belgium will enter the lists, in order to take advantage of the temporary dearth of Russian merchant craft.

## THE SEBASTOPOL SPRING MEETING.

We have been favoured by a Correspondent with the accompanying Sketch of the Sebastopol Spring Meeting, held on the 24th of March. The day was remarkably fine, and numbers of both officers and men of the Allied armies were present, and great crowds of Russians came down to the banks of the river to witness the sport. On a rising ground near to the winning post was a throne erected for General Pelissier, around which were planted evergreens. Numerous bands both of English and French enlivened the scene.

STEWARDS

Viscount Talbot, 1st Division Major Astley, Gr. Foot Guards.
2nd Major Dewar, 4th Regiment
3rd Major Brown, 14th Regiment
4th Lieut.-Col Campbell, 46th Regiment
Light Div.. Capt Chapman, 34th Regiment
Marquis de Salnois, 82nd Regiment
Bazeleve Div Col. Hale, 52nd Regiment
Cavalry: Mr Wilkin, 5th Hussars.
Artillery: Capt. Cunell R.A.
Engineers Major Nicholson, R E
Highland: Col Hay 93rd Highlanders
Head-quarters—Captain Poonoby, Grenadier Guards.
Honorary Secretary and Treasurer—Major Wombwell, 46th Regiment.

FIRST RACE

A handicap Sweepstakes of £1 each, half forfeit, with £25 added, for all ponies 14 hands and under. Half-a-mile on the flat.

SIXTH RACE.

A Hack Race—A Sweepstakes of £1 each, with £20 added, for all horses which have never started for any race where public money was added. Catch weights. Half a mile on the Flat Post Entrance.

# FLORENCE NIGHTINGALE.

THE POETRY BY FRANCIS BENNOCH, ESQ. THE MUSIC BY J. L. HATTON.

Maestoso.
With lof - ty song we love to cheer The hearts of dar - ing
men; Ap - plaud - ed thus, they glad - ly hear The trum - pet's call a - gain. But now we sing of
low - ly deeds De - vot - ed to the brave, Where she, who stems the wound that bleeds, A he - ro's life may
dol.
sosten.
save. And he - roes sav'd ex - ult - ing tell How well her voice they knew; How sor-row near it
ad lib.
colla voce.
could not dwell, But spread . . . its wings and flew.
dim.

II.

Neglected, dying in despair,
They lay till woman came
To soothe them with her gentle care.
And feed life's flick'ring flame.
When wounded sore, on fever's rack.
Or cast away as slain,
She call'd their flutt'ring spirits back,
And gave them strength again -
They might not see the smiling face,
Which suff'ring could dispel,
But they could turn and kiss the place
On which her sha - dow fell.

III.

When words of wrath profaning rung,
She mov'd with pitying grace;
Her presence still'd the wildest tongue,
And holy grew the place.
They knew that they were car'd for then,
Their eyes forgot their tears;
In dreamy sleep they lost their pain,
And thought of early years,—
Of early years, when life was fair,—
Of faces sweet and pale:
They woke—the angel bending there
Was Florence Night-in-gale!

THE PARTY ON THE GREY, HAVING INVITED SOME STRANGERS TO LUNCH, SHOWS THEM THE NEAREST WAY (BY HALF A MILE) TO HIS HOUSE.—DRAWN BY JOHN LEECH.

VERY POLITE.

## THE NATIONAL EDUCATIONAL SYSTEMS OF ENGLAND AND SCOTLAND.

*(From a Correspondent.)*

LONG ago it was said of Englishmen that they were unquestionably "bunglers" in the matter of education. And however unwilling we may feel to bow our heads in submission to this charge, the conviction of its truth is forced upon the mind by a candid examination of the educational results of the last century of England's existence. Since the time when Addison's polished pen pleaded the cause of educational progress much has been written; still more has been said; but little indeed has been accomplished. In the last Session of Parliament the projectors of no less than three separate systems of English national education after spending much precious public and private time, were compelled to withdraw their bills: while the Lord-Advocate of Scotland (who positively had refused professional advancement, so much did he set his heart upon successfully rearing the educational offspring of his official career) gained completely in pleasing the nation whose interests he studied. Nor could this "bungling" be said to arise from any lukewarmness or want of energy in the cause. Undaunted by the fate of previous efforts, we were promised that the next Session should be equally productive of candidates for public adoption. "The cry was still, They come."

Properly to appreciate the difficulties with which the promoters of any new educational system have to contend, it must be remembered that there exist scholastic establishments in England which, in Scotland partially, inadequate to supply the wants of the population; but still with some considerable claim upon our notice and regard. Thus in most parts of England we find schools supported in some instances by Government aid, but in the beginning founded by private munificence and benevolence. There are in our towns National Schools, where children of both sexes are educated and partially clothed. These are the pupils at whom Pope sneered not unjustly as "the boys and girls whom charity maintains" After them we come to others, supported entirely by individual benevolence—Infant and Sunday Schools, and many under the charge of the various Dissenting bodies of England. In Scotland are found the strictly national Parochial Schools, supported by the land, and under the supervision of the State Church, and those established by the Free Church and other Congregational bodies of that country. There, however, Sunday, and Infant, and what we understand as Charity Schools, are almost entirely unknown

The limits of these articles will forbid our attempting more than simply an inquiry into, and a description of, these various schools as they at present exist. We wish to take the patient reader as it were by the hand, and, leading him first into the schoolrooms of the land of Knox and Chalmers, noting there all that is worthy of imitation or deserving rebuke, then to enter the various schoolrooms of our own country, and inquire how the rising generation of the foremost nation in the world is cared for and tended.

And first let us inquire into the nature of the Scotch parochial schools. Indeed to these our chief attention will be directed, for the others are founded upon a similar system, and differ in little else than in being free from the supervision of the Presbyterian establishment. In England our schools range with the divisions of our social state We have high-class boarding and public schools, middle-class grammar schools, small tradesmen's, and, lastly, charity schools; but, except in the large towns of Scotland, one class of school alone exists for the young of either sex. In the most conservative nation in the world—and few, we think, will deny the merit or demerit of this distinction to Scotland—may be seen, side by side, learning the rudiments of knowledge from the same book, the broadcloth-clad son of the professional man and the barefooted village "gillie," the delicate girl of the upper classes, and the rough healthy village lassie. To this one spring of knowledge all come alike to drink—high and low, rich and poor. The schoolmaster and the schoolhouse are as much national institutions in Scotland as the minister and the kirk.

By some very old legislative enactments, amended by a statute passed in the year 1803, it was enacted that in every parish the heritors (that is the landed proprietors whose assessed rental amounted to £100 Scotch) should erect a schoolhouse and residence for the master, containing not more than two rooms—a maximum clearly accidental, and which has not been taken advantage of. The salary of the schoolmaster was also ordered to be fixed prospectively at intervals of twenty-five years, the average price of grain for the last term of years being taken into consideration in its calculation. The right of appeal, by petition, to the quarter sessions of the shire was also given to any schoolmaster having reason to be dissatisfied with the accommodation provided by the heritors. Within four months of the decease of any parochial schoolmaster, the heritors, assisted by the minister of the parish, are bound to nominate his successor, who has then to appear before the Presbytery of the Bounds, as it is termed, and undergo an examination on those branches of knowledge which the heritors deem necessary to be taught in their school. As a general rule the required branches are English in all its departments—arithmetic, geography, mathematics, geometry, Latin, Greek, and French. This forms a high standard, but it must be remembered that almost every candidate has passed some time at a University; many, indeed, have undergone a complete College training, and not a few are licentiates of the Church of Scotland. Thus it is seen that the same curious education qualifies him to guide his pupils amid the flowery paths of classic literature, has to bend his intellect to teach his poorer students the rudiments of a simple cottage education.

The applicants for these posts are invariably numerous, although the remuneration offered is grossly inadequate. Unfortunately, the Legislature affixed no minimum to the schoolmasters' salaries, derivable from the heritors, and they range from £15 to £34—in no instance exceeding, and generally falling far short of, the last-named sum. To this must be added certain fees, drawn from several parochial offices, which they almost universally, although not necessarily, hold. They are generally Session-clerks, and, under the new registration system, Registrars of Births, &c., for their districts. The remainder of their income is derived from the fees paid them by their pupils. These are fixed by the heritors at the schoolmaster's appointment, and are strictly adhered to. They vary in different places, but the charge generally for reading and writing is 2s. per term or quarter; including arithmetic, 3s., 4s. When Latin is taught, together with the other branches, an extra fee of 4s. or 5s. per quarter is added, and it is same is generally charged for algebra, Greek, and French. It is, however, calculated that the average income of the Scotch schoolmaster derived from all these sources does not amount to £50 per annum.

Need I let us inquire into the class of men who accept these situations, and properly to appreciate them we must know something of Scotch social life. The existence of a Scotchman is a perpetual struggle to mount higher on the ladder of life; and the young Scotchman resigns ambition himself he becomes ambitious for his children. They must distinguish themselves and him. In order to effect this an education of no ordinary class is necessary. This, we see, the parish school affords. No one is surprised or alarmed for the safety of society, if he chooses to give his son a sound classical education. No one wonders overmuch, or expresses any disapprobation, if he enters that son's name on the college lists of Edinburgh or Aberdeen; still less surprise is excited if the young aspirant enters one of the learned professions; and, toiling manfully against poverty and neglect, rears for himself a reputation and a name. Out of this class the Scotch scholastic ranks are almost entirely recruited. The proper exercise of tutorial duties requires patience, caution, and an intimate knowledge of the classes with which they are brought into such close communion—and these they naturally possess; it requires a keenness of intellect and a courage of temper which is ceaselessly tried—and these their early training ensures them; it also needs a modesty of disposition, and withal a confidence in their own powers—and these a hard struggle with a hard world for very existence will have effectually given. A life of self-denial and austerity, the consequences of a poverty which is the Scotch schoolmaster's certain lot; a social position which, while it raises him above the society of a village coterie, scarcely elevates him to the drawing-rooms of the neighbouring gentry, and surely excludes his children; a daily, never-ending struggle against ignorance, prejudice, and misunderstanding, brightened perhaps by some passing interest in a favourite pupil; a certain knowledge of absolute inability to make provision for the dear ones who have shared his troubles and brightened his existence; a life of continued self-denial to bear which manfully and philosophically requires an early training, closely fitted for that purpose.

Let it not be thought that we have drawn too favourably-coloured an illustration of the Scotch schoolmaster. The office of teacher of the youth of Scotland is *not* a *media via* between the learned professions and commercial pursuits, and is consequently adopted by many who, aiming at a higher position, strive to fail lightly. It is a common occurrence for students designed for the Church, and, failing to obtain cures, to enter the scholastic profession, and bring to the discharge of these minor duties qualities capable of adorning a higher sphere of action. Upon the list of contributors to the Widows' Fund hereafter mentioned will be found the names of nearly two hundred qualified ministers, who hold now, or who have held, the post of parochial schoolmasters; while the number of licentiates cannot be ascertained. Several of the Professors of the Scotch Colleges (amongst them Tennant, the author of "Anster Fair," &c.) began life as *dominies*. The position they hold and the society in which they move are fully equal to those possessed by an English surgeon or solicitor, and they are free entry elders of their Church amongst the Presbyterians no uncertain test of moral excellence. It is impossible to deny that there may be found amongst them some ill adapted by nature or habit for the duties of their high calling; but we do not believe that, with the safeguards of the present system, any considerable addition can be made to the number of inefficients.

Scotland is divided for clerical and educational purposes into eighty-three presbyteries—each presbytery being a collection of parishes, varying in number from six to thirty-five. These presbyteries have authority over the parishes attached to them, and form the supervision of the general yearly assembly of the Church. There are 978 parochial schools, and the pupils in attendance during the year 1854-55 numbered 76,300. The schools are examined annually by inspectors appointed by the General Assembly's Education Committee, and a report of the state of every school, the number of pupils examined, and the appearance made by each class is made and printed The same inspectors will, with the sanction of the officials, report upon the state of the various schools not in connection with the Presbyterial establishment. In their last-published report they state that they examined 1651 non-parochial schools, at which the attendance of pupils during the year amounted to 99,800. Their table, showing the number of scholars learning the various branches of education, is extremely interesting Out of the 76,300 pupils in the parochial schools 69,300 were taught reading, 46,400 writing, 34,000 arithmetic, 1460 practical mathematics, 670 algebra, 3000 Latin, 520 Greek, and 1140 French. Out of the 99 800 pupils in the non-parochial schools only 1930 were taught Latin, 321 Greek, 1000 French, and 499 algebra.

The Scotch parochial schoolmasters have formed several associations tending to improve their social position and raise their professional standard. To the poor union is strength, indeed, nor have they been backward in acknowledging the truth of this aphorism. The first of these associations dates from 1806, and its objects and provisions were secured by an Act passed in the following session of Parliament, which has been amended by the 9 and 10 Vict., Cap 226, entitled "An Act for the better Management of the Fund for the Relief of the Widows and Children of Burgh and Parochial Schoolmasters of Scotland." We will endeavour to explain the system of this association in as few words as possible:—It has for its motives the granting pensions to the widows and children (under the age of seventeen) of deceased members. The benefits of this fund are rightly enough, as compulsory as they are great. Every schoolmaster upon his induction is bound to subscribe towards its funds. There are four classes of subscriptions, from £5 5s. per annum to £2 2s.; and upon the class of subscription depend the annuity granted to his widow. These annuities range from £30 to £10 a-year, and where no widow is left, they are paid to the orphans (if any) until they reach the age of seventeen. The subscription is recoverable from defaulters by a simple distress upon the funds due from the heritors to them. The fund has been steadily increasing until it has now assumed gigantic proportions. The sum in hand at the last investigation was discovered to amount to upwards of £74,000.

In addition to this, some twelve years ago Scotch teachers of all denominations formed themselves into a body, called the Educational Institute of Scotland. A general meeting is held in Edinburgh in September of every year, at which deputies elected by the presbyteries attend; when the various committees give an account of their proceedings, accounts are audited, public officers elected, and questions relative to educational progress discussed and settled. A presbytery of twelve parishes has the power of nominating two representatives to attend to their interests at these meetings; a pre-bytery of eighteen, three; of twenty, four; and so on in proportion. The expenses of the Institute are chiefly borne by the teachers, in the shape of a small rate upon their salaries—sometimes two or three years in arrear. The Institute has also committees for the examination of intending professors of education, and grant diplomas of merit, which are much valued Until lately the Institute published an ably-conducted monthly journal devoted to the advancement of educational interests, but during the last year it was found necessary, from a paucity of funds, to discontinue this.

By these means the schoolmasters of Scotland, although poor, have formed funds devoted to the sacred duty of protecting the widows and orphan children of their brethren, to the improvement of their profession, and the general advancement of educational progress. Nor are they even vested and pecuniary interests neglected. Whilst the various abortive Scotch education bills have been before Parliament (a period of several years), deputies from the Institute have been maintained in London charged with the task of guarding the interests of their class.

We must not forget to mention the Scottish School book Association, originally founded with the view of preparing a complete system of school-books for the use of the Scotch schools, but which has lately considerably extended its objects. This association is now enabled to give grants towards the education of daughters of deceased members, and to establish bursaries (available at the Scotch Universities) to needy deserving young men in the prosecution of their studies. These bursaries are six in number, of from £10 to £15 value annually

A few words now about the schools themselves; and, for the benefit of those of our readers who may never have witnessed the interior of a Scotch parochial school, we will endeavour to depict one. In order to do this, we must beg the reader to consider himself introduced into a simple Scotch lad, whose fortunes we will follow. Sandy M'Dougall, then, is a bare-footed, light-hearted, sun-tanned village boy—one of a large family, perhaps. His father may be a weaver, collier, or hind. Perchance he is such a one (they are common enough) as Burns has so feelingly depicted in his "Cotter's Saturday Night" If so, however hard (to use a vulgar but expressive term) the lines of his life may be, Sandy and his brethren will get their "wee bit schuling," you may be sure. For reading and writing we have seen that Sandy has to pay 2d. per week, which, for himself and his brethren, amounts to more than M'Dougall *père* can or ought to afford; but at present, as we have seen, the Scotch educational system is based on self-denial. Well, our friend Sandy finds himself in a large, well ventilated and appointed schoolroom, with its companion wing, of holding 200 pupils. These rooms are crowded with a strangely-assorted mass of children. In one the schoolmaster is listening to an animated translation of one of Euripides' plays by his chief scholars; in the other the usher is hearing the business class go through the mazes of the multiplicative process. Upon the forms are seated the sons and daughters of the neighbouring professional men, manufacturers, and farmers—the girls (varying in age from five to fourteen) with that look of modest confidence which is so characteristic of Scotch womanhood, mingling with no distinction and entering into equal competition with them, are seen Sandy's own companions, neat and clean, but with tattered clothes and bare feet. Here, in the schoolroom as in the kirk, all are equal. So Sandy takes his place at the bottom of the class, and is set to marry off the first half-year's prize, and become a famous scholar, as the best-bred pupil in the school. Probably he does distinguish himself sufficiently to justify the schoolmaster in recommending his advancement. This necessarily entails the payment of a higher rate of fees—a shilling per week, to the honour of the Scotch scholastic profession, is, in the cases of widows and orphans, often nominal. So he masters the rudiments of Latin, and has delight in his first mathematical essays—a study on which his men lecture seems eagerly. His feet are yet unsocial; his red locks still fall unkempt around his sunburnt, freckled face; his fare is still the kail-brose and "halesome parritch" of the Scotch peasantry. But this ad is already far different from those around him; he has tasted of the contents of the cup of knowledge, and thought and energy are bent to drain it to its dregs. So he completes his school career. Rough and awkward, with a shy manner and a broad lowland accent, he stands on the threshhold of the parish schoolhouse—the world before him. His master's kind hand is upon his shoulder, and the boy's eyes glisten as the words of encouragement and praise—so precious, because in a Scotchman so rare—fall upon his ear. You can have little notion of the attachment which springs up between the master and pupils in these schools, of the watchful anxiety with which every step in life is regarded by the teacher, and how he exults or mourns as the boy whose mind he has trained reflects honour or discredit upon his culture. We are not overrating this sentiment when we say that it is more than respect, reverence, or gratitude—that it is really warm-hearted love. When one the duties of the pedagogue ceases, and the master becomes a friend. What office determine also, and the instructor and the taught become at once old and familiar friends. We have seen many instances of this evinced, not merely in empty words. We were assured by one gentleman of many years' experience in his profession that he could travel all Scotland over and never miss a hearty welcome from the boys (grown men now) who had once smiled and trembled at his jokes and frowns. We personally witnessed, from graceful and accomplished women, gratitude and affection lavished on their childhood's teacher; and we once had the happiness to meet a young Scotch surgeon, settled in England, who had travelled through the night sixty miles, to breakfast with his old Highland schoolmaster. But we are forgetting Sandy, who very likely goes to College—in England an expensive luxury, in Scotland a career open to all. Strange as it may read, his collegiate expenses for six months, including class fees, which may amount to £6, need not exceed £15. There are lofty flats in Edinburgh, as well as garrets in London, which these true students share, and they ask no better fare than the familiar oatmeal porridge of their boyhood. Then he enters a learned profession, and perchance M'Dougall *père*, lives to see his son "wag his pow in a pulpit," or perhaps, taws* in hand, he leads the rising generation along the paths of knowledge he himself had so honourably trod. Have we been romancing? Scotland's annals emphatically answer, No. From a population but little exceeding that of London there spring annually from the lower classes so many men of note and worth that little surprise is excited if they rise to the highest position in their various professions. So common and universal a circumstance is this that it does not entail upon the successful those penalties which a decided elevation of rank in England invariably brings with it. The clever and fortunate Scotchman is neither ashamed to own his humble origin nor to show affection for those of his kin who still remain in obscurity. He is proud of the position he has won for himself, and proud also that that position should be due to his own lowly fortunes he might perhaps have inherited. And we could fill a volume with instances to show that the position is often of the highest. As a single example, the present Principal of the College of Edinburgh is a weaver's son, and he proudly tells how, when a child, he conned his lessons beside the candle by which his mother toiled far into the night to gain the pittance that was necessary for her son's parochial school fees.

We have briefly endeavoured to describe the Scotch parochial system of education. We have shown the materials of which the school-master is formed, and how the difficulties he experiences in obtaining his responsible position guarantee in some degree the needful qualifications. We have shown him honourably discharging his arduous duties, and struggling manfully against a poverty which is a blot upon any Legislature to allow. We have attempted to depict the (to English eyes) strange appearance of a large Scotch school, composed of children of every age and class—boys competing in the same classes with girls; girls receiving instruction not from a mistress but from the schoolmaster and his assistant. We have seen how, when the district spring of knowledge is exhausted, the poor scholar is not debarred access to higher and greater sources, but may aspire to fame and reputation, and follow a career happily free from the scornful pity or degrading patronage which in many countries are conceded to humble merit

But before bringing this article to a close, we may be allowed to point out some of the deficiences of a system which contains so many excellencies, and which it is at present deservedly vain-glorious for the educational requirements of the country. In the large parishes the heritors are compelled to support but one school, which is wholly inadequate to the wants of those parishes. Thus the one which we have attempted to describe was situated in one angle of a parish the other extremity of which was a distance of seven miles. Now, taking a walk of three or four miles to be as much as children can undertake daily, it is seen that a large portion of that parish is entirely unprovided for. Then the income of the schoolmaster should be so raised that the fear of absolute poverty may no longer cast its dark shadow across their path, and paralyse their efforts. It is not asking too much for the schoolmasters of Scotland to demand that a salary of £5, per annum should in all cases be guaranteed to them, and even that is a poor recompense for the anxieties and labour of their profession. Again, although in Scotland education is open to all, it must be paid for. Acknowledging, as they do, the inestimable blessings, earthly and eternal, derivable from knowledge, they still close its gates to all who do not come provided with a silver key. We confess that we regard a deeply-rooted prejudice against any system of education which was not based on self-denial; and when we advanced a step further, and pleaded for not only a free but a compulsory system, we met with still more intense opposition. Nevertheless, we doubt not that before long Scotland will rejoice in both these benefits; and when that time comes we may look forward to some mitigation of that sectarian discord which at present distracts our brethren across the Tweed

We must leave the *vexata quæstio* of an educational system under the sole superintendence of the Scotch Presbyterian establishment to some future time, when we can deal with it in connection with the kindred difficulty of a State education under the management of the Church of England.

## SUNDAY MORNING BELLS.

A THOUGHT.

FROM the far city comes the clang of bells.
Its hundred jarring, diverse tones combine
In one faint mist of music, soft and fine
As the sweet note you little robin swells.
What if to Thee in Thine infinity
These multiform and many-coloured creeds
Seem but the robe man wraps as masquer's weeds
Round the one living Truth Thou giv'st him—Thee
What if these various forms that worship prove,
Being heart-worship, reach Thy perfect ear
As a great monotone, complete and clear,
Of which the burthen is -through Christ's name -Love?
For ever rising, in sublime increase,
To "Glory in the Highest, on earth PEACE"?—D.

"THE WIFE'S OWN BOOK OF COOKERY."—(Ward and Lock)—Works upon cookery and domestic management in times past were generally condemned for the expensiveness of their instructions; for, as shrewdly observed, economy is an excellent hint to extravagance. Another objection to the old cookery-books has been the indefinite character of their directions—upon the pinch of this, and little of that, or rather want of system. In the new candidate for the admiration—The Wife's Own Book of Cookery"—the aim appears to have been to guard against useless expense, and to be as clear in the directions as the compressing into 400 pages nearly four times as many receipts will allow. Novelties in the culinary art have their due share of attention, so as to combine elegance with economy, and as *cooking* provisions is not the only essential to success in housekeeping, the duties of food, and the well ordering of the kitchen, are alike attended to. The book contains a series of bills of fare, which will enable the lady to select her dinner, and the instructions teach the cook how to dress it. The latest information is conveyed in each department of the book, which, by the way, is illustrated by a profusion of improved engravings; and the result is a cookery-book, recommended by plain sense and practical worth, and judicious economy.

THE CONSERVATIVE LAND SOCIETY.—The twelve thousand and thirty-seventh fifty-pound share was issued at the office on the 18th inst., making the sum of £601,850, of which the amount of £225,368 5s. 6d. has been paid up. The twenty-fourth estate (Tunbridge Wells) will be allotted on the 21st of May, and the thirty-fourth public drawing for rights of choice on the society's estates is fixed for the 30th of June.

THE LADY NURSES AT SCUTARI.—Our life was a regular routine of work and rest (except on occasions of extraordinary pressure) following each other in order; but whether in the strain of overwork, or in the steady fi. lment of our ordinary duties, there was one light ever shed over it, one thing that made labour light and sweet, and this was the respect, affection, and gratitude of the men. No words can tell it rightly, for it was unbounded, and as long as we stayed among them it never changed. Familiar as our presence became to them, though we were in and out of the wards day and night, they never forgot the respect due to our sex and position. Standing by those in utter agony, when the force of their dull battle is gone, or by those at the glow of returning health, or walking up the wards among orderlies and sergeants, never did a word which could offend a woman's ear fall upon ours. Even in the barrack-yard, passing through the guard-room, among every sort of soldiers coming and going, the moment we approached all coarseness was hushed, and this lasted, not a week or a month, but the whole of my twelvemonth's residence, and my experience is also that of all my companions.—*Eastern Hospitals and English Nurses*

THE SPIES OF THE HOLY OFFICE.—A correspondent of the *Independance Belge* writes from Rome, that at a meeting of prelates just held at Loretto, under the presidency of Cardinal Antonelli, it was resolved to establish, each of their respective dioceses a society of Zelanti, which from their wearing a cross in the form of a sack, with a hood, also a cord round the loins, sandals on their feet, and a veil, pierced with two holes for the eyes, over the face. "These *refrigeri*, lamenters of the Holy office, are to have the task of penetrating all kitchens on Fridays, peering into pots, stewpans, and porridge-basins, to ascertain whether the prescriptions for the soup are being transgressed; and are also to rummage amongst all the papers to discover any trace of impiety or revolution. They will have to denounce the blasphemers, and a portion of the fine is promised to them for this. At eight o'clock in the evening, when the bell announces the *Angelus*, the Sacconi will take note of all who omit to kneel, even in the street, and will denounce all such. These regulations, and some others, have been issued in a printed form from the Episcopal Printing-office of Fermo."

* The "taws" is an ingenious leathern instrument of torture, designed to inflict blows upon the outstretched palm, called "pawnies," and answering to the familiar birch of our English school-days.

# Memorabilia,

## LITERARY, ANTIQUARIAN, SCIENTIFIC, AND ARTISTIC.

*"A little chink may let in much light."*—Old Proverb.

### EXTRACTS FROM THE DIARY OF THE FIRST EARL OF EGMONT.

(*Continued from page 387.*)

Friday, 10 Jan.—I went to all ye Leveés, and at night, for the first time, to ye night drawing-room of ye Princess. None spoke to me at any of ye Courts but Princess Amelia. My br Dering thought it offices had been done me by some who knew I had twice received assurances of ye Queen to recommend him to be about the Prince, and nothing is more likely, for Ministers can't endure that any should have access to their Princes but thro their consul, or owe their places but to their application, because they think it dangerous to have persons about their master who is not treely attach'd to themselves. *

Saturday, 11 Jan * * * * * *

I was this morning to see Marquis la Forêt and cosen Will Finch. Y. latter not at home. The former gave me a long account of ye Princes journey to England, their likely hood of being lost on a marsh, which being covered with snow was taken for plain ground, but proved to [be] water and ice that broke with the first venture that led the way. Their chance of falling from a dyke in Holland into one of ye canals, their going from Helvertluys in a small boat thro the ice to reach ye packet boat, &c. He said he accompanied to ye King of Spain, who having discovered ye Prince was landed, sent immed ately an express of it to his friend in London, which defeated a pleasure the Prince had conceived, to surprise the King with a sight even before he could know he was landed. When La Forêt saw that, he sent an express immed.ately to Baron Hatsfeld, but ye express, instead of obeying his direct on, left ye letter at ye Post-office. I find Waller has no opinion of Parliament, who he told me was an ordinary seaman in ye squadron at ye mouth of Thames, and turn'd out for idleness but afterwards got in and rose to be mate, from whence he got a boat, that he was an insolent fellow, &c.

Wednesday, 15 * * * * * *

I learn'd that Dr. Sherlock, Bish. of Bangor and Almoner to the Pr. of Wales, had given in a list of Chaplans for ye Pr. of Wales; that the Prince said he had no objection, but must acquaint ye Queen with it, that the Bishop at the same time had applyed on the like account to my Ld Townsend, who making objections to the persons named in the list, the Bishop in conclusion told him there could be no objection unless that they were men of worth. That 'tis pretty certain none of his nomination will be admitted, they being mostly noted Torys, besides that the Queen, who she has a good opinion of ye Bishop, is wholly govern'd by ye Maistry.

Thursday, 16 Jan. * * * * * *

At night I went to the Crown tavern to hear ye musick which ye gentlemen of ye King's Chappel have every fortnight there, being an attempt to restore ancient Church Musick.

Saturday, 18 Jan.—I call'd Robin Moore and then went to a meeting of ye members of ye Royal Acnadamy of Musick: where we agreed to prosecute ye subscribers who have not yet paid: also to permit Hydges and Heidle to carry on operas without disturbance for 5 years, and to lead them for that time our scenes, machines, cloths, instruments, furniture, &c. It all past off in a great hurry, and there not above 20 there.

Monday, 20.—The Prince's birthday was kept at St. James's, and a great crowd was there; but it was remark'd that ye guns did not fire. There dined with me Br. Dering, Col. Lannay, Mr. Aug. Schutz, the two Misetress Schutz, and Dr Courage. In the afternoon came in Mr. Bigliebech, and we had a sort of bal., unforaeen. Afterwards my daughter went to Court, where she dane'd, and I went to our weekly concert.

Tuesday, 21. * * * * * *

We discoursed on seyl topicks that relate to Ireland. One of his (Mr. Bindon) notions is that Ireland would flourish more if we permitted ye Papists to take leases of lives, and purchase lands, for now we drive them into trade, and almost all ye money of ye kingdom is in their hands. They are the greatest traders, and especially the greatest smugglers of prohibited goods, to the ruin of the fair traders, who are generally Pr. testants. He said that giving them a lasting property in the land would make them for their interest become good subjects, though not Protestants, and separate numbers of them, especially the more substantial sort, from ye rest, that the purchases of lands would be by them defended aga nst al. ancient claims of Popish proprietors, and so al. ye Protestant tenures would be supported by the Papists themselves.

### RARE OR UNPUBLISHED LETTERS.

In another part of our journa. we have alluded to the very important collection of Historical Manuscripts which are to be sold next week by Messrs. Puttick and Simpson. We have here the pleasure of presenting, from the same co lection, a rare and curious letter of William Laud, Archbishop of Canterbury, dated August, 1640, which is full of interesting particulars indicative of the political commotions at the period—

(Not known to whom addressed.)

"My verye good Lord:—I am hardlye sorry I must wright these to you brokenlye and in hast. Hampton Court is infested with ye plague. Three howses at the verye gate. The cOmittye cded to Oatlands, whear I have no accomodation, all my st f, as wel as other means, being at Hampton Court Three Clerks in ye Mewes infected and one of ye Kinges coachmen dead. Thence it came (as 'tis thought) to Hampton Court. And the tymes looke verye blacke in manye respects.

For ye Scotis colonge I am of yor opinio with this exception still. If ye owne distractions, waits and comphances w h the, cnil tht not in ye d. And ye generalitye of all sorts ar soe ill sett heare, as that it must be a miracle if come smoothl come s ot.

We have seene a petition of m&ye Yorkesheere gentlemē to the Kinge concerninge the disorders of ye soldiers theae, in weh they feare much, and it seemes (as you wright) they have not bin well cōmanded. But, howsoever, I like it worst, both for matter and manner, then anye thinge weh hath yet happned, save wants for moneye. And if once want and disorder meet, farewell all. What counsell this daye will pedose I cannot tell, but I psume you will have information fr ye secretaryes in yt behalfe.

In Essex the soldiers are verye unrulye, and nowe begin to pull up the rales in churches, and in a manner to say they will reforme, since the lawes ar sneerye wheae broken. 'Tis starke naught theae, and certainlye ye infand [si].

I hope theae is noe feare of mye L. Lieuteaents loue newe, though I am cleare of yor opinion what his loss would be theae tyme be to ye Kinge. And for yor self I wrote you nothinge but trueth of ye Kinge's expressions. And for there honor and integritye that would not have been employed in yor charge, hope if I live to see you, you will trust mee with ye knowledge of thē, that I maye not be ignorant whear thus honor and integrye growes. Yor hope you will pardo thus distracted hart. While you may be sure I shall rest Yor Lps. lovinge poore frend to serue you,

Oatlands, Aug. 2, 1640. W. Cant.

### LETTER OF WARREN HASTINGS.

I send you a copy of a letter in my possession from Warren Hastings to a Colonel Morgan (supposed date 1787). It may be of some interest to the readers of your "Memorabilia."—Edward S. Snell.

St. James's-place, 7th Dec.

Dear Sir,—If my interest could promote any views of Mr. Hay's, which were not incompatible with the rights of others, such are my Esteem for his Character, my Know edge both of his Abilities and his Integrity, and my Remembrance of what I myself owe to his official services, that I would exert it to its utmost, and even break through the Rules which I have prescribed to myself to effect it. I feel it a Mortification to profess such a Deponent and to be obliged to add, that I do not think myself at Liberty to indulge it, neither knowing what Competitors may have the same Object in pursuit, nor deeming it proper to make the first Trial of my Influence in my Gestion in yr Direction, to wm I have never yet made any Solicitations on an Occasion on which I could not justify myself against every possible objection. I have much more to say upon this Subject, wch I shall reserve till I have ye pleasure of seeing you, wh I will ask it with yr first Morning Hour

I am, dear Sir, yr affectionate & faithfu. Servant,

Warren Hastings.

### NOTES.

Peeps Outdone.—The Rev. Mr. Cole, who at his death, in 1782, beq eathed a hundred volumes, in folio, fairly written in his own hand, to the British Museum, must have been a simple character His collections are truly valuable; but his diary, as will be seen by the following specimen, is very l.dicrous:—"Dec. 26, 1766 Foggy M. My beautiful parrot died at ten at night, with ut knowing the cause of his illness, he being very wel last night Feb. 1. Fine day, and cold Will Wood carried three or four loads of dung into the clay-pit close Baptized William, the son of William Grace, blacksmith, whom I married about six months before. March 3 I baptized Sarah, the bastard daughter of the widow Sims, wood, of Eton, aged near fifty, whose husband died about a year ago March 6 Very fine weather. My man was blooded. I sent a lion of pork and a sparerib to Mr. Cartwright, in London. March 27 I sent my two French wigs to my London barber to alter them, they being made so miserably I could not wear them. June 17. I went to our new Archdeacon's visitation at Newport Pagnel. I took young H. Travel with me on my dun horse, in order that he might hear the organ, he being a great psalm-singer. The most numerous appearance of clergy that I remember: forty-four dined with the Archdeacon; and, what is extraordinary, not one smoked tobacco. Aug. 16. Cool day. Tum reaped for Joe Holdam. I gudgelled Jem for staying so long on an errad," &c.—Edward F. Rimbault.

Household of Henry the Eighth.—The following extract from a curious old MS. contains some very singular directions for regulating the household of Henry the Eighth. We glean from it that the adulteration of food and drink is a delinquency not peculiar to our century; and, if requisite to guard against such practices in the Royal ménage, how must it have fared with the commonalty in times when Frederick Accum, Dr. Hassall, and other analysts as yet existed not? It were devoutly to be wished that all offenders in this sort could be indiscriminately "set in the stocks" nowadays:—"His Highnese's baker shall not put alums in the bread, or mix rye, oates, or bean flour with the same; and if detected, he shall be put in the stocks. His Highness's a tendants are not to steal any lock or keye, tables, forms, cupboards, or other furniture, out of noblemen's or gentleman's houses, where they go to visit. Master cooks shall not employ such scullions as go about naked, or lie all night on the ground before the kitchen fire. No dogs to be kept in the Court, but only a few for the ladies. Dinners to be at ten, suppers at four. The officers of his Privy Chamber shall be loving together, no grudging nor grumbling, nor talking of the King's pastime. There shall be no romping with maids on the staircase, by which rules and other things are often broken. Gates shall be shut before prayer sopens, and that the wooden ones used in the kitchen be not broken or stolen. The pages shall not interrupt the kitchen-maids. Coal only to be allowed to the King's, Queen's, and Lady Mary's chambers. The brewers are not to put any brimstone in the ale."—H. A. K., Bath.

Pope's Lady-Friends.—Your correspondent *T*'s" discovery of another lady-friend of Pope, not mentioned by any of his biographers, is what is commonly called a *mare's nest* The "unpublished note" forwarded by T. is to be found on the back of page 134 of vol. iii of the Homer MSS in the British Museum. It was printed long ago in the supplemental volume to Pope's works published by Hearne. A little closer inspection of the original will, I think, convince T. that the name of the lady is not Wenshorn but *Newsham*. She subsequently became the wife of Mr. Knight, the writer of the letter, and afterwards married Mr. Nugent (her third husband), who was subsequently created Baron Nugent and Viscount Clare. A portrait and bust of this lady are to be found in Bow.es' "Pope," vol. x, with a number of letters of Pope addressed to her under her three names.—W. Moy Thomas.

### QUERIES.

The "Pine Cones" of Nineveh.—Will not the more recent discoveries of Nineveh throw some light on what I have always considered an error on the part of Mr. Layard, in supposing to be "*pine cones?*" The winged figures which occur continually on the walls of the Assyrian palaces frequently carry in their hands two objects, which Mr. Layard denom nates "a pine cone" and "a square vessel," and which he says are supposed to be emblematic of the sacred elements—fire and water. When examining the Nineveh remains in the British Museum, or their transcripts at Sydenham, it has always suggested itself to me that these so-called "pine cones" were no other than the conventional (so to speak) representations of bunches of grapes. Let me refer your readers to one of the two bas-reliefs on the external wall of the "Assyrian Court," facing the transept, in the Crystal Palace: it is a cast from the original in the British Museum, and described by Mr Layard as "*Eagle-headed figures before the Sacred Tree.*" Now, is not this "sacred tree" a grape vine, and are not the two eagle-headed figures plucking the grapes, and about to deposit them in the "*square vessel*," or basket in Number 768 of the Illustrated London News, in the Engraving of the newly-discovered slab, representing the figure of a Queen sitting with the King "beneath an arbour of grapes," the "pine cones" are accurately delineated. Are not these so-called "pine cones" then the Assyr an mode of representing bunches of grapes? In some slabs we have a sculptured representation of the gathering of the grapes, in others the presentation of the grapes to the King. I throw out the suggestion as a "*Query*" for other observers.—I. R. S.

Lady Francis Ingram.—Some of your readers can, perhaps furnish me with information relating to a Lady Francis Ingram, and for what reason she was closely confined in the Tower for ten weeks. I have a small manuscript book of prayers and meditations written in the lady's own handwriting on the death of her husband and child in June, 1661. In one part of which, when reflecting upon her own life, she says—"Many have ye changes of my life been. Great pleasure and plenty I have injoyed, but not with out sum and mixtures. Ye death of my only child, *close imprisonment ten weeks in ye Tower*, indeured many panefull inconvenaines, above all, lost my dearest husband, all hapning to me by ye apoyntment and parmishon of ye Eternall God, great reason have I for ever to bless and praise him for his goodness." Yet later on suddenly my corruption as they have brought me to know my selfe" Lady Francis Ingram was married in 1636, her child died 1651, her husband died 1671.—J. R., Taplow, Bucks.

Kitty Fisher's Jig.—In "Memorabilia" you have an article on Kitty Fisher's *Jig*. The portrait of this celebrity was painted by Sir Joshua Reynolds (vide Northcote's Life of Sir Joshua.) In the suggestive character of "Cleopatra Dissolving the Pearl," for the Lord Berrington of that day, who knows what has become of the original picture, or in whose possession it now is? Can any of my fellow-correspondents throw any "light" upon the subject?

Edina.

"A Banbury Story of a Cock and a Bull."—The saying "It is a cock and bull story" is common enough, as every one knows, at the present day; but in former times—I mean in the last century—the proverb always ran thus "It is a Banbury story of a cock and a bull." Can you inform me why was Banbury in particular fixed upon as the locality of the story? —Falconer.

Our National Anthem.—The question has been repeatedly asked—I know not if it has ever been satisfactorily answered—when, and by whom, was our National Anthem composed? It is only recently I have heard that the Germans claim it as theirs, and can it equally with ourselves on public occasions; and this independently of the well-known anthem composed by Haigl, "God Preserve the Emperor Francis." Meanwhile, I observe in his fourth volume, at page 240, describes the victorious flotilla as it retired after the Battle of La Hogue, insulting "the hostile camp with the thundering chant of 'God Save the King!'" This, if correct, would stamp it as our national air so far back as 1692, and I have heard its origin referred to the time of James, whether the First or Second, I cannot say.—W.

[The Germans use *our* "God Save the King" to the words "Heil dir im Sieger Kranz" having received it through Hanover. It is the National Anthem of Prussia and some of the smaller States. Mr. Macaulay cannot mean that "God Save the King" was *sung* in 1692. It was an old cry long before we hear of it as a song ]

### ANSWERS TO QUERIES.

Tale of a Tub.—The best answer to this query is the following extract from the preface to Sir James Mackintosh's "Life of Sir Thomas More." 12mo 1544:—

The learned Mr. Douce has informed a friend of mine that in Sebastian Munster's "Cosmography" there is a cut of a ship to which a whale was coming too close for her safety, and of the sailors throwing a tub to the whale, evidently to play with. The practice of throwing a tub or barrel to a large fish, to divert the huge animal from gambols *dangerous* to a vessel is also mentioned in an old cross translation of "The Ship of Fools."

These passages satisfactorily explain the common phrase of throwing a tub to a whale; but they do not account for leaving out the whale, and introducing the new word tale. The transition from the first phrase to the second is a considerable stride. It is not, at least, directly explained by Mr. Douce's citations, and no explanation of it has hitherto occurred which can be supported by proof It may be thought probable that, in the process of time, some national was compared a rambling story, which he suspected of being lengthened and confused, in order to turn his thoughts from a direction not convenient to the storyteller, with the tub which he and his shipmates were wont to throw out to divert the whale from striking the bark, and perhaps said, "This tale is like our tub to the whale" The comparison might have become popular, and it might gradually have been shortened into "a tale of a tub"

Edward F Rimbault.

Birthplace of Oliver Goldsmith.—From the following letter it will, I think, sufficiently appear that Oliver Goldsmith was born at Elphin, and not at Pallas, as your correspondent C. B. seems to think. Perhaps it is well to mention that the writer of the letter was the father of the late Rev. John Lloyd, who was murdered some years ago near Elphin.—H. J. F., Ducesan School, Elphin:—

Smith-hill, Dec 24th, 1807.

Dear Sir,—The R v Oliver Jones was Curate of Elphin, and als. had the Dioceean School of that town; he lived where I now live, a little more than half a mile from the church. He had four daughters, and no son. My grandfather, George Hicks, was married to one of those daughters, and consequently knew every circumstance relating to that family, and had often told me that the Rev. Mr. Goldsmith who was married to another of Mr Jones's daughters, had a Curacy somewhere near Athlone, and that Mrs. Goldsmith spent much of her time with her mother, Mrs Jones, then a widow, and living at Smith-hi. "*At Oliver Goldsmith was born here, in his grandfather's house*, that he was sent and reared here, and got the early part of his education a the school of Elphin. My m ther, the only child of the above George Hicks and Mrs Jones was temporary with Oliver Goldsmith, and brought up in her grandfather's. She has often told me the foregoing circumstance, and has shown me the very spot where the bed stood in which Goldsmith was born. From which I always heard and understood I have never had a doubt on my mind. Goldsmith was born here. I am, &c, &c,

To the Rev. Dr. Strean. Robert Jones Lloyd.

Intoning the Church Service.—This query may be very satisfactorily answered by consulting Rousseau's "Dictionnaire de Musique," under the articles, *Ronnar*, *Plain-chant*, and *Tons de l'Eglise*. To intone means, properly, to give the pitch. This is done commonly by the addi t a pitch-pipe, or fork, and, in a somewhat primitive manner, in our village churches, where modern innovation has been successfully excluded "Dans l'Eglise Catholique," says Jean Jaques, "c'est, par exemple, l'officiant qui *entonne* le Te Deum; dans nos Temples, c'est le chantre qui *entonne* les Psaumes." To intone, in a more extended sense, is to speak in tones separated by musical interval. Next in order is the chant, then the recitative, and lastly the aria, or song. "Mais on peut dire" says Rousseau, "qu'il n'y a rien de plus difficile et de plus plat que ces *plain-chants* accommodés à la moderne. He has furnished an instructive extract from the French annals of Charlemagne of a fearful dispute betwixt the Roman and French divines as to church-chants, the former designating the latter as "stultos, rusticos, et indoctos, vera bruta animalia:" "les tractoient d'ignorans, de rustres, de sots, et de grosses bêtes." Charlemagne settled the dispute in favour of the Roman chant, "qu'ils appellent maintenant chant Français; mais quant aux Sons tremblans, flottés, battus, coupés dans le chant les Français ne purent jamais bien les exécuter, parceit des chevrotinemens que des rou.emens, a cause de leur gosier." In brief, all the Christian churches ancient.y chanted their services, as the Mahomedans do likewise, and all these have borrowed the practice from the Jews, whose chants are compared in the mysterious "zohar," which perplexed even Buxtorf, but which any Jewish Precentor can interpret into musical phrases, sung in one style in the German, and in a different one in the Spanish synagogues. Musical intonation is natural to the language of strong feeling and emotion. Grimald and Roman poetry was intoned, chanted, and sung: nay, the Greek orator required the aid of the flute to give him—what bad and unpractised speakers so much need—the proper key upon which the voice should be modulated when the audience is to be impassioned, and the responsive strings in the breasts of his audience are to be harmoniously and sympathetically moved to action.—T. J. Buckton, Lichfield.

Playing at Ball in Church.—The ball-play in churches was celebrated annually by the Neapolitans and others. By some statutes, anno 1396, it is ordered that the ball be less than usual, though of a size not to be grasped by one hand only. The ceremony was at Easter, and as follows.—The ball being received, the Dean, or his representative, began an antiphone suited to Easter-day; then, taking the ball in his left hand, commenced a dance to the tune of the antiphone—the others dancing round hand-in-hand. At intervals the ball was handed or tossed by the Dean to each of the choristers. The organ played accord.ng to the dance and sport. The dancing and antiphone being concluded, the choir went to take a refreshment. It was the privilege of the lord, or his *locum tenens*, to throw the ball; even the Archbishop did it.—Forrester.

Sir Francis Drake.—Your correspondent (F. Tolfrey) is completely in error in his notes on the great circumnavigator. Sir F. Drake was born near Tavistock, where his father was minister. He was in no way related to the family of Drake of Ashe in the parish of Musbury, and I will adduce a well-authenticated anecdote in proof. The head of the house of Drake of Ashe at that time was Sir Bernard Drake, Knight, a celebrated seaman and a brave and ambitious man. He was knighted by Queen Elizabeth, having highly distinguished himself in the Spanish wars, and died of jail fever, caught at an assize held in Exeter, in 1586—the infection being communicated from some prisoners of war, whom Sir Bernard had captured; he died and was buried at Musbury. Sir Bernard's arms were—Argent a wyvern with wings displayed, gules. These arms Sir Francis Drake assumed, without being able to trace his descent from Sir Bernard's family. This circumstance very much incensed Sir Bernard, and the feud increased to such a degree that Sir Bernard gave Sir Francis a box on the ear, within the precincts of the court. This came to the knowledge of the Queen, who was very angry, and she not only granted Sir Francis a coat-of-arms, but also gave him a free wavy, between three pole-stars argent. The crest—A ship under a ruff, drawn round the globe with a cable rope by a hand out of the clouds, in the nggun a wyvern hung up by the heels,—to show her contempt of Bernard ake, Esq., as he called him, but he was afterwards received into favour by the Queen, and knighted in 1585, not long before his death. Sir Bernard, on the occasion, consoled himself with the remark, that her Majesty could give him (Sir Francis) a knighthood, but could not give him an ancestor, coat than his. The family of Sir Francis Drake, of Buckland Abbey, is now represented by Sir T. E. Drake, Bart., of Nutwell, Exm. th, who bears his arms; that of Sir Bernard Drake, Bart.—Drake, Esq., at present in Madeira, who bears his arms. At the request of Sir Bernard Drake I have answered this query of mine, and to whom I am indebted for some of the above information, I send the correct account of the once rival families of Drake.—W. H. Hamilton Rogers, Colyton, Musbury, Devon.

Origines Guelficæ.—The following will throw light on the titles in the Origines Guelficæ, by Scheidius:—Soyrorum, people on the south-west of the Baltic, Herulorum, Lombards; Rugorum, people of Rugen, in Pomerania; Turcilingorum, people on the Oder; Ferruli, of Ravenna, in Etruria; Reiserendarius, Master of Requests, whose office it was to present petitions to the French King; Tridentinus, Trent: Bonvariorum, Bavarians; Littoris Britannici, Rochburg, in Scotland (?); Cadunni, Caleo, in Campania (?); Darmenis (?); Agaui, Agen, in France; Rinaldenis, Rinaldini, in Switzerland; Herbipolenses, Arbela, in Sicily (?); Eberspergenses, Ebersberg; Leodenais, Liege (?); Constantinensis, Constantia, in Andalusia: Stadensis, Stade, in Westphalia; Angaris, a mountain in Palestine, but may be Hungary.—T. J. Buckton, Lichfield.

Antique Spoon.—In answer to a query concerning an antique spoon, with the head of Melancthon upon it, and the words "Will God I shall," I beg to say that the words "Will God I shall" are the motto of the Menzies family, Perthshire, the crest being a saracen's head. The words were first made use of during the period of the first Crusades, when they were presented to the chief of the family by one of the above-mentioned family as showing his determination to join them; the words being motto for, "If it be the will or pleasure of God I shall go." There is, I believe, a tablet in a church in Perthshire bearing the crest of one of the Menzies' clan, and the old spelling of the motto, "Wil God I sall."—A Clan.

Un Fanatico per la Danza.—Benjamin Smith, of Peter-House, Rector of Linton, in Yorkshire, died 1777—a mighty dancer before the Lord. He paid twelve guineas for learning to dance in France; and, when riding on a journey, or to visit a friend in fine weather, he would sometimes alight, tie his horse to a tree, and dance a hornpipe or two on the road to the astonishment of any who happened to pass. He was equally fond of cribbage, and when he met with a poor person who could play well, he would maintain him there or four months for the sake of playing with him.

### TO CORRESPONDENTS.

R. T. S.—*Facsimiles*.—The best specimens of facsimile writing we have met with is in the work by Mr. F. Netherclift, called "The Autograph Miscellany," published by Messrs. Netherclift and Durlacher, Brewer-street, Golden-square. The French work of the same kind is in no degree comparable.

Edward W. Godwin.—*Gaunts' Deeds*.—What and where are the Gaunts' deeds so often mentioned in the Bristol histories and "Lichbooks?"—The Gaunts' deeds are the records of the ancient Hospital of St Mark, at Redcliffe, an institution founded by the great benefactress family of Gaunt, who endowed it with the manor of Gaunt's Ford. The hospital being suppressed, its possessions were (by Henry VIII.) to the city of Bristol for £100. The building is now used as a chapel, school, and dwelling-house, we are in the Record-office of the Crown.

Pictura.—Head your communication "Memorabilia," and beneath it by sending your name and address *not for publication*, and on may rely on its receiving attention.

Salvete Alumni.—Reynolds of the word "Alcoran." The origin you mention is frequently applied to "Alcaron," but the association with honey is preferred, we believe, by the best scholars.

R. O., Oxford.—Every communica.ion having reference to any department of the journal should be legibly marked "Memorabilia."

D. D., University Coll.—See the notice in Pictura.

Mona, Arms of the Isle of Man.—The three armed legs, conjoined in fess, were introduced as the arms of the Isle of Man by Alexander III., King of Scots, who conquered the isle of the Norwegians. The island was granted in the Derby family by Henry VI. 1456. It was then descended by inheritance to the Duke of Atholl, who sold it to the Government for £416 000 in 1825.

A Constant Subscriber.—What is the meaning of "R. Cross "—St Cross, of Winchester, for example? Is it supposed the Cross was cancelled?—The expression St Cross, merely means the Holy Cross, which is a literal translation from the Latin Canonization is nu y nee sary to give a kind of St. title to a man. The Holy Spirit, the Ho y Cross, &c., bore their title by virtue of their own merits. A thing might be holy without being canonised, a man might be canonised without necessarily being holy.

A Falconer, a Marksman.—Why was the Isle of Man so called? "Camden derived the name of Isle of Man" from manu, a pile of stones, as the Welsh, *Pen maenmawr*, a pile of stones as a mark on the summit of a mountain, which the Welsh call *maen*, a stone, and *mawr* in the land of the Cymry, Cumberland. In being Celtic for an island, the name, manuin, or mannin might mean rocky island. But the word is obscure, and all interpretations are conjectural.

E. H. C.—Origin of the names of the villages called Kilvington, or Shelvinton.?—The word is probably derived from the Saxon *Ceaf*, a cuff. Ceafs-ham was a cuff-house or cowherds beguiling with or are often modernised into ch.

W. C.—See notice to "Pictura" and "L. S. S."

"THE HAY-FIELD."—PAINTED BY J. J. HILL.—FROM THE EXHIBITION OF THE SOCIETY OF BRITISH ARTISTS.

"SIMON AND IPHIGENIA."—PAINTED BY F. UNDERHILL.—FROM THE EXHIBITION OF THE SOCIETY OF BRITISH ARTISTS

## PICTURES AT THE EXHIBITIONS OF THE NATIONAL INSTITUTION AND THE SOCIETY OF BRITISH ARTISTS.

Our Illustrations from the London Exhibitions of Pictures already open to the public are, this week, taken from "The National Institution of Fine Arts" and from "The Society of British Artists" in Suffolk-street. They are four in number, and come from the pencils of Mr. F. Underhill, of the National Institution; and of Mr. J. J. Hill, Mr G. Chester and Mr. Alfred Clint, of the Exhibition in Suffolk-street.

Mr. Underhill has selected a rustic subject, and called it by the quaint and not inappropriate title of "*Simon* and Iphigenia." The story is simple enough and unmistakable enough. The execution is careful, and the colour throughout rich and in good keeping. It is in every respect a bit of rustic life upon canvas that will find and retain admirers.

Mr. J. J. Hill's picture (we have placed it over against Mr. Underhill's is called "The Hay Field." Here, again, is an unmistakable story. Observe the artless aspect of the little brother who is pulling his sister away from the lad who is looking true love into his sister's face. Very nicely treated, too, is the girl herself. The execution is somewhat light and sketchy; but the drawing is good, and the manner that of Mr. Mulready, caught with a practised eye and a ready hand. This pleasing picture was sent to the Exhibition to find a purchaser—the price, one hundred and twenty pounds. It is marked "Sold," and is one of three pictures contributed by Mr. Hill to the Suffolk-street Exhibition. His other pictures are entitled "The Shepherdess and "Galway Rustics." Both are sold. The clever Galway girls of Mr Topham, of the Old Water-Colour Society, have been in Mr. Hill's remembrance, and he has caught Mr. Topham's touches with a facile and not a servile pencil.

Our third Illustration is "The Brook," by Mr. G. Chester, one of three pictures of English scenery intrusted by Mr. Chester to the hangers of the Exhibition, and very ill hung by the committee of management. Mr. Chester has selected his subject with a poetic eye, and treated it with a painter's skill. His other pictures (No. 3120, "A Surrey Home" and (No. 344) "A Devonshire Mill," evince a true feeling for English landscape nature that deserves cultivation. Further study will bring him nearer to Hobbema and Nasmyth.

Our fourth Illustration is a "sea-scape," by Mr. Alfred Clint. It is No. 335 of the Suffolk street Exhibition, and is entitled by its artist "Storm—Fishing-boats Running into Harbour" Mr Clint has been setting his easel during the past year in the north of Devon, in North Wales, and the south of Ireland. He was industrious, and has given us views of Linton and Bantry Bay and Barmouth that will at once recall those favourite places to all who have seen them Mr. Clint is apt to be hard and edgy; but he has an eye for distance and for atmosphere. His "Summer Evening—Bantry" (No. 39) has deservedly found a purchaser. Mr. Goundy or Mr. Agnew or Mr. Gambart must not suffer his "View near Barmouth, North Wales" (No. 185), to hang one week longer without attaching to its frame the little green card so grateful to an artist, marked with the magic word "sold" The price o "The Storm" is £80.

"THE BROOK."—PAINTED BY GEORGE CHEQYER.—FROM THE EXHIBITION OF THE NATIONAL INSTITUTION.

"THE SEA-SCAPE."—PAINTED BY A. CLINT.—FROM THE EXHIBITION OF THE NATIONAL INSTITUTION.

## OAK FELLING AND OAK BARKING.

NOTWITHSTANDING the extensive use of iron in modern naval architecture, timber is not altogether driven from the field. The number of the wooden walls of old England are even now on the increase, and hearts of oak are still in demand, both literally and figuratively. For it is to shipbuilding purposes that ninety-nine out of every hundred oaks are devoted; and, therefore, the felling of those trees at this season of the year becomes, as it were, an event of national interest.

Anyone who has ever paid a visit to a shipbuilding-yard will not be surprised at the number of oaks that are yearly felled for naval purposes. For, although elm, and Dantzig, Memel, and Canadian firs are largely made use of in the con-truction of a vessel, yet of oak is it chiefly made. The "futtock-" teat firm its ribs are oak; the blocks upon which they are laid are oak; the stem and the sternpost—the main supports of the two ends of the vessel—are oak; the "strakes" of planks, that form the outside of the vessel are oak; the "trenails"—those long pegs that bolt together the frame-timbers of a ship—are oak; everything that is expected to stand the most wear and tear, is made of oak. The hundreds of trenails—on which the safety of the ship so much depends—are made of the soundest oak, of the most regular grain, and under-go some months of seasoning before they are used. The planking is also formed of the soundest oak, which has been sawn into pieces that sometimes more than thirty feet in length. But it is immaterial of what shape the tree may be, so that its timbers are sound: the straight trunks are cut up into planks, the crooked trunks into futtocks, and the oddments make treenails, or are otherwise useful. "The Converter,"—as the superintendent of this department is called—sees to this: and a very onerous duty it is, for he has to arrange into which the trunks are to be cut—that they be cut as little as possible crosswise with the grain of the wood: that they be not cut to waste; and, above all, that no unsound timber is used. The wood that determined on is then sawn, steamed, or dressed with an adze, according to the part which it is required to fill; and, in this way, nearly every oak that is felled in this country is made to form a portion of our wooden walls.

The oak family is a very extensive one, numbering nearly 150 species, but all posses-ing a family likeness in those characteristics of hardness, durability, slowness of growth, &c., that are common to the whole tribe. The commonest British oak is the *Quercus pedunculata*, which is considered the best wood, and the most valuable for naval architecture, although the other common English variety, the *Quercus sessiflora*, is equally good for sh pbuilding. It is of this latter species of oak that the roof of Westminster-hall is constructed, though Weale and others state the roof to be of chestnut-wood, brought "from Normandy, as Sir C. Wren thought." But, however this may be, we may rest assured that, whether the shipbuilder make use of the *Quercus pedunculata* or *sessiflora*, we shall, in either case, have the right oak in the right place.

A tree that takes 200 years to arrive at its full growth of 120 feet surely demands a little notice when it is cut down, even if it does not arouse our sympathetic feelings to intercede for its life, and bid the "Woodman spare the tree, and touch not a single bough," as was the case with the lady in the song. And when we reflect that this same tree will, in all probability, be fashioned into the rib of some leviathan of the deep, or be formed into the plank that separates the sailor from death, we cannot ook upon its removal from its forest home or country sward without feeling an interest in its fate far different to that with which we regard the fall of an elm or an ash. There are materials for thought and a suggestiveness of subject in the felling of an oak that could be turned to valuable account by the poet; and, as the poet and the painter are twin spirits, the subject addresses itself as strongly to the stainer of canvas as to the spoiler of paper. It has received illustration from the powerful pencil of Linnell, in a picture which is among those in the Vernon Collection; and no landscape artist has passed over the rugged grandeur and solid magnificence of "the brave old oak." If Tennyson could so far forget the respect due to its regal dignity as to say, in his "Amphion," that

> The *gnats* oak began to move,
> And flounder into hornpipes—

(a Royal *abandon* that surpasses the dancing of the masquerading bluff King Hal at Cardinal Wolsey's banquet) -yet he amply makes the *amende honorable* in his "Lines and Conversations" of that talking oak, the *gr* ouse and much-to-be-envied "broad oak of Summer-chace," whose knotted knees were deep in fern, and whose good fortune it was to be clasped and kissed, and slept under, and be made sonnets on, by a young lady who was as gamesome as a colt, and livelier than a lark, and who, Dryad-like, was to wear on her wedding morning a wreath

> Alternate leaf and acorn-ball

We are not prepared to state—as Cabinet Ministers say when they want to snuff out of a too pressing questioner—whether or not the arboreal hero was ever taken into the confidence of a similarly "gamesome" young lady. If so, it was to be envied.

But there it lies. The antlered monarch of the forest is laid low: its pleasant place on the gently-sloping hill and in the shade shall know it no more. There is a gap in the landscape where it once stood so proudly, and the clustering fern and velvet grass shall never again be shrouded beneath its outstretched arms. Some of them have been already lopped off, and those remaining are in imminent danger. There is the hoed physician, Dr. Woodman, with his upraised axe, who will cut off all those Briarean arms, as soon as his subordinates have stripped away the bark, and the monarch's once handsome form will be reduced to a shapeless trunk.

It is a busy scene, this oak-barking, and one in which young and old—man, woman, and child can be actors. While the young and active men swarm into the branches, and take up perilous positions aloft, the old men, and even the women, can be thumping away below, loosening (with the back of the axe-head) the bark of detached branches, or of those arms of the tree which have been brought near to the ground; while the children can find ample employment in the same occupation, or in piling into heaps the detached pieces of bark. When there is a good staff of workers, who can industriously ply their barking-irons and peeling-irons (which are like large cheese-tasters), or their axe heads, it is astonishing to see with what rapidity a gnarled and rugged tree can be converted into a sleek and shining specimen, that looks something between satin-wood and ivory. By dint of a little judicious thumping the bark's exterior is quickly exchanged for the polished surface—from which an instructive moral may be drawn by those who teach the ingenuous arts and the young ideas—and the peeling iron is made to do its work with great efficiency, as well as rapidity. Only the chief branches and arms of the tree are left for that purpose; all the lesser branches and twigs are bound up into "ords," with the other loppings and chips, which are to the woodman what dripping and fat are to the cook—his perquisites.

Oak-barking always makes a pretty scene. The number and variety of the figures, and their diversities of attire and posture, afford good material for the artist and amusement for the spectator. The tortuous branches of the felled tree are, here and there, brown with the yet unremoved bark, and, in other places, gleam white and peeling-iron (which are like large cheese-tasters), or their axe heads, it is astonishing to see with what rapidity a gnarled and rugged tree can be converted into a sleek and shining specimen, that looks something between satin-wood and ivory. By dint of a little judicious thumping the bark's exterior is quickly exchanged for the polished surface—from which an instructive moral may be drawn by those who teach the ingenuous arts and the young ideas—and the peeling iron is made to do its work with great efficiency, as well as rapidity. Only the chief branches and arms of the tree are left for that purpose; all the lesser branches and twigs are bound up into "ords," with the other loppings and chips, which are to the woodman what dripping and fat are to the cook—his perquisites.

Oak-barking *always*

basis of reality by possessing even but one certain fact, may, without literary dishonesty or critical blame, build up as large a superstructure of fiction on its author pleases. The reader is not invited, by such a work, to believe anything at all; he is not invited to believe on *that* authority even the facts themselves which are blended into its fictitious narrative; that is, it is not on the authority of this book he is asked to accept them as historical. He is expected to have other means of recognising their character, and whether he can distinguish them, or cannot, from the mass of unimportant matter, the author does not care, and need not care - except in so far as it may diminish the interest which he had expected that the reader in question would otherwise have felt in his production. In brief, if a book be so written as to be seen to be a fiction the author is responsible for none of its facts; but if it be written as a picture of *actual* instead of as a picture of merely *natural* incidents and scenes, then the author is accountable for its fictions. The same evident law of literary jurisprudence applies to the question of probability; and the case is one of the least-understood points in the whole range of criticism. For example, to relate incidents in a probable manner is an unpretentious artistic merit in writing; but, in narrating what never occurred, this merit may be displayed to exactly and precisely the same degree of perfection, and no more, as in telling the story of some real events. Nay, it is often more difficult to make what has happened not seem incredible (as is frequently exemplified in cases of legal trials) than to recount what is acknowledged to be purely fictitious, in so natural an order, and so excellent a style, that every body at once feels that such incidents might easily occur any day. Still more true is it that one writer can tell the fictitious more *probably* than another can tell the real. Now, it is one thing to seek to cull from the taste and our mind by telling a stories probably, and another thing to seek to teach us some positive reading of a given epoch by the same process. If the object of Professor Wheeler be to inculcate certain actual views, certain positive conclusions about real historical characters, he becomes forthwith responsible for everything merely conjectural to which in the course of his work, he may have given a prominence equal to that accorded by him to the ascertained and the attested.

In short, a book like this to deserve the highest praise should not be given to us as a book which will enhance our positive information, but rather our general powers; and this could have been done by a fictitious biography of any imaginary contemporary of Herodotus quite as well as by this imaginary biography of the real Herodotus himself; and with the former, additional advantage, too, of avoiding the danger of erroneous, the certainty of gratuitous, conclusions respecting true, though long-gone, characters and scenes. If these, we repeat, be probable, the proper conclusion for the reader is, not that he knows one jot more about them as actual special objects, but something more about human nature in general, and about the pervading guise which it wore during Pagan antiquity; not that his particular *information* is reliably increased, but that his taste, judgment, faculty of appreciation, and mental endowments are in the aggregate improved. All the labours, in fact, which belong to this department of literature—and we fearlessly call it the imaginative department - essentially the imaginative—do not teach in a direct manner, but they elevate. This is their proper mission—this their true end, and it is a great, a noble mission, equal to any scholastic services; superior to these when only and purely scholastic, pertaining more to real education, and less to technical instruction—more to the amelioration and enlargement of the intelligence than to the pedantry of arbitrary, though doubtless respectable studies. For this reason (and it would have doubtless seemed a paradox, had we not thus fully explained our meaning, and proved, we hope, the strict reasonableness of our views) for this reason, we say, we consider the most learned features of Professor Wheeler's book the very worst, and its least professor-like the best.

But this half censorious remark applies far less, if we may so express ourselves, to the author than to his work. He has committed, we honestly believe, a capital literary sin, and made a great artistic mistake; and the penalty which, we think, they will incur is this—that his production will not live. Not so the writer. Many an erroneously-conceived production has served to put its author's ability and attainments in brilliant light; he shows to his powers, and good judges feel that, be they wasted or misapplied in this instance to whatever extent they may be, they indubitably possesses them: and he then forth is a remarkable man. Nor are his acquirements the only merit evinced by the "imaginary biography of Herodotus;" extraordinary and indefatigable energy, and the grand power of elaborateness, are also conspicuous.

We have said enough to guard our meaning respecting the failure of this narrative exemplification in what its very nature necessarily aspires to effect - to guard, we say, our meaning from misconstruction; and therefore we may now, safely, we may now say with impunity, under certain reservations, that the book will prove even useful to many; but those who will thus profit by it are not the class whom, according to its intrinsic pretensions and by right, it ought chiefly to benefit. It is not a teaching book in the usual sense of the term. Those who would gain by it must be above their subject, not below it, or barely on a level with it. To these last, we fear, it can scarcely be no end but to spoil Herodotus, to discharm the Father of History, to wrench and to unhallow the first haunted ground of Grecian lore. But those whose appreciations are already sure and strong may go with this lanthorn through the twilight places of successful and unsuccessful conjecture, without losing in the value of a faculty of ransacking their faith in the mellowed beauty which, to us, has won from Time. They know the diamond in the enduring core of its simple but clear and steady cuttings, and all the rubbish originally rejected by the fashioner, and still more worn off by the friction of ages—but here revived—will only make them the better estimate the great spoilt child of the Nine Muses, when civilised society was young.

But still, by all that is venerable, the whole thing is but a learned desecration. "Arrival of an Athenian War Galley and Samian Merchantman at Thurium, B.C. 427." This brings us to "*Herodotus's Entertainment of the Somian* SKIPPER." Now, we know not whether Professor Wheeler will understand us when we say that there is a real, *bond fide* anachronism in his very language here, and there is more: there is the degradation of a station of a man, and an important mummy, united as a toy to those only who delight in the slang of Dutch or other modern social conditions. We do not, by such expedients, bring the young mind to the antique likeness where it stands, placid and noble, but we take this likeness roughly from its pedestal, wrap it up in the rags of the vernacular, and toss it as a doll for the giddy.

We had more to say; but it scarcely needs We are understood. Herodotus, we are convinced, would smile if he could see this redintegration of his ancient life, while fully acknowledging the abilities, acquirements, and industry of Professor Wheeler.

PHRENOLOGY APPLIED TO PAINTING AND SCULPTURE. By GEORGE COMBE. Simpkin, Marshall, and Co.

IN this age when Continental travellers publish accounts of their "Two Weeks' residence in Constantinople," or their "Day at Athens," and imagine that people take a passionate interest in their dinner parties and promenades, and other extraordinary events of a similar nature which they take the pains to record -in this age, when bilious young gentlemen, fancying themselves Byrons or Shelleys write melancholy verses for a fifth-rate publication; in this age, in the midst of the press pouring forth daily so vast a literary sewage that the popular mind threatens to be swamped with books—it is the duty of the critic to distinguish the true and necessary work, and to lay it at the feet of the public. Such a one is the work before us.

Of all that galaxy of names which are the glory of England few are more honoured than that of George Combe. He is one of those men who during their lifetime have been admitted into the temple of the Immortals in the most public manner, and are seen side by side with Montaigne, Bacon, and the other philosophers of whom the world is proud. Let us congratulate our English painters and sculptors on their good fortune in having a philosopher to criticise those productions of ancient times which serve them as models. If the faults of the great masters are allowed to pass unnoticed, the artists of the present day fall into error and excuse themselves by some old-brated example. It is clear, therefore, that any one who carefully and conscientiously points out such errors confers a lasting obligation on the noble profession of art and on all persons who take delight in art. The object of the work is to show that a knowledge of phrenology is necessary to the sculptor and painter in their representations of that most beautiful of material combinations—the human form. The course followed by which this object is attained, and all the reader to, this conclusion is interesting both as a specimen of logic and as an introduction to the subject:—

The human mind and body are the b ghest objects with which the painter and sculptor have to deal; and while the faculties of the one and the organs of the other are not scientifically known, correct representation of their combined effect must be extremely difficult. While, for example, the relations between endowment and corporeal form and expression are not ascertained, the rules of art, and the principles of judging of art, must to a corresponding extent remain empirical. The brain and nervous system are the organs by which mind is manifested in this life; and, in so far as art is concerned, the other portions of the human frame are merely its executive instruments. It is mind which gives to them their character and charm. The physiology of the brain and nervous system, by developing the science of mind, and general physiology, by unfolding the structure and functions of the other portions of the body, will remain the artist to understand the relations between particular mental endowments and particular corporeal forms, expressions, and qualities: and this knowledge should furnish one element towards constructing a philosophy of art

Mr Combe informs us in a subsequent chapter that the great masters, by their knowledge of general physiology, have produced admirable and valuable figures, in so far as the body and limbs are concerned; but that, owing to ignorance of phrenology, the heads are in many cases entirely incorrect. Connoisseurs of art are often known to object to particular productions, without being able to state their reasons This occurs, he informs us, in nine cases out of ten, results from ignorance of the laws of phrenology. We believe there are few who would be disposed to question the main facts upon wh ch that science is founded. It will readily be allowed, for instance, that a large intellect requires a large forehead: a head, on the other hand, of which the back por tion is unusually developed, will be found to belong to a mean, cruel, unprincipled nature. If, therefore, an artist represents a philo-opher with a receding forehead, shall we not conclude that he failed in the most important feature of his work from ignorance of the structure of the brain—or, in other words, from ignorance of phrenology? But the great masters never went to such an extreme as that. Their natural instinct—or, more properly speaking, their natural inspiration—although insufficient to ensure them perfect success, prevented them from falling into gross error. Speaking of Raphael's "Transfiguration" —which has been called the finest picture in the world—the philosophical critic observes—

The first impression which it made on me was far inferior to that which its reputation had led me to expect; but I delivered my own judgment and sought for instruction from artists. I was told that the composition—the balancing and arranging of the group of figures (so as to combine unity, variety and harmony) is perfect: that the drawing of each individual figure is perfect: that the expression of each in relation to his position and character, is extremely fine, and that the lights and shadows are managed with extraordinary success. Some of these opinions are disputed; but, allowing them all to be sound, still the impression on my mind remains that this is not the greatest picture in the world. I can now explain the cause of this limitation in recognising its supreme excellence. The spectators in the picture, and the most prominent of the disciples, are to a certain degree in a state of nervous flutter; their looks, attitudes, and gestures are those of fear or at least consciousness of being excited and agitated by an event which upsets the mental equilibrium. The excitement is delicately and gracefully represented; but it is a very prominent feature and is different from that calm, powerful, deep expression of perpexity and wonder which is exhibited by great minds.

The reader, although he may be unfamiliar with the picture referred to cannot but be struck by these remarks. Raphael was not sufficiently acquainted with the anatomy of the human head to be infallible in his representations of it The illustrious personages who in the spirit as to him during the production of the "Transfiguration" have not received justice at his hands. The disciples of Christ were not narrow minded, or weak, or cowardly, as represented by the painter; but brave and strong, and full of grand-ur, both of heart and intellect. Let it be clearly understood that no censure thrown about these observations is intended to be attached to the glorious memory of Raphael. The thing Mr. Combe insists on is, that no figure-painter or sculptor can attain perfection in his art without a knowledge of phrenology. He stipulates that the anatomy of the head may receive an equal share of attention with the anatomy of the body. We cannot refrain from indulging in another extract. In this instance the works criticised are statues, and on that account are even more specially liable to phrenological criticism:—

In Rome I saw a lovely group of statuary, representing Hero embracing Leander, just as he had emerged from the Hellespont. Her figure and attitude were admirable, and expressed beauty and attachment in the highest degree; but her head, the back of which was turned to the spectator, showed an enormous development of Philoprogenitiveness, combined with very large Destructiveness,—qualities which had no direct connection with the manifestation of deficient Adhesiveness,—the very quality which all her actions expressed strongly: and also deficient Cautiousness, Conscientiousness, and Firmness, indicating an inconsiderate, unfaithful, and unsteady character,—the very reverse of the attributes manifested in her conduct. The sculptor, who does not understand the significance of the forms and sizes of particular parts of the head may feel imperfections where these aberrations from nature occur, although he may not be able to discover the causes of them; while the ordinary observer will be painfully perplexed, as well as unconsciously felt, by all who understand the meaning of the forms. To them these errors in art appear like drawing Venus with a squint or Adonis with a twisted nose.

Such are a few specimens of the philosophical manner with which Mr. Combe treats the task which he has undertaken. We only regret that we have not room to quote still more largely, for no amount of praise that we could bestow would affect the reader half so agreeably as the author's own words. The whole work bears the trace of earnest thought, and reveals an intellect accustomed to grapple with the difficult class of abstract truths: the sixth chapter in particular commands our admiration. We venture to state that it is one of the finest discourses on painting and sculpture which the age has produced. Beautiful, and true, like *Polonius'* advice to *Laertes*, it carries conviction with it, and will probably long form the basis of all artistic philosophy of art. The whole of Mr. Combe's works, and this is no exception, are like those of every true genius, clear, concise, and emphatic. He never writes for the sake of writing, or deals in oracular muddle; but wields his pen for wise and lofty purposes. Witness, for instance, his treatise on the "Con-titution of Man" -a work in which all the seeming contradictions between natural and revealed religion are swept away like morning mist, leaving the eternal heaven of truth clear and unsullied. But it is not only as a propounder of abstract truth that he will be revered by posterity. He has had another and more special mission, that of rescuing a young science from the grasp of Bigotry and Ignorance—monsters which in all ages of the world have stood in the paths of heroes and great men that mission accomplished, he can now sit quietly in the light of his laurels, and, like Socrates of old, instruct his disciples in the great principles of moral and intellectual philosophy. Two mighty agencies are ever at work among men—not inimical, as the narrow-minded suppose, but friendly and co-operating, and as necessary to the perfect organisation as the right and left hand These agencies are Religion and Philosophy. It has fallen to the lot of George Combe to be an exponent of the latter; and, while his brother preachers are propounding texts from the revealed Bible, he is delivering sermons from that other book—Creation; so that these two works of God -Nature and Holy Writ—by mutually explaining and supporting each other, testify to their mutual origin in the Divine, and confound those foolish sectarians who endeavour to prove them antagonistic.

THE BRITISH CONSUL'S MANUAL. By E. W. A. TUSON, of the Inner Temple. Longman and Co.

Mr. Tuson's book, a practical guide for consuls, merchants, shipowners, and captains, in their commercial transactions, is well timed. It is less an historical account of the office of Consul—though the author kindly informs us of the origin of the name—than a complete digest of the laws and treaties which regulate the duties of our Consuls, and of the international laws and usages which govern their conduct in all countries. It is a useful book of reference for those officers, and such as have business with them; but it is a dry law compilation which the public generally will not care to read, and of which ship captains will from its very extent and completeness readily defer the perusal. This, however, is less the author's fault than the fault of the Government and Legislature, which have failed to simplify and reform the regulations and instructions that relate to consular duties

Our Consuls, sharing in the discredit of our diplomacy, of which they are a subordinate part, are not at present honoured with much public favour. To make them generally acceptable, or even generally useful, something should be done to restrict and define their duties and let the public know what it has to expect from a class which is intrusted with affairs, judicial, diplomatic, international, and mercantile. They come much more in contact with their countrymen in foreign countries than Ambassadors or Ministers do, and very little generally is the approbation they receive. In the Turkish dominions especially our Consuls are vested with great power by treaties, and few require to be told that this power has been frequently abused, and much odium cast on the English name and authority. A short time only has elapsed since the notorious affair of Don Pacifico, a Consul, endangered the existence of a Ministry, and involved the country in an unseemly contest with the Government of Greece. Our Consuls in the East will hereafter be multiplied, and will be so many additional points of contact between our own and other Governments. It will be recollected that our war with China originated from the first appointment of a Trade Superintendent, or Consul, when the East India Company's monopoly was done away with. Our Consuls—far more than our Minister—in the United States have been instrumental, by their bungling, in provoking the ill feeling, not yet wholly allayed by our apologies, arising from a fruitless attempt to recruit our armies in the States. A short time ago the Consul at Rio Janeiro tried to compel the captain of a ship bound home from Australia, laden with gold and passengers, which had put into that port somewhat leaky, to discharge her whole cargo On that the Consul would have obtained large fees; but the captain refused, in accordance with the wishes of his passengers, and conducted his ship in safety to England. The Consul put in a claim for the fees he would have been entitled to had the ship been unloaded, and caused great vexation and loss to the parties concerned. Consuls are, in truth, intrusted with great powers of annoyance as well as positive trade, and as the powers are frequently in the hands of non-barristers countries with which ordinary diplomatic relations are not maintained, Consuls may do a great deal of national mischief. Between the people of intertrading nations there are usually only relations of mutual kindness and mutual service, as between the Americans and the English, while between their respective Governments there may be only relations of hereditary ill will, epic jealousy, mistrust, and defiance. Thus the officers who are clothed with diplomatic functions, while their chief business is to protect trade, may become conductors of all the angry and hostile feelings of their employers. They represent the dignity of the Government and the nation of which, in their own persons, they often exaggerate the importance, and, numerous as they now are, they require to be as closely watched as the members of our higher diplomacy. We should therefore be glad to see their powers restricted and defined, and always confided to men distinguished by their acquirements, moderation, and coolness

We have no doubt that the present work will have its effect in bringing this desirable result. But such a work was needed, and of no controversy. The only fear is that, from its very compactness, it may be deemed uninteresting, and laid upon the shelf among those books of ref-rence which no one reads. The Messrs. Longman have spared no pains in having it duly announced, and brought before the public; and, should it fail to obtain a reputation, it will not be the fault of the publishers, or the author.

THE BRITISH EMPIRE—HISTORICAL, BIOGRAPHICAL, AND GEOGRAPHICAL By Numerous Contributors. With Introductory Dissertation by Professor CREASY. London and Glasgow: Griffin and Co.

There is an astonishing amount of useful and usable information in this well-arranged and extensive compilation, which fit it alike for the counting house or the parlour table, as a book of copious and ready reference; the first part exhibiting a lucid and accurate synopsis of our national history from the earliest times, with a judicious and intelligent preface by Professor Creasy, in which an able *précis* of the whole vast subject will be found. Part second comprises a series of biographical sketches of the principal names in British biography, in which a rapid bird's-eye view is presented of the main facts and most prominent points in each life, clearly and carefully written, and without overflowing full" enough for prolixity. The concluding and third part of this really excellent work is a luminous and copious geographical outline of the British empire, presenting at a glance a brief but distinct statement of every important city, town, or village in Great Britain, and its vast dependencies. This is a most useful section of the work, as in the peripatetic, though never-tarily brief, accounts of each a vast deal of valuable information will be found,—statistical, historical, and physical—and will be admirably adapted for the wants of the countless house.

The volume is enriched with several handsomely executed woodcuts, which most agreeably diversify and enrich its pages, and is truly a miracle of concentrated information and knowledge.

## *TO CORRESPONDENTS.*

E. N., Leicester.—General Prince Napoleon Joseph Charles Paul is the only son of the ex-King of Westphalia, Jerome Napoleon, brother of Napoleon I, and now a Sis shal of France. John Bernadotte, late King of Sweden, married Bernardine Eugenie Clary, the younger sister of the wife of Joseph Bonaparte, King of Spain. This Eugenia Clary, now 74 years of age, is the Queen Dowager of Sweden. Her and Bernadotte's son, Oscar, present King of Sweden, is married to Josephine, daughter of the former Prince Eugene Beauharnais, the brother of Napoleon's first wife, who was mother of Napoleon III.

J. B., Chelsea.—Charles I. half-pound piece, 1642, struck at Oxford.

SOUTHGATE, N.—We imagine your coin to be nothing more than a brass piece of Nuremberg.

KILKENNY.—1. Copper coin of Gustavus Adolphus of Sweden, of the value of 1 sett. 2. Copper coin of the Great Mogul, Shah Allum. 3 Coin of the late Sultan. 4 and 5. Coins of the present Sultan.

EDINBURGH, GEMMA.—1. Coin of Zurich. 2. Coin of Carlo Ruzzuli, Doge of Venice. 3. Coin of Savoia.

ANNSCRIBER, Warrington.—We cannot undertake to inquire into the subject of your communication, which may, possibly, arise from an oversight.

H. G. P.—It is not impossible for the sale of his late servant

CLINTON.—The address of the Church Missionary Society is Salisbury-square, Fleet street

THE YOUNG, Leeds.—See the *Now Quarterly Review*.

A CORRESPONDENT.—The heating apparatus at Farnborough Church, described in the ILLUSTRATED LONDON NEWS of April 5, was manufactured at the Iron foundry of Mr Wood, Knutsford, in Cheshire.

A SCHOLAR, who professes to know so much chemistry as to theorise upon Combustion, might have thought that Mr Ansell would guard against naphtha by taking a piece of clean and dry potassium; and he might also have seen that Mr. Ansell answered the latter question by stating that it was ascertained in the mode of making chemical experiments; and had, therefore, told him the safest mode of proving an undoubted fact (doubted by professors of chemistry) by saying that the bottle should be filled with oxygen, the cork and pare off its surface (to ensure separation of naphtha), and place the clean and bright metal in to an ordinary bulb-tube; let the bulb-tube be previously filled with the two-way tube provided with stopcocks of glass, through one of which oxygen can pass, and through the second carbonic acid A bung arranged, start as follows:—Fuse the potassium by a spirit-lamp, when fused admit oxygen to burn off any naphtha which may chance to be there, and while the potassium is in full combustion shut off the oxygen and admit the carbonic acid. The potassium will continue its combustion, and he will find carbon mixed with the residuing substance of potassium; and if he hoped no knowledge of chemistry will direct him how to find and prove it

I. N.—The arms of the East India Company, re-established by Act of Parliament in 1698, are as follow:—Az a cross gu, in the dexter quarter an escutcheon of the arms of France and England quarterly, the shield ornamented and regally crowned, or. Crest: A lion rampant guard nt or, supporting the arms of his fore-fees a regal crown ppr. Supporters: Two lions rampant gardant or, each supporting a banner erect or, charged with a cross gu. Motto: "Auspicio regis et Senatus Angliæ." Prior to 1698 the East India Company had no other arms, which had a sphere for a crest, two sea-lions for supporters, and the motto "Deo ducente, nil nocet."

RECTOR.—The party mentioned is a Knight Grand Cross (Civil) of the Bath, a Knight Commander of the Hanoverian Guelphic Order, a Knight of St. Louis, and a Knight Grand Cross of the Redeemer (a Greek order).

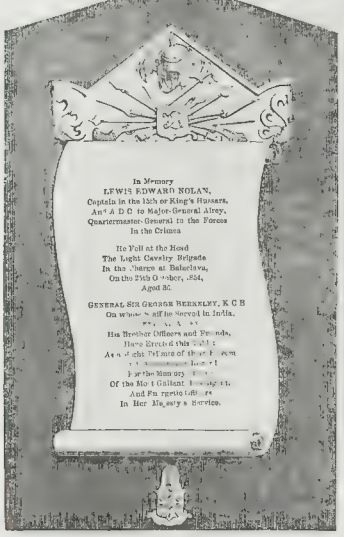
## NEW UNIFORM OF THE COLDSTREAM GUARDS.

SEVERAL modifications and improvements have of late been made in the costume of the Coldstream Guards, which, by the aid of the annexed Engraving, we shall be able to render our readers acquainted with. The *Night Sentry* has been made almost luxuriously comfortable, even in the most severe weather, by the new great-coat which has been recently given him. The old great-coat had a cape scarcely covering the shoulders, whilst the new one, with a cape extending to the waist, and without sleeves, is intended to be worn over the belts and the old great-coat, and affords a degree of warmth highly desirable upon cold winter nights in an exposed situation. The *Drill Sergeant's* collar—as indeed, have also those of the entire corps—has been considerably reduced in depth, and the gold facings and star have been decreased in proportion. A shoulder-straps of blue cloth, edged with gold, have been substituted for his large box epaulets; and the breast of the coat is made to turn down at the option of the wearer, showing its blue facings. The *Colour Sergeant* has now a plain blue cloth collar, decorated with a star, but no gold lace. The *Drum Major's* massive epaulets have been exchanged for wings of gold lace with bullion fringe, and the facings on the breast have been widened at the top and sloped more pointedly towards the waist. The Drum Major is represented in our Engraving with the exceedingly handsome silver-mounted black drum-stick six feet long," presented by Captain Charles Baring to the Drums of the Coldstream Guards, 1855." The *Barrack Guard* have had their convenience consulted by the substitution of the new un-fitted blue frock-coat with white band for the hard unbending cap they used to wear. The *Drummer* has a new coat, opening in front and narrower, must make him feel more at ease, and wings of blue cloth and of blue and white fringe have replaced his old epaulets. The *Major's* uniform has also undergone a change: a star and crown decorate his new collar, and his epaulets have been condemned; a plain gold cord on the left shoulder to keep the sash on being the farthest attempt to replace them. His sword, formerly with leathern bow with steel scabbard, is slung so as to be available either on foot or horseback. It will be advisable to notice here also the change which has been made in the manner of wearing the belt and sash. The sash is now worn over the left shoulder instead of round the waist; and a waistbelt has been substituted for the sidebelt, which was formerly worn over the right shoulder, transferring the weight to be carried from the chest to the hips.

NEW UNIFORM OF THE COLDSTREAM GUARDS.—(SEE PRECEDING PAGE).

THE SPRING MEETING BEFORE LIVERPOOL—THE FIRST FLIGHT. SECOND RACE.—(SEE PAGE 465.)

## MONUMENT TO CAPTAIN NOLAN.



In Memory
LEWIS EDWARD NOLAN,
Captain in the 15th or King's Hussars,
And A.D.C. to Major-General Airey,
Quartermaster-General to the Forces
In the Crimea
He Fell at the Head
The Light Cavalry Brigade
In the Charge at Balaclava,
On the 25th October, 1854,
Aged 36.
GENERAL SIR GEORGE BERKELEY, K.C.B
Colonel of the 15th Hussars
And Deputy Adjutant General
In the Bengal Presidency
Is the Memory
Of the Most Gallant Brother
And Professional Friend
Who Fell
In Her Majesty's Service.

THE above memorial has lately been erected at Blaxstone, to the memory of the brave Captain Nolan, who fell at Balaclava.

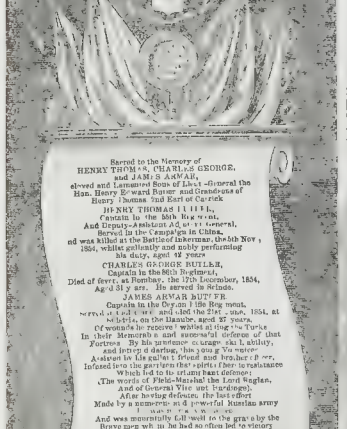
## MONUMENT TO THE MEMORY OF CAPT BUTLER,

### THE GALLANT DEFENDER OF SILISTRIA, AND HIS TWO BROTHERS.

THIS mural monument has been erected in the parish church of Thomastown county Kilkenny, to the memory of Capt Sir James Armar Butler, the gallant defender of Silistria, of whom some months ago we gave a Portrait in this journal; of Captain Henry Thomas Butler, of the 55th Foot, who fell whilst gallantly fighting at the Battle of Inkerman; and of Captain George Butler, of the 86th Foot, who died of fever in Bombay in December, 1854. These gallant brothers, the sons of Lieutenant-General the Hon. Henry Edward Butler, and grandsons of Henry Thomas, Earl of Carrick, all died within a period of six months whilst gloriously fighting in the cause of their country.

The monument consists of a groundwork of black marble, containing a scroll in white marble, bearing the inscription above.

The scroll is surmounted by a variety of military emblems, as will be seen by the illustration; above this are the family arms; and, strange to say, the shield bears no other emblem than the crescent, under which



Sacred to the Memory of
HENRY THOMAS, CHARLES GEORGE,
and JAMES ARMAR,
elyed and Lamented Sons of Lieut.-General the
Hon. Henry Edward Butler and Grandsons of
Henry Thomas 2nd Earl of Carrick
HENRY THOMAS LIEUT.
Captain in the 55th Regiment,
And Deputy-Assistant Adjutant-General,
Served in the Campaign in China,
nd was killed at the Battle of Inkerman, on 5th Nov.
1854, whilst gallantly and nobly performing
his duty, aged 34 years
CHARLES GEORGE BUTLER,
Captain in the 86th Regiment,
Died of fever, at Bombay, the 17th December, 1854,
Aged 31 years. He served in Scinde.
JAMES ARMAR BUTLER
Captain in the Dragoon Guards
Who, at the age of 29 years, 1854, at
Silistria, on the Danube, aged 37 years.
Of whom he received the following Testimony
In their Memorable and successful defence of that
Fortress By his presence encouraged
and lastly, and
Actuated by his gallant friend and brother
Infused into the garrison that spirit
Which led to its
(The words of Field-Marshal the Lord Raglan,
And of General Vivian and Jervis.)
After having defended the last effort
Made by a numerous and powerful Russian army
And were mournfully followed to the grave by the
Brave men whom he had so often led to victory
"They were lovely and pleasant in their lives and in
their death they were not divided" II Samuel I. 23
"He calleth His own sheep by name and leadeth them
"The righteous hath hopein his death" —Prov. xiv 13.

MONUMENT TO CAPTAIN BUTLER, AND HIS TWO BROTHERS, AT THOMASTOWN.

banner two of the sons died. Under the arms is a medal bearing the words "China, Alma, Inkerman, Scinde, Caffreland, Silistria." From this last emblem are suspended four decorations—three being service medals of her Britannic Majesty, and the fourth a decoration from the Sultan, being a reward conferred on the gallant defender of Silistria. On each side of these emblems are two colours; on the left being figuratively displayed the three swords worn by the three brothers.

This monument has been erected at the sole expense of the hon and gallant father of the deceased; the designer being Mr Gaffin, of Regent-street. The mention of the name of Thomastown revives many historic recollections, particularly in the minds of those who have read the lines of Swift. Captain Matthew, the celebrated swordsman, and other celebrities. According to a work called "The Heroes of the Crimea," published by Mr Ryan, Captain Butler, the hero of Silistria, was the first British officer who drew his sword in defence of Turkey.

## MONUMENT TO LIEUT. OUSELEY, R.N., AT KIEL.

THE present war has doubtless caused but too much mourning and anguish to many hearts, and has rendered desolate too many homes. It has, however, not only produced feats of the most brilliant courage, and called forth, in the highest degree, the rarer quality of heroic endurance, but has also elicited striking and touching examples of the kindly feelings engendered by the softening and humanising principles that influence modern warfare. Thus the treatment of prisoners and disabled enemies has generally been marked by kindness and care, and even the less civilised tribes who have taken part in the late campaigns have, in many instances, tempered the traditional ferocity of their practices in war, and emulated the humanity of western combatants. Let us hopefully trust that these happy innovations on the barbarous war-code may be permanently adopted by many who have fought on either side during the last two years. But it is in the daily interchange of friendly offices among those of the same corps, or serving on board the same ship, that the kindly feelings of brotherhood among comrades are developed and ripened; while a thousand opportunities occur of knowing and testing the good qualities of companions and messmates, and forming links of friendship that are never perhaps so strong as when commenced in early youth and riveted by exposure to the dangers and difficulties of naval and military life. A pleasing instance of these kindly feelings among comrades is afforded by the erection of the Monument of which a drawing is annexed, by the messmates of Lieut. John R. Ouseley, of H.M.S. *Pembroke*, who died at Kiel in October last, from the effects of exposure during the bombardment of Sweaborg. Too ill to return to England when his ship was ordered to the West Indies, this young officer was landed at Bellevue by his kind and considerate commander, Captain Seymour, in the hope that quiet and the pure air of those picturesque and salubrious heights might restore him to health.

MONUMENT TO LIEUTENANT OUSELEY, R.N., AT KIEL.

Mr. Ouseley had served on board the *Duke of Wellington* during the previous operations in the Baltic in 1854 and was at the taking of Bomarsund. The flagship anchored in the harbour of Kiel on the return of the fleet to England in 1855, and then his former messmates learned the death of their comrade; and, with feelings that do honour equally to themselves and the object of their regret, caused this monument to be placed over his grave, in testimony of their regard and esteem.

The monument, seven feet high, simple in form, is situated in the pretty cemetery of Kiel, on a green slope appropriately close to the beach of the Kiel-less Baltic. Near it are the graves of some of our gallant allies, who thus, as in but too many other instances, and on more distant shores find a common resting place. There are inscriptions on both the front and back of the monument—one simply recording the birth of Lieutenant Ouseley at the British Legation at Rio de Janeiro, during the mission of his father, Sir W. Gore Ouseley, to the Court of Brazil; and his death at Kiel, at the early age of twenty one. The other records the erection of the monument by the officers who served with him on board the flagship, as a mark of their esteem and respect. Two quotations from Holy Writ are added:—"I am the Resurrection and the Life," and "Blessed are the pure of heart, for they shall see God."

Some circumstances incidentally connected with the subject of these remarks brings forcibly to mind the blessings conferred on mankind by modern science in cases of this nature. Not only was Sir W. Gore Ouseley summoned to his son's bedside in time to sooth the last days of his existence, and to surround him with those comforts and attentions which only a fond parent's affection could so effectually bestow; but medical advice, and even prescriptions, were forwarded from the family physician in London, by means of the electric telegraph. It were idle to hope that marks of esteem and affection, such as that so gracefully and kindly offered by the officers of the *Duke of Wellington*, however gratifying to surviving friends, can succeed in healing the anguish of a parent's heart at the loss of a beloved and, from all accounts, most deserving son; but such proofs of regard on the part of his comrades cannot but be deeply and gratefully felt by his family, while the good feeling that evinced due honour to the profession to which they belong, and must command the respect and warm approval of all classes of their countrymen.

DEAD LETTERS IN AMERICA.—The total number of uncalled-for (or "dead") letters that have accumulated in the post offices of the United States during the current year is put down at five and a quarter millions, of which 46,000 came from Cologne, 26,000 from England, 7500 from Canada, and 4000 from Bremen. All these letters had been duly advertised in the most widely-circulated American journals, and yet their owners could not be found.

THE POLISH LEGION AT SCUTARI. As soon as the news of the conclusion of peace became officially known to Count Zamoyski, General Commanding the Polish Division of Cossacks [illegible], the following order of the day was addressed by him to the troops [illegible] April 2, 1856. Officers, Non-commissioned Officers, and Soldiers, [illegible] were the Allies and Russia. The world may justly greet with joy the [illegible] of a war and of sacrifices which have proved unprofitable to it. As for us whose sad fate it is to see the realisation of our hopes once more removed by this peace, there is one thing that can console us—viz., the evidence of the fact established by these events, that it is impossible to vanquish Russia, or to establish firmly the security of Europe, without our co-operation. It is clear that the Polish nation must weigh powerfully in the balance of the future destinies of the world, although its influence has not only been underrated, but almost repelled, by the Western Powers. Russia, who appeared before to defy with scorn the most formidable armaments of the West, consented all of a sudden to undergo onerous conditions of peace humiliating to her pride as soon as she saw Western Europe turn its attention to Poland, and the formation of the first detachment of a Polish national army for the purpose of restoring Poland to its independence."

## THE GREAT CEMETERY AT WOKING.

COMMON SENSE, when left to freedom of action, produces, in a greater or less degree, the same efficiency of results. It is this truth, acting in connection with one of the strongest instincts of human nature, which led the varied succession of races, occupying England at an early date, to select the sunny downs and open heaths of the southern counties for places of sepulchre; and it is this same sense, strengthened by the countless admitted truths of advanced knowledge, which has led to the adoption of one of the loveliest of these sites as a Great National Cemetery.

A glance at the Ordnance Survey shows that it was amongst the undulating levels to the south of London that the most fitting site would be found for a burial-ground to commensurate with the needs of the metropolis, and with the requirements necessitated by advanced opinion on the great question of extramural sepulchre. Throughout the mass of Parliamentary evidence elicited between 1842-47 on the urgent question of the burial of the metropolitan dead this fact strikingly appears; and of the sites examined with a view to use as a national cemetery not more than two were to the north of the Thames. But Parliament effecting little beyond enlarging and strengthening public opinion, it was reserved to the Necropolis Company to purchase a site, and open a cemetery worthy of the term of national. The due requirements for such a place were so many and so opposite, as to create, as it must have seemed at first, entire and hopeless impracticability; but, through boldness of idea, prevision as to the future, and a determinate course of action, the larger portion of those obstacles were, from the first, overcome. Most singular to say, throughout the mass of Parliamentary evidence before referred to, and though many of the most earnest promoters of a great change in the burial of the metropolitan dead were men of scientific attainments, not once was the idea broached that steam might be used as motive power in the conveyance of the dead. Thus their range was confined to almost suburban limits; whereas, the Necropolis Company, acting upon the idea from the first, could not only secure such a broad extent of land as should, in pursuance of enlightened Continental usage and opinion in reference to the burial of the dead, give to each corpse a separate grave, but fix upon a spot that, without undue panegyric, is worthy the description of a Sylvanus in prose or a Pope in poetry.

To enjoy these beauties there needs the golden sunlight of the spring or summer day. We have the dense city, and reach the open country with the speed of the winds. We pass villages, and cottages, and farms, fields, and open tracts of country; we see in the distance woods and heathery uplands. If it be summer, rivulet and little river and sedgy pool lie silvered in the sunlight, and wild flowers waft to us their scent from hedgerow banks, from fields, from blossoming heaths. By-and-by the scene becomes wilder and more solitary. The dun heath reaches us on either hand, and we seem, whether so or not, to toil up a rugged ascent, to break speed, make pauses; and then on, on our difficult way. This sense of ascent adds inconceivably to the coming effect. In an instant the funeral train is unlinked from the giant power which led it on, and glides gently down into the undulating plain, which has thus been made one of the great burial places of mighty London.

The whole scene is most varied and extensive, though a succession of encircling hills bound this extent and lend the charm of peacefulness and solitude. To the west and south these hills are very striking. Those towards Hampshire lie as we can see, amid tufted wilds and solitary heaths, and bear to their summits of rugged nature; whilst those to the south are fringed by woodlands, and softened, in some degree, by cultivation.

The extent of land possessed by the Necropolis Company is upwards of two thousand acres, more than four hundred of which, of most appropriate soil, are already set apart, and used for burial purposes. Even this portion of the vast whole is in extent more than one-fourth that of the metropolitan cemeteries and graveyards taken aggregately. In the latter—which do not altogether exceed 280 acres—50,000 human beings were, till the most recent date, annually interred; or, more correctly speaking, desecrated. Under such a system there could be neither an appropriate decay of the dead nor safety for the living; for, not only has the clayey and antiseptic quality of the soil of London rendered it in all ages more or less unfitted for burial purposes, but the evil was enormously increased by crowding the dead together in layers, or accumulating it in pit-like graves. For centuries this system of burial, arising partly from the necessary limit of space, had been one of the evils of London. Newton of this may be found in most of the old writers; and the eagerness with which new graveyards were opened without the walls whenever opportunity occurred, or addition made to those within, points to the same fact. Indeed, all the great epochs of a rapidly increased population were more or less connected with this question of extramural burial. This was eminently the case in the reign of Elizabeth, when the dead were carried out for interment in Moorfields and Finsbury. Again, at the Restoration, when Winchester-park and Bankside, in Southwark, were broken up and built upon; and again at the close of the present century. At this last date many new burial-grounds were formed in places then suburban; but now, as true legislative judgment might have foreseen, surrounded by densely-populated districts, and with all the evils intramural burial again and again repeated. Thus we see the folly of temporising with questions of this kind, or viewing them from any merely immediate point of view; and it is not till we bring prevision to bear, till we legislate in an enlarged and generous spirit for future generations, as well as our own, that we shall finally or rightly solve the three great and urgent questions of metropolitan social life—namely, the burial of the dead, the water supply, and house accommodation.

It is this enlarged, we may almost say philosophic, view of the question at issue that has been from the beginning the great distinguishing feature, as well as support, of the Necropolis Company. Its resolve to carry out the enlightened Continental usage of giving to each corpse a separate grave, and the binding itself to performance by a rigid clause in its Act of Incorporation, elicited from the late praises of the able men who drew up, in 1852, the valuable report on Metropolitan Burials. Further, its prevision in purchasing so vast a tract of land as shall meet the need of generations yet unborn, and the liberality and earnestness with which it has announced the resolve to make it a great graveyard for London the most beautiful garden in the world—thus associating the solemnities of death with nature in her loveliest and purest aspects—must be commended by all those who see the foundations on which social progress and public morality truly rest. As we raise our way amidst winding walks and future avenues; as we pause upon beautifully-preserved patches of the ancient heather, listen to the murmur of countless bees look down, perhaps, into some newly-dug grave, waiting dry and spotless for its coming guest; if we breathe—if it be May or June—the accumulated, almost overpowering, scent of countless American plants, then in all the luxuriance of leaf and blossom; if we rest beneath the pleasant shade of acacia or beech tree, oak or cedar, yew or drooping ash; if we seek the pleasant, low, verandahed, simple refreshment-houses; if we go beyond, and ascend the turfy hillocks on which lie the primitive looking little church and chapel seen in our illustration; if we glance within upon the heavenly sunlight of the summer day flooding the tessellated floor, and flickering amidst the shadows of the wood-wrought roof; if we look from door to door, to the scene beyond on either side, of fields, woods, rus-et heaths, and distant hills, that in their green yet sterile wildness must be ever solitary and cheering out the world, we can but rejoice that our lot is cast in an age of ameliorations, and that countless generations shall rest here—honoured in their dust, when their varied work be done. Further,—as the corpses brought to either of the reception-houses by the funeral tender are now taken each one its separate way, followed by its mourning group, and by paths where privacy is unbroken, and none but soothing and religious influences around,—when amidst this scene, the clergyman or minister, unhampered by other duties, as in the city parishes, reads reverently the prayers for the dead,—when all which is this taking place tends to elevate the dignity and self-respect of human nature, and create a sublime idea of the great mystery of the grave, we perceive by contrast, more and more, what the evils of city and suburban burial have been, and what an educative process lies within even this portional one of their reformation.

As was likely to be the case from the general interest taken throughout by the educated classes of the metropolis in the question of extramural burial, Woking Cemetery, as a place of interment, is rising rapidly into note. Some of the aristocracy have likewise graves here, thus making good the unvarying rule, that it is the

(*Continued on page 464.*)

THE NAVAL REVIEW.—SMITH TESTIMONIAL FUND.—The Provisional Committee of the above Fund feel that they cannot allow the magnificent display of Naval power on Saturday last, as well as it gives the profit and interest of all classes of their countrymen, without again appealing to the generous sympathy in favour of the great reform from whence its merits and claims to have been duly derived the public munificence of that distinguished officer.

It is well known to point out that every vessel of that force, from the first-rate to the gun-boat owes her special capability, when in force, a number of screwing and sailing, to the special application of an invention which, though known and often tested before, scarcely regarded as practicable, was by Captain Smith brought to the practical test of service navigation in the year 1837, however the practical test of screw navigation was confined to the first-rate of the "Archimedes," the first that was constructed.

At this, a meeting was assembled at Spithead, as well as the entire fleet of every description, which was to be assembled for the occasion, the "Archimedes" itself, the first vessel of the kind ever constructed, and one of the 3rd Rate, was also present, and the Admiralty were pleased to order the "Archimedes" to be fitted with a direct trial of the comparative merits of the screw and paddle wheel propelling, which was accordingly done, and the "Archimedes" was towed out of Portsmouth Harbour by the "Alecto" paddle-wheel steamer, and the "Rattler" screw steamer

THE GREAT CEMETERY AT WOKING.—GENERAL VIEW

(*Continued from page 462.*)

enlightened and easy in circumstances who are generally the first to perceive and adopt the advantages connected with the more important social reforms. Some few of the great London parishes have burial allotments here, for mere distinction in connection with the grave, as has been the case in some of the suburban cemeteries, would be invidious in reference to one that, by its extent, beauty, and general management, deserves the term "National." Hither the wealthy and respectable are removing the remains of relatives from the graves and vaults of the metropolis; and hither the Nonconformists are bringing the long-interred dead from even the once-considered sacred place of Bunhill fields—called so finely by Southey the "Campo Santo" of Dissenters. But it is a law that moral and social advantages permeate as surely down through the strata of society as water finds its level. In spite of little knowledge, in spite of ignorant opposition from those interested in a different state of things, the middle and working classes of the metropolis will not be slow in perceiving the advantages of extramural burial, conjointly with a management that frees them from extortion. For if all classes are interested in the matter of cheapness of interment—the working classes are especially so, considering the great ratio of their dead to that of the aggregate population. In Paris and many of the German States, not only has burial, strictly as such, but its contingencies, been embraced under one scheme of management. Indeed, the question cannot be permanently or rationally dealt with unless under a plan of wide generalisation. To merely provide decency of sepulture was not, and is not, all. This the Necropolis Company from the first perceived. It perceived that if it was to work out with any degree of efficiency the question of extramural burial, it must be its own undertaker, and provide a reception-house, as well as railway transit. This it has done accordingly. Its tariff of charges, framed on those of Continental States, shows to what an extent combination may reduce cost. In 1849 it was calculated that £626,664 was spent in the metropolis in the funerals of all classes, being at an average of £14 19s. 9d. per head on all persons above the class of paupers, whilst at the same time it was shown that the expense of the materials supplied for funerals admitted of a reduction under general arrangements of at least 50 per cent. This has been more than effected by the tariffs of this company. The funeral of a person of the middle ranks, instead of costing, as Parliamentary evidence showed, from £40 to £50, costs in their hands, at the highest, £14 14s.—this including all charges of coffin, trappings, transit, and a grave in perpetuity. So on in all other cases. Further, it may be said that a staff of officials, trained to their duty, and gathering experience as they proceed, are much more likely to carry out with reverence and efficiency the public trust confided to their care than a host of low persons, responsible to no authority, and with no motive but that of gain.

# THE ILLUSTRATED LONDON NEWS

No. 797.—VOL. XXVIII. SATURDAY, MAY 3, 1856. [WITH A SUPPLEMENT, FIVEPENCE.

## PEACE RATIFIED AND PROCLAIMED.

DIPLOMACY has settled the affairs of Europe, or fondly hopes so. The War is over. The Russian and the Allies have interchanged courtesies at Sebastopol. The late gallant defenders of the northern forts have opened the eyes of their late assailants, and obligingly informed them how they might and ought to have taken Sebastopol—both north and south—many months ago; how untenable the fortress appeared to the most enthusiastic of Russians after the great day of the Alma; and how, after the capture of the Malakoff, Prince Gortschakoff expected nothing less than to be compelled to lay down his arms, or to be routed from the Crimea. Paris is delighted because there is peace; and because, before it was obtained, the French took the Malakoff, and the English did not take the Redan. London is not quite so much delighted, but thinks it its duty to be satisfied, or to appear so, and congregates quietly in its countless multitudes, to see a shabby procession pass from St. James's Palace to Charing-cross, Temple-bar, and the Royal Exchange; and to look at, not to hear, a herald, in mediæval and ridiculous costume, reading the proclamation announcing the fact that Russia and Great Britain are no longer foes, and that all Europe is at peace.

History will record of the war thus concluded that the British people made it: that they forced an unwilling Government to undertake it, because they believed it to be just and necessary, and not to be avoided without peril and dishonour; that they cheerfully contributed their treasure to its prosecution; that during its continuance they never had occasion to blush for any decay of valour or heroism among their soldiers or their officers;—that it was the most disinterested and generous war ever waged by any nation; that the questions which it desired to settle had been accumulating for many past generations; and that the settlement which it had a right to expect would, in all human probability, have secured the peace of the European Commonwealth for many generations yet to come. History will at the same time have to record of the peace made in April, 1856, that the British people took no part in it; that it was arranged at Vienna and Paris; that the public had no opportunity of knowing its stipulations until dissatisfaction with them was of no avail; that it was the work of a few men, nearly all of whom were irresponsible to the nations which they represented; and that, when concluded, announced, ratified, and proclaimed, there was nothing for the nation to do but to accept the fact, and to make the best of it. To say that the peace is popular is to say that which is not. To say that the people hope that it will be of long continuance, and that they feel the national energies to be not only unimpaired, but stronger than at any previous period of our annals, is to say that which cannot but be evident to all who look around them, and who know how to gauge the feelings of their countrymen.

Having gone through the perils of the War, the nations of Europe will now have to consider the perils of the Peace which their Governments have made for them. Statesmen who make it their rule never to see anything that is disagreeable, nor to do anything until they are compelled to do it, have pertinaciously insisted that the late war was solely undertaken in defence of the integrity of the Turkish Empire. With unimpeachable logic they argue that, the integrity of Turkey being secured, there is no longer anything to quarrel about, and that Europe, as a necessary consequence, relapses into the *status quo ante*. They have no call, no mission, no business, no right to discuss any subject but the one before them; and, having made what they deem very fair and just terms for Turkey, without having pressed with harshness or severity upon Russia, they shut up their writing-desks, wipe their pens, and bid the world make holiday. The fire, they say, has been put out. Should it burst forth in a new place hereafter, it shall be put out again—if diplomacy can do it. If not, the time has not come. They inform us that we have locked the stable-door in Turkey, and made it quite secure against any future marauders; and ask why should we lock the pantry, or see to our outer walls, when there are no thieves in any other part of the domain? Sufficient for the day is the evil thereof. Let there be illuminations and fireworks for the multitude; let there be snuff-boxes set with diamonds for the Plenipotentiaries and Ambassadors; and let each nation look to its own affairs, and prosper in the best way it can, until another turn in the wheel of its

PROCLAMATION OF PEACE AT CHARING-CROSS.—(SEE NEXT PAGE.)

destinies shall bring it into conflict with its neighbours." These are the sentiments that come to us from Paris and Vienna; and in which the nations of Europe, Great Britain included, are expected to acquiesce.

And herein lies the peril of the new state of affairs which will commence with the Peace of 1856. The Conference of Paris, though it tried hard, could not altogether ignore the fact that the Governments are powerless to effect any permanent or satisfactory settlement of the affairs of Europe, unless they take their subjects into their confidence; and that social Revolution may undo in one hour the work that it has taken Diplomacy years to effect. If we look around, we do not see signs of stability in the institutions of any first-rate European Power, with the single exception of Great Britain. Can it be said that France feels herself secure, when Count Walewski thought it expedient to threaten the small but independent kingdom of Belgium with the displeasure and the implied coercion of France, if the freedom of the press within Belgian boundaries were not immediately restricted? Can it be said that France is of opinion that the question of the future of Italy is decided? Can it be alleged that Sardinia does not look sooner or later to possess Lombardy and Venetia?—that Austria would not be gladly rid of the perilous honour of holding Galicia, and her share of the spoils of Poland, if she could get an equivalent?—that England has not a religious as well as a political antagonism to the Papacy and its absurd and mischievous form of government?—that France does not share this political dislike against the Pope as a temporal Sovereign, more especially if he continue to sit in Rome?—that the German people are not greatly dissatisfied with the political constitution of Germany, or the liberty and independence which are permitted to them under it, by the great military monarchies of Austria, Prussia, and Russia?—that Turkey herself does not feel aggrieved, insulted, and impoverished by the peace, to which she has been compelled to become a party?—or that Russia, having been "let off" so easily, will not lie in wait for another opportunity of recovering the prestige, the honour, and the influence which she has lost; and of forming new alliances, by which she may take vengeance upon one or both of the great Powers that were so recently opposed to her? Even whilst we write, intelligence reaches us that the Circassians, whose existence has been ignored altogether by the Plenipotentiaries of Paris, have sent a deputation to Constantinople to request the recognition of, and a guarantee for, their independence from England, France, and Turkey. Thus we may perceive that there are but too many subjects of future disunion and perplexity among the Powers of Europe. These and other things are sufficient to prove that the day is coming when it will be discovered that the Plenipotentiaries of Paris have procrastinated much—but settled little.

The people of these islands may well look back with pride upon the motives which animated them during the war; upon their exertions and upon their sacrifices, upon the bravery of their soldiers and their sailors, and upon the patriotism of the whole nation. This, and the inestimable consciousness of a great duty gallantly performed, are all the satisfaction that will be allowed them. A hundred millions of money, and the lives of many thousands of brave men, have been expended. If there be nothing more to show in return for this noble sacrifice than the memory of Alma and Inkerman, and the Peace of Paris, it is not the fault of the British people. Their hearts have been sound, and their judgment has been right, on the whole question. They have now been led into the paths of peace. We hope they will remain there. Certain it is that they will not be led out of them in support of Absolutism in any part of Europe, or for the coercion of any nation that desires to retain or to work out its own freedom and independence.

## PUBLIC PROCLAMATION OF PEACE.

THE announcement on Tuesday morning that peace was to be formally proclaimed that day took the public completely by surprise. No official communication had been made on the subject, beyond the order—posted in conspicuous places—to the effect that carriages were not to pass between St. James's Palace and Temple-bar after half-past ten a.m. until the procession had performed that part of its journey. When the procession was to begin, and at what points the proclamation was to be made, were questions which no one could solve. A general notion that there was to be a "sight" of some kind was, however, soon spread through the metropolitan population, and at about ten o'clock the various streets that lead into the great trunk thoroughfares were thronged by a more than ordinary number of passengers, who took the direction of Charing-cross and St. James's Palace. Shortly before eleven o'clock the foot pavement of Pall-mall was occupied by a line of spectators, who, although not packed close enough to prevent free passage, were sufficient to indicate a universal feeling of curiosity. The windows and balconies of the clubs and private houses in Pall-mall and the foot of St. James's-street were thronged with spectators, and two of the Royal children occupied seats at a window of the old Palace.

Shortly before twelve o'clock the procession, which had assembled at St. James's, emerged into the open space in front of the Palace. The ceremony opened with three blasts of the trumpets, and then Garter King of Arms read aloud her Majesty's proclamation of the restoration of peace, at the conclusion of which the crowd gave three cheers, and this was followed by another blast of trumpets.

The procession comprised a troop of the 2nd Life Guards, under the command of Lieutenant-Colonel Ogilvy; the Beadles of Westminster, walking two and two, with staves; the High Constable, with his staff, on horseback; the High Bailiff and Deputy-Steward of Westminster; Knight Marshal's men, two and two; drums, Drum-Major, trumpets, and Sergeant-Trumpeter; Sir Charles Young, Garter King of Arms, on horseback; three Pursuivants, habited in their tabards—viz., Mr. J. R. Planché, Rouge Croix, riding alone, followed by Mr. H. M. Lane, Blue Mantle, and Mr. G. W. Collen, Portcullis, riding abreast and flanked on each side by three Sergeants-at-Arms, three of whom carried each a gold mace; four Heralds, also habited in tabards, riding two and two abreast—viz., Mr. W. Courthope, Somerset Herald; Mr. G. Harrison, Windsor Herald; Mr T. W. King, York Herald; and Mr. A. W. Woods, Lancaster Herald; Mr. R. Laurence, Norroy King-of-Arms; followed by another troop of Life Guards, bringing up the rear.

When the party had reached Charing-cross, where the proclamation was read for the second time by Norroy King-of-Arms, "looking towards Whitehall," in conformity with ancient precedent, the spectacle really became striking, on account not of the personages who came to be seen and heard, but of the throngs who were there to witness them. The Trafalgar-square district was occupied by one of those dense moving masses which seem only possible on the supposition that an entire capital has turned itself out of doors.

A similar throng collected itself at the eastern end of the Strand to witness the arrival of the procession at Temple-bar. The closing of the ancient City gates upon the western visitors gave a peculiar zest to this part of the ceremony. One can't be on both sides of the gate at once, but we believe that the interchange of civilities between the intruders from the west and the jealous guardians of the east is in this fashion:—Junior Pursuivant, after three soundings of the trumpet, gives three knocks, upon which the City Marshal asks, "Who comes there?" The Pursuivant now explains that he and his companions are "officers of arms" come to publish her Majesty's "Proclamation of Peace." The cautious guardians of the gate then admit the Pursuivant alone, who presents the Queen's warrant to the Lord Mayor. When this document has been read, and the Lord Mayor has authorised the opening of the gates, the Pursuivant is conducted back to the gates by the City Marshal, who courteously tells him that they are no longer closed.

Immediately after the passage of Temple-bar the proclamation was again read to sound of trumpet, and the procession again moved on, increased by the Lord Mayor's carriage, and followed by a crowd which went on increasing in density until, after a fourth reading at Wood-street, where the Cross in Cheapside formerly stood, it reached its goal at the Royal Exchange, the most important point in the City for official publication. At that point an immense crowd had assembled in front of the Mansion House, on the esplanade before the Royal Exchange, and on the flight of steps leading into the interior of the building. The *employés* of the Bank of England also mustered in great force upon the roof, and two magnificent banners floated from the portico of the Mansion House, which likewise contained its complement of privileged spectators. The proclamation was read for the last time in front of the Exchange, and there the ceremony ended.

## *FOREIGN AND COLONIAL NEWS.*

### FRANCE.

*(From our own Correspondent.)*

PARIS, Thursday.

It is said that the first appearance of the Empress in public will probably take place at the representation of the new comedy of M. Ponsard, at the Odéon, on Saturday.

The subscription started in the quatrième arrondissement, at donations not exceeding five sous, has been extended to the other arrondissements, and advances prosperously. It is said that the sum thus collected will be employed in the purchase of the Villa Marengo, in Italy (built on the field of the battle fought there), for the Prince Imperial.

The departure of M. de Morny for Russia is likely to take place sooner than was anticipated, and it is even said to be very probable that he will not wait till the closing of the Session of the Corps Legislatif. The utmost magnificence is to surround all the details of this mission, and a number of young men of the first families in France are eagerly seeking the privilege of attending it as unpaid *attachés*. The Worenzoff Palace has been hired by the French Government for the temporary residence of its representative while at St. Petersburg whence, after some stay, he will proceed to Moscow, to the coronation of the Emperor. Various names, French and Russian, are mentioned to fill the posts at Paris and St. Petersburg when left vacant by MM. Orloff and De Morny, but no serious choice is yet fixed or at least known. It seems certain, however, that in both cases the title of Ambassador will be bestowed on the diplomats employed.

There is a rumour here (the truth of which we have good reasons for doubting) that Lord Cowley will be named to St. Petersburg or Constantinople, with the title of Earl, and will be succeeded here by Lord Stanhope.

The Duke and Duchess d'Alba, accompanied by the Countess de Montijo, have left Paris on their return to Madrid. Before the Duke's departure, the Emperor presented him with a magnificent carpet of Gobelins manufacture and two superb Sèvres vases.

The preparations for the northern excursion of the Prince Napoleon are rapidly advancing. His Imperial Highness purposes visiting Norway, Sweden, &c. Among other rumours current, there is one that states the probability that on his return he will be accompanied by the Queen of Sweden, to be present at the baptism of the Imperial heir.

On Tuesday M. Emile de Girardin entertained the Prince and several members of the expedition at a grand farewell dinner at his hotel in the Champs Elysées.

The intention of the Emperor to visit Algeria as soon as the important occupations which require his presence here can be concluded seems every day less doubtful, and that he purposes a variety of new and even revolutionary measures in the organisation of this important colony seems no less probable. One of the plans spoken of is its erection into a separate state, with a government, an army, and a budget of its own—attached, however, of course politically, to and under the sceptre of France.

We mentioned some time since the existence and possible publication of the "Memoirs of the Comte de Molé." It appears, however, that by the will of the deceased one of his friends, a Prefect, has been charged with the arrangement of all his papers, and enjoined not to permit the appearance of these memoirs to take place within the lapse of twenty years after the death of their author.

Considerable attention has been excited by the publication of a brochure by M. Auguste Barbet, reproaching Mdlle. de Kertanguy, the niece of M. de Lamennais, and M. E. D. Forgues, one of the legatees, with the non-fulfilment of the desires of the testator, in delaying the publication of his correspondence and posthumous works, in producing them in a form much too expensive for general circulation, and in making omissions and interpolations therein. M. Barbet adds, that about four hundred letters of the utmost interest, addressed to Lamennais by some of the most remarkable personages of the epoch, are in the hands of Mdlle. de Kertanguy and M. Forgues, who will probably keep them from publication. To this accusation M. Forgues replies by indignantly denying all participation in the wishes of Mdlle. Kertanguy to keep back this and the rest of the correspondence, and declares that, so far from joining in the desire, he has commenced a *procès* against her, in order to compel the publication.

The magnificent state carriages kept at Trianon and St. Cloud have been brought out and driven about preparatory to their appearance at the christening and its attendant fêtes.

The great literary event of the day is the appearance of the "Contemplations" of Victor Hugo. These exquisite poems not only support but, if possible, add to the fame of the poet, and more than fulfil the hopes and expectations of the public, raised as they were to the highest pitch.

It appears that Béranger—who has completed a new volume of songs, said to be superior to those already known, but which are not during his life to be published—disclaims entirely the authorship of the song lately printed abroad, and translated into several of the English journals, under the pretence of being composed by him.

The subscription to the "Cours Familier de Littérature" of M. de Lamartine advances rapidly. The second number contains a brilliant biographical and critical notice of Mdme. Emile de Girardin. The "Contemplations" of Victor Hugo has also a short and touching address to the memory of this most remarkable woman; and, at a late sitting of the Société des Gens des Lettres, M. Jules Lecomte proposed that the next literary study for which a prize should be awarded might select her life and writings as its subject—a proposition which will probably be carried out.

The new works for the embellishment of the Bois de Boulogne advance rapidly. Close to Longchamps the erection of a splendid cascade is making great progress, and a sort of pleasure-ground, termed Le Pré-Catelan, is about to be established, near the lakes, and close by a monument erected to the memory of the Provençal troubadour of the thirteenth century, about whom an interesting legend, too long for our present space, is related. This piece of ground is to form a perfect fairy-land—*à la mode Française, bien entendu*—where the charms of verdure, fountains, trees, and flowers are to be heightened and perfected by the presence of an orchestra, day theatres, billiard-rooms, lotteries, restaurants, shows, &c.—an Eden, in short, as it is understood by Parisian Eves of the nineteenth century.

On Saturday appeared the new work of Halévy, "Valentine d'Aubigny," at the Opéra Comique. The music is charming; two or three of the morceaux, the first air sung by Bataille, and the trio of the latter, among others, are full of grace and melody. The plot is awkward and improbable, the part played by the heroine being destitute of all vraisemblance, and the conclusion lame; but the beauty of the music, and the way in which the work is rendered by Bataille (despite certain distressing grimaces in his lovemaking scenes), Mocker, and Mdlles. Duprez and Lefèbvre, carry it through successfully.

### AMERICA.

The Royal Mail steam-ship *Asia*, which sailed from New York on the 16th ult., arrived at Liverpool on Monday evening.

Just as the above was leaving, accounts reached New York, by way of Havannah, reporting that the steamer then due from California had news of the defeat of General Walker's army by the army of Costa Rica, with a very heavy loss of men. In other respects the political news now to hand is not important.

In the Senate a petition, presented by General Lane, relative to the memorial of the members of the Free State Legislature of Kansas to be admitted into the Union, which the Senate had refused, had, after a lively discussion, been laid on the table.

The Post-office committee has reported a bill to encourage steam navigation. The bill authorises the Secretary of the Navy to contract with Messrs. Vanderbilt and Livingstone for carrying mails between Southampton and New York, or some other port in the United States, in steamers suitable for defensive purposes, for a term of six years; the compensation not to be more than that allowed by the British Government to the Cunard line.

The indisposition of Mr. Clay had prevented the continuance of the discussion on the Kansas question, and the Senate had gone to Executive Session.

The President had reported that Messrs. Howland and Aspinwall had received 2 250,000 dols., and Hargous Brothers the balance of the 3,000,000 dols. payable to Mexico under the terms of the Mesilla Valley Treaty.

The New York Legislative Senate had agreed upon an extension, but the Governor of the Assembly would not consent to follow the example, and the House adjourned *sine die*.

The Know-Nothings and Freesoil men had carried both branches of the Connecticut Legislature.

It is reported from Washington that Mr. Stoeckel, the Russian Minister, had got himself into difficulties by engaging the services of some eminent surgeons for the Russian army; and, now that peace is established, informing them that their services are not wanted.

### THE WAR IN COSTA RICA.—DEFEAT OF THE FILIBUSTERS.

The *Panama Star* of April 8, received by the West India mail, contains the intelligence collected on the coast of Central America by the steamer *Emilie*, which sailed from Panama on the 1st March for the ports of Punta Arenas, La Union, Acajutla, and San José de Guatemala, touching at Chiriqui, and returned from the same on the 31st of March.

On her upward voyage to Punta Arenas she found the whole republic of Costa Rica in great excitement about the war to be carried on against Walker and his band. The port of Punta Arenas was full of troops, and the command of the same was given to Baron Below. The principal army, under the command of General Mora, was about 3000 strong: it was accompanied by President Mora in person, and was marching towards the frontiers of Nicaragua. The whole number of troops to be levied was to amount to 9000 men, and, besides, a loan of 100,000 dols. amongst the natives was decreed. The war appeared to be very popular, and daily enlistments of volunteers were spoken of. Amongst the foreigners a feeder of their service was made to the Government.

At San Salvador it was ascertained that 400 Filibusters, under the command of Colonel Schlesinger, and well fortified by the walls and fences of the "hacienda de Santa Rosa," had been charged and entirely defeated by 500 Costa Rica troops under the command of General Mora. A private letter, dated Liberia, 25th, written by a foreigner at head quarters, confirms this important event, and expresses confidence in the success of the war in favour of the Costa Rica army, as the troops are in good condition and full of courage, and wish to be led against the Filibusters. In about eight days the army was to pass the frontiers, and enter the State of Nicaragua. More than twenty prisoners, consisting principally of Irish and Germans, were in the hands of the Costa Ricans; they were to be tried by a court-martial, and most probably all would be shot. Walker had not received his expected reinforcements, and, it is said, wanted provisions. General Calanas had deserted him, and written him a very short letter, enjoining him speedily to "clear out."

An express has arrived in Punta Arenas on the 26th states that ninety of Walker's men were found dead, and others are supposed to have perished in the woods. Nineteen prisoners were tried by court-martial and shot.

The Nicaraguan steamer *Cortes*, which arrived at Panama on the 7th from San Juan del Sur, brought word that Colonel Schlesinger was to be tried for cowardice by Walker after the Santa Rosa battle, and it was generally supposed that he would be shot. During the time of the steamer's stay at St. John's many of the men enlisted for Walker, hearing of his bad luck, refused to land, and are now in Panama. Walker is said to have retired to Rivas, where he has fortified himself to the best of his ability, and awaits the approach of the Central American troops.

## *NAVAL AND MILITARY INTELLIGENCE.*

THE freight-ship *Alice and Ann* has been taken up by Government, and appointed to embark 2000 barrels of powder from Woolwich to be shipped at Gravesend for Quebec.

THE standard for Artillery recruits having been raised to five feet eight inches indiscriminately, instructions have been issued for the recall of recruiting parties stationed in various provincial localities; consequently detachments in that service are daily arriving at head-quarters, Woolwich.

MAJOR BIDDULPH'S company of Royal Artillery, under orders for Australia, have been for some days past in daily attendance at Woolwich Arsenal undergoing a course of laboratory instructions prior to their embarkation, with a view of obtaining a correct knowledge of the method of preparing the new fuse and signal rockets. This is the first corps of Artillery the Government has considered it necessary to station in that colony.

HER MAJESTY'S state yacht *Victoria and Albert*, Captain the Hon. Joseph Denman, left Portsmouth on Saturday afternoon on a cruise, it is said, to Lisbon and Madeira. She is expected to return in eight days. We some time since reported the probability of her Majesty paying Lisbon a visit this summer.

HER MAJESTY has been graciously pleased to signify her intention of reviewing the army of the Crimea on the return of the troops. A review on a grand scale will take place at Aldershott early in June, when it is expected that upwards of 30,000 men—cavalry, infantry, and artillery—will be present. This will be succeeded by reviews at Colchester, Penenden Heath, and Barham Downs; and siege operations on an extensive scale will conclude the season on Chatham lines.

IN consequence of the very great number of troops which are expected at Woolwich Dockyard to take place on Monday morning, for the purpose of commencing a slight reduction in that establishment, and examining the claims for superannuation.

SUPPOSED REMAINS OF THE "PACIFIC."—Advices have been received at Lloyd's, under date New York, April 12, that, on the 8th instant, the ship Captain Cole, when in lat. 37, lon. 72, fell in with some floating pieces of wreck, amongst which was the top part of a steam-vessel's paddle-box, of a large size, similar to the *Pacific*. It was painted black, except in one part, where a new piece had been put in; and it is suspected that this is part of what remains of the missing vessel. A strong gale prevented Captain Cole from securing the paddle-box.

THE RUSSIAN ARMY AND NAVY.—It is now said that there will be no levy of recruits until the autumn, and then only at the normal peace pro rata of five per 1000 registered souls. It is not intended to keep up the effective strength of line battalions at more than 600 men. The state of Russian finances, sorely tested by the war, demand the utmost economy in the military and naval expenditure for the time being. In the latter there will be a saving nearly equal to two-fifths, in consequence of the destruction of the two divisions of the Black Sea fleet and the extensive arsenals of Sebastopol.

## THOUGHTS IN THOROUGHFARES.

A VARIETY of thoughts, none of them of a very serious nature, must have occupied the minds of those who happen to be in the thoroughfares along which the procession passed, for the Proclamation of Peace to the metropolis. In the first place it must have occurred to many that it was rather a superfluous operation to tell that which everybody knew, and which, if it had not been already known, would have been very imperfectly heard by the few who were near enough to catch the sound of the voice of the officer of arms, shaken about as he was on a rather fidgetty horse, and perplexed as he appeared to be with his tabard. The proceedings of the other day are reported in the same language, almost word for word, as will be found in the Annual Register for 1814, when the ceremony is said to have taken place "with all its ancient and accustomed solemnities." Then, as now, "the Junior Officer of Arms, coming out of the rank between two trumpeters rode up to the gate of Temple-bar, and, after the trumpets had sounded thrice, knocked with a cane." Then, as now, the City Marshal, who knew perfectly well what it was all about, affected ignorance, by asking, "Who comes here?" and then, as now, received an answer which he knew he was going to receive, and which knowledge rendered question and answer alike superfluous. Then the pursuivant was admitted alone—as was the case fifty years ago—and the gates were shut after him; while he was introduced to the Lord Mayor, who was supposed to satisfy himself, from the nature of the pursuivant's business, whether it would be desirable to open the gates and allow him to go back and join his friends outside, or to shut him in, and keep the others out of the City. Then, as in 1814, a warrant was handed to the Lord Mayor, which he is reported to have read on the spot; but, as he had probably perused it some hours before in the morning papers, it is most likely that he gave a theatrical reading of the document, and glanced at it just as a Prince in a play scans the property scroll that describes to him in great dabs of black paint the plans of the conspirators. Then the Lord Mayor told the Marshal to open the gates, which was opened by somebody who was quite out of hearing of the order, and who would have opened them all the same if the Lord Mayor had forgotten his part and omitted to speak the words on the "one" for opening the gates was the approach of the pursuivant. Then the City Marshal said, "Sir, the gates are open."—an observation that might have been spared as a most unnecessary reflection on the pursuivant's powers of perception, for the gates were immediately before his eyes, and he could not have kept the latter open, without seeing that the former were open also. The only variation in the programme of the other day from that of 1814 gave the preponderance of absurdity to the former, for by some misunderstanding the gates at Temple-bar were open when the procession arrived, and, instead of walking straight into the city, the procession stopped on purpose to be shut out, so that somebody had the trouble of closing the gates, in order that somebody—perhaps the same person—might have the trouble of opening them again. If there had been any reality in the proceeding, and the civic authorities had only been apprised of the pursuivant's approach by his knocking at the gate, it is clear that he must have stopped there for ever, as he evidently declined to knock until somebody had come to the gate for the purpose of shutting it. Persons of a thoughtful turn of mind may amuse themselves by speculating on the reason for reading the proclamation at the corner of Chancery-lane and the end of Wood-street, instead of at the corner of Farringdon-street, the space near the General Post-office, or any other point on the line of procession where there might be room for a large audience. There is, however, the old and unanswerable official reason for selecting the narrow and inconvenient places alluded to, as the most worthy of being honoured by a direct communication of the conclusion of peace; for in 1814 they were the favoured spots, and fifty years hence, if a similar occasion should arise, the Minister of the day, if he resemble the Minister of this, will order the proclamation of peace to be made "with the accustomed solemnity at the usual places." The friends of the Government must rejoice that Temple-bar has not been taken down in compliance with the calls that have been repeatedly made for its removal, for if there had been no Temple-bar to back at, there would have been a great Ministerial difficulty in determining what to do in the absence of precedent, and all the resources of the "Circumlocution Office" would have been required to account for its not being done, and to assist generally in discovering how not to do it. The present may be the last occasion upon which it can possibly be done, for the materials are rapidly disappearing out of which such absurdities can be concocted; and, indeed, it is rather remarkable that in these days of expiring Beadledom, a sufficient number of individuals could be found to walk "two and two with staves" in the character of "Beadles of Westminster." The walk they took the other day must have suggested the idea of "Beadledom on its last legs" to many who witnessed it. Official programmes may speak of these things as "solemnities;" but common sense regards them as "farces;" and if they appear to be received with public applause, it is only because jeers and cheers are very much alike in the mouths of the populace.

The thoroughfares have recently displayed bills offering a reward for the apprehension of Foschini, the alleged assassin, with whom it has hitherto appeared possible to do everything except take him into custody. According to newspaper paragraphs there have been plenty of eyes upon him, many persons have been watching him, but nobody has thought of apprehending him. A few days ago the reporters threw him into the Thames, found his body, and got a coroner to sit upon him; nor was it until policeman 69 L made his appearance at the inquest and proved Foschini to be somebody else that people were persuaded he had not committed suicide. It is strange that, while so many are said to be watching the right man, others should be employed in taking into custody the wrong one—a piece of misplaced activity which has already kept one unfortunate foreigner thirty-six hours in custody, because he could not speak the English language and the police on duty could speak no other.

A good deal of philosophy is required just now in the public streets to keep one's temper under the variety of importunities to which one is exposed from juveniles desirous of entering into all sorts of business transactions with passing strangers. Men who never smoke are continually beset with entreaties to purchase cigar-lights from urchins who, possibly, while they are dazzling your eyes with one hand are picking your pocket with the other. If you get into an omnibus to escape the evil in one form it pursues you in another, for the air and light will probably be obstructed by the *Morning Paper*, in the hands of a boy who fills the whole of the window with a bundle of low-priced newspapers. The spread of intelligence is no doubt a very excellent thing in its way; but information, however cheap and early, is rather unwelcome when it is flourished about in a damp state, before one's face, at the corner of every street and at the door of every public vehicle. Street trading is really assuming dimensions which threaten to leave little room for anything else; and if it continues to grow, as it has recently done, it will drive us all off the pavement. It is difficult to walk any distance without being invited to surrender one's foot into the hands of a member of the so-called Shoeblack Brigade—a body which only carries out its military title by the personal encounters of its members. From what passed at a meeting of the friends of Ragged Schools last week, presided over by the Earl of Shaftesbury, it appeared that the "Shoeblack Brigade" is only seven strong; and we must presume, therefore, that he hordes of young barbarians in red, yellow, and other miscellaneous colours, are for the most part irregulars. There is not very much in a name; but perhaps those who are accustomed to talk of the street hoeblacks as a "brigade" will be surprised to learn that "a brigade is the union of several squadrons or battalions under the command of a Colonel, who has also the rank of Brigadier-General." Whether the Shoeblack Brigade aspire to military rank may be doubtful; but that they are all desirous to take the command of the first foot they can lay their hands on is a fact that is every day brought home to the experience of

A WALKING PHILOSOPHER.

## *THE COURT.*

The Privy Council on Monday, the Drawingroom on Tuesday, the State Concert on Wednesday, almost nightly visits to the Opera and theatres, and the grand ceremony of laying the first stone of the Wellington College this day (Saturday), have made up a series of engagements in one short week almost unexampled in Court life at the present early period of the season. At the Council proclamations were issued announcing the Peace, and appointing Sunday, the 4th inst. (tomorrow), as a day of thanksgiving.

On Tuesday the Queen held a Drawingroom, and in the evening had a dinner party, the company at which included the Duchess of Kent, the French Ambassador and the Countess de Persigny, the Duke and Duchess of Manchester, the Earl and Countess of Lichfield, and Admiral Baron de la Graviere (French Imperial Navy). Later the Queen and the Royal party honoured the Royal Italian Opera with their presence.

On Wednesday Prince Albert presided at a meeting of the Commission of the Patriotic Fund, at the Palace of Westminster. The Prince of Wales and Prince Alfred visited Messrs. Cloves's printing establishment. The Princess Royal and the Princess Alice went to Westminster Abbey. The Queen took a carriage airing, attended by the Marchioness of Ely, and in the evening gave a state concert.

On Thursday her Majesty and the Prince went in semi-state to a private view of the Exhibition of the Royal Academy.

### THE DRAWINGROOM.

The Queen held a Drawingroom on Tuesday, at St. James's Palace. The Court was very numerously attended, the presentation of ladies exceeding 300.

Her Majesty and their Royal Highness the Prince Consort, attended by the Ladies and Gentlemen in Waiting arrived from Buckingham Palace at a quarter past two o'clock, and shortly afterwards entered the Throneroom, attended by a brilliant retinue of Lords and Ladies of the Royal Household. The Duchess of Cambridge and the Princess Mary accompanied her Majesty, and Prince Edward of Saxe-Weimar was also present.

The Queen wore a train of white moiré antique, trimmed with bunches of roses and white blonde. The petticoat of white satin, trimmed with bunches of roses and white blonde, to correspond with the train. Her Majesty's head-dress was formed of diamonds, flowers, and plumes.

The Duchess of Cambridge wore a train of grey satin, trimmed with black lace and bouillonnés of crêpe, tulle, and satin, and black velvet ribbon. The petticoat, a fall of black lace over grey satin, trimmed with satin ribbon, and black velvet to correspond with the train. The stomacher was covered with sapphires and diamonds. Her Royal Highness's head-dress was formed of a pearl tiara, white feathers, and black lace lappets.

The Princess Mary of Cambridge wore a train of rich blue glacé silk, trimmed with satin ribbon, tulle, and pink roses. The body trimmed to match, and the stomacher ornamented with diamonds. The petticoat was blue tulle, over rich glacé silk, trimmed with bouffes of tulle, satin ribbon, and pink roses. The necklace was pearls. Her Royal Highness had on her head a tiara of diamond stars, and also white feathers and lappets.

The foreign Ambassadors and Ministers having been introduced, several presentations took place, the general circle were next ushered into the Royal presence.

### THE STATE CONCERT.

The Queen gave a concert on Wednesday evening at Buckingham Palace, at which Mesdames Novello, Viardot, Bosio, and Didiée, Signori Gardoni and Ronconi, Mr. Sims Reeves, and Herr Formes, assisted. The foreign Ministers and a party of the nobility and gentry were invited, to the number of about 370. Her Majesty and his Royal Highness Prince Albert, accompanied by their Royal Highnesses Prince Edward of Saxe-Weimar and the Duchess of Cambridge the Princess Mary, and the Duke of Cambridge, passed through the White Drawingroom at half past nine o'clock, and entered the Grand Saloon, where was prepared for the concert the company assembled in the Picture Gallery, between the Queen and the Royal party into the saloon, and the concert commenced.

Refreshments were served to the company in the rooms on the parts; and at the close of the performance supper was served in the State Dinner-room.

His Excellency the Ambassador of France and the Countess Persigny arrived in town from Paris on Monday night.

### COURT DRESSES AT HER MAJESTY'S DRAWINGROOM.

THE Drawingroom of the 29th ult. afforded more ample scope even than that of the 10th for the display of richness and opulence of attire on the part of ladies privileged to pay their respects to the Sovereign.

One of the most elegant dresses observed on the occasion, and which was worn by a youthful bride, was composed of flounces of Brussels lace over tulle and white silk, the flounces being looped up with bouquets of white primroses, heath, and lilies of the valley. The corsage was ornamented with lace and flowers to correspond, and had braces crossing in the middle which terminated in two long lappet-like ends. The train was of white moiré antique, bordered with a flounce of Brussels lace. Head-dress of flowers and lace to correspond, feathers and jewels.

A not less attractive dress had a double skirt of Brussels lace, alternating with skirts of tulle, ornamented with fringe and a Greek pattern of lilac. The skirts looped up at intervals with bouquets of lilac and roses. The train was of white silk trimmed with lilac and roses, the same flowers being used in the coiffure. This dress was remarkably original and striking, without bordering on the eccentric.

A very rich costume was composed of alternate flounces of pink crape over pink silk, and white silk, edged with fringe and blonde, and trimmed with a profusion of Venetian shells; some of which were formed into a fringe to ornament the corsage, and border the lappet-like ends of the cape. The train was of white silk, lined with pink, and having a deep border of pink.

A very gorgeous dress was of blue silk, having three flounces brocaded in white velvet, and edged with a deep fringe of blue and white. Train of blue silk, brocaded to correspond, and trimmed with fringe and lace. Head-dress of feathers and lace.

Another costly dress, and worn by a lady of the highest rank, was composed of a rich white silk, brocaded in bunches of roses of cerise satin and silver; the dress was trimmed with several rows of point lace, each row being surmounted by a string of pearls and a quilling of cerise ribbon. Train of brown satin, trimmed likewise with point lace, and having bows of cerise ribbon; the centre of each bow being studded with an ornament of diamonds and rubies. Head-dress—feathers, point lace, and diamonds.

A skirt of white tulle, having several flounces edged with blonde, was otherwise trimmed with puffings of tulle and ivy. The train was of green crape over green silk, and was ornamented with puffings of tulle and silver wheat-ears.

A dress of white silk had three flounces bordered with blue, and trimmed with rows of narrow black velvet. Train of blue moiré antique, trimmed with tulle, blonde, and black velvet. Head-dress, a double circlet wreath of blue and white flowers.

A skirt of grey moiré antique was richly trimmed with point-lace and crimson satin ribbon. Train of the same materials, and trimmed exactly to correspond.

A Court dress, appropriate for half-mourning, deserves particular attention. It had three flounces of white tulle over white silk, each flounce being edged with blonde, and ornamented with several rows of black velvet, and looped up at intervals with bouquets of white roses intermixed with black velvet. The corsage had the cape lappets, already described, edged with black velvet and white blonde, with a bouquet of white roses in the centre. Train of white moiré antique, ornamented with white roses and blonde and black velvet. Head-dress, the double circlet of white roses intermixed with black velvet and diamonds.

Among the presentation or *débutantes* dresses the following deserve notice.

White tulle with three flounces, each flounce having four rows of white satin ribbon and an edging of blonde. The train was of white silk, bordered with puffings of tulle and ribbon, and the corsage similarly ornamented. Pearl ornaments and wreath of white lilac.

Skirt of white tulle formed into innumerable puffings, and trimmed with white roses, and lilies of the valley. Train of white moiré antique, edged with a peculiar shell-like trimming composed of tulle and ribbon, relieved at intervals with bouquets of white roses and lilies of the valley.

Three flounces of white tulle edged with blonde, and ornamented with rows of white satin ribbon; the flounces looped-up with white camellias. Tunic of white silk, trimmed with tulle, ribbon, and camellias. Head-dress, camellias and pearls.

(For the above information we are indebted to the courtesy of Madame EINSTEIN DEVY, 73, Grosvenor-street, Grosvenor-square.)

## THE NAVAL REVIEW.

WE this week resume our illustration of the great event of last week, which has already been fully described by our own Correspondents; so that it will be only requisite to detail the scenes and incidents sketched by our Artists.

### THE PIVOT-SHIPS "RODNEY" AND "LONDON."

These sailing vessels of war, the *Rodney* and *London*, of ninety guns each, were moored as pivot-ships to the E.N.E. of the Nab Light at about four cables' length apart. Other vessels for the same purpose were moored one mile west of Cowes.

### THE GUN-BOATS.

Twelve months ago scarcely one of the gun-boat vessels was in existence. The majority have been ordered and completed within the last six months. The first class of gun-boats is composed of screw ships of 200 feet in length, and carrying six long 68-pounders, provided with engines of 160-horse power, and a crew of one hundred men. The class next in subdivisional ships. The second class are about 150 feet long, and carry four 68 pounders—are provided with engines of 200 horse power, and the crew numbers eighty hands. The third class are about 100 feet long, of 50-horse power engines, armed with one 68 pounder pivot-gun, one 32-pounder pivot-gun, and two brass howitzers (24 pounders) on the broadside. The fourth class is also a useful flotilla for very shallow streams and close in shore service. It comprises vessels of about 80 feet long, the engines averaging 20 horse power; each boat carrying two 32-pounder pivot-guns amidships, the crew usually numbering thirty-six hands, exclusive of officers. These boats are very little larger than the small steamers which ply upon the Thames, though they are certainly considerably broader, in order to admit of working the guns without danger to the craft. Their draught of water, with stores, ammunition, provisions, and gun-boat, does not exceed from three and a half to four feet. The whole flotilla is provided with high-pressure locomotive boilers—the space hitherto usually devoted to the machinery rendering this expedient absolutely imperative, to economise the limited area at the disposal of the engineers. Yet, small as the horse power appears, the speed of the fleet of gun-vessels is by no means contemptible; the slowest average from 7 to 8 knots, and the swiftest from 9 to 11½.

The Illustration at page 468 shows the signal for the gun-boat attack on Southsea Castle.

### THE FLEET ROUNDING THE PIVOT-SHIPS AT THE NAB.

This scene, from the importance of the vessels engaged in the manœuvre, was one of the most interesting events of the day. Her Majesty in her yacht, the *Victoria and Albert*, having led the fleet in two lines out to the Nab, stopped and took up her station ahead of and between the two moored pivot-ships, *Rodney* and *London*. On the fleet arriving at this point, headed respectively by the *Duke of Wellington* and the *Royal George*, the one heading the port and the other the starboard division, it turned at the head of the pivot ships, and made back in the same order to their original moorings at the spit. The rounding was accomplished with the greatest ease and dexterity, the crews of the vessels at the same time manning the rigging and cheering, affording a most imposing sight.

Our Sketch of this event was made on board her Majesty's ship *Lightning*, Lieut. Campbell; and we take this opportunity of returning our thanks to that gentleman for his courtesy and attention to our Artist.

### DANCE ON BOARD THE "CESAR."

In the evening of the day of the Review there were several festive commemorations of the event in the town of Portsmouth and in the fleet. In heartiness and real enjoyment, probably, neither of these festivities exceeded the dance on board H.M.S. *Cesar*, Captain John Robb, whose amiable wife and her young lady friends joined the officers in the gay scene which our Artist has depicted. Under the influence of a well appointed orchestra and an invigorating sea-breeze the dance assumed an energy and spirit beyond that which usually characterises such recreations on shore.

### ILLUMINATION OF THE FLEET.

No notice of an intention to illuminate was given in the Admiralty's programme, and consequently thousands had left on their return to distant homes before the ships made this grand and brilliant demonstration. This was effected by simultaneously lighting up the yards and portholes with blue lights.

At nine precisely, a signal-rocket was thrown up, when the horizon, which had previously been completely shrouded in darkness, became brilliantly illuminated with blue lights from *six miles* length of British ships of war. The suddenness gave great effect to the grandeur of the scene. Only imagine all the ships of war illuminated with blue-lights at each yard arm, and the battle lanterns placed in every porthole, and then some idea may be formed of the extreme beauty of the display. From time to time rockets were sent up thickly from the ships, and rained a golden shower. The display lasted twenty minutes.

The establishment of Mr. J. J. Galt, the naval outfitter, was elegantly illuminated in the evening. The Messrs. Emanuel had also a very neat device in gas with V. R., &c.

### THE QUEEN'S YACHT PASSING FORT MONCKTON.

As the Royal yacht steamed past the walls, the Saluting Battery fired in her honour, and then the people in the embrasures of the forts, on the slopes of the esplanade from Portsmouth to Southsea, from Blockhouse Fort to Monckton, crowded together to watch her. The approach to the Spit Buoy was marked by breathless expectation shown in every face turned anxiously towards the fast-sailing yacht and her attendant steamers. As she rounded the buoy and dashed out into the open water of Spithead, the fleet gave forth their salute—their guns roaring out from deck to deck, from ship to ship—until the air was obscured by the smoke, and the fleet was involved in a cloud of vapour.

The Queen's yacht, emerging from the surrounding smoke, proceeded rapidly past Fort Monckton, meeting everywhere the same enthusiastic reception, and, having rounded into a position to return down the centre line, entered the squadron of gun-boats, disposed in double rows on each side of her course, and majestically proceeded on her way.

### EMBARKATION OF THE QUEEN AT PORTSMOUTH.

Her Majesty's train arrived at the Royal Clarence Victualling-yard at five minutes to twelve o'clock. The Court immediately embarked on board the State barge, and was steered by Captain the Hon. Joseph Denman to the *Victoria and Albert*, lying in the harbour stream. Her Majesty was accompanied in the yacht by Sir Wm. Parker, Sir Edmund Lyons, the Marquis Townshend, Admiral De la Graviere, and Mr. Osborne, Secretary of the Admiralty. After a short interval, the trumpeter stationed on the Pier Battery announced the approach of the Royal yacht. The guns on the Platform Battery instantly confirmed the intelligence, and in a few minutes the *Victoria and Albert* rapidly steamed out of the harbour, and glided swiftly towards Spithead, amid the enthusiastic acclamations of the assembled multitude. The bands ashore and afloat striking up the National Anthem, while every vessel dipped her ensign.

It may be interesting to our readers to know how the mercantile fleet were placed in the tidal basin of the Southampton Docks, preparatory to starting for Spithead to witness the Review. The several ships were moored to the dock-quays, ready for starting, which they did in regular turn, according to draught of water. The entire tonnage of the 26 vessels amounted to 27,348 tons.

At the review there was exhibited, on board her Majesty's ship *Vulcan*, by the inventor and patentee, Commander Beadon, R.N., the model of a vessel of new and peculiar construction. It is formed with a moveable under water bow of a conical form, to which is applied a screw-propeller. The stern of the vessel is constructed in such a manner that the propeller exits sarround an angle to the keel, and admits of the propeller being used to propel, or to propel and steer, and when sailing can be simply used as a rudder. By reason of the peculiar form of the under part of the vessel, combined with the use of the conical bow and conical propeller, the vessel is capable of moving at a far greater speed than can be accomplished by any other form of construction, accompanied with the other modes of propelling, and is also capable of sailing very fast. It gave great satisfaction to the naval gentlemen and all who saw it on board. Commander Beadon is building a vessel on this plan for exhibition on the Serpentine.

In a small portion of our impression of last week the Floating Bridge Illustration was designated "at Portsea," instead of Portsmouth.

OPENING OF
THE EXHIBITION OF THE ROYAL ACADEMY.

On SATURDAY NEXT, MAY 10, will be published,
A SUPERB DOUBLE NUMBER
OF
THE ILLUSTRATED LONDON NEWS,
WITH A
COLOURED FINE-ART SUPPLEMENT;
And a Copious Account of the Opening of the Royal Academy Exhibition, With large Engravings of some of the Principal Pictures.

The Engravings of the Great Naval Review will be continued in the ILLUSTRATED LONDON NEWS for SATURDAY, May 10, and 17; Including the following Scenes and Incidents:—

Visitors embarking to View the Fleet. Sketched by R. Leitch.
Fremantle on Southsea Common. S. Read.
Incidents in the Crowd. Drawn by Phiz.
Gun-boats Passing in Line round the *Royal George* and *Duke of Wellington*. J. W. Carmichael.
Large Picture Map of the Baltic. (Four pages)
Large Four page Engraving of the Review. By E. Duncan.
Gun-boats Passing Through the Line-of-Battle Ships. Sketched by H. C. Andrews.

Price of the DOUBLE NUMBER and COLOURED SUPPLEMENT, 10d. Stamped 1s.
Offices 198, Strand, and Milford-house.

THE ILLUSTRATED LONDON NEWS.

*LONDON, SATURDAY, MAY 3, 1856.*

"HER Majesty's Opposition" has conferred a signal favour on "her Majesty's Government." The favour was not intended; but is, perhaps, all the more agreeable on that account to the fortunate recipients. If Lord Derby and Mr. Disraeli had designed to consolidate the Ministerial party, and to transform it from a disorderly rabble, which it was fast becoming, into a strong and united phalanx, they could scarcely have adopted means more effectual than they did. We shall not attempt in this place to recapitulate the arguments of Mr. Whiteside and of those who agreed with him in maintaining that the fall of Kars was principally, if not wholly, attributable to the wilful neglect or to the ill-temper of Lord Stratford de Redcliffe; or of those who asserted that the Ministers, in shielding and defending their Ambassador, had made themselves responsible for his conduct, and transferred from his Lordship's head to their own the censure of Parliament and the country. It will suffice for us to record that public opinion concurs in the verdict which the House of Commons has pronounced on the question; not so much on account of the Ministry, for whose fate no one professes any particular anxiety, but for that of Lord Stratford de Redcliffe—who was virtually on his trial—and who has been honourably, we may say triumphantly, acquitted. There was a probability that the dissatisfaction widely felt on many points, connected not only with the progress of the war, but with the patching up of the peace, might have concentrated itself upon this particular question of Kars, and led to a decision more in accordance with ill-temper than with justice; but this risk has been happily avoided, and the Asiatic campaign from first to last has been discussed on its merits. The verdict satisfies most people that substantial justice has been done both to the Ambassador whose conduct was originally impugned, and to the Ministry which threw its ægis over him. For the future we suppose we shall hear no more of Kars in Parliamentary warfare.

The Ministers, warned by this example of the necessity of union among their supporters, will do well to find some subject of domestic and social interest by which they may be enabled to keep their rebellious party together. They will, doubtless, achieve a victory in both Houses on the general subject of the Peace, on which they have "thrown down the gauntlet" to their opponents; but there are other matters for the consideration of Parliament than those which relate to our foreign policy—more especially that portion of it which is concluded by the treaty of Paris, and at which it is now useless to cavil. If the Ministers do not inspire general confidence on some great home question, the army of their supporters will again become a rabble, and Parliament itself will have to answer to the country for a disorganisation which threatens to render all good government impossible.

THE text of the Treaty of Peace, and the "Protocols of Conferences" relative to it, are now fully before the public, and are set down for consideration in Parliament in the ensuing week. We do not wish to anticipate the discussions which will necessarily take place on this important subject, but we cannot help remarking, upon a casual perusal of the Protocols of the Conferences, that, whatever differences of opinion may be manifested as to the result of the labours of the Plenipotentiaries, those labours appear to have been carried to completion with remarkable unanimity on their part, a unanimity probably without precedent in the annals of diplomacy. If differences of opinion and of views existed between the representatives of the Powers so recently in active hostility, they appear to have had but faint expression, and to have been most courteously ignored by M. Benedetti, who was intrusted with the drawing up of the protocols. The Plenipotentiaries appear to have been so completely *en accord* upon the one great desideratum of Peace that in the course of nineteen sittings they had framed and signed a treaty for the purpose, consisting, as we all know, of thirty-five articles. This treaty, so far as its fourteenth article, was read and adopted at the fifteenth sitting, on the 26th March; articles 15 to 30, inclusive, were read and adopted at the next meeting, held on the following day; and on the 28th of March the four remaining articles were agreed to. On the 29th a general reading of the whole treaty, and of the conventions attached to it, was had; and on the 30th the treaty was signed. Five meetings were held afterwards, in which various matters of detail, and some original questions, more or less foreign to the ostensible occasion for the Conferences, were discussed; and on the 16th of April, amidst mutual gratulations, and with a warm vote of "gratitude" to Count Walewski, for his "able conduct in the chair," the Congress separated.

Whilst the Congress advisedly—how wisely remains to be seen—postponed many points involved in the subject-matter of the treaty itself for future settlement, they, as it seems to us, went out of their way on one or two occasions, to adjudicate upon matters which were not, as we submit, within the scope of their original instructions;—matters which, though they might very properly be made subjects for deliberation and adjustment on the fitting occasion, and in the fitting manner, were too important to be dealt with as incidental to a peace between the Allies and Russia, for settlement of the affairs of Turkey. We refer particularly to the "Declaration respecting Maritime Law," the subject of which was introduced by Count Walewski at the sitting on the 8th April, and of which it may be sufficient for the present to state, that, in addition to abolishing privateering (which all civilised men must highly approve of), it completely disallows and reverses the principles as to the trading rights of neutrals which Great Britain has asserted and maintained during the wars of the last century, and confirms in its essential points the system of "armed neutrality" which Russia during the same period established and asserted in our despite. In short, one of the weightiest matters, a moot point of international polity which has divided Europe for nearly a century, and in which this country has a deep and peculiar interest, has been settled, and settled against us, in the course of an incidental sitting of the Congress. To say the least of it, this proceeding was precipitate, and will probably excite more difference of opinion in the public mind than it appears to have done amongst the Plenipotentiaries who so unanimously and readily acquiesced in it.

IT would indeed be a deplorable contingency if a friendly convention between two great Powers for the promotion of a specific object of mutual and general advantage should become the occasion of a misunderstanding leading to, or threatening, an interruption of their amicable relations; yet such misunderstanding has unhappily occurred between Great Britain and the United States with reference to what is familiarly known as the Clayton-Bulwer Treaty; and the circumstances of the case, as developed in the recently-published "Correspondence," are such as, before they are disposed of, may tax the highest diplomatic qualifications—judgment, firmness, impartiality, tact—of the two Governments.

The essence of the questions in dispute respecting Central America may be stated in few words. The British Government, on the invitation of that of the United States, consented to sign a convention for the purpose of promoting the formation of a ship canal between the Atlantic and Pacific Oceans, at the same time carefully guarding that neither party "will ever obtain, or maintain, any exclusive control over the said ship canal;" or "occupy, or fortify, or colonise, or exercise dominion over" any part of Central America. The British Government took the precaution to declare that these conditions did not in any way apply to their settlement at Honduras and its dependencies, nor to their protectorate of Mosquito, and now generally contend that the provisions were intended to be only prospective, and not retrospective, in their operation. The American Government, however, through their Minister, Mr. Buchanan, contend that, the treaty being signed, we must be bound by the words of it, and that those words oblige us not only not to take up any new position in Central America, but to abandon what we already hold. Mr. Buchanan insists that "not to withdraw is to occupy, and not to occupy is necessarily to withdraw."

Let us, therefore, examine, for an instant, the words of the treaty as to occupancy—allowing, for the moment, that they can have a retrocative effect. As to British Honduras and its dependencies, they are by consent excepted from the operation of the treaty, and the only question is as to Mosquito. With respect to the Mosquito Protectorate, then, do the words "not to occupy" necessarily imply a condition to withdraw? Looking in "Webster's Dictionary," we find the meaning of the word occupy thus given:—"Occupy, v. t., 1, *to take possession*; 2, to keep in possession, to possess, to hold or keep for use; 3, to take up, to possess, to cover, to fill." Now, can it be said that by dwelling or sojourning in the Mosquito territory we "occupy," in the essential sense of the word? Certainly not; and Mr. Buchanan was in error as to the meaning of the word he employed when he imagined that an agreement not to occupy, or even one not to continue in occupancy of, a certain spot implied the impossibility of permissive residence without claim of possession. Indeed, with respect to the other settlements in dispute, taking the first meaning of the word "occupy," viz., "*to take* possession," we would insist that it could have no other than a prospective effect.

Mr. Buchanan, however, considers his case so clear that he cites a passage from Vatel in his chapter on the "Interpretation of Treaties" to the effect that "the first general maxim of interpretation is that it is not allowable to interpret what has no need of interpretation." But if he had looked a little further into this important chapter in the works of the great jurist, as we have done, he would have seen that there are other maxims as to the interpretation of treaties very applicable to the present case. Amongst other principles laid down by Vatel, we find that, in cases of doubtful or disputed construction of an engagement, "the reason of the law or treaty, that is the motive which induced the parties to make it, and the objects proposed in it, is one of the surest means of establishing its veritable sense." Now, what was the motive or object of the Clayton-Bulwer treaty? To form a ship canal between the Atlantic and the Pacific Oceans; and the negotiations leading to it carefully guarded against disturbing, prejudicing, or in any way affecting existing rights or claims of the contracting parties. Again, Vatel shows that in certain cases a treaty is susceptible of an "extensive interpretation," in others of a "restrictive interpretation;" and he lays it down that, in cases of "promises," they are to be construed restrictively, and, "in conformity with the intention of the party who makes the promise." Further, he enforces "the famous distinction between matters favourable and matters odious" (or disadvantageous), in regard to which "equity and reason are to guide." Amongst other doctrines laid down by him under this head are these:—"We are not to presume, without very strong reasons, that one of the contracting parties should have intended to favour the other to his own prejudice;" and again:—"Everything which is not to the common advantage, everything which tends to destroy the equality of the contract, everything which charges only one of the parties, or which charges it in a greater degree than the other, is odious;" and again:—"The cause of him who seeks to avoid a loss is more to be favoured than that of him who pretends to a gain." And if any doubt could exist as to the potency and application of these principles, we find them resolved in this one passage, liv. ii., chap. xvii., sec. 305:—"*We must also include in the number of things odious all which would go to change the present state of things; for a possessor cannot lose of his rights more than precisely to the extent he has ceded; and in case of doubt the presumption is in favour of the possessor.*"

What makes the case the more delicate, if not more difficult, to deal with is, that there is too much reason to believe that the two contracting parties were not, from the first and throughout the negotiations, actuated by identity of purpose, inasmuch as the Government of the United States looked to gaining an advantage from the convention, by implication, which the British Government did not contemplate, and did all it could to guard against. In such a position of affairs, however, the wholesome and reasonable doctrine last quoted from Vatel would unquestionably apply.

MR. LABOUCHERE is placed in an unexpected difficulty. No one will accept one of the richest prizes in his patronage. He has offered the Governorship of Victoria to several gentlemen, and met a refusal from all. The *Bernah*, which arrived at Liverpool on Saturday last from Melbourne, brings intelligence of so startling a character that he must indeed be a bold and ambitious man who would covet so unenviable an appointment. The Victorians have displayed a very decided spirit of independence or disaffection, actually claiming a right to elect their own Governor. A requisition had been forwarded to the Mayor of Melbourne calling upon him to convene a public meeting to take this matter into consideration. The meeting was held; and, after much discussion, the show of hands was so equal that the chairman was unable to decide which party had the majority. He then called to his aid two assessors, when a second division took place, but with the same unsatisfactory result. One of the resolutions proposed to vest the nomination of the Governor in the Legislature; another, to transfer it to the great body of the people, voting by ballot. This movement proved a failure; but it is a warning not to be neglected in Downing-street. It must also be noted that the language of the Victorian press is hostile to British authority. The following appeared in the *Melbourne Herald* of the 30th January:—

> The Australian people will not submit to any badge of inferiority, neither in themselves to the inhabitants, nor in their Legislatures to the Parliament of England. They claim, in both cases, an absolute equality. They are willing and anxious to hold, directly and immediately, of the Crown; but they repudiate and protest against the interference of the Parliament at Westminster, as a usurpation and a tyranny. They assert their rights as co-equal and co-ordinate. They ignore and despise the Colonial-office, as a worn-out obstruction between themselves and the Throne. They claim the management of their own affairs, in all that concerns themselves exclusively.

This is the language of defiance, and though it may not, as we believe it does not, express the sentiments of the majority, yet so fierce a tone is apt to inflame discontent into sedition. The writer, allud ng to the contingency of a war between Great Britain and the United States, declares that the people of Victoria "are much more inclined to amity with the United States than with the people of the mother country;" and that they can sympathise with the determination which led the Americans to cast off the yoke. One complaint is perfectly just, and is directed against the apathy of our Government in not providing a regular postal communication with the colony by powerful steam-vessels.

Of late years many wise concessions have been made to our transmarine dominions, and statesmen have learned that they cannot be controlled by force. The Colonial department is gradually becoming little more than a register-office, and the more it assumes that character and abstains from active interference, the better will be the guarantee of union. It is quite idle to refer to precedents no longer applicable. In all our more recent colonies, the inhabitants knew the defects of British institutions before they emigrated, and will not permit their transplantation into their new homes. The democratic must and will supersede the aristocratic element, and any resistance to that change must be defeated. Thus, in Victoria, the ballot clauses of the new electoral acts were carried by large majorities, although strenuously opposed by the executive officers

Government in the House of Legislature. Melbourne will in future be ruled, as Canada is, by a responsible Ministry holding office with the approval of a majority in Parliament. With this guarantee for freedom and for self-government the colonists, without any danger to their liberties, may accept a Governor nominated by the Crown. Without such a functionary, so chosen and representing Majesty, no Imperial link whatever would connect the colony with the mother country, and the separation between them would be complete. But the time has not arrived for such severance, and were it prematurely forced on by disloyalty, the colony would deeply suffer. The duty of the home authorities is to protect Victoria, not to rule it, and one of the most efficient acts of protectorate would be the immediate organisation of monthly steam communication.

## *COUNTRY NEWS.*

METEOROLOGICAL OBSERVATIONS AT THE HIGHFIELD HOUSE OBSERVATORY, NEAR NOTTINGHAM,
FOR THE WEEK ENDING APRIL 29, 1856.

| Month and Day. | Corrected Reading of Barom. at 9 A.M. 181 feet above sea level. | Thermometer. Highest Reading. | Thermometer. Lowest Reading. | Mean Temperature of Day. | Rain in inches Read at 10 P.M. | Mean Temperature of Dew (9-10) | | Amount of Ozone (9-10) | | Mean amount of Cloud (9-10) |

*The range of temperature during the week* was 41°5.

*The weather* was fine on four days, on 25th thunder and lightning, and again on 28th.

*The direction of the wind* was—on 23rd, S.S.E., moving through the S. to E. at ¼ a.m., became E.N.E. at 2½ a.m., about which it oscillated till 11h. 10m. a.m. on 26th, when it moved through N. to W., became N.N.E. again at 2½ p.m.: from ¼ a.m. on 28th, between W. and N.

Severe frosts on the 28th and 29th.

On the 26th the landrail and cuckoo were heard. E. J. LOWE.

THE REPRESENTATION OF LANCASTER.—Since the announcement that one of the members for this borough intends to retire, Mr. Robert Gladstone, of Manchester, has intimated his intention of becoming a candidate to supply the vacancy. Mr. Gladstone's politics are Conservative.—*Manchester Guardian.*

LEGAL APPOINTMENTS.—The valuable office of Deputy Keeper of the Rolls, Dublin, vacant by the resignation of Mr. Robert Wogan, has been conferred on Mr John Reilly, son-in-law of Lord St. Leonards, and nephew of the Master of the Rolls. The latter appointment has been given to Mr. W. R. C. Smith, son of the Master.

A VALUABLE BRANCH OF EDUCATION.—Yesterday afternoon a class of about thirty boys, to whom Dr. Hodgson has for some time past been giving lessons in physiology and its application to the preservation of health, was examined in presence of the governors of the hospital, Dr Bedford, the house governor, and a number of visitors. The subjects selected for examination were the skeleton and its principal parts, the organs and uses of the circulation of the blood, respiration, digestion, the source of animal heat, and the functions of the skin. On these topics much accurate information was displayed by the pupils, who evidently took a lively interest in what they had been learning. At the conclusion Dr. Sibbald, on behalf of himself and the other governors present, expressed their high satisfaction with the zeal, ability, and success with which Dr. Hodgson had seconded their wish to introduce this important branch of instruction into the hospital. They had confidently expected to witness their own most sanguine hopes had been more than realised, and he felt that a debt of gratitude was due to Dr. Hodgson. The Rev. Dr. R. Lee trusted that a department of instruction so exceedingly useful and interesting to any human being would speedily be introduced into all our schools. Dr. Renton said the pupils must now understand far better than they ever did before the truth that we are "fearfully and wonderfully made," and must also see how carefully and wonderfully we are preserved: how much our usefulness and happiness are dependent upon ourselves: and how strong are the inducements to lead a sober and righteous life. Dr Bedford, on behalf of the pupils, acknowledged the delight with which they had listened to the instruction of Dr. Hodgson, imparted so clearly and in so kindly a spirit; and, on his own part, as an old pupil, he indebted to that gentleman for valuable information which he hoped to turn to good account. Dr. Hodgson rejoiced to know that Dr Bedford intended to pursue the path in which he himself had been endeavouring to be useful; and he indulged the hope that ere long physiology and the laws of health would be taught in all similar institutions throughout the kingdom.—*Scotsman, April 19.*

THE LORD'S ENGINE.—The *Bury Post* states that the report of the first of the mighty engines of war at the naval review at Spithead last week was distinctly heard in the neighbourhood of Newmarket, causing a slight but palpable tremor of the earth, and many fancied it was distant thunder.

MORMON EMIGRANTS.—The *Wolverhampton Chronicle* states that early this week a party of Mormonites, numbering upwards of 160, arrived at the Queen-street station in that town, by the Oxford, Worcester, and Wolverhampton Railway, *en route* for the Salt Lake. This large body of perverts to the mischievous doctrines of Joe Smith was chiefly from the agricultural districts of Worcestershire. The greater proportion were people, varying from sixteen to twenty-five years of age, although among the number were several infirm and decrepit old men and women accompanying their families and grandchildren.

WARNING TO GROCERS.—At the Sheriff's Small Debt Court on Thursday a rather novel case was disposed of. It appeared that a grocer in the city had a large quantity of sugar in his window ticketed at "4½d per lb." A person entered the shop and purchased a pound, and afterwards ordered the total quantity upon which the ticket was placed. The grocer expressed his willingness to sell a pound at the price quoted, but refused to part with a lot at that price. Thereupon an action was brought, and the grocer for the difference in price between 4½d. per cwt. and 47s. per cwt.—the former being 4½d. per lb., and the latter the price at which the same quality of sugar could be bought wholesale elsewhere. The Court decided against the grocer, believing that the public were entitled to believe, from the ticket in the window, that the sugar was saleable at that price either in small or large quantities.—*Glasgow Herald.*

## *CHURCH, UNIVERSITIES, &c.*

APPOINTMENTS.—*Archdeaconry.* The Hon. and Rev. H. R. Yorke to Buntingdon *Rectories:* The Rev. J. Walker to Averham with Kelham, near Newark; Rev. L. Fell to Great and Little Sheepy, Leicestershire: Rev. R. J. Irving to Brotherton, near Milford Junction, Yorkshire; Rev. C. W. M. Bartholomew to Sympson, near Wolverhampton: Rev. W. Collett to Hethersett, near Wymondham, Norfolk; Rev S Brown, Hasguard, Pembrokeshire. *Vicarages:* The Rev. G F Deedes to Hayden, near Sleaford, Lincolnshire; Rev. R. Rokeby to Preston Deanery, Northamptonshire; Rev. J. Power to Littlington, near Royston: Rev. F. M. Stanley to Middlezoy, near Bridgwater. *Incumbencies:* The Rev. J. Pearson to Alcester, near Lancashire; Rev. O. K. Prescott to St. John's Church, Dukinfield; Rev. E. B Compson to St. Giles's, Hillesley, Gloucestershire; Rev. W. H. G. Stephens to St. Mary's Church, Darlington Rev. E. G. Jebb to Rowsley, Derbyshire; Rev. R. Skinner to St. Andrew's Church, Fife; Rev. T. Hassall to Shelford, near Cambridge; Rev W. C. Macfarlane to Dorchester, near Oxford; Rev. J. Wood to St. Stephen's Church, Tonbridge; Rev. C. D. Marston to Christ Church, Dover.

THE Rev. Henry Melvill, the newly-appointed Canon of St Paul's, will not preach in the metropolitan cathedral until August in July, when the reverend gentleman comes into his first "month of residence."

HIS EXCELLENCY BARON BRUNNOW arrived at Chesham House yesterday (Friday) afternoon at a quarter before four o'clock.

WELLINGTON COLLEGE.—POSTPONEMENT OF THE CEREMONY OF LAYING THE FIRST STONE.—In consequence of the unfavourable weather, her Majesty has been pleased to command that the ceremony of the first stone of the Wellington College be postponed until a day hereafter to be named in the first week in June.

DEATH OF MR. GUTHRIE, F.R.S. We regret to announce the death of that distinguished surgeon Mr. J. Guthrie, which took place on Thursday morning, at his residence, Berkeley street, Berkeley-square.

## *METROPOLITAN NEWS.*

THE FORTHCOMING REJOICINGS.—The preparations for the fireworks in Hyde-park, the Green-park, and the Victoria-park are now completed. The buildings are each severally 200 feet long and 60 feet high. The fireworks are in an advanced state of preparation, and could, on an emergency, be discharged in a day or two. But it is now the intention of the Government to defer the rejoicings for a fortnight or three weeks, as it is proposed to have a day of general thanksgiving previous to the general rejoicings. On the part of the Government fireworks will be provided of a similar character to those in London for Edinburgh and Dublin; and it is expected that many of the principal cities in the kingdom will embrace the opportunity to give vent to their joy at the return of peace. With respect to the fireworks in the metropolis, the discharge of rockets from Primrose-hill is expected to be the most effective. Above 20,000 will be discharged at once. Some of the pieces and bouquets will be of a most splendid description, several of them being sixty feet high In the House of Commons it was stated that the cost would not exceed £800; but considering the extent of the preparations, it is very questionable whether this sum will cover the outlay.

GRAND BANQUET AT THE MANSION HOUSE.—On Wednesday evening a splendid entertainment was given by the Lord Mayor and the Lady Mayoress to Lord Brougham and the members of the Society for the Amendment of the Law. About two hundred ladies and gentleman sat down to dinner, among were Lord Brougham, the Earl of Harrowby, Sir Thomas Erskine Perry, M.P., Hon. Locke King, M.P., Right Hon. Robert Lowe, M.P., Mr. J. Napier, M.P., Mr. J. Abel Smith, M.P., Mr. E. H Cranfurd, M.P., Mr. S. Hatfield, M.P., Mr. Lloyd Davies, M.P., &c. The usual loyal toasts were proposed by the Lord Mayor, which were received and responded to with every demonstration of loyalty. In proposing "The Health of Lord Brougham and the members of the Law Amendment Society," the Lord Mayor said it was many years since he had the pleasure of seeing the noble and learned Lord at the Mansion House as a guest. His Lordship had conferred upon him the honour of his presence on that occasion in connection with a society of which he was the head, and to which he was greatly attached, having founded that society for the public good—he meant the Law Amendment Society. Lord Brougham was distinguished as a great lawyer, an eminent statesman, a profound judge, and equally distinguished in art and science. The noble and learned Lord was identified with the principles of law reform, and was the early companion of the late Sir Samuel Romilly some fifty or five years ago, and had shadowed out with him many of those great law reforms of which the public now derived the benefit. Lord Brougham, in returning thanks, had no hesitation in saying, in this great capital of the commercial world, that in the improvement of trade there was not one question which deserved greater consideration at the hands of the commercial body than the improvement or amendment of the laws of the land. The LAW Amendment Society had, however, not yet received that amount of support from the merchants of London which it ought to have

COURT OF COMMON COUNCIL.—A special court was held at Guildhall, on Saturday last, "in consequence of a requisition (as the business paper stated) numerously signed, to consider the propriety of preparing and issuing an address to members of both Houses of Parliament, in conformity with the resolutions passed by this court on the 11th April instant."—Mr. Deputy Holt, after pointing out an omission of the court on the 11th ult., in not appointing a committee, moved "That a committee be appointed to prepare an address to the members of both Houses of Parliament, setting forth the grounds on which this corporation feels in duty bound to offer its strongest opposition to the second reading of the bill for the better regulation of the corporation, and to conduct any proceedings that may be required to prevent the further progress of the same, and to report from time to time to this court." Mr. Blake seconded the motion, which was carried, after some remarks by Mr. H. L. Taylor, who was averse from opposing the bill *in toto*.

ROYAL ACADEMY OF MUSIC.—A grand fancy-dress ball, for the benefit of the Royal Academy of Music, which her Majesty has graciously signified her intention of honouring with her presence, will take place at the HANOVER-square Rooms, on Friday, June 6th.

THE PROCLAMATION OF PEACE.—The Lord Mayor has appointed to hold a Court of Common Council on Monday, for taking into consideration an address to her Majesty on the establishment of peace. That lordship has summoned the members of the Corporation to assemble at the Mansion House on Sunday (to-morrow) for the purpose of proceeding to St. Paul's to return thanks for the restoration of peace.

THE CHURCH OF ENGLAND SCRIPTURE READERS' ASSOCIATION.—The twelfth annual meeting of the friends and supporters of this institution was held on Tuesday at the Hanover-square Rooms; the Bishop of Carlisle in the chair. It appeared from the report that 1,306,950 families visited had been 183,476; that visits had been refused by 8825; the Scriptures read to 221,331; to people of no communion, 85,940; to those professing other creeds, 4,000; to Roman Catholics, 4,000; times, 170,867; never attending, 107,692. The financial statement showed the receipts to have been £10,168 8s 11d, and the expenditure £9,938 10s. 7d.; thus leaving a balance in hand of £229 18s. 4d.

THE WEEKLY TRACT SOCIETY FOR THE RELIGIOUS INSTRUCTION OF THE LABOURING CLASSES. At the eighth annual meeting of this society, held on Monday evening at Exeter hall -the Earl of Shaftesbury, president of the society, in the chair—the Secretary read the report, by which it appeared that during the year just closed the society had issued 1,306,950 tracts.

LONDON COFFEE AND EATING-HOUSE KEEPERS' ASSOCIATION.—The nineteenth anniversary festival of this association was celebrated on Monday, at the FREEMASONS' Tavern, Great Queen-street, Lincoln's-inn-fields; Mr. Alderman and Sheriff Kennedy presiding, supported by Mr. Alderman and Sheriff Rose, and many other influential friends of the institution. In proposing "Prosperity to the Association," the Chairman drew particular attention to the satisfactory progress it had made, and the large amount of benefit which had accrued from the administration of its funds. It appeared that ten pensioners were now receiving the bounty of the society, and the amount of its funded property was upwards of £2000, whilst the receipts for the past year had been £403 2s. 7d.

ROYAL PANOPTICON.—The fourth of the series of concerts took place on Monday evening last, when the "Creation" was repeated. Miss Eaton, Mr. Wilbye Cooper, and Mr. Whitehouse (of the Chapel Royal, Windsor), filling the principal parts, assisted by an increased chorus of fifty voices. Mr. E. T. Chipp presided at the organ. Miss Rainsford executed the portion of the music allotted to her in her usual careful manner. Mr. Wilbye Cooper was encored in the well-known air, "In native worth."

PRESERVATION OF LIFE FROM SHIPWRECK.—On Thursday a meeting of the Royal National Life Boat Institution was held at its house, John-street, Adelphi—Thomas Chapman, Esq., F.R.S., in the chair. The silver medal of the institution was voted to chief boatman George Stephenson, of Runcorn, Coast Guard station, and the vote to their life boat crew of six men (who with Hamilton had additionally received £25 from the owners of the vessel), in testimony of their gallant conduct in having rescued, at the risk of their lives, thirteen out of fourteen of the crew of the barque *Augusta Jessie*, which, during an awful gale, was wrecked on the coast of Donegal late on the night of the 9th ult. The life-boat in connection with the institution, stationed at Fakefield, had, on the 13th ult., during a gale of wind, rescued the crew, consisting of eleven men, of the brig *Thomas*, of London. The life boat crew had received £10 for their laudable services. A vote of £7 was also granted to fourteen old fishermen, some of whom were upwards of seventy years of age, for putting off in the Newbiggin lifeboat, in the view of rendering assistance to some twenty-two fishing cobles which were suddenly overtaken at sea by a violent gale. An old sailor, upwards of eighty years of age, who had creditably exerted himself in saving the lives of two men capsized from a boat near Sunderland, was likewise presented with a reward for his prompt services.

PALMER'S TRIAL.—The Lord Chief Justice Campbell has fixed the trial of William Palmer for the alleged poisonings at Rugeley for Wednesday, the 14th of May. As this will be the day for the commencement of the session, it is considered that the trial, if it takes place on that day, will greatly interfere with the other business before the Court. Repeated applications have been made on the subject by the Under-Sheriff, and the probability is that the trial will take place upon some day early in the week after the commencement of the session, and not upon the 14th, as fixed by the Lord Chief Justice. It is said that already not less than two thousand applications have been made to the Sheriffs for orders of admission to be present at the trial -a number far greater than can be accommodated in the Old Court. The delay that has taken place in securing Palmer a fair trail has proved seriously detrimental to his defence. Mr. Serjeant Wilkins is absent from illness. Sir Frederic Thesiger and Mr. Edwin James are both engaged by the Crown. Sir Cresswell Cresswell requires £1000 as his fee, and Mr. Ballantine, therefore, will conduct the defence—against Sir A. Cockburn. The odds are very heavy, so far as counsel are concerned; but the prisoner's friends and family are firmly believe in his innocence, regard the presence of Lord Campbell on the bench as a great protection

HEALTH OF LONDON DURING THE WEEK.—The deaths of 1048 persons—namely, 863 males and 815 females—were registered in London in the week that ended on Saturday. The number is almost the same as that of the preceding week In the corresponding weeks of the ten years 1846-55 the average number was 1027. But the deaths of last week are registered in an increased population, and, if the average now stated is raised proportionately, it becomes 1122. The present state of the public health appears, from a comparison of results, to be not unfavourable. The births of 945 boys and 916 girls, in all 1861 children, were registered in London. In the ten corresponding weeks of the years 1846-55 the average number was 1641.

## NOTES OF THE WEEK.

PEACE has been proclaimed. A procession of heralds, beadles, and other queer-looking persons—the equestrians more or less afraid of their horses, and the pedestrians, especially the Bumbles, affording other food for popular derision—has discharged in ludicrous fashion the duty of announcing, formally, the most important fact since 1815. The sword laid do wn, all differences adjusted, a new member admitted into the European family, the Christian faith in the East placed in its rightful position, this is some of the news which we send beadles to tell. Assuredly, Beadledom ought to hold up its rather discouraged head, and brush up its seedy cocked hats.

Government, moreover, has now discovered that we ought to have a day of thanksgiving at once; and, acting upon this discovery, has proclaimed it with such haste that in Scotland the kirk must include two Sundays in one week, if the Governmental order—issued on Monday last, and fixing the thanksgiving day for the 4th May, while ordering due notice of it shall be given on a previous Sunday—is to be obeyed. It is stated that the appointing a Sunday instead of a week day for the solemnity was the wise and thoughtful suggestion of the highest personage in the country, who took into consideration, not only that there are two opinions about the peace, and that some persons may be determined to avoid any recognition of its supposed merits, but that the working classes, and all who are dependent on daily wages, ought not to be made sufferers by the loss of a day. The other celebration, the firework show, is postponed until the 29th May, when the Queen's birthday is kept; and whether this postponement be due to the magnitude of the preparations, or to the desire to merge all differences of opinion in a demonstration of the loyalty common to all, there is no reason to object to it. The chief reason against it is that the day will be considerably longer, and the people will have more time hanging on their hands before the spectacle can begin. The theatrical managers have met to consider whether the theatres should be open or shut, and have decided to close for that night, unless the Government will enable them to open gratuitously—their only chance, they think of obtaining audiences. The cost of doing this would be comparatively little, and it would afford a new amusement to a large class not usually able to obtain it. Sir George Grey was to be consulted.

The Ministry has also had its own affairs to mind. The series of beatings that it has been receiving has induced Lord Palmerston to summon his adherents to his house in Piccadilly, where he explained to them that this kind of thing really could not go on, and that, though regular voting in platoons was not to be expected since the Reform Act (which his Lordship somewhat regarded as having made members more patriotic and less party-spirited than before), still, if Government could not rely upon support it could not go on. Lord Derby, on the other hand, has also had his meeting; but, whereas the spur was wanted in Piccadilly, the bridle was in requisition in St. James's-square. The Conservative leader had to restrain his impetuous followers, and to intimate to them that this KARS question, for instance, involved far too important interests to be treated as a mere matter of party; and moreover, that, even if their zeal should win a victory over Government, he should not feel it his duty to reward that zeal by taking office. It is said that Lord Palmerston had been made aware, some time since, that such would be Lord Derby's course—doubtless a statesmanlike one—and therefore he was able to bid bold defiance to the enemy.

Of other domestic matters, that exciting most interest seems to be the approaching trial of Palmer of Rugeley for the alleged poisonings. The applications for places in the Court may be reckoned by thousands; while the possible accommodation is limited to a few hundreds. The Attorney-General prosecutes, aided by Mr. Edwin James and Mr. Huddleston, and in such hands there is no chance that justice will be defeated by any accident, whatever may be the result. It will be righteous intervention. It is thought that the theories of medical witnesses will be made to clash, if possible; but it will be the duty—and one worthy of a high intellect—of the advocate to balance or to reconcile this class of evidence; and a fairer opportunity could not be afforded for the bar to vindicate that claim which it is somewhat addicted to make, of superiority, as regards the logical faculty, over the medical profession. If theorists, with various sets of experiments, are permitted by their conflict to confuse a jury into the belief that there is no such thing as abstract truth in the propositions of science, the counsel is safe.

The Postmaster-General proposes a new system for the delivery of London letters, which we shall receive every hour. An important change in the present arrangements, which take a letter many miles out of its way to the central office, will be made, and London will be divided into a series of districts, each a centre, from which the letters will be carried direct to their destination. The Postmaster will expect letter-writers to make themselves masters of his simple requisitions as to the direction of their despatches, and this is a small matter to ask. We are also told that some new street nomenclature is to be ordered, that the troublesome nuisance of having a dozen streets of the same name may be got rid of. Our recent campaigns and victories will afford some hints to the sponsors—why not turn King-square into Inkerman-square, Queen-street into Alma-street, and so on?

The question of the late run upon the National Provident Institution has assumed a different aspect from that which it wore to the public eye when we last wrote. A statement has appeared on the part of the discharged officials, to whom blame was in the first instance imputed; and this document, if it be substantiated, most materially alters the case. It is declared that the dismissal of these individuals—whose names we learned for the first time from their own vindication—took place, not only for reasons apparently inadequate, but in the most arbitrary and offensive manner. Some of the gentlemen thus extruded are represented as having been for very many years in the service of the institution, and we are bound to say that their reply entitles them to have their case thoroughly investigated before the public eye. They utterly deny having given any ground for the charge that they had been instrumental in causing the distrust which occasioned the run; and it is due to them, we having reproduced the original charge, to give as wide a circulation to their repudiation and counter-statement. Reverting again to the interest of the public—for whose sake alone, of course, we took up an uninviting subject—we regret not to have observed that any step has been taken to reassure the body of humble depositors of the security of this establishment, and of the incalculable value of such institutions to the cause of social and moral progress.

PROGRESS OF GREECE. The *Débats* publishes some figures supplied by the head of a commercial firm at Marseilles, a person described by our contemporary "better acquainted than any other with the facts," in order to show what progress Greece has made during the twenty-five years that have elapsed since her separation from Turkey According to this authority, in the year 1821 the Peloponnesus, the continental territory and the islands now composing the Kingdom of Greece, contained 74,420 agriculturists, in 1854 the number was 109,320. The land under cultivation at the first date was 2,338,000 stremmas (each of 1196 square yards), and at the second 3,650,800 stremmas. The corn produced in 1821 was 5,100,000 kilometres; in 1854, 9,150,000 kilometres. Cattle have increased in the same period from 21,700 to 38,700 yokes.

THE POPE AND THE ITALIAN QUESTION.—The high ecclesiastical circles of Rome are panic-struck at the Oscour programme, and irritated at the strong language made use of by the English press respecting the maladministration of his Holiness's dominions and the necessity of reform. The sudden departure for Paris, on Saturday last, of Monsignor Berardi, Under Secretary of State for Foreign Affairs, is generally attributed to the concentration of the Court at the bare mention of a question of such vital importance as a limit to the temporal sovereignty of the Supreme Pontiff, and the consequent desire to have at the instant of capacity and deviceliness on the spot to assist the minds of his reminiscences, and counteract the baleful suggestions of constitutional plenipotentiaries.—*Letter from Rome, April 24.*

THE NAVAL REVIEW:—THE FLEET ROUNDING THE PIVOT-SH

THE NAB, PORTSMOUTH.—DRAWN BY EDWIN WEEDON.—(SEE PAGE 467.)

## IMPERIAL PARLIAMENT.

### HOUSE OF LORDS.—MONDAY.

Lord BROUGHAM laid upon the table a bill to assimilate the law of marriage in Scotland to that of England.

The Earl of CLARENDON laid on the table the Treaty of Peace which was ratified on Sunday at Paris, and gave notice that the subject would be taken into consideration on Monday next.

### HOUSE OF COMMONS.—MONDAY.

Lord PALMERSTON laid upon the table the Treaty of Peace between Russia and the Allied Powers, which was ordered to be taken into consideration on Monday next. The noble Lord further stated that her Majesty had appointed Sunday next as a day of thanksgiving.

In reply to a question from Lord J. Manners, Lord PALMERSTON said he would propose that the House should adjourn from the Whitsuntide holidays from Friday the 9th until Friday the 16th of May.

THE FALL OF KARS.

Mr. WHITESIDE then proceeded to move the following resolution:—

That, while this House feels it to be its duty to express its admiration of the gallantry of the Turkish military and of the devotion of the British officers at the siege of Kars, it feels it to be equally a duty to express its conviction that the capitulation of that fortress, and the surrender of the army which defended it, thereby endangering the existence of the independence of Turkey, were in a great measure owing to the want of foresight and energy on the part of her Majesty's Administration.

The hon. and learned gentleman gave a short but succinct narrative of the manner in which Russia had encroached upon and incorporated the territories of her neighbours, until her power became so colossal as to be dangerous to Europe as well as Asia. The policy of Russia is aiming to universal dominion was to attack Turkey in her Asiatic provinces, for there she gained a double advantage—that of absorbing Turkish territory, and overawing Persia at the same time. Under these circumstances it was the duty of a British Minister to take steps to meet any advances of the Russians in Asia Minor, which was the more necessary as India, the Turks having been defeated by the Russians in five battles, and the army of Turkey in Asia Minor having become disorganised, at last the English Government began to think it time to open their eyes, and accordingly they sent a Commissioner to Turkey, with instructions to our Ambassador there that he was to give him every countenance and support. General Williams was the Commissioner, but in many respects he appeared to his face as that gallant officer. He actually bombarded Lord Stratford de Redcliffe and Lord Clarendon with despatches; but all in vain, for during the whole period of his residence in Asia Minor the only aid he received either from England or Constantinople, was four men and one doctor. The hon. and learned gentleman then quoted largely from the blue-book, in order to show how miserably neglected was General Williams, and said that the blue-book, which was perhaps the most extraordinary that ever saw the light, gave no clue whatever to the motives of Lord Stratford de Redcliffe's conduct which was utterly unintelligible. He had suffered no less than fifty-four letters from General Williams to remain wholly unanswered; and it appeared that the noble Lord, accordingly they sent a Commissioner not the Government at home ever knew or ever defined the authority with which the Commissioner was invested. Mr. Whiteside went through the correspondence in the blue-book, in order to show that, however blameable Lord Stratford de Redcliffe might have been at first, he was innocent of the fall of Kars, for he had pressed the necessity of sending succour to the General repeatedly; but the vacillation and want of purpose of the Government at home were the real cause of the surrender of the Turkish army of Asia Minor. Even if they had sent out no military forces they could have done something out a sum of from £20 to £100,000 to purchase provisions; but he deliberately charged the Government with having the intention of saving Kars, for they had been warned by Lord Ellenborough and others that its fate was sealed if not speedily succoured.

The ATTORNEY GENERAL said he was not there to defend Lord Stratford de Redcliffe from the charge of remissness, but he asked the House if they were prepared to assert that the Government should have recalled that nobleman? The Government had no interest in him. He was not one of their partisans. He was appointed by the Earl of Derby, who, in creating him a peer, had jumped over the first step in the peerage and made him a Viscount. The rebuke which he had received from the Earl of Clarendon, and which he must have severely felt, was sufficient; and he was sure were right hon. gentlemen on the Opposition benches in power they would not think of recalling a man who has done so much of the Turkish Government, and rendered such eminent services to his country as had Lord Stratford de Redcliffe. It was only justice to him, however, to say that, though he had not seen even the letters of General Williams, yet he had acted upon them, or that gallant officer never could have effected the changes he had done in the Turkish army. It was very easy to say that the British Government should have sent out troops to relieve Kars; but where were they to get them when we had ransacked our colonies, and already sent every disposable man to the Crimea? What would have been said if the Government had divided the army before Sebastopol, already too weak, and sent half of it to Armenia? Why, the whole country would have rung with their condemnation. It was said they might have done it; but would such a step have been wise? As a gift? or as a loan? They had come to that House to guarantee a loan, and they were met by being told that they were resorting to the worn-out system of bribery to corrupt him. An hon. gentleman himself had actually voted and very nearly defeated the Government on the question of the Turkish loan. The Government had achieved every purpose for which the war was commenced, though the enemy had exhausted their resources, the late naval review proved that this country had by no means exhausted hers; and on the advent of a peace under such circumstances as that the country could look upon it with pleasure upon the Ministry which had guided the helm through a difficult and stormy period.

Lord J. MANNERS contended that the fall of Kars was entirely attributable to the supineness of the British Government. The blue-book contained not one line to show that the Turkish Government had received one shilling of the Turkish loan; although had they had the money they might have been enabled to save Kars. The absorption of the Turkish Contingent into the British army, managed as it had been, was damaging to Turkey, and rendered that country the less able to relieve that fortress.

The LORD ADVOCATE contended that the motion of Mr. Whiteside, however brilliantly advocated, must fall to the ground; because, in point of fact, it was not true, for Kars had not fallen owing to the want of foresight and energy on the part of the Government.

Mr. J. G. PHILLIMORE moved the adjournment of the debate, which was assented to.

### HOUSE OF LORDS.—TUESDAY.

FALL OF KARS.

The Earl of MALMESBURY withdrew his motion, which stood for Friday, relative to the fall of Kars. He regretted being under the necessity to take that course, but he was unwilling to forestal the discussion on the treaty of peace, which stood for Monday next.

In reply to a question from the Earl of Malmesbury, Earl GRANVILLE said he would state on Friday the form of the address to be moved on the following Monday on the subject of the treaty.

### HOUSE OF COMMONS. TUESDAY.

THE MILITARY BANDS IN THE PARKS.—Sir B. HALL stated, in reply to the Marquis of Blandford, that he had directed the military bands to play on Sundays in the parks. He had not asked the permission of the officers, he had only communicated with the Horse Guards. He had obtained a band to play in Kensington Gardens on Sundays last autumn and the good conduct of the people on that occasion had determined him to direct other bands to play in H.M. Park and Victoria Park. He had not yet made any arrangements for the sale of refreshments, but if he found it necessary he would do so excluding, however, intoxicating liquors.

IRISH EVICTIONS.

Mr. M'MAHON moved for the appointment of a Select Committee to inquire into certain evictions which a Scotch proprietor had made from his newly-acquired estates in the county Galway.

After some conversation, in the course of which Lord PALMERSTON strongly deprecated the practice of evictions, as full of mischief both to the tenants on the particular estate and to the community at large, the motion was withdrawn.

THE FALL OF KARS.

Mr J. G. PHILLIMORE, who resumed the adjourned debate, said he had intended to move for a Select Committee upon Lord Stratford's conduct, but as Mr Whiteside had taken the Government with attempting to ride off upon that amendment he would withdraw it. He was satisfied with the tone and temper in which Lord Stratford's conduct had been spoken of on this debate, and he would not impute to the former Mr. Whiteside and the defeat which he believed to await his motion.

Mr. SOMERSET REYNOLDS rose to advise different parties to sheathe their swords and part from this fray, however, and in order to that he rose to move an amendment that after the words of encomium on General Williams and the Turkish garrison, which were contained in the motion, he would add that the House postpones giving any opinion upon the calamitous fall of the city till after they had considered the Treaty of Paris. The issue he would put to them was this—was there such a strong and palpable case against the Government as that the House should, without further consideration, proceed to condemn it? For his part, he thought there was not, and therefore he would press his amendment.

The CHANCELLOR of the EXCHEQUER said Mr. Whiteside's speech and his motion were founded on the assumption that the British Government was responsible for the conduct of the war in Asia Minor. Now, that was an assumption which he denied. That war was committed necessarily to the management of the Turkish Government, and the only question was whether the British Government should have interfered so far as to send General Williams as their commissioner. Our allies, the French, took no notice of that war at all, and would not even send a commissioner. It might as well be argued that we were responsible for the conduct of the Turkish army, and that the Turkish Government was responsible for ours, because both Governments sent commissioners respectively to each other's army. General Williams had no more authority at Kars than those commissioners had, and it was his own energy and genius that raised him to a position so much more conspicuous than those other commissioners. So conspicuous, indeed, had his gallantry been, that it led people to suppose that the garrison of Kars was an English army and not a Turkish one. It was said that if the Turkish Government had got the loan in time it would have been applied to the support of Kars. Now, he could state that the Act having been passed on the 14th of August, £100,000 of the loan, in hard cash, was shipped for Turkey on the 25th of that month, and £500,000 was sent by the 15th of September. But the Turks would give no security for the due application of the money to the purposes of war till the 24th of November, which was, in fact, the very day that Kars capitulated.

Sir J. PAKINGTON rose to express his dissent from the extraordinary statement of the Chancellor of the Exchequer, that the Government was not responsible for the management of the war in Asia. In every line in the blue-book contradicted that statement, which seemed to him only to have been hazarded by the right honourable gentleman from the conviction that the opinion of the Government admitted of no real defence. Their interference with the plans for the relief of Kars proved their responsibility. He contended that it was to the vacillation and imbecility of the British Government the fall of Kars was clearly to be traced.

Sir. LAYARD complained of the inconsistency of the Opposition with regard to the honourable and repeatedly called attention to the importance of Asiatic Turkey, and had urged the Opposition members to join him in pressing it upon the Government. But they refused to do this when it would have been of effect. Now, when the country was done, they proposed to censure the Government for taking the very course which they themselves had all along been acted upon. He did not mean to say the Government was faultless, but he believed the case against it had been grossly exaggerated. Lord Clarendon had been censured for recommending the Turks to abandon Kars, but he had repeatedly called attention to the advice he should have himself given, as he believed there were positions which were more defensible than Kars. Now, as to the relief of Kars, in the first place for the reliefs were only to be sent by way of Trebizond and Batoum. But when the summer months were lost, and time became precious, the only chance was a diversion by way of the Kuisk. He had never given a decided vote in the House, and he felt he should be giving one now if he were to vote that the fall of Kars was to be wholly attributed to her Majesty's Ministers. After all, the French Government had done much more than we in the matter, though they had not been referred to in the course of this debate. He must therefore vote against the motion.

Mr. MAGUIRE threw the whole blame of the loss of Kars upon Lord Stratford de Redcliffe

Sir W. BEATHCOTE urged upon the House the adoption of Mr. Ker Seymer's amendment, which he explained to be equivalent to voting the previous question. If that amendment were rejected, he must vote for the motion.

Mr. WARNER condemned the conduct of Lord Stratford de Redcliffe.

Mr. Serjeant SHEE strongly advised the Prime Minister not to accede to the amendment. He had prosecuted the war with the utmost vigour, and had concluded a peace which the House and the country would pronounce to be safe and honourable, and they were anxious by a large majority to acquit him and his Government of the blame which this factious resolution attempted to fix upon them.

Sir E. BULWER LYTTON moved the adjournment of the debate.

Lord PALMERSTON hoped the House would not agree to the adjournment. He could understand the party who had shrunk from the question in the other House—daunted probably by the speech of the member for Edinburgh—should wish to adjourn; but he would not lend himself to such a scheme. He was ready to go till the end of the hour, but he was determined to divide the House upon the question

Mr. DISRAELI could not understand the tone of the noble Lord. The delay was to be a matter of form, and the noble Lord would move the adjournment of the House himself.

Lord PALMERSTON was satisfied with the result, and made no further opposition to the motion.

The debate was accordingly adjourned till Thursday.

### HOUSE OF COMMONS.—WEDNESDAY.

A new writ was issued for the county of Longford, in the room of Mr. FOX, deceased

DWELLINGS FOR THE LABOURING CLASSES (IRELAND) BILL.—Sir W. SOMERVILLE moved that the House resolve itself into Committee on the Dwellings for the Labouring Classes (Ireland) Bill—Colonel GREVILLE and Mr. DE VERE considered that the bill was objectionable, but would endeavour to amend it in Committee.—Mr. BRADY moved as amendment that the House resolve itself into a Committee on the bill that day six months.—Sir W. SOMERVILLE defended the bill, which was only calculated to meet the circumstances of the poorer classes in Ireland, which were now a disgrace to the country.—Lord BERNARD hoped the House would be allowed to go into Committee, where any objection to the bill might be made.—Mr. O'Connell opposed the bill, as giving increased powers of eviction to the landlords of Ireland.—Mr NAPIER could not understand how the principle of the bill could be objected to, as it was in every point of view favourable to the working classes, and he would, therefore, give it every support in his power.—Mr. MAGUIRE opposed the bill, owing to the summary powers it conferred on landlords. After some observations from Mr. Wilkinson, Mr Deasy, Captain Magan, and Sir R. Ferguson, Mr. BRADY withdrew his amendment, the House went into Committee, and the discussion of the various clauses occupied the remainder of the day.

### HOUSE OF LORDS.—THURSDAY.

This being Ascension Day, their Lordships did not meet.

### HOUSE OF COMMONS.—THURSDAY.

LAND TRANSPORT CORPS.—Mr. F. PEEL, in reply to Colonel DUNNE said the propriety of disbanding the Land Transport Corps was under consideration.

MEDICAL STAFF OF THE ARMY.—Mr. F. PEEL, in reply to Mr Palk, said that, although it was not intended to reduce the present medical staff of the Army, every care would be taken to increase its efficiency.

THE BOUNDARIES OF MOLDAVIA.—Lord PALMERSTON, in reply to Sir H. Willoughby, stated that the boundary of Moldavia was so well defined in the treaty that no difficulty would arise on that head. A commission was to be appointed to settle the boundary, and meanwhile it was satisfactory to know that all the islands on the Danube, and the Salt Lakes, as well as the lower part of the Pruth, were within the Moldavian boundary.

RUSSIAN FORTS ON THE BLACK SEA.—Lord JOHN MANNERS said he found by the Protocols that there had been a discussion at the Conference as to the right of Russia to rebuild her forts on the eastern shores of the Black Sea, but he was unable to gather from them whether Russia could rebuild those forts or not? He should be glad if the First Lord of the Treasury would now inform him.—Lord PALMERSTON said there had been a discussion upon the subject at the Conference, but no decision was arrived at, and there was nothing about it in the Treaty of Peace (Hear).—Lord J. MANNERS: Then Russia can rebuild these forts? Was there a second question to that question? Lord PALMERSTON could not say.

FALL OF KARS.

The adjourned debate upon Mr. Whiteside's motion was resumed by Sir E. BULWER LYTTON, who said he had moved the adjournment of the debate because he conceived that the question had been imperfectly discussed on both sides of the House, rather than from any wish to go at any great length into the question himself. Mr. Layard, he thought, had exaggerated the charge brought against the Government, because he had represented that the resolution before the House attributed the fall of Kars exclusively to the Government. The resolution, if it had gone to that extent, would certainly not have had his support; but, as it only asserted that the want of energy and foresight on the Government had contributed to the fall of Kars, he believed that the charge contained in the resolution was true, and he should, therefore, give it his support. He did not, however, concur in the blame that had been cast upon the noble Lord Clarendon (Hear, hear). On the contrary, he believed that many of those strokes were most excellent; and, if letter-writing could have saved Kars, he believed that Kars would have been saved long enough ago. It had come to that pass that the Government had actually sent out a commissioner without instructions! The resolution, it seemed to him, contained that ammunition and provisions might have been easily thrown into the city, despite the presence of the Russian army; that the expenditure of £100,000 or £200,000 of the £5,000,000 guaranteed by the House would have been sufficient for the purpose, and ought to have been forwarded without waiting for a compliance with tedious forms; that no Aslatic Pacha could have treated General Williams's application for surgeons with more lazy indifference than Lord Palmure had done; and that the troops captured at Kars had found Russian magnanimity better than English care (Hear, hear).

Mr. V SMITH, in opposition to the motion, said that as the debate had resolved itself into an attack on Lord Panmure and Lord Clarendon, it would have been a more generous proceeding if the resolution had been brought forward in the House of Lords, where the noble Lords who were accused would have an opportunity of personally defending themselves. With regard to the fall of Kars itself, he insisted that it was no triumph for the Russians; and that the Government had done all in their power to avert that fall, by sending out a British Commissioner

Mr. VANSITTART was understood to condemn the conduct of the Government.

Captain LAFFAN opposed the motion.

Colonel DUNNE said he had no doubt but that the fall of Kars rested on the WAR Department of the Government.

Mr. COWAN gave his cordial support to the Government.

Mr. LIDDELL supported Mr. Ker Seymer's amendment

Sir GEO. GRAHAM said that he had been in considerable doubt as to the vote he should give on the question before the House, but he would allow for the difficulties with which the Government had had to deal. The right hon. baronet passed a high eulogium upon the character of the late Lord Raglan, and defended the Government of Lord Aberdeen who had made arrangements in the event of the first bombardment of Sebastopol being successful to march an army into the Asiatic frontier. Although he considered some portions of the conduct of Lord Stratford de Redcliffe were reprehensible, the House and the country ought not to forget the important and valuable services that he had rendered. Having paid the tribute of his admiration to the noble defence and patient endurance of General Williams at Kars, he concluded by stating that he would neither vote for the motion nor the amendment.

Mr. DISRAELI denied that the supporters of the motion were influenced by anything like factious motives, or a wish to upset the Government; and contended that the subject, being one of universal interest, demanded the fullest discussion and investigation.

Lord J. RUSSELL vindicated the course which he had taken when in office, and gave his warm support to the motion.

Lord PALMERSTON replied to the charges that had been brought against the Government, and reiterated the arguments which had already been advanced by some of his colleagues.

Mr. WHITESIDE denied that the supporters of the motion were influenced by any of the motives imputed to them.

The House divided first on the amendment of Mr. K Seymer. The numbers were—

| | | |
|---|---|---|
| For the amendment | .. .. .. .. .. | 51 |
| Against | .. .. .. .. .. | 451 |
| Majority against Mr. K. Seymer's amendment | .. | 399 |

The House then divided on the original motion. The numbers were—

| | | |
|---|---|---|
| For Mr. Whiteside's motion | .. .. .. .. .. | 176 |
| Against | .. .. .. .. .. | 303 |
| Majority in favour of the Government | .. | 127 |

### HOUSE OF LORDS.—FRIDAY.

THE FOREIGN ENLISTMENT QUESTION.—The Earl of CLARENDON laid on the table copies of the correspondence which had taken place between her Majesty's Government and the Government of the United States on the subject of recruiting in America.

The Mercantile Law Amendment Bill and the Mercantile Law (Scotland) Bill were severally reported with amendments

On the motion of Earl GRANVILLE, it was agreed that the House should adjourn till Sunday, at a quarter before ten o'clock a.m., and then to meet for the purpose of attending Divine service at Westminster Abbey on that day, being the day appointed by her Majesty's Proclamation for a General Thanksgiving.

### HOUSE OF COMMONS.—FRIDAY.

POLITICAL EXILES.—Mr. T. DUNCOMBE gave notice that he should next week ask Ministers whether they intended on the occasion of the restoration of peace to advise her Majesty to permit the return to England of the political exiles Frost, Williams, Jones, and Smith O'Brien.

THE RUSSIAN SHIPS AT SEBASTOPOL.—Lord PALMERSTON, in reply to Lord W. Graham, said that, if Russia chose to raise her sunken ships in the harbour of Sebastopol and send them to the Baltic, England would offer no objection. A question had arisen at the Conference as to the removal of two Russian ships from Nicolaieff to the Baltic, and her Majesty's Plenipotentiary, in accordance with instructions from home, had offered no opposition to their removal.

FALL OF KARS.—Mr. J. G. PHILLIMORE gave notice that he should, after the Whitsuntide recess, call upon the House to vote that the Queen, while expressing its admiration of the heroic conduct of General Williams and his brave companions in defending Kars, thinks it important to record its conviction that the conduct of Lord Stratford de Redcliffe, in neglecting to reply to the letters of General Williams, calls for the severest censure (Hear, hear).

MUSIC ON SUNDAYS IN THE PARKS.

Lord R. GROSVENOR inquired whether, in the event of a member of the bands now ordered to play in the parks on Sundays objecting to do so, either from conscientious motives or a desire to enjoy their Sunday holiday, such person would be relieved from such duty?

Sir DE LACY EVANS said the question was one for the Commander-in-Chief.

Col. TROLLOPE stated that an officer commanding a regiment had no power to order that his band had played, nor from any wish of his, but in obedience to the orders of the Commander-in Chief

Mr. HUME spoke in favour of the bands playing on Sundays.

Mr. WIGRAM, regarding the question as one of labour, argued that if the bands were allowed to play on Sundays all the sailor-boys would be allowed to do that day would spoil their week's labour.

Mr. ADDERLEY said that the question was, in his opinion, one entirely of local concern, and he charged Sir B. Hall with introducing novel notions on the matter without consulting the feelings of the people.

Mr. DRUMMOND thought it was quite right to open the parks on Sundays as places of amusement.

Sir B. HALL, in defending his conduct in connection with this subject, said an outcry similar to the present had at first been raised against the opening of Hampton Court and Kew Gardens on Sundays. He denied that the exchange of the people in the parks on Sunday was a nuisance.

LORD ELCHO received several letters from all parts of London thanking him for the course he had pursued, and urging him to persevere in it. He hoped that the time would never come when the people would be deprived of this innocent amusement (Cheers).

Mr. WALPOLE thought that Government ought never to require from any of their officials the abandonment of their day of rest on Sundays.

Colonel NORTH said the doctrine of freedom of conscience was a dangerous element in the army.

Lord PALMERSTON thought the House was acting very injudiciously in meddling with a question of military discipline. The course taken by Sir B. Hall had the full sanction of Government, who intended to persevere; and he believed, so far from making Sunday a day of labour, would have quite the contrary effect (Hear, hear).

THE BUDGET.—The CHANCELLOR of the EXCHEQUER announced his intention to bring forward his Budget on Monday, the 12th inst.

THE ENLISTMENT QUESTION.—Lord PALMERSTON laid on the table the correspondence on the American Enlistment question

THE POLICE (COUNTIES AND BOROUGHS) BILL. The House then went into Committee upon this bill, and the discussion of its clauses occupied the remainder of the evening.

---

A GENERAL THANKSGIVING.—A Form of Prayer and Thanksgiving to Almighty God, to be used in all churches and chapels throughout those parts of the United Kingdom called England and Ireland, on Sunday, the 4th day of May, 1856, being the day appointed by proclamation for a General Thanksgiving to Almighty God, for His great goodness in putting an end to the war in which we were engaged against Russia.—Almighty and merciful Father, who by Thine over-ruling Providence dost govern the nations upon earth: We Thine unworthy servants desire to approach Thee this day with the voice of praise and thanksgiving. We bless Thy holy name for the mercies with which Thou hast crowned the arms of our Sovereign and her Allies in a perilous and destructive warfare; for inspiring our forces, both by sea and land, with a courage and endurance which neither the numbers nor the bravery of those opposed to them could overcome. But chiefly we acknowledge it to be of Thy great goodness that Thou hast caused strife and contention to cease, and hast restored the blessings of peace to Europe. Praised be Thy Name for this and all Thy mercies. Grant that every renewal of Thy lovingkindness towards our country may lead us to unfeigned thankfulness, and disposes us to walk more humbly and devoutly before Thee, by following Thy holy will and commandments, and by promoting whatever may tend to the maintenance of true religion, and virtue throughout the land. Unite all ranks of men amongst us in the bonds of brotherly love and Christian charity; endue them with a spirit of piety and justice, of industry and temperance, that the blessings which we long enjoyed may be continued to us and our posterity. We further beseech thee, O Lord, that the nations who have been engaged in the late contest, and are now relieved from the dangers and calamities of war, may seek and pursue those things which make for peace, and the furtherance of kindly intercourse one with another, and, above all, by the cultivation of true and undefiled religion, to tie and knit, through the tranquillity now happily restored, the Redeemer's kingdom more enlarged, and the nations of the world united in striving to exalt and magnify Thy glorious name; through Jesus Christ our Lord. AMEN.

## TOWN AND TABLE TALK ON LITERATURE, ART, &c.

THE Fence procession on Tuesday last should have been reserved for Thursday: the Earl Marshal of England, with his attendant heralds, might then have mixed not inappropriately with Jack-in-the-Green and his attendant May-day merrymakers. Or it might have been postponed to the 9th of November, and made a part of the City procession of the new Lord Mayor. It was the fault of the Ministry it was not better. Processions of State are not impromptu matters, even on the stage. Ask Mr. Charles Kean if they are so? The whole affair reminded us of a passage in Fielding. "I am convinced," he writes, "that awful magistrate my Lord Mayor contracts a good deal of that reverence which attends him through the year by the several pageants which precede his pomp. Nay, I must confess that even I myself, who am not remarkably liable to be captivated with show, have yielded not a little to the impressions of much preceding state. When I have seen a man strutting in a procession, after others whose business hath been only to walk before him, I have conceived a higher notion of his dignity than I have felt on seeing him in a common situation." Who conceived a higher notion of the Earl Marshal of England or of the High Bailiff of Westminster from the pageant they or their subordinates were seen in on Tuesday last?

People are asking if the Peace is to give us an ode from the Poet Laureate. We are told not. The subject is one which might well inspire a poet; but the muse of Mr. Tennyson is not in the vein. Perhaps this true poet is afraid of some of those parodies with which the efforts in verse of his predecessors in the laurel were greeted by a public in a mood for laughter. Who has forgotten the famous imitation of Poet Laureate Cibber?—

> Old Battle-army, big with horror, is fled,
> And olive-robed Peace again lifts up her head.

A true poet brought over the Treaty of Peace at Ryswick, and received two hundred guineas for his pains. This poet was Matthew Prior.

It is untrue that Lord Palmerston has gone to the last pages of a popular living author for a precedent for his Peace announcements in Parliament. How admirably has Mr. Macaulay painted in his fourth volume the arrival in London of the news of the Peace of Ryswick! "Instantly a flag was hoisted on the Abbey, another on St. Martin's Church. The Tower guns proclaimed the glad tidings. All the spires and towers from Greenwich to Chelsea made answer. It was not one of the days on which the newspapers ordinarily appeared; but extraordinary numbers, with headings in large capitals, were for the first time cried about the streets. The price of Bank Stock rose from eighty-four to ninety-seven. In a few hours triumphal arches began to rise in some places; huge bonfires were blazing in others. The Dutch Ambassador informed the State-General that he would try to show his joy by a bonfire worthy of the commonwealth which he represented; and he kept his word; for no such pyre had ever been seen in London. A hundred and forty barrels of pitch roared and blazed before his house in St. James's-square, and sent up a flame which made Pall-mall and Piccadilly as bright as at noonday." Nor is the Chancellor of the Exchequer (though an historian himself) about to follow historical precedent in the matter of the peace. The fireworks in London for the Peace of Ryswick cost (says Mr. Macaulay) twelve thousand pounds; the fireworks in London for the Peace just concluded will cost (says Mr. Chancellor of the Exchequer) only eight thousand pounds. Consider the difference in the value of money between 1697 and 1856, and £8000 will appear too little for an effective display.

Next Monday will no doubt tell us what the nation has bought from the two days' sale (on Friday and Saturday) of the two hundred and twenty-five pictures comprising (with three exceptions bequeathed to the nation) the entire collection of pictures of the poet Rogers. Artists and connoisseurs differ among themselves and with one another respecting the particular lots which the nation should bid for. Men unduly attached to the Venetian school cry out for the purchase of the Tintoret and the Paul Veronese. Others who worship early art are eager for the purchase of the Lorenzo di Credi. Not a few—and those good judges—would reserve the nation's money for the Cuyps and the Claudes. "The Madonna Eseri racing the Infant" Much may be said, of course, in favour of the several pictures recommended. But it appears to us, and to many others, that for the British nation to miss securing the "Puck" and the "Strawberry Girl" would be a national and a lasting disgrace. We have not too many fine pictures of the English school that we can afford to let them slip through our hands when they occur for sale.

The biographers describe in very enthusiastic language the beauties of a folio volume of fifty photographs by fifty different hands, and those of eminence, to which Mr. Whittingham, of Chiswick, has attached fifty pages of letterpress of corresponding beauty. The volume is a present to her Majesty, and is one of fifty-two copies of a series of photographs made by the members of the Photographic Club—a newly-established club akin to the old Etching Club, and instituted to advance and record the progress of the art of photography. This is their first volume, and most wonderfully does it exhibit the progress which photography has made in England during the past year. Each of the fifty members sends fifty-two impressions of what he considers to be his best photograph with a description of the process used in obtaining it. Fifty copies are distributed among the fifty; the fifty-first is offered to her Majesty, and the fifty-second presented to the British Museum. Very wonderful, indeed, are some of the photographs in this very beautiful volume. We would especially point out as perfect in their truth to nature and adherence to art Mr. Batson's "Babbicombe Bay," Mr. Henry Taylor's "Lane Scene," Mr. Llewellyn's "Angler," Mr. Bedford's "Flowers," Mr. Delamotte's "Innocence," Dr. Diamond's "Interior of Holyrood," Mr. Henry Pollock's "Windsor Castle," Mr. Mackinlay's "Bodiham Castle," Mr. White's "Garden Chair," and Mr. John Stewart's appropriate vignette to the volume—the portrait of Sir John Herschel.

Tell it not in Glasgow for the present—but the citizens of that fair city of the West are about to fill with stained glass some of the principal windows of their noble cathedral—the only perfect cathedral in Scotland. When the chill of sameness is a little subdued—which the stained glass will materially do—to contribute to—the citizens of Glasgow will be enabled to point with additional pride to their fine cathedral. Unlike the cathedrals of England, the care of Glasgow Cathedral belongs to the Crown; in other words, to the Commissioners of Works and Public Buildings. A fee is still charged for admission. This should be discontinued, and the cathedral at once thrown open to the public. In the House the other night Mr. Gladstone, we observed, complained—and properly complained—of the toll of sixpence that was levied upon him at the gates.

The guarantee fund for the Exhibition at Manchester in 1857 of the Art Treasures of the United Kingdom amounts already to £60,000. The Mayor and the rest of the subscribers have solicited an interview with Prince Albert on the subject. To reveal for the present anything more about the scheme than what we have already told would still be premature. Next week we may possibly tell all that is then known about it.

Mr Murray announces a new Biographia Britannica. He has, therefore, wisely abandoned a much wider scheme—a new Universal Biographical Dictionary. The old Biographia Britannica, in seven folio volumes, is still a standard work. By narrowing his scheme he is surer of success. The Messrs. Black of Edinburgh announce for the close of the present month the third volume of Dr Rogers's "Modern Scottish Minstrel." A preliminary essay on "Scottish and Hellenic Minstrelsy," by Mr. Donaldson, the learned author of the "Varia Græca" and the "Modern Greek Grammar," is likely to prove an attractive feature of the volume.

We are not very great admirers of colossal busts. Even Chantrey was not good at them: but there is much to admire in a large bust of the Queen, just executed by Mr. Noble for the Townhall at Manchester. Mr. Noble has had every opportunity of executing a clever bust of her Majesty; and he has succeeded, as the Manchester people will soon discover.

## MUSIC.

HER MAJESTY'S THEATRE.—The illustrious new singer, Mdlle. Piccolomini, who is to be the great attraction of Her Majesty's Theatre, is a descendant of the family of which Pope Pius Piccolomini was a munificent patron. Her ancestry includes two Popes and several Cardinals, besides Bishops, Field Marshals, poets, and historians. The present possessor of the name has already commenced her reign; the acknowledged Queen of Song in Italy, the "divina" and, she has been hailed by the general voice of the people, and crowned with a thousand laurels. Piccolomini made her first appearance in public four years ago, at the age of sixteen, at the Pergola, Florence. In the short period that has elapsed since that event she has achieved one of the most brilliant reputations of the day, and gathered around her a crowd of enthusiastic admirers. Her recent reception at her native town of Sienna is unexampled in the history of the stage. On each successive night she occasioned transports of enthusiasm, such as a Queen might envy; wreaths and bouquets falling at her feet in showers until she stood, as an Italian critic expressed it, in the midst of a "little garden." At the conclusion of her last performance the youth of the country escorted her home through the town in triumph, amidst the blaze of torches and the fanfare of drums and flies. Along this very road Pius II. passed four hundred years before, followed by a crowd of enthusiasts who kissed the trace of his sandals, and accompanied him to the gates of the Palais Piccolomini. The Pontiff was borne from the Duomo to his palace—the singer from the Opera to the same princely mansion; the one bore on his reverend head a tiara, the other on her young forehead a crown of laurels. Pius Piccolomini passed spiritual sway over the greater part of Christendom; Marie, a descendant of his noble house, moves multitudes to tears by the eloquence and music of her voice. The fame of her triumph has spread far and wide, and the theatres of Europe contest the honour of receiving her. Thanks, however, to the zeal of Mr. Lumley, it is upon Her Majesty's Theatre that this honour will first of all devolve. In a few weeks La Piccolomini will appear on the boards of that magnificent Opera-house, warbling the "Traviata."

MADAME HOSIO, who was prevented by sudden illness from appearing on the boards of the Lyceum on Tuesday last week in her favourite part of *Adina*, in the "Elisir d'Amore," did appear on Thursday, and repeated the same character on Saturday and Tuesday last. All traces of her indisposition had vanished: she was as captivating, and sang as brilliantly, as ever. On those nights the house was full, and there were displays of rank and fashion worthy of the ROYAL ITALIAN OPERA.

THE PHILHARMONIC SOCIETY'S second concert of the season took place on Monday last, and was, if possible, even more successful than the first. The programme (which was as follows) was made up of gems of the purest water:—

PART I.

| | |
|---|---|
| Sinfonia in G minor | Mozart. |
| Recitative, "Ah! dem Frunde, Madame Viardot and Herr Formes | |
| (Faust) | Spohr. |
| Concerto in E minor (posthumous), Madame Clara Schumann | Mendelssohn. |
| Aria di Bravura, "Mi paventi, Madame Viardot (Britannico) | Gyrauz. |
| Overture (unfinished) | Spohr. |

PART II.

| | |
|---|---|
| Sinfonia Pastorale | Beethoven. |
| Aria "Solche hergelaufne Laffen," Herr Formes (Die Entführung aus dem Serail) | Mozart. |
| Overture (Abencerrages) | Cherubini. |

Conductor—Professor Sir George Thomas Smart.

Every piece, instrumental and vocal, was a *chef-d'œuvre* of a great master. Nothing mediocre was admitted—no crude jejune work of the day was brought forward in deference to the cuckoo cry of "novelty;" and the performance in every instance was worthy of the name. Pray Heaven that it is now quite at home in his new and responsible position. To his well-known skill and judgment he joins self-possession and firmness. From the band he meets with respectful attention, and he wields his "hundred hands" with the utmost facility. The two symphonies, no longer contrasted and rich so exquisite in its peculiar style—the refined and classical "G minor" of Mozart, and the picturesque "Pastorale" of Beethoven—were never, probably, more beautifully played, nor gave greater delight to an audience. Madame Schumann's performance of Mendelssohn's concerto was the very perfection of pianoforte-playing—it was inspired by the genius of the composer himself. She was listened to in breathless silence broken only by enthusiastic bursts of applause. It is gratifying to find that this gifted lady has been received in England in a manner worthy of her deserts. She has been most warmly welcomed in the best musical circles, and engagements pour upon her both in London and the provinces. At one of the great Manchester concerts last week she made a sensation as remarkable as it is in the metropolis. Such a reception in England must be soothing to a feeling mind so sorely tried with domestic sorrow. The *aria di bravura* from Graun's "Britannico," sung by Madame Viardot, in addition to its excellence, is a musical curiosity, discovered by the fair singer herself. Graun, kapellmeister to Frederick the Great, was one of the greatest German composers of the last century. His name to this day is regarded in Germany as Handel's in England, and his "Der Tod Jesu" stands side by side with the "Messiah" Music for the stage is made of more perishable materials, and his numerous oratorios, written for the Royal Theatre of Berlin, have been long since forgotten. This air, from one of these forgotten operas, is an interesting specimen of the German musical stage a hundred years ago. It is not merely a brilliant bravura, but full of energy and passion, and Madame Viardot—the greatest mistress living of the grand Italian school in which she and her sister Malibran were educated—sang it as only herself could sing it. Its impression on the audience was extraordinary—surprise at its quaintness, and admiration of its beauty and its marvellous execution. Formes sang the grand air from the "Entführung aus dem Serail" with his usual power and effect. The room was crowded to the doors, and numbers were content to sit and listen to the music in the ante-room.

THE MUSICAL UNION had a brilliant meeting on Tuesday morning. M. Franchomme, the celebrated French violoncellist, who had appeared there a short time before, came a second time from Paris for the sole purpose of appearing there again. The concerted music was again calculated to display his fine talents, his beautiful tone, delicacy, and expression, for which purpose Haydn's quartet in G minor, No. 28, Beethoven's pianoforte trio in E flat, Op. 70, and the same composer's quintet in C, were most happily chosen. M. Franchomme also played a charming little solo of his own. The other "executants" (as Mr. Ella calls them) were Messrs. Sainton, Cooper, Hill, Doyle, and Hallé. Madame Schumann is again to perform at the next concert, on the 13th of this month.

COSTA'S "ELI" was repeated by the SACRED HARMONIC SOCIETY on Friday last week, to an immense and overflowing audience. The performance differed in some particulars from those which had preceded it. The same place. The principal soprano part was now sung for the first time by Madame Clara Novello, for whom (it is understood) the part was originally intended by the composer, but Madame Novello was prevented from singing it at Birmingham by her quarrel (which we noted at the time) with the Festival Committee. This may account for its being now assigned to her, instead of Madame Rudersdorff, who had sung it, at all the preceding performances, to the entire satisfaction of the public, and (as we have been given to know) of the composer himself. The contralto part (*Samuel*) was sung, for the first time in London, by Madame Viardot, who sustained it at Birmingham. And the same thing was the case with the part of *Eli*, originally sung at Birmingham, and now for the first time in London, by Formes. The tenor part has hitherto been *always* sung by Sims Reeves. He will be a bold man who shall venture to sing it after him

THE rising young pianist, Mr. Harold Thomas, has been elected a Professor and Associate of the Royal Academy of Music.

## THE THEATRES, &c.

PRINCESS'.—The production of Shakspeare's "Winter's Tale," with proper scenic accessories and illustrations, took place as announced on Monday evening, and was most enthusiastically received by a fashionable and distinguished audience—her Majesty being present. The house was excessively crowded, but the utmost attention prevailed. Mr. Kean's taste has produced results which must be highly satisfactory to every judicious mind. The play was well selected for spectacular interpretation, for not only does it overflow with the most exquisite poetry, but as a drama it is full of interest and character touching, various, and picturesque; and was evidently designed by the author himself for the introduction of pageantry. The hints for this are extant on the poet's page. Thus in the pastoral scenes of the fourth act Shakspeare directs the introduction of "twelve Russian habited like satyrs," a suggestion which has not yet been realised in any of the recent productions of the play. Mr. Kean has taken advantage of the circumstances for introducing a Dionysian revel, and has carried it out most admirably, painting the Bacchant enthusiasm and madness to the life, and stimulating the spectator with the inspiration of orgies the classicality of which preserves their "beauty as a joy for ever," and gives even to animal appetite the consecration of genius. Another opportunity has been taken in regard to the *Chorus*, under the name of "Time," with which Shakspeare directs the fourth act to commence, in order to account for the lapse of sixteen years Mr. Kean has chosen the classical figure of *Chronos*, surmounting the ascending globe, and associated with kindred pictorial conceptions, allegorical in their nature, personifying *Luna* and the stars, as sinking before the chariot of Phœbus, which rises in all its glory—the figures being supplied by the antique and the works of Flaxman. Great use is made throughout the performance, of *tableaux vivants*, which serve to inaugurate the sustained scenes, and present the manner of life among the Greeks and in Asia Minor, as we have already stated, adopting the suggestion of Sir Thomas Hanmer. Mr. Kean, instead of Bohemia, has accepted Bithynia as the place intended by the poet and the novelist—a good suggestion on many accounts, and enabling the manager to present the pastoral peculiarities and social condition of that primitive state. Here the costumes are very skilfully chosen, and the introduction of camels, sheep, and goats, add a picturesque beauty to the scenic panorama, much to be commended. Nor are the manners of Sicilia and Syracuse left without copious illustration. Witness the pyrrhic dance, as introduced at the feast solemnized prior to the departure of *Polixenes*, with its accompanying music, all appropriately in keeping. The "Hymn to Apollo" is played during the progress of the banquet; and the authority of Dr. Burney and others is accepted for the style and character of the music in general. We have especially to commend the arrangement of the trial scene, which is made to take place in the theatre of Syracuse before the assembled people, and is accompanied with the solemnities of religion, and consecrated by the presence of an altar and the Ark of the Oracle Instead of breaking up this scene at the termination of the trial, as is commonly done, the set is properly continued to the re-entrance of *Paulina*, and its sacred accessories are called into play for aiding the histrionic business of the situation. This scene is indeed very beautiful, perfect, and complete. Information on the subject of the music is very sparse; but the utmost has been made of it by Mr. J. L. Hatton, to whom the public are indebted for the overture, *entr'actes*, and incidental airs, that add to the grace of the present performance. While mentioning the names of persons whose talents or learning have conduced to the various beauties of this dramatic diorama, we may add that Mr. Kean acknowledges the aid received by him from Geo. Godwin, Esq., F.R.S., who has superintended the architectural portions, and from Geo. Scharf, Esq., Jun., F.S.A., who has contributed many of the most important general details throughout, and in particular his private drawings, taken on the spot, of the vegetation peculiar to Bithynia; thus devoting them to the grateful and genial purpose of illustrating this great Shaksperian revival. We might have said "the greatest," without exaggeration, for not only has Mr. Kean surpassed his former efforts in the accuracy and splendour of the *mise en scène*, but the acting of the drama throughout is worthy of the occasion.

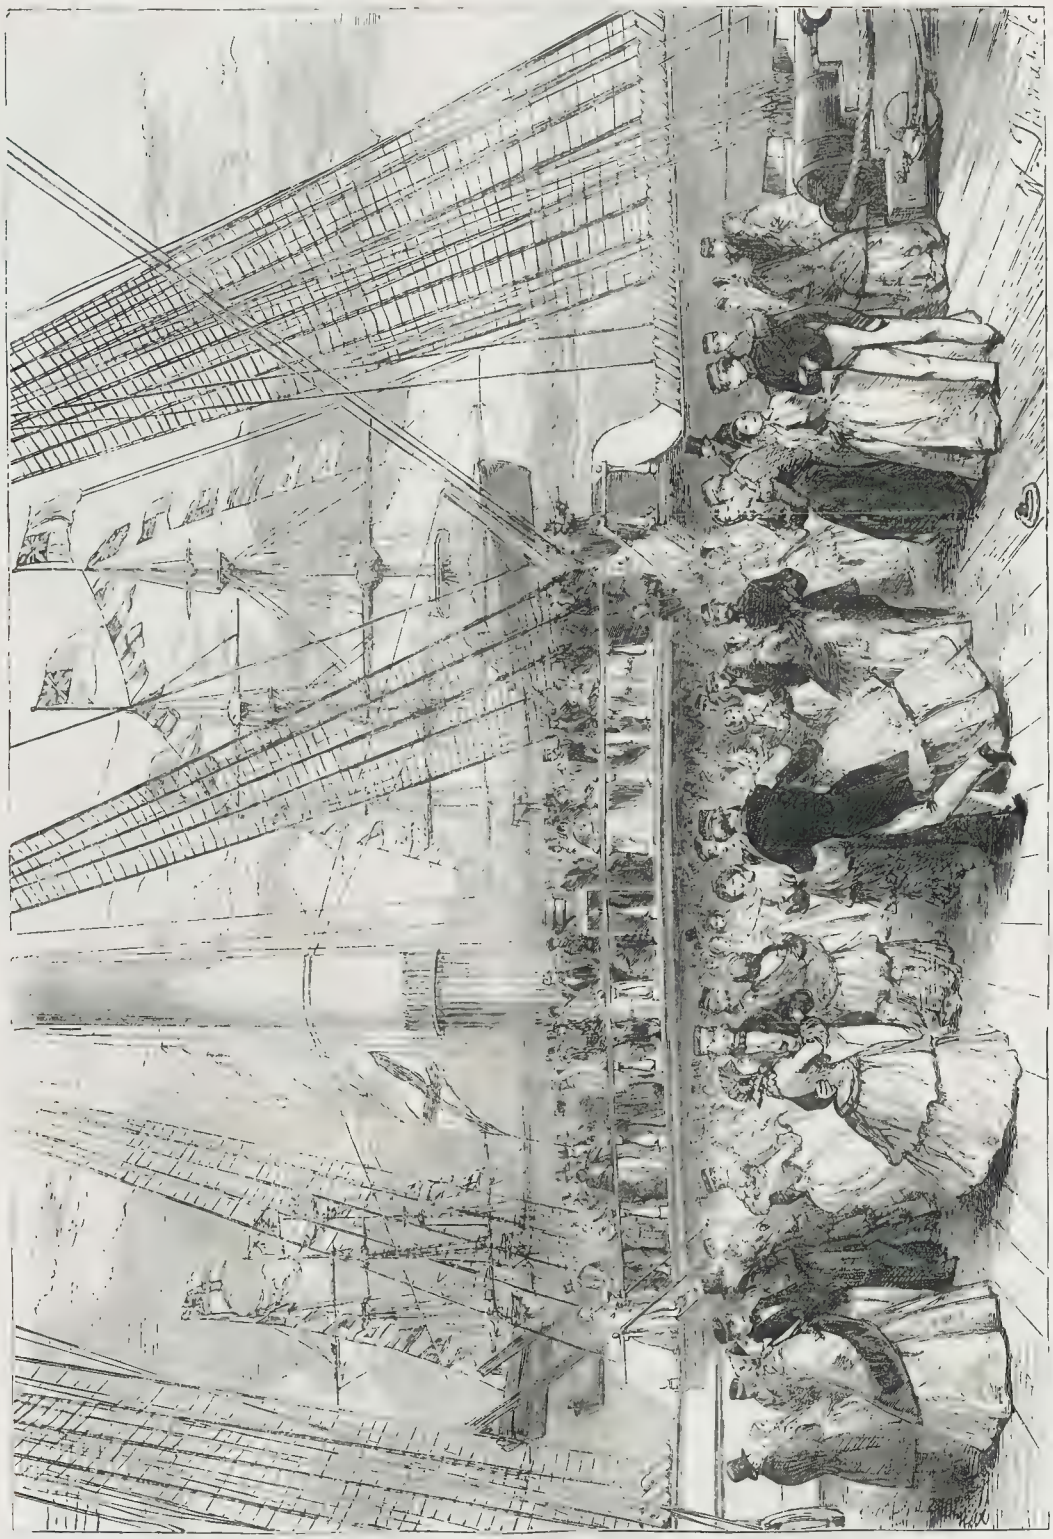
Mr Charles Kean's representation of *Leontes* is one of those minute studies in which, as in his great Shakspearean characters and his *Louis XI.*, he stands unrivalled. Shakspeare has been careful, by altering many of the details in Robert Greene's novel, to lend a dignity to the part which is not to be found in the "Doctatus and Fawnia," and thus to preserve for him a title to our respect, notwithstanding his groundless jealousy. Mr. Kean has been mindful of this, and was rightfully solicitous to display at full the excitement of justice with which the most harsh of his actions was attended. The moral greatness of the King, however, comes out in his repentance, in which we see the truly loving man, who had been so sorely tried for the habitual want of discipline in regulating the passion to which he was liable. We know of nothing finer on the modern stage than Mr. Kean's interpretation of the banquet-scene in the first act. His fondness for his boy *Mamillius*, expressed in tones of the most exquisite pathos, went to the heart of the audience. Perhaps there is no scene superior to this in all the range of the great characters which Mr. Kean has made his own; the hero has to perform a double part—to assume his child, while watching with jealous eagerness his wife's behaviour to *Polixenes*. His sudden exclamation, intended to take in a relief to his own feelings and a rebuke to *Hermione*, "Are you my boy, *Mamillius*?" was startling from its cruel meaning and terrible accent. In the subsequent conversation with *Camillo*, and the concluding soliloquy, Mr. Kean attained a climax of eloquent declamation, and retired amidst prolonged and well merited plaudits.

MRS. KEAN'S *Hermione* was always a great performance. It has lost nothing of its remarkable pathos, and has gained much by the beauties that are now added. The new arrangements of the stage give to her developments of action, and in all these Mrs. Kean manifested a delightful originality, and a truth of feeling that at once penetrates the heart. Her intuitions are ever in fine harmony with the grace and refinement of nature; and her expression of them is set off by an elocution the music of which is inimitable. There are tones in this which entrance and take captive the soul that is at all capable of sensibility. Her wooing of *Polixenes* to prolong his visit was irresistible; her various appeals to her husband were full of sweetness and dignity, and her defence on her trial was as feminine as it was powerful. But we must pass on to her statue scene. The *pose* was wonderful. The stage had vanished; substituted for it was indeed a gallery of the highest art, with its cast images, and that one divine. We might here close our criticism; but it would be doing injustice to Miss Heath not to record that her *Florizel* was the best we ever witnessed; and to Miss Carlotta Leclercq, not to express our unqualified approbation of her *Perdita*. Nor must Mr. Harley's *Autolycus* be forgotten—the same we saw it twenty years ago, yet still fresh, vigorous, and effective. Mr. Ryder, as *Polixenes*, was still himself, and acted with force and majesty. Mr. Meadows, in the *Old Shepherd*, was as usual rich and racy. Nor was Mrs. Terman without special merit in *Paulina*—a part well adapted for her natural powers. This magnificent revival must become extensively popular, and maintain its position on the stage for a long period. The scenery, painted under the direction of Mr Grieve, is throughout in the highest style of pictorial art.

DRURY LANE.—Pictures of American life, in order to be appreciated, require some knowledge of the originals portrayed. This, perhaps, is the reason why the performances of Mr. and Mrs. Florence at this theatre have not yet received all the attention they deserve. Mrs. Florence is, we are told, the first American comic actress who has appeared on the English boards. The character she has assumed is that of the "Yankee Help;" a character so different from the British servant that the representation must be taken on trust. It is, however, in itself, droll enough and amusing enough; but it is difficult as an "object" that it strikes the ordinary observer. To realise it in true and full interest, that oddity must be accepted as an example of national character. The piece in which Mrs. Florence and her husband appear is an American farce, entitled "The Yankee Housekeeper." The former acts a Yankee girl from Maine, by name *Peg Ann Mehitable Higginfixter*, who takes a situation as help, immediately makes herself at home, makes also a lover of her fellow servant, *Barney O'Connor*, performed by Mr. Florence (and which we are instructed to accept as the type of the Irish peasant in Ireland), and, moreover, constitutes herself the confidante of all the intriguants in the house, for a money consideration, which she previously exacts as the condition of her services. In this Mrs. Florence evinces excessive activity, and all the go-ahead qualifications which enter into the general American character, and which are supposed to be combined and intensified in that of the Irish help. She sings also two exceedingly funny songs, which were on Tuesday vehemently encored; and, indeed, the violent humour of the entire assumption excited the house to much hilarity. There is in Mrs. Florence's countenance little if any expression; but the true Yankee style in which she "bobs" about and "sidles" up to the various parties she desires to cajole is altogether so *outré* and extravagant that the humour is irresistible. The two songs introduced are likely to become very popular; and some of the eccentric actions indulged in by Mrs. Florence may, we think, prove as "attractive as "jumping Jim Crow." They are much of the same cast of thing, and we see no reason why they should not be equally successful.

LOLA MONTES.—A great fracas recently occurred at Lola Montes' theatre in Sydney. Madame Montes herself essayed several times to quell the uproar, and, for her own part, she cared not—"she rather liked a row than not;" but she would appeal to their kindness and gallantry to allow the piece to proceed. She hoped the gentlemen of Sydney had sufficient gallantry to yield to the wishes of a lady. These words had not ceased to issue from her mouth (for they would leave. Her appeal was vain, and the disturbance was not suppressed for a considerable time, the actors having increased the uproar by squabbling on the stage.

ERRATA.—The pictures of "The Hayfield," and "Simon and Iphigenia," engraved in our Journal of last week, are from the National Exhibition; and "The Brook," and "The Storm—Fishing-boats running into harbour," are from the Suffolk-street Exhibition; although otherwise designated beneath the Engravings. In the text, their location is correctly described.



THE NAVAL REVIEW—DANCE ON BOARD H.M.S. "CÆSAR," 91, CAPT. ROBB.—FROM A SKETCH BY J. W. CARMICHAEL.(SEE PAGE 481)

THE NAVAL REVIEW: EVOLUTIONS OF THE FLEET.—DRAWN BY E. DUNCH.—(SEE PAGE 487.)

## EXHIBITION OF THE SOCIETY OF PAINTERS IN WATER COLOURS.

Of the three hundred pictures covering the four walls and four screens of the Exhibition opened on Monday last, in that favourite haunt of all who love a few of the Fine Arts which the English people understand so truly—the Old Society of Painters in Water Colours—some thirty may be marked out as pre-eminently distinguished for their artistic excellences, as pictures which would have done honour to any past Exhibition, as drawings which would grace the walls of the most fastidious and well-furnished collector.

As we leave the room, a little fatigued but in no way tired, quit the Catalogue, and trust to memory for recalling what we have seen, some half-dozen pictures rush immediately to one's memory. And first and foremost we recur to "Her Majesty Reviewing the Wounded Coldstream Guards in the Hall of Buckingham Palace," a very clever picture by that masterly designer and colourist, Mr. John Gilbert, properly placed in one of the central positions in the room, full of the best material to attract the attention of the artist, and of the thousands who must feel a pride and interest in so historical an event. Who would not wish to see, still more to possess, a picture representing Queen Elizabeth at Whitehall reviewing the soldiers who returned from the defeat of the invincible Armada; or Queen Anne at St. James's Palace reviewing the wounded soldiers who fought under Marlborough at Blenheim? There is an air of truth in Mr. Gilbert's picture that arrests and retains attention. Some of the likenesses on the Court side of the picture are particularly happy; whilst the wounded soldiers themselves are all most faithful portraits from the heroes of the trenches before the once-thought impregnable Sebastopol. We hope this picture will be engraved, and in a size and style commensurate with its merits.

After Mr. Gilbert we must place the President, Mr. John F. Lewis, who has contributed a work in his well-known and admirable Eastern style—a picture abundantly full of detail and finish, with, perhaps, a little in that way to spare. It is a Frank encampment of a young English nobleman, "one of the modern time," who has naturalised himself—if we may believe Mr. Lewis—as much to Eastern life as Lady Mary Wortley Montagu or Lady Hester Stanhope. Mr. Lewis must be allowed to describe his own picture. He calls it "A Frank Encampment in the Desert of Mount Sinai, 1842, the Convent of St. Catherine in the distance, the picture comprising portraits of an English nobleman and his suite, Mahmoud, the Dragoman, Hassan, Sheikh of Gebel Tor, &c." It is almost impossible to believe that the hand of man could have caught with such exquisite taste and effect so much breadth of effect with such masterly detail of every kind, from a number of the *Quarterly Review* to the inmost feather of a bird. Are we wrong in thinking that the cords of the tent interfere with, and therefore injure, the effect of the whole composition?

As we walk slowly on ask ourselves, "And what of dear old David Cox?" "In his way excellent," we half audibly reply. "There is the power, but not the eyesight or the hand. Like the Minstrel of the Last Lay—

> His hand the last that sprightly ease
> Which marked security to please.

He is blowsy, though true to nature notwithstanding." We are glad, however, to think that the younger Cox is gaining ground. That "Welsh Vale" of his, on your left as you enter (No. 3 or 4 in the Catalogue), has much of old David in the treatment, tone, and touch. The younger David Teniers became a better painter than old David Teniers. May young David Cox rapidly follow Old Cox.

The man be who has improved the most during the past year is Mr. J. M. Richardson. He has been industrious too. How admirably he has caught, we matter-of-fact ones, all the green and sunny delights of Italy! In some half-dozen Italian scenes in this Exhibition he has triumphantly carried water-colour art into the domains of oil.

In "sea-scapes" there is nothing so good in the whole Gallery as Mr. Duncan's "Outer-Grading off the Humble Light Vessel," or his companion on the walls, Mr. Andrews's "Old Dutch East Indiaman." In looking at these fine drawings we no longer miss that very clever artist and old supporter of the Society, Mr. Bentley.

And of the exhibition how good is Hunt—not Henry, or John, or Leigh Hunt—W. Hunt, of Bramley, near Basingstoke, Hants, he who is eternally putting the presents of the fine fruit he has made him, or cutting his or heads of red geranium to rival on cardboard the flowers themselves, or robbing birds' eggs and nests to copy them with such an air of truth if not a warm sun we expect that the shell of one egg at least will chip and begin to chirp! That nigger tambourine-boy, which he entitles "An Itinerant" (it hangs on the fir screen on your right), what a picture that is, and a "Little Bit of Mont Blanc," on one of the screens, Mr. Albert Smith must buy that.

After a successful flirtation in Spain, and a fresh courtship among the mountains of Wales, Mr. Topham has returned once more to his native Ireland. We have seldom seen him bolder, or with a firmer or nicer touch. That "Youth and Age" of his (on the right screen as you enter) is a picture which will delight Mr. Dickens, in whose works Mr. Topham discovers the contrast he describes so truly.

After Mr. Richardson the most splendid stride has been made by the secretary, Mr. Jenkins: that gleaner crossing a stream calling to her little sister "Come along!" is one of the sweetest pictures in the whole collection. Very charming indeed is the expression on the face of the little girl as she stands on a stone in the stream, afraid to "go along." The two drawings entitled "Asleep" and "Awake," by the same artist, still linger with delight on our memories.

The best figure pictures not already mentioned are contributed by Mr. Burton, "Beggars of Ober Frankem," and by Mr. Oakley, in a picture of three lovely girls, entitled the "New Song." In noble distances and fine effects there is nothing better than Mr. W. Smith's "Lake of Geneva," and Mr. Collingwood's "Sunrise on the Jungfrau." In meadows, and green-lane scenes, and mind there is nothing so good as Mr. Davidson's "Haymaking," and Mr. George Fripp's "View near Southend, in Essex." In broad effective touches, conveying more than meets the eye, Mr. Holland in some views in Venice is, indeed, a master. Carl Haag's "Effendi" is, in its way, capital, but built a little too much on a picture of the same kind by Wilkie. In river scenery Mr. Branwhite—witness his "View on the River Teivi" (the Tawy, no doubt, of Dyer and Grongar-hill)—is a master of river effects. In the Wyke-on-Severn of Richard Bine Mr. Dodgson is master of river reputation; and for bloodhounds and hawks and hunting in the days of "Henry and Emma," Mr. F. Taylor is still unrivalled.

We shall have something more to say about this Exhibition with the Engravings we are about to give from it.

## *NATIONAL SPORTS.*

THE monster meeting at Chester stops the way next week, and continues from Tuesday to Friday. On the first day we have the Palatine Stakes, with Theodora Flyaway, Ottenitza, and Byrsa on its list; and the Mostyn Stakes, with Blink Bonny, Lucrezia Borgia, Saunter, and Matilda—the last with 5 lb extra. Handicap Hurdle Race, 8 st. 7 lb; Type, 8 st.; Scythian, 7 st. 12 lb; Mishap, 6 st.; Yellow Jack, 5 st. 8 lb.; Hospitality, 5 st. 3 lb.; and One Act, 4 st. 13 lb., are lightly weighted in the Cup; but, provided a lad can be got to ride One Act the ought to her running with Fair Agnes. Tuesday will have the three top weights safe, though Scythian's chance of repeating his last years' performance is not very remote. Birdin-Hand, Artillery, Omer Pacha, Mary Copp, Danube, Ellington, and Chesthunt, are all in the Des Res Stakes, which is a clear 4,700*l.* that may likely some lucky one's reputation; and for bloodhounds and hawks and hunting in the days of "Henry and Emma," Mr. F. Taylor is still unrivalled.

## NEW BOOKS, &c.

THE NEW NOVELS.

1.
LEONORA. By the Hon. Mrs. MARERLY. 3 vols. Now ready.

2.
BEYMINSTRE. By the Author of "Lena," "King's Copy," &c. 3 vols.

"We have still some good new] writers left, and among them is the Author of 'Beyminstre.' His novel reminds us, in many respects of Thackeray's 'Vanity Fair.' In the Salomon delineations of character, the vantage descriptions of life and the subtle touches of humour, the two books have a family likeness. Many of the incidents are highly comic, and air of nature and life breathes through the whole. It is a work of unusual merit."—Saturday Review

"There are admirable points in this novel and great breadth of humour in the delineation of character. It is a book which deserves the best work it contains."—Examiner.

"The characters are surprising, the plot possesses originality, the dialogue a great deal of spirit and liveliness, and the interest maintained to the end."—Post.

"There is not a dull page in the book."—Globe.

London: SMITH, ELDER, and Co., 65, Cornhill.

Third Thousand, with Frontispiece and Vignette, 5s. 6d., cloth,

THINGS NOT GENERALLY KNOWN FAMILIARLY EXPLAINED. A Book for Old and Young. By JOHN TIMBS, F.S.A., Author of "Curiosities of London." "A remarkably pleasant and instructive little book—a book as full of information as a newspaper is full of news."—Punch.

"A very even and interesting volume."—Spectator.

"A most entertaining as well as instructive volume." John Bull

DAVID BOGUE, Fleet-street.

THE NAVAL REVIEW—THE QUEEN AND ROYAL FAMILY EMBARKING AT ROSEMOUTH—SKETCHED BY T. LANDSEER.—(See page 467.)

## THE RATIFICATION OF THE TREATY OF PEACE.

*(From the London Gazette Extraordinary, of April 28.)*

Foreign-office, April 28.

The Honourable William Stuart Fitzroy, Attaché to her Majesty's Embassy at Paris, arrived this morning at the Foreign-office, being the bearer of the Ratification by her Majesties the Emperor of Austria, the Emperor of the French, the King of Prussia, the Emperor of all the Russias, the King of Sardinia, and the Sultan, of the definitive Treaty for the restoration of Peace, and for the maintenance of the integrity and independence of the Ottoman Empire, which was signed at Paris on the 30th of March last.

## PROCLAMATION OF PEACE AND THANKSGIVING.

*(From a Supplement to the London Gazette Extraordinary of April 28.)*

BY THE QUEEN.—A PROCLAMATION.

VICTORIA R.

Whereas a definitive Treaty of Peace and Friendship between us and our Allies and his Imperial Majesty the Emperor of all the Russias was concluded at Paris, on the 30th day of March last, and the ratifications thereof have now been duly exchanged, in conformity thereunto, we have thought fit hereby to command that the same be published throughout all our dominions; and we do declare to all our loving subjects, our will and pleasure that the said Treaty of Peace and Friendship be observed inviolably, as well by sea as by land, and in all cases whatsoever, strictly charging and commanding all our loving subjects to take notice hereof, and to conform themselves thereunto accordingly.

Given at our Court at Buckingham Palace, this 28th day of April, in the year of our Lord 1856, and in the 19th year of our reign

God Save the Queen.

BY THE QUEEN.—A PROCLAMATION FOR A PUBLIC THANKSGIVING.

VICTORIA R.

Whereas it hath pleased Almighty God, in his great goodness, to put an end to the warfare in which we have been engaged against the Emperor of Russia, and to restore peace to Europe; we, therefore, adoring the Divine goodness, and duly considering that the great and public blessings of peace do call for public and solemn acknowledgments, have thought fit, by and with the advice of our Privy Council, to issue this Proclamation, hereby appointing that a General Thanksgiving to Almighty God for these His mercies be observed throughout that part of the United Kingdom called England and Ireland, on Sunday, the 4th day of May next; and we do earnestly exhort all our loving subjects that they do religiously observe the said public Day of Thanksgiving; and, for the better and more devout solemnisation of the same, we have given directions to the Most Reverend the Archbishops and the Right Reverend the Bishops of England, to compose a form of Prayer and Thanksgiving suitable to this occasion, to be used in all churches and chapels, and other places of public worship, and to take care for the timely dispersing of the same throughout their respective dioceses

Given at our Court at Buckingham Palace, the 28th day of April, in the year of our Lord 1856, and in the 19th year of our reign.

God Save the Queen.

BY THE QUEEN.—A PROCLAMATION FOR A PUBLIC THANKSGIVING IN SCOTLAND.

VICTORIA R.

Whereas it has pleased Almighty God, in his great goodness, to put an end to the warfare in which we have been engaged against the Emperor of Russia, and to restore peace to Europe; we, therefore, adoring the Divine goodness, and duly considering that the great and public blessings of peace do call for public and solemn acknowledgments, have thought fit, by and with the advice of our Privy Council, to issue this Proclamation, hereby appointing that a General Thanksgiving to Almighty God for these His mercies be observed throughout that part of the United Kingdom called Scotland upon Sunday, the 4th day of May next; and we do earnestly exhort all our loving subjects in Scotland that they do reverently and decently observe the said Public Thanksgiving, on the said 4th day of May next. Our will and pleasure is, therefore, and we charge, that this our Proclamation seen, ye pass to the Market Cross of Edinburgh, and all other places needful, and there, in our name and under our authority, make publication thereof, that none pretend ignorance. And our will and pleasure is that our solicitor do cause printed copies of this our Proclamation to be sent to the Sheriffs of the several shires, Stewarts of stewartries, and Bailiffs of regalities, and their Clerks, whom we ordain to see the same publ shed; and we appoint them to send copies thereof to the several Parish Churches within their bounds, that, upon the Lord's Day immediately preceding the day above mentioned, the same may be published and read from the pulpits immediately after Divine service

Given at our Court at Buckingham Palace, the 28th day of April, in the year of our Lord 1856, and in the 19th year of our reign.

God Save the Queen.

## THE TREATY OF PEACE.

We have received an official copy of the Treaty of Peace, which agrees with that published in our paper of the 26th ult. We now, therefore, supply the blank caused by the omission of the following clauses:—

Art. 6. Their Majesties the Queen of the United Kingdom of Great Britain and Ireland, the Emperor of the French, the Emperor of all the Russias, the King of Sardinia, and the Sultan, grant a full and entire amnesty to those of their subjects who may have been compromised by any participation whatsoever in the events of the war in favour of the cause of the enemy. It is expressly understood that such amnesty shall extend to the subjects of each of the belligerent parties who may have continued during the war to be employed in the service of one of the other belligerents.

Art. 6 Prisoners of war shall be immediately given up on either side

Art. 7. Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, his Majesty the Emperor of Austria, his Majesty the Emperor of the French, his Majesty the King of Prussia, his Majesty the Emperor of all the Russias, and his Majesty the King of Sardinia, declare the Sublime Porte admitted to participate in the advantages of the public law and system (concert) of Europe. Their Majesties engage, each on his part, to respect the independence and the territorial integrity of the Ottoman empire; guarantee in common the strict observance of that engagement; and will, in consequence, consider any act tending to its violation as a question of general interest.

Art. 8. If there should arise between the Sublime Porte and one or more of the other signing Powers any misunderstanding which might endanger the maintenance of their relations, the Sublime Porte and each of such Powers, before having recourse to the use of force, shall afford the other contracting parties the opportunity of preventing such an extremity by means of their mediation.

The following additional article has been rendered imperative by the necessity of transport, but was evidently an afterthought, consequent on a suddenly-suggested difficulty.

ADDITIONAL AND TRANSITORY ARTICLE.

The stipulations of the Convention respecting the Straits, signed this day, shall not be applicable to the vessels of war employed by the belligerent Powers for the evacuation by sea of the territories occupied by their armies: but the said stipulations shall resume their entire effect as soon as the evacuation shall be terminated

Done at Paris, the 30th day of the month of March, in the year 1856

[Here follow the signatures of the Plenipotentiaries.]

## CONVENTIONS ANNEXED TO THE TREATY.

THE NAVIGATION OF THE DARDANELLES

I. Convention between her Britannic Majesty, the Emperor of Austria, the Emperor of the French, the King of Prussia, the Emperor of Russia, and the King of Sardinia, on the one part, and the Sultan, on the other part, respecting the Straits of the Dardanelles and of the Bosphorus.

Signed at Paris, March 30, 1856.

[Ratifications exchanged at Paris, April 27, 1856.]

In the Name of Almighty God.

Their Majesties the Queen of the United Kingdom of Great Britain and Ireland, the Emperor of Austria, the Emperor of the French, the King of Prussia, the Emperor of all the Russias, a group parties to the Convention of the 13th day of July, 1841; and his Majesty the King of Sardinia; wishing to record in common their unanimous determination to conform to the ancient rule of the Ottoman Empire, according to which the Straits of the Dardanelles and of the Bosphorus are closed to foreign ship of war, so long as the Porte is at peace;

Their said Majesties, on the one part, and his Majesty the Sultan, on the other, have resolved to renew the convention concluded at London on the 13th day of July, 1841, with the exception of some modifications of detail which do not affect the principle upon which it rests.

For this purpose the said Majesties named for that purpose as their Plenipotentiaries [Here follow the names]. Who, after having exchanged their full powers, found in good and due form, have agreed upon the following Articles:—

Art. 1. His Majesty the Sultan, on the one part, declares that he is firmly resolved to maintain for the future the principle invariably established as the ancient rule of his empire, and in virtue of which it has, at all times, been prohibited for the ships of war of foreign Powers to enter the Straits of the Dardanelles and of the Bosphorus; and that, so long as the Porte is at peace, his Majesty will admit no foreign ship of war into the said Straits.

And their Majesties the Queen of the United Kingdom of Great Britain and Ireland, the Emperor of Austria, the Emperor of the French, the King of Prussia, the Emperor of all the Russias, and the King of Sardinia, on the other part, engage to respect this determination of the Sultan, and to conform themselves to the principle above declared.

Art. 2 The Sultan reserves to himself, as in past times, to deliver firmans of passage for light vessels under flag of war, which shall be employed, as is usual, in the service of the missions of foreign Powers.

Art. 3. The same exception applies to the light vessels under flag of war, which each of the contracting Powers is authorised to station at the mouths of the Danube in order to secure the execution of the regulations relative to the liberty of that river, and the number of which is not to exceed two for each Power.

Art. 4. The present convention, annexed to the general treaty signed at Paris this day, shall be ratified, and the ratifications shall be exchanged in the space of four weeks, or sooner if possible

In witness whereof the respective Plenipotentiaries have signed the same, and have affixed thereto the seal of their arms.

Done at Paris, the 30th day of the month of March, in the year 1856

[Here follow the signatures.]

THE BLACK SEA.

II. Convention between the Emperor of Russia and the Sultan, limiting their Naval Force in the Black Sea.

Signed at Paris, March 30, 1856

[Ratifications exchanged at Paris, April 27, 1856.]

In the name of Almighty God.

His Majesty the Emperor of all the Russias, and his Imperial Majesty the Sultan, taking into consideration the principle of the neutralisation of the Black Sea established by the preliminaries contained in the protocol No. 1, signed at Paris on the 25th of February of the present year, and wishing, in consequence, to regulate by common agreement the number and the force of the light vessels which they have reserved to themselves to maintain in the Black Sea for the service of their coasts, have resolved to sign, with that view, a special convention, and have named for that purpose [here follow the names and titles at full length of Count Orloff and Aali Pacha; who, after having exchanged their full powers, found in good and due form, have agreed upon the following articles:—

Art. 1. The high contracting parties mutually engage not to have in the Black Sea any other vessels of war than those of which the number, the force, and the dimensions are hereinafter stated.

Art. 2. The high contracting parties reserve to themselves each to maintain in that sea six steam-vessels fifty metres in length at the lines of flotation, of a tonnage of eight hundred tons at the maximum, and four light steam or sailing vessels of a tonnage which shall not exceed two hundred tons each.

Art 3. The present convention, annexed to the general treaty signed at Paris this day, shall be ratified, and the ratifications shall be exchanged in the space of four weeks, or sooner if possible

In witness whereof the respective Plenipotentiaries have signed the same and have affixed thereto the seal of their arms.

Done at Paris the 13th day of the month of March, in the year 1856.

(Signed) Orloff, Brunnow, Aali, Mehemmed Djemil.

THE ÅLAND ISLANDS.

III. Convention between her Britannic Majesty, the Emperor of the French, and the Emperor of Russia, respecting the Åland Islands

Signed at Paris, March 30, 1856.

[Ratifications exchanged at Paris, April 27, 1856.]

In the name of Almighty God.

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, his Majesty the Emperor of the French, and his Majesty the Emperor of all the Russias, wishing to extend to the Baltic Sea the harmony so happily re-established between them in the East, and thereby to consolidate the benefits of the general peace, have resolved to conclude a convention, and have named for that purpose [here follow the names and titles of Lord Clarendon, Count Walewski, and Count Orloff] who, after having exchanged their full powers, found in good and due form, have agreed upon the following articles:—

Art. 1. His Majesty the Emperor of all the Russias, in order to respond to the desire which has been expressed to him by their Majesties the Queen of the United Kingdom of Great Britain and Ireland, and the Emperor of the French, declares that the Åland Islands shall not be fortified, and that no military or naval establishment shall be maintained or created there.

Art. 2. The present convention, annexed to the general treaty signed at Paris, this day, shall be ratified, and the ratifications shall be exchanged in the space of four weeks, or sooner if possible. In witness whereof the respective Plenipotentiaries have signed the same, and affixed thereto the seal of their arms.

Done at Paris, March 30, 1856. Clarendon, Cowley, A. Walewski, Bourqueney, Orloff, Brunnow.

NEW MARITIME LAW.

Declaration respecting Maritime Law, signed by the Plenipotentiaries of Great Britain, Austria, France, Prussia, Russia, Sardinia, and Turkey, assembled in Congress at Paris, April 16, 1856. The Plenipotentiaries who signed the Treaty of Paris of the 30th of March, 1856, assembled in Conference—

Considering—

That maritime law, in time of war, has long been the subject of deplorable disputes;

That the uncertainty of the law and of the duties in such a matter, gives rise to differences of opinion between neutrals and belligerents which may occasion serious difficulties, and even conflicts;

That it is consequently advantageous to establish a uniform doctrine on so important a point;

That the Plenipotentiaries assembled in Congress at Paris cannot better respond to the intentions by which their Governments are animated, than by seeking to introduce into international relations fixed principles in this respect,

The above-named Plenipotentiaries, being duly authorised, resolved to concert among themselves as to the means of attaining this object; and, having come to an agreement, have adopted the following solemn declaration:—

1. Privateering is, and remains, abolished.

2 The neutral flag covers enemy's goods, with the exception of contraband of war

3. Neutral goods, with the exception of contraband of war, are not liable to capture under enemy's flag.

4. Blockades, in order to be binding, must be effective, that is to say, maintained by a force sufficient really to prevent access to the coast of the enemy

The Governments of the undersigned Plenipotentiaries engaged to bring the present declaration to the knowledge of the States which have not taken part in the Congress of Paris, and to invite them to accede to it.

Convinced that the maxims which they now proclaim cannot but be received with gratitude by the whole world, the undersigned Plenipotentiaries doubt not that the efforts of their Governments to obtain the general adoption thereof will be crowned with full success.

The present declaration is not and shall not be binding, except between those Powers who have acceded, or shall accede to it.

Done at Paris, the 16th of April, 1856

Buol-Schauenstein, Hübner, Walewski, Bourqueney, Clarendon, Cowley, Manteuffel, Hatzfeldt, Orloff, Brunnow, Cavour, De Villamarina, Aali, Mehemmed Djemil.

RUSSIAN OFFICIAL PECULATION.—During the recent visit of the Emperor Alexander to Abo, in the Grand Duchy of Finland, a young and handsome lady, dressed in deep mourning, approached his Majesty as he was proceeding to a parade of the garrison, and presented him a petition, which he received very graciously. It subsequently transpired that the female was the widow of an officer who, for numerous frauds, had been condemned by court-martial to the degradation, and to serve as a simple soldier, but who, on the day fixed for the degradation, committed suicide by the means of poison, and that the object of her petition was to obtain the pension to which she would have been entitled if her husband had died uncondemned. The man, it appeared, was for a long time intendant of the military hospital at Abo, and he kept especially on the list of sick the names of about eighty patients, who were deceased, drawing of course rations and medicines for them, which he appropriated to himself and disposed of. Now he could not bury them without detection, he kept the bodies in the cellars of the hospital, interring one or two at a time as new patients died, and substituting the latter in their place. He was also concerned in some extensive robberies of furs. The Emperor ordered a small pension for her.—*Galignani's Messenger.*

MARRIAGE OF THE PRINCESS MARY OF CAMBRIDGE.—The Hamburg correspondent of the Brussels *Independance* writes: "The news which we have received from Stockholm leaves no doubt as to the approaching marriage of Prince Oscar, second son of the King, with the Princess Mary of Cambridge. The Prince will leave almost immediately with the Queen Mother for Paris; thence he will proceed to London, to make a somewhat prolonged stay, and complete the arrangements for the projected union. The fortune of the Princess of Cambridge amounting only to about £3000 a year, it is believed at Stockholm that at the next meeting of the four chambers of the Diet the King will ask for an annual grant for his son, in order to enable that Prince to worthily sustain his rank and that of his Court. The project already excites much public attention.

## EPITOME OF NEWS—FOREIGN AND DOMESTIC.

The Queen has signified her intention to bestow the two vacant Garters upon Lord Palmerston and the Earl Fortescue.

It is said that Lord Cowley will be appointed British Minister at St. Petersburg; and that he will be succeeded in the French capital by Earl Stanhope.

The Czar has definitively appointed Prince Gortschakoff, recently Ambassador at Vienna, Minister for Foreign Affairs.

Baron Brunnow, formerly Russian Minister to the British Court, and who, since he succeeded Count Pozzo di Borgo, had held the high post with credit and hospitality, will most likely return to this country as the Russian representative at the Court of St. James's.

The *Moniteur* announces that Count Cavour had an audience of the Emperor on Saturday last.

Her Majesty expressed to Rear-Admiral Sir Richard Dundas, when at the review of the fleet last week, her intention of granting a medal for the late Baltic campaigns.

The Queen of Prussia has proceeded to Dresden on a visit to the two Queens of Saxony, her sisters. The King did not go to Brunswick, as expected, but remains at Potsdam until her Majesty's return, when the Court will come back to Charlottenburg for a short time prior to taking up summer quarters at Sans Souci.

It is said that Turkey will be represented at the approaching coronation of the Emperor Alexander by Rashid Pacha.

Viscount Palmerston will give a grand full dress banquet on her Majesty's birthday; but her Ladyship's Saturday réunions will be discontinued this season in consequence of the sudden and lamented death of her eldest son, Lord Cowper

The Prince Imperial was carried out for air and exercise by his nurse, on the 24th ult., on the terrace of the Tuileries opposite the Seine, followed by one of the sous-gouverantes and two footmen. The Emperor accompanied the Prince as far as the gate of the terrace, and then returned to his apartments.

Prince Napoleon, it is said, is shortly to undertake a tour in the north of England, accompanied by M. Bixio, senator, Dr. Ivan, and M. Barthelemy St. Hilaire.

The French Minister of State attended in official costume at two o'clock on Monday, at the Tuileries, and announced the exchange of the ratifications of peace. He afterwards proceeded to the Legislative Corps, and made the same announcement.

The *Post* says that a marriage is arranged between Mr. St. Aubyn and the Lady Elizabeth Townshend, second daughter of the Marquis Townshend.

Count de Morny, in his mission to Moscow, to represent the French Court at the coronation of Alexander II., and to renew diplomatic relations between the two countries, will display unusual pomp. His suite will be exceedingly numerous, and the sum of a million francs has, it is said, been placed at his disposal to defray the expenses.

Letters from Malta state that the steam-frigate *Tribune*, having on board Lord Dalhousie, left for England on the 20th, in tow of the *Furious*, paddle-wheel frigate.

Preparations are being made in the State apartments on the first floor of the Russian Legation, at Berlin, for the reception of the Russian Empress Mother.

The Prince de Joinville, the Duke d'Aumale, and the rest of the ex-Royal family of France, were the guests of Captain Yelverton and the Marchioness of Bassingham, on board the *Brunswick*, 80, at the review last week.

The Earl and Countess of Clarendon will give a series of dinner and evening parties, in the course of this month, to the members of the diplomatic body and the leaders of the *beau monde*.

M. de Fonton, Russian Ambassador at Hanover, has been nominated Ambassador at Vienna. He is at present at St. Petersburg.

The Countess of Derby will give her first evening party on Saturday next, the 10th of May, at St. James's-square.

The Countess de Montijo, mother of the Empress of the French, and the Duke and Duchess d'Alba, her brother-in-law and sister, are expected at Madrid next week, and, it is thought, will take up their residence for the first season at Carabanchel, a country seat of the Countess.

The Court of Directors of the East India Company have voted an annuity of £5000 to the Marquis of Dalhousie, late Governor-General of India.

Marshal Pelissier paid a visit to General Lüders, who returned it on the 14th ult., when the Marshal entertained him at a *déjeûner*, where the greatest cordiality prevailed.

Lady Canmure, widow of William, late Lord Panmure, who died in 1852, was married on Saturday last to Mr Fewer, one of the Queen's foreign-service messengers. The marriage, which was solemnised at Fulham Church, was quite private.

The Sultan Abdul Medjid has just entered on his thirty-fourth year, having been born on the 23rd April, 1823.

General Vivian, of the Madras army, lately in command of the Anglo-Turkish Contingent, has been nominated by Government a Director of the East India Company, in the room of Mr. Leslie Melville, deceased.

His Highness Prince George of Hesse-Darmstadt, uncle to the reigning Grand Duke, died on the 17th ult., in his 76th year, of dropsy in the chest.

Mr. James Clerk Maxwell, Fellow of Trinity College, Cambridge, has been appointed Professor of Natural Philosophy at the University of Marischal College, Aberdeen.

The library of the late Professor Hermann, of Gottingen, the renowned philologist, has been purchased by the University of Prague. It consists of 11,000 volumes, of which 4000 are pamphlets.

Gavan Duffy was received on board ship on his arrival at Melbourne by seventy-five citizens, chiefly, but not exclusively, his countrymen. An address was presented to him.

Dr. Hassal, who attended M. Hinckeldey to the field, has published a short necrological pamphlet, entitled "The Last Hours of Hinckeldey."

The *Nottingham Journal* states that a purse, containing £1000, the result of a public subscription commenced some time ago, has been presented to Mr. Thomas Cooper, the Chartist poet.

The Melbourne papers state that Governor Macarthur has succeeded in forming a Ministry, and is consolidating the new Government to the satisfaction of the greater part of the colonists.

Mr. Alfred Bunn has taken the Leeds Gardens for three *fêtes*, to be given on a grand scale.

The horse which the late Colonel Yea had in the Crimea is now in possession of Lord Vivian, at Glynn, in Cornwall, and was ridden at the hunt in the neighbourhood last week.

A collection is being made at Berlin for building a synagogue at Jerusalem, for German Jews, and Baron de Manteuffel has given to it thirty gold Fredericks

A promotion of Cardinals is spoken of as likely to take place a few days before the Corpus Domini, the Feste-Dieu in France. The persons designated to pass into the dignity of Cardinal are Monsignore Medici, Mgr. Grassellini, and the nuncio of Paris.

A part of the Russian army of the Caucasus is to operate this summer towards Tschetchensky, and a part of he troops of the Crimea towards Abasan.

The *Corriere Mercantile* of Genoa states that the Sardinian army is to undergo a reduction of 12,000 men

The Austrians are working very hard with their dredging machine at the Sulina mouth of the Danube

The Town-council of Edinburgh have resolved to memorialise Government for a share of the grant of £5000 for celebrating the peace in London by a pyrotechnic display, or for a separate grant for that purpose

The States of the Duchy of Meiningen have declared that Jews can neither be electors, jurymen, public functionaries, advocates, nor *avoues*. The right of being elected is also refused to them.

The subscription of 45,000,000 francs, for cutting through the Isthmus of Suez was completed in three days

A great delegate meeting of colliers has been held at Glasgow. A motion was carried by 18 to 9 delegates, that all the colliers should be called upon to strike till the demand of 6s. a day be conceded

At Loughborough County Court last week, a man apparently nearly sixty years of age, offered to pay a debt of £20 by 2s. a month!

The official returns of the quantity of gold exported from Victoria at the beginning of April, 1855, was 2,674,677 ounces, valued at £10,698,708, of which 2,588,170 ounces were exported to England.

Philadelphia was visited by a terrific hurricane.—Two churches, three factories, and about 150 other buildings were partially demolished. The large boiler-house of the Franklin Ironworks, 160 feet long, was totally destroyed.

## Memorabilia,

LITERARY, ANTIQUARIAN, SCIENTIFIC, AND ARTISTIC.

*A little chink may let in much light.*"—OLD PROVERB.

### RELICS OF NICHOLAS FERRAR.

The above Engraving (from a Sketch by Cuthbert Bede) represents the chief articles of church furniture still remaining in Little Gidding Church, Huntingdonshire. They are—

1. A fine brass eagle, for a lectern—*minus* its claws, which were of silver.

2. A brazen font, on which are engraved crosses and *fleurs-de-lis*, the leg, laver, and cover being all of brass. The cover was originally surmounted by a cross; it now has the shape of a coronet, composed of crosses and *fleurs-de-lis*.

3. A brazen bracket and frame, placed on the left side of the chancel arch; and, doubtless, the frame for an hour-glass.

4. Three brazen tablets, on which are engraved the Creed, the Lord's Prayer, and the Ten Commandments. They are fixed over the cedar communion-table, which is still preserved, together with its Persian carpet and altar-cloth.

These articles were presented to the Church of Little Gidding, by Mrs Ferrar, who thought the bones of God the only place on which such costly furniture was not inappropriate; and, in this, her son not only approved, but animated her devotion. See the "Life of N. Ferrar," by Doctor Jebb, which has been re-published and edited by J. E. B. Mayor, M.A.; together with the Life of N. Ferrar, by his Brother, under the title of "Cambridge in the Seventeenth Century." In the review of this book in the *Gentleman's Magazine* for June, 1855, Mr. Carlyle's misrepresentations of Nicholas Ferrar and his "Arminian Nunnery," are quoted from Mr. Mayor's able preface. (Vide Carlyle's "Cromwell," i., 105.) An abridgment of Dr. Peckard's "Life of N. Ferrar," was published by Masters, in 1852.

Nicholas Ferrar.

### NOTES

THE NAME OF BURNS. The biographers of the Scottish poet seem uncertain as to the origin of the family name. Currie and Lockhart say the father spelt it Burnes or Burness. It appears to have been the former, Burnes, the same as the Montrose branch of the family, of whom Sir Alexander Burnes was a member. Mr. Watson, bookseller, Prince's-street, Edinburgh, in his rich collection of autographs and prints, possesses the only known signature of the poet's father, and there it stands "William Burnes." The poet thus altered the orthography of his name twice—first to Burness, and secondly, to Burns. It was always pronounced as a monosyllable, and this fact had suggested the second alteration.

JAMES HOGG.—The Ettrick Shepherd used to be very indignant at the liberties taken with his name by Lockhart in *Blackwood's Magazine*. The young advocate, in sportive and witty malice, signed Hogg's name to communications which he never saw, and committed him to opinions on men and books the very reverse of those which he entertained. Remonstrance was in vain, but occasionally a paper of warm laudation and extravagant praise allayed the shepherd's ire. Standing one day in Prince's-street, as Mr. and Mrs. Lockhart passed, Hogg pointed them out to an old Ettrick friend, and in his high-toned broad Scotch said, "There's the teeger (tiger) and his prey!"

THE SLEEPING CUPID IN THE TOWNLY COLLECTION.—In the Townly Collection in the British Museum is "A Sleeping Cupid with the Wings Expanded." So it has been described in various catalogues and notices, including those which are of the most recent publication, and nowhere, that I have seen, has this remarkable representation of the God of Love been commented upon or accounted for. May the writer ask a corner in your "Memorabilia" for the suggestion that it may be intended to express that "Love when suffered to sleep prepares for flight?"—S. N. H.

### QUERIES.

THE ISLE OF MAN.—No little interest seems to be now excited in your paper regarding the Isle of Man, and it would appear that, in an Antiquarian point of view, there is much concerning its early history and name that has yet to be learned. Allow me to add another to your inquiries on the subject. By what peculiar tenure was this island held by its King of the Scottish Crown? Burke, in his "Peerage" states that amongst other offices Lord Beaumont was made "King of the Isle of Man for life by the same tenure that its Lords usually held it under the Kings of Scotland." A list of its Kings and the tenure by which it was held, would prove a convenry in its way. Perhaps some of your correspondents who have access to large libraries can furnish such a *desideratum*.—E. G., L

TITLES OF THE OLD FRENCH NOBLESSE.—Can any of your correspondents furnish me with information respecting the rules by which the titles of the old French noblesse were regulated? Is there any French Peerage to be had now? GENEALOGUS

WAS DEFOE THE AUTHOR OF "ROBINSON CRUSOE"?—"Mem. Jul. 10, 1774.—In the year 1759 I was told by the Rev. Mr. Benjamin Holloway, Rector of Middleton Stony, in Oxfordshire, then about seventy years old, and in the early part of his life domestic chaplain to Lord Sunderland, that he had often heard Lord Sunderland say that Lord Oxford, while a prisoner in the Tower of London, wrote the first volume of the 'History of Robinson Crusoe,' merely as an amusement under confinement, and gave it to Daniel Defoe, who frequently visited Lord Oxford in the Tower, and was one of his pamphlet-writers; that Defoe, by Lord Oxford's permission, printed it as his own, and, encouraged by its extraordinary success, added himself the second volume, the inferiority of which is generally acknowledged. Mr. Holloway also told me from Lord Sunderland, that Lord Oxford dictated some parts of the manuscript to Defoe. Mr. Holloway was a grave, conscientious clergyman, not vain of telling anecdotes; very learned, particularly a good Orientalist; author of some theological tracts; bred at Eton School, and a Master of Arts of St. John's College, Cambridge. He lived many years with great respect in Lord Sunderland's family, and was tutor to the late Duke of Marlborough. He died, as I recollect, about the year 1761. He used to say that 'Robinson Crusoe,' at its first publication, and for some time afterwards, was universally received and credited as a genuine history. A fictitious narrative of that sort was then a new thing." A portion of the above, but without giving the authority, formed a communication to the *Gentleman's Magazine* many years since, under the signature of W. W. As I have recently found it in a memorandum-book of Thomas Warton the poet, I have given it without curtailment. RAYMOND DELACOURT.

### ANSWERS TO QUERIES.

THE "PINE-CONES" OF NINEVEH.—I hold a different opinion to that of your correspondent I. B. S or Mr. Layard, as to the Nineveh cone and basket. These two objects symbolise the fertility of the earth; and the winged figure, so frequently represented as standing before the King with the cone and basket in his outstretched hands, appears to me to be a mystically-robed priest invoking on the King's head the blessings of corn and wine. The basket, among the Jews (who were in frequent intercourse with the Assyrians), was like the mudies of the Greeks, the emblem of great abundance—"Blessed be thy *basket* and thy store" (Deut., ch. xxviii). The fir-cone, which surmounted the thyrsus of Bacchus, was indicative of the resinous substances derived from cone-bearing trees, with which the Greeks and the Egyptians (and hence probably the Assyrian) flavoured their wines, and which thus became the symbol of the juice of the vine. From an Egyptian earthen bottle, supposed to have contained wine, I recently removed a substance which appeared to be a deposit, or subsidence, of its former contents; three-one parts of this substance proved to be resinous soluble matter, and twenty-two parts a red colouring matter soluble in water. The analysis was made by Dr. Ayres, and the full details may be found in the *Philosophical Magazine* for November, 1855. If, as I. B. S. supposes, the pine-cone was the conventional mode of representing grapes, the aptness of the symbol becomes still more striking. In the newly-imported slab (engraved in the ILLUSTRATED LONDON NEWS of the 3rd November last) the King and Queen are seated under an arbour, of which the leaves are unmistakably those of the vine, while the fruit resembles the fir-cone. But in no respect does the "sacred tree" resemble the vine. The opinions here advanced are also held by a learned Biblical antiquary at Leamington (whose name I am not at liberty to give), and I could recapitulate many arguments of his in support of them, did your space not forbid further remarks.—B. N.

THE MONA OF THE ANCIENTS.—Your correspondent "Fordington" is wrong when he states that the Mona of Cæsar and that of Tacitus are one and the same place. In "Notes on the Life of Agricola," sec. 14, (5), Murphy's "Tacitus," is the following:—"It may be necessary to observe that the Mona of Cæsar and Tacitus ought not to be confounded. That of Cæsar is the Isle of Man (b. v., s. 13). Pliny calls it Monapia (b. iv., s. 16). Tacitus always means the Isle of Anglesey." See also Dr. Butler's "Ancient and Modern Geography" (chap. iv., p. 144):—"Mona Taciti, or the Mona described by Tacitus, in his "Life of Agricola," is the Isle of Anglesey; and Mona Cæsaris, the Isle of Man." I am not able to ascertain the meaning of the word Mona, or whether Cæsar's Mona had any connection with mon, a hill, *modern* Spanish for monkey; but it may not be uninteresting to add that MÔW is the Welsh for the Isle of Anglesey—perhaps from the *Mona* of Tacitus; and that Caesarsvon (Cæsar-yn-ar-Fon) means "the city in the land over against MÔW."—CONWAY LOCHERN

IN RE JACK O' BOTH SIDES. The world of readers care very little whether A doubts the opinions of B, but if A will push his doubts into print, he ought to be compelled to support them by at least the shadow of argument—which "Vigorn" does not do. There is no doubt, from the fact of "Jack o' Both Sides" being named among several other similar figures, that it was an effigy or character used on some occasion of public processioning. Although the year 1653 was not an encouraging period for such popular manifestations, we all know that the force of old custom is far superior to that of new laws, and that the habits of the common people are not to be suddenly annihilated by Acts of Parliament. During the same period to which I am alluding it was a penal offence even to witness plays, as well as to act them; yet to evade the law, under pretence of a musical entertainment, a play and the usual afterpiece were frequently represented by way of divertissement, although they were the sole attraction. No doubt that pageants and processioning were also carried on notwithstanding much discouragement from the party of whom Macaulay writes with great *unkindness* that they objected to bear-baiting, not because it gave pain to the bear, but because it gave pleasure to the people.—J. NOAKE.

COLD HARBOUR.—Toone, in his Glossary, quotes as follows from an old play called "A Trick to Catch the Old One":—

Life! they may do anything
There, man, and fear neither beadle nor
Sanmour; an uncle's house, a very
*Cool harbour*.

Such a privileged place he mentions as having stood in Alhallows the Less, London—a kind of sanctuary, where also marriages were celebrated, as in the Fleet Prison, without authority and regardless of the legal forms. May not the Lincolnshire villages have had such "cool harbours" for driven cattle"—a cold lodging-place for outlawed felons, whether in life or death? The following rhyme was common some years ago in the Staffordshire coal districts:—

Some say the Devil's dead
And buried in Cold Hasbour;
Some say he's *not* again
And 'prenticed to the Barber.—LLEW

SMITHFIELD MARKET.—The following dialogue between a citizen and a north countryman, which is extracted from a rare pamphlet published in 1615, called "The Cold Yeare, 1614," indicates precisely the time when the market for general commodities, previously held in Cheapside, was transferred to Smithfield. The north countryman begs to have news to carry back with him:—

*Cit.* The best and most noble that I have at this time to bestow upon you is to request you to step into Smithfield, where you will see by the careful providence, care, and industrie of our Honorable Senators (the Fathers of our Citie) much money buried under that Gurtie Fielde, by the hyring of hundreds of Labourers to reduce it (as it is reported) to the fairest and most famous markets-place that is in the whole kingdome.

*Nor* A market-place! Now trust mee, it standes fit for so noble a purpose, and will be a memorable monument to after ages, of the royaltie, diligence, wisedome and bravery of this. But where shall your *Cheapside* Market be then kept, this must hinder that, or that this.

*Cit. Cheapside* shall by this means have her streetes freed from that trouble, by sending it hither, if (as it is reported) it prove a market-place, it will adde that beautie to that populous place which in time past it hath, by horses, and paniers, and butter-wives, been taken from it. Nay, the very street itselfe, by this meanes, will shew like a large new *Exchange* or *Basilia*. Such a commerce of gentlemen and citizens will be seen there dayly by walking upon it."

MR. MACAULAY AND WILLIAM PENN.—(To the Editor of the ILLUSTRATED LONDON NEWS.)—Sir, In answer to a correspondent in your "Memorabilia," April 7, I beg to say that I see no occasion for wasting your columns or wasting my own time by undertaking any vindication of Macaulay's estimate of the character of Penn. The historian has pronounced his opinion, and laid his authorities before the public. To those readers who will not examine them, comment would be useless.—B. RUDDELL, F.S.A., Temple

### TO CORRESPONDENTS.

J. W., Aberdeen.—The work so politely forwarded reached us safely, and shall be shortly returned

AN OCCASIONAL CONTRIBUTOR. *Janitor* and *Caterer*? Both these offices are surely of self-evident meaning

PAUL DE KOCK. Meaning of the word *Vaudeville*?—This word in France is applied to a young soldier. It means, literally, lead-cavity and its playful application to French soldiers is not unlike our similar use of the word "lobster." It has no military meaning.

WELLER. Why are inscriptions on Tombstones in Lincolnshire so often turned towards the West?—There is no invariable custom on this subject. Ancient superstition has occasioned a preference for the East, which is still generally observed. But the fact of the sun, which brings the inscription into sight is often the guide to the facing of the inscription.

CANTUARIENSIS, LL.D., M. E. J. A.; SUSSICUSIS; H. G. A. B. J. F. JOHNSON; M. J. W. A., B.M., and others.—Origin of the saying "*By Hook or by Crook*?"—We are well aware of the legend which ascribes this saying to Scrogg-ins, the landless pageant of land on Wexford coast called respectively "Hook and Crook;" but believe it to be nothing more than a fanciful derivation.

COCKELUS NEROS.—"Who was the father who died of joy because his three sons gained prizes the same day at the Olympic Games?"—There appears to be some mistake on this subject. Lempriere says (on Diagoras) that Diagoras, himself a celebrated athlete, of Rhodes, died of joy because his three sons had gained prizes at one Olympiad, and he refers to Cicero, "Tusc." i., 46, for his authority. But on consulting the passage in Cicero, it is evident that there were only two victorious sons, and that Diagoras did not deem it necessary to die on the occasion. After saying that some may think it is time to quit this world when the highest of its honours have been attained, Cicero goes on to observe—"This seems to be what the Spartan implied, who, congratulating his bloodless pageant himself an Olympic victor, on his having seen *him no* victorious in one day, said, 'Die, Diagoras, you have no further glory to earn.'" It by no means follows that the old gentleman acted on the advice, and, indeed, it is certain he did not. As to the three victors, they were not on one day, but from one season. "Eodem die," being the two sons and the father himself. Lempriere has confounded a Spartan compliment with a biographical fact.

E. A. S., Bath, will perhaps be good enough to inform us whether the source whence he derived the passage relative to Henry VIII. a household, published in our last number, gave any further extracts from the old MS. mentioned, or throws any light upon its authorship.

B. CANDLEWELL.—Can you favour us with a more precise address, or obtain us a loan of the curious old musical MS. mentioned

ERRATUM.—Omitted, J. Watson, M. Percy, F.R.S., H. W., M.P., Finis, R. W. H., M. A., Kathleen, M. M. B., A Wexford Subscriber, Oxonienais, E. S., A Cardigan Subscriber, A Younger Son, W Salis, W. C., Bristol, D. D., S. H. Oxford, W. C. F., B. B., S. N. Temple, Nautical, Rock-ferry, Balaclava, J. F., Harward, Carlous William, F. D. T., Frances Jamieson, L., Bromley, Kent, John Joseph B., Raymond Delacourt, T., Dumfries, J. A. Shaw, Cramale.

## CHESS.

*Our usual Notices to Correspondents are postponed until next week.*

### PROBLEM NO. 637.

By Mr H. Tatton.

BLACK.

WHITE.

White to play, and mate in four moves.

### CHESS IN THE UNITED STATES.

A fine, hard-fought battle between Messrs. F. PERRIN and LOCKE, two of the sturdiest chess athletes in the States.

(*Queen's Gambit declined.*)

(*a*) By this capture, White affords an inlet for his adversary's pieces, and becomes subjected to an attack which, naturally as he retains, proves his master in the end.

(*b*) Having in view the advance of his King's Pawn.

(*c*) A clever retort.

(*d*) Had he taken the Rook, Black would obviously have forced him in three moves.

(*e*) Correctly played. The other Rook is safe as a guarde-du-corps by an army.

(*f*) His only resource, and that but an ineffectual one.

### CHESS IN NEW YORK.

Now that a trip to the United States, a fortnight's sojourn, and the run home again, may be accomplished with less inconvenience, and in about the same time, that our forefathers occupied in a journey to some parts of Scotland, the following list of a few places in NEW YORK, where Chess-players most do congregate, may be useful as well as interesting to amateurs on this side the Atlantic. It is slightly abbreviated from the American Illustrated Newspaper:—

"NEW YORK CHESS-CLUB.—This club meets at No. 158, Tenth-street, near Fourth Avenue, at the house of the secretary, F. Perrin, Esq., on Tuesday, Thursday, and Friday evenings. We mention the club, first and foremost, because it is the only place in New York devoted to strict Chess—*et pretereea nihil*—and for the reason that the names of the very best players in the city are enrolled on the books. They number some forty members, of different degrees of force, and there is no other club or place of meeting that offers such inducements and attractions to pure lovers of the game. On the evenings mentioned six or eight tables are generally in full play, and everything is conducted in the most quiet and orderly manner, the only thing—other than the game—permitted, being an indulgence to the lovers of the weed to puff a fragrant Habana. The distinguished players from abroad often call, and these are always welcome visitants. No formality is requisite to membership, a personal application to the secretary, at the club or at the National Bank, and the annual payment of five dollars being all that is necessary. To be a good Chess-player is *grand fuse* evidence of a gentleman, and the club have never yet had occasion to regret their broad and general rule in regard to admission. The utmost harmony and good feeling prevail among the members, and no better or pleasanter place to spend an evening can be found in the city. Whoever chooses to call will generally find the said broad and good-humoured face of our venerable friend, Mr. Secretary Perrin, who will greet him with a smiling welcome, and who has the singularly happy faculty of making a stranger feel perfectly at home in just about sixty seconds. There is no annual tournament for a prize, embracing all members who choose to pay the entrance-fee, the difference in skill being adjusted by odds which are equably regulated by a competent committee. There are two tourneys now in progress, and a third will be commenced after the holidays. This last is made up of eight of the best players, who play without odds, and who are to contend for a silver cup, and the ultimate pleasure of the club.

"ORIENTAL CLUB.—This club meets at the Turkish Kahve, 625, Broadway, on Wednesday and Friday evenings. They have no regular organisation, and can hardly be ranked as first-class players, though some of them are very fair. Mr. Osmanyan, well known to the community by his able and highly-interesting lectures on Turkey, is the proprietor of the Kahvé, and dispenses Turkish luxuries in the shape of pipe, tobacco, sherbet, coffee, &c., in a style that makes one fancy he is in Constantinople. He is a ripe scholar, a perfect polyglott, and a cultivated gentleman, capable and willing to impart more information about Turkey and her institutions in one evening than could be gleaned from a score of books of travel. First-rate Chess-players drop in here almost every evening (members of the N. Y. Club and others), and the proprietor himself is quite an adept at the game.

"BROOKLYN CHESS-CLUB.—This young club meets on Monday, Wednesday, and Saturday evenings, at Toynbee's Hotel, corner of Court and Montague-streets, near the City Hall. Thomas Frere is the secretary, and he cordially invites all lovers of the game to join the club. The quarterly subscription is 1 dollar 50 cents. They number fifteen regular players, and are about to have a tournament. Mr. Hamilton, the vice-president, is a member of the New York Club, a good player, and "booked up" in all openings, &c., as well as any man of our acquaintance.

"LARKLEN'S CIGAR DIVAN.—This is a very pleasant place where good tables and mate are kept, and where a quiet game can be enjoyed, with the concomitants of excellent cigars and liqueurs. Not being an *habitué* of the establishment we cannot speak by the card of the force of the players who frequent it. The Club, is good player, and "booked up" in all openings, &c., as well as any man of our acquaintance.

"LARKLEN'S CIGAR DIVAN.—This is a very pleasant place where good tables and mate are kept, and where a quiet game can be enjoyed, with the concomitants of excellent cigars and liqueurs. Not being an *habitué* of the establishment we cannot speak by the card of the force of the players who frequent it. The Club, is good player, and "booked up" in all openings, &c., as well as any man of our acquaintance.

"LIMBURGER AND WALTER'S SALOON.—Here is a place worthy of particular mention. Some of the best (and poorest) players in town meet here daily. Drop in any afternoon after one o'clock and we will guarantee that as fine games will be in progress as are played in the city. Two boards are also in use in the evenings, but the superior players congregate in the afternoon."

MANCHESTER CHESS-CLUB.—A tournament is now in progress at the Manchester Chess-club, in which the prize will be the ivory set of chessmen recently won from the Liverpool Club. Tournaments are of two kinds; first, those in which no odds are given, and in which it is intended the strongest player shall win; and, secondly, handicap tournaments (like the present), in which odds are given, in order that players of every grade shall have an equal chance, but an advantage still remains with the strongest, as Chess-players, like the rest of the world, are not inclined to underrate their own abilities. Thirty-two players are engaged in the present tournament, and it was opened by putting their names into a bag, and then drawing two names at a time. The sixteen couples being thus matched, the players agreed to give or take odds according to their estimate of their own and their opponents' skill, and the match commenced under the following regulations:—The sixteen players who, in the first round, win three games first of their respective opponents, put the latter *hors de combat*, and, as winners, are again balloted for opponents, as in the first instance; and so on, until the fifth round, when there being only two players left, the winner carries off the prize. The following is the result of the first draw:—

## GENERAL MOURAVIEFF.

WE have noticed in our columns many—we may say nearly all—the celebrated men whose names have been brought prominently forward by the late war; but our gallery of historical portraits would not be complete without a sketch of General Mouravieff. The task, in this instance, is a pleasant one. Mouravieff is one of those heroes of the old school who may be placed by the side of Bayard, "*sans peur et sans reproche*"—the deadly foe and the perfect gentleman. In battle we meet him—as the poet has it—

> With that stern joy which warriors feel
> At foemen worthy of their steel.

And, victor or vanquished, the man ever commands our respect. The name of Mouravieff is henceforth inseparably linked with that of Williams and with the fall of Kars. Whilst we are writing, Parliament is actually discussing the events in which Mouravieff, on one side, and Williams, on the other, were the principal actors. The gallant defence of Kars, and its final surrender to General Mouravieff are facts already well known to our readers. General Mouravieff was selected by the late Emperor of Russia to command the troops in Asia as well on account of his noted bravery and good generalship as from his experience on the theatre of war in that country. Mouravieff served under Paskiewitsch in the campaigns of 1828 and 1829; and the ground he had to go over again was quite familiar to him. The opposition he had to meet with was, however, of a different nature.

Paskiewitsch's campaigns were rapid and successful. Kars surrendered to him in a day, and the victorious Russian army planted its standards in rapid succession on the towers of Erzeroum, and even on those of the second capital of the Ottoman Empire. The war terminated with the treaty of Adrianople. In 1853 the energy and "pluck" of a handful of Englishmen kept the Russians at bay for months; and it was not till reduced by famine that the brave garrison surrendered. The capitulation of Kars to General Mouravieff is the plank upon which sinking Russia clung and saved her reputation.

We have before us all Mouravieff's despatches to his Government. We find him in June, 1855, actively employed cutting off all the supplies meant for Kars, and watching that fortress with the utmost vigilance. "From the position we occupy," he says, writing on the 29th of June, 1855, "the fortifications of Kars and the enemy's army shut up there are visible. The Turks continue to strengthen their works of defence, and are throwing up new ones on different points." In July heavy rains set in; but with unswerving perseverance we still found Mouravieff blockading Kars. This state of affairs continued till September. General Mouravieff then resolved to make a desperate attempt to carry Kars by storm. Having been informed that reinforcements were on their way from Erzeroum with a view to relieve the garrison, General Mouravieff convoked a council of war on the 27th of September. It was unanimously resolved that the heights which command Kars should be attacked on the 29th of September. The magnificent defence on that memorable day is one of the noblest records of war of which history can boast. Decimated by famine and disease, the garrison victoriously repulsed the attack. General Mouravieff, in his despatch, states his loss at 6517 men. The gallant garrison, still hoping for relief, held out. Gen. Mouravieff kept watch upon the devoted city more vigilantly than ever. At last human suffering could endure no longer, and, with a heavy heart, Williams came to terms of capitulation. And it is from this dark background of heroic suffering, and bodily and mental anguish, that the character of General Mouravieff stands forth in bright relief. On the 25th November General Williams and his aide-de-camp rode over to the Russian Camp, and the terms of capitulation were settled honourably to all. On the 28th November the fortress of Kars surrendered to Aide-de-Camp General Mouravieff, Commander-in-Chief of the detached corps in the Caucasus. The Mushir Vassif Pachas, eight other Pachas, a number of superior and subaltern officers, the whole garrison and 130 cannon, and General Williams and his staff fell into his hands. General Mouravieff ordered a repast to be given to the famished garrison; and, when the English officers were about to give up their swords, the brave old Russian, with chivalrous courtesy, bade them keep them, observing that they well became men of such heroic bravery, such gallant officers and gentlemen. In his report to the Emperor, Gen. Mouravieff compliments the garrison on its defence.

GENERAL MOURAVIEFF, THE CAPTOR OF KARS.—(FROM A PHOTOGRAPH BY WEINGARTNER, OF MOSCOW.)

The besieged (he says) still founded their hopes on the arrival of aid from Erzeroum. In fact, Vely Pacha, coming from Trebizond, had attempted to advance on Kars, but at each attempt he was met by General Soulou's detachment, which threatened his rear. Our patrols skirmished with these troops, keeping them in a state of alarm as far as the vicinity of Erzeroum. Meantime the provisions at Kars were diminishing; the cold weather was coming on; snow had fallen on the Saganlong; cases of death, of weakness from want of nourishment occurred in the garrison; desertion increased, and despondency became general. All these circumstances decided General Williams, who directed the defence of Kars to surrender the fortress.

It is a noble trait of Mouravieff, thus, whilst announcing his own success, to shield the reputation of his opponent. The important service rendered to Russia by General Mouravieff, which has enabled Russia to conclude a treaty of peace with some appearance of equality, has not been overlooked by the Czar, and the highest military distinctions have been conferred upon him. A glance at the third and fourth articles of the Treaty of Peace of Paris, testifies to the importance of Kars. Russia restores Kars to Turkey, and in exchange receives back Sebastopol, Balaclava, Kamiesch, Eupatoria, Kertch, Yenikale, and Kinburn.

General Mouravieff is the scion of an ancient Russian family, distinguished in literature and science, as well as in arms. The accompanying portrait is from a photograph taken shortly before the General entered upon the campaign of Asia Minor.

## PRINCE ALBERT AT COLCHESTER.

THE visit of his Royal Highness to Colchester for the purpose of inspecting the troops stationed in the Encampment there took place on the 21st ult. The streets were lined with well-dressed people, and all business was suspended. Banners and flags were also profusely displayed in all directions. His Royal Highness, who was accompanied by General Grey, Colonel Phipps, General Wetherall, and Lord Alfred Paget, was received at the station by a guard of honour furnished from the 11th Regiment, and a detachment of the West Essex Yeomanry. At the Townhall the Prince was met by the Mayor, Mr. C. G. Round (Recorder), Mr. Turner (Town Clerk), and other gentlemen. His Royal Highness having been conducted to the large room of the building, and address from the Town Council was read by the Recorder, in the presence of a numerous company, comprising the *élite* of the town and the district, to which his Royal Highness returned an appropriate reply.

The Prince, on leaving the Townhall, proceeded to the Camp, and was conducted over it by the Barrack-master, Sir William O'Malley, and other officers. The Camp covers a great extent of ground, and contains a church, three schoolrooms, quarters, and mess establishments for the various officers, and about 130 huts for the rank and file, together with two powder-magazines, 20 hospital huts, stables, lavatories, cooking-houses, &c. Four roads, three of them 30 feet in width, intersect the lines of buildings, and the general appearance of the Camp is airy and cheerful. The regiments of the Line lying in the Camp are the 11th and 88th, and the following Militia regiments:—The Essex Rifles, the West Suffolk, the West Essex, and the East Norfolk. The commanding officer of the whole force is Major-General Garcoigne.

Having concluded his examination of the Camp, the Prince proceeded to the business of the day—the review of the troops who were drawn up in line in Wivenhoe Park. Major-General Garcoigne occupied the centre

VISIT OF PRINCE ALBERT TO COLCHESTER.—ARRIVAL OF HIS ROYAL HIGHNESS AND STAFF AT WAVENDON PARK.

STATE BANQUET GIVEN BY THE EMPEROR OF THE FRENCH TO THE PEACE PLENIPOTENTIARIES, AT THE SALLE DES MARECHAUX, TUILERIES.—(SEE NEXT PAGE.)

of the ground, and was surrounded by his staff—Earl Jermyn, Colonel Admir, Lieut.-Colonel Herbert, Captain Hamilton, and Captain Bulwer. The regiments on the ground were commanded by the following officers: 88th, Colonel Maxwell; West Suffolk Militia, Colonel Deare; West Essex Militia, Lieutenant-Colonel Brice; East Norfolk Militia, Major Sir E. Leacon, M.P.; Essex Rifles, Major Wallace. The fineness of the weather and the presence of the distinguished visitor attracted a great number of spectators. The troops, having marched past in slow and quick time, went through a series of evolutions; at the close of which the Prince briefly expressed his satisfaction to Major-General Cascoigne.

The Prince then turned homewards. Riding slowly along the dusty road, amid the enthusiastic acclamations of the swarming mass of pedestrians. His Royal Highness reaching the railway station about three o'clock and a special train shortly afterwards conveyed him to town.

## THE BANQUET TO THE PLENIPOTENTIARIES AT THE TUILERIES.

By way of celebrating the close of the Paris Conferences, a grand banquet was given by the Emperor on the 12th ult., at the Tuileries, to the members of the Congress. All the members had been invited, as well as the foreign Ministers, the Cardinals, the Ministers of the Emperor, the Marshals, the presidents of the great bodies of the State, the grand officers of the Crown, the French Ambassador at London, the Governor of the Invalides, the Grand Chancellor of the Legion of Honour, the Grand Referendary of the Senate, a number of senators, deputies, high functionaries of State, and the principal civil and military officers of the household of the Emperor. His Majesty took his seat in the middle of the table, which was laid in the form of a horse-shoe, and had on his right Lord Clarendon, and on his left Count de Buol. Prince Napoleon sat opposite the Emperor, having Count Grieffen his right, and Aali Pacha on his left. Towards the end of the dinner, the Emperor, in a firm and emphatic voice, said:—"I give a toast to the union so happily re-established among the Sovereigns. May it be durable, and it will be so if it is always founded on right, on justice, and on the true and legitimate interests of the peoples!" These words were hailed by unanimous cries of "Vive l'Empereur!" After the banquet the Emperor went into the *salon* preceding the Salle du Trône, and the meeting was kept up until ten o'clock. During dinner, the band of the Guides and the Opera-singers of the Conservatoire were present and gave instrumental and vocal *morceaux* alternately.

## ANOTHER SEA-SERPENT.

(*To the Editor of the* ILLUSTRATED LONDON NEWS.)

*Imogen*, Channel, 15th April, 1856.

SIR,—We beg to hand you the inclosed sketch of a Sea-Serpent we had the good fortune to sight on the 30th March last.

*Imogen*, from Algoa Bay, towards London. Sunday 30th March, 1856. Lat. 29 deg 11 min. N.; Long., 34 deg. 26 min. W.; bar. 30·50; calm and clear. Four vessels visible to southward and westward.

SEA-SERPENT, AS SEEN THROUGH A TELESCOPE.

About five minutes past eleven, a.m., the helmsman drew our attention to something moving through the water, and causing a strong ripple about 400 yards distant from our starboard quarter.

In a few moments it became more distinct, presenting the appearance represented in Fig. 1, and showing an apparent length of about forty feet (above the surface of the sea), the undulations of the water extending on each side to a considerable distance in its wake. Mr Statham immediately ascended to the mizentopsail-yard, Capt. Guy and Mr. Harries watching the animal from the deck with the telescope. After passing the ship about half-a-mile, the serpent "rounded to" and raised its head, seemingly to look at us (Fig. 2), and then steered away to the northward

N.E.), possibly to the neighbourhood of the Western Islands, frequently lifting its head (Fig 3). We traced its course until nearly on the horizon, from the topsail-yard, and lost sight of it from deck about 11h. 45m. a.m. No doubt remained on our minds as to its being an immense snake, as the undulations of its body were clearly perceptible, although we were unable to distinguish its eyes.

The weather being fine and the glassy surface of the sea only occasionally disturbed by slight flaws (catspaws) of wind we had a perfect opportunity of noticing its movements.

In conformity to your regulations we inclose our references, and remain,

Sir, your obedient servants,

JAMES GUY, Commander,
J. H. STATHAM, JULIAN B. HARRIES, D. J. WILLIAMSON, Passengers.

The Ultramontane *Volks Zeitung* was confiscated last week for abusing the Austrian bureaucracy, and accusing it of lukewarmness in religious matters.

The colliers employed under the Ince Hall Coal and Cannel Company, at the upper, middle, and lower Pemberton collpits, have struck work, in consequence of a proposed reduction in their wages.

The *Nord* of Brussels was seized at the Post-office the other day for having published an extract of the protocol of the sitting of the Paris Congress on the 8th ult., which contained a full report of the speech of Count Walewski on Italy, Greece, and Belgium.

According to the *Militar Zeitung*, all the Austrian companies, with the exception of those in Italy, are to be reduced to sixty men, which is half the usual strength of a company when on a peace footing.

## MR. C. ROACH SMITH'S MUSEUM OF LONDON ANTIQUITIES.

EVERYBODY who takes any interest in the history and antiquities of our country will rejoice to know that it has been at length arranged that this interesting collection of antiquities shall be transferred to the British Museum. The question as to its future destination has been for the last few months a matter of so much interest, and has been so frequently alluded to in the columns of the public press, that we think our readers have a right to expect some further account of it.

We need hardly state that Mr. Charles Roach Smith is well known not only in England, but on the Continent, as one of the ablest archæologists of the present day. He is a native of the Isle of Wight, but upwards of twenty years ago he established himself in Lothbury (in the city of London), as a chemist, and was, we believe, making there a very profitable business. He settled in Lothbury just at the moment when the excavations for sewerage and improvement in the City were at their height, and he was soon struck with the quantity of Roman remains which were daily turning up, and with the indiscriminate destruction to which they were doomed. His attention was more particularly called to this subject when he witnessed the breaking up of tesselated pavements, and when he extracted from a cartload of rubbish some fine specimens of Roman mural fresco paintings. Regret for this lamentable destruction made Mr. Smith a collector and an antiquary. The first paper which he contributed to the Society of Antiquaries procured him the notice of the Bishop of Bath and Wells, Mr. Gaze Rokewode, Mr. Hudson Gurney, and others of the leading antiquaries of that time, at whose recommendation he was elected a Fellow of the Society. Nevertheless, the course of Mr. Smith's labours were not always smooth; and he seems to have given great offence to the City authorities by the zeal with which he laboured to save the relics of former days from destruction, and to explain to the civic body that they ought not to be destroyed. Obstacles of all kinds were thrown in his way; and we have been assured that in more than one instance where a beautiful vessel of Roman Samian ware was turned up under the eyes of a person in authority over the works, he caused it to be broken to pieces, in order that Mr. Smith might not get it. But, in the earlier period of his researches Mr. Smith was made to feel his unpopularity with the civic body in a manner more affecting his personal interests. His house in Lothbury was wanted for improvements; but the locality had become important to him in his business, and he offered to forego all claim to remuneration if he might so remain still in the line of Lothbury. This reasonable request was peremptorily denied, and Mr. Roach Smith was compelled to remove without any compensation for the losses he necessarily sustained, and to establish himself in Liverpool-street, Finsbury-circus. His business was thus broken up, and he never recovered from the losses he had sustained. He persisted, however, in his archæological labours, and managed to establish a communication with the workmen in the City excavations, by which they were induced to gather up carefully the articles of antiquarian interest which were thrown up amongst the earth and rubbish and carry them to him, from whom they were sure to receive a fair remuneration. It was in this manner that Mr. Smith gradually and through a period of more than twenty years collected the large and interesting museum, which is so well known to all interested in these researches, and which has always been thrown open so liberally to the inspection of the public.

It would not be easy for the reader in a few words any notion of the great extent of this interesting collection, or of its variety, including almost every ordinary article of usefulness in public and domestic life which was not made of perishable materials. From a general view of it we may obtain a tolerably correct idea of what a rich and important city Roman London was, while there is hardly any department of our national archæology on which it does not throw more or less light; for it must not be forgotten that Mr. Roach Smith, who began with the Roman remains, has collected for all periods, and that his museum extends through the Saxon, Norman, and later periods of London history. It thus presents a series of objects which speak more or less of the social habits and customs, and of the industrial life of the successive generations who have lived and died in the metropolis of Britain from the earliest period of its existence as a city, and reveals a history which is untold by the pen of the chronicler. It reveals our forefathers in their every-day life, in their houses and villas, and gives us glimpses of them in their homes, and in their costume, surrounded by the products of the arts which administered to their comforts and luxury. In fact, although collected only on one locality there is no museum in this country which contains anything like so much material for profitable study by the general antiquary. It is not, therefore, to be wondered at if Mr. Smith, besides a natural attachment to what may be called an object of his affections for so many years, was unwilling to separate from it, in the fear, in which all who appreciate such objects at all must share, that it might be eventually broken up and dispersed, and thus the labour of such a long period thrown away. Its main value consists in its collective form, for each article taken individually as a mere curiosity, loses naturally its historical importance. Moreover, when we consider the circumstances under which it was collected (and in fact under which only it could have been collected), it is quite improbable that any such collection of London antiquities can ever be made again. This circumstance itself caused uneasiness among antiquaries, who saw such a valuable museum placed in a private house, where it was accessible to but a very few many accidents of fire, &c; and, he had often been urged to allow it to be offered for sale to one of our national institutions. The most appropriate place for its reception appeared to be the Museum of the City of London, and after that the British Museum.

During the last two or three years several considerations have led Mr. Smith to yield to the wishes of his friends; and, as the civic body continues to display the same apathy as formerly with regard to the City antiquities, it was determined to offer the collection to the great national establishment, the British Museum. It is to be regretted that the managers of the British Museum have shown, especially of late years, a very great disregard for our national antiquities, which has been shown in such cases as the rejection of the Faussett Collection, and which is, unfortunately now apparent in the vacant or inappropriately-filled cases of the room in the Museum itself which is termed "British." At the beginning of last year Mr. Smith made a formal offer of his collection of London antiquities to the trustees of the British Museum, through Lord Londesborough, Lord Talbot de Malahide, and Sir John Boileau. As it was necessary to name a price, he made as near an estimation as he could of the sums of money which he had himself expended upon it, which he ascertained could not have been less than £300, and he therefore named that sum as a fair one for the purchase money. All who have been acquainted with Mr. Smith's manner of collecting, will be convinced that he did not pay more than the just value of the objects considered as articles of antiquity, so that he was giving to the nation his own labour and the result of his own knowledge during so many years, without any consideration in return. At the end of nearly three months from the time when the offer was made to the trustees, Mr. Smith received their reply, in which they merely rejected his offer, without stating any reason for doing so, though he received indirect information that it had been rejected on the recommendation of the officers of the Antiquity Department, who had set a very trifling value upon it. When this refusal was publicly known it caused a very considerable sensation throughout the whole country, and many paragraphs in London and country newspapers showed that public opinion was decidedly against the decision of the trustees of the British Museum. A petition to Parliament was immediately drawn up, which was signed by, we believe, above 900 individuals, who were all men known publicly for their acquaintance with archæology and for their fitness to appreciate the value of this collection to the public; and this petition was presented to the House of Commons by Mr. Gladstone in the month of July last. About the same time a memorial also was sent to the Treasury, signed by thirty-five gentlemen especially known for their literary and antiquarian attainments—at the head of whom were Lords Talbot de Malahide and Londesborough—who urgently pressed the Lords of the Treasury to purchase Mr. Smith's collection for the nation, and gave their opinion that the sum asked for it was a fair price. There is good reason for believing that the Treasury was willing to give the money, if approved by the trustees of the British Museum; but the latter still refused to buy. Meanwhile, the public feeling on the subject was becoming daily stronger, and petitions were sent to the Treasury from scientific bodies in different parts of the country, until the Treasury itself appears to have exercised some pressure on the Museum authorities. The consequence was that the officers of the Museum now made an indirect offer to Mr. Smith (by a communication from Mr. Hawkins, of the department of Antiquities in the Museum to one of Mr. Smith's friends) to reopen the negotiation, the result of which has been that he has, at length, by the advice of the friends whom he has consulted throughout the transaction, consented to accept two thousand pounds for his museum, rather than it should not be permanently deposited in the national establishment, where it may be accessible, as it has hitherto been, to all who are interested in the subject; although the fairness of Mr. Smith's own valuation has been confirmed by a regular valuation made by Messrs. Sotheby and Wilkinson, the well-known auctioneers of antiquarian and literary property. It is much to be regretted that the directors of our national establishments should appreciate so little whatever is really national; we cannot do otherwise than rejoice that the museum of Mr. C. Roach Smith has at last found a permanent resting place in the public establishment where, of all others, it ought to go and we hope it will be carefully and properly arranged and kept together by itself in a prominent position.

## VISIT OF THE PRINCE OF WALES AND PRINCE ALFRED TO MESSRS. DAY AND SON'S LITHOGRAPHIC ESTABLISHMENT.

ON Tuesday week their Royal Highnesses the Prince of Wales and Prince Alfred, accompanied by Mr. Gibbs, Dr. Becker, and Colonel Biddulph, honoured the establishment of Messrs. Day and Son, lithographers to the Queen, with a visit, in order to inspect the various processes of the art of lithography from their commencement to their termination in the form of impressions from the hand of the printer; and more particularly with the view of seeing the progress of the many important works in chromo-lithography now being produced by this eminent firm.

On their arrival the young Princes were received by Mr. Day, who exhibited to them several original drawings which were destined to be copied on stone, amongst which were conspicuous "Simpson's Sketches from the Seat of War in the East;" Mr. Simpson himself explaining to their Royal Highnesses the various points of interest in his drawings. The Royal party then passed through the draughtsmen's room, and inspected many lithographs in progress, chiefly incidents of the late war, both naval and military, and some more peaceful subjects, the most remarkable being the drawing for the small edition of Roberts's well-known work on the "Holy Land." After glancing at the series of colossal physiological and zoological drawings produced by Messrs. Day for the Department of Science and Art they next visited the etching-room, where they witnessed a lithograph from one of Simpson's sketches in the Crimea submitted to the process of etching, which they afterwards saw taken to the press and proved. After walking through the lower floors of the establishment, and observing the various works in progress at the presses, the more prominent being Roberts's "Holy Land," Simpson's "Crimea," and Bossoli's tinted views of the same locality, they were conducted to the chromo-lithographic department, and witnessed the progress of many interesting and important works: one an imitation of a richly coloured drawing by Haghe, bearing the title of "The Happy Trio;" another a copy from an oil painting by Frith—his well-known picture of "Dolly Varden;" a copy of Sant's "Lavinia;" and, lastly, Owen Jones's great work, "The Grammar of Ornament." They then paid attention to the steel and copper plate printing, and saw impressions of the popular subjects—viz., "The Slide," after Webster; "The Drive," after Landseer; "The *Victory* being towed into Gibraltar," by Cousins, after Stanfield; "Napoleon on the Field of Bassano," by Lewis, after Barker; and "Nelson on Board the *Sea Jozef*" by Cousins, after Stanfield.

During their Royal Highnesses' visit they were much interested by seeing a facsimile of the letter announcing the honour of their intended visit written and transferred to stone—a copy of which they each claimed. After spending two hours in the building, during which they paid particular attention to the various processes described by Mr. Day, apparently much gratified by what they had seen, they quitted the establishment.

## PARIS FASHIONS FOR MAY.

THE proclamation of peace has given the signal for a series of fêtes of all descriptions, notwithstanding which we have nothing new in the way of ball-dresses, which denotes rather a prolongation of the season than the commencement of a new one. The marriages which usually take place in spring are more numerous than hitherto, since the conclusion of peace. But to describe the splendour of these rich *corbeilles de mariage* is impossible: two waggons were hardly sufficient to carry the rich *corbeille* of Mdlle. de Rigny, the bride of M. de Beam; besides the *corbeilles* of Mdlle. la Princesse Czartoryska, Mdlle. de Montebello, Mdlle. Leon, Mdlle. de Sancy, and others.

Nevertheless, attention is turned towards the new spring modes. Bonnets are nearly the same—the passe is very small, the curtain very large; the long ends of the ribbons fall over the shoulders. A *modiste* of establishment has produced an invention for preventing the bonnet from falling too far back; it consists of a little imperceptible gauze fixed in the passe of the bonnet, and which produces the desired effect, obviating the emploi ment of pins.

Among the bonnets we have noticed the last few days are a *chapeau à fond mon* of green taffetas sewed upon a passe of Italian straw, transversed by a black velvet which ties above the curtain and falls behind, roses mingled with white *tulle d'illusion* ornament the inside of the bonnet. Chapeau of white *tulle illusion*, blanc *cou*tisse, and in each *couisse* a *bais* of taffetas rose: on each side of the passe are groups of rose-coloured feathers, and on one side of the head a tuft of primroses of the same shade. Chapeau of lilacs and white lace, with a flower of *brin fantastique*. For little girls there are *Chapeaux Pamela*, ornamented with large knots of floating velvet, or with garden flowers of every shade. The beautiful *coiffures Persanniennes* of flowers which attracted so much attention at the Exhibition have since become quite the fashion. Their freshness and lightness render them well adapted for summer ornaments; their opaque white harmonises admirably with the *pâle de riz*. Flowers and feathers will be much worn this summer. In the *corbeille* of the Margravine of Bavaria were three parasols—one was very large, made covered over with rose-coloured *moire*, and again with English point lace; the second had an ebony handle, inlaid with silver, and was of sky-blue taffetas covered with a thread tissue *d'alos Chenos*; the third was covered with maroon *moiré antique*, with a sprinkling of *pois d'or*. The fringe was half of maroon silk and half gold.

Among head-dresses we hear much of the *couronne Ristori*, apropos to her great success in *Medea*. This crown is composed of silk oak-leaves, shaded with red; the golden and green acorns are grouped in this foliage, and gold *bizerons* form behind a sort of floating knot, that falls upon the shoulders.

Robes are worn as full as ever; the sleeves preserve their open form, and the corsages their basques, more or less long. The skirts are either quite plain, or covered by five or seven flounces reaching to the waist, but robes with the same number of flounces, only as far as the middle of the skirt, and leaving the upper part comparatively unrimmed, are no longer in fashion. Of the robes and mantelets, the patterns are not yet quite decided.

### THE ILLUSTRATIONS

Chapeau of white taffetas, with crisped feathers upon the edge of the passe, the lower part of the head of *tulle illusion*, edged with narrow white blonde.

Mantelet of white muslin, embroidered upon the tour, and with wide scallops. At the head of the trimming are little silken knots. Robe *en taffetas quadrille*, white ground with stripes of *verte d'Italy*: the skirt has five flounces, with round scallops, which are themselves trimmed with a narrow silk binding, also scalloped.

*Girl*.—Straw hat, the passe covered with a network of fine velvet. A knot of roses upon the side of the passe, and another above the bavolet, with long hanging ends. Skirt of *moiré antique*, and an over corsage, fitting closely, of black or coloured velvet, to match the skirt. The corsage is made *à brebelles*, and *a bouquet basques*; is open on both sides, but held in by a series of little jets, with which also are trimmed the edges of the basques, braces, and sleeves.

Robe of *gros de Naples*: the skirt has three flounces, with satin patterns upon the edges. The corsage, closed in front, is ornamented with a ruche, which falls to the bottom at the waist, and separates in front, to form the basques. Each point of the corsage is ornamented with a ribbon of the same kind. An *écharpe* mantelet covers the shoulders.

Chapeau of white rose-straw, trimmed with flowers. Robe of barège, white ground, with garlands of maroon flowers. The *corsage ajusté* is ornamented with a round basquine, the edge of which is trimmed with three fringes—*Tom Pouce* maroon matched to the shade of the flowers of the robe. The sleeve has a first flounce at the elbow, and a second a little lower trimmed with the same, as are also the five flounces that cover the skirt of the robe.

SABBATH OBSERVANCE IN GERMANY.—The states of Oldenburg have agreed to a law for the better observance of the Sabbath. According to this all out-door labour, all noisy in-door labour, and all places of public recreation, are forbidden until after the termination of morning Divine Service; that is, until about mid-day. An attempt was made to extend the restriction until after evening service, but it was rejected.

AUSTRIAN AND PRUSSIAN COINAGE.—The *Frankfort Journal* asserts that the Mint Conference has come to an agreement and decision relative to the standard of Austrian coin, which is to be placed on the so-called 21-florin footing. If this be carried into effect the Austrian and Prussian standard will be equalised. The florin will then be equivalent to two-thirds of a Prussian dollar or twenty silver groschen, and the 5-groschen piece equal to a quarter florin.

## NEW BOOKS, &c.

Just published price 3s. 6d. each, in fcap. 8vo, cloth,

A HISTORY of the TURKS, from the Earliest Period to the Present Time; embracing the War in Asia and Siege of Sebastopol. With Illustrations.

"The design has been to give a comprehensive information on the leading events, and to produce a readable book."—Times.

An EPITOME of the WAR, from its Outbreak to its Close: a Review of the Historical, Geographical, and Political Facts of the whole case, and an analysis of the strategy and acts of the belligerent powers and of the accounts of peace. By SHIRLEY HIBBERD. With Maps, Plans and Illustrations.

London: JAMES BLACKWOOD, Paternoster-row.

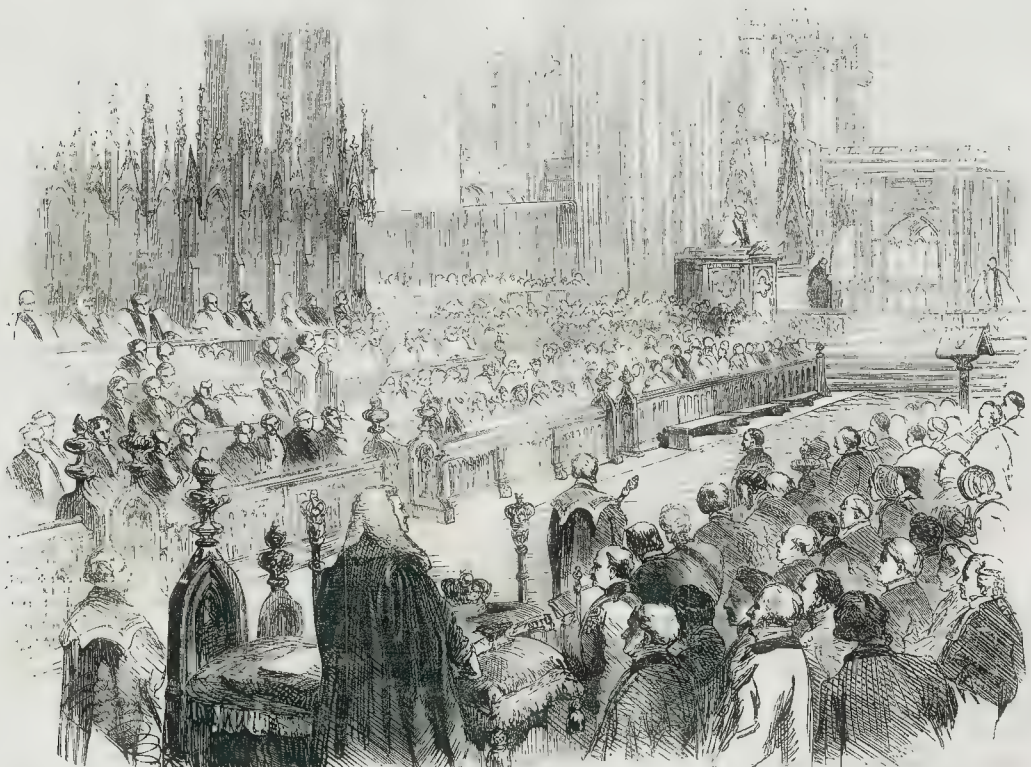
No. 798.—VOL. XXVIII.] SATURDAY, MAY 10, 1856. TWO NUMBERS AND COLOURED SUPPLEMENT } TENPENCE.

## THE DEBATES ON THE PEACE.

THE Peace, which Austria planned, which France insisted upon, and which the British people somewhat sulkily acquiesced in, has been discussed in both Houses of Parliament. The result in each case was the same. An amendment to the Address was hinted at in the Lords, and threatened in the Commons; but in neither House did those who expressed dissatisfaction go the length of embodying it in a formal resolution. Yet although both Houses unanimously voted the Address of Congratulation to her Majesty on the termination of the war, and on the terms of the Peace which were made for, and not by, the British people, it must have been as obvious to the Ministry as it will be to the country that there was an under current of regret and disquietude in the whole discussion. The Lords and Commons felt themselves bound to accept the Peace, and to appear to be satisfied with it. To have expressed a desire for the continuance of a desolating war would have been wicked and unchristian on the part of a great nation speaking through its representatives. To have expressed much joy for a peace in the conquering of which Great Britain has had so small a share, and which has been forced upon us by our Allies, was too bitter a pill for the legislatorial palate; and so the Address was voted unanimously, but without enthusiasm; as a matter of necessity, and not of free will; as a duty imposed by the judgment, in which the feelings and the heart had no share; a thing in which the reason acquiesced, but against which the instinct revolted.

Whilst admitting to the fullest extent the ability, the energy, and the patriotism of Lord Palmerston, and the immense services which he rendered to his country in accepting office in the dark days of adversity and discouragement, and in retrieving in a few short months the disastrous mismanagement of two preceding years, the British people would be unworthy of their own history and of their own future, if they did not feel to some extent disappointed with a peace which is neither as broad in its terms nor as firmly secured as the interests of Europe demand. There has been, from the outbreak of hostilities, a misunderstanding between the British people and the Governments of Lord Aberdeen and Lord Palmerston on the real objects of the war. Mr. Sidney Herbert put the case very clearly in the debate of Tuesday evening. "What they had to consider," he said, "was—first, did the treaty obtain the objects for which we originally commenced the war; and, secondly, did it bear a just relation to the success which we had obtained in the war?" To the first question Lord Aberdeen, Lord Palmerston, Lord John Russell, Mr. Herbert, Mr. Gladstone, and others who have been, or aspire to be, Ministers of the Crown, reply in the affirmative. To the second question the same persons give the same reply, and not without a certain degree of pride and satisfaction. The people of Great Britain join in the reply, but do not participate in the pride or the satisfaction. On the contrary, they express dissatisfaction because they were not allowed to achieve the greater success to which they had made up their minds, and for which they had made all the preparations, in order that thereafter they might have been consulted on the terms of a peace that might have borne, as Mr. Sidney Herbert phrases it, "a just relation" to their victories. Mr. Sidney Herbert is satisfied with his first proposition, and must, therefore, be satisfied with the second, which springs from it. But here lies the gist of the whole discrepancy between the governing classes and the people in relation to this matter. The governing classes went unwillingly to war, and confined themselves strictly to the question of Turkey. The people went willingly to war, and did not confine their hopes and their wishes to the independence of Turkey. From the very first, and long before statesmen and diplomatists had reluctantly accepted the necessity of declaring war, the British nation desired an opportunity for the effectual repression of Russian ambition in Europe and in Asia—in the Black Sea, and in the Baltic, in the Danubian provinces, and throughout Central Europe and its petty despotisms, which are only enabled to confront and overawe their discontented subjects by the favour of the Czars. The Government went to war with a predetermination to bear as lightly as possible upon the enemy. The people went to war as a people should, with the determination to conquer, and to do as much mischief as possible—not or the sake of war, or victory and glory; but in order that such



THE BISHOP OF BATH AND WELLS (LORD AUCKLAND) PREACHING THE THANKSGIVING SERMON, IN WESTMINSTER ABBEY, BEFORE THE HOUSE OF PEERS, ON SUNDAY LAST.—(SEE PAGE 510.)

a blow might be struck at the unrighteous aggressor as would secure and guarantee peace for fifty or a hundred years. The Government has not been disappointed in its very moderate expectations; but the people, having had higher views, and sounder philosophy, has not shared the comfortable feeling of men in power. No guarantees for the observance of this imperfect treaty have been taken from Russia. There is a treaty, but there is no security whatever except parchment for the fulfilment of its contracts and stipulations; and for this treaty, without security, Great Britain has had, or will have, to pay about one hundred millions sterling. Even Lord Palmerston admits that he has no other security than the "assurance" of Count Orloff that the Emperor will not build at Nicolaieff—where there is to be no Consul to watch his doings—any other ships of war than those which he is allowed to have by the treaty. What will this "assurance" be worth when the present, or any future Emperor of Russia, shall think it advisable to set it at nought, and to prepare in secret, in a place that will be as hermetically sealed against prying eyes as Sebastopol was before the present war, as many gun-boats as he can float down the estuary into the Black Sea, for a *coup de main* on Constantinople? We are afraid not much.

It is true that this country might have been ignominiously beaten in the war, because of its unpreparedness, and of the lukewarmness of those to whom it had confided its destinies. To have preserved it from such a catastrophe is something of which a Government may be proud. But should war break out again in a few years—as it may do, for all that the Treaty of Paris contains to prevent it—even this moderate degree of praise will not be accorded to the statesmen whose reputations have now emerged with such apparent credit from the ordeal of Parliamentary discussion.

There are four great parties to the Paris Treaty, and only two of them can be said to be satisfied;—Austria, which detested the war, and had neither the courage nor the means to take that part in it which honour and prudence dictated; and France, which fought it out bravely to a certain point, when her own objects were attained, and when, to have carried it further, might have rendered her people impatient of extra taxation, and would assuredly have enabled her maritime ally to have rivalled, if not eclipsed elsewhere, the splendid achievement that adds the name of the Malakoff to the victorious banners of the Bonapartes. These Powers are satisfied. We shall rejoice if they have reason to continue so, and if the peace be as durable as they wish it, and as every friend of humanity must desire. Russia is not likely to be satisfied; and Great Britain (speaking of the people, not of the Government) has misgivings which, with the usual slowness but sureness of the Saxon mind, will take time to ripen into more positive conviction. We have no guarantee for peace; and in the wars that may arise out of the treaty—and it is as noteworthy as it is deplorable that all our wars arise from treaties, and that every treaty to which we are a party is sooner or later the cause of a war—we have relinquished the sovereignty of the seas. Henceforward the greatest maritime State in the world relinquishes the right in war-time of destroying or impeding the maritime commerce of her enemies. And this, and the loss of a hundred millions, is the price that Great Britain has consented to pay for the temporary security of the Turkish Empire.

## FOREIGN AND COLONIAL NEWS.

### THE ITALIAN QUESTION.

A Genoa paper lately announced a political amnesty as imminent in Naples. The Paris *Univers*, professing to have intelligence regarding the priest-ridden country more authentic than that of the Italian paper, indignantly repels the calumny on King Bomba, and denies that there is the least pretence for affirming that he is about to lay aside or soften the terrors of his vengeance.

The *Risorgimento* of Turin, after stating that the resignation of Chevalier Cibrario, Minister of Foreign Affairs, has been accepted, and that Count di Cavour has been provisionally intrusted with that portfolio, adds that this resignation has no political meaning; that General de la Marmora having returned, the portfolio of War will be restored to him, and that the present Minister of War, General Durando, will resume the portfolio of Foreign Affairs. The *Risorgimento* of the 2nd of May says:—

The note, or, to give it the true name, the protest, which Count Cavour, in the name of the Piedmontese Government, sent to the representatives of the different Powers before quitting Paris, will soon be published. It breats, in language always becoming, but firm and energetic, on the necessity of providing efficaciously for the welfare of Italy, if they truly desire the tranquility of Europe. The state of siege in the duchies, the military government in Lombardy, the Austrian garrisons in Tuscany, the foreign occupation in the Romagna, the over-crowded prisons of Naples and Sicily—all constitute a state of things not natural, and which cannot last. The Congress of Paris has recognised the misfortunes of Italy, and in that European Congress the right of Piedmont to speak for Italy has been recognised.

The following telegraphic report of what took place in the Sardinian Chamber on Tuesday last appears in the *Indépendance Belge* of Wednesday:—

TURIN, May 6.

Count Cavour, in answer to interpellations addressed to him to-day in the Chamber of Deputies, declared that the negotiations now pending on the subject of the affairs of Italy impose upon him a great reserve.

He explained the moral and material advantages arising out of the Treaty of Peace. The Italian question has been brought before the Congress, and France and England have frankly adopted the views of Piedmont.

Austria had met the question by a plea of not discussing it, but the Italian question has not the less become now a European question.

The Minister declared, in conclusion, that the relations between Sardinia and Austria had not improved. The Piedmontese Government placed its sole reliance on the omnipotence of public opinion.

### THE PRESS OF BELGIUM.

In the Belgian Chambers, on Wednesday last, the Foreign Minister, in answering the interpellation on the recent speech of Count Walewski on the press of Belgium, replied that that speech had not been officially communicated. When that communication should take place, the answer would be ready, and would be communicated to all Governments, firmly maintaining the rights of a constitutional and independent country. It was further asked whether any foreign Power had asked for any modification of the laws relating to the press in Belgium. The Minister said he would answer with one word—"Never." The sitting broke up amidst immense cheering and enthusiasm.

### AMERICA AND DENMARK.

Advices have been received at Hamburg, and notice has been officially given, of the expected arrival of an American squadron in the Elbe, Copenhagen being mentioned as the ultimate destination. This important event is supposed to be connected with the expiration of the treaty with Denmark relative to the Sound dues.

### AMERICA.

The United States' mail steam-ship *Baltic*, which left New York on the 26th ult., arrived at Liverpool on Wednesday evening, only about twelve hours later than the *Cambria*, Royal mail steam-ship, which had let New York on the 23rd.

The New York journals repeat the announcement received last week respecting the sequestration of the Church property in Mexico. They also attenuate the importance of the defeat sustained by Walker's filibusters under Schlesinger, which, they affirm, though signal, never appeared decisive. Later advices from Nicaragua, however, leave no doubt as to Colonel Schlesinger's defeat by Costa Ricans. He was to be tried by court-martial for treason and cowardice. Walker, with 700 men, was marching to meet the Costa Ricans, who are said to be countenanced by France and England.

In the United States' Senate, on the 18th ult., resolutions directing inquiry into the expediency of establishing a uniform rate of postage throughout the country, and of permitting inhabitants of the British North American provinces to enjoy the benefits of the patent laws on the same footing as American citizens, were adopted.

In the United States' Senate joint resolutions, affirming the jurisdiction of the United States over newly-discovered islands of the sea, and vesting the right of property in guano deposits upon said islands in the original discoverers and their heirs, were offered and referred to the committee on foreign affairs. The debate on the Nicaragua question was continued.

In the House, the Senate Bill making appropriations for fortifications was laid on the table by a large majority, on the ground that it improperly originated in that body.

A violent norwester prevailed throughout the 21st ult., causing considerable damage to property. Burton's theatre was unroofed, as were also several churches and other buildings in the city and suburbs. The number of awnings, fences, and trees demolished by the gale is incalculable. The storm extended over a vast region of country.

## OBITUARY OF EMINENT PERSONS.

### R. M. FOX, ESQ., M.P.

MR. RICHARD MAXWELL FOX, of Fox Hall, co. Longford, M.P., D.C.L., who died at St. Leonards on the 26th ult., was the eldest son of the Rev. Francis Fox, of Fox Hall, co. Longford. He was born on the 4th of March, 1816, and married, 1835, Susan Amelia, second daughter of Admiral Sir J. W. Halsted, G.C.B., by his wife, Emma Mary, elder daughter of the great Admiral Edward first Viscount Exmouth. Mr. Fox was educated at Winchester School, and University College, Oxford. He was first returned to Parliament for the county Longford in 1847. His politics were Liberal. The family of Fox is of great antiquity in Ireland. The family seat, Fox Hall, was purchased by Sir Nathaniel Fox in the time of Queen Elizabeth. Through his grandmother, Lady Anne Maxwell, daughter of Barry, second Earl of Farnham, Mr. Fox claimed Royal descent.

### WILBRAHAM EGERTON, ESQ., OF TATTON PARK, CHESHIRE.

THIS gentleman, one of the first Commoners in England, was the eldest son of the late William Tatton Egerton, Esq., of Tatton and Wilbraham, by his second wife, Mary, second daughter of Richard Wilbraham Bootle, Esq., of Rode and Lathom. He was born the 1st of September, 1781, and succeeded his father the 17th April, 1806. He represented Cheshire, on Tory principles, for nineteen years in Parliament, and he served the office of High Sheriff of that county in 1808. He was also Lieutenant-Colonel of the Yeomanry Cavalry and Local Militia of, and a Magistrate and Deputy Lieutenant for, the county of Chester. He married, the 11th of January, 1806, his first cousin, Elizabeth, second daughter of Sir Christopher Sykes, Bart., of Sledmere House, Yorkshire, and by her leaves issue five sons and one daughter. Two of the sons are in the present Parliament—viz., William Tatton, the eldest, who is M.P. for Cheshire, and Edward Christopher, a barrister, who is M.P. for Macclesfield. Mr. Wilbraham Egerton died on the 26th ult.

### THE DOWAGER LADY WHARNCLIFFE.

ELIZABETH CAROLINE MARY, Dowager Lady Wharncliffe, died on the 23rd ult., in her seventy-fifth year, at her house, 45, Grosvenor-street. This lady was the only daughter of John, first Earl of Rosse, by his second wife, the Lady Mary Hervey, eldest daughter of the Right Rev. Frederick, fourth Earl of Bristol, and Bishop of Derry. Elizabeth, Lady Wharncliffe, married, the 30th March, 1799, James, first Lord Wharncliffe, whose grandson is the third and present Lord Wharncliffe, and who, at his death, in 1845, was Lord Privy Seal in Sir Robert Peel's Administration. By this marriage her Ladyship had two sons—John, second Lord Wharncliffe, who died in 1855, and the Right Hon. James Stuart Wortley, M.P., Recorder of the city of London; and one daughter, Caroline, married to the Hon. and Rev. John Chetwynd Talbot, third son of the late Earl Talbot. The health of the Dowager Lady Wharncliffe gradually declined since the death of her son, Lord Wharncliffe, in October last.

### THE HON. MRS. RYDER BURTON.

THE HON. MRS. Ryder Burton, of Dunstall Priory, Kent, died at her town residence, 15, Park-square East, on the 26th ult., from the effects of an accidental fall in her drawing-room. This lady, Anna Maria, fourth and youngest daughter of Randall, thirteenth Baron Dunsany, was born the 10th Nov., 1787, and married, first, the 11th Aug., 1808, Philip Roche, Esq., of Doneore, county Kildare, by whom, who died in 1814, she had issue one son, John, a Major in the 2nd Life Guards, and two daughters, who are the present Lady Trimleston and the Dowager Lady Louth. She married, secondly, the 1st July, 1822, Rear-Admiral Ryder Burton, R.N., K.C.H., son of the late Bishop of Killala, by whom she leaves issue an only son, Lieutenant-Colonel F. A. S. Plunkett Burton, who married, the 14th September, 1853, Sarah Charlotte Elizabeth, daughter and coheiress of F. S. W. S. Kin Drax, Esq., M.P., of Charborough Park, Dorset, and Killerton Abbey, Yorkshire.

WILLS.—The will of the Right Hon. Lord Boston was sworn under £20,000 personalty. The Hon. William Leslie Melville, £10,000. John Fergusson, Esq., of North Berwick, property both in Scotland and England, there being personality within the province of Canterbury amounting to £2,000: there are numerous charitable bequests. Don Francisco Lucano de Marrieta, wine-merchant, Old Bond-street, £140,000. Robert Wilson, Liverpool, merchant, £50,000. Richard J. Neville, of Llanelly, Carmarthen, copper-agent, £40,000. Henry James Stevens, of Durham-lodge, Bucks, £30,000. Joseph Laundy, Esq., of Tottenham, £35,000. James W. Ogle, Esq., of Beckenham, £25,000. Major Charles Grissell, R.E.I.C., £6000. Rev. J. R. Belton, of Cheltenham, £12,000. John Allcard, Esq., of Burton Closes, Derby, and Conaught-place, £45,000. John Reeves, Esq., of Clapham, £40,000. William Ryton, of Somerstown, £26,000. Thomas Joyce, silk-mercer, £16,000. George Aiton, Jermyn-street, £4000; Mrs. Ann Yates, of Kent, £30,000. Mrs. Mary Robinson, of Norfolk-crescent, £19,000. Mrs. Elizabeth Evelyn Fullenny, £14,000.

BEQUESTS TO CHARITABLE INSTITUTIONS.—William Evans, Esq., of Allestree, personalty, £250,000, has bequeathed to the British and Foreign Bible Society, Church Missionary Society, and to the London City Missions, £100 to each. William Stephens, Esq., of Prospect Hill, Berkshire, personalty, £200,000, has bequeathed to charities £2000, to be paid on decease of wife, as follows:—Royal Berkshire Hospital, £500; British and Foreign Bible Society, £500; Parent Church Missionary Society, £500; Irish Church Missionary Society, £200; Church Pastoral Aid Society, £200; Green Girls' Charity School, Reading, £200; Reading Medical Dispensary, £200; Sunday School in connection with Trinity Church and St. Mary's, Reading, £200.

THE TRIAL OF W. PALMER.—At present no alteration has been made in the day appointed by the Court of Queen's Bench for the trial of the prisoner—namely, Wednesday next, the 14th of May: but it is said that an application will be made to postpone the case to the Monday following, when the whole of the ordinary business will have been disposed of. The prisoner was brought to London on Sunday, in the charge of the deputy governor of Stafford gaol and one of the turnkeys; and he was delivered to Mr. Weatherhead, the governor of Newgate, in due form, under the order of the Court of Queen's Bench. Every arrangement was made to keep the fact of the arrival of the prisoner a secret, and no one was aware of it but the persons immediately concerned in the matter. He appears remarkably healthy, and does not seem to have at all suffered from the imprisonment and the anxiety he must have undergone. He was placed in the usual ward appropriated to untried criminals of his class, and he will, of course, be allowed every proper facility to communicate with his solicitor until the period of his trial.

MR. ROACH SMITH'S MUSEUM OF LONDON ANTIQUITIES.—In our description of this very interesting collection, at page 486, last week, "£300" is misprinted for £3000.

## EPITOME OF NEWS—FOREIGN AND DOMESTIC.

Her Majesty the Queen and the Prince have made a donation of £100 to aid of the funds of the model establishment of baths and wash-houses in Goulston-square, Whitechapel.

The ceremony of the churching of the French Empress was performed on the 30th ult., at the Tuileries, in accordance in all respects with the programme some time since published, with this only modification, that her Majesty remained during the whole of the ceremony in an easy-chair moving on rollers.

There is some talk of an intended visit of Queen Victoria to Berlin. It is said that Prince Frederick William will bring a pressing invitation to her Majesty to be present at the marriage of the Princess Louisa with the Prince Regent of Baden in September next.

The Archduke, the brother of the Emperor of Austria, will visit Paris in June. It has also said, on credible authority, that arrangements will be made in the course of the summer for an interview between the young Emperor and Napoleon III.

Baron de Brunnow, on a special mission from the Emperor Alexander II., had an audience of the Queen on Saturday last, to announce the accession of his Imperial Majesty to the throne of Russia. His Excellency was introduced by the Earl of Clarendon.

The Spanish papers say that the Emperor of Russia will shortly recognise Queen Isabella, and that the Marquis del Duero will probably be nominated Spanish Ambassador to St. Petersburg.

The Prince of Wales has forwarded £50 towards the expenses incurred lately in repairing the fine old parish church of Llanbeblig, in the county of Carnarvon.

It is said that before his departure for Russia, to attend the coronation of the Emperor Alexander, the Count de Morny will be raised to the dignity of Prince of the Empire.

The King of Wurtemburg arrived in Paris on the 2nd instant. His Majesty travels under the name of Baron de Teck. On the following day his Majesty paid a visit to Prince Jerome.

The Marquis of Dalhousie took his departure from Malta on the 20th ult., on board her Majesty's steam-frigate *Tribune*.

The French Empress received in her apartments the congratulations of Count Orloff and the Grand Vizier Aali Pachá, and afterwards those of the secretaries of the Diplomatic Corps and their ladies.

General Prim was married in Paris on Saturday morning, at the Madeleine, to Mdlle. Gonzales, of Arguero, a young lady of Mexican birth, who brings to the General a dowry of seven millions of francs.

The Grand Vizier, Aali Pacha, and suite, arrived in London on Tuesday night, by the express train of the South-Eastern Railway.

The Dowager Empress of Russia is at present too unwell to undertake the projected journey to Germany.

The Grand Duchess Stephanie of Baden, cousin of the Emperor, has passed through Besançon, from Nice, on her way to Baden. It is expected that her Royal Highness will shortly visit Paris, to be present at the baptism of the Prince Imperial.

Mr. Grenville Berkeley, who has lately resigned the representation of Cheltenham, will also resign his appointment at the Poor-law Board, upon accepting the seat at the Board of Customs, vacated by Mr. George Dawson's death.

The King of Prussia has returned from Berlin to Dresden. A grand gala dinner was to be given at Court to celebrate the anniversary of the birthday of the Emperor Alexander.

Count Orloff, on the occasion of officially notifying to the Emperor Napoleon the accession of the Emperor Alexander II., has been decorated with the Grand Cordon of the Legion of Honour.

The King of Prussia has conferred the Order of the Black Eagle on his Majesty the Emperor of the French.

It is said that the Marquis of Westminster has purchased Bonidowrth Castle of the executors of the late Mr. Cavallan, for £160,000. That gentleman acquired it some years ago for £120,000, and it is stated that the entire rental from that time to this has been expended in improvements on the domain.

An Imperial manifesto, published at St. Petersburg, announces that the coronation of the Emperor will take place at Moscow, in August.

At a concert given by M. Carlotus, the Belgian Minister in Lisbon, the King of Portugal sang the sogno of Mercadante, an air of Verdi's in the Vêpres, and took a part in a duo from "Linda" with Bartolini, the baritone.

The *Mustapha Bey*, the beautiful Egyptian Royal yacht, built for a nephew of the Pacha of Egypt, and intended to cruise on the river Nile, left Southampton on Tuesday for Alexandria.

It having been decided by the Emperor of the French that the diplomatic agent at Vienna should occupy the rank of Ambassador, M. de Bourqueney gets that step; and, as a matter of course, M. Hubner, the Austrian Minister at the French Court, obtains the same advantage.

The Princess Murat, married to Count Rasponi of Ravenna, has just had a monument executed by the Roman sculptor, Gajassi, to the memory of her father, King Joachim.

M. Charles Baudin, who has filled for upwards of five years the post of principal secretary to the French Embassy in this country, is appointed to the first secretaryship of the French Embassy at St. Petersburg.

Prince Charles, the King of Prussia's brother, is to represent Prussia at the Czar's coronation.

Prince Oscar of Sweden (the suitor to the Princess Mary of Cambridge) was to embark at Carlscrona, on his visit to France and England, on the 10th inst. (to-day).

President Roberts, who, with his family, returns to England in the *Niger*, has resigned the government of Liberia into the hands of Mr. Benson, the newly-appointed President.

The French Rear-Admiral Penaud has taken up his residence in Malta for three months in order to superintend the transit of the French troops on their return to France from the Crimea.

Count Montalembert has been authorised by the Corps Legislatif to print and put into circulation the speech delivered by him upon the affair of the electoral bulletin.

Mr. F. R. West, M.P., has issued an address to the burgesses of the Denbigh boroughs in which he says that the state of his health renders it incumbent upon him to retire.

M. Victor Monpurgo, an Eastern traveller, whose writings for the last sixteen years have materially contributed to the knowledge of Turkish affairs which Europe now possesses, died last week.

On Monday night M. Kossuth lectured in the Music-hall, Edinburgh, and the crowd was so great as to be uncomfortable, except in "reserved seats."

The appointment of Prince Gortschakoff as Minister for Foreign Affairs is officially published.

The *Nation* announces that Mr. Charles Gavan Duffy, the late proprietor of that paper, is to receive a present of £10,000 in Australia, for the purpose of giving him a qualification to enter the Legislature.

The Collar of the Golden Fleece which has been presented to the Prince Imperial is the same that was worn by the late Emperor Nicholas of Russia.

Count J. de Tolstoi, who for upwards of twenty-five years previously to the war exercised at Paris the functions of Correspondent of the Ministry of Public Instruction in Russia, has returned to his post.

A portion of the foreign press ascribes to the Pope the intention of presenting to the Emperor of France, by the hands of his legate, Cardinal Patrizzi, a protest against the inculpatory declarations of Count Walewski's speech.

The sum set down in the budget for 1856 of the French Minister of Foreign Affairs for Abd-el-Kader and his establishment is 120,000 fr.

Prussia has refused to take any part in a convention to regulate the issue of paper money in Germany.

The Spanish Cortes has adopted, by an immense majority, the bill which makes it necessary that the signature of the writer is required to all articles, and the proprietors will have to put in securities.

The shipments of gold on account of the Turkish Loan are still understood to be at the rate of £200,000 a week, but they will probably cease in the course of about a fortnight.

Navigation in the Gulf of Riga was reopened on the 26th ult., when the Swedish screw-steamer, the *Hult*, arrived at Riga with a cargo of salt. Eighty other vessels were in sight.

Letters from Constantinople dwell upon the heavy amount of sickness which still prevails amongst the French troops, especially in the form of typhus.

The sailings from Liverpool this week included a considerable number of vessels for the Russian ports and the Danubian Principalities.

The Austrians are forming a large camp of operation at Somma. It was expected that the English Government might be called upon by that of Piedmont to send a squadron to the Gulf of Spezia. The relations between Piedmont and Austria are anything but pacific.

## THOUGHTS IN THOROUGHFARES.

BE that attempts to pursue his way along a London thoroughfare, "wrapt in thought," will be liable to have his mental wrapper torn rudely from him in a variety of ways, but by none more effectually than by those at once popular and unpopular machines—the perambulators, that swarm on all our foot-pavements. By no nuisance that has been prevalent of late years have the public corns been so continually trodden on. In these days every infant appears to keep his carriage—a piece of luxury he would be welcome to enjoy if the infantile vehicles were restricted to the carriage-way; but there is literally no room for any other pedestrians but those who force a passage for themselves by pushing a perambulator in front of them along the pathway. There is a sort of insolent audacity in the very name of a Per-Ambulator, which signifies "one who walks through"—a title that seems to bid defiance to all obstructions. There is a law which restricts the humble wheel-barrow to the carriage-road; but there seems to be a doubt whether the Police Act applies to the perambulators, and whether children's carriages enjoy the privilege sometimes said to belong to a coach-and-four—of driving through an Act of Parliament. It is true that the offenders are chiefly women and children, whom it might be thought harsh to attack with the weapons of the law; but, when those weapons are required for self-defence, the weakness of an assailant is no good reason for not using them. The fact is that rather too much forbearance is shown to vards some of the minor nuisances of the metropolis. Manufacturers are fined heavily for sending smoke into the air, but idle urchins are continually knocking bits of wood through windows, or into passengers' eyes with impunity. Perhaps one of the causes why there is such a tendency to make playgrounds of the public streets is because the opportunity of making playgrounds of a portion of the public parks is rather too much restricted. No one objects to the prohibition of cricket and other games that would interfere with the comfort of those who resort to the parks for air and exercise; but there is somewhat too much tendency on the part of the park-keepers to put a stop to anything in the shape of amusement, even of an inoffensive character. If a few children happen to be engaged in any juvenile game, the appearance of one of the parkkeepers will create a perfect panic, and the children not only instinctively run away, but the "authority," without any definite object, will instinctively run after them. There seems to be a sort of intuitive feeling among the London boys that it is their fate to be hunted by anything wearing a piece of gold lace, and they fly away at the sight of a "beadle," as from a natural enemy.

The "fat of the land" has been thrown into a good deal of agitation by an aldermanic decision that a conductor is justified in refusing to admit a particularly portly personage into an omnibus. There is certainly a law which requires that every passenger shall be entitled to sixteen inches; but, while the Act provides for the size of the seats, it is silent as to the dimensions of the riders. A conductor is compelled to admit any one who hails him, if there is a vacant place; and every passenger is entitled to sixteen inches, so that it appears difficult to avoid a liability to a penalty either by refusing to carry a number of stout persons, or by failing to furnish the legal amount of room to the ordinary-sized passengers. The only way to obviate the difficulty is to supersede the present close and uncomfortable omnibuses by roomy and commodious vehicles. The proprietors profess a desire to do this, and have even promised a reward for the invention of a carriage that shall fulfil the purposes required. It has been intimated that a prize has been offered in vain, and that the competing ingenuity of the country can produce nothing worthy of being adopted in place of the omnibus at present in use; but if the parties interested would go or send as far as Liverpool, they would find all that is required. There the Parisian style of omnibus is in general use, and there the public have the advantage of riding for low fares in comfortable carriages, with space so ample that a solution of the six-teen-inch question is unnecessary. That an Alderman should have decided against the claims of stout people has caused general surprise; but he has, perhaps, been influenced by a desire to support the character of the Bench for being uninfluenced by personal considerations. If an Alderman had given judgment in favour of fat people, it might have been said that he sympathised with corporations in general. If the law really limits all passengers by omnibuses to sixteen inches, the great bulk of the community will be interested in calling for a new and more liberal measure. It is difficult to see how the plan of rejecting the oversized portion of the public is to be carried out, unless the doors of the omnibuses are narrowed to the dimensions to which the passengers are to be limited. If weight should be considered a fair criterion, each omnibus, like every coal-waggon, might be provided with weights and scales, so that, as a purchaser may order a suspicious-looking sack of coals to be weighed, a conductor might be allowed to place in the balance any doubtful customer.

It is difficult to walk very far through the streets, especially in poor neighbourhoods, without having one's attention attracted by the offer of loans from five shillings to fifty or a hundred pounds, which are announced to be had at sundry beggarly-looking places, which certainly do not give any material indication of the wealth that is supposed to be waiting on the premises. It seems strange that capitalists should select such dingy abodes for carrying on their monetary operations, and it is a curious fact that whatever capital may be employed is by no means in the nature of fixed capital, for the places in question are being continually closed, as if they were liable to a class of flitting occupants. This tendency to migration is chiefly remarkable when to the granting of loans the business of receiving money on deposit at a tempting rate of interest has been added. The names given to these associations are full of philanthropy and foresight. They are frequently "Benevolent Institutions," and almost always "Provident." That they "provide" for somebody or other is easily to be understood, and at whose expense the provision is made is not a very difficult puzzle. It is quite refreshing to observe the precaution exercised by the loan societies to have no dealings with other than respectable persons; and, indeed, so great are the exertions to secure this object, that a fee is exacted for inquiry before any transaction can be proceeded with. Sometimes these inquiries are either so very searching that they are never brought to a close, or so momentous that they are never got into a train to be commenced, for the parties who have paid for the inquiry to take place will, in many cases, hear no more of it. Such is often the mode of business of loan societies in a small way. But others are quite gigantic in their plans of usefulness; and of these I shall, perhaps, have something to say on a future occasion.

Symptoms are beginning to show themselves of the preparations for the rejoicings on the 29th of May, and mysterious barriers are appearing at various points of the parks of which it is not yet easy to ascertain the object. No doubt they will be found to be in the right places at the right time; and it is to be hoped that the weather, which is not yet very promising, will have got itself into good order by the night appointed for the peace celebrations. March kept up its character by "coming in like a lion" and "going out like a lamb;" but May has come in rather disgreeably, like an inexhaustible bellows, blowing from the East. How it will go out remains to be seen; but so as it does nothing to put the illuminations out there will be nothing to disturb the serenity of

A WALKING PHILOSOPHER.

## METROPOLITAN NEWS.

### HER MAJESTY'S VISIT TO THE CRYSTAL PALACE.

Yesterday (Friday) her Majesty the Queen, accompanied by Prince Albert, the Prince of Wales, the Princess Royal, the Duchess of Kent, the Duke of Cambridge, and other members of the Royal family, and suite, visited the Crystal Palace, for the purpose of witnessing the inauguration of Baron Marochetti's Soutari Monument and Peace Trophy. At early as eleven o'clock the doors were thrown open to the public, and from that hour until the arrival of her Majesty there was a constant succession of visitors.

Her Majesty, who went through Dulwich, entered the building by the north transept, and passed by the Alhambra, Roman, Greek, and Egyptian Courts, to the dais in the centre transept, where she took her seat. A place was set apart upon the right of the Queen for the Sutherland group, and one on the left for Crimean officers, who attended by special invitation. The officers appeared in full uniform. The Crimean soldiers formed a guard of honour, reaching on each side from the dais to the monument and trophy. On her Majesty taking her place on the dais, the bands of the Coldstream Guards and the Royal Artillery, and the full band of the company, performed the National Anthem.

A quartet from Mr. Costa's oratorio of "Eli," was sung by Madame Rudersdorff, Mr. and Mrs Lockey, and Mr. Thomas. The Scutari Monument, which has been erected in the nave, on the south side of the great transept, was then unveiled, the band playing the "Marcia funebre," from the "Sinfonia Eroica" of Beethoven. A hymn, by Mr. H. F. Chorley, was sung to a Russian national air; and when the Peace Trophy, on the north side of the transept, was unveiled—the band playing the march and chorus from Handel's oratorio of "Judas Maccabæus." The duet, "Oh, Lovely Peace," from the same oratorio, was sung by Madame Rudersdorff and Mrs. Lockey. The bands then performed the French and Russian airs, and "Rule Britannia," during which her Majesty retired to the north side of the building. After the ceremonial the fountains on the upper terrace played.

### GRAND CIVIC BANQUET TO HER MAJESTY'S MINISTERS.

On Wednesday night the Lord Mayor entertained her Majesty's Ministers at a magnificent banquet in the Egyptian Hall of the Mansion-house. The banquet to her Majesty's Ministers, although an event of annual occurrence in the city of London, was, on the present occasion, rendered of more than usual interest in consequence of the conclusion of the Treaty of Peace, and the banquet, therefore, partook of something of the nature of a peace festival, and the addresses of the various members of Parliament possessed more than an ordinary amount of interest.

The usual loyal toasts having been given with all the honours, the Lord Mayor proposed "The Health of the Emperor and Empress of the French." In doing so his Lordship said the world had recently beheld the spectacle of two great nations cordially co-operating for one common object—for the purpose of securing the interests and stability of the great cause of European civilisation. He trusted that the attitude which France and England had assumed in the prosecution of the war, and the friendship which had been cemented in the battle-field, would continue during long years of prosperous and unbroken peace.

M. de Persigny, the French Ambassador, in acknowledging the toast, spoke of the late war as having settled one of the greatest questions of the present age. After a war rendered so much nobler than all former contests by the end proposed—by the human principles on which it had been conducted—by the moderation with which it had been brought to a close—after a war to which historians would point as one of the most glorious episodes of civilisation—all that France desired to see during peace that alliance which had accomplished such victories during war.

The Lord Mayor, in proposing the "Health of her Majesty's Ministers," made some remarks on the Treaty of Paris.

Lord Palmerston, in reply, said: It is a no doubt true that the peace had been unaccompanied by those consequences which sometimes graced the conclusion of a contest. But the more the people of this country compare the state of things two years ago with the condition in which Europe is placed by the Treaty of Paris, the more will they have reason to think that their sacrifices have not been made in vain; that the efforts which they had made have not been without adequate result, and while they look back to the war with pride and satisfaction on the one hand, on the other hand they can look to the peace with confidence as regards the future. (Cheers.) We have heard gentlemen, the noble and enlightened sentiments expressed by the Ambassador of France—sentiments of that great nation, and, above all, of that great Sovereign whom he so worthily represents in this country. The knowledge that those are the principles of our generality, and that will guide his conduct, must inspire you still more with confidence in the results of the peace. It is a gratifying circumstance, a circumstance most reassuring to Europe—that those two great nations, the nations of England and France, are allied in common bonds. After having often stood side by side in the field of battle—after having sat together in conference at the same table at which peace was made—they are sure to be bound for the future by ties doubly sacred—ties cemented by common danger, by community of interests, which, I trust, will perpetuate an alliance not only honourable and advantageous to the countries whom it binds, but which will lay a foundation upon which the peace and prosperity of Europe will rest. (Cheers).

Lord Clarendon, in responding to the toast of "The Plenipotentiaries at the late Conference," said: The late war has been called a war of retirement, because it was a war of principle, not a war of conquest or ambition (Hear, hear); it may also be called a war of the people (Hear, hear). The exertions of the people entitle it to that name; for the inhabitants of this country had been reluctant to enter upon hostilities till hostilities became necessary. They carried out that war with unflinching steadiness (Cheers). They desire no territorial acquirements; for the English have no abstract wish for military glory. I think, my Lord Mayor, they took up arms to protect the weak against the strong—they took up arms to check aggression, and they laid them down when they had attained that object (Hear, hear). His Lordship then, after eulogising the defence of Kars by General Williams, read a letter from the General on the noble conduct of the Russians towards their prisoners, terminating with a hope of speedy peace. I think, my Lord, that we have reason to congratulate ourselves that we have fulfilled all the engagements made when entering into these hostilities. This Russia has done by the treaty just concluded; and there is no precedent for a treaty such as that, which gives advantages to the world generally, but none in particular to England and France, who entered into it in the cause of right (Cheers). As the noble Lord has observed, those circumstances incidental to war which occurred in connection with the alliance between this country and France served the better to strengthen that union between them, and to exhibit the unswerving fidelity of our great ally (Cheers). And as to Sardinia, she has obtained a prestige which has never before been enjoyed by any State that was not a first-rate Power.

Several other toasts were proposed, and acknowledged with due eloquence, including "The Health of the Lady Mayoress," by Lord Palmerston.

BRITISH AND FOREIGN BIBLE SOCIETY.—The annual meeting of this society was held on Wednesday, at Exeter-hall. The weather was very unfavourable, but it did not produce any marked effect on the attendance, which was nearly as great as on former occasions. The chair was taken at eleven o'clock by the Earl of Chichester. On the platform were—Lord Teignmouth, the Bishop of Carlisle, the Bishop of Cashel, the Honourable and Reverend Lord W. Russell, the Rev. Canon Stowell, the Rev. Canon Bickersteth, Dr. McClun from America, Mr. G. S. Gurney, and the Revs. G. Brown J. Spence, G. Clayton, &c. From the report of the committee for the past year it appeared that the receipts during the year ending March 31, 1856, had exceeded those of any preceding year. The grand total amounted to £130,428 7s. 10d., while the total expenditure for the year amounted to £134,213 0s. 10d. The society was under engagements to the extent of £39,910 5s. The Bishop of Carlisle, in moving the adoption of the report, adverted at some length to the playing of military bands in the parks on Sunday, and expressed his conviction that the constituencies of the country would apply a remedy to the evil. This attempt to introduce into England a foreign mode of keeping the Sabbath would, he had no doubt, be strongly defeated by the right-minded portion of the English community, and he believed that, great as was the power of Sir Benjamin Hall, he would find that Exeter Hall was greater.

ASSOCIATION IN AID OF THE DEAF AND DUMB.—The annual meeting of this association was held on Wednesday at the Freemasons' Tavern; Lord Robert Grosvenor in the chair. The report stated that the association had a missionary who went among the poor afflicted, and who was instructed in all cases to place himself under the clergyman of the parish. The agents of the association were principally useful in removing the prejudice which existed against employing the deaf and dumb. The accounts stated that the subscriptions amounted to £346 2s. 10d., and that the expenditure was £357 18s. 7d., leaving £11 15s. 9d. due to the secretary, which, with the outstanding debts, made a debt on the society amounting to £62 3s. 1d.

THE SURREY DISPENSARY.—On Wednesday evening the anniversary festival of the supporters of this excellent institution was celebrated at the Bridge-house Hotel, London Bridge; Admiral Sir Charles Napier, M.P., presiding, supported by Mr. Apsley Pellatt, M.P., and other influential friends of the charity. This charity was established in the year 1777, its object being to afford gratuitous medical and surgical relief to necessitous persons recommended by subscribers. The number of patients admitted during the year 1855 was 5928. Of that number 4963 were cured or relieved. During the year ending Midsummer, 1855, the income from subscriptions and donations amounted to £1203 12s. The expenditure was £1246 11s. 6d. The Chairman, in proposing prosperity to the Surrey Dispensary, expatiated with much earnestness upon its claims to public support; and the result was, that a list of subscriptions and donations was read amounting to nearly £400

THE ROYAL LITERARY FUND.—The anniversary festival of this institution was held at the Freemasons' Tavern on Wednesday evening, when about 150 noblemen and gentlemen, including several distinguished names in the republic of letters, sat down to dinner under the presidency of his Royal Highness the Duke of Cambridge. The chief speeches of the evening were those of the Chairman, on proposing "The Literary Fund," and of Mr. Dallas, the American Ambassador, acknowledging the toast of "The Literature and Science of the United States." The report of the society stated that 53 grants, making an aggregate of £1665, had been made from the funds during the past year, being a larger sum than it had ever before dispensed in any former year. Of these, 31 had been made to gentlemen who had been relieved for the first time. The subscriptions amounted to £1390; of which 100 guineas were given by her Majesty, £20 by the Duke of Cambridge, and £450 by Mr. George Barron, a gentleman residing in Yorkshire.

HAMPSTEAD-HEATH PRESERVATION ASSOCIATION.—At the weekly meeting of this body, held at the Joseph Hume Coffee-house, Pratt-street, Camden-town, on Wednesday last, the deputation appointed to wait on the members of Parliament and the representatives of the Metropolitan Board of Works made their reports. The question of the preservation of the heath is now before the board.—Mr. Nicholay having unanimously advertised in the ILLUSTRATED LONDON NEWS the St. Pancras meeting, and having rendered other valuable assistance. A report from the memorial and petition committee stated "that the signatures of the most influential householders were being obtained to both documents." Arrangements were concluded as to the approaching meeting in the parish of St. Marylebone, to be held in the Courthouse, Marylebone-lane, on Monday evening, May 19.

CHURCH MISSIONARY SOCIETY.—The annual meeting of this society was held in Exeter Hall on Tuesday: the Earl of Chichester in the chair, supported by the Earl of Shaftesbury, Viscount Middleton, the Hon. Archdeacon Pratt, M.P., the Hon. S. R. Curzon, Mr. T. R. Hordern, Q.C., Admiral Sir H. Hope, Major-General Alexander, the Rev. Lord W. Russell, the Rev. Canon Stowell, and numerous other friends of the society. The annual report states that the amount received for the general fund, including the China fund, was £112,370. Other donations and subscriptions make a total of £115,708 received in the United Kingdom, which was £7869 in advance of last year, and nearly £2000 more than the income of any previous year. The total expenditure was £115,080. The society has now 128 stations; and employs 119 English clergymen, 54 foreigners, 30 natives and East Indians, 33 European laymen, schoolmasters, lay agents, printers, &c., 9 European female teachers (exclusive of missionaries' wives), and 1716 native and country-born catechists and teachers of all classes.

WESLEYAN MISSIONARY SOCIETY.—On Monday last the annual general meeting of the members and friends of this society was held at Exeter-hall, the large room of which was well filled. The Earl of Shaftesbury, who presided, assured the meeting of the deep respect he felt for the Wesleyan body, whose venerable founder rose at a time when all was sluggishness in the Established Church of England, and when this country was in danger of suffering its mightiest efforts to fall into oblivion. He deprecated all hostility between Wesleyans and Churchmen, who, he hoped, would work in common, especially in those distant lands where missionary enterprise was so much needed. The report stated that in almost every considerable item of receipt there has been an increase, both in the home and foreign income; making a total amount of regular and miscellaneous receipts, from all sources, of £119,122 6s. 3d., and being an increase of £3073 16s. 5d. over the receipts of the previous year. Mr. Napier, M.P., and several other gentlemen, addressed the meeting in support of various resolutions.

ST. THOMAS CHARTERHOUSE NEW SCHOOL.—On Thursday the first stone of a school building was laid in Golden-square by the Right Hon. W. E. Gladstone, in the absence of the Marquis of Lansdowne, who had been announced to perform the ceremony. The new school is intended to supply a free education to the children of the costermongers and poor inhabitants of Golden-lane and Whitecross street. The plan of the building contains three school-rooms to accommodate 1090 children. We shall illustrate the ceremony in our Journal of next week.

HEALTH OF LONDON.—The deaths registered in London, which in the previous week were 1048, rose last week to 1087. In the ten weeks corresponding to last week of the years 1846-55 the average number of deaths was 1026, which, if raised proportionally to increase of population, becomes 1122. The rate of mortality is, therefore, still below the average. Last week the births of 901 boys and 866 girls, in all 1767 children, were registered in London. In the ten corresponding weeks of the years 1846-55 the average number was 1536.—*From the Registrar-General's Return.*

SERIOUS ACCIDENT AT THE WEST INDIA DOCKS.—A few minutes before ten o'clock on Tuesday night the gates of one of the locks in the West India Docks, situate close to the inn known as "The City Arms," which have been for some time past under repair, burst with fearful violence. The water rushed from the dock into the river, the tide being very low, and the numerous vessels in the docks were driven against the walls and against each other, so that many of them have sustained very serious injury.

## NAVAL AND MILITARY INTELLIGENCE.

ACCORDING to present arrangements, the grand review of Crimean and other troops, fixed for Thursday, the 29th instant, will take place on the cavalry exercising ground in Windsor Great Park, between the Long-walk and the continuation of Sheet-street, Windsor, at ten o'clock in the forenoon, in the presence of her Majesty, the Prince Consort, the Royal Family, the Corps Diplomatique, and her Majesty's Ministers.

THE revised Estimates for the Army, published a few days since, show a reduction from the amount of the original Estimate of something like £4,000,000. A revised Navy Estimate is said to-day will show a reduction in this branch of more than £3,000,000, as it appears that, in consequence of peace, only £16,568,614 of the £19,878,695—originally considered necessary—will be required for the naval and transport service.

ON Wednesday last, at 1.30 p.m., Lord Panmure, accompanied by Sir George Grey and Mr. Professor Barlow, arrived at Woolwich dockyard, and were received by Captain Boxer and other members of that establishment. Their object was to inspect the extensive arrangements which have been made for the celebration of the national festivities. They were conducted through the brass gun foundry to the new paper and pulp factory, where a considerable portion of the principal designs in course of preparation have been stored. They also visited the scene of the late accident.

EXPLOSION IN WOOLWICH ARSENAL.—At a quarter past seven o'clock on Wednesday evening a terrible noise caused the inhabitants of Woolwich, Plumstead, and Charlton to hasten to the Royal Arsenal gates to ascertain the extent of the explosion. The building where the accident occurred is constructed of corrugated iron. About thirty individuals were there employed in the construction of fireworks and a peculiar kind of rocket, which required the assistance of a drill for the holes to admit the fuze. In preparing these the metal became overheated, and thus ignited the combustible matter, by which twelve poor fellows were severely burnt, two of them to such an extent as almost to forbid hope of recovery. The damage done to the works is of trifling importance.

## THE GREAT NAVAL REVIEW.

THE scene engraved upon the next page was Sketched at Fort Monckton, whence groups of anxious spectators watched the movements of the fleet, for which purpose telescopes and every description of optical convenience were put into requisition. The water between the Wight and the main land was dotted, not crowded, with craft of all shapes and tonnage, from the row-boat to the stately line-of-battle ship. The greatest curiosity was excited by the new gun-boats, which were to make their *début* in the presence of the Sovereign, and by the floating batteries. The latter—four low, flat, squat, black, unwieldy constructions, the *Trusty*, the *Glatton*, the *Thunder*, and the *Meteor*, were a feature of the scene, and more brilliantly "dressed" than any other vessels in the harbour, the gun-boats without being models of elegance, moved easily through the water, turned deftly, and had a blunt, determined look, with a spice of mischief in it.

## LAUNCH OF THE "THUNDERBOLT."

THE launch of this fine iron steam gun-battery took place at Messrs Samuda's Works, at Millwall, on the 22nd ult. There are some noteworthy points in her construction; it being the first time that a vessel entirely of iron has been built for "fighting purposes," and her completion being a marvel of rapidity, in which 800 men were constantly employed.

It appears that in January last the Government contracted for three batteries—with Samuda Brothers, of London; Palmer Brothers, of Newcastle; and R. Napier and Sons, of Glasgow. Each of the three vessels was to be finished and delivered at Portsmouth or London on the 18th of

THE GREAT NAVAL REVIEW:—SKETCH ON FORT MONCKTON.

April, under a penalty of £1000 for every day after that date. That of Messrs. Samuda was declared to be ready for launching on the 16th, for the 800 men employed upon her worked with a will, heartily and together, some of them three days and nights at a stretch. All that engineering science, enterprise, and the due application of skill and capital could accomplish, were brought to bear by Messrs. Samuda; and, though the Peace had rendered their joint labours futile, the launch at Millwall, both for the employers and employed, was a scene of great excitement. The *Thunderbolt* went nobly off from the slips into the waters with the greatest ease. The cheers were loud and long; and many were the good wishes and compliments to Miss Watts, the daughter of the Assistant-Surveyor of the Navy, who had the honour of naming the vessel.

The *Thunderbolt* is 2000 tons burden, and about 186 feet in length, in ebreadth 46 feet 6 inches, and in depth 18 feet 6 inches. She is spoon-bowed, framed, and plated, like an ordinary iron ship. Outside the plating, planks of teak, six inches in thickness, are bolted, and over these are plates of iron four inches thick. This sheathing of wood and iron is expected to be proof against shot or shell. The form is rather peculiar, having great breadth of beam, and being very shallow in proportion to the breadth, which is continued to the bow and stern without being much diminished. The sides fall in very much, and the bottom is nearly flat, so as to make it float on a very small draught of water, and draw up close under the walls of a fortress. The beams forming the upper or weather deck are fitted close to each other, and are exceedingly strong. The deck planks are of teak, covered with thick iron plates, shot and shell proof. The beams of the lower or fighting deck are also very strong, fitted closely to each other, and planked with oak. Underneath this deck the magazines, shell-rooms, and store-rooms, &c., are fitted up in the same manner as in ships of war. The gun or fighting deck is ventilated by air-tubes, supplied by fanners driven by supplementary or donkey engines in the engine-room. These fanners will be of great service in clearing away the smoke and keeping the atmosphere at a cooling or refreshing temperature for the men at the guns. The men appointed to keep a look-out are sheltered from shot in small round houses made of very strong plate-iron, and placed on the weather-deck. Gutta-percha tubes enable the look-outs to communicate from these houses to the pilot or steersman, the steering gear being fitted on the lower or fighting deck. The rudder is made so as to hang downward below the vessel's keel or bottom when necessary. The vessel can be moved backwards and forwards with great facility. She is propelled by a screw, worked by high-pressure horizontal engines (by Miller and Ravenhill) of about 200-horse power, supplied with steam from four remarkably strong circular boilers.

After the launch an elegant *déjeûner* was given by Mr. Samuda to a select party of friends at the Brunswick Tavern, Blackwall. Mr. Samuda took occasion, after mentioning how much he was indebted to the able assistance afforded him by Mr. Watts, the Assistant Surveyor of the Navy, and Sir Baldwin Walker, to acknowledge in a manly and generous manner his feeling of the services rendered him by the artisans in his employment, their untiring devotedness and energy in bringing this great work to perfection. The first bolt of the *Thunderbolt* was driven on the 8th of January, and on the 16th of April she was ready to be launched. Hitherto a year would have been thought but short time for such an operation.

LAUNCH OF THE FLOATING-BATTERY "THUNDERBOLT," AT MILLWALL.

THE GREAT NAVAL REVIEW:—"NO REDS."—DRAWN BY PHIZ.

## THE MARTYRS OF THE NAVAL REVIEW.

THE Rat, however, did at last begin to gnaw the Rope, the Rope was ultimately induced to hang the Butcher, after that tardy *carnifex* had in his turn proceeded to kill the Ox, and so on, until—the long chain of causation having led up to the Pig beginning to go right, as pigs will sometimes do (if only to vitiate general propositions as to their intellect) - the Old Woman got home *that night*. This was always a comfort to one, this recollection that the poor old lady, who had laid out her money with so much spirit, and had met so many difficulties in the bringing her purchase home, was at length rewarded, and slept, the same night, in the house she had swept in the morning. Everybody is not always so fortunate. Ropes, and Pigs, and Old Women naturally bring to one's mind the Naval Review, and the officials who had to mismanage arrangements, and the unlucky sufferers upon occasion of that great national festival. And it really occurs to one that we have been bestowing our sympathy in the wrong places. That the Commons should be starved was a dreadful thing, that the visit of the Lords should have been "a total failure" was afflicting, the thought of a Bishop stooping lower than even a Gig-Bishop, invented by "S. G. O." (for the Gig hierarch has a vehicle to himself), and actually entering a third-class carriage was distressing: the notion of two Judges, not only without javelin-men, but actually poking marlinspikes, or whatever they could find, into the holes of the capstan, and working as honestly as if there were no such thing as law in the world, was bewildering. Nor were the long journey, the cold morning, and the weary Waterloo-road by any means pleasant things. But, if you please, the Old Woman got home "that night." Let us spare our sympathy, and consider the painful case of those far less lucky people who did not—those who had to remain houseless and homeless, who wandered up and down the streets of Southampton and Portsmouth, who besought beds and were denied, chairs and were refused, straw in a stable and were rejected. Let us have some thought for these unfortunates who had to make two days and a night of their enjoyment, instead of crowding it into twenty-four hours. We have been weeping over the wrong people, that is certain, so let us make amends.

Even, too, where there was a mitigated affliction, that is to say where people, left behind in Hampshire, had not to spend their night under the sky, but did find some sort of roosting-places, their condition would not seem, informs us that he secured a bed, and paid 8 guineas; but when he came to claim his repose there was "some mistake." Some other gentleman had obtained his couch, and the landlady declined the responsibility of dealing with the intruder as Bartholomew and his two friends, in the nursery rhyme, served Matthew and his three companions who had come to bed with their garments on. So our correspondent sat in a stiff-backed chair in a kitchen, and there was no return of his guinea. Another friend apprises us that he passed the night on a billiard-table, and had nightmare visions (prompted by the vile Portsmouth brandy), that the commander of the fleet was trying "to pocket" him with the bowsprit of a man-of-war, but that he made a "cannon" with the Nab Buoy. There is a statement, which we disbelieve, of a gentleman having sat until daylight in an old clock; and of another who would have slept most comfortably in a manger, but for his apprehensions of being devoured, towards morning, by a cow that was then to come in to be

THE GREAT NAVAL REVIEW:—"NO REDS."—DRAWN BY PHIZ.

milked. Lucky were those who by early application and liberal bribery secured anything like a bed—very malicious in his joy was one man who apprises us that he had just obtained a bed for five shillings, had looked his door, and taken possession, when he heard the "touter" for the house enter and tell the landlady that he had got two foreigners to offer a guinea for the very same accommodation. This, however, was a revenge bearing no proportion to the general misadventure and extortion.

What the poor ladies did that night, in their desolation, it is hard to say. You cannot well put *them* into mangers, and clocks, and the like impromptu berths. Some of them—many, we will hope—got beds; but it is an authentic fact that while black-whiskered men, of large size, were ensconced between sheets, and making noises as if they were all candidates for that celebrated town in Essex called Great Snoring, ladies were sitting, disconsolate, on the stairs leading to the bed-rooms of the unfeeling monsters. The householders did their utmost, but even an extra guinea cannot make a house elastic, or increase the number of its *cubicula*. The children of Hampshire suffered that night; they were taken out of cots, and cribs, and even cradles, and thrust, let no one ask where, that the London ladies might occupy their places; but still the houses overflowed, and the hydraulic press alone could have packed those who sought for shelter. Said we not rightly that our sympathies had been misdirected in the case of the Review unfortunates? As Miss Landon says:—

> O pity not those who in railways installing
> Themselves, to the Waterloo station had fled—
> Mourn rather for people who ran about bawling
> And could not get beds at a guinea a head!

### CALENDAR FOR THE WEEK.

SUNDAY, May 11.—Whit Sunday. Perceval shot by Bellingham, 1812.
MONDAY, 12.—Whit Monday.
TUESDAY, 13.—Whit Tuesday. Battle of Langside, 1568.
WEDNESDAY, 14.—Oxford Term begins.
THURSDAY, 15.—Daniel O'Connell died, 1847.
FRIDAY, 16.—Mary Queen of Scots crossed the Solway, 1568.
SATURDAY, 17.—Talleyrand died, 1838. Dr. Jenner born, 1749.

## PICTURES FROM THE EXHIBITIONS.

Next week, MAY 17, we shall continue our Illustrations from the Royal Academy and Water-Colour Societies' Exhibitions

## THE GREAT NAVAL REVIEW

Illustrations will include a Large Engraving of the Gun-Boats passing through the Line of Battle Ships.

The Number will also contain Illustrations of the Grand Peace Fête at the Crystal Palace, &c., &c.

# THE ILLUSTRATED LONDON NEWS.

*LONDON, SATURDAY, MAY 10, 1856.*

It becomes daily more evident that the affairs of Italy will ere many months, or even weeks, have elapsed engross the attention of Europe. Lord Palmerston most truly urged at the Lord Mayor's banquet on Wednesday evening, that "our noble ally the King of Sardinia has raised his country to a level with the greatest Powers of Europe, not in the extent of his territory, but in the honour which he has done to the great principles which prescribe his conduct—principles which not only honour him, but the nation he so worthily governs." This testimony, so eloquently and so justly rendered, will increase the desire felt by Romans, Neapolitans, Tuscans, and Sicilians, to imitate the example of the Sardinians, and to lay the foundations of wise constitutional government within their territories. Sardinia has not taken part in vain in the battles of the Crimea. She did not fight side by side with Great Britain merely to aid in the establishment of Turkish independence. Her Government had wider and nobler motives;—to set an example to Italy, and to prove to the whole world, not only that Italians are able to govern themselves, but to aid in maintaining the general law and equilibrium of Europe. The true policy for England to pursue with regard to Italy is to recommend that the Italians should be left to themselves: to urge upon the Governments of Austria and France that they should immediately withdraw their legions from the Italian soil, and allow all Italians to choose their own form of government, as the Sardinians have done. The people of Great Britain have no desire to interfere in the affairs of Italy. They think it neither their own right, nor that of France or Austria, to dictate to any portion of the Italian people what system of government they shall or shall not adopt; and would hail with pleasure any statement to that effect from Lord Palmerston or Lord Clarendon. The presence of the Austrians in the Legations, and of the French in Rome, is a standing insult and menace to the Italians of every portion of the peninsula; and, whilst it continues, it is impossible but that Italy should remain in a state of ferment and dissatisfaction. The words of Lord Palmerston will be as carefully weighed in Rome and Milan as in Turin; and in those cities, as well as in Naples and Palermo, his tribute to the merit and the glory of Sardinia will not fall on barren soil. It will touch a chord in the popular heart of Italy, and help to awaken, in due time, the efforts as well as the aspirations which shall make Italy free and independent. As the Viscount de Persigny said, at the same banquet at which Lord Palmerston spoke, "those are false economic doctrines which found the prosperity of any country on the decay and ruin of its neighbours. We recognise in our time the principle that the wealth of a nation is labour—that commerce only flourishes among those who produce and interchange their material wealth; and, in consequence of this doctrine, we acknowledge the fact that the industrial and commercial activity of our neighbours is as essential to our prosperity as our own." Judged by these principles, England and France are as much interested in the prosperity of Italy as in that of any other portion of Europe or of their own territory; but how can Italy prosper under its present political system—a system detested by the people, and only maintained by foreign bayonets? Events will no doubt furnish a speedy answer to the question.

We last week briefly called attention to the New Maritime Law which the Plenipotentiaries established by a simple declaration at the supplemental sittings of the Paris Congress. We now feel it our duty to dilate somewhat more fully upon this transaction, which seems to us calculated to inflict a damaging blow upon the naval power of Great Britain, as well as to cast a slur upon those principles which guided her in her international policy in the days of her proudest supremacy.

Although Englishmen may have been content to expect little glory or advantage from the terms of a Peace hurriedly brought about, to close a war never cordially supported where it should most have received support, we are sure that they never contemplated it to be possible that, as an appendix to that Peace, they should be called upon to yield up belligerent rights which they had proudly maintained in opposition to the world during a contest of nearly half a century's duration—rights essential to our success in war; and that this sacrifice would be made, not as a free concession, upon terms, but in compliance with an ordonnance dictated seventy years ago by that very Russia whose aggressive policy we have—at how enormous a sacrifice we tremble to think of—temporarily checked. Yet such is the case; and, although British statesmen endeavour to blink the humiliating features of the case, Russia will not be slow to inform her serfs of this triumph of her will this solemn recognition of the "civilising policy" of her Czars.

The common rule of war is that a belligerent has a right to do any thing and every thing that may damage his foe; to seize or destroy his goods wherever he may find them; and to interrupt his commerce and all operations which might increase his means, or tend to his advantage. As a simple and strictly logical consequence, it has been held as unquestionably within the privilege of the belligerent to interrupt the commerce of neutrals with his enemy; but this principle has very often, by consent or arrangement, been relaxed. In modern times it has only been enforced in respect of places under siege or blockade, except under pressure of extreme circumstances, as in 1756, when this country, being at war with France, and having utterly destroyed the naval force of that country, prevented the Dutch from carrying on the trade with the French colonies, the advantage of which had previously been enjoyed by the French marine exclusively. In former times, and particularly by the French, it was held during a long course of years that an enemy's goods being found upon a friendly or neutral ship confiscated the whole "equipage;" but this has never been recognised as a general rule; and Great Britain, the first maritime Power in the world, and, consequently, the one most interested in the assertion of belligerent rights, has for a long period been content with confiscating the ship of an enemy and the goods of an enemy found upon neutral ships. She has, also, during the same period, so far relaxed her strict right as to consent that the effects of neutrals (contraband of war excepted) on board an enemy's ship should be exempt from confiscation.

Such was the state of Maritime Law, common to all nations, and uninterruptedly recognised, without gainsay, compunction, or reservation, by every State in the Old and New World until a little more than a century ago. It is a curious circumstance, though one sometimes lost sight of by historians amid the bustle of subsequent events, that Prussia—the then new and small kingdom of Prussia—was the first State which ever disputed the practice of confiscating an enemy's goods under a neutral flag, and insisted upon the contrary doctrine, that the neutral flag should cover the merchandise; and the occasion of this pretension is not a little singular. When Silesia was ceded by Maria Theresa to Frederic II. (by the Treaty of Dresden, 1745) it was upon condition that the latter should take it subject to certain mortgages to British subjects, for moneys lent to the Austrian Government. This agreement, however, his Prussian Majesty (whom no contract could ever bind) refused to abide by, alleging as his excuse that during the war his subjects had sustained great losses at sea from English cruisers, that is of enemy's goods seized under their flag; an allegation which inferentially opened up the whole question of Maritime Law, and the procedure under it.

The memorial of the King of Prussia was referred (1753) to four able jurists, two of them civilians, viz. Sir George Lee, Dr. Paul, Sir Dudley Ryder, and Mr. Murray (afterwards Lord Mansfield) who, in reply, made a report to the Crown, which Montesquieu pronounced to be unanswerable: *réponse sans réplique*. The doctrines laid down in this able report were subsequently emphatically vindicated by Mr. Pitt in his speech on the state of the nation (1801), and by Lord Liverpool in a work which he published on the subject.

The matter was not again heard of until 1780, when Russia, influenced by France and Prussia, promulgated the extraordinary, and until then unheard-of, doctrine of the "armed neutrality." The principal features in this system (and the only ones with which we shall now meddle) were two assertions, that "the neutral flag protects the goods of the enemy, with the exception of articles contraband of war," and a restriction of the term "contraband of war" to the mere instruments and missiles of war excluding stores necessary for naval equipment. Nothing more emphatically marks the inevitable tendency of this proceeding than the manner in which it is spoken of by foreign and British authorities respectively. Whilst the former (including Martens, Heeren, Koch, and Thiers) point to it as a subject for congratulation, and as a righteous interference with exorbitant pretensions on the part of this country, British writers and statesmen have never spoken of it in any other sense than as a studied scheme to destroy, or fatally impair, our power, upon our own prescriptive element. Adolphus, in his "Reign of George III., down to the Peace of Paris, 1783," and in whom, therefore, the feelings excited by this transaction were fresh at the time of writing, thus tells the story —

> This compact originated in the intrigues of France, and the desire of that Government to embroil Great Britain with new enemies, and distract her proceedings by uncertainty of rights, and the discussion of captions and unusual claims. Influenced by French counsels, the Spaniards, under pretence of blockading Gibraltar, had refused to admit into the Mediterranean some Russian vessels; the Empress indignantly meditated measures of security against the repetition of such an outrage, when the King of Prussia [the same who repudiated the claims of the Silesian mortgagees, and made the vain appeal of 1753], apprised of her sentiments through the medium of Count Panin, her Minister for Foreign Affairs, used every effort to direct them against the interests of England. The views of Frederic were seconded by Panin, who equally hated Great Britain.

So seriously did the British Government appreciate the dangers with which they were threatened by this new doctrine, and the confederacy of States by which it would probably be supported, that they deputed Mr. Harris (the ancestor of the present Earl of Malmesbury) to endeavour to dissuade the Empress Catherine II. from her purpose; but in the end of a long conversation, maintained with great, almost humiliating, earnestness on the one side, and with *hauteur* and womanly *finesse* on the other, the declaration of "armed neutrality" was persisted in.

"*All the enemies of England*," we quote again from Mr. Adolphus, "*received this declaration with enthusiastic applause.* The neutral Powers extolled its wisdom, justice, and magnanimity. Sweden alone, under the influence of France, requested from the Court of St. Petersburg some explanations of its tendency which were calculated to render the terms additionally hostile." The same writer adds, what we should have thought would be patent now, as it was then, to all the friends and all the foes of our essentially maritime Power, that "such a war as that wherein Great Britain was engaged" (such a war, indeed, as is the only kind of war she can ever legitimately undertake) "must be carried on with manifest disadvantage if she is prevented from depriving the enemy of those succours on which the success of their naval operations so materially depends."

Passing over the details of the fierce struggles which have followed upon the assertion of this new doctrine, it will be sufficient to say, that Great Britain nobly and triumphantly asserted her independent belligerent rights as a nation—rights which are now (or were, until the late Congress of Paris) the common patrimony of all nations; rights which still belong to all those maritime States which have not acceded to the declaration of the 8th of April last. And of the significancy of the position and the vital importance of the issues left unprejudiced by the great conflicts of the last century, what says Heeren?—"Uncertain as was the issue, *Russia shone as the support, and centre-point of the new system* around which all neutrals rallied." Though the necessity of this Power died with the return of peace, *every naval war must necessarily renew it; and it will depend solely on the situation of the kingdoms engaged whether, and in what manner, this new political engine shall be employed.*"

That "political engine" of Russia's planning that "new system," of which she "shone" as the centre-point, and which she endeavoured to force upon us by a ukase in 1780—has been accepted, and confirmed by a declaration of the Paris Congress, 1856. That important principle of international law which we fought for, and maintained against a world in arms, we now yield to the blandishments of diplomacy. What British sea-kings bled for in the days of a Parker, Hood, and Nelson, we voluntarily sign away, at the bidding of a Walewski and an Orloff—representatives of the only two European maritime Powers which have felt, and have still reason to attach importance to, our maritime supremacy. The example of the man who tightly grasped his cloak in spite of all the pelting of the pitiless storm, but afterwards abandoned it under the influence of a treacherous April sun, has been signally and deplorably imitated in this "untoward" transaction.

Something has been said in defence of this new maritime law on the ground of humanity and civilisation. It is right, it is alleged, to interfere as little as possible with the peaceful pursuits of nations even amidst the destructive fury of war. But it should be recollected that successful commerce fills the coffers of the enemy, and supplies him with means to protract what would otherwise be a hopeless struggle. And during the continuance of this struggle how many weak and defenceless persons suffer unnecessarily and uncared for! The British Government in declaring war in 1854 voluntarily, during pleasure, waived the belligerent rights in the very matters now spoken of; and what was the consequence? Wretched villages were bombarded, whole communities of people were destroyed on the coasts of the Baltic and the Sea of Azoff, and ruin and misery were spread amongst the poor and helpless; whilst Russian produce was systematically exported and dealt in under the very nose of the Board of Admiralty, and, indeed, in some cases by the Admiralty itself. In war impartial and relentless severity are the truest mercy and humanity.

We could say much more on this deeply interesting subject; but defer it for the present.

LORD WODEHOUSE, who has filled the office of Under Secretary for Foreign Affairs during the last three years, has been appointed her Majesty's Plenipotentiary at the Court of St. Petersburg.

THE PURCHASE SYSTEM IN THE ARMY.—The following gentlemen will, we have reason to believe, form the Royal Commission which has been appointed to consider the working of the purchase system in the Army.—The Duke of Somerset, the Right Hon. Edward Ellice, Mr. Sidney Herbert, Lord Stanley, Mr. George Carr Glyn, Sir De Lacy Evans, Lieutenant-General Wynyard, Sir Henry Bentinck, Sir Harry Jones, and Colonel Wetherall.—*Globe.*

## NOTES OF THE WEEK.

THE two "great" debates, upon the concluding event of the war and the Treaty of Peace, have taken place, and, in a Parliamentary sense, have strengthened the hands of the Government. It is now no secret that the Kars attack was designedly made in a way which precluded all chance of a party success, and it is asserted that the terms of the resolution moved by Mr. Whiteside, and which, could it have been carried, would have involved the overthrow of the Ministry, were studiously framed by the noble leader of Opposition with the view of enabling the party to explode upon the question—for the sake of the hustings—without bringing those hustings any nearer. It is remarkable that, though Mr. Disraeli declared it was the duty of the Opposition to be united on the question, it went into the lobby but 178 strong. The Peace debates in both Houses have had interest from the speakers whom they called up, rather than from anything novel which those speakers had to say. Two noblemen, of varied accomplishement and elegant mind—Lords Ellesmere and Glenelg—took the initiative in the Senate; while in the House of Representatives Mr. Denison and Mr. Henry Herbert were very fitly selected to pronounce orations in honour of peace. Lord Malmesbury let off his Kars speech, which circumstances over which he had no control had prevented his delivering on the Kars occasion. Lords Clarendon and Cowley expressed, with a becoming modesty, their conviction that their treaty was a masterpiece; and Lord Derby's dissent from "joy and satisfaction," and proposal that the treaty should be described as one we were ready "to put up with," will probably be approved by a majority in the country. In the Commons the Peelites gave in their adherence—Mr. Gladstone, let us add, doing himself honour by speaking strongly against the Walewski theory, that the Belgian press requires other coercion than that provided by law. The Lords, as usual, showed themselves more graceful orators than the Commons; and indeed the Opposition became quite scholastic, Lord Derby correcting Lord Ellesmere for "extorting" admiration that was "ungrudged," and Lord Malmesbury criticising the infelicitous anti-climax of "joy and satisfaction." Finally, after one night's discussion in the Lords and two in the Commons, the congratulatory addresses on the Peace were unanimously carried; and now all is over, Turkey is saved, England has made a present to the world of her maritime supremacy—a bagatelle given, as little presents are, in memory of agreeable meetings—the fireworks are being made as fast as possible, and every day brings us some new proof that the Russians are the noblest fellows in the universe. Let us say, quoting as much of a celebrated passage in Cowper as it would be politic and polite just now to cite—

> A brave man bears no malice, but forgets
> At once, in peace, the injuries of war.

If ever an Englishman was justified in the meteorological observations which serve him instead of conversation, it is in the dismal beginning of this merry, merry month of May, with the east winds roaring, the thermometer down to within a few degrees of freezing, and seagulls in the park. The poet's complaint, when writing an ode to the month, "I had scarcely begun 'Hail! May,' when, didn't it?" has been again justified. The sun has been an utter stranger, and the rain a very pertinacious visitor. So sombre, and chilly, and wretched a season people say they do not recollect; and we speculate whether we have not been sleeping through summer and have not reached the end of October. The east wind, amid all the abuse it has had to carry away "into thin air," will probably be charged with causing the curious accident in the West India Docks on Tuesday night, when one of the enormous lock-gates was swept away, and a mass of craft washed out into the river, with terrible damage. But it is also asserted that the wisdom and care which—when Governments are to be abused—are stated to be so eminently characteristic of commercial bodies, may have been a little less preternaturally wide awake than usual, for it is said that one pair of gates had been removed for repairs, and all the valuable property left to the protection of a single pair, and to the watchfulness of an official who "neglected" (can anybody not in Government employ neglect anything?) to open the sluice and diminish the pressure, when the tide was receding. The scene must have been a remarkable almost one appalling—one as the roaring flood rushed down with its various victims.

Law has disported itself after its fashion this week, and its ministers have twice had the pleasure of defeating what certainly appears to be justice. A fellow was convicted, under the Rogue and Vagabond Act, for card-playing in a railway carriage on the Brighton line, and sent to Lewes gaol. He hires a barrister, who comes to the Court of Exchequer and demands his client's freedom, on the ground that a railway carriage is not "an open and public place." If, instead of selecting the very place where he could best make his card devices available for plunder, he had taken an open and public place, say beside one of the Trafalgar-square fountains, or in St. Paul's Churchyard, our old friend Law would have been down upon him like a beadle. But as it was he gets off on the ground that, though he was notoriously taken at his work during the journey, there was nothing before Judges Alderson, Martin, and Bramwell to "show that the carriage might not have been shunted off the line into a shed," which would not have been a public place. So the three Judges—to whom society pays some £12,000 a year to protect her, as she fancies—hasten to discharge the card-sharper. Is it wonderful that, with such feats of law before them, men sometimes take the law into their own hands? We have no doubt—indeed we know—that the Judges were quite right, according to the system; but what about the system? And why the railway porter or constable that dragged the fellow out of the carriage must have grinned, had he been in the Court of Exchequer, to hear that perhaps the offence was committed in a shed! The other case was one in which a magistrate, a lady, and a group of police were engaged—so the reader may be pretty sure which way the affair went. A pretty, fragile girl of sixteen is brutally beaten and bruised by a policeman on the peace proclamation day, for trying to get to some friends from whom she has been separated by the crowd. She swears distinctly to the man, but his comrades swear that she is wrong, and the magistrate, Mr. Jardine, prefers to believe the "force," whose scrupulous accuracy in matters of oaths is so remarkable, instead of believing the person in whose memory his appearance was fixed by a cruel injury, and who actually fainted when she again saw, as she states, the man who beat her. So we have to congratulate Bow-street and the Exchequer upon having had two opportunities of materially raising the law in the opinion of the public. The Judges did their work most artistically, but the police magistrate most boldly.

"Respectable" people want to know how they are to see the fireworks on the 29th without mixing with the "rabble and somebody proposes that Kensington-gardens shall be set apart as reserved seats, to which a payment shall admit. We incline to think that the Executive had better not do anything of the kind. This show is for the people, who have contributed very willingly to the war, and borne its burdens, without hostile demonstration, and the exhibition should be freely conceded to them without exclusive restrictions. The parks are large enough for all to see who may wish to be present, even without the horrible necessity of standing next to an artisan, or having one's ears polluted by the exultations of his children. The people, moreover, will behave themselves [illegible], but what the Executive ought to give its chief attention to is the protection of the metropolis from the thieves and burglars who [illegible] during the peace rejoicings. The police authorities [illegible] and Sunday riots—are not intellectually adequate to their work, and somebody must think for them. This is Sir George Grey's business. It is not to be expected that a large proportion of the householders of London will have the self-denial to remain at home on a night when such a spectacle draws them; and, indeed, when their presence with their families is necessary to the comfort of the latter. It is not to be expected that servants will willingly submit to be deprived of the sight, or that they will remain in charge of their employers' house long after those employers have turned the corner of the street. The police must do its duty that night; and every householder who intends leaving his residence empty should notify this at the next station. The military might be used for the mere purpose of ordinary constabulary, for preventing rushes in the park, and generally preserving order; and upon an occasion like this, when the services of the soldiers are being honoured, their presence would be welcome to the people. But let the police have some brains to organise them, for they will have to contend with exceedingly clever fellows on the other side. A good many people will remember that night besides those who see the fireworks.

ERRATUM.—In our reference last week to the Provident Institution, in St. Martin's-lane, upon which the recent foolish run was made, we accidentally gave it the prefix of "National," which belongs to an excellent Life Assurance office at the other end of London.

*The range of temperature during the week* was 20·8°.

*The Weather*.—On the 30th, showery. May 1st, showers of rain and hail. On 2nd to 6th, fine.

*The direction of the wind* was—on April 30th, W, becoming N W at 3h. 45m a.m., N N W. at 5h 45m a.m., N at 7h a.m., N N E. at 1h p.m., N W at 5h 15m p.m., N at 8h a.m. p.m., N N E at 9h p.m., N E at 7h 15m p.m., N E at 9h p.m.; was N E and E N E till 2h 15m p.m. on 1st of May, then N E. and N N E. becoming N at 10h p.m., N W at 1h a.m. 2nd, N at 8h a.m., N N W at 4h p.m., N W at 12h a.m. on 3rd, N at 8h a.m., becoming N N E at 7h a.m. on the 4th, N E at 11h a.m., N N E. at 6h p.m., N at 9h p.m., N E at 5h, E at 1h a.m., E N E at 11h a.m., N E at 1h p.m., N E. at 12h p.m., E at 7h p.m., E N E at 6h a.m. on 5th, S E at 7h a.m., E N E at 11h a.m., S E at 12h p.m., E.S.E. at 1h p.m., E. at 6h p.m., in which quarter it remained.

6th.—Nightingales singing.

Frosts occurred on the 30th April, and on the 2nd, 3rd, 5th, and 6th May.

THE MANCHESTER PEACE PARTY.—A meeting of the Manchester City Council was held on Monday last, at which an address was proposed congratulating her Majesty on the conclusion of peace. The representatives of the Peace party in the Council concurred in the object of the address, but objected to expressions in the document acknowledging the "justice and necessity of the war," and speaking of "the spirit of aggression and aggrandisement" which led to the war as having "been humanly chastised. An amendment proposing to leave out those expressions was negatived by a majority of 33 to 9.

HEALTH OF MR. BRIGHT, M.P.—Mr. Bright's medical attendant writes to a contemporary:—"I am glad in being able to state that all the unfavourable symptoms under which Mr. Bright laboured have disappeared, and that his health is now such that I have recommended him to pass the present month in the highlands of Scotland, and the following in Switzerland, when, I have no doubt, he will return home as capable as formerly for his arduous duties."

THE Cheltenham election has terminated in the return of the Liberal candidate, Captain Berkeley, by 841 votes to 655 given for his Conservative opponent, Mr. Hallewell.

DEATH OF THE WIDOW OF HENRY BELL.—On the 1st of May Mrs. Bell, widow of Henry Bell, the man who first propelled a vessel by steam in British waters, died at the Baths Hotel, Helensburgh, on the Clyde, at the advanced age of eighty-six. She had survived her celebrated husband for upwards of twenty-five years.

THE SCOTCH MINERS' STRIKE.—On Saturday afternoon a meeting of about two thousand of the colliers of Edinburgh and Haddington took place on Musselburgh Links. Mr. James Simpson, a delegate from Falkirk, said that the strike had now lasted for eight weeks, and that the men were undergoing the greatest miseries and hardships, but that they were determined not to yield till they got 5s. a day. Their masters were becoming lords at their expense, and if the men stood out, the whole of Scotland joining in the strike, the masters must give in. He strongly urged the miners present to give up work. The chairman then proposed that a meeting of delegates from the different mines in Midlothian and Haddington should be held at Dalkeith, on Wednesday, to give in reports as to whether they were prepared to join the strike. This was agreed to. The assemblage separated quietly about three o'clock. There was a general meeting of colliers from the Alloa, Clackmannan, Coalsnaughton, and Shearsdale works, on Wednesday. David Baxter, a delegate from Bathgate, addressed them, asking them to strike till their fellow-workmen got 5s. a day from their employers. After a long discussion the men refused to strike.—*Scotsman*.

### THE FALKLAND ISLANDS.

*(To the Editor of the* ILLUSTRATED LONDON NEWS.)

43, Southampton-row, Russell-square, London,
April 24th, 1856.

SIR,—Having just seen in your paper of the 19th instant an article, accompanied by some sketches, on the Falkland Islands, for which you say you are indebted to the courtesy of the late Governor of those Islands, I beg leave to ask you upon what grounds, or with what intention, my name has been so unwarrantably handled therein, especially as I am at present in London, and in correspondence with the present Government, for the purpose of claiming British protection and justice against the arbitrary acts and misrepresentations of certain British authorities, which have been the cause of my remaining, for these last eighteen years, dispossessed of my private property in the East Falkland Islands, after an honorable possession of very many years previous. It cannot, therefore, be expected that I shall after so many years of unmerited grievances, pass over in silence my new misrepresentations or *ex parte* statements, which, if left uncontradicted, may have a tendency to injure me in the estimation of the public, as I possess ample evidence to convince *every impartial man* that I was perfectly justified in pursuing the course I did with regard to the Falkland Islands.

I trust to your impartiality to insert this letter in your next number, and am respectfully, Sir, your most obedient servant, LEWIS VERNET

PHOTOGRAPHS OF EMINENT MEN.—Mr. Mayall, the photographic artist, has just opened a new gallery of sun-pictures, at 226, Regent-street. During the past year Mr. Mayall has taken photographic portraits of a great number of distinguished and well-known individuals, commencing with her Majesty, Prince Albert, and the Royal family; and Mr. Mayall's art has been called into requisition by most of the leading members of the aristocracy. The whole of the Cabinet Ministers have followed, as well as many independent members of the two Houses of Parliament. He has also taken the portraits of many officers who have distinguished themselves in the late war

GENEROUS ACT OF ROYAL MERCY.—We have great pleasure in announcing that her Majesty, wishing to mark the conclusion of peace by an act of mercy, has given orders that a free and full pardon shall be granted to all persons under sentence for political offences. Consequently, Frost and his associates, convicted of treason in 1839, and subsequently transported to Australia, will be set at liberty; and Mr. Smith O'Brien also will be permitted to return to his native country. An exception is made in the case of those of the Irish convicts who so unworthily broke their parole and fled to America.

ROYAL CREMORNE GARDENS.—The proprietor of this popular resort has resolved to commence his season with a [illegible]. In the Ashburnham property a pavilion 330 feet by 100 feet, [illegible] of containing 20,000 persons, has been erected, and will for the future be dedicated to a display of American flowers. In the centre of leading novelties are a colossal pine [illegible] with a Swiss hotel built in the foreground, a lofty [illegible] &c. The "Diavoli" are appointed to the circus. So that reason to believe Monday will be the commencement of a season

### CHURCH, UNIVERSITIES, &c.

APPOINTMENTS.—*Rectories*: The Rev. S. Meyrick Higgins, to Icomb, near Stow-on-the-Wold. The Rev. Geo. Mansfield, to All-hallows-the-Great with All-hallows-the-Less, London. *Vicarage*: The Rev. C. Theobald, to Grays Thurrock, Essex. *Incumbencies*: The Rev. G. Pettitt, to St. Jude's Church, Birmingham. The Rev. H. Cope, to the new district church of St. Mark, Nottingham. The Rev. J. F. Green to St. Margaret's Church, Ward End, near Birmingham.

LAST week the inhabitants of St. George, Bloomsbury, presented to the newly-appointed Bishop of Carlisle a testimonial of plate, valued at £800, in recognition of his Lordship's services in the cause of education while officiating as Rector of St. George's, Bloomsbury.

TESTIMONIAL.—The Rev. Henry Buttenshaw, late Curate of St. Mary's and Sub-Curate of Dymchurch, Kent, now Curate of Hitchin Hertfordshire, has been presented with a silver pocket Communion service upon his leaving, from the parishioners; and a handsome sermon-cover from the children of the National School, for his kindness to them.

"THE RED BRIGADE."—(To the Editor of the ILLUSTRATED LONDON NEWS.)—I am a shoeblack, one of the "Reds," venturing to beg a few lines to rectify a statement in your last week's paper. The average strength of our division of the "Brigade" is fifty-seven, and not "seven strong," as you said in your "Thoughts in Thoroughfares." I say our division, for London (in a shoeblack sense) is divided into three parts, of which the red frocks inhabit one, the yellow tunics another, and the blue jackets a third. These differ but little either in language, institutions, or laws. Bishopsgate-street separates the reds and blues (we had at one time a boundary difficulty with the latter), while the Thames divides both from the yellows. Of these the reds are the strongest, the others numbering on an average about thirty-five a piece. As to our respectability, just look at what we earn—First-class boys (at the best stations), 8s.; second-class, 3s. 6d. a day. Thus much for the "Brigade," our sworn brothers in blacking. As to the free lances of the craft, the "young barbarians of your Correspondent, we agree with the remarks of the committee in their report. We wish a clear stage and no favour. Forgive this intrusion, Sir. I owe it to this society that I am not in rags.

## THE ROYAL PROCLAMATIONS OF PEACE AND FOR A DAY OF THANKSGIVING AT EDINBURGH.

YESTERDAY week, the 2nd instant, these Proclamations were read at the Market-cross of Edinburgh, and the County-buildings, Leith. The weather was fair, with occasional sunshine, and afforded all that could be desired for the display. About the Cross the crowd was very dense. Every window commanding a view of the proceedings was filled, large numbers crowded the balcony in front of the Royal Exchange, and the roof of St. Giles's Church was occupied by the boys of George Heriot's Hospital, who displayed a variety of banners and flags. Altogether there could not have been less than 10,000 people assembled in the High-street. The 7th Dragoon Guards formed the guard of honour, and lined the street from the County-buildings to the porch of the High Church. Precisely at twelve o'clock, the procession, consisting of Sheriff Gordon, the Sheriff-Clerk, and the Heralds and Pursuivants, moved from the County-buildings to the Cross, joined at the High Church by the Lord Provost, Magistrates, and Council in their robes, guarded by a body of high constables. Both Proclamations were read by Mr. Anderson, Marchmont Herald—the Peace Proclamation being responded by Mr. Robert Hamilton, Kintyre Pursuivant, and the Thanksgiving Proclamation by Mr. James Sinclair, Unicorn Pursuivant. The band of the Dragoons having played "God Save the Queen," the Heraldic and Sheriffs' department of the procession proceeded in carriages to Leith, where the proclamations were also read, as at Edinburgh. The principal features on the route were the great crowds assembled on the North Bridge, in front of the Register-house, and along Leith-street. At the County-buildings, Leith, the Provost, Magistrates, and Council of the burgh met the Sheriffs and Heralds, and conducted them to the balcony over the principal entrance to the Court-house. The crowd was not very large—the Heralds having arrived before the time indicated in the programme. The Provost ordered the police and military to retire and allow free access to the populace up to the walls of the building, for which he got several rounds of hearty applause. At the conclusion of the proceedings the Provost proposed three cheers for the Queen, which was enthusiastically responded to.

## PROCLAMATION OF PEACE IN DUBLIN.

"MEAGRE, motley, and slovenly" are the epithets justly used by the *Times* in recording the mode in which the people, or rather the herds, of England made the Proclamation of Peace in the streets of London. It was not so in Dublin. Peace was there proclaimed on Friday, the 2nd of May, with all the pomp and show which could tend to act upon and harmonise with public enthusiasm. The soldiers and heralds—the country retinue—the gorgeous trappings and the brilliant decorations—all passed off to admiration. Not only were the leading streets of the handsome city of Dublin, so admirably adapted for sight-seeing and sight-showing, densely thronged by the living masses who poured out from all quarters to participate in the joyful ceremony, but every window and balcony from which the pageant or the procession could be seen, and even the roofs of the houses, were crowded by thousands of spectators. The windows and balconies especially were occupied by a brilliant and numerous array of ladies. The troops numbered at least seven thousand. The weather was most propitious, and the whole formed a magnificent spectacle.

From an early hour the military composing the various guards, with detachments from all the cavalry regiments in garrison, drew up in double line on the Esplanade before the Royal Barracks, under the command of Major-General Cochrane. At precisely a quarter to eleven o'clock the Lord Lieutenant, escorted by the entire regiment of the 16th Lancers, arrived at the Esplanade; he was received with presented arms. On his Excellency taking up a position in front of the troops the bands of two militia regiments joined and defiled before him, to the air of "The Tight Little Island." His Excellency was mounted on a fine bay charger with magnificent housings. He was frequently cheered during the course of the day. When his Excellency had inspected the troops drawn up in the Esplanade, a procession was formed of the cavalry, which proceeded at once to the Mansion House, where the Lord Mayor, the High Sheriff, the Ulster King of Arms, the Heralds, and the Corporation, were waiting to receive the Lord Lieutenant. Sir Bernard Burke, Ulster King of Arms, was gorgeously attired, and the costume appertaining to his knightly and time-honoured office deserves especial mention. The chief and distinctive feature of his dress was the "tabard" or vestment of the Queen's Master of Heraldry and King of Arms in Ireland." It consists of a loosely-fitting satin robe, divided into various compartments of white, purple, and crimson, each compartment being embroidered with devices in gold representing the Royal arms of England and the various knightly orders appertaining to the British Crown. The coat of arms worn by Sir Bernard Burke differed in nothing from the original tabard devised and presented by King Henry VIII. when he originated the office of Ulster King in Ireland. Sir Bernard bore in his hand the ivory tipped sceptre of his office, and he wore the collar of SS, and the blue ribbon and badge of the Order of St. Patrick.

M. de Burgraff, the French Consul, accompanied by Captain de Mar, Captain Potter, and Enseigne de Grolniey, of the French Navy, had, by special invitation, a place in the procession, immediately contiguous to the Lord Mayor, and during the day the Lord Lieutenant showed them marked attention.

On the arrival of his Excellency and suite at the Mansion House, a procession was formed, and moved on in the direction of the Castle, in the following order:

Two Cavalry Regiments.
The Marshal of Dublin with his Truncheon.
Kettle Drums and Trumpets.
Heralds.
Ulster King of Arms,
In an Open Carriage with Four White Horses, accompanied by the
Right Worshipful the Lord Mayor of Dublin.
An Escort of Cavalry.
The Lord Mayor with Sword and Mace.
The Recorder and Aldermen.
The Town Council.
City Magistrates
An Escort of Cavalry.
His Excellency the Lord Lieutenant and Suite.
An Escort of Cavalry.

This brilliant cortège went its way through files of soldiers, and crowds of civilians, to the Castle. Here, in the Presence Chamber, all the Judges, the Lord Chancellor, the Master of the Rolls the Right Hon. Robert Lowe, the Under-Secretary Col. Larcom, and other official dignitaries were assembled. Ulster, with the Heralds, and the Viceroy-at-Arms [illegible], ascended to the [illegible] balcony, and a call having been thrice sounded, Athlone Pursuivant commanded silence, and the Queen's Proclamation of [illegible] was read aloud by Ulster King of Arms. "God Save the Queen" was shouted, and the bands then struck up and continued to play until

THE READING OF THE ROYAL PROCLAMATION OF PEACE, AT DUBLIN.

the procession, having been re-formed, left the Castle in the same order as before for Sackville street, where proclamation was again made by Ulster. After this his Excellency returned to the Castle, and Ulster, and his attendant Heralds, and the Corporation, proceeded, and made the third proclamation at the Mansion House.

So terminated this graceful heraldic pageant.

It is worthy of remark that, forty-one years ago, the father of the present High Sheriff of Dublin, Mr. West, filled a similar office to that which his son now fills, and actually took part, as High Sheriff of Dublin, in the proclaiming of the Peace of 1815.

At three o'clock his Excellency and suite proceeded in state to St. Patrick's Cathedral, where a full choral service was performed.

The day's proceedings were appropriately closed by a banquet given by the Lord Lieutenant at the Viceregal Lodge to all Crimean officers at present resident in or near Dublin.

THE READING OF THE ROYAL PROCLAMATIONS OF PEACE AND FOR A DAY OF THANKSGIVING, AT EDINBURGH.—(SEE PRECEDING PAGE.)

THE MAY QUEEN

GOING A MAYING

## THE ELFIN MAY.

Born in the purple meet for her,
Proclaimed by hearts that beat for her,
Throned on the mosses green;
Scattering from our souls the snow
With memories of long ago,
She comes—the Elfin Queen!

A thousand fancies glance to her;
The village children dance to her
With smiles that come and part;
Their pealing voices tell of her,
Till nature feels the spell of her
And lives along the heart.

Their russet robes she flings aside;
She pranks them with a queenly pride,
Their brows with garlands wreathing:
Like chords by wandering breezes thrilled,
Their spirits are with music filled,
Touched by her tender breathing.

With loving tones they speak to her;
They lift the dimpled cheek to her
To kiss their tears away;
From arching boughs they hear her call,
While sweet rescinds the woodland shout—
"Bring home—bring home the May!"

O, fair is she at radiant noon,
Fairer beneath the freshening moon,
And beautiful alway:
Bright tears she gives when blossoms die;
Mild smiles she lives when Love is nigh—
A mortal, yet a Fay.

Mild Aneter oft hath sighed for her,
Sad April, weeping, died for her,
Disdaining other duty;
Pale Hyacinth upon the gale
Droops, as she sweeps the charméd vale,
Drowned in a dream of beauty.

Never a tendril born but blesses
Her with its twining fond caresses,
Mute bending by her spell;
Birds in her borrowed strains rejoice;
The music of her low, sweet voice
Sounds in the mountain roll.

Threading like light the forest glade,
Now in, now out, the chestnut shade,
Or hid in woodland nooks,
The squirrel's haunt she mounteth up;
Or, rocked in vain Narcissus' cup,
She bends above the brooks.

When, sly, her web Arachne weaves,
And spirits, stirring mid the leaves,
Take mortals unaware,
Where, eddying, whirl the water-rings,
Like Venus from the foam she springs—
The reed-bloom in her hair.

On buoyant wing, serene and strong,
She follows far the cuckoo's song,
Still lost and ever flying;
Till, lured along some rocky slope,
She finds at last a cheated hope
In Echo's soft replying.

Her chosen tree the roebuck knows,
As, butting at its bole, he goes
To cut his budding horns:
Both young and old shall bless the May;
But she shall give the flowers away
And dwell among the thorns.

Sorrow shall come to her full soon,
For she shall love the haughty June,
And wait—he never coming;
Or dream she hears at even-close
His voice, in murmurs to the rose,
Blent with the wild-bee's humming.

When wheels the bat his giddy ring,
And where the lithe cicadas sing,
The chafer's wings are whirring—
Where wild the fairy-grasses wave,
Proud June shall trample on her grave
The leafy forest stirring.

Why then—farewell the blithesome Fay:
Farewell the beating pulse of May
Whose charm the senses stole;
And welcome o'er the grave of spring
The butterfly upon the wing—
The glorious type of soul!

E. L. HERVEY.

## MUSIC.

Grisi made her first appearance at the Royal Italian Opera on Thursday week; and her announcement drew the fullest house of the season. She performed *Norma*, the grandest of all the characters in the répertoire, and person she is little (if at all) changed since last year, her voice retains much of its pristine power and sweetness; and her energy is unabated. She was welcomed with the old cordiality; frequently roused the enthusiasm of the audience by her noble and beautiful perform ance; and the curtain fell amidst general acclamations. She was well supported by Mdlle. Maria as *Adalgisa*, Tamberlik as *Pollio*, and Tagliafico as *Oroveso*. Tamberlik's engagement has terminated. Though he will be replaced by Mario, he will, nevertheless, be a great loss to the theatre.

Her Majesty's Theatre opens this evening, when Alboni reappears in one of her best and most favourite parts, *La Cenerentola*, supported by Calzolari, Belletti, and Zucconi.

The Orchestral Union have resumed their performances this season. Their first concert was given at the Hanover-square Rooms on Saturday morning last. It consisted of an excellent selection of orchestral pieces, including Sterndale Bennett's overture "The Naiades," Beethoven's eighth symphony, Molique's violin concerto in D minor (performed by himself), and Mellon's overture, "Heloise;" with vocal pieces by M. and Madame Gassier. The orchestra, which is under the direction of Mr. Mellon, has lost nothing of the excellence which has always distinguished it.

Professor Sterndale Bennett's second performance of classical pianoforte music was given at the Hanover-square Rooms on Tuesday evening, and as usual drew an assemblage which filled the room to the doors. The concert well deserved the name of classical, so chaste was the selection and execution. Mr. Bennett played his own well-known chamber trio, Op 26, for piano, violin, and violoncello, along with Messrs. Ganz, two able performers just arrived in London. Madame Clara Schumann, the "observed of all observers" at present, played, with Mr. Bennett, a beautiful *andante*, with variations by her husband, and likewise a selection from his pianoforte pieces *à quatre mains*. Mr. Bennett played one of the old sonatas of Dussek, as fresh and charming as if written yesterday; and (with Herr Moritz Ganz) Mendelsohn's duet in B flat for the piano and violoncello. A young contralto singer, Mdlle. Pels Leusden, made her début in England on this occasion, and interested the audience by her talent and her modesty. And a graceful song, newly composed by Mr. Bennett, "Sing, maiden, sing," was very sweetly sung by Mr. Benson.

Madame Ruderdorff had a morning concert on Thursday (last week), at the residence of the Marquis of Bresdalbane, and patronised by a host of the female aristocracy. The concert-hall was crowded by a splendid assemblage; and the performance was worthy of the audience. Madame Ruderdorff exerted her fine talents with great effect, and her sister, Mdlle. Mathilde Ruderdorff, made a very favourable impression by her sweet and unpretending style. The music was chiefly vocal; and one of the pieces was a trio and a duet by amateurs of rank—the Duke of Saxe-Coburg and the Earl of Westmoreland—both honourable to the talents of the composers. Of the instrumental pieces the most remarkable was an admirable duet of Benedict and De Beriot for the piano and violin, played by Messrs. Benedict and Sainton, with an effect which was enhanced by the magnificent tones of one of Kirkman's pianofortes. The second part of the concert consisted entirely of a selection (extremely well performed) from Costa's new oratorio of "Eli."

Mr Howard Glover, the distinguished composer, is about to open Sutton's Wells for a short season of English operatic performances. He is to be assisted by Mr. and Mrs. Sims Reeves, Mr. and Mdme. Weiss, Mr. Miranda, Miss Poole, Mr. Balfe, Mr. Benedict, and others, forming a very strong company. It is announced that Balfe's "Bohemian Girl" will be given (with additional music, for the first time in this country), and under the personal direction of the popular composer himself, who has not appeared before the London public these four years.

Mrs. Fanny Kemble's Last Readings.—On Tuesday morning this distinguished lady read the tragedy of "Othello" before a large and fashionable audience, at Willis's Rooms. This, and two other readings, one to-day and the final one next Wednesday, constitute Mrs Kemble's last readings in England. Her delivery of "Othello" was throughout glorious. She was in magnificent voice, and not only the passionate passages were illustrated by the dreadful music of her tragic thunder-tones, but there was as it were an emotional accompaniment to the ordinary poetic dialogue, which was as music to the instructed and attentive ear. *Othello* himself came out grandly, "great of heart," yet simple, tender, loving, as childhood, or truth, or wisdom, tempted indeed fatally, yet deceived only by their own purity or innocence. *Iago*, also, was a master piece—more subtle than reasonable—a "demi-devil," serpent-intellectual, and yet fiendlike. *Cassio's* drunkenness was realised with inimitable humour, while *Roderigo's* folly was shut off with extreme delicacy. *Desdemona* was beautifully represented. The death-struggle in the chamber-scene was terribly portrayed; the climax of the acting art was indeed reached. Never within our recollection were we so affected by any acting as by the reading of this play.

## *IMPERIAL PARLIAMENT.*

### HOUSE OF LORDS.—Monday.

#### THE TREATY OF PEACE.

The Address to the Crown upon the Treaty of Peace was moved by

The Earl of Ellesmere, who adverted to the various incidents of the war, and expressed his satisfaction at the arrangements entered into by the Plenipotentiaries assembled at Paris. Certain as he felt that those Plenipotentiaries had acted with the most perfect good faith—he had the utmost confidence that their exertions would result in a long continuance of peace.

Lord Glenelg seconded the motion.

The Earl of Malmesbury contended that in several parts the treaty was both an unsatisfactory one, pursued by the Government with respect to Kars and the campaign in Asia, and also to defend the conduct of Lord Stratford de Redcliffe. The objects of the war were fully accomplished by the treaty, which fully carried out the heads agreed upon at Vienna. He believed in the good faith of Russia in entering into the treaty, and had no doubt of her having every disposition to adhere to her engagements.

The Earl of Derby pointed out several objectionable points in the treaty, and referred more particularly to the articles in relation to the neutralisation of the Black Sea, and the power which Russia retained of rebuilding the forts on the eastern coast of that sea. He condemned the concession of the right of search as regarded neutral vessels, but would, nevertheless, accept the treaty, though with great reluctance, being of opinion that it was looked upon with the same feeling by the people in general. He could not admit that the treaty was either honourable to England or creditable to the British government.

Earl Granville defended the treaty and the conduct of the war by the Government.

The Earl of Aberdeen thought the treaty a wise and honourable one, though some of the details were open to objection.

Lord Cowley supported the Address.

Earl Grey, the Duke of Argyll, and Lord Campbell subsequently made some remarks, after which

The Address was agreed to.

### HOUSE OF COMMONS.—Monday.

Central America.—Lord Palmerston, in reply to Sir E. B. Lytton, said the answer had not been received from the United States of America relative to the proposal to submit to arbitration the Central American question; and, therefore, thought that in the present state of the correspondence no advantage would accrue from bringing forward a discussion upon the subject. He expected the answer in a few days.—Sir E. B. Lytton said that, under these circumstances, he would postpone the motion of which he had given notice on the subject until after the holidays.

#### THE TREATY OF PEACE.

Mr. E. Denison moved an Address to her Majesty expressive of the joy and satisfaction felt by the House at the restoration of peace on conditions honourable to the Crown, and which fully accomplish the great objects for which the war was undertaken. That they further rejoiced that, notwithstanding the extraordinary exertions and sacrifices the empire had undergone, and hoped that the peace which had been concluded might, under the favour of Divine Providence, long continue to shed its blessings over Europe. The hon. gentleman said when the war first broke out no one anticipated that he would live to see it brought to a close, yet in a comparatively short time, and after brilliant feats of war, an honourable treaty of peace had been concluded, by which more was gained than those objects for which the war was originally undertaken. The grasp of Russia upon Sweden had been relaxed, and, amongst other advantages upon which they might congratulate themselves, there was the extension by the Sultan of equal rights to all his subjects, Christian as well as Mahometan. It was much to the credit of the present Emperor of Russia that he had the great moral courage to admit at Moscow that the opinion of Europe was against him, and that it was, therefore, time to withdraw from the contest. After referring in eulogistic terms to the Emperor of France and the King of Sardinia, he expressed a hope that England would never forget that it was at her sharpest need that Sardinia had flung herself into the contest, and that that State would now claim whatever aid in any

diplomatic arrangements could effect. There was nothing in the treaty at which the country ought not to be satisfied, or might not rejoice. With respect to the case of the press of Belgium, it was a fact that there were some publications there which advocated the doctrine of the assassination of the sovereigns of other States; and it was not, therefore, unnatural that the French Plenipotentiary should have called attention to the subject: but Lord Clarendon stated that he could be no party to any proceeding for the purpose of interfering with the liberty of the press in any country whatever, and his signature to the resolution was not at all inconsistent with that declaration. The noble Lord concluded at a speech of two hours and twenty minutes' duration amidst considerable cheering.

Lord C. HAMILTON then withdrew his amendment, and the Address was agreed to.

## HOUSE OF COMMONS.—WEDNESDAY.

The report on the Address to the Crown respecting the Treaty of Peace was brought up by Mr. E. Denison, and agreed to.

TITHE COMMUTATION RENT CHARGE BILL.—Mr. R. PHILLIMORE moved the second reading of the Tithe Commutation Rent Charge Bill. The measure, as the hon. member explained, was designed to effect a further assessment of the incomes of clergymen to the poor-rate.—A prolonged debate ensued, turning chiefly upon the details of the measure, in which Sir J. Pakington, Mr. Henley, Sir W. Heathcote, the Chancellor of the Exchequer, Mr. Gladstone, and other members joined. The bill was then read a second time, and ordered to be referred to a Select Committee.

AGGRAVATED ASSAULTS BILL.—The second reading of the Aggravated Assaults Bill was moved by Mr. L. HEYWOOD. The bill enacted that violent assaults on women and children should render the offender liable to corporal punishment. The hon. member enlarged upon the increasing frequency and atrocity of such unmanly offences, and contended that nothing but fear of the lash would effectually restrain their commission. —Sir G. GREY opposed the measure, urging that the present law on the subject worked very beneficially, and condemning the proposition to visit a brutal crime with punishment equally brutal.—The bill was also opposed by Mr. Biggs, Captain Scobell, Mr. Muntz, and Mr. S. Worley. On a division there appeared—for the second reading, 97; against it, 135: majority, 38. The bill is consequently lost.

The Sleeping Statutes Bill and the Scientific Societies Bill were respectively read a second time.

## HOUSE OF LORDS.—THURSDAY.

THE QUEEN'S REPLY TO THE ADDRESS.—The LORD CHANCELLOR read her Majesty's reply to the Address of the House of Lords, which thanked their Lordships for their loyal and dutiful Address, and for their cordial co-operation in the measures proposed for the prosecution of the late war, which, in connection with those of her allies, had led to a safe and an honourable peace.

### PENSION TO GENERAL WILLIAMS.

The LORD CHANCELLOR communicated to the House a Message from her Majesty, in which the Queen stated that, being desirous of conferring upon General Williams some signal mark of her approbation for his eminent and distinguished services as her Majesty's Commissioner in Asia, and especially for his gallant defence of Kars, she recommended to the House of Lords the propriety of making a provision of £1000 a year during his life, to continue during his natural life (Hear, hear).

Earl GRANVILLE announced that her Majesty had been graciously pleased to confer a Baronetcy upon General Williams by the title of Sir William Fenwick Williams of Kars (Hear, hear).

### THANKS TO THE ARMY, NAVY, MARINES, AND MILITIA.

Lord PANMURE moved the thanks of the House to the Army, Navy, and Marines employed in the late war, and to the embodied Militia. The noble Lord took a review of the events of the late war, and of the operations of our army and fleet, which were deserving of the highest praise, and to be recorded in the brightest pages of British history.

The Earl of DERBY cordially seconded the motion.

The Duke of CAMBRIDGE bore testimony to the gallant conduct of the Army and Navy in their operations at the Crimea, and praised the Militia force for their valuable and timely assistance in enabling the Government to dispatch so many of our troops to the seat of war.

The Earl of CARDIGAN also praised the general conduct of the Army and Navy, and expressed his conviction that since the death of Lord Raglan the army had not been commanded in a way to give satisfaction.

After a few words from Earl GREY and some other noble Lords the motion was unanimously agreed to.

## HOUSE OF COMMONS.—THURSDAY.

ANSWER TO THE ADDRESS.—The SPEAKER informed the House that he had received her Majesty's Answer to the Address voted by the House upon the conclusion of the peace. Her Majesty graciously thanked the House for the expression of its congratulation; and expressed her hope that the peace would be found to promote the welfare of her people and the civilisation of the world

PENSION TO GENERAL WILLIAMS.—Lord Palmerston brought down a Message from the Crown, in reference to the granting of a pension of £1000 a year to General Williams. The Royal Message was exactly similar to that noticed in the report of the proceedings in the House of Lords. The noble Lord also stated that her Majesty had created General Williams a Baronet under the style and title of Sir William Fenwick Williams of Kars (Cheers).

### THANKS TO THE ARMY AND NAVY.

Lord PALMERSTON then rose to propose a vote of thanks to the Army and Navy for their conduct in connexion with the operations of the late war, and also to the embodied Militia. He said it was one of the privileges of Parliament to vote its thanks to the Army and Navy for the termination of a successful war; and there was no more fitting record for which the House had been called upon to perform that act which had ended more successfully than that which had just been brought to a conclusion (Hear, hear). Referring to the battle of Alma, Inkerman, and Balaklava, he said that while the first proved that no enemy could hope to maintain a position, even though it might seem to be impregnable, which was attacked by British troops, the second proved in a manner equally unmistakeable, that no position could be carried, however numerous might be the force brought against it, which British troops were determined to maintain (Hear, hear). Then there was the battle of Balaclava, with it famous cavalry charge—a charge which however unfortunate, it might have been in some respects, was one of the most heroic recorded in the pages of history (Hear, hear), and what could surpass the conduct of the British Army in its various attacks upon Sebastopol? What could exceed the patient endurance which they had shown through all their sufferings before the walls of that fortress? In whatever way we regarded them, their conduct challenged admiration, for it had never been exceeded by any army in the world. The conduct of the private soldiers had been marked by every military virtue that could dignify human character, and the conduct of the officers had been worthy the men they led (Cheers). The noble Lord then passed a warm eulogium upon the memory of Lord Raglan, whose only regret in the last moments of his existence was, he said, that his life had not perished amid the dangers of the battle which he had so often braved. It was a proud fact in the history of England that, having begun the war with a small army and a comparatively small fleet, she had ended it with an army of 110,000 men and a naval armament the like of which the world had never seen before (Cheers). We had begun the war with 312 ships, and ended it with no fewer than 599 (Cheers). The Civil Service also deserved the thanks of this House for their exertions. Nor ought the Militia to be forgotten for no fewer than 37 regiments had volunteered for foreign service. Those who had gone abroad were models of military discipline and efficiency; and, besides this, they had given no less than 30,000 men to the Line. We had a force of 16,000 German and Swiss troops, finer soldiers than whom could hardly be met with. The noble Lord then referred, in terms of the warmest praise, to the conduct of the soldiers and sailors of France, Sardinia, and Turkey, who had been engaged in the war; and concluded by expressing his conviction that the House would unanimously agree to the motion (Cheers).

Mr. DISRAELI seconded the motion, which, after a few words from Mr. A. STAFFORD, was unanimously agreed to.

The House then went into Committee upon the Reformatory Schools (Scotland) Bill, soon after which it was counted out.

## HOUSE OF LORDS. FRIDAY.

GENERAL WILLIAMS.—Earl GRANVILLE moved a resolution thanking her Majesty for her most gracious Message, and stating that that House would cordially co-operate with her Majesty in carrying out her wish to confer upon General Williams a pension of £1000 a year during his natural life, as a signal mark of her approbation for his gallant defence of Kars.—The resolution was agreed to *nem. con.*

CAPITAL PUNISHMENT.—The Bishop of OXFORD, in moving for a Select Committee to inquire into the mode of administering capital punishment, stated, that his object was not to ascertain the advantage of private over public executions, but to determine the manner and the measure in which such executions should be carried into effect. The right rev. prelate urged the importance of impressing the public mind with the conviction that when sentence of death was passed execution would assuredly follow. Instances had, however, occurred of late, in which mercy had been extended to individuals, upon what grounds he and the public were utterly at a loss to conceive.—Lord CAMPBELL concurred generally in the views expressed by the right rev. prelate.—The Marquis of LANSDOWNE said, that the Government would offer no objection to the Committee.—After a few words from Lord DUNGANNON, the motion was agreed to, and the Committee were nominated

TICKET-OF-LEAVE SYSTEM.—Lord DUNGANNON moved to repeal

That experience has proved the present system of granting tickets of leave to convicts to be injurious to the interests of society, dangerous to the security of property, and tending to the increase, rather than the decrease, of crime. It is, therefore, most important and desirable that her Majesty's Government should take the matter into their serious consideration, and devise some means, either by providing employment for convicts so released at home or in the colonies, or otherwise of relieving the public and the country from a most fearful and growing evil

The Duke of ARGYLL contended that the system had not had as yet a fair trial; and that so far as it had gone it was anything but a failure.—After some discussion the motion was withdrawn.

## HOUSE OF COMMONS.—FRIDAY.

NEW MEMBER.—Captain BERKELEY took the oaths and his seat for the borough of Cheltenham.

POLICE ASSAULT UPON MISS ARCHER.—Sir G. GREY (in reply to Mr. Bowyer) said that it was the intention of Government to institute an inquiry into the assault committed upon Miss Archer by a police sergeant, on the occasion of the proclamation of peace, with a view to ascertain who was really the guilty party.

WEST INDIES AND CANADA.—Mr. LABOUCHERE (in reply to a question) stated that a proposal had been made that the produce of the West Indies and Canada should be admitted into each other's colony duty free.

ADJOURNMENT OF THE HOUSE.—On the motion of Lord PALMERSTON it was agreed that the House, at its rising, should adjourn to Monday, the 19th inst.

POLITICAL EXILES.—Lord PALMERSTON, in reply to Mr. T. Duncombe, said he had great pleasure in stating that the announcement which had appeared in the papers of that morning relating to a general amnesty to Mr. Smith O'Brien, to Messrs. Frost, Williams, and Jones, and other political exiles, was perfectly true. Her Majesty, following the impulse and dictates of her generous feeling, had determined to take advantage of the return of peace, and the unexampled loyalty which prevailed from one end of her dominions to the other, to do an act of grace towards all who were under sentence for political offences, with the exception of those who, in defiance of all ties of honour, had broken their parole and escaped from their penal settlement (Cheers).

STATE OF GREECE.—Mr. J. M'GREGOR called attention to the disordered state of Greece, observing that there was no portion of that country where life and property were safe except about five miles between Athens and the Piræus, where British and French troops were stationed. Under those circumstances, he thought it would be safe factory to the country if her Majesty's Ministers would state their intentions to interfere for the restoration of order and tranquillity in that country, and for the protection of British commerce, which had already fallen there to about one-fourth of the amount at which it stood a short time ago.—Mr. GLADSTONE, amid the cheers of the House, protested against the introduction of so important a question of European policy at such a time and in such a manner, and he expressed a hope that the Government would take no notice whatever of the question addressed to them.—Mr. SPOONER contended that the state of Greece justified the present question.

LORD DALHOUSIE'S PENSION.—Sir E. PERRY called attention to the pension of £6000 a year proposed to be granted to Lord Dalhousie by the Board of Directors of the East India Company, and inquired whether the attention of Government had been directed to the illegality of the proceeding. If the pension were to be granted, he hoped it would be constitutionally done by bringing in a Bill, so as to afford to the House an opportunity to express its opinion upon the subject.—Mr. VERNON SMITH said that the question was not yet decided, as it must first be submitted to the Board of Control, then to her Majesty's Government, and finally, within a month of the grant being made, to Parliament. He should not say anything upon the merits of the question until he knew the reasons for which the Court of Directors proposed to grant the pension; but, considering the long and arduous services of Lord Dalhousie, he did not at all wonder that the Directors should be anxious to express their esteem upon him. With regard to their power to grant pensions, he did not think that there was any doubt about it. The opinion of the law advisers of the Crown should, however, be taken upon it.

PENSION TO GENERAL WILLIAMS.—On the motion of Lord PALMERSTON the House went into Committee on the consideration of her Majesty's message recommending the House to grant a pension of £1000 a year upon General Williams.—Sir J. PAKINGTON seconded the resolution, and passed a high compliment upon General Mouravieff for his treatment of General Williams. A resolution similar to that proposed in the House of Lords was then unanimously agreed to.

POLICE (COUNTIES AND BOROUGHS) BILL.—The House afterwards went into committee upon the Police Bill, the discussion upon the clauses of which occupied the remainder of the night.

## *THE COURT.*

The State Ball on Thursday, and the Levee on the preceding day, have been the chief incidents in Court life during the week.

The postponement of the ceremony of laying the first stone of the Wellington College from Saturday last, until Monday, the 2nd of June, owing to the unfavourable weather, relieved the Queen from an engagement which, had it been preserved in, would have taken place under most inauspicious circumstances, the rain falling in torrents throughout the day. Remaining at Buckingham Palace, her Majesty received his Excellency Baron de Brunnow, on a special mission from the Emperor Alexander II. of all the Russias, who had an audience of the Queen, to announce the accession of his Imperial Majesty to the throne of Russia. In the evening the Queen gave a dinner party, the company at which included the Duchess of Kent, the Princess Royal, the Duke of Cambridge, the Duchess of Grafton, the Duke and Duchess of Northumberland, the Marquis of Ely, the Countess of Mount Edgcumbe, the Earl and Countess Spencer, and Lord James Murray.

On Sunday, the day appointed for the General Thanksgiving for the restoration of peace, the Queen and Prince Albert, with the Prince of Wales, the Princess Royal, Prince Alfred, the Princess Alice, and the Duchess of Kent attended Divine service, in the forenoon, in the chapel in Buckingham Palace.

On Monday the Queen received visits from the Princess Salerno, the Duke and Duchess d'Aumale, and the Prince and Princess de Joinville. In the evening her Majesty and the Prince Consort honoured the Adelphi Theatre with their presence.

On Tuesday the Queen and the Prince rode on horseback, accompanied by the Princess Alice. In the afternoon her Majesty took a drive, accompanied by Prince Arthur and the Princess Louisa.

On Wednesday the Queen held a Levee at St. James's Palace. The Court was fully attended, the presentations of gentlemen shortly after the chiefly military and naval officers on return from service. The Duke of Cambridge and Prince Edward of Saxe-Weimar were present.

On Thursday the Queen received the Sheriffs of London and Middlesex at an audience, when they presented the Address of the Lord Mayor, Aldermen, and Commons of the City of London on the subject of the Peace. In the evening her Majesty gave a State Ball, for which nearly 2000 invitations were issued. The interior of the palace was decorated with flowers, and the saloons brilliantly illuminated. The company began to arrive at nine o'clock, and the Ball was opened shortly afterwards by her Majesty. At midnight a grand supper was served, and the festivities were not brought to a close until after two o'clock.

The Duke of Argyll was invested a Knight of the Most Ancient Order of the Thistle by her Majesty on yesterday se'nnight.

### THE TURKISH EMBASSY.

The Queen has signified her gracious intention of honouring his Excellency, Al. Musurus, Ambassador from the Ottoman Porte at this Court, with her presence at a grand ball, to be given in honour of her Majesty, at the residence of the Turkish Embassy, on the 27th inst.

His Highness, Aali Pacha, First Plenipotentiary from the Ottoman Porte at the recent Congress, accompanied by a numerous suite, arrived at Claridge's Hotel (late Mivart's), at a late hour on Tuesday night, from Paris.

His Excellency Baron Brunnow has arrived at the residence of the Russian Legation, in Chesham-place, from Paris. His Excellency is the bearer of an autograph letter from the Emperor Alexander of All the Russias to her Majesty the Queen.

The Marchioness of Breadalbane will give a grand ball on Wednesday, the 4th of June.

ROYAL ASYLUM OF ST. ANN'S SOCIETY.—The anniversary festival of this society was celebrated on Monday evening, at the London Tavern, Bishopsgate-street, the Earl of Shaftesbury (in the absence of the Duke of Argyll, whose attendance was prevented by his duties in the House of Lords) occupying the chair. The company numbered about one hundred and fifty. The chairman, in proposing "Prosperity to the Royal Asylum of St. Ann's Society," made allusion to the healthy looks of the [illegible] tion to the children of once prosperous parents, orphans or not, of any nation. From its commencement it had provided for no less than 2000 children. The number now in its town school was 92, and its country asylum 238. The subscriptions after the dinner amounted to £1200, including a sum of twenty-one guineas contributed by former pupils in the school.

## TOWN AND TABLE TALK ON LITERATURE, ART, &c.

ON Wednesday last Prince Albert expressed his warm approval of the proposed Exhibition in Manchester, in 1857, of the Art Treasures of the United Kingdom. The scheme was laid before him by the High Sheriff of Lancashire, the Mayor of Manchester, Sir John Potter, Mr. Thomas Bazley (a Royal Commissioner of 1851), Mr. Thomas Fairbairn, and Mr. Heron, the Town Clerk. When his Royal Highness was told that a guarantee fund of £50,000 had been raised in a very few days to secure the completion of the project, he is said to have remarked, "Had we acted like you for the Exhibition of 1851, we should have had no occasion to solicit subscriptions from the public." The citizens of Manchester are therefore busy designing a fireproof building capable of holding all the art treasures of the United Kingdom and thirty thousand visitors at one time. With the exception of the metropolis, Manchester, of all places in Great Britain, appears to be the most suited for an Exhibition of this kind. Situated as it is in the centre of the kingdom, in the midst of a dense population, with railway facilities admirably adapted for bringing and returning visitors within one day to and from their own residences, it presents advantages of a nature highly calculated to ensure the financial success of the scheme. Of its importance to art there cannot be a moment's doubt.

The sale of Mr. Rogers's collection of works of art is still the subject of conversation in literary and artistic circles. When a second Mr. Thomas Tooke shall write the History of Prices of Works of Art, the Rogers sale will supply some remarkable instances of the wonderful increase that has occurred in the value of pictures by celebrated masters. Thus, Sir Joshua Reynolds sold "The Strawberry Girl" to Lord Carysfort for fifty guineas. This picture is now at Bowood, the seat of Lord Lansdowne. A duplicate of it was purchased by Mr. Rogers within a few years after Sir Joshua's death for very little more than the Carysfort quotation. At Mr. Rogers's death this duplicate was sold by auction to Lord Hertford for *seventy* times the sum Mr. Rogers gave for it. The same sale will supply other instances of a like rise in the value of the works of living masters. Thus the finished sketch of "Sancho and the Duchess," by that genuine artist, Mr. Leslie, which Mr. Christie knocked down amid murmurs of applause for one thousand one hundred and twenty guineas, Mr. Rogers was fortunate enough to buy at a sale some twenty years ago for seventy guineas. He bought it at Phillips' rooms and gave it to his sister. At her death it became once more his. The same sale will yet afford another remarkable example of the increase in value of works of art. The charming little picture of "The Two Children in the Tower," bought to have sold cheap at Mr. Rogers's sale for two hundred and fifteen guineas, was bought by Mr. Rogers, of its painter, Mr. Leslie, for ten guineas. The original, a more finished and in every respect a better picture, was bought by Mr. Sheepshanks of the painter for, we believe, twenty guineas, or twice the sum Mr. Rogers gave for a duplicate with slight variations. These prices must be gratifying to Mr. Leslie. They mark the sense entertained of his genius. But who is there who does not wish that the painter's could share with the poet's estate some portion of the profit obtained too late for the painter to participate in?

The Keeper and Trustees of the National Gallery have publicly announced the purchases they have made from Mr. Rogers's collection. They have bought four pictures: 1, "A Fragment," by Giotto, of especial importance in this country towards the history of art; 2, "The Good Samaritan," by Bassano—the picture which we have heard Mr. Rogers relate the curious way Bassano was accustomed to look to before he commenced painting; 3, The alteration, by Rubens, from the "Mantegna Triumph," at Hampton Court; and 4, A finished sketch, by Rubens, for the allegory of War in the Pitti Palace. The total outlay has been £1632 15s. The "Mantegna Triumph" cost 1050 guineas.

Artists who look broadly upon art are inclined to consider these purchases as judicious. To secure the Bassano at two hundred and twenty-five guineas was a piece of unexpected good luck. To be obliged to give one thousand and fifty guineas for a picture which Mr. Rogers obtained in 1820, at Champernowne's sale, for three hundred and thirty-five guineas, is hardly a matter for national congratulation. We are glad, however, to think that the nation has obtained so fine a picture.

Addison's writing-table has crossed from Holland House to Holland House. It is a cranky-looking and prominent kind of thing. The great essayist could hardly have sat in his "vinous flights" at so tottery a table. Yet it is genuine enough. Addison's only child, who lived a great age (she survived her father upwards of seventy years), gave this very table to Sir Thomas Lawrence, and Lawrence brought it in his carriage to St. James's-place and presented it to Mr. Rogers. The poet was fond of showing it to his friends, and telling the story about it. We have often heard him tell what we now relate. Its late locality was appropriate. Addison, before his marriage, lived where Mr. Rogers lived in St. James's-place; after his marriage he lived in Holland House, and there he died.

That prince of sportsmen, Mr. Gordon Cumming, "entertained" the Prince of Wales on Wednesday last—not with a banquet of viands—but with a banquet of dioramic effects and appropriate and amusing anecdotes. We are told that the lion-slayer, who appeared in the garb of old Gaul, and who was never nervous when fronting a real lion, was at first particularly nervous at fronting a real Prince. An antiquary and a wit who was present amused his friends by relating the story about a lion in the Tower dying whenever a King of England died, and by the lion reply of the poet Pope to Frederick Prince of Wales. Mr. Cumming removed his first confusion, and delivered his entertainment in a most instructive manner. It is right to chronicle such an incident.

All who sympathise with those who worthily fill, the important office of teaching others, will learn with regret that Mr. Guy, who has done much for the true education of people in this country, is, in his old age, and from no fault of his own, in want. Here is a case for Government interposition. "Why," asks Smollett, "did not Guy, originally a bookseller, now of hospital celebrity, leave a ward in his hospital for decayed booksellers?" We wish to direct Lord Palmerston's particular attention to Mr. Guy's hard case.

## G. J. GUTHRIE, ESQ., F.R.S.

THE medical profession and the public generally will hear with regret that this distinguished surgeon expired suddenly of disease of the heart at his residence, Berkeley-street, Berkeley-square, on Thursday morning, May 1st, being his seventy-first birthday. Mr. Guthrie was the only son of Mr. Andrew Guthrie, a member of one of the oldest families in Scotland, Guthrie of Guthrie. Mr. Guthrie commenced the study of the profession at the early age of thirteen, as articled student of Mr. Phillips, of Fallmall; but he was especially placed under Dr. Hooper, who afterwards became one of the ablest physicians and pathologists in London. Mr. Guthrie, on the 9th February, 1801, became a member of the College of Surgeons, when not quite sixteen. He was soon after appointed an assistant-surgeon to the 29th Regiment, commanded by Lieutenant-Colonel Byng, now Lord Strafford, who was then only twenty-two years of age. Notwithstanding the youth of both, it was always admitted that there was no regiment better commanded or better doctored. From 1802 to 1807 he served in North America; in 1808 he landed with his regiment in Mondego Bay, and on the 17th of August was at the battle of Roliça. The 9th and 29th Regiments formed the greater part of the wounded, who for three days were almost entirely under Mr. Guthrie's care. On the 21st of the same month he was at the battle of Vimiera. Mr. Guthrie was present at the taking of Oporto, and here he exhibited several examples of great presence of mind, especially in capturing a gun, which French artillerymen were endeavouring to drag through a lane, when the young doctor, being the only mounted officer present, made a dash at the gun, and captured it; but what to do with it puzzled him; therefore cut the traces of the headmost mule, a very fine one, brought [illegible] to take [illegible] J. Sherbrook, [illegible] gun by himself. [illegible] nt at the battle of Talavera, [illegible] t of the British army [illegible] a most disastrous affair [illegible] he wounded, who were collected after several days' marching at the Convent of Deleytosa,

MARBLE VASE, THE CHANTREY PEDESTAL, ARIOSTO'S INKSTAND, ADDISON'S WRITING-TABLE, AND WASHINGTON'S COFFEE-CUP, FROM THE ROGERS COLLECTION.

near Truxillo, which Mr. Guthrie called the slaughterhouse of the wounded of the British army, from the loss of life which took place through the want of previous care and detective surgical knowledge. In the campaign of 1813 at Castrejon, at the battle of Salamanca, Mr. Guthrie was deprived, by the fortune of war, of the whole of his means of transport for many hundred wounded strewed over the field; among which were three hundred unfortunate Frenchmen. The whole of these were carefully cared for and attended to with the same zeal as for our own wounded. These poor men assured Mr Guthrie that, although little given to praying, they had prayed for him, and should ever remember his kindness. After the battle of Salamanca, Mr. Guthrie was ordered to Lisbon, the great hospitals of which station were principally for chronic cases of disease, whether medical or surgical including all the French prisoners of war. It was an admirable field for acquiring knowledge of which he availed himself. He had written a paper on wounded arteries after the battle of Albuera. He now completed another, 'On the facility of performing the operation of amputation of the shoulder joint;' and on the diseases prevailing in Lisbon, in which he showed the inutility of sending consumptive persons to hot climates when expectorating purulent matter. These papers were sent to head-quarters; and whilst visiting the hospitals the Duke of Wellington was pleased publicly to express his approbation of Mr. Guthrie's services; and to say that if he had not attained the rank of Inspector, he should have made him Surgeon to Head-quarters, that he might have so able a man near him.

Placed on half-pay in 1814, it became necessary to work in private life; this he did with all the fervour of his disposition. In October, 1816, he gave his first course of lectures on surgery, and which he continued for nearly thirty years, receiving all the officers of the Army, the Navy, and the East India Company, as a matter of course, if not of right. In December, 1816, he founded, with the aid of his kind friend Lord Lyndoch, and under the auspices of the Duke of York and the Duke of Wellington, an infirmary for diseases of the eye, as an auxiliary to his lectures, which has since become the Royal Westminster Ophthalmic Hospital, at Charing-cross. Mr. Guthrie was elected assistant surgeon to the Westminster Hospital in 1823, surgeon in 1827; he resigned the office in 1843, to make way for his son as assistant surgeon, and was, in 1848, appointed consulting surgeon, on the death of Mr. White—before which he declined accepting it.

The magnitude of the operative surgery he had to perform during the war rendered him perhaps careless in seeking for operations, if it were not perhaps that he also considered this part of surgery as the last resource of science. The great experience he had obtained in the most desperate cases of injuries gave him a command of himself, a coolness, in addition to his natural presence of mind which have never been excelled. The adage of the accomplished operator may be truly applied to him—the lion heart, the eagle eye, the lady's hand.

In 1824 Mr. Guthrie was elected a member of the Council of the Royal College of Surgeons—at an earlier age than any other person so honoured, being only thirty-eight years of age; and in 1833 was elected to the highest office, that of President—an honour again conferred on him in 1842 and 1855, being the only instance at present on record of a member of the Council holding this office three times. Mr. Guthrie had also held the office of Professor of Anatomy and Surgery. For some time past Mr Guthrie's health had been such as to occasion considerable alarm in the minds of his family and friends, arising evidently from a diseased state of the heart. A few days since it was considered he was much better, and he contemplated sojourning for a short time in the south of France. On Wednesday week he suffered much from a violent cough, and on Thursday morning, at five o'clock, he ceased to exist. He leaves behind him a son, Mr. C. Gardiner Guthrie, surgeon to the Westminster and Ophthalmic Hospitals, who is already favourably known in the profession of which his father was so great an ornament.

THE LATE MR. GUTHRIE, F.R.S.—FROM A PHOTOGRAPH BY MAYALL.

BUST OF POPE, BY ROUBILIAC, AND "CUPID AND PSYCHE," BY FLAXMAN, FROM THE ROGERS COLLECTION.

## THE ROGERS COLLECTION.

We have engraved two groups of memorials of literary and artistic interest and celebrity, from the Rogers Collection.

In the first group is the *Chantrey Pedestal:* it is of mahogany, and was carved by Chantrey, in 1803, when he was unknown, and in humble circumstances, being employed by Bogaert, a German, at the rate of five shillings a day. Rogers was relating the history of this piece of ornamental furniture to a party, at which Chantrey was present, when the latter interrupted the poet by saying: "Do you remember a workman who came in at that door to receive your orders? I was that workman." The Pedestal was the last lot in the second day's sale (Tuesday, April 29), and was purchased by Mr. Stuart, of Hill street, for 10 guineas. The upper part is carved in Greek pattern.

Upon the Pedestal is a *Marble Vase and Cover*, of elegant form, the surface covered with flowers and foliage in relief, and the handles double snakes; height, eighteen inches. This Vase was the property of the Duke of St. Albans, and was in the house in St. James's place when Mr. Rogers purchased the lease. The Vase was sold on Tuesday for 40 guineas.

In the same group is *Washington's Coffee-cup*, of plain white Sèvres porcelain, with gold line ornamentation. It was received some years since by Mr Rogers from America. It was sold on Monday to Mr. Sharpe, for £1 16s.

Next is *Ariosto's Inkstand* of bronze, and in form resembling the better-known inkstand of Petrarch; it was sold to Mr Sharpe, for three guineas.

The other relic in the group is *Addison's Writing-table*, probably a

SHARPHAM, ON THE DART, DEVON—THE LARGEST ROOKERY IN ENGLAND.—(SEE NEXT PAGE)

memorial brought from Holland-house. It has two flaps, which fold towards the centre; it is lined with pale green velvet; there are two drawers, one on each side, and one is deeper than the other. The pedestal is sexagonal, and rests upon three feet. The whole is of mahogany. It was bought by Lord Holland on Monday last for £14.

The second group consists of three articles of sculpture—*Rouchilac's original Bust of Pope*, in terra-cotta. It was bought by Mr. Skeffington, on Monday last for £143 17s.

Next are two marble statuettes of *Cupid* and *Psyche*. The position of *Cupid* is somewhat strained; but that of *Psyche* is graceful and pleasing. The *Cupid* was executed by Flaxman for Mr. Rogers as a companion to the *Psyche*, which was adopted from the monument of Mrs. Tighe, author of a poem entitled "Psyche." Both were purchased by Mr Farrer, on Monday last, the *Cupid* for £115, and *Psyche* for £149 5s.

## COLOSSAL CHINA VASE PRESENTED BY HIS MAJESTY THE EMPEROR OF THE FRENCH TO H.R.H. PRINCE ALBERT.

THE visitors to the Universal Exhibition of Industry in Paris last year will, doubtless, remember among the magnificent specimens of ceramic art the colossal Vase of Sèvres Porcelain exhibited from the Imperial manufactory of that matchless ware. This Vase was designed to commemorate the Great Exhibition in Hyde-park, 1851. Upon the visit of Prince Albert to Paris last year, this superb production was presented to his Royal Highness by the Emperor of the French; and within the last few days the gift has been safely deposited in Buckingham Palace by Mr. Cheune, of Paris.

The Vase was designed expressly for the occasion. It is of spherical form, of pure Grecian character. The colour of the ground is deep amaranth, relieved with light and graceful ornaments in gold. In the centre are painted emblematic figures of the principal nations of the world submitting the produce of human intelligence to three female genii seated upon a throne allegorical of Justice, Industry, and Equity. A laurel crown surmounts the upper part of the Vase, and around the mouth is a smaller crown or wreath, with portrait figures of Queen Victoria and Prince Albert, and an inscription in gold letters. The height of the Vase is six feet, and its diameter four feet. It is, altogether, one of the most superb memorials which have yet been produced of the Exhibition of 1851, as well as an additional testimony of the friendship between England and France.

The accompanying Illustration is from a photograph forwarded to this country by Cheune, of Paris.

SÈVRES VASE PRESENTED TO H.R.H. PRINCE ALBERT BY HIS IMPERIAL MAJESTY THE EMPEROR OF THE FRENCH.

## THE LARGEST ROOKERY IN ENGLAND.

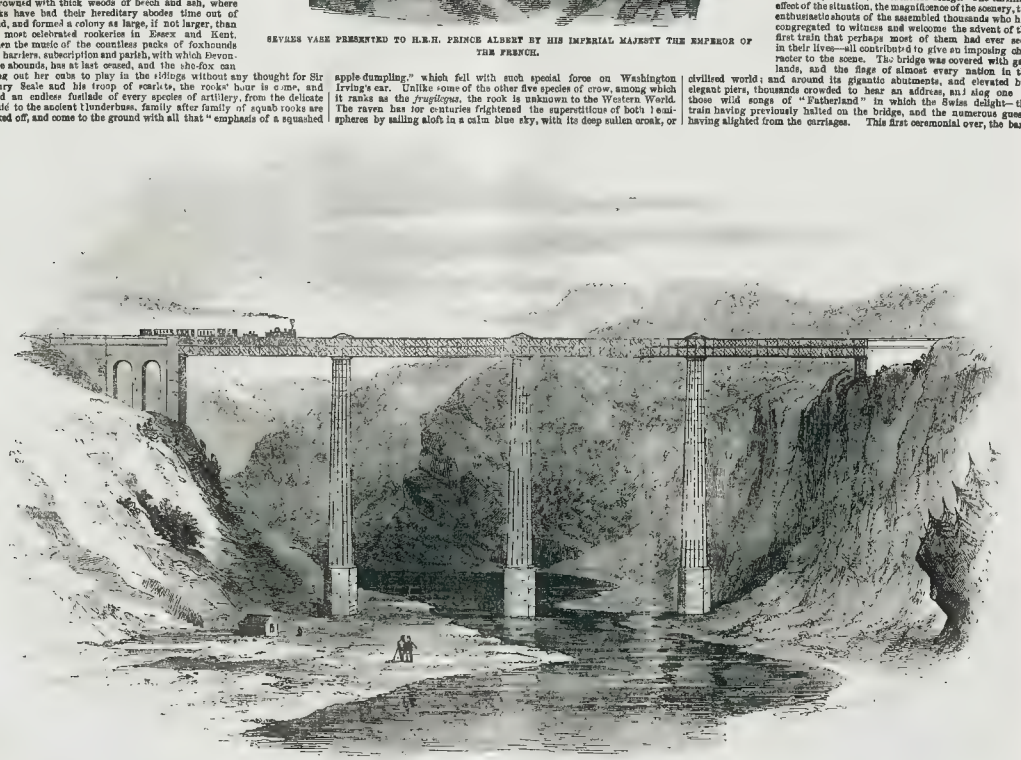
No South Devon tourist ever dropped down the silent Dart, either in the excursion steamer or by boat, from Totnes to Dartmouth, without pausing halfway to admire the scenery of Sharpham, and to test that wondrous ringing echo which so perseveringly mocks the boatmen's hallоо, as they near the beautiful crescent of woods which marks his first peep of it on the right-hand bank. It is difficult to say whether he will be most repaid by landing, or floating lazily along, seaward, with the stream. From an adjacent hill, overlooking the mansion—which has passed out of the possession of the Bastard family into Mr. E. Durant's, the late High Sheriff for Devon—the river, owing to its serpentine eccentricities, presents the appearance of ten distinct lakes. The woods of Sharpham slope down to the water's edge, and dip their boughs reverentially into the tide, which, in its daily rise and fall of seven or eight feet, leaves on them the blighting salt water mark of this involuntary immersion. One side of the river is crowned with thick woods of beech and ash, where rooks have had their hereditary abodes time out of mind, and formed a colony as large, if not larger, than the most celebrated rookeries in Essex and Kent. When the music of the countless packs of foxhounds and harriers, subscription and parish, with which Devonshire abounds, has at last ceased, and the sly-fox can bring out her cubs to play in the siddings without any thought for Sir Henry Seale and his troop of scarlets, the rooks' hour is come, and amid an endless fusilade of every species of artillery, from the delicate Minié to the ancient Blunderbuss, family after family of squab rooks are picked off, and come to the ground with all that "emphasis of a squashed apple-dumpling" which fell with such special force on Washington Irving's ear. Unlike some of the other five species of crow, among which it ranks as the *frugilegus*, the rook is unknown to the Western World. The raven has for centuries frightened the superstitious of both hemispheres by sailing aloft in a calm blue sky, with its deep sullen croak, or careering about in a thunder storm, till it induced the belief that an electric flame might be seen streaming from its bill; whereas the rook has long been a quiet established old housekeeper in Europe, and keeps especial watch and ward in England, with its solemn ceaseless caw, over generation after generation of county families and cathedral dignitaries. Blue-books have borne testimony to the benefits it confers on the farmer; and, in one instance, a Parliamentary witness set off the grubs against the seed, which it so unblushingly pilfers, and struck the balance in its favour. Each hen rook generally rears from four to five young ones, who, if the season is forward, are ripe for slaughter about the 10th of May. Still, in spite of all their dainty fare, no cunning cook would dream of doing more than using the legs and a slight portion of the back, and even then a beefsteak at the higher, and bacon at humbler tables, forms the principle ingredients of pies, which the boldest can seldom attack more than twice during the week, when the rook battues are at their hottest. The crossbow still bears its part in these assaults, and of course the "Mantons" deal out their wonted destruction in the hands of sixteen out of twenty sportsmen, but the artist disdains to handle anything on these occasions but the pea rifle, which carries from about 100 to 120 of its tiny bullets to the pound.

## OPENING OF THE FIRST RAILWAY IN SWITZERLAND.

On Easter Monday last the St. Gall and Appenzell Railway (the first constructed in Switzerland) was opened with great ceremony. From an early hour in the morning bands were playing and flags were flying, and the whole of the population of the capital of St. Gall (one of the largest cantons in Switzerland), dressed in their holiday attire, were busy in the preparations for so eventful an epoch in their history as the inauguration of their first railway. The town itself (which is the highest in Europe, being about 2650 feet above the level of the sea) was tastefully decorated with flags and festoons of flowers; triumphal arches were erected in the principal street; these were surmounted with models of the different bridges which from time to time had been constructed over the river Sitter; and, conspicuous above the rest, was a large-size model of the remarkable lattice-bridge by which the railway now crosses that mountain-stream at a height of 200 feet above the level of the water. This bridge is upwards of 560 feet in length: the three piers on which it is supported are of cast iron, wonderfully light, having numberless open interstices, through which may be seen the snow-capped Appenzell mountains and the time-worn rocks that line the sides of the deep abyss.

At about nine o'clock the students of the different schools of St. Gall, dressed in the military uniforms of the various corps to which they belong, were marshalled in the large square in front of the Government offices; thence they marched in procession, accompanied by their respective bands of music, and headed by their professors and the principal authorities of the locality, to the new railway station; while the members of the Government, and deputations and strangers invited, proceeded thither in carriages to the station of Winkeln (some four or five miles from the town), to meet the train coming from Winterthum. It consisted of twenty-five carriages (each upwards of thirty feet long), and was drawn by two locomotive engines—one named the "St. Gallen," and the other "Appenzell." These locomotives, with their tenders, were ornamented with flowers and leaves, and paintings, and presented a really beautiful appearance.

It was indeed an exciting moment when the train reached the deep ravine, and the shrill notes of the whistle proclaimed that the heavily-laden carriages were about to pass for the first time over the lofty but light lacework (as it were) of the lattice-bridge. The thrilling effect of the situation, the magnificence of the scenery, the enthusiastic shouts of the assembled thousands who had congregated to witness and welcome the advent of the first train that perhaps most of them had ever seen in their lives—all contributed to give an imposing character to the scene. The bridge was covered with garlands, and the flags of almost every nation in the civilised world; and around its gigantic abutments, and elevated but elegant piers, thousands crowded to hear an address, and sing one of those wild songs of "Fatherland" in which the Swiss delight—the train having previously halted on the bridge, and the numerous guests having alighted from the carriages. This first ceremonial over, the band



THE SITTER VIADUCT, ON THE APPENZEL RAILWAY.

played several beautiful airs, the company returned to their carriages, and the immense train was driven back once more over the bridge. This bridge is in its way as extraordinary as the baths of Pfeffers, or the Via Mala, the Simplon pass, or the Glacier of the Rhine.

As the time now drew near when the train was appointed to enter the station of St. Gall, it crossed the bridge for the third time at a rapid rate, and, sweeping round the curves, and over the undulating hills of the neighbourhood, hemmed on each side by a compact mass of spectators, it was hailed with tremendous cheers as it entered the station of St. Gall.

Here again speeches were delivered, and England was spoken of as the land of industry and commerce *par excellence*, where everything useful has its origin; and it was considered that, by adopting the rapid mode of transit which the English had invented and put into practice, the Swiss, by following in their footsteps, and by thus being enabled to cultivate more friendly relations with the inhabitants of other countries, might likewise one day attain to a high state of prosperity as a commercial people. This part of the proceedings was terminated by a song composed for the occasion, which was sung with good effect to the air of "God Save the Queen."

Then followed a procession devised by Mr. Hartmann, the chief engineer of the railway, with the view of enabling the workmen, who had shared with him the fatigues and anxieties during the progress of the works, to participate with him in the triumph. The workmen, to the number of 2500—Swiss, Italians, Bavarians, &c.—were marshalled in rows of four or five abreast, each carrying the implement with which he was accustomed to work—spade and picks, borings machines and powder, levels and theodolites, chains and staffs, saws and anvils, pumps and pile-engines; in short, every instrument used in making the line was there represented. The wives and daughters of the workmen followed the procession in vans, drawn by several horses; while refreshments were liberally distributed. A sumptuous banquet was given in the evening—

And games and carols closed the busy day.

On the following evening a ball was given in the railway station, which was attended by between four hundred and five hundred persons.

The proceeds of the ball, after paying expenses, are to be appropriated as a fund for workmen or their families who may have met with accidents during the execution of the works.

## *NATIONAL SPORTS.*

As the Derby-day drawn nigh all other race meetings seem to sink into insignificance for the nonce, except as their results tend to elucidate the great problem which is making so many speculators and amateurs unspeakably miserable. The Tuesday at Chester had not much incident beyond Lambourne's successful second appearance in public, and his defeat of Blink Bonny by half a neck, which makes his form at present just the same as Nougat's and Magnifier's. One Act was also beaten in a canter by Thecflora, to whom the regue Porto Rico is said to have given a stone; but she had nothing taken out of her, and on the morrow she drew sixth place in the front rank, led her field from end to end in the Cup, and won by a head; Yellow Jack just besting Typee by a head for second place. Thirty horses started, Courtney fifth, Grey sixth, Courtenay first, Poodle sixth, Imogene seventh, Scythian eighth, and Stork tenth. Yellow Jack's performance brought him to 20 to 1 for the Derby; and it is evident that he can stay; but his failure, for lack of speed, even under Sam Rogers' powerful rowing, to beat Parabolette in the Two Thousand, does not augur greatly for his Derby chance. He must, however, finish well up, as staying is rather the exception than the rule with the 1855 three-year-olds. This is the second Chester Cup winner that William Day has trained for Mr. Parker within four years.

The One Thousand Guineas showed Mincepie, who is small and short, and about whose dislike to a distance we warned our readers about a fortnight since. In no very favourable Oaks colours; although young Osborne took Margarese by the head, and went through with her from end to end, and not without making her feel the spurs. The supporters of the Danebury stable began from that moment to suspect that their line for Wentworth was wrong one, and that he was nothing like the horse his owner believes. Our opinion is that Jem made a gigantic mistake, and that he has very little pretensions to being a racehorse. You look in vain for loins or barrel, and turn away with the conviction that he is blest with neither, and has an upright shoulder, thin thighs, and no thickness through the arm. If he went fast for three-quarters of a mile, and then tired; and at last, when he was threatened with the whip and spurred, he screamed about three-quarters of a length in front of Peter Flat. His friends, of course, say it was all his laziness, but we fancy it is a style of inherent laziness which will shoot him out of the Derby before they get to the distance-post. Mr. Jackson, the new "leviathan," made a tremendous demonstration against him, and would have laid £20,000, and put the money down. If Fly-by Night comes well to the post, his chance will be anything but contemptible; as there is no doubt that he is completely master of Fazzoletto. Bird-in-Hand will see a better day, if the weather continues damp; his Newmarket appearance indicated that he had been through the puzzle," as the saying is, in order to save his legs, the knowledge of which made Wintringham, the Richmond trainer, lay the heavy odds against him he did. His owner still thinks very highly of Vandermeulin, and the followers of Hedley and Newington in the south of Scotland, but no one seems to consider that Cannobis has the requisite pace. Opinions are also divided as to whether Newington or the Prince is the best of Mr. Gratwicke's two. Verdant Green is "the great mystery man," although they do say that but for his being a little amiss he would have measured Kalmpyg in the Rowley Mile Plate. Newmarket is in love with his looks, but sadly indignant at Goodwin for his dodging way of training him. "It is Bolingbroke over again," they say, "and no good came of that." He never will let any one see him gallop, and hence the public, in revenge, will have it that he "roars," and the old trainers shake their heads and say that no horse can win if he is trained in that fashion. Still Goodwin has won two Oaks already, and he is hardly likely to trifle in earnest with such a fine-looking bit of horseflesh. It is thought that if Charlton does not ride him John Mann will, and Sly be on Lord Glasgow's Brother to Bird-on-the-Wing. Wentworth's unsatisfactory Newmarket race will be the means of bringing a large field to the Derby post, and jockeys will be in no small request. Joseph Dockery will, we hear, join his craft again, and G. Mann, who won the Ascot Cup for it on Joe Miller, is said to be engaged to William Day's stable, in the room of the Gosters, who seceded because Lord Anglesey chose to replace one of them by Sly at Tedcastle.

The racing fixtures for next week are—Redditch and Cartmell on Monday; Shrewsbury, on Tuesday and Wednesday; Coggeshall, on Wednesday; Southwell, on Thursday; and Ulverston on Friday; while Manchester will attract both the supporters of Wentworth's holiday-makers from Wednesday to Friday, and Howth and Baldoyle furnish a similar tryst to the Irishmen on Tuesday, Wednesday, and Thursday. If Early Bird is "meant" in any of his short races at Shrewsbury or Manchester, he will be very dangerous; but unless West Langton shown in the Manchester Produce Stakes, little or no light will be reflected from the great "cotton metropolis" on Epsom. Blink Bonny and Augury are in the Sapling Stakes, and Lambourne, Madame Clicquot, Saunterer, &c., in the Two Year Old. Coreanus by Sirius is for sale, and the Blackmoor Vale forbounds, and twelve horses, come to the hammer at Tattersall's on Monday. Oulston was bought in, but the Royal paddocks could not resist their favourite Orlando blood, and gave 550 guineas for Bay Celia.

CHESTER SPRING MEETING.—TUESDAY.

Grosvenor Stakes.—Scrub, 1. Hospitality, 2.
Palatine Stakes.—Theodora, 1. One Act, 2.
Sweepstakes of [illegible] Lambourne, 1. Augur, 2.
Mostyn Stakes.—Lambourne, 1. The Night of Delah, 2.
Chester Cup Stakes.—Yellow Jack, 1. Prince of Orange, 2.
Wynnstay Handicap.—Kleinmeier, 1. Neoptolemus, 2.

WEDNESDAY.

Halter Skelter Handicap.—Teddy, 1. Defiance, 2.
Her Majesty's Plate.—Heir of Linne, 1. Sancobeor, 2.
Tradesman's Plate.—One Act, 1. Yellow Jack, 2. Typee, 3. Yorkshire Grey, 4.
Courtenay, 5.
Scramble Handicap.—Usurer, 1. Sacrifice filly, 2.
Four-year-old Triennial Stakes.—Lady Tatton, walked over.
City Members' Plate.—Fisherman, 1. Nighthawk, 2.

THURSDAY.

Dee Stand Cup.—Melissa, 1. Claret, 2.
Welter Cup.—Kuignet, 1. One Act, 2.
Dee Stakes.—Bird-in Hand, 1. Rivington, 2.
Marquis of Westminster's Plate.—One Act, 1. Boy, 1.

FRIDAY.

Sweepstakes. Lady Florence, 1. Alcyone, 2.
Ladies' Purse.—Alcyone, 1. Usurer, 2.
Produce Stakes.—Delusion walked on
Wirral Stakes.—The Down, 1. Saunt rer, 2
Grand Stand Cup.—Mary, 1. Mona, 2.
Eaton Stakes.—Sancobeor, 1. Stork.
Handicap.—Claret, 1. New Brighton, 2.
Cheshire Stakes.—Prince of Orange, 1.

## MONETARY TRANSACTIONS OF THE WEEK.

*(From our City Correspondent.)*

ALTHOUGH the amount of money business transacted in all national Stocks this week has been very moderate, prices have ruled firm; in some instances, especially for the June account, they have had an upward tendency. The present firmness in the market may be attributed to the steady influx of gold from Australia and the United States, and the great reduction in the Army Estimates—£14,000,000—compared with those originally submitted to Parliament. The reduction in national expenditure has led some persons to the conclusion that a new loan will not be necessary; consequently they have operated for a rise in Consols. Our impression is that only a comparatively small amount above the present income of the Chancellor of the Exchequer to meet current expenses.

The arrivals of gold have been nearly £400,000: but we have had an unusually large export of silver to India and China—viz., over £200,000. In the course of the week about £350,000 in gold has been taken to the Bank of England; but, on the other hand, nearly £300,000 has been withdrawn, on account of the Turkish Loan.

The demand for money has not been so urgent as in the previous week. Some first-class bills, short dated, have been done in Lombard-street at 5½ to 6½ per cent; but the general rate of discount is 6 per cent.

On Monday Consols were very firm, and advance on Saturday's rates of ¼ per cent:—For Money, they were done at 92½ to 9⅝, and for the June Account, 92⅝. Bank Stock realised 211 to 212. Reduced, 91¾ to ⅞. New Three per Cents, 92½; India Stock, 226 to 229; India Bonds, 10s. to 5s. dis.; and Exchequer Bills, March, 4s. dis. to par; June 3s. to 4s. dis. The transactions on Tuesday were less extensive, and prices somewhat irregular. Bank Stock 211½ to 212. Reduced Three per Cents, 92 to 91⅞; three per Cent Consols, 92⅝; New Three per Cents, 92½ ⅜. New Two-and-a-Half per Cents, 78. India Stock, 226 to 229. India Bonds, 3-16 pm. Ditto, 1855, 17 1-16 ⅜; India Stock, 229; India Bonds, 8 dis.; Exchequer Bills, 3s. to 7s. dis.; Exchequer Bonds, 97⅛ to 98⅛. On the following day the dealings were unimportant:—Bank Stock, 212; Three per Cents, 92⅝; Reduced, 91⅞; Three per Cent Consols, 92⅝ up to 93⅛; New Three per Cents, 92½ ⅜; Long Annuities, 1860, 8⅛; India Stock, 229; India Bonds, 8s. to 7s dis.; Exchequer Bills, March, par to 3s. prem.; June, 3s. to 4s. dis.; Exchequer Bonds, 97⅞ to 98⅛. On Thursday the arrangement of the Account briefly compiled the attention of jobbers:—Consols were rather flat, at 92⅞ to ⅞ for Transfer, and 93⅛ to ⅜ for June. The New Three per Cents reached 92 to 92½; and the Reduced, 91⅞. Bank Stock, 210 to 211; March Exchequer Bills, par to 3s. prem.; the June Ditto, 3s. dis., being somewhat firmer.

The amount of business doing in most Foreign Bonds has been very moderate. Prices, however, almost generally, have been well supported: Brazilian ex per Cents have marked 99⅜; Ditto Small, 99½; Chilian Six per Cents, 104½; Ecuador, 8⅜; Mexican Threes, per Cents, 25; Portuguese Four per Cents, 105; Ditto Four-and-a-Half per Cents, 95; Sardinian Five per Cents, 95; Spanish Three per Cents, 44¾ to 45; Ditto New Deferred, 24¾; Ditto Passive, 7⅞; Ditto Coupons not funded, 5¾ per cent; Turkish Six per Cents, 98 to ⅜; Ditto Four per Cents, 101½ ⅜; Austrian Five per Cents, 94½; Dutch Two-and-a-Half per Cents, 64; Dutch Four per Cents, 94 ex div.; Belgian Four-and-a-Half per Cents, 95.

Joint-stock Bank Shares have continued firm in prices:—London and Westminster, 47½; Australasian, 93; English, Scottish, and Australian Chartered, 16⅜; Bank of London, 64; London and County, 34½; New South Wales, 43½; Ottoman Bank, 6; Provincial of Ireland, 5⅝; Western of London, 46.

The dealings in Miscellaneous Securities have been limited, as follows:—Australian Agricultural, 31; Berlin Water Works, 6¾; Canada Company's Bonds, 114; Ditto Government Six per Cents, 111¾; Crystal Palace Preference, 5¾; Electric Telegraph, 96; English and Australian Copper Smelting Company, 3; London General Omnibus, 39; Mexican and South American, 1¾; National Discount Company, 4¾; Netherlands Land, 4; North of Europe Steam, 13¾; Peel River Land and Mineral, 2¾; Peninsular and Oriental Steam, 63¾; Ditto, New, 14; Royal Mail Steam, 73; St. Katharine Docks, 82; Victoria Docks, 19¾.

The Railway Share Market has been steady, but the business transacted in it has been by no means extensive. The following are the official closing prices on Thursday:—

ORDINARY SHARES AND STOCKS.—Aberdeen, 26; Cork, Blackrock, 11; East Anglian, 1⅝; Eastern Counties, 9¾; Great Northern, 94½; Ditto, A Stock, 79; Ditto, B Stock, 125¾; Great Western, 61¾; Lancashire and Yorkshire, 83; London and Blackwall, 7; London and Brighton, 101¾; London and North-Western, 100¾; London and South-Western, 94⅝; Midland, 74¾; Ditto, Birmingham and Derby, 54; Ditto, Leicester and Hitchin, 87½; Ditto, Midland, ex New; Norfolk, 54; North-Eastern—Berwick, 78; Ditto, Extension, 15¾; Ditto, G.N.R Purchase, 3⅜ dis.; Ditto, York, 85½; North Staffordshire, 11¾; North and South-Western Junction, 10¾; Scottish Central, 99; Worcester, and Wolverhampton, 20¾; Shropshire Union, 46; South-Eastern, 71.

PREFERENCE SHARES.—Aberdeen, Seven per Cent, 116¾ ex div.; Caledonian, 98; Great Eastern, Five per Cent, 9⅝; Ditto, Birmingham and Oxford, 8½; Manchester, Sheffield, and Lincolnshire, 117; Ditto, Three-and-a-Quarter per Cent, 66; Consolidated Bristol and Birmingham Six per Cent, 135½; Ditto, Four-and-a-Half per Cent, 102½; Edinburgh and Glasgow, 87½; Great North of British, 10¾; North-Eastern—Berwick, 93½; Oxford, Worcester, and Wolverhampton, 98½; Waterford and Kilkenny, 2¾.

FOREIGN.—Australian Agricultural, 6¾; Ardennes, 17½; Eastern of France, 42¾; Grand Trunk of Canada, A issue, 19; East Indian Peninsula, 22¾; Great Luxembourg Shares, 5¾; Great Western of Canada, 9; Madras Extension, 10¾; Royal Danish, 19¾ ex div.; Sambre and Meuse, 11¾; Scinde, 7¾; East Indian, 93.

Mining Shares have ruled dull:—On Thursday Australian were 1¾; Cobre Copper, 64; Copper Miners of England, 30¾; Rhymney Iron, 22¾.

*Friday Evening.*

The Government broker has announced to-day that a new loan of £6,000,000 will shortly be opened in Consols, the first payment to be made this month, and the remainder of the amount to be paid off by one or a period of five months. Notwithstanding this announcement, very little change has taken place in the quotations. The Three per Cents for Money are 92⅝ ⅞; and for the June account, 92⅞ ⅞. The Reduced Three per Cents, 91⅝ ⅞; and the New Three per Cents, 92½ ⅝. Bank Stock, 211. The Unfunded Debt is flat. Foreign Bonds and Railway Shares dull.

## *THE MARKETS.*

CORN EXCHANGE (Friday).—The present week's arrivals of English wheat, coastwise and by land carriage, have been very moderate, and the show of samples here to-day was limited. For most kinds we had a steady demand, at prices fully equal to those realised on Monday. The imports into London, last week, were 6000 quarters. The retail grain changed hands in a moderate extent, on former terms. In barley and malt very little was doing on Monday's currency. The supplies were moderate. The show of oats was good, and the orn trade ruled heavy, at Monday's decline in value. Beans and peas realised previous prices. The flour trade was a scaly.

*Arrivals this Week.*—English: wheat, 1970; barley, 430; malt, 3330; flour, 1310. Irish, oats, 660. Foreign: wheat, 5930; barley, 5330; oats, 15,410; flour, 1350 barrels, 1430 sacks

*English.*—Wheat, Essex and Kent red, 50s. to 72s.; ditto, white, 61s. to 75s.; Norfolk and Suffolk red, 50s. to 70s.; rye, 42s. to 44s.; grinding barley, 33s. to 34s.; distilling ditto, 36s. to 39s.; malting ditto, 40s. to 45s.; Lincoln and Norfolk malt, 77s. to 78s.; brown ditto, 68s. to 69s.; Kingston and Ware, 70s. to 79s.; Chevalier, 70s. to 81s.; Yorkshire and Lincolnshire feed oats, 21s. to 23s.; potato ditto, 22s. to 24s.; Youghal and Cork, black, 18s. to 20s.; ditto, white, 19s. to 21s.; tick beans, 34s. to 35s.; grey peas, 34s. to 36s.; maple, 42s. to 44s.; white, 36s. to 41s.; boilers, 42s. to 44s. pearler, Town-made flour, 45s. to 46s.; Suffolk, 47s. to 48s.; Stockton and Yorkshire, 45s. to 45s. per 280 lbs. American flour, 23s. to 24s. per barrel.

*Irish.*—Cleverseed is very dull, and lower to purchase. In other agricultural seeds very little is doing, but linseed is rather firmer. Cakes steady.

Linseed, English, sowing, 67s. to 68s.; Mediterranean, 57s. to 57s.; hempseed, 45s. to 48s. per quarter. Coriander, 8s. to 9s. per cwt. Rapeseed, English, 36l. to 38l. per last. Linseed cakes, English, £11 11s. to £12, ditto, foreign, £10 to £11 0s.; rape cakes, £6 to £6 5s. per 1000. Cake meal, 6s. to 6s. 6d. per cwt.

*Bread.*—The prices of wheaten bread in the metropolis are from 8d. to 10d.; of household ditto, 6d. to 8d. per 4lb. loaf.

*Imperial Weekly Average.*—Wheat, 66s. 8d.; barley, 40s. 5d.; oats, 22s. 8d.; rye, 42s. 2d.; beans, 41s. 6d.; peas, 40s. 0d.

*Three Weeks Averages.*—Wheat, 68s. 7d.; barley, 39s. 3d.; oats, 23s. 6d.; rye, 43s. 10d.; beans, 42s. 0d.; peas, 41s. 0d.

*English Grain Sold Last Week.*—Wheat, 101,850; barley, 30,313; oats, 18,511; rye, 139; beans, 3595; peas, 937 quarters

*Tea.*—The business doing in our market is very moderate. In prices, however, scarcely any change has taken place. Common sound congou is selling at 9½d. to 9½d. per lb.

*Sugar.*—An improving demand for all kinds of sugar, and prices are fully 6d. per cwt. dearer. Fine West India qualities have advanced 6d. per cwt. Barbadoes has sold at 42s. to 44s.; Mauritius, 37s. 6d. to 44s.; Madras, 35s. 6d. to 37s.; Bengal, 43s. to 45s. per cwt. Floating cargoes have realised full prices. The refined market is steady, and grocery lumps are worth 3s. to 3⅛s. per cwt.

*Coffee.*—Since our last report the transactions in nearly all kinds of coffee have been very limited. In prices, however, we have no alteration to report.

*Rice.*—There is more business doing in our market, although the stock is over 20,000 tons. Prices generally are supported

*Provisions.*—The demand for Irish butter is heavy, and prices are drooping. Foreign qualities have fallen to some extent. In English very little is doing. Bacon moves off slowly, at 54s. per cwt. for Waterford, and 56s. for Limerick.

*Tallow.*—This article is dull, and P.Y.C. on the spot may be purchased at 43s. to 43s. 6d. per cwt. Town tallow, 42s. net cash.

*Oils.*—Linseed oil is steady, at 33s. per cwt. on the spot. Otherwise, the trade is dull. Turpentine moves off slowly, spirits at 37s. to 38s. per cwt. Rough, 9s. to 9s. 6d. per cwt.

*Hay and Straw.*—Meadow hay, £3 10s. to £5 10s.; clover ditto, £4 10s. to £6 10s.; and straw, £1 6s. to £1 11s. per load.

*Spirits.*—There is a fair business doing in rum, at full prices. Proof Leewards, 1s. 8d. to 2s. 8d.; East India, 1s. 11d. to 2s. 1d. per gallon. The brandy market is steady, at unaltered quotations. Rum spirit, 10s. 8d.; proof

*Wool.*—The public sales of Colonial wool commenced on Thursday. The biddings have ruled high, at an advance of 1d. to 2d. per lb.

*Hops (Friday).*—Our market continues to be well supplied with nearly all kinds of hops, in which about an average business is doing, at our previous rates. This week's arrivals of bales from Hamburg, Mid and East Kent Pockets, £3 5s. to £5 5s.; Weald of Kent, £2 0s. to £4 5s.; Sussex, £2 10s. to £4 5s. per cwt.

*Cheese (Friday).*—Hasting's Hardley, 1fs. 6d.; Belmont, 16s. 3d.; Braddyll's, 16s. 3d.; Haswell, 16s.; Soil Hall, 15s.; Rothwell, 15s. 6d.; Colchester, 15s.; Colemans and Disregard Whitworth, 15s. per ton

*Metropolitan Cattle Market (Friday).*—The supply of beasts in to-day's market was good, both as to number and quality. All heads sold slowly at barely Monday's quotations. With sheep we were not overstocked. The demand was steady, at full prices. Calves sold at a full to prices of 4d. per 8lbs. The lamb trade was heavy at full per 8lbs less money. Pigs sold at barely Monday's currency. Hides are good, and 350 head came to hand from the Isle of Wight. Calves the show of which was good—moved off heavily, at barely stationary prices. In pigs scarcely any business was doing. Milch cows were dull, at from £14 to £19 10s. each, including their small stuff

Per 8 lbs. to sink the offal. ## ALBONI—PICCOLOMINI—ALBERTINI.

THE group engraved on page 504 consists of three of "the bright particular stars" who will form the splendid constellation of Italian *prime donne* at Her Majesty's Theatre next season.

Marietta Alboni, is a popular favourite of the English public. Her triumphs have often been recorded, and her lineaments have been depicted, in our pages. It will be remembered that she first came to London nine years ago (in 1847), when she appeared at the Royal Italian Opera. She was then very young, and gifted with a contralto voice of incomparable power and beauty, approaching in depth to the pitch of the tenor. At the opening of the theatre she appeared as "Fenimella" in "Semiramide." Her next appearance was in "L'Italiana in Algieri," when she charmed the audience as much by her pleasant comedy as by her beautiful singing. She afterwards transferred her services to Her Majesty's Theatre, and has now been four or five years absent from England. During this interval, a considerable portion of which has been passed on the Parisian Opera stage, she has matured her powers, enlarged the compass of her voice without impairing its quality, and extended her range of characters. One of her greatest triumphs has been in the part of *Fides* in "Le Prophète"—a thing hardly to have been expected from her Italian education and training. During this interval, too, she has changed her condition: she is now the Countess Pepoli, the wife of an Italian nobleman, an enthusiastic lover of the arts, and a very worthy man.

Of Signora Piccolomini we gave some account in our last number. In addition to what we then said, it is sufficient to add that her department of the stage is light and elegant comedy. Her voice is a pure soprano of great flexibility, which combines sweetness and brilliancy in a remarkable degree; and in such parts as *Zerlina*, in "Don Giovanni," *Adina*, in the "Elisir d'Amore," &c., she has captivated all Italy by her youthful beauty and graceful vivacity.

Madame Albertini, in a different line, is as great a favourite as Piccolomini. She belongs to what has been called the large dramatic school, and her proper branch of the stage is the *opera serio*, to which she is peculiarly fitted, by her face and figure, the quality of her voice, and her power of expressing the tenderer passions with breadth and energy. In "Norma," "Lucrezia Borgia," "La Favorita," and other parts which appertain to lyrical tragedy, she is admitted to be without a rival in Italy. Her most recent triumph has been at Florence, where, in "Les Vêpres Siciliennes" she has created a furore which still continues. Madame Albertini is said to be of English parentage; but this, we believe, is but partly the case, her mother being Italian, while she herself is wholly Italian by education. She is now about five-and-twenty, in the flower of her age, and the fullest possession of her faculties.

## SCENE FROM "THE WINTER'S TALE," AT THE PRINCESS THEATRE.

WE noticed last week the gorgeous production of "The Winter's Tale," at the Princess' Theatre. The revival continues its unprecedented success, and if possible, increases in effect and attraction with every performance. The whole is now mellowed by repetition, and so much time has been gained that the play terminates before half-past eleven. We this week present the famous "Statue Scene" one of the most effective incidents in the play; and postpone, till a future occasion, a representation of the "Descent of *Luna* in her car" which our artists have prepared, for which we have this week been unable to find room. Instead of making any further remarks of our own upon the beauties and merits of this the most splendid of all the Shakspearean revivals, for which the public is indebted to the genius, the taste, and the liberality of Mr. and Mrs. Kean, we borrow from the columns of the *Morning Post* the following remarks upon the nature and the value of such illustrations. "If the perfection of dramatic representations," says our contemporary, "be to hold the mirror up to nature, to present the very form and manner of the times, most unquestionably everything that, by means of visual accessories, scenery, costumes, and decoration may conduce to this end must be esteemed of great value in the production of that perfect image which it is the intent and object of the dramatic poet to 'mirror,' and, in that respect, must be considered as essential to the true and perfect effect as colour is to the portrait, or perfume to the flower. Shape and shade may alone, no doubt, convey a partial representation of the figure or the flower, but there is still wanting that which, if present, would make either a reality. Viewed by the light of common sense, one would not hesitate to pronounce this a canon of the dramatic art as indisputable as it is obvious. Criticism, however, has stepped in to confound common sense, and there have not been wanting learned non-naturals, both amongst ourselves and in Germany, who would assure us, especially in relation to Shakspeare, that these things are of no importance—that their presence or absence is a matter indifferent—that Shakspeare's men and women were of all times and of no time—that human thought and human passion are the same always and everywhere—in the ancient regions of the East as in the modern kingdoms of the West—beneath the robes of the Assyrian or the dress of the Yankee. 'Admirable critics!' What a pity it is that Nature, that great lexicon of the pitchfork of their critisism, will again recur upon us with her stubborn and simple truths, and that the mass of mankind at once recognise, as by an unerring instinct, the right, and half it approvingly whenever it is exhibited to them. This high-class revival will again prove to himself, and he has had the courage, in its discharge, to break through venerable anachronisms and disregard time-honoured usepasms. In doing so, he has, indeed, met with somewhat of that resistance and reclamation which it is the fate of all reformers to encounter; but he has not been moved by

## AMUSEMENTS, &c.

HURST and BLACKETT, Publishers (Successors to H. Colburn).

Twelfth Edition, with 16 Illustrations, 6s., bound,

THE CREDENTIALS and the CROSS. By ELIOT WOLFINGTON

"Independently of its value as an original narrative, and its useful and interesting information, this work is remarkable for the colouring power and play of fancy with which its descriptions are enlivened. Among its genuine and most lasting charms is its reverent and serious spirit."—Quarterly Review.

HURST and BLACKETT (Successors to Henry Colburn).

Just published, crown 8vo, 7s., cloth, lettered,

THE SUNBEAM TIME JOURNEY. By T. S. ARTHUR, Author of "The Maiden," "The Wife," "The Mother, &c.

J. S. HODSON, 22, Portugal-street, Lincoln's-inn.

KIRBY AND SPENCE'S ENTOMOLOGY—SEVENTH AND CHEAPER EDITION.

Just published, in One closely-printed Volume, of 609 pages, crown 8vo, price 5s. cloth,

INTRODUCTION to ENTOMOLOGY; or, Elements of the Natural History of Insects. Comprising an Account of Noxious and Useful Insects, their Metamorphoses, Food, Stratagems, Societies, Motions, Hybernation, Instinct, &c. By WILLIAM KIRBY, M.A., F.R.S., F.L.S., Rector of Barham; and WILLIAM SPENCE Esq., F.R.S., F.L.S. Regard should be had to the Appendix relative to the Origin and Progress of the Work.

This work is now reduced at one sixth of the price of the sixth edition, so as to bring it within reach of all desirous of becoming acquainted with the wonderful habits of insects, and rendered more effectually the object of the authors—that of introducing others to a branch of science which they had found so delightful. Though compressed by a smaller type into one volume, it contains every line of the sixth edition, and is consequently as much adapted to the two preceding editions; and, to render the work more complete, the account of the habits of insects, furnished by Mr Spence to the Life of Mr. Kirby by Mr. Freeman, is, with his permission, given as an Appendix.

London, LONGMAN, BROWN, GREEN, and LONGMANS.

ENGLISHWOMAN'S DOMESTIC MAGAZINE. Twopence Monthly. Written by Accomplished Authors. Illustrated by Frank de Articis. The May number of this Magazine, with Illustrations, price 2d., post free, contains:—How to select the Proprietors to make such arrangements with Authors, Artists, and Printers as will secure it survival. It will be printed on superior paper and with increased care. The Illustrations (always a feature of this work) will really be the best obtainable. Thus the Proprietors have already secured the services of Robert Fowler (now engaged in Illustrating a Tale by Miss Pardoe). These gentlemen have undertaken to illustrate a Tale by Mrs. Gore House, and Two other Tales by the Proprietors. Other eminent Artists will illustrate shorter Tales, &c., among whom we may be found an interesting series of Tales of the Operas. Articles on subjects peculiarly interesting to Women. Original Poetry. Reviews of Books. The Magazine will also possess the reputation for neatness as well as interest. A Member of the Royal College of Surgeons will give a few elementary hints on Public Hygiene. Other contributors will contribute a series of Papers on Domestic Economy. Original Receipts for Cookery, &c., will be found under the head of "The Housekeeper's Pocket-book." The Journal of Fashion will be the Work-table Department is now placed in the hands of Miss PULLAN. And the Proprietors feel confident that the result of these arrangements will be a Magazine unapproached in its class. A Specimen Number will be sent by the Publisher, S. O. BEETON, 10, Bouverie-street, London, on receipt of three stamps. Or order of any Bookseller.

In announcing the celebration of the Jubilee, the Committee venture to hope that its friends and supporters of the above Charity will, through their increased liberality on this interesting occasion, enable the Directors to appropriate a considerable surplus to some special purpose connected with the objects of the Society, or which its usefulness may be increased, and its Jubilee be kept in perpetual commemoration. The present loss is to increase the number of the Society's pensioners or the amount of the pension, but this must depend upon the extra sum subscribed on the occasion.

Dinner on table at six o'clock precisely. Tickets (20s. each) may be had of the Stewards, of the Committee, of the Secretary, and at the Tavern. By order of the Jubilees Committee,

WILLIAM CRAK, Secretary.

10, Finsbury-chambers, London-wall, 3rd May, 1856.

NAVAL EDUCATION, SOUTHSEA.—Young Gentlemen are prepared for entry into her Majesty's service as Naval Cadets, &c., by Mr. THOMAS EASTMAN, R.N., five years Naval Instructor on board H.M.S. "Excellent."

Eastern Parade, near the Castle, Southsea.

Passed on the 3rd April, 1856. Nomination Jan 25th

GRIEVANCES of the POOR-LAW SURGEONS At a MEETING of the MEDICAL OFFICERS of the BOROUGH of HULL on the 30th ult., the following resolutions were unanimously agreed to—

1st. That this meeting considers the movement made by Mr. Griffin to obtain redress for the remuneration of the Union Surgeons is loyally called for, and deserving their most energetic support, and that the Union chair of this meeting be given to Mr. Griffin.

2nd. That the salaries of the Medical Officers, compared with the endurance they undergo, and the performance they give, is out of all reasonable match." The cost of bore keeping in the country districts, and the incidences and sickness being, in some instances, more than the salary and fees all taken together

3rd. That because the profession is intermixed with that of the Union, it is injurious and unjust to expect the private patients to pay for the physic of the paupers in the indirect way that is now done, and according to the new first schedule, the Poor-law cases can be operations; and when the village residences of lords of great farms were made the centre of Poor-law districts.

4th That a fair reward to the Medical Officers is for the benefit of the rate payers as well as the paupers, and is grounded on the wishes of the latter; and that the cost of physic, inclusive of salarian and extras, in the country districts does not amount to a rate of a penny in the pound, according to the parish assessments.

5th That the foregoing resolutions do establish the existence of abuses upon Physic, and that the Medical Officers look to Government alone for their redress.

6th. That the way to remedy the evil is to ascertain from every Medical Officer, as nearly as he can give, the expenses of his district, the population and acreage, the number and nature of diseases, and to remunerate him by a fixed salary accordingly; and that fees are to be allowed for extra cases on a fair and equitable scale. That a letter for the country than payment by per case.

7th. That a proper remedy for poor must be made by each Officer of the Union.

That a copy of these Resolutions be sent to the Medical Journals, and to the Times and the ILLUSTRATED LONDON NEWS, and to Mr. Griffin. (Signed) STEWART D. ROBERTS, M.D.

PRIMA DONNE AT HER MAJESTY'S THEATRE.

(*Continued from page* 502.)

the dead, and raises up before us the extinct hosts of Assyria, the ancient heroes of Greece, and the ancestors of our own Saxon race. The Muse of History casts away for the time her dead records, and rises up and acts the past before our eyes. All this the genius of Mr. Kean has accomplished; and, while he is admittedly the living head of his own profession, he is something more than this: he is the instructor of all the thousands whom he delights, and assuredly he merits some higher tribute to his genius—some more lasting reward for his ceaseless and most successful labours in the cause of the drama than the passing applause of crowded audiences. Some special mark of distinction and respect should declare that the master of the drama, like him of the pencil, the pen, and the chisel, is held in esteem by a people from amongst whom the world-renowned Shakspeare sprung, and who should unite to honour his ablest expositor."

AT THE ADELPHI THEATRE.

"EIGHT HOURS AT THE SEA-SIDE."—(SEE NEXT PAGE.)

## EIGHT HOURS AT THE SEA-SIDE.

WITH AN ILLUSTRATION BY JOHN LEECH.

If ghosts generally are permitted to walk the earth, and take as much interest in mundane matters as the royal shade of Hamlet's father, what a time the ghost of the finest gentleman in Europe must have of it at Brighton. We remember to have once tried to peep through the palings o fthe Pavilion-gardens, and receiving a lecture for so doing from an old lady of our acquaintance, that left an impression on our minds for weeks afterwards, that we had been guilty of a sort of petty high treason, and that our head was not very safe on our shoulders, so exclusive was the King of those days. What's change! The Pavilion itself, that wondrous specimen of teapot architecture, where Sardanapalus the Little kept his luxurious Court, unawed by public opinion (if we except the Royal flunkies), is now a common concert-room, where any one with a shilling in his pocket may wander where he pleases—even into that erstwhile sanctuary, the King's dormitory. Fancy the sufferings of the Ghost Royal and the Ghosts flunky —whether my Lord Grand Moneybag or John Thomas, Sergeant-Footman —at this (to them) inconceivable desecration. It is a theme for a poet, and, properly touched, "King George's Phantom Party" might take place beside "Napoleon's Midnight Review." Dear old Brighton! It was not your fault that you were made to appear selfish and unsympathising; that your waves and pebbles sang their sea songs only to patrician ears that cared little for their music; or that your beautiful downs spread out their green and undulating bosoms only for the aristocratic idler. No; you were as generous and free as all "present time, and as ready to welcome the town-dried artisan and pent-up clerk, as on this Whit-Monday when your beach and cliffs, and swaying pier and ridiculous Pavilion, are crowded with happy thousands who thoroughly enjoy their eight hours at the sea-side. Ah! there are other ghosts perhaps looking on at this great change and sharing in the happiness around them: the ghosts of James Watt and good George Stephenson, and other great spirits who, when in the flesh, worked with fire, and water, and iron, for the good of all to come. The railway has done it all.

Yes, the railway! Though one cannot but look back upon the past and sigh to think that the Road has become deserted and grass grown. It was worth a little of a man's life to travel from London to Brighton on one of those marvels of neatness and comfort, a Brighton coach. There was The Age, horsed by thorough-breds that flew along at almost a racing pace, and tooled by the accomplished Stevenson, who looked so much the gentleman that you could never make his "tip" less than a crown. There was The Rocket, with a load fit to run for a man's life, and beautifully handled by that neatest of whips, Charley Newman, whose temper was as good as his driving, and nothing could be better than that. What a pleasure it was to be carried thus through the fresh morning air which you tempered by "closing the orifice of the stomach" with the aromatic smoke of a real Havannah. You could get such a thing in those days, when smoking was the pleasant pastime of men, and not, as now, the excruciating labour of boys. What though they did charge three shillings and sixpence for a coach dinner, you had appetite to eat it and good spirits to digest it, and that was worth the money. We have heard that there still lingers on the road one four-horse coach. If it be true, and we can discover the Shades whence it departs, we vow to make a journey by it, though the horses should prove phantoms and the driver a spectre also.

What has this to do with eight hours at the sea-side? This: that, had nothing come to supplant those means of conveyance, Brighton might have remained a *terra incognita* to the thousands who now visit it. Great credit is due to the managers of the South Coast Railway for their determination to supply to the labourers of mind and body the means of breathing for eight hours at least the invigorating sea-breeze, and to give change to the mind deadened by the association from week's end to week's end with brick walls, or whizzing wheels, or blazing furnaces, or other implements of labour. We do not know at what charge this holiday is procurable; but it seems to be so valued that those who use it are to be reckoned by thousands. Surely this fact should be considered, and something done for those whose means are too small for even this cheap enjoyment, although their labour and privations are considerably greater. How "eight hours at the sea-side" is actually enjoyed by those who seek them Mr. Leech has described so well and truly that we will do no more than direct attention to his admirable drawing which adorns our present number. M. L.

## OUR COLOURED SUPPLEMENT.

LAST Christmas we introduced the novelty of Coloured Illustrations in a Newspaper, and met with so much commendation that we were induced to prepare another Supplement on the same plan. In the inventive and dramatic part of art it seems to us vain to expect that contemporaries or country can ever see the sixteenth and seventeenth centuries equalled, much less surpassed. In oil colour we have had nothing new since Paul Veronese and Rembrandt. But in the imitation of imitative art it is clear that we are far from having evolved all the processes which can be made available for the reproduction of design and colour for general use and circulation. If the eighteenth century stood far below its three immediate predecessors in ordinary painting, the imitation of imitative art by line engraving of the very highest merit was a natural offshoot of that *connoisseurship* in which the *dilettanti* of the last century were pre-eminent. We do confess that we dote on a good line engraving of that period, be the subject high-Claudesn serial landscape or Low-Dutch housewifery.

Then came the English mezzotinto, a fit translator of our cloudy outline; our hazy busts of fine ladies or naval heroes, the British bravura of our grandfathers which in Reynolds was mastery, but in poor Dick Tinto was mere slapdash. But all was admired in these loyal days of good King George and venerable Charlotte.

Then came the turn of the chemist, who has had a great deal to say in the matter of mechanical aids and appliances to reproduction in these latter days. But to the honour of art be it said that Daguerre, who led the way, was a beautiful and popular artist before ever he fixed a solar ray through his studies in chemistry. The history of photography has been the subject of too many lawyer reports to enter it necessary to allude to the further links of mechanical appliances in that direction. We, therefore, draw our readers' attention to another development of reproduction by chemical solutions in the specimens of colour-printing which we this day present to our readers. It is not for us to eulogise our own illustrations; but the many thousands of persons who have admired the originals of these on the walls of the Old and New Water-Colour Exhibitions can judge for themselves how far this mechanical process recalls these favourite subjects.

In the "Worcestershire Reaper" of Mr. Absolon we have health and robust beauty in a costume that has some remainder of the times of our grandfathers. We have all the solar glow of August given with Mr. Absolon's skill, when the landscape is yellow and the crowded field rings with the rustic jest and jocund laugh. The "Squire's Daughter" is a more delicate beauty; but has the same ease and naïveté as the "Reaper." She crosses the stones of the brook without allowing a drop to wet her dainty *chaussure*. A basket is on her arm, indicating that her mission is that of mercy or benevolence—to smooth the pillow of sickness, or aid the necessities of a dependent household; bespeaking a patriarchal relation between rich and poor, such as we are happy to say still exists in merry England, and to which the "eviction" of the hard-fisted speculator, or the counter-agrarian outrage, are still rare exceptions.

In the "Fruit Market" of Mr. Gilbert we have something more torrid than an English midsummer, and a real smack of the tropics. A fine negress head is a harmonising contrast in colour to the mellow fruits of the productive soil watered by the Amazons. And in his "Standard-bearer" we have a daring attempt to rival the rich deep masses of oil-colouring. The head is fine: it is that of a weather-beaten trooper of the 17th century. It might be a man of Marston and Naseby, or a Fähnrich of the Thirty Years' War who had smelt the smoke of Magdeburg when sacked by Tilly. Bronzed in the sun of many campaigns, tanned by the cold of many winters, and steeled in indifference to carnage, his physiognomy is not without some lines of the good principle which all the passions of politics and war have not obliterated. He can sack, but he can also do a generous thing; he can fight, but he can also pray, and remember the distant home and all its inmates.

## THE CENTRAL AMERICAN QUESTION.

### THE CLAYTON-BULWER TREATY.

CONSIDERING the importance of the question now in dispute between the Governments of Great Britain and of the United States, touching the relations of the former in Central America, and its possible results, we proceed to give a careful abstract of the facts of the case, as divulged in the blue-book of "Correspondence relating to Central America" recently issued (a volume of 303 pages), divided under three distinct heads:—1. The *status quo ante*, or position of affairs before, and the correspondence leading to, the Clayton-Bulwer Treaty. 2. The conditions of the Treaty itself. 3. The demands made under the Treaty by the Government of the United States.

#### I.—THE STATUS QUO ANTE.

The position of affairs, so far as concerns Great Britain, previous to and pending the negotiation of the Clayton-Bulwer Treaty, are not disputed, and may be briefly set forth:—1. Great Britain was in the possession and enjoyment of a settlement at Belize, otherwise British Honduras, and of the Island of Ruatan, in the Bay of Honduras, and the latter was held by her as a dependency of the former. 2. Great Britain exercised a protectorate over the Mosquito coast, by request and consent of the King of the Mosquito Indians.

With respect to British Honduras, there is no question of the fact. We find, indeed, in the course of this correspondence doubts suggested by the American Government as to original title, as well as to the territorial limits of this settlement; but as the American Government are not in any way interested in the question of territory, their suggestions upon these heads are unimportant. Neither with respect to the Island of Ruatan is there any dispute of the fact of our occupation. Mr. Crampton, in a despatch to the Earl of Clarendon, dated March 31, 1856, writes:—"It will be within your Lordship's recollection that Mr. Clayton was informed by Sir Henry Bulwer before the Treaty of 1850 was signed, that Ruatan was *de jure* and *de facto* a British possession; and Mr. Clayton has, on various occasions since, in communication with me, stated that he considered Ruatan as much a British possession as Jamaica or any other West India Island." In quoting this passage, we confess that, so far as our own examination of the published correspondence goes, it does not warrant the supposition that Mr. Clayton had ever admitted our *de jure* possession. On the contrary, the American Government appear on frequent occasions to have denied our right of possession, though they did not deny the fact of possession; and as to the *right*—to repeat again what we have just said in the case of the Belize settlement—the United States not being in any way interested territorially, their denial of the right was unimportant. On the other hand, it is stated by Lord Clarendon in his statement of the 2nd May, 1854, "that the United States had in 1847 sent a Consul to this settlement (Belize), which Consul had received his exequatur from the British Government." He contends that this circumstance "constitutes a recognition by the United States' Government of the settlement of British Honduras under her Majesty as it then existed;" and he cites other circumstances to show "that the pretensions of Great Britain to consider Ruatan and Bonacca dependencies of Belize is of long standing, and existed certainly at the period of the Treaty of 1850." Touching the supposed claim of the state of Spanish Honduras to this island (Ruatan), which, however, the United States cannot possibly have any right to interfere, Lord Clarendon, in the same document, states:—

It is true that the Republic of Central America declared that it had had a flag flying in that island from 1821 to 1839; but this fact merely rested on that Republic's declaration, and all that is positively known is that when the British Government was aware that a foreign flag was flying at Ruatan, a British man-of-war was sent to haul it down; and since that time no attempt has been made to re-establish it; but, on the contrary, when on two or three occasions complaints have been brought by the citizens of Central American States against the settlers in Ruatan to the Commandant of Truxillo, the Commandant has referred them to Belize, telling them that the island was British

With respect to the Mosquito protectorate, we find constant reference to it in the correspondence which passed between the two Governments, with suggestions as to the possibility of coming to some arrangement by which the occasion for such protectorate might be superseded. It was as protector of the Mosquitos that Great Britain, in January, 1848, expelled the Nicaraguans from San Juan de Nicaragua (since called Greytown), which was claimed, and successfully insisted upon, as part of the Mosquito territory.

In November, 1849, we find Mr. Abbott Laurence, when broaching the subject of a contemplated railway across Central America writing as follows to Lord Palmerston:—

The undersigned has, therefore, the honour to inquire of Viscount Palmerston whether her Majesty's Government are willing to enter into a treaty with Nicaragua, similar to that negotiated by Mr. Squier on behalf of the United States; whether they are willing to enter into a treaty with New Grenada, guaranteeing the neutrality of the railway now under construction; and whether they are willing to let the Protectorate of the Indians (of Mosquito) pass to other hands, under proper checks and guards for their humane treatment, and let such parts of the territory said to be occupied by them as may be necessary be dedicated to this great work.

The negotiation about the railway being abandoned, Lord Palmerston is applied to for the co-operation of the British Government in the formation of a ship canal connecting the Atlantic and Pacific Oceans, and in guaranteeing the neutrality of the same; and, when making this proposal, the American Minister (Mr. Abbott Laurence) states that he has been "instructed by the President to inquire whether the British Government intend to occupy or colonise Nicaragua, Costa Rica, the Mosquito Coast (so called), or any part of Central America?"

To this Lord Palmerston replies (Nov. 18, 1849):—

With respect to the first part of your inquiry, I beg to say that her Majesty's Government do not intend to occupy or colonise Nicaragua, Costa Rica, the Mosquito Coast, or any part of Central America.

With regard to Mosquito, however, whose political connection has existed between the Crown of Great Britain and the State and territory of Mosquito for a period of about two centuries; but the British Government does not claim dominion in Mosquito.

With regard to the second part of your inquiry, I beg to say that her Majesty's Government will feel great pleasure in combining and co-operating with the Government of the United States for the purpose of assisting the operations of any company which may be formed with a view to establish a commercial communication, by means of a railway, between the Atlantic and Pacific, across the isthmus which divides the northern from the southern portion of the American continent, &c., &c.

With regard to the port of Greytown, at the mouth of the River St. John, her Majesty's Government would fully undertake to obtain the consent of Mosquito to such arrangements as would render that port entirely applicable, and on the principles above mentioned, to the purposes of such a sea-to-sea communication.

So much for our position in Belize, Ruatan, and our protectorate of Mosquito, at the period when the Clayton-Bulwer Treaty was negotiated. In the course of the negotiations, and when the first draught of the treaty was provisionally agreed upon, Sir H. Bulwer writes to Lord Palmerston (February 18th, 1850) to the effect that some of the colleagues of Mr. Clayton had still some misgivings on the subject, based upon the fact "that the governing council of the Mosquitos is still composed of Englishmen; which council, nominally Mosquito, actually English, might build forts, establish colonies, and then call upon the protection of England for such reasons they thought fit; some further explanations or stipulations should accompany, or be embodied in, any treaty of settlement between the two countries;"—a view which Sir Henry himself supported to his Government. In reply to this, under date March 8, 1850, Lord Palmerston instructs Sir Henry to deliver to the American Plenipotentiary, at the time of signing the convention, a note having reference to the communication of the 13th November, and declaring "that the British Government has no intention to make use of the protection which Great Britain affords to the people of Mosquito for the purpose of doing, under cover of that protection, any of the things the intention to do which is disclaimed in the letter to Mr. Laurence above referred to."

The substance of this declaration was eventually included in the treaty itself, instead of being given in a separate note, with the approval of Lord Palmerston, "settling was read

#### II.—THE TREATY OR CONVENTION.

The treaty is entitled a "Convention between, &c., relative to the establishment of a communication by ship canal between the Atlantic and Pacific Oceans."

The preamble states that "Her Britannic Majesty and the United States of America, being desirous of consolidating the relations of amity which so happily subsist between them, by settling forth and fixing in a convention *their views and intentions with reference to any means of communication by ship canal which may be constructed between the Atlantic and Pacific Oceans by way of*, &c." The first article of the convention we quote at length:—

Art. I. The Governments of Great Britain and the United States hereby declare that neither the one nor the other will ever obtain or maintain for itself any exclusive control over the said ship canal, agreeing that neither will ever erect or maintain any fortifications commanding the same, or in the vicinity thereof, *or occupy, or fortify, or colonise, or assume or exercise any dominion over Nicaragua, Costa Rica, the Mosquito Coast, or any part of Central America; nor will either make use of any protection which either affords or may afford, or any alliance which either has or may have, to or with any State or people, for the purpose of erecting or maintaining any such fortifications, or of occupying, fortifying, or colonising Nicaragua, Costa Rica, the Mosquito Coast, or any part of Central America, or of assuming or exercising dominion over the same.* Nor will Great Britain or the United States take advantage of any intimacy, or use any alliance, connection, or influence that either may possess with any State or Government through whose territory the said canal may pass, for the purpose of acquiring or holding, directly or indirectly, for the subjects or citizens of the one, any rights or advantages in regard to commerce or navigation through the said canal, which shall not be offered, on the same terms, to the subjects or citizens of the other.

This is the only article important to the present discussion, the others merely relating to details of construction and management of the canal.

It has here to be stated that the British Government, while conciliating to the fullest possible extent the misgivings of the American Government upon the score of the possible use they might make of the Mosquito Protectorate, thought it advisable at the same time to guard against any misconception as to the retention of their rights in the Honduras settlement, and accordingly Sir H. Bulwer is instructed, before exchanging the ratifications, and as a condition to such exchange of ratifications, to appraise the American Government that he "has received her Majesty's instructions to declare that her Majesty does not understand the engagements of that convention to apply to her Majesty's settlement at Honduras or to its dependencies."

To a declaration to this effect, Mr. Clayton, replying to Sir H. Bulwer under date July 4th, 1850, writes as follows:—

The language of Article I. of the Convention concluded on the 19th day of April last, between the United States and Great Britain, describing the country not to be occupied, &c., by either of the parties, was, as you know, framed and proved by your Government, and it was neither understood by them, nor by either of us (the negotiators), to include the British Settlement in Honduras, commonly called British Honduras, as distinct from the State of Honduras, *nor the small islands in the neighbourhood of that settlement, which may be known as its dependences.* To this settlement and these islands the treaty we negotiated was not intended by either of us to apply. The title to them it is now, and has been my intention throughout the whole negotiation, to leave, as the treaty leaves it, without disowning, affirming, or in any way meddling with the same, just as it stood previously.

Sir H. Bulwer does not seem to have remarked the discrepancy between the words "Settlement at Honduras or to its dependences," used by himself, and those employed by Mr. Clayton, "Honduras, nor the small islands in the neighbourhood of that settlement which may be known as its dependences;" or, at least, not to have considered it of sufficient importance to call for further explanation, or to justify a delay of the interchange of ratifications of the treaty. On the contrary, he accepts the communication from Mr. Clayton as perfectly satisfactory, and, writing, to Lord Palmerston under date July 8, he says:—

Your Lordship will perceive that the Secretary of State fully assents to the fact that the rights of her Majesty over the British settlement at Honduras and its dependences remain untouched by the convention of the 19th April, and I have, therefore, exchanged a copy of that treaty, &c.

From the sequel, however, it would appear that the words used by Mr. Clayton were used advisedly; and with the full intention that the rights of her Majesty to the settlement at Honduras and its dependencies, or supposed dependencies, hitherto undisputed, should be wholly defeated by force of this convention—[illegible] not signed, it was ratified, at the request of the United States, subject to a supplement of a special and limited purpose [illegible]

Mr. Buchanan, in his Remarks of May 2, [illegible] throws much light on this matter:—"The small islands in the neighbourhood of that settlement." What are they? These are undoubtedly Cays Casina and the cluster of small islands on the coast, at the distance of three leagues from the river Sibun, particularly specified in the British Convention with Spain of 1786." So that Mr. Bulwer meant nothing, and Mr. Clayton another, when signing the Convention; and the American Government insist upon adhering to Mr. Clayton's meaning.

#### III.—DEMANDS OF THE UNITED STATES' GOVERNMENT UNDER THE CONVENTION.

The demands of the United States' Government under the treaties—1. That the British Government shall abandon its settlement at Belize, with the exception of a very limited portion. 2. That they shall abandon the isle of Ruatan, ceding it to the State of Honduras. 3. That they shall abandon the Mosquito Protectorate, and "withdraw from Bluefields" (the seat of Government in Mosquito), whom "the former relations of the Mosquitos to Nicaragua and Honduras, as successors of Spain, will be naturally restored."

Such are the requirements insisted upon by Mr. Buchanan, in his despatch, dated January, 1854. The following is a sample of the arguments by which these demands are supported:—

The language of the convention is properly mutual, though in regard to the United States it can only restrain them from making future acquisitions, because it is well known that, in point of fact, they were not in the occupation of a foot of territory in Central America. In reference to Great Britain, the case is different, and the language of the convention is future, but to the past, because she was then in the actual exercise of dominion over a very large portion of the eastern coast of Central America. Whilst, therefore, the United States had no occupancy to abandon under the convention, Great Britain had extensive possessions to surrender in the States of Guatemala, Honduras, and Nicaragua. And yet the British Government until the present moment have not deemed it proper to take the first step towards the performance of their obligations under this convention. They are still in the actual occupancy of nearly the whole coast of Central America, including the island of Ruatan, in the very same manner that they were before its conclusion. This delay on their part surely cannot proceed from any obscurity in the language of the convention. * * It has been said that the first article of the convention acknowledges by implication the right of Great Britain to the Mosquito protectorate—a right which the United States have always contested and resisted—a right which would continue to Great Britain that entire control over the Nicaragua ship canal and the other avenues of communication between the two oceans, which it was the very object of the convention to abolish, and to defeat that equality between the parties in Central America which was its special purpose to secure. Surely the United States could never have been guilty of such a suicidal absurdity

To this Lord Clarendon replies in an able statement, dated May 2, 1854, in which, with respect to Honduras and its dependencies, he cites the cautionary declaration appended to the treaty, and contends that, in virtue of the mutual agreement between the two Governments, the title to and limits of existing claims were to be in no respect affected or compromised by the treaty. With respect to Ruatan, in particular, he disputes the position that, if that island were to be abandoned by Great Britain, it would necessarily revert as a Spanish inheritance to the state of Honduras. With respect to Mosquito his Lordship states:—

Mr. Buchanan lays it down as a fact, that Great Britain held the sovereignty of the Mosquito coast prior to 1850; and he then states that Great Britain still continues to hold this sovereignty, although the Treaty of 1850 prohibits her from so doing. But Mr. Buchanan confounds the two conditions of a sovereignty and of a protectorate, and under this error treats the agreement "not to colonise, nor occupy, nor fortify, nor assume nor exercise dominion over" as including an agreement not to protect. With respect to sovereignty, Great Britain never claimed, and does not now claim or hold, any sovereignty in or over Mosquito; but, with respect to the protectorate which Great Britain has long exercised over Mosquito, her Majesty's Government asserts that the Treaty of 1850 did not, and was not meant to, annihilate such protectorate, but simply to confine its power and limit its influence

Generally Lord Clarendon refers to the circumstances under which the treaty was signed as a guide to the spirit in which it should be interpreted, and insists that it could not have a retrospective effect, being only intended to restrain from future acquisition of territory, &c. Mr. Buchanan, in his "Remarks in Reply to Lord Clarendon's Statement," under date July 22, 1854—a very long and laboriously-prepared document—says: "If any individual enters into a solemn and explicit agreement that he will not 'occupy' any given tract of country, then actually occupied by him, can any proposition be clearer than that he is bound by his agreement to withdraw from such occupancy?" And, again, in a subsequent rejoinder, under date Oct. 4, 1855, he reiterates this position, and insists that the clear operative effect of the treaty is to require the British Government to withdraw from all territories occupied by them at the time of signing it. "To withdraw," he says it down, "is not to occupy; and not to occupy is necessarily to withdraw." Lord Clarendon, in the course of these discussions, repeatedly suggested to Mr. Buchanan the propriety and desirableness of referring the points in dispute to arbitration; but such suggestions the latter has always discouraged, but upon different grounds. On one occasion he replied "that there was nothing to arbitrate," that his case was so clear as not to admit of a doubtful interpretation; and cited Vatel, who, in his chapter on the "Interpretation of Treaties," laid it down that "the first general maxim of interpretation is *that it is not allowable to interpret what has no need of interpretation.*" On another occasion, says Mr. Buchanan, writing to his Government (Nov. 21, 1854):—

In the course of the conversation he (Lord Clarendon) intimated that it might be desirable to have the opinion of a third Power on the true construction of the Convention. To this I playfully observed that it would now be difficult to find an impartial umpire, as they had gone to war with our arbitrator, the Emperor of Russia.

Such are the bare facts of the case as it stands between the two Governments. During the progress of the dispute various events have occurred in Central America which tend to still further complications. These, however, we have not entered upon in the present article.

## NOTICES OF NEW INVENTIONS, &c.

BY JOHN BOURNE, C.E.

### IMPROVEMENTS IN LOCOMOTIVES AND RAILWAY CARRIAGES.

A PATENT has been taken out by Mr. W. A. Fairbairn and Mr. G. Haslem, of Manchester, for improvements in locomotives and other carriages used on railways, of which the main object is to enable the wheels better to accommodate themselves to the curved portion of the line by giving some lateral play to the axle; but this lateral play is controlled by the interposition of indiarubber or other elastic substances so as to obviate jerks. A similar elasticity is given to the rods which connect the wheels of coupled locomotive engines, so as to obviate the enormous strain which is called into action if these rods be not precisely of the right length.

### PROPELLING VESSELS BY COMPRESSED AIR.

A patent has been taken out by M. Mickletwaite, of Leipsic, for propelling vessels by forcing air out at the stern, and also for steering vessels by means of a nozzle of compressed air which may be pointed in any direction. One disadvantage of air when employed for propelling vessels is that it is absorbed by the water; but this disparagement applies mainly in cases in which the propulsion is accomplished by the ascent of the air between the water and the inclined plane of the vessel's run.

### RAILWAY WHEELS OF MALLEABLE IRON AND STEEL.

Mr Brenner has taken out a patent for the construction of railway wheels by running into a mould molten malleable iron or steel. It is difficult to see on what a basis such a patent can rest, as it will be as optional with any one to cast railway wheels in moulds as any other object whatever. The difficulty heretofore has been to get sound castings of malleable iron or steel without subsequent hammering, for iron vaporises at nearly the same temperature that it melts, and castings formed of malleable iron or steel are honeycombed so much as to be unsuitable for most purposes. The remedy for the fault is to run the metal under pressure, and the boxes into which the metal is run should be very strong, and the metal should have a very high heap so as to impart a la·geamount of hydrostatic pressure. There are also some other precautions proper to be observed; and by attention to them objects of malleable iron and steel of every kind may be formed by casting, whereby great expense will be saved, and a more perfect article will be obtained.

### IMPROVED FIRE-ARMS.

A patent has been taken out by Mr. Rogers for a species of gun which is capable of firing several shots of the same barrel. The expedient for discharging the powder used in the Prussian needle gun seems to be the most appropriate for this new gun. In the Prussian needle gun, a needle which penetrates the side of the barrel pierces the cartridge when pressed in upon it, and ignites the cartridge in some detonating silver which the pressure of the needle inflames. It is clear that a long cartridge containing many shots may as easily be put into a gun as a single charge, and if a needle be fitted opposite to each charge then each charge may be fired off successively. Existing guns may be altered to this plan, and each will do six times the execution it can do just now.

### IMPROVED BUTTON.

A new and useful species of button has lately been introduced into this country. A metallic eyelet hole is first introduced where the button is to be inserted, and the shank of the button, which is split into four diverging pieces, is pressed through the eyelet-hole, and these a hook or groove at the point it cannot be withdrawn unless the four pieces are again pressed together. It would be simpler to rivet the shank over on a washer placed behind, as is done in envelopes closed with a metallic seal.

### PASCAL'S MIXED VAPOUR ENGINES.

M. Pascal of Lyons has recently contrived arrangements for producing motive power by burning coal in close vessels; the air required for the combustion being forced in by a pump, and a jet of water is also forced into the vessels so as to generate a certain quantity of steam. The steam mixed with the products of combustion is employed to drive a high-pressure engine; and the boiler is thus dispensed with, and it is supposed a saving of fuel effected. The idea of using the products of combustion carried on in a close vessel with the addition of a certain proportion of steam as a source of motive power is in my judgment a sound idea, and one which will some day be reduced to practice. But M. Pascal's plan in its present form will never do. There is no means of feeding the fire with coals without letting out the steam and smoke, and moreover such a mixture, if brought to a high temperature, would have a very corrosive action upon any engine of the ordinary description, and a new species of engine must be contrived suited to the altered circumstances in which it will have to act.

THE FENCING OF CIRCULAR SAWS.—Sir,—Fearful circular-saw accidents having become so common, and there being a prevailing impression that these saws cannot be fenced without detriment to their utility, I venture to suggest to the public, through the medium of your valuable columns, a simple and effectual plan, which is as follows:—Enclose one-half of the saw with a flat steel guard, cut-side and edgeways to the teeth, about one-sixteenth of an inch thinner than the cut of the saw, and 2½ inches broad, for an average-sized saw. This guard is to slide round the teeth through the grooves one supported in the table level with the centre, and the other directly above it, centre of the same, supported from above and outside the teeth. Thus can the saw be entirely fenced above the table, and unfenced at pleasure, from any space up to the full cut, by sliding round from the person sawing the, steel guard in the grooves. Trusting you will find space for this that the intended good may proceed from it, I am yours truly, A CONSTANT SUBSCRIBER.

COMMERCIAL VALUE OF THE HOG.—The *Working Farmer* states that the value of the hog crop this year in the United States will fall little short of 200,000,000 dollars, or 50,000,000 dollars more than the cotton crop. Mr. P. L. Simmonds, in his "Transactions of the Highland Society," gives some interesting statistics in relation to the number of swine raised in various countries, as nearly as can be ascertained. In the United States there are believed to be 40,000,000, or more than in all the States of Europe combined. In Great Britain the number is estimated at 2,000,000, of which Ireland has a large proportion, and Scotland scarcely 200,000. Austria has about 5,500,000 swine, and Austrian Italy about 360,000. France has 5,000,000 to 6,000,000. Russia has immense numbers of wild hogs; but they are merely skin and bone, valuable principally for their bristles. These bristles, although their consumption has greatly diminished in England and the United States, are still necessary for shoemakers and saddlers; and probably 500 to 1000 tons of bristles reach England through Prussia and other neutral countries. It is estimated that 98,000,000 pounds of lard are made in the United States, of which 20,000,000 pounds are made in Cincinnati. England and Cuba each take annually 9,000,000 or 10,000,000 pounds of American lard.

## HINTS FOR A NEW BUDGET.

*(From a Correspondent.)*

IT is generally understood that the Budget for the year will not be proposed till a late period of the Session. At this juncture as much time as possible ought to be conceded to the Chancellor of the Exchequer to mature his Financial Statement. In 1854 and 1855 the deficiency in the revenue, amounting to £24,350,242, was provided for by loans and Exchequer Bills and Bonds, which added to the funded and unfunded debt. The Chancellor must again enter the market as a borrower, and the interest on the National Debt must be increased, for which, of course, future provision must be made. That class of mercantile politicians who fondly look forward to an enduring peace are already preparing to expend gigantic sums on Continental railways, especially in Russia and Italy; others are contemplating colossal investments in Turkey. The freedom of the Danube also offers an inviting field of enterprize. Whoever looks before him must anticipate a large and continuous drain on the Bank of England to complete these plans, not dissimilar in their monetary action from those which followed Mr. Canning's policy when he recognised the independence of the South American States. On the other hand, we have a sustaining power in the mines of California and Australia which did not then exist. However, all these outlets of industry and investment must exercise a powerful and continuous influence on the Money Market, and ought to inspire the Chancellor of the Exchequer with caution; nor are these the only circumstances which press upon his immediate consideration. The Anglo-French Reciprocity Association are not inactive. They will earnestly endeavour to realise their peculiar policy, on which the French Emperor and his chief advisers look with decided approbation; but this can only be effected by a reduction of our duties on wines and spirits, the staple productions of France. This concession on our part would at first lower the Customs receipts; and, as the competition of our neighbours in fire-insurance can only be neutralised by a large reduction of the duties now levied, we must prepare ourselves for a certain decline in that portion of revenue which is raised by indirect taxation. It is from these various points of view that forethought should contemplate our next Budget, instead of following the beaten ruts of routine.

Every wise man now acknowledges that in respect to our military and naval armaments we were unprepared for the Russian war; and, fortunately for us, the late Czar was taken by surprise, as he did not count upon the alliance of England and France. The lesson we have received must not be lost; so we may set aside the once-popular doctrine of retrenchment and economy; and, indeed, under whatever circumstances a nation may be placed, a narrow and starving outlay is as injudicious as a reckless expenditure; for, if the latter exhausts the means of defence when real danger menaces, the latter invites attack by announcing to the enemy that the means of resistance have not been prepared. But this point of finance may be put in a clearer light if the more prominent portions of a Budget were separated and classified into two distinct schedules, for then it would be seen at a glance where retrenchment was practicable and where it was impossible. For this purpose let be assumed that the peace revenue amounted to £50,000,000. This aggregate could be divided into two distinct heads—the one containing the interest of the National Debt, the other comprising the current expenditure for ordinary governmental purposes. The former may be treated as a fixed quantity, the latter as a variable quantity, and, for the sake of distinctiveness, they might be respectively designated Schedule A and Schedule B. To Schedule A, £30,000,000 would be allotted, and until some portion of the principal of the debt were cancelled, or some reduction made in the rate of interest, this department of the Budget must remain beyond the control or modification of the Finance Minister, however enamoured of retrenchment. He, therefore, can only operate on Schedule B, which would embrace all payments to the Civil List, &c., the Army Navy, and Ordnance; and, by the hypothesis, Schedule B must be supplied with £20,000,000. By constructing a Budget in this simple form many delusive expectations would be at once and for ever removed. People look at the large sum of £50,000,000, and think it capable of easy reduction, not considering that of that aggregate £30,000,000 is a fixed quantity. The Civil List may also be regarded as a fixed quantity, for since 1841 down to 1855 the fluctuations on it have been merely fractional. If we are henceforward wisely to prepare for the eventualities of war, we must not rashly reduce the Army, Navy, or Ordnance. The only departments that remain into which the pruning-knife can be inserted are: Annuities and Pensions, Salaries and Allowances, Diplomatic Salaries and Pensions, Courts of Justice, and Civil Services charged on annual grants of Parliament, and payments of unclaimed dividends. But all these items together do not offer a rich harvest, as will be seen from their enumeration in 1855:—

| | |
|---|---|
| Annuities and Pensions ... ... ... ... | £343,922 |
| Salaries and Allowances ... ... ... ... | 162,697 |
| Diplomatic Salaries and Pensions ... ... ... | 149,244 |
| Courts of Justice ... ... ... ... ... | 493,083 |
| Miscellaneous Charges on Consolidated Fund ... ... | 182,119 |
| Civil Services charged on Annual Grants of Parliament, &c. | 6,741,126 |
| | £8,069,191 |

On the first five items the most rigid economy could afford no appreciable relief; on the last some deductions might certainly be effected, but a million would be a large margin. It, then, the nation can not or must not hope for any great release from the pressure of fiscal burdens in their aggregate, may not the weakest and poorest expect some alleviation by a more equitable repartition of taxation? That is a very feasible proposition; at any rate it merits a careful consideration by all who have the courage to throw off the shackles of routine, and sincerely desire practically to extend the principle of Free Trade; for he is a sorry statesman who wills the end and refuses the means.

It is an incontestable truth in political science that taxation is designed to take effect not on *persons* but on *property;* not on *individuals*, who die, but on *classes*, which can never die. When a national debt is incurred it becomes a mortgage on property, not on labour; and in this sense it is understood by those who advance the loans which constitute the debt. The security they look to is the land, the various structures raised upon it of every description, the fertility of the soil, and the abundance of the metals and minerals contained in the bowels of the earth. These are permanent, and by their nature irremovable; and, in a wide yet strictly legitimate sense, they may be deemed indestructible. However these forms of property may change ownership, they ever belong to classes; and whoever comes into possession of the securities of an indebted Government, as these forms of property are, becomes liable for that indebtedness in proportion to his property. But individuals, as here contradistinguished from classes, are but birds of passage; in their persons or bodies the creditor has no security whatever, since all are free to emigrate when they please. Property may redeem its debt, and then the mortgage on it is cancelled; but if, for the convenience of the debtor, the creditor is content to postpone the payment of the principal on the condition of receiving an annuity in lieu of such payment, all honour and equity demand that that property should discharge that annuity. To throw that obligation on others, either wholly or partially, would be as unjust as for a wealthy owner of warehouses to make his servants pay the premium of insurance against fire. A national debt incurred to protect property against the ravages of hostile invasion is not remotely different from the sums paid as the guarantees of indemnity against loss by conflagration.

Under these views it has been proposed, in the construction of a future Budget, to place in Schedule A a tax on property sufficient to pay the interest of the National Debt, the current expenditure of the Government being confined to Schedule B, and to be raised indirectly, as at present, on articles of consumption. Such an arrangement would enable the Chancellor of the Exchequer to make an enormous reduction in Customs and Excise, by which all who were assessed to Schedule A would be most extensively relieved; for, as in the first instance, their income would be diminished by the tax on their property, so the purchasing power of what remained would be prodigiously enhanced. The industrious classes would be constantly employed at remunerating wages, and thus their power of consumption would be increased, and with it of necessity the value of land, which is the ultimate source of all products, would be improved. So far as poverty is the source of crime, and of the expenditure which crime entails, both would be diminished; and men would be enabled, through their improved condition, to educate their children without applying to Parliament for grants and aids. By such a change of system property would be more firmly secured; but what is paramount to all other considerations, and ought to influence a Christian Legislature, justice would be done to the sons and daughters of toil.

These doctrines may prove unpalatable, but truth always finds it hard to get an introduction into good society. Prejudice may be shocked, and routine offended; selfishness may take alarm; nevertheless, what is here written is only an expansion of the commercial policy of Sir Robert Peel, when he introduced the Property and Income Tax to counterbalance any deficiency the Revenue might sustain when he reduced the tariff.

## THE CRIMEA.

### DESPATCH FROM GENERAL CODRINGTON.

War Department, May 3, 1856.

Lord Panmure has received a despatch, of which the following is a copy, addressed to his Lordship by General Sir William Codrington, K.C.B.:—

Sebastopol, April 19, 1856.

My Lord,—On the 12th instant General Luders sent an answer to my letter as to the entrance of our vessels into the harbour. It was to the effect that he had received orders to place no impediment in the way of vessels of any description entering the harbour of Sebastopol. I accordingly informed Admiral Fremantle; and on the 14th instant he proceeded to the harbour with his flag, on board her Majesty's ship *Banshee*, and, passing through the lines of wreck, anchored inside the quay of Fort Paul. Having met the Admiral in the dockyard, we went up the harbour in a small steam-boat, and, passing also along the north side, landed at Fort Constantine, receiving all civility and attention on the part of the Russian officers.

General Luders and suite, Marshal Pelissier, General La Marmora, and myself, to meet him at the Traktir-bridge, at twelve o'clock, on the 13th instant, in order that we might accompany him to a breakfast on the Mackenzie Heights. The meeting accordingly took place. General Luders, with a large staff of Russian officers, was received in the French lines by a guard of honour, and with a salute of artillery; after which, followed by many officers of the Allied and Russian armies, we crossed the river and the plain of the Tchernaya, and ascended the heights of Mackenzie, at the road by which our army came to Balaclava on the flank march from the Belbek, in September, 1854.

About 6000 infantry and one battery of artillery, the division of General Vanwitsky, were paraded and marched past; a short distance further on the heights a large and ornamental marquee had been pitched, in which we were the guests of General Luders, and nothing could exceed the courtesy and attention of all the officers of the Russian army.

On the 15th General Luders came, with many Russian officers, to Marshal Pelissier's to breakfast, and to be present at some races; it is needless to say that their reception was as cordial and the attention as kind as that shown to us in the Russian camp. The afternoon was passed at the course in the neighbourhood of the Monastery of St. George, where the races and a carrousel of the Chasseurs d'Afrique finished the day.

On the 17th Marshal Pelissier reviewed the French army on the range of heights near the Monastery of St. George.

From all sides, from Kamiesch at some distance on the west, from the Feduchine, and the inner heights on the plain of Balaclava, and from the nearer camps below us, we saw the French columns, with their artillery, pass over the undulating ground below to the concentration upon their position on the heights.

At eleven o'clock we met General Luders at the Col-de-Balaclava, and, riding up the steep hill above it, we passed along the line of columns extending, in most open order than we generally form, a distance of about two miles and a half. The army then marched past, eighty-eight battalions, five regiments of cavalry, eight artillerymen, sappers, and 198 guns; the defile of this fine army lasting till three p.m.

General Luders then came to luncheon at the English head-quarters. The general officers of our army had been invited; and Marshal Pelissier, with many French officers, and General La Marmora, with Sardinian officers, were good enough to meet General Luders at the house. Your Lordship is aware that the Sardinian army is partly embarked, and the remainder getting ready to leave the Crimea.

The English army was formed at a short distance in front of these headquarters; the Siege Train and the Sappers on the right of the infantry; 49 battalions in contiguous quarter-distance columns of regiments; two troops of Horse Artillery and five batteries on the right of the line, six batteries and two heavy batteries on the left of the line—in all 86 guns. Two regiments of the Land Transport Corps were complete and in good order in rear.

General Luders rode down the line, accompanied by a large assembly of Russian, French, and Sardinian officers; and the troops also marched past him. I have the satisfaction of assuring your Lordship of the steady, the good the healthy appearance of the army; of its very apparent efficiency in every branch; of the order, quietness, and regularity with which every regiment passed by; and it was a subject of pride to us all to feel that such was the appearance of the army of England in the Crimea.

General Luders returned to Sapichenaz, having expressed himself much gratified at the attention shown him by the Allies.

I have, &c., W. J. CODRINGTON, General Commanding.

The Lord Panmure, &c.

THE NAVIGATION OF THE DANUBE.—The 15th Article of the Treaty of Peace has caused a terrible panic among the holders of the shares of the Danubian Steam Navigation Company. It is felt that the monopoly of the Danube by the Austrian Company must soon be at an end, and consequently the shares have fallen 30*l.* (£3) within two or three days.—*Letter from Vienna.*

"A DUTCH EAST INDIAMAN HOVE DOWN."—PAINTED BY G. H. ANDREWS.—FROM THE EXHIBITION OF THE SOCIETY OF PAINTERS IN WATER COLOURS.

## "A DUTCH EAST INDIAMAN HOVE DOWN."

PAINTED BY G. H. ANDREWS.

(FROM THE SOCIETY OF PAINTERS IN WATER COLOURS.)

One of the most beautiful drawings to be seen on the walls of the Old Water-Colour Society we copy in our paper of this week. It is the solitary contribution of an Associate, and is the work of Mr. G. H. Andrews. It hangs on the west wall (No. 27), on your left as you enter, and is called "A Dutch East Indiaman Hove Down." The companion picture to it on the same wall is by Mr. E. Duncan (No. 18), "Oyster-dredging off the Mumbles Head, South Wales," and very charming pendants they would make in the airiest drawing-room of the most fastidious and best-informed collector. The hulk which Mr. Andrews renders so inimitably speaks of rough voyages round the Cape by the daring descendants of Vasco de Gama, Van Diemen, and Van Tromp. It has a look about it of the Straits of Mozambique, with a smack of Rotterdam and the Zuyder Zee. We can conceive the relish which the very able painter of "The Abandoned," in the present Royal Academy Exhibition, must have felt in looking with admiring eyes at this very fine drawing. We purpose engraving the pendant to it by Mr. Duncan. Our subscribers at a distance will in this way be enabled to see nearer than words will permit what this year's Exhibition at the Old Water-Colour Society is like. Of the many English painters who have painted the sea, the foremost in excellence are Gainsborough, Turner, Stanfield, Collins, and Edward William Cooke. Gainsborough did not paint more than four or five sea-pieces, but all are good. The best is in the Grosvenor Gallery, "A Coast Scene," full of maritime life, and the true salt-water relish. Turner gave great animation to his waves, but you cannot look into his water. Stanfield, we are told by Mr. Turner's admirers, is apt to be too *puttyish*; but this objection is not altogether founded on justice. No one has ever taken the spectator further out to sea than Mr. Stanfield. His vexed ocean, as Dryden has it, seethes and *tries*. You can see into Stanfield's waves—they are in motion. Collins is more at home on sea-shore sands. He does not get out to sea like Stanfield. He dabbles (but in a masterly manner) about Cromer Sands and Babbicombe Bay. He is always within sight of bathing-machines. Cooke, on the other hand, delights in a brisk gale He is never happier than with a wet sheet and a flowing sea. He loves to see the mast bend; and nobly does he transfer to canvas a ship, the sailors and the sea itself.

"CASTLE AND CHURCH OF ST. VALERIN, SION, CANTON VALAIS."—PAINTED BY G. C. STANFIELD,—FROM THE ROYAL ACADEMY EXHIBITION.—(SEE PAGE 514.)

# THE EXHIBITION OF THE ROYAL ACADEMY.

THE HIGHLAND SHEPHERD.—PAINTED BY R. ANSDELL.—FROM THE EXHIBITION OF THE ROYAL ACADEMY

THE eighty-eighth annual exhibition of the Royal Academy of Arts was opened to the public on Monday last, the Catalogue appearing at the same time with this appropriate motto: "Les artistes . . . sont les enfans de la Paix, ils sont bien faisants comme elle, et c'est par elle qu'ils prospèrent."

The Exhibition is in many ways remarkable. In the first place it is remarkable for the slender support it receives from the Royal Academicians themselves. Of the thirteen hundred and seventy-six works of art composing the Exhibition not more than one hundred and fifty are contributed by Royal Academicians. Some of the best men are away. We have nothing from the President (Sir Charles Eastlake); nothing from that great artist, Mr. Mulready; nothing from that public favourite, Mr. Maclise, nothing from that thoroughly English landscape painter, Mr. Creswick; nothing from those admirable designers, Mr. Cope and Mr. Herbert. Not a single portrait have we from the Secretary, Mr. Knight. Mr. Gibson, the great sculptor, is not an exhibitor. We have nothing from either of the Westmacotts. The architects, Sir Robert Smirke, Sir Charles Barry, Mr. Cockerell, and Mr. Hardwick, are all absentees. Even the new Academician engraver, Mr. Samuel Cousins, is a non-contributor.

Among the Royal Academicians who have sent (and who, of course, are seen) some are seen to very little advantage. Mr. Dyce's solitary contribution, "The Good Shepherd," will not add to his well-earned reputation. We could have well spared the aged contributions of Mr. Alfred Chalon, Mr. Abraham Cooper, and Mr. Thomas Uwins. Of the Associates but two are exhibitors, and those are among the best. We miss Mr Danby, and still more do we miss Mr. Egg: we can ill spare the poetic landscapes of the one, or the well-conceived stories and harmoniously-coloured pictures of the other.

Another feature in this year's Exhibition is—and the announcement of the fact deserves a separate paragraph—there is no Octagon Room.

Another, and more important, feature is that, with but one or two exceptions, all the really clever pictures in the Exhibition are well hung. A different order of merit has been acknowledged by the hangers, and every class of art seems to have full justice done to it but that of portrait-

(*Continued on page* 512.)

## THE METROPOLITAN SERMONS ON THANKSGIVING SUNDAY.

SUNDAY last being the day appointed by Royal command for a general thanksgiving on account of the peace, the churches and chapels in the metropolis were unusually crowded, and the services unusually interesting. The form of prayer prepared by the Archbishop of Canterbury was adopted in all the Established churches; while the members of the Jewish community in London had a form of their own, written by Dr. Adler. In the Roman Catholic building nothing out of the ordinary course transpired; and the Rev. Dr. Doyle, at St. George's Cathedral Church, explained that three Sundays ago the Roman Catholics of the metropolis, in obedience to ecclesiastical authority, had united in offering up their prayers and thanksgivings for the blessings of peace. The various Wesleyan and Dissenting bodies observed the day as one of especial thanksgiving, though refusing to adopt the form of prayer prepared for the Established Church. From the *Court Circular* it will be seen that the Queen and Royal family celebrated the day of thanksgiving at the chapel, Buckingham Palace, and in the afternoon at Westminster Abbey. Collections were made at nearly all the services of the Established Church in support of the proposed Protestant Church at Constantinople in memory of those who have fallen.

### WESTMINSTER ABBEY.—THE HOUSE OF LORDS.

Their Lordships met in the House of Peers at a quarter before ten o'clock, at which time several peers, among whom were Earl Granville, the Earl of Shaftesbury, and the Earl of Harrowby, and one or two of the episcopal bench, were present. A procession was formed, headed by the Lord Chancellor, accompanied by his mace-bearer, purse-bearer, secretary, and the other persons attendants on the holder of the Great Seal. He was preceded by the Usher of the Black Rod, and followed by the peers in order of seniority. The Bishop of Bath and Wells, who was appointed to preach the sermon before their Lordships, was one of the *coriége*. The whole of the official staff of the House, comprising the librarian, the keeper of the papers, &c., the various ushers and messengers, were present; and, although the number of peers was not great, the procession was sufficiently full. Passing through St. Stephen's-hall and out of St. Stephen's-porch, their Lordships crossed Old Palace-yard and entered the Abbey by the entrance at Poets' Corner, and took the places allotted to them in that part of the nave which is fitted up for Divine service. There was a large choir, and full cathedral service was chanted. The sermon was preached by the Bishop of Bath and Wells (Lord Auckland), but so great was the crowd, and so very ill-adapted for hearing is the part of the Abbey appropriated for the accommodation of the major part of the congregation, that little if any part of the discourse reached those who were not in the immediate vicinity of the preacher.

### HOUSE OF COMMONS.—ST. MARGARET'S CHURCH.

The House of Commons met at half-past ten o'clock, and the Speaker and hon. members present, attended by their officers, proceeded to St. Margaret's Church, where the thanksgiving sermon was preached by the Rev. Thomas Garnier, D.C.L., their Chaplain. The mace was carried before the Speaker, who was followed by upwards of eighty members. A passage was kept across the street by a body of the A division of police, under the direction of Inspector Backerson. Although the public interest must have necessarily been very much divided, by the number of churches in which thanksgiving sermons were to be preached, a large crowd had assembled in Canning-square, and the church itself, to which admission was in the first instance to be obtained by tickets, was very fully attended. The service having been read by the Rev. Messrs. Davies and Morris, the rev. preacher ascended the pulpit, and proceeded to address himself to the subject of the day, taking his text from the Gospel of St. Mark, c. iv., v. 39:—"And He arose and rebuked the wind, and said unto the sea, Peace, be still. And the wind ceased, and there was a great calm."

### ST. PAUL'S CATHEDRAL.

The Lord Mayor and Corporation attended at St. Paul's Cathedral for the purpose of taking part in the general thanksgiving. Full choral service was performed, and the sermon was preached by the Very Rev. Dr. Henry Hart Milman, the Dean. At the afternoon service there was one of the densest congregations ever witnessed within the cathedral walls. The sermon was preached by the Venerable William Hale Hale, M.A., Archdeacon of London, from the 14th verse of the 22nd chapter of Ezekiel. "Can thine heart endure, or can thine hands be strong in the days that I shall deal with thee? I the Lord have spoken it, and will do it." The Archdeacon said, of the origin and causes of the war, it would not be unseemly for him in that place to speak, but he could not refrain from saying that in many senses it had been a religious war. It had been unusually free from plunder, robbery, and rapine; and on the termination of the siege, which formed the last portion of the war, it was a remarkable thing that the captured city was desolate. Had it been otherwise the result might have been awful, considering the irritation of the vanquishers, and the release they would have experienced from all kinds of restraint. Another thing the late war was remarkable for, in consequence of the rapidity of intercourse, the result of modern discoveries, which seemed to give a power over nature itself, it might be said to have been fought at their own doors. These were not merely discoveries, but revelations made at a time when Providence deemed to improve the condition of mankind, and to effect those changes in their social and national condition, predetermined in the councils of God. By means of these discoveries, or revelations, they heard of the war every day: every day brought us the news of a father's, a husband's, or a brother's death—anxiety had no respite—the chords never ceased to vibrate under renewed impulses of hope and fear. They thus knew more of war than their fathers did; should they be less thankful for the peace that had followed? What danger there was lest this nation, over ambitious, and eager for the extension of civilisation, should endanger the blessings of peace they had secured: The Archdeacon, having forcibly pointed to individual duty in such an emergency, said that no collection would be made in that church; but he trusted that all who heard him would look around them for objects of private charity, and that thus they would give a practical character to their day of thanksgiving.

### ST. STEPHEN'S, WALBROOK.

The Rev. Dr. Croly, the Rector of St. Stephen's, Walbrook, preached the thanksgiving sermon in the above church. The reverend doctor took his text from Numbers, chapter x., verse 34, and following verses:—"And the cloud of the Lord was upon them by day, when they went out of the camp. And it came to pass, when the ark set forward, that Moses said, Rise up, Lord, and let thine enemies be scattered; and let them that hate thee flee before thee. And when it rested, he said, Return, O Lord, unto the many thousands of Israel." His sincere and positive impression of the result of the war was that such result was intended by the providential government of Heaven. They had seen the most powerful empire of Europe assaulting the weak with a million of men, raised and perfected with every requisite during a forty years' peace, intending to crush the diadems of Europe; assailing a Power without alliance or help on the face of the earth. Yet let it be remembered that this colossal Power, arrayed as it was against the weaker Power, never gained a victory. He would say also that aggressive Power, with all its might, had not gained one single advantage: it met defeat after defeat, on the plain, and the Russian standard was always trampled in its own blood, giving a lesson to all nations against unprovoked war. England was supposed to be a non-military nation, but it was the only country that had an army and navy that was most prepared for the public service. More than one-half volunteered to enter the field at the most pressing and trying moments of the last glorious campaign. England was the only country in Europe in which loyalty was a principle. He would not say that there might not be loyal hearts in other countries, but England was the only one where loyalty was a principle. At that moment the thrones of Europe trembled at their foundations, and each Monarch lay with his ear to the ground to catch the groans of the coming earthquake. In England, however, it was totally different, for it remained intact in the love and loyalty of its brave sons. Those of other countries were the same—had the same emotions and the same sensibility—but the people of England had what the others had not—a pure religion, and, with God's blessing, they would keep that religion, and bequeath it to their children in all its purity. These were blessings for which England ought to be thankful. In conclusion, he reminded his audience that a collection was to be made for the erection of a Protestant church at Constantinople, not as a means of proselytism, which he deprecated, but as a monument to those who had fallen in defence of a righteous cause, and as a means of grace and salvation to the living.

### TEMPLE CHURCH.

The sermon was preached by the Ven. Archdeacon Robinson, Master of the Temple, who took for his text the 8th and 9th verses of the 46th Psalm, "O come hither and behold the works of the Lord: what destruction he hath brought upon the earth. He maketh wars to cease in all the world; he breaketh the bow and snappeth the spear in sunder, and burneth the chariots in the fire." The rev. gentleman said that, after a short but eventful conflict, the nations of the world were reposing from war, and millions of the people of this country were at that time bent as with the heart of one man in gratitude to God for the blessing of universal peace—in one general feeling of thankfulness for a breathing time at least from the scourge of war. The question of whether the foundations of a lasting tranquillity had been laid was foreign to the duties and enjoyments of that day. That belonged alone to the counsels of eternity; and, whatever might be the future determinations of Providence, no gloomy forebodings ought to deprive their feelings of gratitude, on this occasion, to Him whose sole prerogative it is to make wars to cease.

### TRINITY CHURCH, UPPER CHELSEA.

There was a large congregation in the morning, in consequence of the announcement that the Archbishop of Canterbury would preach the thanksgiving sermon. Prayers having been read by the Rev. Richard Burgess, B.D., the Rector of the parish, his Grace ascended the pulpit, and selected for his text for the occasion the second chapter of the First Book of Samuel—"Them that honour me I will honour, and they that despise me shall be lightly esteemed." He said that this declaration of Almighty God deserved their most serious attention, not so much as being a declaration of pleasure or displeasure, of reward or punishment, but as a revelation of the way in which events were ordered, either as relating to individuals or to that collection of individuals that constituted a nation. The sentence took for granted that the view of God had been revealed, and according to the manner in which man received it as a principle of life and action he was to be honoured or despised. This must be an important subject at any time, but especially so on an occasion like the present, when they approached their Heavenly Father with praises and thanksgiving for his late merciful vouchsafed unto them. Great, indeed, was the mercy which had changed the fierceness and dangers which belong to war to the calm security of peace. If that security had never been disturbed by the angry dissensions of covetousness and ambition, how many hearts would have at this time been free from desolation, and how many homes would have been preserved? Now how many hearts were relieved from sorrowing? how many homes would again be made cheerful now that peace had been restored? That peace had been restored under circumstances in which it was impossible not to trace the work of God, in whose hands were the hearts of men. He had restrained a principle of revenge, oppression, and inordinate desire for territorial aggrandisement, and given an impulse to forbearance, moderation, and equity, which could not fail to have a beneficial influence upon the future history of Europe.

### ST. ANN'S, WANDSWORTH.

The Rev. Dr. Booth, F.R.S., took his text from Isaiah xxvi, 12, 15: "Lord, thou wilt ordain peace for us: for thou also hast wrought all our works in us. Thou hast increased the nation, O Lord, Thou hadst increased the nation: Thou art glorified: Thou hadst removed it far unto all the ends of the earth."

In his discourse he showed how it was the duty of this country to accept the terms of peace which had been offered; that forgiveness of injuries was a duty incumbent on nations as well as individuals; that if we had attempted to impose more stringent terms we should, in all probability, have defeated our own object, instancing our short-sighted policy in the treatment of France at the close of the last war; that if we had succeeded in our shortsighted attempt to cripple our late vanquished opponent we should have been deprived of her aid in this present war. He then proceeded to show that overgrown empires were opposed to the interests of humanity, and were discountenanced by God himself; that the huge monarchies of antiquity were shortlived; and to prove that man's highest development takes place in small independent communities, such as the twelve tribes of Israel, the petty states of ancient Greece, and the cities of mediæval Italy.

### LINCOLN'S INN CHAPEL.

The Rev. F. D. Maurice, Principal of the Working Men's College, preached in the afternoon to an overflowing congregation from John vi. 62 "What if ye shall see the Son of Man ascend up where he was before?" The text and context, as he showed, set forth the unity of the divine and human, of Jews and Gentiles, in the body of Christ. After a lengthened exposition of this idea, the preacher pointed out the influence of its denial, or forgetfulness, upon the fate of nations. The Jewish nation had perished because it forgot its relation to humanity at large. The Quaker sect failed to take root because they were not humanity human. Turkey, "the sick man" of the East, had sickened because it did not know the human son of that God to whose verity and power, as the ruler of nations and destroyer of idols, Islam bore testimony. And if Turkey were to be restored, it would not be by that exclusive or compulsory acceptance of Christian truth, compared to which the old Moslem spirit was to be reverenced. That would be only to receive Christ as the head of a rival sect whom it was politic to conciliate. But the question was, did they at home hold Christianism as a universal and religious truth? Was Christ to them a bond of union with God and with man? There was to be an English Church erected at Constantinople. Might the gospel preached there be that preached by English tongues and English heads in the hospital of Scutari? Every church set up in memorials of British valour who had fallen in fight should be a testimony to the old faith of the Moslem in the God of Abraham, the enemy of idols; the faith of the truest and best of the Greeks in his Son; the faith of the truest and best of Latins in the same Son. Would they not be the truest Protestants in a personal Justifier. Then would England, indeed, do her work as a leader and reconciler of the nations, and then would the progress and thanksgivings of that day be presented by Him who had ascended upon high to his Father and to theirs, as the fruits of that sacrifice by which they were redeemed, and by whom He reigned in Heaven.

### ST. MARTIN'S.

Mr. Homfrey, the Vicar, took his text from Rom. xii., ver. 18, "If it be possible, as much as lieth in you, live peaceably with all men." He commenced by observing that it was impossible for communities as individuals to live together without being liable to accidental discord. The Gospel had not only affirmed this, but had declared that it would itself introduce new elements of discord. No wars had been more furious than religious wars. Still this was the incidental effect, not the principle, of the Gospel. They were constantly reminded that "the end was not yet." There were indications that they were tending towards that end. The Christian religion, in the institution of chivalry, had infused a spirit of courtesy into the rude manners of the times; and in the war just concluded they had advanced still further in this way, when they had voluntarily renounced the power they possessed of carrying desolation to the peaceful homesteads of private persons. He concluded his discourse by an allusion to the vast sums that they were prepared to expend on the war, and which, now that that expenditure was unnecessary, should be applied in part to improving the education, the dwellings, and the well-being of those classes from whom their soldiers and sailors had sprung.

### ST. GEORGE'S, HANOVER SQUARE.

The Rector of the parish, the Rev. Mr. Howarth, after expressing in well-chosen and emphatic words the sense of thankfulness which we must feel at the return of peace, proceeded to remark that while statesmen and politicians regarded the course of events as they tended to increase or depress the power of kingdoms, to promote commerce, to advance liberty or further civilisation, the Christian looked to see how they affected the prosperity of God's church and the increase of true religion. Unless this was done all else was as nothing. This might seem a trite topic, but was it too well appreciated? He could not venture to say that persons in general felt adequately its importance. Happy, indeed, would be the nation in which it would be unnecessary to insist upon it: for if the whole of the people, from the Queen on her throne to the lowest of his subjects, were penetrated with a sense of religion, and with a steady determination to fulfil the duties which it imposed, that people would have need of any special intercession. Providence would [illegible] Christian nation, or point out to it the work that was given it to do.

### ST. PAUL'S, BERMONDSEY.

The Bishop of Winchester preached in this church in the morning to very full congregation, from Psalm cxxii, v. 7 8., "Peace be within thy walls, and prosperity within thy palaces. For my brethren and companions' sakes, I will now say peace be within thee." The evening sermon was preached by the Rev. William Duncan Long, M.A., Incumbent, from 1 Peter, ii. 5., "An holy priesthood, to offer up spiritual sacrifices acceptable to God by Jesus Christ." The collections at the doors were for the schools, which are now crowded with children, and amounted to £20 4s. 9½d.

### SCOTCH NATIONAL CHURCH.

The discourse preached by the Rev. Dr. Cumming to a numerous congregation was founded on Joshua, c. xxi., v. 23: "And the land rested from war." Every Christian, he said, must deprecate war; but there were conditions of the moral, social, and political atmosphere so unwholesome and abnormal that war, like lightning, cleared the air, fulfilled a beneficent mission, and millions breathed freer because thousands had died or were buried on the field of battle. He doubted whether Mammon did not eclipse Mars in hatefulness; for, if bad things had been done under the shadow of the cross, very cruel and unholy things had been done under the name of the other. The excitement of the exchange were as fierce and desperate as those of the field of battle. War had sometimes been a positive mercy; and he was not sure that the late conflict, though it had carried rills of bitter sorrow into many a heart and home, was not on the whole a blessing, by disturbing that selfish, grasping, money-making worship of Mammon which had become the national sin of England. It was in peace that luxurious habits were acquired, and they might learn a lesson from the fact that Japan did more to prove home than all her legions put together. During the peace now begun it would be their duty to try, by God's blessing, to destroy the evil passions, at home and abroad, which were the seeds of war, and to sow broadcast those precious truths which grew up into the harvests of righteousness, peace, and joy. Underneath the boom ts of the recent war were deep, unsettled, religious questions ripening for a yet more terrible outburst. Turkey in Europe would soon disappear in all its distinctive peculiarities. "The great river Euphrates" was all but dried up; but Italy was one vast volcano, and Rome and Naples were likely to be its first orifices. He did not expect that war had finally closed. It was merely preparing to appear on a new stage, and under new circumstances, and to draw into its vortex nationalities that had ignominiously stood aloof during the last two years.

## HOW TO MAKE LONDON HEALTHY AND CLEAN.

*(To the Editor of the* ILLUSTRATED LONDON NEWS.)

April 29, 1856.

ONE of the provisions in the "Metropolitan Local Management Act" compels owners of house property to provide water for every house, not only for domestic but also for cleansing purposes; and, unless some more effective mode be adopted than by the present water supply, owners of house property will find the supply of water for cleansing purposes a very serious and expensive question.

It would appear, therefore, that one of the first works that the Board of Works has to do is to provide London with water, not merely for drinking and cooking and other domestic purposes, because the present water companies can or ought to do that, but water for cleansing and watering the streets, and all those other purposes for which the Act under which the Board is constituted makes water supply a necessary.

The present water companies cannot accomplish this, because water carefully filtered and prepared for drinking is too costly to be used in large quantities for cleansing. I therefore propose that pure sea-water should be brought to London, and used, where necessary, for cleansing purposes; and, if the Board of Works have too much on hand to accomplish this, I will undertake to find responsible men who would construct a canal on the north side of the Thames, by which pure sea-water shall, at each tide, be received into reservoirs at a sufficient elevation above London, to supply every house in the metropolis, and in such quantity that every street, court, and alley, could be washed each day with it.

The parks might have lakes of sea-water as well as fresh. The Zoological Gardens might have sea-water for such of its inhabitants as require it. Fountains of salt water might be placed at pleasing intervals throughout the metropolis. The baths and washhouses could be supplied with it; and the celebrated Charing-cross fountains might then send forth pure and refreshing sea-water, instead of hot water from the baths and washhouses, as at present; and by pipes under the Thames the south side of London might be supplied as well as the north.

The whole of this work can be accomplished and paid for by a rate of one penny in the pound on the property in the metropolis, and water direct from the sea may flow throughout London within eighteen months after Parliament shall pass an Act giving powers to a company to levy such a rate, and take the necessary lands under the usual powers.

Several parishes are, at present, in great difficulty to carry out the sanitary provisions of the "Metropolitan Local Management Act," for want of water supply. To carry out that Act, an almost unlimited supply of water must be had, and where can it be had better than from the sea?

I am, Sir, yours obediently,

29, Abingdon-street, Westminster FRANCIS FULLER

---

A YORKSHIRE STUD FARM.—While these great Rawcliffe paddocks are instinct with life and [illegible], those at Bishop Burton, which one held the sway in the three Ridings, are all but tenantless. The walk to them from Beverley is not half to be seen in our eyes, from the melancholy associations it revived of the olden time, when Squire Watt, in his "truly British" blue coat and buff waistcoat, made thoroughbreds his heart's delight. We left Beverley by the York road, and wended our way through the pleasant champaign lands of Westwood, along the side of the racecourse. The prospect from the hill opposite the stand, on the morning we first climbed it, was one that would have delighted an artist's eye. In front of us was the stand, whose silken jackets and burly crowd with their shouts of "Toad Square wins," and "he'll give him ten pound and lick his head off," had given way for the nonce to "Sam," and a quiet group of Scarlets, who were awaiting The Holderness, with their "many-twinkling" feet and tails, they trotted gently over the course. Pretty little Beverley, flanked by its magnificent minster, and embosomed there and there in the rich foliage of [illegible], lay at our feet: further on, just peeped over the undulating Westwood, [illegible], and we could not help contrasting its quiet with the restless spirit of speculation which went to and fro, month after month, the whole length and breadth of its republic, when Peter Simple—

> With Cuseley Tom and [illegible]
> And half the tag of [illegible]

was the hero of English steeplechases, or when Nancy, the bay pads of Burton Pidsea, was turning it, as well as its neighbour Hull, to sell their very beds from under them to back her. Following the footpath, we arrived at a high white gate to the left, the prosecnium to an avenue of elms, which leads to the Hall, and the church in which the Squire lies buried. Here, and at Bishop Burton Hall, which he left about three-and-twenty years [illegible], the old man always roamed among his paddocks, and watched his favourites with anxious care. The last of his brood mares, which revels here, is a mare called Birthday, by Assault, out of Nitocris, who was foaled on his birthday. He never could find in his heart to [illegible] trained; twice or three she was under orders for departure: but [illegible] arrived, he could not bear to let her go, as he said the [illegible] down. There are not a few pictures in the Hall by Dolby and [illegible] look by the former, and as large as life, faced us on the staircase. Malakoff, Alaideer, and Helmsman were far more to our taste. From the former hall, and near the bachelor residence of Mr. Frank Watt, we [illegible] Bishop Burton Hall, originally purchased by one Rogerson, a [illegible] merchant, who pulled down a two-mile scrap on the Wold in front of it. The late squire took a dislike to it, and the very masticpieces and door-frances have been pulled down. A narrow walk with neat iron fences we ever yet saw in "Merrie England," led us to the stables, on whose doors the plates of Morgan, Blacklock, Beacon, Hunter, Rockingham, Alcibiades, and [illegible] other famous [illegible] were affixed. Over the door of each box is still pointed out with especial reverence, [illegible] the identical candle in hand, through the half-ruined Hall, we came on the season room, where the [illegible] Mute. The mare's off shoulder-blade still bore marks of the [illegible] spot, and people at work with blood-stock [illegible] [illegible] [illegible]

# Memorabilia,

## LITERARY, ANTIQUARIAN, SCIENTIFIC, AND ARTISTIC.

*"A little chink may let in much light."*—OLD PROVERB.

### NOTES FROM THE MEMORANDA BOOKS OF THE REV. SIR RICHARD KAYE, BART., DEAN OF LINCOLN.*

THE entertaining collection of personal and Royal anecdotes recorded by Sir Richard Kaye are comprised in three volumes. It was purchased for the British Museum in 1851, and contains so much that is interesting, both in a literary and an historical point of view, that we commend it to the attention of those booksellers who have taste and enterprise enough to publish works of this description.

[DEATH OF GEORGE II.]

George II. usually rose at six. The page had been with him, and went out to get some wood. He shut the double door that the King might not be disturbed, and heard a noise; on coming in he found the King fallen upon the floor. He took him up, and said, "My King, my King, do speak to me." The King made a faint noise, and he laid him upon the bed. The King had asked how the wind was: there were four or five mails due from Hanover. The page went immediately to Lady Yarmouth's room, and knocked at the door. She thought it had been the King, who was bringing the letters from Hanover, and said, "Here, que t'ourries?" The page came in, and said the King was very ill. Lady Yarmouth ran up stairs, and found him apparently dead upon the bed. She sent for a surgeon, who opened a vein; but he did not bleed. In four or five hours after the wound bled plentifully, and when he was opened at ten the next day there flowed out a large quantity of blood.

Lady Yarmouth sent a message to Princess Emily, which she never forgave her, to say that the King was very ill, and wished to see her. The Princess came, and went immediately to the bed, put her face to the King's, without ever having been apprised of the King's death.

The Princess had been ill of a fever, and had not been out, but was this evening to have been of the King's party at cards. The Princess told this to Mrs. Deborah Chetwynd, and wished her to go to Lady Yarmouth. She said she could not intrude herself, but would send to Lady Yarmouth that she would wait upon her as soon as was agreable to her. Mrs. Chetwynd went to her two days afterward, and found her truely affected for the King.

Lady Yarmouth desired the King's (Geo. 3) permission to stay a couple of days, and that he might depend upon her removing as soon as she possibly could. The King sent her word that she was at liberty to stay as long as ever it would be agreable to her. She went to court in the Christmas Holidays, that there might be fewer people, and the King spoke very graciously to her, and made the Drawingroom as short as possible on her account.

It was resolved that no person should walk over Lady Yarmouth's apartments before eight o'clock. When she heard a noise, she concluded that it was the Packet from Hanover.

She sent for Princess Emily in the manner she did as she knew, if she had mentioned the King's Death, the Princess would not have come; and she wished to have her come as soon as possible, that no time might elapse to occasion any accusation of embezzlement against herself.

Lady Yarmouth removed immediately to Dover-street, where Mr. Finch had provided her a house, and where Mrs Chetwynd saw her daily She staid in England near two years, and removed suddenly. She never mentioned her Intentions till she had taken her resolution, nor even gave her reasons. The measure was supposed to be owing to the Princess Dowager; and in confirmation of their opinion was the reported advice she gave to Mrs. Chetwynd to visit her less frequently, telling her that her attachment to her would be injurious to herself, and that it would not be the means of recommending herself to the Royal family.

Lady Yarmouth certainly meant to have staid in England. She had taken a house in Albemarle-street, and had furnished another between Knightsbridge and Kensington.

Princess Emily rather had a jealousy of her, and suffered her to take her leave at a Drawingroom—which, from their long intercourse, she might have allowed her to have done in a private interview.

Lady Yarmouth was the only person of her situation who was ever regarded after a King's death.

*(To be continued.)*

* Sir Richard Kaye, he sixth and last Baronet, was son of Sir John Lister-Kaye (the fourth Baronet) by his second wife Dorothy, daughter of Richard Richardson, M.D., of North Byerley, Yorkshire. He was entered at Brasnose College, Oxford; appointed Chaplain in Ordinary to his Majesty in 1756; Sub-Almoner to the King 1758; Prebendary of South Newbold, in the cathedral church of York, in 1763; a Trustee of the British Museum in 1772 Prebendary of Durham in 1777; Archdeacon of Nottingham in 1780; Dean of Lincoln in 1783. He succeeded to the title of his half-brother, Sir John Kaye, Dec. 27, 1789, and died at his deanery house Dec. 25, 1800, aged 72. Leavin no issue, the title of Baronet in the family became extant.

### NOTES.

INTERESTING RELIC OF QUEEN MARY, PRESERVED IN THE BODLEIAN LIBRARY.—Among the numerous objects of interest preserved in the Bodleian Library at Oxford is a curious manuscript of the Hours of the Virgin formerly belonging to Queen Mary (commonly called Bloody Queen Mary), as appears by the following note written on the fly-leaf at the beginning of the manuscript:—

This Book sometymes was Q. Maryes, and lately, thrice renowned Prynce Henryes of blessed memorie, And nowe given to ye Publique Librarie of the Vniversitie of Oxford, by Richard, Esquier Auditor generall Sollicitor and of his Highnes Councell of Revenewe, whoe giueth the same as a Monument worthie to be kept, not for the religion it contains, but for the Pictures and former Royall owners sake, And in regard of a Note written especially heerin, by Q. Mary with her owne hand.

Richard Connock

Juli 7° Anno Regni Regis Jacobi 13° 1615.

† Geute you mohe Ryches as when the Shype is broken may swyme away wythe the Master for tyreese charges take away the goods of Fortune but the goods of the Soule whyche bee only the true treves geute nother Fyre can water can take away. yff you take labour and payne to doe a vertuous thynge the labour goeth away and the vertue remayneth. yf thrunghe pleasure you doe a vicious thynge the pleasure goeth away and the vice remaynethe.

Good madame for my sake remembre thys.

Your loyinge mistress MARYE PRINCOSSE.

This note is written immediately before the service "De passione Domini."

H. S. B., Oxford.

ARCHBISHOP LAUD.—The accompanying extracts from a letter from Lord Conway to Archbishop Laud may be of some interest, not only as showing to whom Laud wrote the letter published in a late number of the ILLUSTRATED LONDON NEWS, but being, in all probability, the one which Laud was answering at the time:

(Letter endorsed by Laud.)

*Lo.* Conway, Recd, Julii 11, 1644.

May it please your Grace,—The Deputy Lieutenants and Captains Alcocke did send me a fierce alarme from Carasie, desiring me to send them five hundred horse, because the Scots are within a few daies at Dumfrise, seven or eight thousand, with which army they mean to fall into Cumberland; but I am slow in answering the spurre, because the advertisement of the Scotch preparations on this side are not such as that they may be much feared as yet. *In my opinion the Scots will not come into England*; but, least they should goe against the rules of right reason, I doe provide as if they were coming.

Then it writes to him of it, but I have not heard anything from him, so that I think that in *his sadness* he did not read it.

Dated Newcastle, June 13, 1640. (Signed) CONWAY.

You will see the connection the Italicised portion of this extract has with Laud's letter.—Copied from "Peyne's Breviate of the Life of Archbishop Laud," recorded out of his own Diary, A.D. 1644.—S.

"AN OLD SAYING REVIVED."—Samuel Rogers is not the only poet who revived an old saying and wisheok it for his own. Samuel Johnson did a similar thing. Some person, in his presence, speaking of Lord Chesterfield as a wit, "Ay, Sir," said Johnson, "he is a wit among Lords, and a Lord among wits." Proclus said long ago of Critias, that he was "*Βιάτης μεν εν φιλοσόφοις, φιλοσόφος δε εν βιασταις.*"† ("A novice among philosophers, and a philosopher among novices.")—JOHN NEILSON, Southwell.

† Proclus, in "Timæum Platonis," apud vocem KRITIAS.

### QUERIES

CALF'S HEAD ROLL IN THE TEMPLE.—At the Middle Temple, until very recently, a customary fee was payable in the "Commons" bill, under an item for "*Calf's Head Roll.*" Can any Templar tell me the origin of this? In Macaulay's "History of England," vol. iii., p. 64, is the following passage:—"Nottingham was always bringing to the closet" (of King Wm. III.) "intelligence of the wild day-dreams in which a few old eaters of *calves' heads*, the remains of the once-formidable party of Bradshaw and Ireton, still indulged in the City." Bradshaw (who presided over the High Court of Justice which tried Charles I.) was a member of Gray's Inn, Ireton of the Middle Temple—both barristers. Is the "Calf's Head Roll" traceable to them, and how far was either of the honourable societies identified with that "once formidable party"?—M. T.

THEATRICAL REPRESENTATIONS IN THE REIGN OF ELIZABETH.—In the curious letter sent you by Sir Frederic Madden a short time since, from the Mayor and Aldermen of the City to the Earl of Sussex, Lord Chamberlain, mention is made of one Mr. Holmes, who, it was desired by the Lord Chamberlain, should have the appointment or place for plays and interludes. Can you, Sir, or any of your intelligent antiquarian readers inform us who this Mr. Holmes (a name not mentioned in Collier's "Annals of the Stage") was?—T. W. M.

THE LAST PERSON BURNT IN ENGLAND.—Can any of your readers inform me of the date of the last person burnt in this country? The reason of my troubling you is that at a large dinner party the particulars related in the inclosed letter becoming the subject of conversation, the statement as to the woman being burnt was treated with derision, not one of the party believing that any individual now lived who had witnessed an execution by burning in England.—W. C. B.

Sir,—I am now in the eighty-third year of my age, and remember the riots in 1780, when much, very much mischief was done, and saw the woman that was burned, in consequence; and which thus Newgate and other prisons were broken into and many prisoners liberated, and peace turned about the same time. I saw three or four heads on Temple-bar, but when put up I cannot say, but must have been up some years. I think it was between the years 1780 and 1790 that I saw sixteen men hanging all at one time on what was then called the new drop, and one woman burned to ashes; fifteen of the men's faces were turned towards St. Sepulchre's Church, and the sixteenth, whose name was Murphy, being a Catholic, his face was turned towards Lodgate-hill. The woman that was burned (whose name I do not remember) lived with Murphy, as his wife, for many years in Wheeler-street, Spitalfields, where they kept an eating-house and lived in good repute until it was discovered that he was engaged in coining: they were apprehended, tried, and convicted—he to be hanged and she burnt.—J. DENLY, Surgeon, &c., Wokingham,

### ANSWERS.

WHAT IS THE ORIGIN OF OUR NATIONAL ANTHEM?—This question being raised at the period of the Queen's visit to France, and certain French papers having stated alternately that the air was composed by Haydn and by Sully in honour of Louis XIV., a Belgian correspondent replied by the following statement, which seems to me to possess sufficient interest, and to present enough appearance of probability to be repeated:—"The music," says the authority, "which bears but a slight resemblance to the air of Sully, was composed by an English musician named John Bull (sufficiently national, this, at all events!) on the occasion of James I.'s discovery of the Gunpowder Plot. The words, written, as is stated, at the same time, seem to tend towards a confirmation of this assertion. John Bull, some years later, retired to Antwerp, where he was named organist to the cathedral, and where he died; and there, but a short time since," says this correspondent, "an examination of the archives having, under the permission of the Government, been gone through, the original manuscript of the air, with the history of the circumstances under which it was composed, was, among other documents, discovered; and there it now exists"—M. A. P., Paris.

Permit me to inform your correspondent W., that when Mr. Macaulay, in his vivid sketch of the Battle of La Hogue, describes our victorious flotilla as "insulting the hostile camp with the thundering chant of 'God Save the King,'" he states nothing which is either contrary to the fact or inconsistent with W.'s remark, that this "would stamp the date of our national air as far back as 1693." I do not know, nor is it I believe now ascertainable, by whom either the air words of our "God Save the King" were originally composed or written. Dr. Arne, who, in 1745, harmonised the old melody for the theatres, assured Dr. Burney, the author of the "History of Music," that he (Arne) "had not the least knowledge nor could guess at all who was either the author or composer, but that it was a received opinion that it was written and composed for the Catholic chapel of King James II.;" and Benjamin Victor, in a letter addressed by him to David Garrick, in 1745, tells his correspondent that the exact words of the anthem chanted at the Royal Chapel for James II., when the Prince of Orange landed, in 1688, were these:—

O, Lord our God, arise,
Egfound the enemies
Of JAMES our King!
Send him victorious,
Happy and glorious,
Long to reign over us,
God save the King!

Another verse, written about the same time, and accidentally preserved in consequence of its having been graven on the drinking-glasses of some northern Jacobites of distinction, ran thus:—

God bless the Prince of Wales,
The true-born Prince of Wales,
Sent us by Dyce;
Grant us one favour more,
The King for to restore,
As then hast done before,
The familie'

What is more probable than that the Orange partisans who fought so hard to prevent the restoration of James II., and believed his infant son to be no supposition, should, after their victory at La Hogue, raise in irony and insult "a thundering chant" of the old Stuart anthem of "God Save the King"?—B. BLUNDELL, F.S.A., Temple.

THE PINE-CONES OF NINEVEH.—Your correspondent B. N. throws a suggestion or two into last week's "Memorabilia" about the pine-cones of Nineveh. It is true that in the engraving referred to in No. 768 of the ILLUSTRATED LONDON NEWS the bunches of grapes are represented even as the fir-cones, but that resulted from the small scale of the sculpture (the engraving is one-quarter the original size). When the Assyrians portrayed them on a larger scale they cut the circular grapes accurately enough, and they always (as far as this sketch and the "Nineveh" illustrations in that engraving) accompanied the grapes with something like natural leaves and twining branches. To make grapes growing on that emblematical tree, and a grape-gatherer with eagle head and long wings, is too great a stretch for conventionality or fancy, even if Mr. Layard's very satisfactory explanations had never been given. The cone is undoubtedly a sacred emblem. In Babylonia I have seen walls built of them, and others bearing long inscriptions. One may be seen in the British Museum, contributed by Mr. Loftus. It was also represented on the Assyrian sculptures in precisely the same manner. See the engraving in No. 780 of the ILLUSTRATED LONDON NEWS, where the King is portrayed sacrificing before an altar) The cone was likewise, I believe, a symbol among the ancient Egyptians. As to the tree which your correspondent would twist into a grape vine, the facts of the architectural figures by its sides, its want of all natural form, and the Eastern traditions respecting it so thoroughly confirm Mr. Layard in his opinion of its sacred character, that I can only add, if it were not so intended by those old Assyrians it ought to have been.—WILLIAM BOUTCHER.

PICTURE OF KITTY FISHER.—I can inform the writer who signs himself "Edina," that the origina. picture of Kitty Fisher in the suggestive character of "Cleopatra Dissolving the Pearl," is now at Saltcram, the seat of the descendant of the noblemen for whom the picture was painted.—M.

There is a fine portrait of this fair celebrity in Colonel Wyndham's (the late Lord Egremont's) gallery at Petworth, although it is not that inquired for by your correspondent Edina, under the description of "Cleopatra Dissolving the Pearl." There were several engravings published of Kitty Fisher in "Suggestive Characters," two of which, presents from a deceased nobleman and intimate associate of George IV.), are now in the hands of a friend of mine.—ALFRED JOHN DUNKIN.

### TO CORRESPONDENTS.

HORSEHAIR.—It is much to be regretted that correspondents will not take the trouble to examine ordinary books of reference for themselves, before writing to us. The idea of any one "suggesting" "hitherto *celerities*" as an explanation of biter *skeleton*! Why Ohl is one among three attempted solutions of the expression in Johnson's dictionary, a work which every student should be acquainted with. The verb to *coze* does not derive from the animal, but from *cozzare*, which comes, through the French, from the Italian *cozzando*. Cozzando is derived from *cozzo*, a calf; a coward being a man who lays behind in battle, or who turns his back upon an enemy. In heraldry a lion *couverté* is a lion with his tail between his legs.

W. O. HAZA. What authority have you for "The Banbury story of a Cock and a Bull"?

RECEIVED.—*Σχολαστικος*, Josephus, Omega, E. S., Edmenston; M. P., G. J. W. Curiosus, De Wykes, Dilton; A Subscriber *ab initio*; J. H. J., Frederick P. Nielson Andro. J. Jamieson, W. Jewish, R. H. C. H. Stanley Hall, J. W. Moore, J. W., Bristol. C. H. Howard, Merrids.

## CHESS.

### TO CORRESPONDENTS.

C. I., North Carolina. It shall have a nook among the Eolgmas.

J. H. F.—Clever, but too obvious

C. T., Brighton.—Study the matchless stratagems of Bolton, D'Orville, Creole del Rio, &c., for if you number and try you will see the utter falsehood of your present vain attempts.

E. T. B., Dublin.—The first and second moves may be transposed, and by the transposition all the variations are avoided.

DELTA.—Many thanks for Games and Chess news from Auld Reekie. The numbers required shall be dispatched.

KILLIECRE.—The solution of the great Indian Problem we have given more than once. The key-move is—1. B to Q B sq.

S. E., Wells-street.—It shall be examined.

CHESTO BURIE.—Your End-game No. 1 has a flaw. How will White mate if Black at the third move play—3. B takes K R ?

M. F., Edinburgh.—The best plan is to write the initials of the pieces on their respective squares; but pray do not attempt to compose problems of your own at present. You must appreciate those of others. The idea of effecting checkmate in two moves in that gem of J. B.'s (No 363) is especially rich

E. B. C., Hoboken, is cordially thanked for his acceptable budget. The problems are excellent, and the fragments of Chess news from the other side the Atlantic full of interest and novelty.

ENQUIRER.—Postal communication with Russia will, no doubt, be resumed immediately, and when it has been we shall be enabled to afford you the information requested.

A. SUBSCRIBER.—The exact time for the meeting of the Provincial Chess Association is yet determined on. It will probably be in September or October.

R. F. D., Lisbon.—Mr Meser's emendation of Problem 831 shall be examined.

W. FINDLAY.—Problem No. 838 is one of the cleverest three-move stratagems we have published for many a day, and evidently quite beyond your fathom.

SOLUTIONS OF PROBLEM No. 835, by A. W. D. D., Philo-Chess, Kensal, Oldfips, Derevon, D. G. Beddan, W. H. Moss, W. E. B., M. H. B., F. R. S. P. P., Surrocale, Phillis, George W., Bridgish, Carleton, D. T. W., B. A., Jemmas, Miles, Clarissa, Andrew M., Delta, are correct.

SOLUTIONS OF PROBLEM No. 836, by Derevon, T. Addison, Fred. Thompson, P. R., Norwich, John de Rixton, S. S., Hartly, Carlos Leopoldo Manning, Humpty Dumpty, W. H. Rosa, Chirurg. Rurie, Delta, Maridon, Blue Mountain, Medusa, Little Dorrit, H. W. P., Sigma, Proteus, M.P., Sinbad, W. Magster, A Barrister, D. T. W., Alpha, Lear, Philip, Sivel, Charlton, F. P. G., are correct.

SOLUTIONS OF PROBLEM No. 837, by Derevon, Morton, Andrew, Perseus, T. M. G., F. L. S., etc. A Sailor, John De Rixton, Fred. T., Derby, Sivel, T. Simpson, are correct.

SOLUTIONS OF PROBLEM No. 838, by Derevon, John de Rixton, Johnsson, D. W., Peter Simple, G. T. W., S. M., F. R. S., F. N., of Norwich, R. S. Hartly, Digory, Delta, Miles, H. A., Oxford, S. H. M., Little Dorrit, Sigma, R. T., A Devonian, Philip, Mercer, Dartois, B. C. S., Octogenarian, B. Servard, A. Z., Proteus, F. W., Oldfips, Lex. G. W., R. T., Southport, are correct. All others are wrong.

SOLUTION OF PROBLEM No. 836.

| WHITE. | BLACK. |
|---|---|
| 1. R to K 2nd | R to Q R 2nd (best) (a) |
| 2. Q to Q R 8th | R takes Q (best) |
| 3 B takes Kt | Anything |
| 4. R to Kt, or R to K sq (according to Black's play)—Mate. | |

(a) If Black play 1. R to K R 2nd (ch), White mate take the R with his Bishop, and if Kt to Q B 5th, then Q takes Kt (ch), &c.

SOLUTION OF PROBLEM No. 837.

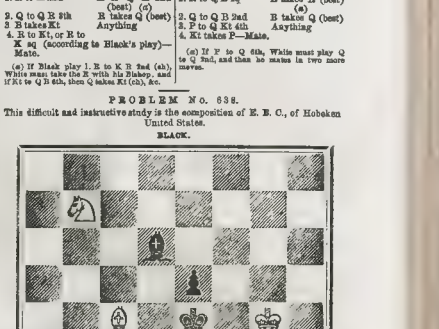
| WHITE. | BLACK. |
|---|---|
| 1. R to Q B sq | B takes R (best) (a) |
| 2. Q to Q B 2nd | B takes Q (best) |
| 3. P to Q Kt 4th | Anything |
| 4. Kt takes P—Mate. | |

(a) If P to Q 6th, White must play Q to Q 2nd, and then he mates in two more moves.

### PROBLEM NO. 838.

This difficult and instructive study is the composition of E. B. C., of Hobeken United States.

BLACK.



WHITE.

White to play, and mate in six moves.

### CHESS IN THE UNITED STATES.

The two following very lively games were played not long since between Mr. C. H. MCKENZIE, the champion chess-player of America, and Mr. W. MORTIMER, of Augusta, in Georgia. The object was to test the validity of a variation of the Bishop's Gambit which the latter has introduced with some success to the notice of the New York Amateurs.

(*King's Bishop Gambit.*)

| BLACK (Mr. S.) | WHITE (Mr. M.) | BLACK (Mr. S.) | WHITE (Mr. M.) |
|---|---|---|---|
| 1. P to K 4th | P to K 4th | 12. Kt takes Q B | K Kt to K 2nd (d) |
| 2. P to K B 4th | P takes P | 13. Q B takes K B P | P takes R |
| 3. K B to Q B 4th | Q to K R 5th (ch) | 14. Kt to K 5th | Q takes Q (ch) |
| 4. K to B sq | P to K Kt 4th | 15. R takes Q | B takes Kt |
| 5. Q Kt to Q B 3rd (c) | K B to K Kt 2nd | 16. P takes B (dis ch) | B to Q 2nd |
| 6. K Kt to K B 3rd | Q to K R 4th | 17. B takes K B P | K to Q B sq |
| 7. P to K R 4th | P to K R 3rd | 18. P to Q Kt 3rd (e) | K Kt to K B 4th |
| 8. P to Q 4th | P to Q 3rd | 19. R to K 6th | B to Q B 3rd |
| 9. P to K 5th | P takes P | 20. K B to K R 3rd | Kt to K 6th (ch) |
| 10. Q Kt to Q 5th | *P to K 5th (b)* | 21. R takes Kt | P takes R |
| 11. Q Kt takes P (ch) (c) | K to Q sq | 22. K to K 3rd | Kt to Q R 3rd |
| | | 23. P to K 7th | |

And Black won the game.

(c) The invention of this move is one of the most eminent ones, K Kt to K B 3rd, has been ascribed erroneously to Mr. MCDONNELL. It was known and adopted before he was born. What a pity it is that some one capable of the task does not undertake the restoration: Chess-openings to their original discovery! Another move would form one of the most instructive additions to our Chess literature of which it is capable.

(b) It is usual now to play K to Q sq with the view of saving the Q B Pawn, and the Q Rook—a move brought into vogue, if not invented, by Le Bourdonnais. Mr. Montgomery proposes, instead of moving the King, to march it with the King's Pawn, conceiving "that by giving up the Queen's Rook—which is out of play"—we quote from the *New York Illustrated Newspaper*—"for the Queen's Kt, which does most active service, and is an invaluable piece in this Gambit, the attack is strengthened to the extent of a powerful move." Probable though the latest nicety is required on the part of the first player in order to some out of the "skrimmage" with equality of force. Mr. M. claims that with the best play on both sides the game is finally resolved into an equal number of Pawns and Pieces, that the defence will have a Rook, Bishop, and Knight against two Rooks. We have no wish to detract from the credit Mr. M. is entitled to for this suggestion. He is a young player, and most likely to be thoroughly up in old Chess lore. When he hit upon the variation he naturally made a note, and booked it as his own. Truth, however, compels us to say that his move is not new, and, which is more to the purpose, is not good. It was practised long, long ago, and it is carefully examined found to be utterly untenable. If, indeed, he could always meet with an opponent complaisant enough to follow out the line of play he appears to have thought necessary, then his defence is not to be equalled. But it will be seen that Black in both cases (cases might have paid in a way that would destroy all the theory Mr. M as so ingeniously let up.

(e) To say the radical fault of Mr Stanley's attack, and it is upon the assumption of this error that all Mr. Montgomery's conclusions depend. If, instead of taking the Pawn, Black had quietly moved his Queen to King's square, White would have found the game in a very short time quite indefensible.

(d) The best play is perhaps to take the Kt at this point; after which, it strikes us, Black must have the worst of the fight.

(e) Impersonal, to render humorous the threatened check with the Bishop.

ANOTHER GAME AT THE SAME OPENING.

(*King's Bishop's Gambit.*)

Make the first ten moves on each side as in the previous Game

| BLACK (Mr. S.) | WHITE (Mr. M.) | BLACK (Mr. S.) | WHITE (Mr. M.) |
|---|---|---|---|
| 11. Kt tks Q B P (ch) | K to Q sq | 24. B takes Kt | P takes B |
| 12. B tks Q K | P takes K Kt (c) | 25. P to Q K 4th | R to K Kt sq |
| 13. Q takes P | Q takes K (ch) | 26. K B to K Kt sq | R takes R |
| 14. P takes Q | K B takes P | 27. R takes R | K takes Kt |
| 15. Q B takes P | K Kt takes R | 28. P to Q B 4th | Kt to Q B 7th |
| 16. Q R to Q | Q Kt to Q B 3rd | 29. R to K Kt 8th (ch) | K to Q Kt 2nd |
| 17. P to Q 5th | Q B to K 3rd | 30. R to K R 8th | Kt takes Q P |
| 18. P to Q Kt 5th | K Kt to K 2nd | 31. R takes K P | B takes K B P |
| 19. P takes P | B to Q 4th | 32. R to K B 6th | Kt to K 4th |
| 20. K to R 2nd | K Kt to K 4th | 33. R to K B 5th | Kt to K 5th (ch) |
| 21. K to K 6th | P to K Kt sq | 34. K to K sq | R to K B 6th |
| 22. K R to K sq | K Kt to K 5th | 35. P to Q Kt 5th | P to K B 7th (ch) |
| 23. Q R to Q B sq | K to Q Kt sq | And wins (b). | |

(c) Decidedly better than the move made in the previous game.

(b) Black has no redress. If he exchange his Rook for the Kt 2nd Pawn, White wins easily, and if he play the King to Bishop's square he loses his Rook. An examination of the game will show we believe, that in this variation of the Bishop's Gambit, if the defending player at his 10th move play P to K 4th instead of K to Q sq, the opponent should not capture the Q Bishop's Pawn, but should move his Queen to K sq; and the attacking player for his 11th move does take the Q Bishop's Pawn, then at his ... the defendant ought to capture the Kt with his King's Pawn

THE EXHIBITION OF THE ROYAL ACADEMY.

THE BRIDE."—PAINTED BY A. SOLOMON.—FROM THE EXHIBITION OF THE ROYAL ACADEMY

(*Continued from page 508.*)

painting. Some good portraits are very well hung; but the majority are high up, some much too high.

When we contrast this year's Exhibition with the last we ask where is Mr. F. R. Lee, and where is young Mr. Leighton, the procession-painter? As we hurry from room to room we can see nothing from their hands. And yet they are contributors. Mr. Lee has forsaken the rich meadows and green, shady lanes of Devonshire, for Plymouth Breakwater and the coast of Cornwall. He has gone yachting, and has became a marine-painter. As for Mr. Leighton, his single contribution "The Triumph of Music," is anything but a triumph. Mr. Leighton by the power of his art will never redeem the wife of Orpheus from Hades.

Among the contributions of foreigners to the Exhibition there are none so good as Ary Scheffer's portrait of Mr. Charles Dickens (No. 62) and Mr. Winterhalter's portrait (123) of Lady Clementina Villiers. Here we have intellect and beauty. Scheffer has caught a characteristic likeness of the great novelist; he has caught him, it is true, in somewhat of an unusual mood with him, but he has seized the impression of his genius with a master's hand. Sir John Watson Gordon might have given a better flesh tone to the head, but he would hardly have given us a better portrait.

Pre-Raphaelitism is, we may judge from the present Exhibition, in very rapid state of transition from over-painstaking in details to useful results. The great high priest of the school, Mr. Millais, has successfully thrown off all that required to be thrown off in the needless niggling up of very little matters, and, like a master in his art, has retained all that was valuable in the school of his own creation. Mr. Holman Hunt is following in the paths of Mr. Millais. Indeed, pre-Raphaelitism seems to have no other thick-and-thin throughout follower than the nameless painter of a picture also without a name. We refer to a picture in the Middle Room (No. 419), a mediæval duel (if we understand it rightly) painted by, we are told, a Mr. Burton. With all its excess of pre-Raphaelitism, this is the

THE LAST MOMENTS OF JOHN BROWN, OF ASHFORD, A LOLLARD, AND ONE OF THE FIRST MARTYRS IN THE EARLY PART OF HENRY [illegible]. FROM THE PICTURE BY [illegible], ACADEMY [illegible] ON

work of no common hand. The story requires a little unriddling, but the accessories are numerous and full of meaning. The cobweb and the butterfly are happy introductions.

It is sad to reflect that of the thirteen hundred and seventy-six objects of art here assembled not more than a thirteenth portion demand any critical attention; and that of the eight hundred contributors not more than eighty are really artists. A very large portion of the pictures composing the collection are portraits—memorials of affection or of vanity—while the rarer few are pretty equally divided between those within the pale of the Academy and those without its pale. What the collection would sell for under the hammer of Christie and Manson we have heard the ingenious in such matters offer very shrewd guesses. Some patrons would sigh over the amount of their commissions; others would have occasion to regret that they suffered a rare opportunity to slip by them. Some pictures by artists of reputation would sink in value; and others by comparatively unknown painters would fall at a price that would startle critic, dealer, artist, amateur, and the painters themselves.

Of all the pictures in the collection that which we should covet the most, and be inclined to carry about with us—as Sir George Beaumont was wont to carry his little Claude—would be Mr. Clarkson Stanfield's best picture—"The Abandoned" (No. 94, in the Great Room). Mr. Stanfield professes to have found his subject in Washington Irving's "Sketch Book." Here is the passage he has sought to illustrate:—

> There was no trace by which the name of the ship could be ascertained. The wreck had evidently drifted about for many months: clusters of shellfish had fastened about it, and long seaweeds flaunted at its sides. But where, thought I, is the crew? Their struggle has long been over—they have gone down amidst the roar of the tempest—their bones lie whitening among the caverns of the deep. Silence, oblivion, like the waves, have closed over them, and no one can tell the story of their end. What sighs have been wafted after that ship; what prayers offered up at the deserted fireside of home! How often has the mistress, the wife, the mother, pored over the daily news, to catch some casual intelligence of this rover of the deep! How has expectation darkened into anxiety—anxiety into dread—and dread into despair! Alas! not one memento shall ever return for love to cherish. All that shall ever be known is, that she sailed from her port, "and was never heard of more."

Mr. Stanfield has surpassed this fine description. Never was abandonment and desolation more complete! Had Falconer seen this noble picture it would have afforded him some fresh and striking touches for his "Shipwreck";—that coming wave, and all is over!

We wish we could say as much of Mr. Stanfield's only other contribution (No. 191)—"A Guarda Costa Riding out a Gale off Fuentarabia, at the mouth of the Bidassoa, Basque Provinces." But the composition is unpleasing, and the details, to our taste, a little too elaborate in one part, and too general in another.

After Mr. Stanfield we must place that established favourite with every body but Mr. Ruskin—Mr. David Roberts. What a noble realisation of all that is grand in the architecture of Bramante and Michael Angelo has he given us in (No. 10) "Christmas day in St. Peter's at Rome, 1854"; Mr. Roberts has gazed within St. Peter's with the eye of an architect, the taste and fidelity of an accomplished draughtsman, the knowledge scene-painter, and the peculiar predilections of a master of the ceremoni What architectural space, what papal pomp he has given us! To w seen this picture is to have seen the interior of St. Peter's on a great occasion. Very marvellous, indeed, is the skill with which Mr. Roberts has succeeded in rendering the architecture without injury to the figures, and yet doing full justice to the figures without injury to the architecture.

The prize for skill in historical painting we should assign this year to Mr. E. M. Ward for (No. 75) "The Last Parting of Marie Antoinette and her Son." The scene of this well-considered and well-painted picture is laid in the prison of the Temple, and the persons present are:—The Queen, her son, and daughter, the sister of Louis XVI., and the members of the Revolutionary Committee. Though in itself a more affecting incident than a former picture, by the same artist, from the life of Louis XVI., this is hardly as touching a group. Our readers will, doubtless, remember the picture to which we refer. It was one of the pictures of the English school which drew at the Paris Exhibition the greatest number of admiring spectators.

The second prize for historical painting we would unhesitatingly assign this year to Mr. Alfred Elmore, A.R.A., for (No. 176) "The Emperor Charles V. at Yuste." Mr. Elmore has found his subject in Mr. Sterling's admirable "Cloister Life of the Abdicated Emperor." Here is the scene:—

> The sunshine again tempted him into his open gallery. As he sat there, he sent for a portrait of the Empress, and hung for some time, lost in thought, over the gentle face, which, with its blue eyes, auburn hair, and pensive beauty, somewhat resembled the noble countenance of their mother, Isabella, the great Queen of Castile. He next called for a picture of Our Lord Praying in the Garden, and then for a sketch of the Last Judgment, by Titian. Having looked his last upon the image of the wife of his youth, it seemed as if he were now bidding farewell in the contemplation of these other favourite pictures, to the noble art which he had loved with a love that cares, and years, and sickness could not quench, and that will ever be remembered with his better home. * * * * * * *
>
> Again the afternoon sun was shining over the great walnut-tree full into the gallery. From this pleasant spot, filled with the fragrance of the garden and the murmur of the fountain, and bright with glimpses of the golden Vera, they carried him to the gloomy chamber of his sleepless nights, and laid him on the bed from which he was to rise no more.

The figure of the Emperor is a most happy creation. Never has senility with strength been better exhibited. You see what is passing through the old man's mind—observe, too, the action of his feet. You see the cushion on which they rest bending beneath their pressure. Very skilful throughout is the whole composition and execution. What the artist has attempted he has achieved. When was velvet—not new, but of various ages—painted more truly?

In common with the "Bench of Bishops" we admire (No. 398) "The Scapegoat" of Mr. Holman Hunt, the Agamemnon of the pre-Raphaelites. The scene he tells us was painted at Oosdoom, on the margin of the salt-encrusted shallows of the Dead Sea, and that the mountains beyond are those of Edom. Very evident tokens does the picture bear throughout of cautious painting on the spot. The distance is, perhaps, a little too near, but it is most effective. "The Scapegoat" itself is a masterly piece of elaborate animal life. So vivid is this picture in colour that it kills whatever is around it. The subject is from Leviticus, chap. xvi., and the Talmud—

> While the ceremonies of the day of atonement were in progress in the Temple, after the lots had been cast which had devoted one of the two goat for the Lord, and while it was being sacrificed as a burnt offering, the congregation present manifested their impatience by calling upon the priest to hasten the departure of the scapegoat, and afterwards by following the beast as he was led away by the man appointed, to a cliff about ten miles from Jerusalem, to mention it by the way, and shouting, "Hasten, carry away our sins." It recorded that, on many occasions, the poor beast sprang over the precipice, a there perished, but that oftimes it turned aside, to be hooted and driven awa by every "Israelite who met it, until it had reached a land not inhabited." A fillet of scarlet was bound about its horns, in the belief that, if the propitia tion was accepted, the scarlet would become white (in accordance with the promise in Isaiah: "Though your sins be as scarlet, they shall be as white as snow; though they be red like crimson, they shall be as wool."). In order ascertain the change of colour, in case the scapegoat could not be traced, portion of the scarlet wool was preserved on a stone, and carefully watched b priests in the Temple.

Four hundred and fifty guineas is, we believe, the price asked by th artist for a picture full of high qualities, though not of the most pleasan k nd.

In domestic subjects—such as come home, as my Lord Bacon has it, t men's business and bosoms—Mr. Frith leads the way with a child's birt day party, called by its artist "Many Happy Returns of the Day." A little girl whose birthday it is is a delicious creation. The composition too, is simple and appropriate. The colouring is just what it should be—true to nature, without any artistic tricks. The head of the family is, to our taster, a little too Jewy. Is this a compliment to the present Lord Mayor, or is it a portrait?

Mothers and sisters stand with tears in their eyes before a most touching and admirably-told story by Mr. J. N. Paton (No. 35), entitled "Home." How can we describe this picture? Here is the mute poetry of domestic life. A wounded soldier—a Guardsman—has reached his own home, and is received by his young wife and his aged mother. The mother hides her mingled joy and sorrow—the wife half faints with unlooked-for delight on the bosom of her exhausted husband. Every accessory assists the story. This is but an imperfect description of a sublime picture of unusual excellence. Scotland may well be proud of Mr. Noel Paton. Manlier eyes than those of mothers and sisters have turned moist before this manly and affecting picture. Her Majesty is said to have ordered a duplicate for Windsor Castle.

Mr. Leslie, whose sterling merits as a painter are only beginning to be appreciated, exhibits a small-sized figure of *Hermione*—poetic, but hardly Shakesperean. We are sorry to find that this is Mr. Leslie's solitary contribution to this year's Exhibition.

Sir Edwin Landseer has two dog and deer humanities: (No 147) "Saved," dedicated to the Humane Society; and (No. 208) "Highland Nurses," dedicated to Miss Nightingale. The "Saved" (the larger picture) is hung too high to be seen to advantage; we can see, however, that the Newfoundland dog is of the right breed, and rightly rendered to the less hair. Here the dedication is appropriate. We wish we could say as much for the other dedication. There is little unintentional delicacy in dedicating to Miss Nightingale a picture of young deer licking the wounds of a mother of the herd. The picture is carefully painted in Sir Edwin's well-known manner.

Mr. Webster has only one picture. He calls it "Hide and Seek" (No. 114), and the title will convey to all who know anything of Mr. Webster's works the truthful manner in which he has represented a favourite game. In point of colour it is warmer and less clayey than is common with this painter.

Mr. Frank Stone—another well-confirmed favourite with the public—has been apparently as idle as Mr. Webster during the past year. His only contribution is (No. 210) "Doubt—or, Unheedful Vows may be Heed fully Broken." The title hardly conveys the story which represents a young man divided in his love between two young girls. The picture is larger in size than is customary with Mr. Stone. The treatment is in his usual coquettish style; and the colouring (he always coloured well) even better than ordinary.

Mr. James Clarke Hook has made a stride this year from comparative mediocrity into real excellence. He has sent four pictures, and all four true to English landscape nature and the coast life of this country. If Mr. Hook continues to paint in this style, and thus admirably, we shall have one to repair the loss which English art sustained in the death of Collins. Of his four pictures we prefer (No. 557) "The Fisherman's Good Night."

Of Mr. Millais, whose fine genius is fast ripening into maturity, we shall reserve what we have to say until we engrave one of his five very varied and important contributions to the Exhibition. We shall for the same reason reserve what we have to say about Mr. Phillip, who is seen to great advantage in four pictures of unusual excellence. The same reason will apply to the works of Mr. Le Jeune and Mr. Rankley.

few envious artists assure us that Mr. T. Faed is not in his "Home and the Homeless" (No. 273) up to his picture of the last year, "The Mitherless Bairn." Artists, alike envious, said the same thing about Wilkie. Never have we seen them, Mr. Faed. There are qualities of the true kind in your "Home and the Homeless." If you were a little rougher in some of your touches you would leave little to desire.

Mr. Hannah, a dilatory painter (whose pictures have been bought by Mr. Rogers and Mr. Dickens—no ill compliment to his genius), contributes (No. 230) "Master Isaac Newton in his Garden at Woolsthorpe contemplating the Fallen Apple." The figure of Newton is well conceived, and the action is appropriate to the sentiment. A tiny picture by the same artist—a policeman's hand through an area window offering a wedding-ring to a cook, surrounded with eatables—is comic in conception and well told.

Italy and Holland are again this year most admirably represented by Mr. E. W. Cooke—who divides his love between Venice and Rotterdam, nay, more, divides the critics whether they are to prefer.

A picture by a young man whose name is new to us—Mr. Wallis—must not be lost sight of. It is called "Chatterton," and represents the death-bed, in Brooke-street, of the "marvellous boy." His torn papers are strewed over the floor, and there lies the phial that ended all. The distant view of London through the garret window assists the composition. Mr. Egg, the painter, has purchased this clever picture.

The ladies are seen to advantage in the present Exhibition. The two Miss Mutries delight us, as of old, with their exquisite flowers. Mrs. E. M. Ward is improving; so, too, is Miss Solomon; while Mrs. Carpenter—witness her head of Dr. Arnott—is still at the head of female portrait-painters.

The Portraits, as we have already observed, are not seen to great advantage. Sir John Watson Gordon still keeps the lead with his portrait of David Cox, the water-colour artist (No 138); Frank Grant has an admirable full-length of Lord Raglan (No. 116); Boxall is gaining ground: Deanges is injured by being hung too high—we can only guess at a distance what those "Two Sisters" must be like when near. Henry Phillips is beginning to remind us of his father. Ross and Thorburn have still, and deservedly, the monopoly of miniatures; and in chalk-drawing, now that Mr. Richmond is away, no one is better than Mr. Charles Martin.

In the Architectural Room the principal contributions are from Mr. Sydney Smirke and Mr. G. G. Scott. The former exhibits "Two Sections of the New Reading Room at the British Museum—one showing it finished, the other showing its Construction wholly of Iron and Brick" (No. 1116). Mr. Scott has sent "The Contemplated New Chapel, Library, Rector's Residence, and other additional Buildings at Exeter College, Oxford" (No. 1094); and "The New Church about to be Erected at Haley-hill, Halifax, by Edward Ackroyd, Esq., of Haley-hill and Denton Park, Yorkshire" (No. 1107).

The Sculpture Room is remarkable for the absence of portrait statues. We only observed one. It is not, however, without its attractions. In the centre are two busts, in marble, of her Majesty one by Baron Marochetti, the other by Mr. Durham. The Baron's bust is coffee-stained, in imitation, perhaps, of the antique; Mr. Durham's is the pure marble itself Both busts are clever; very unlike one another, and neither very like her Majesty. In poetic figures and the poetry of their art Mr. Marshall, Mr. Bailly, Mr. MacDowell, and Mr. Munro still keep the lead. The busts seem generally poor.

Such is a cursory account of the eighty-eighth Exhibition of the Royal Academy. We shall have more to say about it hereafter. In the mean time we must say a few words about our four Engravings from four of the pictures forming a part of the Exhibition.

Our Landscape (p. 506), "The Castle and Church of St. Valerie Sion, Canton Valais," is by Mr. G. C. Stanfield, the son of everbody's Clarkson Stanfield. It is easy to see in what good school the young painter studied, and pleasant to observe the rapid progress he is making in his art. The picture we engrave is the work of no common hand.

Our second Illustration (p. 509), "The Highland Shepherd," is one of those happy transcripts of Highland life that has made Mr. Ansdell a favourite artist beyond the limits of his native Lancashire.

Our third Illustration (p. 512) is designed for the ladies, and is called "The Bride," one of Mr. Solomon's well-composed and well-painted pictures. The Bride in the picture is very lovely, and the contrast between the expressions on the face of the mother and the lady's maid very touching and very appropriate to the occasion. The dress of the Bride, we can assure the ladies, would please the most fastidious reporter of the *Morning Post*.

Our fourth and last Illustration (this week) is Mr. Alexander Johnston's only contribution to the Gallery (p. 513). It is No. 597, and entitled "The Arrest of John Brown, of Ashford, a Lollard, and one of the first Martyrs in the early part of Henry VIII.'s reign."

Mr. Johnston found the story in D'Aubigné's "History of the Reformation":—

> Brown's wife having been churched that same day, a feast was prepared for their friends, as was usual on such occasions, and they had all taken their seats at table, by beating on every face, when the street-door was abruptly opened, and Chilton, the constable, a cruel and savage man, accompanied by several of the Archbishop's apparitors, seized upon the worthy townsman. All sprang from their seats in alarm.

The incident is one well adapted for painting, and Mr. Johnston has treated it with a painter's skill.

## DINNER AT THE ROYAL ACADEMY OF ARTS.

The Royal Academy of Arts gave their customary banquet on Saturday last, to inaugurate their 88th annual exhibition. The Exhibition was thrown open to the guests at two o'clock, from which early hour numbers began to drop in, to avail themselves at their leisure of their entrance privilege. As six o'clock, the time appointed for commencing the banquet, drew near, the assemblage dispersed through the different saloons very perceptibly augmented. The banquet was held in the East Room, which, when the guests had assembled, presented a spectacle of singular magnificence.

The chair was occupied by Sir Charles Lock Eastlake, the President of the Institution; and the company—in all little fewer than 300—comprised the leading members of Parliament, and many of the most distinguished names in literature, science, and art.

After the usual loyal toasts had been given, "The Army and Navy" was proposed, and responded to by Lord Hardinge for the Land service, and Sir Edmund Lyons for the Navy.

The President, in giving "The Health of the Noblemen and Gentlemen who this day honour the Academy with their presence," said the best tribute he could offer to those, or at least to many, whom he had the pleasure to address was to acknowledge that, under their auspices, in conjunction with the aid of others, the fine arts were becoming more and more elements of public utility. The improvement, the growing benefit, was he felt persuaded, mainly attributable to the enlightened attention which many persons of influence had, either from inclination or on principle, devoted to the subject.

The Lord Chancellor felt that, in an assembly of those whose works contributed to the adornment of those walls, he could be but a very inadequate exponent of the sentiments of the patrons who had encouraged their production. Yet there was one circumstance which should render the task he had undertaken less formidable; for the splendid specimens which this year decorated their brilliant apartment indicated the attainment of such an advanced state of art as to make it easy to pronounce a deserved panegyric on the present Exhibition. The time had been, when to the disparagement of British art, those walls were covered almost exclusively with portraits and works designed merely to gratify the vanity of individuals. That such an imputation found no justification now, he appealed with confidence to the interesting display of which he was surrounded; he greatly doubted whether in any other capital of modern Europe a single year could produce its equal.

The President said he had now to give a toast which on ordinary occasions left reference to anything but that which could have none on the present occasion. It was formerly remarked that the most ardent well-wishers to art and science were generally compelled, by the supposed necessity of a stern regard to public economy, to suppress their enlightened predilections when in office. At present, however, it was admitted that the furtherance of those objects might be reconciled with a comprehensive economy. It was admitted that general cultivation was desirable even on the ground of expediency; it was felt that as civilisation advanced it had its corresponding wants; and it was believed that the commercial prosperity and even the power of a nation might ultimately depend in a great degree on its intellectual improvement. From what had been recently said in Parliament he was justified in expressing a hope that the time was not far distant when a new building devoted to art and science would arise in the immediate neighbourhood of the metropolis. What better commemoration could there be of a satisfactory peace—next to our thanksgiving to God—than the blessing of peace? He concluded by proposing "The Health of her Majesty's Ministers."

Lord Palmerston, in replying, could assure the company that those who had now the honour of acknowledging this mark of favour were not less mindful than that part of their functions than any of their predecessors; and with regard to the topic to which the President had just alluded—namely, the prospect of their seeing in the immediate neighbourhood of the Academy a more appropriate and better edifice than any now existing for the display of the works of genius and of art—he could only say that it would not be owing to any indisposition on the part of him and his colleagues to attend to objects indicated if results adequate to the aspirations expressed were not ultimately attained.

The President, in proposing "The Society of Antiquaries and the Health of Mr. Pettigrew, their Secretary," referred to the labours which his Lordship lately brought before the notice of Parliament for the formation of a national portrait-gallery.

Lord Stanhope, in his reply, said: You may perhaps think me insatiable in the matter of national portrait-galleries if I venture before I conclude to hint to those who are their advocates that it is in their power to institute an excellent one by a very limited effort on their part. Why, for example, should not every member of the Royal Academy be required to contribute his own likeness? (Cheers and laughter.) If that rule were adopted from this time forward not many years would elapse before we should have a portrait-gallery of much interest, which would transmit to posterity memorials of those who, in their day, brought credit upon art (cheers). I throw out this suggestion, the value of which you are better able than I to appreciate, from a simple desire that a permanent record may be handed down of those who may hereafter be favourably known for their productions, but of whose own lineaments no adequate remembrancers might otherwise be preserved.

The next toast was "The Interests of Literature, and the Health of those of the Representatives who have designed to be our guests," to which the Dean of St. Paul's replied. Last of all was given "The Governors of the British Institution, and those possessors of works of art who occasionally open their collections to connoisseurs and the public."

The toast was given amid loud applause, after which the distinguished company retired to the adjoining apartments, and spent some further time in inspecting the paintings they contained.

CRIME IN THE UNITED STATES AND ITS AUTHORS.—It is often flippantly asserted that the great mass of crime in the United States is committed by foreigners. It is a convenient argument, but one which will be found, on examination, to be merely assertion, without facts to sustain it. We observe in the "American Almanac" for 1856 (a work prepared with great skill and accuracy, and consequently of high statistical authority), a statement carefully collected from the returns of the clerks of the courts, under the head of crime, from which we learn that of the 14,208 convictions had before the courts of the United States, from 1841 to 1854 inclusive—a period of fourteen years 9538 were of natives of the United States, and 5460 of foreigners. *Washington Star.*

THE AMERICAN QUARREL.—It has been said that the journalists of England have blown up their quarrel by angry periods. Here is the American notion of moderation exemplified. The extract is from the *Cincinnatian*, quoted by Mr. Crampton:—"England for centuries has been rallying and bribing the world; her influence is astounding. In the Pacific, in the Atlantic, on the Isthmus, everywhere, that haggard voluptuary, Great Britain, who has been so long drunk with the blood of other nations that she now reels and totters with her own insanity, glares upon us with her red eyeballs and bids us depart. England is a harlot, a whitened sepulchre, &c. Sir Gaspard le Marchant and Mr. Crampton are base conspirators, and" in the opinion of the writer, "a disgrace to the Order of the Garter, to which, he thinks God, he, being a simple Republican, does not belong."

THE CIRCUMLOCUTION OFFICE.—During the very press of the war, Mr Rankin, an eminent Canadian gentleman, wrote to our Government, offering to raise and equip a regiment of 1000 riflemen. After a delay of five months, and on renewed application, he received an official communication, returning him a original letter, with the simple observation, that it had been directed to the Secretary of War instead of the Secretary of War; in other words, he had sent it to the wrong side of Whitehall.

THE TROOPS IN THE PRINCIPALITIES.—The evacuation of the Danubian Principalities has already begun; but it is believed that the whole army of occupation will not have returned to this country before the beginning of October. The Austrian troops in Wallachia and Moldavia originally consisted of two corps, each two divisions, or four brigades, strong. But it is said that orders have been issued to reduce each corps to one division, or two brigades. A Vienna correspondent of the Frankfort *Post Zutung* states that eight months will elapse before the Danubian Principalities are entirely free from foreign troops; but the whole of the Turkish territory, including Moldavia and Wallachia, must be evacuated within six months from the day on which the Treaty of Peace was signed.—*Letter from Vienna, May 1.*

## ART REFORM.—No. V.

### THE NATIONAL GALLERY, ITS MEASURES AND DESIDERATA.

WE now proceed to the Flemish and Dutch schools, which occupy so large a place in every general collection.

We have already indicated that strength of feeling is inseparably associated with that high sense of the beautiful, which is characteristic of the synthetic ideal South, and that a patient observation of nature and great mastery in the technical qualities characterise the analytic real st North. Into what confusion even accomplished critics fall if they ignore those broad lines of demarcation traced by the laws of a physiology still occult, and awaiting their scientific Columbus! The Beyles and the Balzacs told us that Scott, the most essentially realistic and northern genius of modern times, did not know the heart of womankind, forgetting that it was the woman of the South he did not know, and who would have been altogether out of place in his Scottish portrait gallery. Without a perception of the connection of the arts all criticism is unsound and hollow; witness the book-learned critic who told us that this was a mechanical and not a dynamical age, and that there was no Mozart now living. Would posterity ever believe that a philosopher had written this complaint of dynamic desiccency in 1829—the year of "William Tell," just after the production of "Norma," "Sonnambula," "Masaniello," when "Robert the Devil," was on the stocks, and Donizetti in the plenitude of his first fresh inspirations?

How few and far between are the artists gifted with this duplicate nature! A Raphael, who unites the highest spiritual beauty with the most masterly technical power; a Mozart, whose dreamy, melancholy strains so deliciously interrupt our admiring examination of the ingenious erudition of his instrumentation; and far above all the rest of humanity, a Shakspeare who unites the most subtle analysis with the most vivid sense of the beautiful. For the prime magnates of human thought and invention there are no limits or restrictions, such as those which segregate the common herd of humanity by nationalities and temperaments.

As regards painting, if the highest culture of spiritual beauty be with the Italians of the fifteenth and the beginning of the sixteenth centuries, forcible truth, with fine colour and chiaroscuro, lies with the Dutch. Hamburg Dennen is the lowest depth of mere mechanical imitation. The Flemish school is the medium between these two extremes. High as Memling, Matays, and Mabuse stand in religious sentiment, they are far below the Francias, the Perugino, and the Correggios of Italy; but they are the predecessors in many respects of the Dutch realists of the seventeenth century. Drapery, for instance, generalised in the South, becomes in their pictures a special imitation of fur or velvet; but, although Bruges and Antwerp were in commerce what Amsterdam was later, the religious sentiment is prominent in their works, not merely from Church patronage, but from the Walloon element giving a greater intensity to the feelings of Belgians, as contrasted with the more purely Saxon Holland and Zealand.

We begin, of course, with Van Eyck, that wonderful technical genius of the fifteenth century, of whom we have a very curious picture (No. 186) representing husband and wife of that remote period, and showing what material comfort existed in the Bruges of four centuries ago, when our own land was in a semi-barbarous condition. But where is the allegorical figure of Fidelity, if that really be the picture so celebrated in the time of Van Eyck; or is it a very clever copy by some of the seventeenth-century Dutchmen of the school of minute finish?

Memeling (or we think the Memelino of the Italians is decisive against the name being Hemling) if a less powerful technical genius than Van Eyck, was a man of higher art—in fact, a Northern edition of the tenderness and grace of the Italian pre-Raphaelites. We therefore regret that the Gallery has nothing of him or of Quintin Matsys. Even the celebrated picture of "Windsor" is one of *genre*, which gives no idea of his very high powers of pathetic expression. Matsys, whose beautiful "Adoration of the Kings," now at Castle Howard, has been so just admired, is also without a representative. These three painters are of the highest class in Northern art; and, although we are neighbours of Flanders, it is not without regret that we find Munich and Berlin to have got the start of us in this respect, even in the most recent times. The only Flemish picture of this period (we mean contemporary with Raphael and Micaael Angelo) is an unattractive picture of Lambert Lombard (No. 266), a considerable artist, it is true, but not in any way comparable to those we have named.

Rubens, in the beginning of the seventeenth century, was no doubt the greatest Flemish artist; but we cannot arrive at him without being sensible of the great blanks of the Gallery. Of his immediate predecessors we have nothing at all. Francis Floris, Michael Coxie, Old Breughel, Paul Bril, that charming landscape painter who delighted the Italians, Otto Venius, the master of Rubens, and many others of that period, are without a single representative picture; in short, between Van Eyck and Rubens, the beginning and the culminating point of Flemish art, we have all but vacuity; in short, one of the most notable deficiencies of the Gallery. We wish this to be understood: Great Britain has half the business of the globe on her hands, and the culture of the beautiful is, after all, a secondary affair; but we certainly think that an uncongenial picture of Lambert Lombard, a like man as he undoubtedly was, is too little for the period that intervened from Van Eyck and Van der Meire to Rubens.

Of Rubens, the greatest painter of the Northern schools, and one of the greatest technical masters who ever lived, in whose compositions bravura pervaded genuine conception as much as partial exaggeration, we have many admirable pictures in this country, and none so much as that on the "Peace and War," presented by the Marquis of Stafford—a noble gift, and such as not many owners, even of fine galleries, would willingly part with. The "Château" is also one of the finest landscapes in the large free style of the master; but we could dispense with the others if it were possible to obtain one or his fine large gallery pictures such as one recollects at Munich or elsewhere.

There is only one specimen of Jo daen's, which gives his excessive vulgarity of Flemish form, without any of that extraordinary power of colour by which this most unpopular painter was distinguished.

Of Vandyke we certainly have a masterpiece in the so-call. Gevartius. This is, perhaps, the finest half-length in existence, but is it really by Vandyke? Is there not here a power far beyon. Vandyke? It certainly has more resemblance to the fine portraits of Rubens. Of the vigorous Jordaichmen, Frank Hals and Ferdinand Bol—the former the successful rival of Vandyke, and the latter the worthy pupil of Rembrandt—we have nothing whatever; which is the more to be regretted as they are both in the market, and portrait was within the proper sphere of such admirable naturalist as were the Dutch.

On the other hand we are rich in fine specimens of Rembrandt, showing in an eminent degree the masterly force of this original inventor in colour and chiaroscuro.

Of the Belgian eclectics of the later part of the seventeenth century—Sprangers, Gasparid, Cuyps, &c.—whose remarkable works at Vienna and Munich most may remember, there are no pictures in the National Gallery, which we regret because their works are rare in private collections in this country. Well-known Flemish and Dutch specialities are also deficient. Snyders, the painter of "Huntsman and Hound" of upland down or those localities where

> Crashing the forest in his race
> The mountain boar comes thundering on.

Wouvermans too, whose works are the mirror of the cavalier life of the United Provinces—the horse fair or cavalry charge, the clear morning air that invites fair dame or gallant to a joust or hawking party; Lingleboch, Dutch in school if not in birth, with his Levantine Scalaramli brilliant, glowing, and southern, with turbaned Turk and Christia galley-slave; or De Hooge with fierce sun-play and limpid shadows.

Then where in our Collection is a Hobbema, the prince of Dutch landscape? or Ruysdael, of the mountain and the flood? or the fairylands and enchanted distances of Berchem and Karel du Jardin? or Swanevelt, into whose soul the sun of Italy had entered?

Where is that large window opened on the Dutch citizen life of the seventeenth century, about which Heinrich Heine prattled so pleasantly—Mynheer on busy 'Change, in decorous home, or in gleeful tavern? Where is Van der Heyden, with stagnant canal and busy merchant, whose neat dwelling has all its bricks accountable with the precision of the commercial statistician who lives inside? Them, for interiors, where is Terburg, or Metzu, or Netscher, whose boudoirs speak of Indian wealth, with the finery of velvet and satin, the dresses and decorations of the Batavian bourgeois gentilhomme contemporary with Molière; or Jan Steen, Ostade, and Brouwer, those painters of the fast and furious fun of the pot's paradise?

But let us not go from Dan to Beersheba and find all barren; the De Keyser (212)—a merchant in his counting-house—is a good specimen of this rare master, characteristic of a busy period, and of the source of the art-patronage of Holland in the seventeenth century. The "Eylon Vander Neer" is a fine and largely-treated piece of local nature worthy of the master who takes the first rank among the landscape-painters of the Hague Gallery. Our Dutch Claude, Cuyp, is glowing with splendour; and Maas, the comic companion of Rembrandt, is perhaps to be seen in no collection to more advantage than in the National Gallery.

Our task draws to a conclusion; we will, therefore, be brief on the subject of the French school. The highest names are certainly Poussin, Claude, and Gaspar Dughet, in the Lechanalian manner of Poussin, what can be finer than 42 and 62? But in his dramatic manner we have nothing in Fall-mall so powerful as "The Triumph of David" at Duriwich. As for the Claudes and Dughets, the subject is exhausted by general knowledge and general admiration. We may ransack all the galleries of Europe without finding anything finer than the "Annunciation" of the former, or the "Abraham and Lasac" of the latter artist.

The Lebruns, Lesueurs, and Jouvenets of the age of Louis the XIV were not certainly men of the highest rank, but have nevertheless taken a permanent place as remarkable during the period of decline, and there is therefore an opening for these names in the National Gallery of the future; and, led us add, for Watteau, that charmin; painter, so long a drug in the market, and shoved into the lumberrooms of the picture dealer, but now once more the gem of the boudoir. Such is fashion! And such, let us add in justice to Watteau, is the force of the nature to be found in his works, even travestied as it was in these Regency days of clipped yews and flowing perukes.

Of Lancret, the feebler Watteau, we have interesting specimens in 101-4, but no Boucher. We certainly do not propose as a model the artist who was so cruelly mauled in the criticisms of Diderot; but it is curious to know what were those productions that gained him, in the middle of the eighteenth century, such an extraordinary vogue. The philosophic historian cannot ignore Boucher. Pouncy and Glaude saw everything with the eyes of the seventeenth-century classicists. Watteau was a modish translation of Dutch *genre* to the gayer soil of the France of the Regency. Now Boucher is neither classic, nor Dutch, nor any thing, but as genuine Louis Quinze, as cabinetmaker Buhl, or Sophie Arnould, or Marmontel, or l'Abbé Prevost, and therefore we vote for a Boucher, maugre Diderot and the *philosophes*. But, as a set off, to represent the uneasy *tiers état* then beginning to move, let us have by all means a more dramatic specimen of Greuze, the poet of domestic nature, in the most artificial and voluptuous age that history records.

But we have done. Another generation than ours must decide which of the truly eminent French painters of the nineteenth century is entitled to a place in the British National Gallery of the Future.

## MRS. JASPER'S SAY ABOUT WOMAN'S RIGHTS.

If you ask me my opinion, Mrs. Dodd, I'll give it you, Ma'am; and I must say I think there never was a crueller, unjuster, burninger shame in this world. I should just like the honourable gentlemen as turn up their nose at "Women's Rights" to be in the place of two or three poor souls I know of, just for a week. I should just like one to be turned into Betsy Mown, now, in the cool down there—her that goes out a charing, or washing, or any thing she can get her hand to, to keep her children in bread. She came of a decent family, did Betsy, and was as bright-faced, well-spoken a body when she were first married as you'd need to see. Well, Mown seemed a good fellow enough—he had regular employment at the gas-works, and they was very comfortable for a bit. But bless you, there's not many men as can keep on the right road for long together without turning off a one side. And he got in with some onsteady companions, and at first sometimes, and at last always, he took to going into the public-house of a night, instead of coming home after his day's work. He took to spending all his earnings that way, at last, and poor Betsy, with two helpless little children on her hands, had to look about and try to get an honest penny some way, to keep the pot boiling. Being a decent woman, and having her wits about her, she got employment, and was able by hard work to keep herself and the little ones fed and clothed, and made out a living quite as well as that there honourable gentleman could have done with *his* two hands, it strikes me. But now, mark me, Mrs. Dodd, Mown comes home one night mad drunk, finds the money poor Betsy has set by for the rent, takes it, abuses her, swears at her, thumps her for having kept it from him, takes it away and goes and swallows it all before he's two hours older: and this happens week after week, regular. Pretty work for the honourable gentleman like that, I wonder? Would he sit down and comfort himself by thinking that the "sacred confidence between man and wife" wasn't broken, at all events? Would it be better than a roof over his head, and bread for himself and his children, to remember that the bond of union was kept perfect, and the natural relation of a woman to her husband wasn't interfered with? Bond of union, indeed! Fudge! It makes me downright savage, Ma'am, it does, to hear people talk in that sickening, palavering way about what they know no more the rights of than my baby. What's the use of a bond of union when it only allows a man to thrash his wife within an inch of her life? Do you mean to tell me that there's anything sacred in such a one-sided arrangement as this, that gives all the power to the strongest, and leaves the weak more helpless by law than by nature? Any how, does it come out as a sacred way when there's never a night but one or two wives in this here court close by, are beat and kicked by their brutes of husbands; and mind you, a'most always on account of this very matter of money? A man, if he's ever so dazed with drink, always seems to keep enough sense to know that he can claim whatever his wife has, when he's come to the end of his own belongings. It don't make a spandthrift more careful, depend on it, when he's got somebody else's earnings to fall back upon after he's squandered his own. When a man's bad, Mrs. Dodd, he don't stop at a little. His nat'ral affections seem squashed right out of him, to begin with; and as for controlling him by anything short of sheer force, you might as well try and stop a express engine with a oyster-shell. *He* care for his children, not he! I wonder how many fathers there is in this court down there, who would do the duty of a father to their children, if they was called upon—even of the moderate good ones, who are steady men, counted decent husbands and all that. But give man drink, let him be a little worse than his neighbours, and his family may go to the dogs at once, for all he seems to care. In our rank of life, you see, people don't set much store on "sacred confidences," and though I happen to know some crying evils among higher classes than ourn, I know that the greatest misery of all the misery that is caused by this unjust state of things, falls upon the *poor* women: the charwomen, the laundresses, the sempstress-es—the hard-working, broken-spirited set, you and I know too many of. Let us pray for them, say I. There's no help from man, that's clear. Oh, no! there's nothing to be done for them. They must see their children, if not starving, running wild like animals; they can do nothing. Now you know, most mothers have a sort of a wish to see their little ones brought up decently: it is part of a woman's nature like to have that kind of feeling. If they are bad themselves, even, they in general would like the children to be something better. But very few men care a pin about it one way or another. So you see, one side has the will and no power—the other side has all the power and no will.

I don't think it's fair for happy people to lay down the law without any thought for the lots of their fellow-creatures as is worse off. It's all very true what that there honourable gentleman said—o! bless you, I've got it all by heart—"that in the holy estate of marriage there should be no question of separate interests, and the mom nt such a suggestion occurs, a great blow is struck at the sanctity and peace of married life." But, oh! Sir, if you'll look about you a little in these here places—in the courts, and alleys, and small stree s—you'll soon learn that the "great blow" is struck at the first by a many, that comes to destroy the sanctity and peace you talk about. To hear these gentlemen go on, Mrs. Dodd, you'd think that such a thing as a unhappy marriage never was seen or heard of at all. Holiness, peace, perfect confidence, and all that there, is every one *they* know about connoobial matrimony. I'm sure it's very complimentary to their own wives—isn't it?

Now, for my part, the happier and comfortabler I am myself, the more it makes me feel for those poor souls as don't know what happiness or comfort means. Whose whole lives, Ma'am, and you know it as well as I do, go to spell wretchedness, misery, and suffering, and nothing else. And now I'll freely confess to you, Mrs. Dodd, that, so far as my own feelings goes, I would rather not that ever the law of the land should consider me and Jasper as two people, with two "separate interests." Bless me, I've my sentiments about sanc ty and confidence and perfect union as well as my betters, though I don't in general call them by such fine names, perhaps. But for! they may make as many Acts of Parliament as they like, and they won't make me and my John have any separate interests, or separate things of any kind whatsoever. Why, the only people that these amiable, innocent, honourable gentlemen know anything about are just the people that don't want no law at all. The law hasn't anything to do with them; it can't make nor meddle with their affairs. Jasper and me don't want no Acts of Parliament to tell us that we're one, and sint got no interests apart from one another; and if, as I said before, they was to go and make a Act reckoning us as *two*, it wouldn't make no manner of difference to us, or such as us. Any more, Mrs. Dodd, than it o present keeps a lady from being the poor creetur half starved, and beat black and blue by her husband, "You are man and wife—the law recognises the sacredness of the union"—can make that there union sacred, though it screams itself hoarse with a saying of it. It strikes me, Ma'am, that there's a something higher and stronger than Acts of Parliament—a something which makes the real things of life, while the laws and all that, keeps up the show. And it strikes me, too, that a honest, wholesome bit of reality is worth all the shams that was ever made and handed and glazed and bowed down before by the honourable gentlemen as has got to make them.

All I say is this, there's something wrong, and has been wrong, for this many a long year; and its people's dooty when they're shown a wrong, to try and set it right. Even the honourable gentlemen, as make a mock at the whole matter, admit that there is a wrong. But how are we to alter it, says they, without making more wrong? Oh, gammon! Don't tell me. There never was a wrong yet, Mrs. Dodd, that there wasn't a way to right it, somewheres or another. There's a scrubbing-brush for every floor, if so be you only look for it. There's soap and soda enough in the world to clear away all the dirt, trust me. I'll tell you what, it's a little elbow-grease that's wanting, mostly, when people talk about "it *can't* be made bright." Now in this here case, where, goodness knows, we want a good deal of cleaning and polishing, I don't mean to lay down the law as to what is the best way, and what isn't. But let them, these lords of the creation, set their shrewd heads to work to find it out. Let them go about it with a will—and I'm sure, honest and unjarna, to scrub out the stains and disgraces of past and present years, and to make the present time, and what is to come, clean and tidy. Don't let 'em be content with shrugging their shoulders, and laughing at the notion of "women's rights;" or else make faces, and talk about "strong-minded women" and all that. Mrs. Dodd, I hope Englishwomen are not to be frightened by such a bogie as that, I'm sure, seems to be. What does it mean now, when one comes to look into it? I've known two or three specimens of what were called "strong minded" ladies when I was at service, but I'm free to confess, that they was very learned ladies, and thought a deal on for their cleverness and all the rest of it, I consider they was stronger in the head than anywhere else. I've known one of them had her husband fill it, she didn't know how to nurse him no more than if he'd been a elephant, for all her cleverness; and, though she prided herself on not "being troubled with nerves or fine feelings," she was just no more good in a sick room than the learned pig! Now you know it seems natural like, for a woman to be more gentle, more giving up, more self-denying, and all that, than a man. But, deary me! it appears to me that it just takes a strong mind to be so; and I've always found that the weakest and silliest women were just those who insisted the most upon their "dues" and their "claims," and their this, that, and the other, and were obstinatest in their own private opinions, and thought the most about themselves altogether.

Now, don't it look like as if men reproach us women with being strong-minded only whenever it happens that our strength of mind gets troublesome to themselves? A man don't object to a woman's being able to nurse the sick—to face danger, fatigue, and trials that many a man himself would shrink from. And I don't reproach a woman because she can endure more in lots of ways, than he can;—can sacrifice herself more easier, has more patience, and isn't half so selfish. But are all these qualities weak-minded, I should like to know? Certainly not masculine qualities, I'm sorry to say, whatever they may be. No, Ma'am, since the world began, men have always had one thing about their characters that seems to come special natural to 'em, and that there is—taking care of theirselves. I don't mean to say that, take 'em one by one, you wouldn't find many a man a hundred times more unselfish than many a woman; but as to say that with the common run of men Number One comes fust, and they don't by no means take kindly to putting of it second. Now, denying of ourselves does come nat'ral like, to us women: we *do* take kindly to it, don't you see, Mrs. Dodd, the most of us do. We're diffrently constituted from men. Our place in the world is diffrent; our work, and our duties, and our abilities aint the same in no respect. I consider that all our virtues should differ like-wise. I don't go for to say that it's wrong, nor to say neither that our virtues are not, many or other than theirs. I dont think it, Mrs. Dodd; therefore I've known two or three right-down good men in my time, and I don't think there's a many better things in this here world than a man can be,—if he gives his mind to it.

But I do say, Ma'am, that seeing "giving up" is a part and parcel of a female character (in a gen'ral way, mind! I own there's exceptions), and that it isn't of a man's,—I do say that it aint safe nor just nor right, that laws should be made, giving all the power to men as is best able by nature and by strength, too, to take care of theirselves. If men was all angels, Mrs. Dodd, I own I don't think that they shouldn't have all power given over into their hands; and I shall be a deal better to give more to the women, if it was all women might have more to give back again. But seeing that the most angels, but very erring creetures for the most part, I say that it is dangerous and a evil thing to put so many little helpless souls into their hands as they like about women with power being like children a-playing with fire or with edged tools. Supposing they was children—supposing that all women is just so many children, it'll tell you, Mrs. Dodd, that though children do burn themselves at times, and sometimes they don't do a millionth part of the mischief that a bad man can do, and has done over and over again, with his edged tools. So I say, find out some plan to help the helpless and defenceless to rights. It's late in the day for a Christian country to be only just finding out it; but now they've begun they're better off than they was before, and I'll warrant—and p'raps they'll know better some o' these days,—poor dears!

And so, Mrs. Dodd, I've had my say.

THE CIRCASSIAN DEPUTATION.—When the Circassians received the news of the conclusion of peace, learned that it had been stipulated for them, and that nothing was changed in their condition, they assembled a great deal of agitation, and four or five thousand of them met at Anapa. There a deliberation took place between 300 of the principal families, and it was decided that representatives should be addressed to Turkey and to the Western Powers. An assembly of Anapa, composed of 300 delegates, addressed to the Sultan, to the Emperor Napoleon, to the Queen of England; and it was decided that it should be sent to Constantinople by twelve Circassians. The deputies have not yet arrived at Constantinople to the present time not a single Russian had set foot in Circassia, and that during the whole of that time the Circassians had continued to fight as much as their means would allow them. They had gone on the worse for that, and that having enjoyed absolute independence they intended to do all in their power to preserve it; that consequently they would incessantly combat the Russians, and that they asked Turkey and the Western Powers to support them. Some of the members of the Assembly of Anapa declared that if Turkey and Europe were to abandon them they would go to St. Petersburg to give in their submission; but that is more a menace than anything else, for they say that, if Circassia were to be annexed to Russia, Turkey would have no frontiers in that part of the empire, and would have to fear the greatest dangers; and Sefer Pacha, a Circassian chief, who possesses great influence amongst his countrymen, declares that for his part if Circassia be abandoned to her own resources he will make a war of partisans, that death alone will make him and his companions lay down their arms. A number of Circassians already arrived in Constantinople to endeavour to sympathy for their cause.—*Letter from Constantinople.*

THE NAVAL REVIEW:—PROMENADE ON SOUTHSEA COMMON.—SKETCHED BY S. READ.

## THE NAVAL REVIEW.

### PROMENADE ON SOUTHSEA COMMON.

On the morning of the review Southsea Common presented the animated scene which our Artist has sketched in the accompanying Illustration. The myriads of human beings who poured on to the beach from every point and outlet were beyond all precedent, and the heterogeneous commixture of character was not the least remarkable feature of the whole affair. Gradually the walls, ramparts, ravelins, mounds, housetops, and even church steeples, entered into bold competition with the water in exhibiting their venturous masses. The scene from Southsea beach was magnificent. A violet sky, pure and unclouded as that of Italy a rippling, dimpling, flashing, sparkling sea a green elastic sward of the freshest verdure—dazzling uniforms and many-coloured costumes, brilliant equipages, music, flags, laurel leaves, happy human faces, and "ladies' laughter ringing through the air," were the accessories a scene as gay, brilliant, and animated as any that, with much experience of popular spectacles we remember to have ever witnessed. Nor should we omit to enumerate among the sources of enjoyment the aromatic sea-breeze, that *vif et acre parfum de la mer* of which Alexandre Dumas descants so eloquently, and which is so delightfully exhilarating to those whose fate it is to be pent up in cities. Thousands of people sauntered over the sands, or lay on the shingle of the beach, watching through telescopes and opera-glasses the movements of the fleet. This multitude extended from Fort Monckton on the west to Southsea Castle on the east, a distance of three miles; and must have comprised something like 100,000 persons. The *coup d'œil* in the foreground was everything brilliant and delightful that fancy could imagine. The sea flashed and sparkled in the morning sun, and over its waters glided every variety of craft, from the leviathan three-decker of one hundred and thirty guns and twelve hundred men, to the little river steamer that, by some speculative freak, found itself on the joyous bosom of the Solent. It was interesting to observe the contrast of the pleasure-boats with the frigates and to watch the tiny craft as they picked their way daintily among the mighty ships of war.

The shipping was everywhere decked in the gayest colours, and upon every breeze came the strains of martial music—the commingled melodies of France and England.

### THE QUEEN'S YACHT LEAVING PORTSMOUTH.

Shortly after twelve o'clock her Majesty's yacht left Clarence-yard, and as she passed outside the first ship of the line, to return down the centre of the double line of ships of war and gun-boats, the *Duke of Wellington* opened the Royal salute. It was rapidly taken up by the other vessels with grand effect; it was one of the finest moments of the review. As the Queen's yacht passed, all the ships manned their yards. The yacht returned through the line to near the Warner Light; and there was a pause in the proceedings of some length, which the experienced devoted to refreshment. The rest of the programme of the day was pretty closely adhered to.

Between two and three o'clock the gun boats steamed down the line, and passed up it again on the outside. Soon after three the Royal yacht was seen standing towards the *Rodney* and *London*, anchored to the E.N.E. of the Nab Light as pivot ships; she was followed by the *Duke of Wellington* and the *Royal George*, the leading ships of the line; the rest following in their order of anchorage. They passed between the pivot ships, doubling back outside them, and returned in the same order to their former stations. No canvas was spread, which rather detracted from the beauty of the scene, but the immense screw men of war glided easily and silently along, apparently without aid or effort, and the manœuvre was perfectly formed.

THE NAVAL REVIEW.—THE QUEEN'S YACHT LEAVING PORTSMOUTH HARBOUR.

## LITERATURE.

FALCONRY. By FRANCIS HENRY SOLVIN and WILLIAM BRODRICK. Van Voorst.

We have here, magnificently illustrated and enthusiastically written, a book which will be equally well placed on the library shelves of a naturalist and sportsman or the gay table of the beauty's boudoir. But the enthusiasm of the author and the skill of the artist will do little more than preserve the memory of a sport which, in this country, is as much a thing of the past as the crossbow, the longbow, buckler-and-sword play—the rapier that our grandfathers wore and used—the hair-powder that Pitt's tax drove out of fashion—the flambeaux and sedan-chairs, that have given way to troughams and street gas-lamps. While fox hunting flourishes, and greyhounds and horses are bred in numbers and perfection, undreamed of by the Jacobite squires of Squire Western's day, these modern changes or improvements have combined to destroy the calling of the falconer—inclosures, double-barrelled percussions, and the universal habit of reading. The last, by destroying leisure, has been the most fatal to the idle hours, without which hawking is a most costly amusement. We cannot think that the spread of inclosures and arable culture have much to do with the decline of hawking. If hedges have been grown, forests have been clear'd away, and in Yorkshire, Lincolnshire, Norfolk, Gloucestershire, Wiltshire, Dorsetshire, Surrey, and many other counties, there holds heath, open hills, and plains, where a good horseman could ride at speed with his eyes on his birds: light fences, or loose stone walls, would only add zest to the sport. Of course the gun has completely superseded hawking as a help to the mere foot-hunter; because a gun requires on foot no care when put in a corner; a pointer can be begged, borrowed, or stolen, and fed anywhere, or any how, and yet still retain attachment and obedience to his master.

In the picturesque and uncomfortable days when falconry flourished, gentlemen of all degrees and especially country gentlemen of small estate, expended many a weary hour in feeding, training, and playing with their hawks. This was a perpetual resource on long evenings and rainy days, which is now replaced by active affairs—penny-post correspondence, and even with the dullest yeoman, the newspaper. Horses and hounds may be left to groom or farm servants, and yet serve our amusement when required, but a hawk must be daily fed and constantly handled by his master if he is to be used without the assistance of a professional falconer at an expense which few of moderate fortune would be inclined to incur, considering that for the same income a nice little hunting-stud could be maintained. Many noblemen and gentlemen have attempted to revive falconry, but without permanent success. Mr. Bishop, of Bond-street, took a good deal of pains to get up a hawking-club like that which meets annually near Loo, in Holland, but after considerable expense the attempt failed, and he assisted William Burn, one of the last of the professional falconers, to emigrate to Australia.

In that country, perhaps, with Barr's assistance, falconry may be revived. The open plains of the interior grazing districts are well suited for gulloping: the squatters are bold horsemen, have plenty of leisure, and are not troubled with too many books or newspapers; while quails, pigeons, parrots, and waterfowl abound. We remember suggesting this sport for the weary stockmaster some years ago, when noting the interesting chapters on falconry in Knox's "Game Birds," little thinking that the descendant of a long line of falconers would be obliged to carry his aristocratic talents to the Australian bush.

With the exception of the authors of the work under our notice the only falconer we can hear of is Mr. John Pells—no relation to Pell of the "Bones," or of the Ring—who receives a sort of annual retaining fee from the Hereditary Grand Falconer, the young Duke of St. Albans, and keeps a case or two of hawks at Hawk's Mount, near Beaulieu, in Suffolk. But there may be in different open districts of England and Scotland, gentlemen who hawk a little for their own amusement, without inviting the attention of the public.

Messrs. Solvin and Brodrick begin at the nest, and give every detail for the rearing or catching, as well as the management and training, of both long and short winged hawks, with illustrations of the various birds used in England, and of all the needful accoutrements and implements.

It seems that about the close of the 18th century Lord Orford, the uncle of Horace Walpole and Colonel Thornton, endeavoured to revive hawking. With this view they engaged a number of Dutch falconers from the village of Valkenswaard. Among these was John Pells, the father of the present John Pells, who had studied the art in the establishment of the Landgrave of Hesse-Cassel, the greatest falconer upon the Continent—the man who sold his subjects for soldiers.

Scotland owes nothing to Dutch art, but had, until recently, its own race of native falconers. The Heulings of Barochan Tower, Renfrewshire, have a hawking-seat with the Heuling arms and motto having received from James IV. of Scotland, for beating the King's falcon with his tiercel. The grandfather of the present representative of the family was a celebrated falconer; the father kept the Renfrewshire subscription hawks, until his death, in 1813; and the present possessor kept hawks in Leith.

In 1840 Colonel Benham, whose hawking feats are described by Mr. Knox in his "Game Birds," took the moors of Shathcounan, in Ross-shire, which were formerly held by Lord O'Neil for the same purpose.

With the exception of the hawking-club at Loo, the only other place on the Continent where hawking is known to be practised, is among a tribe of gipsies near Bucharest, in Wallachia, who pay a part tribute to the Porte in the shape of many thousand quails, which they take by means of sparrow-hawks. Hawking is also a national sport in Syria, Persia, and many parts of India. Since hawking has virtually ceased to be one of our national sports the hawk tribe are mercilessly exterminated by gamekeepers, not very wisely, as it is found on grouse moors that the peregrine falcon protects the eggs of game against the ravages of the poyston and carrion crow. It has been noticed, too, that since the golden eagle has been slaughtered on every opportunity, the Alpine hare has increased to an extent most injurious to the hill farmer, and most annoying to the sportsman, whose dogs are continually pointing them instead of to grouse.

A regular hawking establishment consists for at least eight hawks, a falconer and assistant, one or two good horses, and three or four dogs; and will cost not less than £100 a year.

The hawks that may be obtained in this country are the peregrine, the merlin, the hobby, and the sparrow-hawk. The peregrine is docile, swift, courageous, and hardy in constitution. It was formerly plentiful, and made its nest on the most precipitous cliffs; but the persecution of the gun has rendered barren many a crag which formerly year after year produced a favourite eyrie. The peregrine is best taken from the nest when about to fly. When fully trained they are equal to striking down grouse, black game, partridge, woodcock, and snipe.

The merlin is a most beautiful miniature falcon, easily obtained on the northern moors, very tractable, and a most swift and active bird; but very delicate, and, even with the greatest care, seldom surviving a second season.

The strongest females will take pigeons; although, for this purpose, a cast (two) should be used at a time; but larks are the proper prey of merlins.

The hobby is even more swift than the merlin, and remarkably tractable, but less courageous. In six weeks from the time of being caught full grown the authors say "they would wait on the prey, return to the fist, and fly at any small bird." They are likely to be found in Leadenhall-market.

The sparrow hawk is a bird of strong constitution, easily trained, and very bold. In 1851 Captain Verner, who had seen the sparrow-hawk used by the Sikhs in India, caught 150 birds in three months with a sparrow-hawk of his own training. In the same year, in August and part of September, Sir Charles Slingsby, of Yorkshire, took forty seven small birds, including sparrows.

Those who have time on their hands, to whom air and exercise are essential, and the report of a gun no pleasure, we refer to Messrs. Solvin and Brodrick's beautiful book for full instructions how to train the greater and lesser hawks. Some wise reader whispers, perhaps, "What a waste of time!" To which we answer, "My dear Sir, how many young gentlemen are there of your acquaintance in rural and thinly-peopled districts who are never happy except in the open air; whose time for *three years* has not come?"

---

A PRINCE OF WALES LONG AGO: A Bardic Legend of the Twelfth Century, by LADY MARSHALL. London: Whittaker and Co. Prichard and Co., Chester.

This legend of North Wales is one of the most interesting contributions to Cambrian literature that has appeared since Mrs Hemans shed the halo of poetry over the ancient story and primeval features of the Principality.

The Prince of Wales introduced to us by Lady Marshall is the same individual already well known to English literature by Southey's poem of "Madoc;" but with far more vivacity and poetic fervour, and surrounded by incidents which to every son of Cambria must inspire all the gratifications of kindred race and local associations in a far higher degree than Southey, does Lady Marshall put forth this now recognised claim on the part of her countrymen. The discovery of America some centuries before Columbus by Madoc, a Welsh prince, is almost resolved by the enthusiasm and bardic energy with which it is illustrated in this work.

The season is approaching when tourists explore the still secluded recesses of North Wales; and it is a striking feature of this poem that it brings into the boldest relief that poetry can confer those scenes of nature which, in themselves attractive beyond most parts of the kingdom, can be so readily endowed by historic associations with that life and speech which it has ever been regarded by her children as a sacred duty to listen to and encourage. To tourists the poem would be the most charming of handbooks from Llangollen to Holyhead.

Lady Marshall received at the late Royal London Eisteddvod one of the chief Bardic prizes.

THINGS NOT GENERALLY KNOWN FAMILIARLY EXPLAINED: A BOOK FOR OLD AND YOUNG. By JOHN TIMBS, F.S.A., Author of "Curiosities of London." Bogue.

A LOVE OF out-of-the-way reading, quaint illustration, and olden facts and fancies, are among the minor characteristics of the literary taste of the present day. Its indulgence brings to light a host of neglected treasures from the nooks and corners of old libraries, and the commonplace books of veteran readers, who compile by a process which has been humorously compared to that of passing their materials through a cullender. Sam Ir has illustrated this kind of book-producing process in his old couplet:—

> When they have joined their performances,
> Out comes a volume of nonsensames.

Of such materials and means is the staple of the little book, "Things Not Generally Known," including, we daresay, many oddments of information, and scraps of knowledge, which the young may never have learned, and the old, having learned, may have forgotten. Here is no affectation of "curiosities, or things hyrtan out of place," but the "curiosities" are explained are such as interest in any degree give us somewhat of the character of such quaint as and their ordinary freely to the new papers of the day. Although this little work contains but a small portion of the "things not generally known," it comprises some five hundred groups of instances, ranging from antiquarianism to science. In the various sections we find illustrated the often-asked questions:—"Is the Sun Inhabited?" What is the Age of our Planet, and the Death of our World? the Weight of the Earth; the Depth of the Sea; how Glass is Broken by Sounds; how the Music of the Spheres is produced; the Interpretation of the Great Book Opened; the Structure of the Cell of the Bee; the Secret of the Alchemists; the Diving Bell; the Child's Caul; Touching for the Evil; "Thirteen to Dinner;" Rainy Saints' Days; a long Speech; the Mistletoe at Christmas; "High Church and Low Church; Wesleyan Pantheism and Latitudinarianism, Renaissance, and Pre Raphaelitism; What mean Napoleon's Bees and Philibusters, Brother Jonathan and Excelsior"? In the "Money" department we find illustrated Domesday Prices, Queen Anne's Farthing, and the National Debt; and under "Language and Books" the reader may learn something of the style of Herodotus, and the diction of Chaucer; and the great value of Aristotle's History of Animals, which has been buried for above 2000 years, but is at the present day consulted for new discoveries!

With this glance at a few of the characteristics of the volume before us, and the recommendation of its being fruitful of information and references for further research, we leave it to the public verdict.

---

TWENTY SPEECHES AND DISCOURSES ON VARIOUS SUBJECTS, INCLUDING A LECTURE ON THE THEORY OF MEMORY. By the Rev. DANIEL CHAPMAN. London: Whittaker and Co.

The greater portion of this volume consists of speeches delivered at missionary and other meetings of the Wesleyan body, of which Mr. Chapman is a popular minister. As the style which is best adapted for platform is frequently too diffuse for the reader, there is some difficulty in selecting a passage for quotation. The following description, however, of the vast agencies employed by the Author of the great work of evangelisation may be taken as a fair specimen of Mr. Chapman's style of oratory:—

> exhaustless materials, personal and pecuniary as provided for continuing the operation. Innumerable minds of every order are engaged, from the minute, ingenious observer, who produces a truly magical effect by his simple, unostentatious relation of interesting anecdote, to the lofty philosophic genius that bears his audience on the mighty pinions of his powerful intellect: that with all the ease of thought, with all the rapidity of lightning transports them through past and future eternity; from the centre of earth to the summit of heaven: and thence through all the wide universe of God; exhibiting its splendid machinery in its revolutions, its wonders in its operations, its nature, providence, and grace. Many of the most famous linguists of the age are employed in translating the Holy Scriptures into so many different languages and dialects of the babbling earth, as have never before been the honoured vehicles of evangelical truth. Thousands of such Maruian agents, by land and sea, are occupied in transmitting—multitudes of ingenious artisans employed in publishing, embellishing, and circulating the documentary intelligence of distant missionary operations. Immensely powerful machinery is constantly employed in numerous presses, through the agency of which all such typographical and pictorial forms as may receive its momentary exaction of a permanent pressure, capable of being instantaneously repeated at pleasure for an indefinite length of time. Wealthy kings contribute their imperial patronage. Sage legislators concur in spreading and extending the blessings of philanthropy. Popular communities emulate the noble patronage by their boundless, consentaneous liberality. The most intelligent and respectable assemblies of the land, such as that which we have on this occasion the honour and felicity to address, pour, like the fertilising rivers of Nile and Euphrates, their annual torrents of munificence, which, forming by their union one vast reservoir of pecuniary resources—one vast ocean of human supplies—are, by innumerable sources or visible channels, distributed through the whole of the moral world; conveying in their bosom, and depositing in their progress, the seeds of evangelical truth; awakening in the barren desert the signs of spiritual vegetation; rendering the solitary wild an immense, orchestral plain of sweetest harmony; thus converting the moral wastes into a renovated Eden of flowery verdure, luxuriant foliage, exquisite, delicious exuberance, all-pervading odoriferous perfume.

---

HINTS ON VILLAGE ARCHITECTURE. By HENRY WEAVER, Architect and Estate Agent. Bath: J Holloway and Son. London: H. Pope, J. Ridgway.

In publications bearing upon the principles and æsthetics of architecture, and the arts subsidiary to it, it is remarkable that, with few exceptions, the profoundest admirations should have emanated from the amateur. Nor has the anomaly—contrasting as it does with the relative sources of theory and practice in other professions been restricted to reasoning and research only, for, in it the pencil itself has played a very conspicuous part. Witness the singularly beautiful drawings of Mr. Ruskin, whose critics have ignorantly thought him a water-painter only; note also the masterly sketches of the Rev. Mr. Petit; and, again, those of the Rev. Mr. Boutell and Mr. Winston. But although the professional architect would seem to have almost resigned in favour of the amateur, the office of the pen, he has rarely exhibited any great shortcoming in respect to draughtsmanship. The last of these rare instances has been contributed by Mr. Henry Weaver, architect, &c.

It may be questioned whether there is not more emphasis than becoming modesty in the "Hints" which an Architect puts forth by publishing representations of structures designed by himself. To us the idea savours strongly of self-puffery, of that commercial spirit which indues the shop tailor to write upon his house, "Yes, this is the shop!!!" Fanny Leslie, Millais, or Lever publishing books of "Designs for Figures,"—imagine Foley putting forth a volume of "Suggestions for Statues." We do not believe that true art-feeling and such trade energy can coexist.

In the etched designs for churches published by Mr. Truefitt some three or four years since, the somewhat flippant quality of design which characterised the subjects was not unaccompanied with evidences of skill and taste in the getting up of the work; but Mr. Weaver has at once displayed the unique badness of a design, and hopeless impotence of delineation which must induce his best friends to hope that the "house-agency" portion of his business will straightway so prosperously increase as to henceforward absorb the whole of his attention.

In the preface to these "Hints" we are told that "among the structures rapidly springing up around us there are not a few the outlines of which are anything but in harmony with the surrounding scenery, which is often more or less disturbed in effect by ill-proportioned and ill-elegant buildings, almost, or altogether, destitute of that distinctive, sober character, so beautifully exemplified even in the most simple of the old religious edifices."

This, under the circumstances, is self-complacent enough; but, further on, in allusion to the utility of the publication, we are assured that "the author assumes no merit to himself," a remark which discovers such intelligence, that, before it, detailed criticism is disarmed.

## MUSICAL REVIEW.

Part 6. POPULAR MUSIC OF THE OLDEN TIME; a Collection of Ancient Songs, Ballads, and Dance Tunes, illustrative of the National Music of England. By W. CHAPPELL, F.S.A.

The sixth part of this attractive work brings the subject to the period of James and Charles I., which it introduces by a general account of the state of music at the time. This deserves consideration, no less from many important circumstances in the history of the art in this country, now first brought to light, than from the unanswerable refutation of several errors which the carelessness or prejudice of former writers have forced upon popular credence. That Dr. Burney, more especially, is wrong on many particulars relating to the progress of music in England which he has advanced in his history is clearly proved, even by reference to the very authorities he adduced in support of his views. Mr. Chappell has also given abundant evidence to prove that the high musical character England held in comparison with other nations during the preceding reign was fully supported after the accession of the Stuart family to the throne. One interesting feature in the history of this era is the great advance made by instrumental music, and the high importance it then first assumed as a special and independent department of the art. Even the bass-viol was included among the musical instruments which a young lady was expected to play, besides the lute, and virginals (a kind of spinet), and to sing at sight.

Some amusing quotations are given to show the power and influence of bad airs, as also of the use of music at weddings and all festive occasions, or even at funerals; whilst the eminently social character of the age is favourably shown in Ben Jonson's admirable rules for the governance of the Apollo Club, which, originally written in Latin, are presented in English verse, as translated by one of his adopted poetical sons.

Amongst the most beautiful of the tunes now rescued from the oblivion into which the neglect of our national music had cast them are, first, the graceful air "Upon a summer's day," which is remarkable for its own quality of character and for its natural fluency. This is followed by "The Hunter in his Career," notable from the allusion to it of the pictorial Izaak Walton, which is as hearty a specimen of manly joviality as could be embodied in music; and although there are no passages in it for horns, nor is it in six-eight measure for the conventional specialities of music for the chase, as shown from Handel's "Seasons," down to the last piece of descriptive music in a minor theatre melodrama), it is a most good hunting song, and one as likely to draw one out of bed before daylight, and raise the spirits for the chase, as any that is extant. Then we have the exquisite melody, "Once I loved a maiden fair," which has as much the elements of popularity as the most popular song of the present day, and is, nevertheless, so entirely free from vulgarity as to give us a very favourable idea of the refinement of taste of our forefathers

This is followed by "Peascod Time," which, with its singular quaint rhythm and graceful phraseology, is a most charming picture of pastoral repose. To this succeeds "Lull me beyond thee," an air so beautifully plaintive and so full of expression, that it would do honour to any composer that ever wrote. The two tunes to the song of "Old Sir Simon the King" are both characteristic, but the first is more interesting from the many associations with which Mr. Chappell's researches have invested them than from their intrinsic merit. "The Boatman" is as melodious as appropriate to the subject it illustrates; and, if ever again familiarly known, cannot but be sung at many a merry rowing match to mark the even measure of the oars, and give an irresistible impulse to those that pull them. "The Cobblers' Jig," with the spirited rhymes in honour of their patron saint, is a good specimen of rough jollity, and as convincing a proof of the universal prevalence of the familiar practice among mechanics of singing over their work, and thus making a pleasure of a toil, as anything brought forward in the whole work. The three versions of the tune of "Down in the North Country" afford opportunity for a very complete and curious account of the customs of "Merry Milkmaids," and especially of the use of music amongst them, not only for their own diversion, but as a charm to induce the cows to yield their milk. "Phillis on the new made hay" is another delicious piece of pastoral writing. "Cherily, cherily, nicely" is a graceful melody that flows very smoothly to a modification of George Herbert's beautiful little poem beginning "Sweet day, so cool, so calm, so bright," which Mr. Chappell has adapted to it. To conclude, "St. George for England" will ever be sung with a relish by any one who has read "Tom Jones," and has any regard for Squire Western's especial predilection, since this song was his peculiar favourite, wherein lies the proof that it retained its popularity for a hundred years after the date to which it is here traced. These tunes, as the reader will perceive, to us will be more than a mere matter of melody, more than we have said of them; and we are sure that all who hear them will look forward with pleasure for the appearance of the following numbers.

---

## TO CORRESPONDENTS.

J. D., Preston.—After James II. had left Ireland his adherents in Limerick struck coins of copper and brass with the name *Hibernia* upon them, and they were designated *Hibernias*. We suppose yours to be one of this class. The new specimen is of a third brass coin of Lallaguis, A.D. 280.

ONE OF MR. COOKE'S PATRONS, Clifton.—We cannot enter into the Philharmonic Society question.

AN OLD SUBSCRIBER should show his cabinet paintings to a picture-dealer.

T. W. H.—The prospects are first rate

UMBRA, Dublin.—We prefer the plural verb

H. P., Jamaica, and a CORRESPONDENT, Tobago, are thanked for the Sketches which they have favoured us; but which we have not space to engrave.

A CONSTANT READER, who wishes to obtain the best information on treating and feeding horses, should procure "Nimrod on the Condition of Hunters," new edition, by Cecil; and "Table Talk" and Stable Talk," by Harry Hieover; also the experienced author's "Treatise on the Proper Condition for all Horses."

A LADY is not liable for the tax upon the weekly servant.

G. M., Malta, is thanked: the sketches are unavailable.

PLATO.—We cannot advise you.

R. J., Sheffield, and H. T., Lyme Regis, are thanked.

R. O. W. is thanked for his obliging offer; but we fear the sketches do not possess sufficient interest.

J. T.—We regret that we have not space for your spirited sketch of the *Dauntless* in the ice. It has been sent as directed.

C. R. F.—Madame Viardot's voice is a contralto.

CUM.—The Fatal Sketch in the ILLUSTRATED LONDON NEWS is from an accredited Sketch

J. A. D.—The King of Prussia has six sisters-in-law. Which is meant?

J. C.—The tax is incurred for bearing a crest and motto in a garter, or indeed for bearn g any armorial ensign whatsoever.

MCGREGOR.—Your gold coins are worth nothing above their intrinsic value.

MUSICAL C. S., a French Jetton of the sixteenth century.

HABITANS.—By Canon 76 no man admitted a deacon or minister shall voluntarily relinquish the same, nor afterwards use himself in the course of his life as a layman. A clergyman of the Church of England, therefore, seeding and becoming one of the Roman Catholic laity would still, it seems, be in holy orders, so as to be disabled from becoming an M.P., or acting in any function forbidden to the clergy

H. J., Bargate, is thanked: Godfrey de Bouillon's celebrated tree at Buyukdere has already been engraved in the ILLUSTRATED LONDON NEWS.

R. J., Sheffield, is thanked.

IONA, and G. H. B.—We have not room for the proposed Illustration.

R., is thanked; but we have not room for the outline of the Iceberg.

SCRUTATOR.—Received.

ALEPH, Tralee.—Received.

H. B. A. will find it difficult to obtain the appointment he desires: the interest of a Member of Parliament may serve him.

W. S. E., Stowey, will, perhaps, favour us with his full name.

ITT, Cambridge.—In the last No. of the "Journal of the British Archæological Association" a very full account is presented of the Arms of Hugh Colle ge, the original Latin grant of Henry VI. being given. The arms of Westminster School are, we believe, also there described.

INQUIRER.—The Atropa Belladonna, Deadly Nightshade, or Dwale) and the Atropa Mandragora (or Mandrake) are both species of the same genus of deciduous plants, belonging to the natural order of Solanæ They are poisonous; and the latter (the Mandragora officinalis) is believed to be the *dudaim* of the Hebrews, the plant so coveted by Rachel in Scripture. Sir Thomas Browne has a chapter "Of the Mandrakes of Leah" (*Vulgar and Common Errors*, book viii. chap. vii. Works edited by Wilkin, vol. iii.). The Mandrake is named from the German *mandragora*, resembling man—its forked root being like the lower half of the human figure; and, if the plant be pulled when the fruit is ripe one of the berries may be supposed to represent the head, and thus complete the figure.

AMERICAN SUBSCRIBER.—The family of Horton, of Chadderton, Lancashire, bears for its arms: Gu., a lion rampant arg., holding in the dexter paw with a boar's head couped sa., a bordure engrailed of the second. Crest: A red rose seeded and barred ppr., surrounded with two laurel branches. Vert Motto: Pro rege et lege. The Hortons of Derbyshire and Cheshire bear: Sa., a stag's head erased, &c., attired or. Motto: Quid vult valde vult. There are also various other families of Horton with different coats of arms, more or less resembling the preceding

A SUBSCRIBER, Halifax; O. P. Q., a Subscriber, Nantwich; S. P., Milo-end; Song, by J. D., Birmingham; NEW ZEALAND SERIES.—We have not room.

DECIPHER.—SECRET, G. G., Rmlie, RAMSEY, A Correspondent, Ashurst, G. C. S. W. F.; J. F.; Q.C., Cork W. A. and J. B. H. Toronto.

## NEW BOOKS, &c

Fifth Thousand with Frontispiece and Vignette, 3s 6d., cloth,

**THINGS NOT GENERALLY KNOWN**

FAMILIARLY EXPLAINED. A Book for Old and Young
By JOHN TIMBS, F.S.A., Author of "Curiosities of London."
"Every reader of this book will feel that a good idea has been cleverly carried out."—Tait's Edinburgh Magazine.
DAVID BOGUE, Fleet-street.

8vo, cloth, price 7s. 6d., a New Edition, revised and improved, with many additional Engravings,

**THE MICROSCOPE**: its History, Construction, and Applications. With about 300 Drawings of Objects. By JABEZ HOGG, M.R.C.S., Assistant-Surgeon to the Royal Ophthalmic Hospital, Moorfields.
"The volume ought to be read. The Microscope for the People! It is well. It means Stephen—a multitude of information on all subjects relating to the microscope."—Quarterly Journal of Microscopical Science.
London: G. HOUTLEDGE and CO., Farringdon-street.

Just published, price 3s 6d.,

"It is to some of the few books which we think deserving of this character, that we have made all the foregoing extracts; and, if the whole slightly correct in representation, sufficient historical management to set the reader agreeably looking for more."—Athenæum.
W. LONGMAN, 7, Lodge-place, St. John's-wood-road, REGENT'S Park; and 39, Ludgate-hill.

JOHN CASSELL'S NEW and COMPREHENSIVE EDUCATIONAL SCHEME. By this scheme the means of self-culture and improvement will be placed within the reach of all persons. On the 15th of May will be published No. 1 of JOHN CASSELL'S EDUCATIONAL COURSE, price Three-halfpence; and on the 31st of May, the first Monthly Part, price 7d. This work, while admirably adapted for the use of schools and families, is designed more particularly for the purpose of building up a sound and useful education upon the basis of simply being able to read. With this view, "John Cassell's Educational Course" will be unparalleled in cheapness, each Weekly Number, price Three halfpence, consisting of 32 pages of letterpress, demy 8vo, with engraved diagrams. Each branch of science will be complete in itself, and the whole series will form a complete Educational Library, presenting knowledge in an attractive form, rendering it easy of acquirement and unveiling but a very moderate outlay. The first course of Lessons will be, "The Sciences Popularly Explained." W. KENT and CO., Paternoster-row, London. "John Cassell's Educational Course" can be ordered of any Bookseller.

NOW READY.

CHAPPELL'S FOREIGN MODEL PIANOFORTE, Prize Fifty Guineas. This instrument has (unlike the ordinary Cottage Pianofortes) Three Strings, and the fullest Grand compass of Seven Octaves. Its tone and touch, arrangement of the mechanism to endure the greatest amount of wear, and to stand perfectly in any climate. The workmanship is of the best description, but the case is round, full, and rich, and the power equal to that of a Bishop's Grand. The name is of the most elegant construction, in rosewood, the touch elastic, and the repetition very rapid. Every possible improvement has been made to ensure its standing well in tune. Mr. Chappell especially invites the attention of the public to this instrument, as sent direct to the Foreign Model, having assured that no Piano-forte, in all respects comparable, has hitherto been offered in England at the same price. Every instrument will be warranted, and if desired (exchanged within twelve months of the purchase.—50, New Bond-street. London

PEACHEY'S PIANOFORTES for HIRE, with option of purchase of every description and price, warranted. Every London Manufactory and Warehouse (by appointment to the Queen). G. PEACHEY, 73, Bishopsgate-street Within.

THE TEN-GUINEA HARMONIUM, with the improvements, manufactured solely by Messrs WILKINSON and CO., who obtained the only prize medal for this instrument, has the full compass of five octaves, with one stop, a rich sustained quality of tone, which can be produced either loud or soft, and is quite lasting "Warren's Tutor," for the above, 1s. Wheatstone and Co. Inventors and Patentees of the Concertina, 20, Conduit-street, Regent-street.

ST. MARK'S HOSPITAL for FISTULA and other DISEASES of the RECTUM, City road, London.
President—The Right Hon. the Lord Mayor
Chairman of Committee—George Glas Sandeman, Esq.
Deputy Chairman—John Griffith Frith, Esq.
Honorary Physician—John Speir, Esq., F.R.C.P.
Honorary Surgeon—Frederick Salmon, Esq., F.R.S., F.S.A.
The Committee urgently APPEAL for PUBLIC SUPPORT, assured that there are thousands of charitable individuals who (if acquainted with the invaluable benefits the institution confers on the poor sufferer under the most frightful of afflictions) would fee. it a privilege to co-operate in so much needed and useful a work.
Subscriptions and Donations will be gratefully received by the Treasurer, John Masterman, Esq., M.P., 35, Nicholas-lane, Lombard-street; or by the Secretary, at the Hospital
JAMES J. LLEL WILSON, Secretary.
St. Mark's Hospital, City-road, London April, 1856

ROYAL WESTMINSTER OPHTHALMIC HOSPITAL Charing-cross, founded in 1816, for Relieving the Poor Afflicted with Diseases of the Eye
The Committee deeply regret that in this metropolis hundreds of unfortunate persons are prevented from obtaining a livelihood for want of sight. In numerous instances many who apply at this Hospital could be benefited if admitted as in-patients, by a long course of medical treatment; but the Committee are unable to receive them, for the want of means for their support. the present income only permitting them to admit those cases which require surgical operations.
The Committee earnestly desire to impress on the minds of ladies in affluent circumstances the fact, that while nine-tenths of those children who lose their sight in the first two or three weeks of their existence, without fault on the part of their mothers, either die from neglect or are left a heavy burden on the public for their future support, they might have been preserved if they had been early brought to the Hospital.
Donations and subscriptions received by Messrs. Coutts and Co. Bankers, Strand; by Messrs. Drummonds, Charing-cross; by the Secretary, at the Hospital.

SEA-SIDE EDUCATION.—A MARRIED CLERGYMAN, M.A. Camb., whose house and playground adjoin the sea-shore, RECEIVES a FEW PUPILS. Age 14. His pupils are treated with every possible care and attention. Classics, Mathematics, French, German, Drawing, and Music, Education, Music French Drawing and Mathematics Pupils have a separate table, and private instruction, if required, unless a brother's pupils. There is excellent and safe sea-bathing, which is of immense benefit to delicate children. Terms and further particulars apply to M. A., 7, Yorkterrace, Worthing

REGENT'S-PARK, near Gloucester Gate.—TO LET, for Six or Twelve Months, a HOUSE, handsomely furnished. For particulars apply at Mr. THOMPSON, 26, Upper Albany-street.

AUSTRALIAN JOINT-STOCK BANK, Sydney, Melbourne.—LETTERS of CREDIT and DRAFTS are GRANTED upon these places by Messrs HEYWOOD, KENNARDS, and CO., No 3, Lombard-street, the agents of the Bank. They also undertake to negotiate Bills and to make advances on securities at the current rate.
By order of the Court Directors, Australian Joint-Stock Bank, Sydney EDWARD WRENCH, Manager.

MONEY ADVANCED by way of Mortgage on Reversionary or other Interests derived under Wills or Settlements, Leasehold or Freehold Property, East India Pensions, &c.—Apply to Mr. HOWELL, 1, Beaufort-buildings, Strand

BANK-NOTES.—The Full Value given in Cash for DIAMONDS, PEARLS, OLD GOLD and SILVER, GOLD and SILVER BULLION, and ENGLISH and FOREIGN COINS, at SELLIN DEAN and CO.'S, 9, Coventry-street, Leicester-square. Trade, Scrap, and Fine Gold and Silver purchased.

ROBINSON'S PATENT GROATS for more than thirty years have been held in esteem and increasing public estimation as the purest farina of the oat, and as the safest and most valuable preparation for making a pure and delicate GRUEL, which forms a light and nutritious supper for the aged. It is a powerful auxiliary to medicine and aids nature, is of general use to the sick-chamber, and, alternately with the Patent Barley, is an excellent food for infants and children
Prepared only by ROBINSON, RELY VILLE, and CO., Purveyors to the Queen, 64, Red-lion-street, Holborn, London.
Sold by all respectable Grocers, Druggists, and others in town and country in Packets of 6d. and 1s.; and Family Canisters, at 2s., 5s., and 10s. each.

CALLAGHAN'S CRYSTAL PALACE PERSPECTIVE GLASSES, though not larger than your thumb, yet possess power and clearness to show objects at the distance of a mile. Price 12s. 6d. May be had at the Books alls of the Railway Stations, or will be sent post-free on receipt of stamps or money orders, payable to William Callaghan, Optician, 23A, New Bond-street, corner of Conduit-street.
N.B. Sole Agent for the celebrated small and powerful double Opera and Race Glasses, by Plossl, of Vienna.

MICROSCOPES.—J. AMADIO'S BOTANICAL MICROSCOPES, packed in mahogany case, with Drawers, Condenser, Pincers, and two Slides; will show the Anatomy of Insects, &c. Price 18s. 6d. Address, Joseph Amadio, 7, Thorpsmorton-street. A large assortment of Achromatic Microscopes.

POWERFUL and brilliant patent TELESCOPES, Camp, Race-course, Opera, and perspective Glasses, to know the time by observing such extraordinary powers, that some, 3½ to 6 inches, will show distinctly a person's countenance from three and a half to six miles; the Georgian with his six satellites, and Saturn's ring, and the double stars. Of larger and all sizes, with increasing powers Also, a very small pocket telescope, magnifying 30 times, the size of a watch, it discern minute objects at a distance of from four to five miles
DEAFNESS.—The celebrated instrument for extreme cases of deafness, called the sound magnifier, organic vibrator, and invisible voice conductor. The tones of the human voice so rare as not to be in the least perceptible, the unpleasant sensation of singing noises in the head is entirely removed. It affords instant relief to the deafest persons and enables them to hear distinctly at church and at public assemblies. Beautifully made in tubes of the most transparent brilliancy for weak and defective vision. 3s. and 5s. SOLOMONS, Opticians and Aurists, 39, Albemarle-street, Piccadilly (opposite the York Hotel)

THE BEST ENGLISH WATCHES.—A. B. SAVORY and SONS request the attention of purchasers to their Stock of London made Patent Lever Watches which are manufactured by themselves on the premises In Silver Cases with the detached movement, jewelled in four holes, the strongest and best a half, six, and eight guineas each; or, in Gold Cases, ten, twelve, fourteen guineas each, and upwards.
The large Stock offered for selection includes every description, enabling a customer to select that which is most particularly adapted for his own use Lists of Prices, with remarks on the construction of Watches, sent free.—A. B. SAVORY and SONS, Watchmakers, opposite the Bank of England, 11 and 12, Cornhill, London.

SILVER-PLATE, New and Second-hand.—A. B. SAVORY and SONS' Pamphlet of Prices, with Drawings, may be had gratis; or will be sent post-free, if applied for by one of the company's servants. Their Stock of new and second-hand Silver Spoons and Forks, Tea and Coffee Services, Waiters, Candlesticks, Corner Dishes, &c., with detailed Lists of Electro Silver-plated Spoons and Forks.—A. B. SAVORY and SONS, Goldsmiths, opposite the Bank of England, 11 and 12, Cornhill, London.

DR DE JONGH'S
LIGHT BROWN COD-LIVER OIL, prescribed with confidence and the greatest success by the Faculty for its purity, efficacy, entire freedom from nauseous flavour, and marked superiority over every other variety in the treatment of
CONSUMPTION, BRONCHITIS, ASTHMA, GOUT, RHEUMATISM, SCROFULA, DISEASES OF THE SKIN, NEURALGIA, RICKETS, INFANTILE WASTING, GENERAL DEBILITY, AND ALL SCROFULOUS AFFECTIONS
SELECT MEDICAL OPINIONS.
CHARLES HENRY SINCLAIR, ESQ., M.D., L.R.C.S.E., Senior Physician to the Berkshire Hospital. Consulting Physician to the Reading Dispensary and Vaccine Institution, &c., &c.
"Dr. Cowan is glad to find that the Profession has some reasonable grounds for a genuine article. The material now sold varies in some every retail purchase, and is therefore in the necessary practice fully satisfies me that he has not exaggerated its value. In emaciated or strumous subjects this Oil is highly useful."
Sold by ANSAR, HARFORD, and CO., 77, Strand, London, Dr. De Jongh's sole British Consignees; and by many respectable Chemists throughout the Kingdom.
Half-pints (16 ounces), 2s. 6d.; Pints (32 ounces), 4s. 9d.; Quarts (64 ounces), 9s. IMPERIAL MEASURE.
CAUTION.—Each bottle is sealed with a stamped metallic capsule, and bears beneath the pink outside wrapper a label with Dr. de Jongh's stamp and signature. All Oils offered as Dr. de Jongh's, or as of the same kind, without such marks, are fraudulent impositions.

London: Printed and Published at the Office, 198, Strand, in the Parish of St. Clement Danes, in the County of Middlesex, by WILLIAM LITTLE, 198, Strand, aforesaid.—SATURDAY, MAY 10, 1856.

No. 800.—VOL. XXVIII.] SATURDAY, MAY 17, 1856. [WITH A SUPPLEMENT, FIVEPENCE.

## THE ITALIAN DIFFICULTY.

THE war may be at an end; but have the nations of Europe arrived at peace? We think not. It is true that the Governments of Great Britain and France have severally rejoiced, and ordered their people to rejoice along with them; that the Londoners have heard the firing of the Park and the Tower guns in honour of the Treaty of Peace; that peace has been proclaimed at Charing-cross and the Mansion house; and that the officials of the Crown have taken it into their heads that the people are, or ought to be, particularly jolly and elated, as well as grateful, and have thereupon ordered fireworks, and a general illumination, whereby they have gladdened the hearts of the pickpockets and window-smashers, and the general blackguardism of the metropolis; but it is equally true and obvious to all reflective persons, who can look an inch before them, that the situation of Europe is full of peril. Turn in what direction we will, we discover the portents of coming commotions and revolutions, consequent upon the non-fulfilment of the hopes excited by the late war; commotions and revolutions that in their rise and progress may contain the germs of other wars, even more desolating than that which has just been brought to a close; and which might perhaps have been prevented, had those intrusted with the destinies of the great Powers of Western and Central Europe, been as wise and clear-sighted as the nations over whom they rule.

We last week offered a few observations on the threatening state of Italy, and on the duties which more especially devolved upon the British Government. At that time the masterly note of the Counts de Cavour and de Villamarina, on behalf of the Sardinian Government, had not been promulgated. It bears date the 16th of April, and appears *in extenso* in another part of our paper. A document so worthy of the great occasion which called it forth has seldom been given to the world. Its calm statement of the unhappy facts which are the degradation and the danger of Italy, the unanswerable reasons it gives why this state of things should be brought to an end, not only in the interest of Sardinia and Italy, but of all Europe, will excite the attention they deserve, and enlist on behalf of the Sardinian Government the sympathies of every honest politician, and every friend of the freedom and independence of a gallant people. Everything which has transpired in the interval but confirms the opinions we expressed in our last, that the true and only way to do justice to Italy is to leave the Italians to select their own form of government, unawed and uninfluenced by the bayonets either of the Austrians or of the French. Sardinia had objects of her own in joining the alliance of Great Britain and France. That alliance with all its responsibilities was tacitly accepted by those great nations. Italy—which did not, because it could not, join in it—looked on with anxious hope for the consummation which was to grow out of the cheering fact that a free Italian State, of third or fourth rate importance, had fought side by side with the greatest maritime and military Powers in defence of the liberty and independence of Europe. It was, doubtless, the imperative duty of England and France to cease the war against

THE SANDHURST MEMORIAL SHIELD.—(SEE NEXT PAGE)

RETURN OF THE ARMY WORKS CORPS FROM THE CRIMEA.—(SEE NEXT PAGE.)

Russia as soon as Russia manifested a sincere desire to sue for or to accept honourable peace; but it was equally the duty of England and France to make at least the attempt to affirm the European system on a more secure basis than that in which they found it when hostilities commenced; and to take care that in making peace with one great Power, and extinguishing a fire in one particular direction, they did not leave the embers of future conflagration smoking and glowing at their feet.

Under whatsoever aspect we choose to regard it, it is evident that the Italian question is destined to try the statesmanship of both nations, and more especially of France. The policy of Great Britain is clear, precise, and straightforward. It is to support by all her moral weight the demand so ably and so temperately made by Sardinia; and to urge by all friendly means the Governments of Austria and France to allow the Italians to do justice to their reasonable hopes, and to rid themselves, peaceably if they can, of the intolerable tyranny of the priestly Government of Rome, and of the other tyrannies almost equally odious.

The alliance of Great Britain with Austria and France has one object, that of preserving intact the independence of the Ottoman empire from the hostile aggression of Russia. But this country has formed no alliance with France or Austria for any other purpose. On all other points of European polity which may from day to day arise England is absolutely free to take her own course. She is trammelled by no contract or stipulation whatsoever to support Austrian domination in Italy. She is and must be no party to any design which France may have over Rome, or over the Pope. Englishmen do not hold the opinion that Russia was, or is, the only foe to the peace and prosperity of the nations. If troubles are preparing in more quarters than one—as the world has but too much reason to fear—Great Britain is quite as free to pursue her own course with respect to them as if the Anglo-French and Austrian alliance against Russia had never taken place. We hope and trust that France will be found on the same side. The Emperor of the French is too sagacious a man to declare himself the enemy of Italian liberty, or to harbour any design, secretly or openly, against the independence of any State in Europe, whether great or small. It would certainly be a singular and somewhat unexpected result of the late Treaty of Peace, and of the pertinacious and zealous efforts of Austria to bring it about, if Russia, now the good friend of England and France, should revenge herself upon Austria, by throwing her weight into the scale in favour of Sardinia and of the Italians. Yet such a result is not impossible. The Russian war commenced on a so-called question of "the Greek and Latin Churches." The question of the Greek Church and of Constantinople has been for the time decided; what if the question of the Latin Church and of Rome should now demand a solution, and that Russia should aid in giving it? There was a period during the Russian war when, if Austria had so willed it, the difficult question of Italy might have been adjusted on more favourable terms. If she had united her armies to those of Great Britain and France, and aided in wresting the Crimea from Russia, the Allies might have had it in their power to purchase Lombardy and Venice from her (Lombardy and Venice which detest her rule, and will never patiently submit to it), by the cession of provinces that would have been an ample equivalent. If she had assisted in restoring to the Porte the Crimea and the other provinces of which Russia has despoiled it during the last sixty or eighty years, she might, perhaps, have received Moldavia and Wallachia in exchange for her Italian possessions. Thus another fire might have been extinguished. But Austria preferred a more cowardly policy. She would aid the cause by her good words only, and not by her brave deeds; and in the troubles that are preparing we shall not wonder if she find herself the greatest sufferer, and if her old friend Russia shall be found among the number of her opponents. But, whatever may be the complications that arise, we are certain of one fact—that no Government in this country will embark in any project of war for the coercion of the Italians, either by Pope or Kaiser. There is not a British statesman of any party who will dare to commit this nation to any alliance of which the object shall be to perpetuate misrule and foreign domination in any portion of the peninsula. Great Britain—thank Heaven!—can stand alone, and may be the moral, if she is not the physical, arbitress of the destinies of Europe.

## THE SANDHURST MEMORIAL.

A MEMORIAL has just been presented to Sandhurst College by Sir George Scovell, its late military Governor. The memorial consists of a round concave shield, of bronzed metal, originally forming part of the cannon taken in the Peninsular campaign. Within a border composed of reeds, and fastened by ribbons, upon which the various battles of "the Duke" are inscribed, are emblematic figures of Wisdom and Valour. The left hand of Valour embraces Wisdom, and the right holds a sheathed sword. Wisdom, with her right hand upholds a small figure of Victory, which rests upon a pillar, decorated with the motto and ribbon of the Garter, inclosing within its circle a portion of the hair of Wellington. Beneath this stands out in bold relief the word which through life formed the guiding principle of the Duke—Duty. On the pedestal upon which the fleet of the figures rest an inscription recalls the crowning service of the dead hero.

## RETURN OF THE ARMY WORKS CORPS FROM THE CRIMEA.

THE suggestive scene engraved upon the preceding page was sketched by our Artist at the Waterloo Station of the London and South-Western Railway, on Saturday last. It represents a party of the Army Works Corps just returned from the Crimea, by Portsmouth; in which port it is said that all troops coming home are to land; the facilities for their doing so, and the close proximity of the port to London, Aldershott, Chatham, &c., offering remarkable advantages.

The Army Works Corps, it will be recollected, originated in a suggestion made by Sir Joseph Paxton, M.P., in an address to his constituents at Coventry. Sir Joseph proposed as a preventive of mismanagement of matters of detail, so much complained of in the conduct of the war, that a number of navvies should be sent out to the Crimea, to do the work which they had been accustomed to do, and to keep the troops to fighting. The Government took up the notion, and Sir Joseph, in the spring of last year, received a commission soliciting him to organise a party of navvies to make a railway at the seat of war. In October last Sir Joseph had sent out 3000, and in about a month he dispatched another thousand. The latter party left London-bridge on October 20, and the interesting scene of their departure was engraved in the ILLUSTRATED LONDON NEWS for the following week. This body of men was styled the Army Works Corps; and of the last number about 450 consisted of mechanics and labourers. We have termed the scene of their return a suggestive one from the worn state of their clothing denoting that they had seen rough service in the Crimea. It certainly presents a remarkable contrast with the leave-taking illustration.

## FOREIGN AND COLONIAL NEWS.

### FRANCE.

*(From our own Correspondent.)*

**PARIS, Thursday.**

WE regret to state that the condition of the Empress's health continues to be so far from satisfactory as to cause a good deal of uneasiness. No actual danger is anticipated; but it is feared that it will yet be long ere she recovers her strength. There is, we believe, little or no doubt that the ceremony of the christening, with its attendant fêtes, will have to be deferred, her Majesty being little likely to be in a state to bear the fatigue of such an occasion. Some French papers declare that the christening is probably to be performed on the 14th, instead of the 9th, of June; but a report, for which there seems to be a certain foundation, asserts that it is not impossible that the projected journey to Biarritz may take place before, instead of after, this event, in which case the baptism could hardly be held before August.

The grand interest of last week was the representation of the comedy of M. Ponsard at the Odéon, "La Bourse." This was to have been the occasion of the Empress's first appearance in public, but, her Majesty not being strong enough for the fatigue of such an undertaking, the Emperor appeared only, with the King of Wurtemberg and some of the principal personages of his suite, in his own box—though so large was the number of his attendants that six boxes were required to accommodate them. The house was filled to excess, and all that Paris contains of men of position in politics, letters, finance, &c., appeared on the occasion. The whole of the theatre was taken for the three first representations long before this opening one, and a certain number of boxes have been retained up to the 10th. With regard to the piece itself, its merit, which is incontestable, in no way consists in the plot, which is of the slenderest: nor much in the drawing and development of the characters—none of which, with the exception, perhaps, of the heroine, can lay much claim to interest. The beauties of the work lie in the moral lesson it conveys; in the breadth of the style, which, while the expressions often descend to the vulgar and commonplace—a peculiarity purposely adopted in order to give reality, life, and identity to the subject—is powerful, concise, and, as often as the circumstances admit, lofty; in the keen and relentless satire, which flagellates the reckless, debasing, and demoralising thirst for gold, which is unquestionably the vice and the curse of the day; in the skill and courage with which the attack is made and carried out; and in the *à propos*. The piece was, as may be imagined, enormously applauded, and will make the fortune of the theatre.

The news from the south relative to the health of the Crimean troops landed there, and kept in a sort of quarantine at the Isles of St. Marguerite and Porquerolles, is so satisfactory that it seems very probable there may be no necessity for establishing a separate camp there, as was intended, but that the different regiments may be divided and sent to the various stations where it may be found convenient to place them.

It appears that the question now being agitated respecting the pensions of the high functionaries of State is one productive of extreme embarrassment, the ideas of the Corps Legislatif and those of the Emperor being considerably at variance on the subject: the former desires to be severe; but the well-known liberality of the latter, which the members of the Corps are unwilling to wound, forms a strong check on their deliberations, and it seems likely that their decision may be very difficult to arrive at. It seems that the Senate purposes to wage war against the abuse of adopting false titles, one on which there is at present little or no cheek.

It is said that the position occupied by Adolphe Adam in the Institute will, almost certainly, be filled by Hector Berlioz. It will probably be long before the place of the late Adolphe Adam in the musical world in Paris will be filled as he filled it. His was not an elevated genius, and his remarkable facility and fecundity—qualities often fatal to their possessor's ascent in the scale of true merit—his pecuniary position, burdened with debts contracted at the period of his managership, his activity and his good-natured readiness, all added to prevent his acquiring real depth of dignity in his art. But he had certain gifts which rendered him eminently useful in the place he held, and which, under other circumstances, might have enabled him to take a more worthy and dignified place. Some of his compositions, the "Chalet" especially, are possessed of considerable grace and melody, and, though we confess we have but little sympathy for the artist who takes his art in the view of a petty trade, we must make due allowance for difficulties of position, and grant what amount of merit really exists.

The Archduke Maximilian of Austria is expected to arrive in Paris on the 16th, where he will be received with the utmost distinction, the Prince Napoleon going to the station to receive and conduct him to the palace. The Duc de Tarente and the Marquis de Cadore are to proceed to Strasburg, to greet the Imperial visitor, and are to remain attached to his person during his stay.

It appears that the Emperor is resolved to proceed with the most unflinching activity against the manifestations of the rage for speculation which marks the spirit of the day. It is said that on the day previous to the publication of the notice on this head, which excited so much attention in the *Moniteur*, his Majesty had read in an evening paper the *réclame* of the Society of Emigration, and had written on the margin "*pourvuisvre*" before sending the paper to the Garde des Sceaux. It is even whispered that a Chamberlain of the Court has given his resignation in consequence of the position he thus holds being incompatible with certain financial arrangements, and that a project exists for the introduction of a law declaring that no members of the great bodies of the State can enter into any commercial enterprise or speculation whatever.

The theatres have little now that is of any interest, though the coldness of the season has made them more frequented than they commonly are at this season of the year. It seems that the severity of the temperature, which has only relaxed within a few days, has greatly affected the vines. The banks of the Rhone have shown ice within a fortnight.

### THE ITALIAN QUESTION.

The uneasiness of the Court of Rome with respect to the intentions of France and England on the much-mooted question of Italian government, or rather misgovernments, is said to have been greatly soothed by a communication from the Emperor of Austria to the Pope, in which his Apostolic Majesty assures his Holiness that there is not the slightest cause for alarm in the propositions put forth in the Conference at Paris, as he (the Emperor of Austria) is resolved to defend the interests and independence of the Church; and that, moreover, he is already perfectly *d'accord* upon the subject with the Emperor Napoleon. In spite of this assurance, however, the Austrian Government is very ill at ease as to the state of Italy. The latest news from Vienna is that an attempt is making to get the Germanic Diet to consider all the dependencies—Hungary, Galicia, and Lombardy—entitled to the protection of the Confederation. The prevailing impression is that the effort will be unsuccessful from the opposition of Prussia and the smaller Liberal States.

News from Sardinia still continues to excite the deepest interest. On the 16th inst. the Senate met for the purpose of discussing the motion of the Senator Massimo d'Azeglio approving the foreign policy of Ministers. At the opening of the sitting M. d'Azeglio proposed the following motion:—

The Senate, convinced of the happy consequences which may be produced by the Treaty of Peace, both for civilisation in general and for the re-establishment of order and tranquillity in the Italian peninsula, and recognising the honourable part which the policy of the Government and the conduct of the Sardinian Plenipotentiaries has had in these happy results, expresses its entire satisfaction.

In a short speech in support of his motion, M. d'Azeglio said it was a decided progress of civilisation and of the Italian question, that it had been acknowledged that Italy suffered unjustly, and that the governed had also rights which had been recognised in a European Congress. Count Cavour, in reply to M. d'Azeglio, said the Plenipotentiaries were obliged to confine themselves to possible objects, and especially to putting an end to the Austrian invasion, for which purpose the means proposed were the only ones that would have been accepted by the Allies. Therefore a more extended project for general sectarianism would not have been taken into consideration. M. d'Azeglio's motion having been put to the vote was carried unanimously.

The Duc de Grammont, the French Minister at Turin, has caused the *Gazzetta del Aipi*, a provincial journal of Sardinia, to be prosecuted for certain criticisms on the Treaty of Peace. The *gérant* of the journal has been sentenced to fifteen days' imprisonment and 200f. fine.

### AMERICA.

The Royal mail steam-ship *Africa*, which left New York on the 30th ult., arrived at Liverpool on Monday last. In the House of Representatives Mr. Chapman had moved the repeal of the Neutrality Laws, which he considered a violation of the constitution and a stigma on American intelligence. He said, "Mexico is in a state of dissolution, divided into factions, and lingering out a miserable existence by selling her territory to this country. In Central America there have been a series of revolutions for years. Cuba, the last remnant of the gigantic despotism of Spain, is necessary for the protection of our commerce and for the national repose and security. The law of nations depends upon circumstance. Their foundation is reason, right, and justice. We have not our own connecting link between the Atlantic and Pacific States, and that man is guilty of moral treason who halts about the means of seizing the Isthmus. It must be taken, even at the expense of a war. It is manifest destiny, as well as a national necessity."

Messrs Hammocks, Hacks, and Kingsley, charged with setting on foot at New York a hostile expedition to co-operate with General Walker in Nicaragua, had been discharged by the United States' Commissioner, as he did not consider the testimony sufficient to warrant their detention.

Further disturbances, attended with fatal consequences to some of the authorities, had again occurred in Kansas.

The *Aspinwall Courier* of the 17th ult. describes a terrible massacre by the natives of the Isthmus, on the night of the 15th, at Panama, whereby some twenty or thirty passengers on their way to California were killed and between thirty and forty were badly wounded. The quarrel originated in a dispute about one dime between an intoxicated passenger and a native respecting payment for a piece of water-melon. It appears that the native, being much exasperated by the conduct of the passenger, drew a knife, on seeing which the passenger fired and wounded him. The natives then mustered in strong force, and commenced a terrible assault upon the passengers, among whom were several women and children. When the survivors were attempting to escape on board a steamer in the harbour the natives formed a guard on the bench, and stripped men, women, and children. They also ransacked the offices of the Panama Railroad Company, and those of the Pacific Mail Steam-ship Company, carrying off everything of value.

### CENTRAL AMERICA.—DEFEAT OF GENERAL WALKER.

Another desperate battle has been fought between the Costa Rican troops and the Filibuster troops, under General Walker. It seems that the Costa Ricans, some three thousand strong, had taken possession of Rivas, one of the principal towns of Nicaragua, and that on the 7th of April General Walker, at the head of about six hundred Americans, endeavoured to dislodge them. The fight lasted some seventeen hours, at the end of which time Walker was compelled to retire, it is said, for ammunition. The New York papers publish a very long account of the engagement, given by *El Nicaraguense*, Walker's organ, and according to that paper it would appear that the Nicaraguan arms had achieved a great victory. But this is undoubtedly a partial view. A newspaper correspondent from the seat of war tells a very different story. The number of Costa Ricans killed (given by the *Nicaraguense* at 800) is considerably reduced; while the number of Americans killed is increased to 140. It is admitted, moreover, on all sides that the Costa Ricans remained in possession of the field. According to the latest accounts they were at Virgin Bay, and even threatened Granada. The transit, too, was in their hands, and a number of recruits for Walker, who left New York in the *Orizaba*, had been compelled to return.

All accounts represent that the American residents in Nicaragua were in imminent danger of their lives. President Mora, of Costa Rica, had issued a decree declaring that foreign prisoners, taken with arms, should be punished with death. This threat had already been put into execution, and the men who were captured in the affair at which Schlesinger commanded have been barbarously massacred.

Perhaps the most serious part of the intelligence from Central America is the report that the Costa Ricans, in their attack upon Virgin Bay, murdered indiscriminately a number of American citizens, who were unarmed, and who had never been in Walker's government. Most of them were, or had been, employed on the transit route, but they fell victims to the war-cry of the Costa Ricans—"Death to all Americans in Central America." It was hoped by the Filibusters that after this the United States' Government would put itself compelled to act against Costa Rica. Colonel Wheeler had addressed to Gen. Mora, President of the Republic of Costa Rica and General of its Army, a note relative to these transactions, in which we read:—"In the name of the people of the United States, and of the Government thereof, I protest against such infamous conduct, and be assured, Sir, that the Government of the United States, aided as you may be by insidious and powerful allies, will inquire into such acts of lawless violence, and, if unexplained and unatoned for, will take decided measures to protect the lives of our citizens and vindicate the honour of the nation."

The *New York Herald* alleges that the British Government has supplied that of Costa Rica with 2000 stand of arms; and its special correspondent transmits the correspondence as having been taken from a courier dispatched from the British mail steamer to the Costa Rican Government, and subsequently handed over to the American Minister at Granada, who dispatched the same to the Government of the United States.

## NAVAL AND MILITARY INTELLIGENCE.

FIVE regiments in the Crimea have received orders to hold themselves in readiness to go direct to Canada. They are the 9th, 17th, 39th, 62nd, and 63rd Regiments. Several of these were serving in the Mediterranean previously to coming eastward. It is understood that Lieut.-Gen. Sir William Eyre is to go in command of this force.

VARIOUS projectile experiments which have been carried on for some weeks past at Shoeburyness, under the direction of the Colonel-Superintendent, of Royal gun-factories at Woolwich Arsenal, have drawn to a close. They consisted of experimental trials with rifled shot of a somewhat novel description, Shells capable of containing considerable charges of powder were fired from six-pound field-guns, rifled with many grooves and sharp projections on the surface of the shells. The experiments, so far as they extended, have been pronounced successful, and were tried with charges varying from 1 lb. to 1½ lb.; and with 10 degrees elevation shells equal in weight to two ordinary shot were thrown to a distance of 2800 yards; some of them reached an ultimate range of 3400 yards.

GOVERNMENT having decided on establishing large bodies of troops in different parts of the country, the neighbourhood of Barn Cliff, near Hamble, in Hants, has been selected as an extensive military depôt, to which a large hospital is to be attached. It is the foundation-stone of this hospital that her Majesty is about to lay. A large wooden amphitheatre has been erected over the spot where the ceremony is to take place, with seats for 1500 persons, who will be admitted by tickets. Her Majesty will receive the address of the Southampton Corporation on the jetty, as the jurisdiction of the Mayor of that town as Port Admiral is limited to the Southampton Water, and does not extend inland. The Recorder of the town, and the Attorney-General, who represents it in Parliament, will accompany the Corporation to present the address to her Majesty. The best of Southampton Water will be deepened near the jetty, to allow ships to land troops and stores near the military hospital and depôt. All the arrangements of the Southampton Corporation are making for Monday next, the day which, after many variations, has been appointed for the laying of the stone by the Queen.

MR. THACKERAY ON AMERICA.—Previously to his departure from America Mr. Thackeray was entertained at dinner by the New York Society of the Sons of St. George and Merry England. In replying to the toast of his health, he said:—"It was in consequence of the existence of two young lasses in my own country (God bless them!) that I ever came into this country. I thank God that in coming here I have found some of the kindest of friends, some of the best company, some of the noblest and most honest people that I ever saw in any country in Christendom."

A few days ago the first regiment of the Grenadiers of the Guard at Courbevoie, mustered in full uniform to hear from their Colonel, M. de Bretteville, the official announcement of the honour conferred upon the regiment by the Emperor inscribing the Imperial Prince on its register as *enfant de troupe*.

## THOUGHTS IN THOROUGHFARES.

It is unfortunate when Whit-Monday is turned into a wet Monday, for it is, perhaps, the most general holiday that the working classes of London are able to obtain. It is a day for the opening of many an elysium in the outskirts, where tea and talent, both of a fair average quality, may be enjoyed at very moderate prices. Monday last wasnot favourable to *al fresco* entertainments, and many a suburban fairyland was converted into a swamp by the incessant rain of a thorough wet evening. In vain were sundry "great contortionists" advertised to assume "incredible positions," for there was no encouragement to visit a tea-garden for the purpose of seeing a fellow-creature tie himself into a knot, or toss his children about in the air. A walking philosopher perusing the placards on the walls of the thoroughfares will deplore the taste of the public, which seems still to patronise those contortions of limb which appear to involve the greatest hazard to life, and finds a pleasing excitement in feats of danger. One-might have hoped that the morbid appetite was long ago extinguished, for the satisfaction of which a Frenchman used to walk into a hot oven, and swallow poison, to the delight of a British audience, who once hissed him off the stage because he declined to take the deadly dose when he happened to have forgotten to supply himself with the antidote. The feeling is unhappily not extinct which applauded the unfortunate individual who destroyed his own life at Waterloo-bridge by hanging himself for the amusement of the spectators, and which drew together at Vauxhall Gardens a large assembly to see a balloon ascent, the great attraction of which was the probability of the fatal result that actually happened. A thoughtful frequenter of the thoroughfares will find some light food for his philosophy in the contemplation of the stock-in-trade of the Italian image-boys. He may read the signs of the times in remarking the celebrities that are carried about the streets in all the dignity of a plaster-of-Paris popularity. The material is appropriate to the subject; for popularity and plaster of Paris are equally fragile, equally liable to be damaged by dirt accidentally, or wilfully cast upon them, and equally subject to be superseded by the novelty which the public fancy demands. Loyalty seems to be the only permanent feeling that plaster of Paris is capable of embodying; for, with the exception of the busts of the Queen and Prince Albert, which keep their position on the head of every image-boy, the objects which form his stock are being constantly changed. Our ally the Emperor of the French, and his Empress, are apparently beginning to assume all the stability of a plaster-of-Paris institution. The wisdom with which Louis Napoleon has hitherto ruled renders it improbable that Paris or its plaster will be exposed to any rude shocks; and it is to be hoped and expected that both may permanently bear the Imperial impress they have received. A short time ago the heroes of the war supplied a large portion of the popular imagery; but with the return of peace the Italian boys have fallen back on literary celebrities; and Shakspeare reappears on the boards. Once more we are invited to purchase the head of "Signor Milton," or a proposal is made to throw him in cheap, to complete a pair with "Signor Shakespero," whose *bella testa* is recommended on account of its baldness, as an effective companion to *l'altero signore*, the other gentleman with the profusion of curls.

A somewhat striking announcement met or rather saluted the eye of the pedestrian in the public thoroughfares on Tuesday last, in the shape of a newspaper posting-bill headed "Most Important," and containing in large letters the words "Discontinuance of the Sunday playing of the bands by order of Lord Palmerston." This took most people by surprise, for the experiment was supposed to have been perfectly successful, and, as far as related to the number and good order of those who had repaired to the parks to hear the music, success has certainly been achieved. The new practice is, however, to be abandoned, at least for the present, in obedience to the alleged wishes of the country, which do not seem to be in accordance with the wishes of the town. The subject will, no doubt, be discussed in the Legislature, and the feeling of the public is really opposed to Sunday music, the seekers of Sunday recreation must endeavour to find it without the accompaniment of a military band. It is tolerably certain that nature will continue her attractive operations as usual, and the Sunday visitors to public gardens may be sure that whatever may be the case with the trumpet or the trombone, the rose will not "cease to blow" nor will the birds cease to sing. It is fair to respect the conscientious scruples, however mistaken they may be, of those who object to Sunday music as a sin. It is, however, desirable to guard against the influence of cant, and it is to be feared that in the present days of demonstrative piety there are certain sorts of people, like certain sorts of news, which seem almost "too good to be true."

Talking of the assumed appearances of piety leads one naturally to think of those persons whom one may observe sneaking about the thoroughfares, peeping in at back-doors, and hanging about area steps, with religious tracts in their hands. If one sees a sinister-looking individual engaged in an undertoned conversation with a servant girl who looks guiltily and uneasily about her as she stands at the half-open gate, it is probable that the party with whom she is occupied will have a commodious basket in one hand and a bundle of religious tracts in the other. The tracts are to blind the eyes of the public, who are influenced by appearances in bestowing their charity as well as in other matters, and the basket is to carry away the "kitchen stuff"—the title which seems to include everything that a marine-store dealer will purchase. The folly of relying on the outward semblances of piety is receiving constant illustrations in our criminal courts; and it is only within a few days that a "serious" individual has been charged with stealing a pork-pie, after having ordered and paid for his breakfast at a coffee-shop. An attempt was made on his behalf to get a private interview with the magistrate, which was of course refused, and other measures were taken to try and hush up the affair, which was described by a friend of the party as an "eccentricity of a very good and pious, although a little enthusiastic, man." An "enthusiasm" in favour of pork-pies might be all very well, if unaccompanied by the "eccentricity" of taking them without paying for them. It is hardly fair to the really religious portion of the public to talk of the "piety" of the accused, and until he is acquitted by a jury of a charge—to which, by the way, an offer was made that he should plead guilty if the case could be disposed of summarily—it would be as well to distinguish the quality he is said to possess by the term of "pork piety." Another "serious" culprit was, it seems, brought up at Guildhall for having robbed a chapel of some hymn-books, and was complimented by the Bench on his presumed horror of Sunday music; for the Alderman who inspected his memorandum-book is reported to have said, "There is one mitigatory circumstance in your case: you were not, as far as appears from this book, at any of the parks where the bands were playing." It used to be considered that hypocrisy was an aggravation of guilt; but this theory seems, in some cases, to be reversed, and a thief who pretends to be a saint may be looked upon more leniently when he is found to be a sinner. When this fact comes to be generally known we shall be having half the thieves in London walking about with sermons or tracts in their pockets, and perhaps carrying memorandum-books full of notes on the iniquities of Sunday music, and other Sabbatarian sentiments. Religion has often been made a cloak; but, judging from recent instances, it appears to be used rather extensively as a wrap-rascal. It is, however, a garb that, when very ostentatiously displayed, may be suggestive of the propriety of buttoning up one's pockets to a person so liable to abstraction as

A WALKING PHILOSOPHER.

## OBITUARY OF EMINENT PERSONS.

### HENRY CLUTTERBUCK, ESQ., M.D.

THE eminent physician—the "father," as he has been termed, "of the London faculty"—died in Bridge-street, Blackfriars, on the 23rd ult., at the advanced age of ninety-one. He belonged to a family long settled in Cornwall: his grandfather, Thomas Clutterbuck, having been Commander in the Scilly Isles early in the last century. His father, Thomas Clutterbuck, Esq., of Marazion, in Cornwall, had four sons, viz., 1, Thomas, Recorder of Truro; 2, Charles Caspar, of North Cadbury, Somersetshire; 3, Dr. Clutterbuck; and 4, Christopher, a Lieutenant in the Royal Navy. The third son, the subject of this notice, Dr. Clutterbuck, received his education in the west of England: and settled at an early age in the metropolis, where he raised himself to distinction in the practice of medicine, and in the office of Lecturer at St. Bartholomew's Hospital

To the personal claims derived from professional reputation Dr. Clutterbuck added the advantage of high and ancient lineage. By the intermarriage of his family with some of the oldest houses of England—those of Scrope, Portman, Wyndham, Howard, Fitzalan, Mowbray, De Moleyns, &c.—he was fifteenth in direct descent from Thomas Plantagenet de Brotherton, Earl of Norfolk, eldest son of Edward I., by Margaret, eldest daughter of Philip the Bold, King of France, thirteenth in descent from Charlemagne.

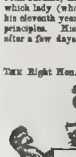
### J. B. F. BLACKETT, ESQ.

JOHN BURGOYNE FENWICK BLACKETT, Esq., of Wylam, in the county of Northumberland, recently M.P. for Newcastle-on-Tyne, was the elder son of the late Christopher Blackett, Esq., of Wylam, a Captain in the 18th Hussars, and M.P. for South Northumberland, by his wife, Elizabeth, daughter and coheir of Montagu Burgoyne, Esq., and granddaughter of Sir Roger Burgoyne, Bart. Mr. John Burgoyne Fenwick Blackett was born in 1821. He received his early education at Harrow, whence he proceeded to Christ Church, Oxford. In 1841 he took his degree as a second class in classics, and in the following year was elected to a Fellowship at Merton. He did not, however, remain long in residence, but came to London, where he studied for the bar, and was a contributor to some of the periodicals. He was, at the last general election, returned by a large majority for Newcastle-on-Tyne, and in the House of Commons he amply sustained the expectations of his friends, and rose in the estimation of his constituents. As a member he was regular and punctual in his attendance, and was a frequent speaker, strongly advocating an extension of Parliamentary reform, of the electoral franchise, and of national education; he also supported the ballot, and refused to pledge himself to vote for the withdrawal of the Scotch grant. He gave high promise of a brilliant career, when, about twelve months since, a paralytic attack prostrated him, obliged him to resign his seat in Parliament, and, eventually, to the deep regret of all who knew him, caused his death, which occurred on the 26th ult., at Villeneuve-le-Roi, a small town in the department of the Yonne, Champagne, France. Mr. Blackett was in his 35th year, and was unmarried; he is succeeded in the representation of the ancient family of the Blacketts of Wylam, by his only brother, Edward Algernon Blackett, Esq., R.N., who married, the 25th May, 1852, Lucy, daughter of the Rev. T. Mitchell.

### C. J. W. DEANS DUNDAS, ESQ.

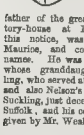
CHARLES JAMES WHITLEY DEANS DUNDAS, Esq., late of the Coldstream Guards, and M.P for the Flint district in 1838, was the elder son of Vice-Admiral Sir James Whitley Deans Dundas, of Berton Court, Berks and Aston Hall, Flintshire, recently Commander-in-Chief of the British naval forces in the Black Sea, by his first wife (his first cousin), Janet, only daughter of the late Charles Deans Dundas, Lord Amesbury. Mr Charles James Whitley Deans Dundas, the subject of this notice, was born the 16th June, 1811, and married, the 20th of March, 1837, his cousin, Janet Lindsay, daughter of John Jardine, Esq., and granddaughter of Bruce the Abyssinian Traveller, by which lady (who survives him) he has had a son, Charles Amesbury, now in his eleventh year. Mr. Dundas in politics was a strenuous supporter of Whig principles. His death, which is very generally lamented, occurred recently, after a few days' illness.

### EARL DIGBY



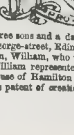
THE Right Hon. Edward Digby, D.C.L., Earl Digby, Viscount Colchehill, and Baron Digby in the Peerage of England, Baron Digby of Geashill, in the King's County, in the Peerage of Ireland, Lord Lieutenant and Custos Rotulorum of the county of Dorset and the town of Poole, and Colonel of the Dorsetshire Militia, died on the 12th inst. He was the eldest son of Henry, the seventh Irish Baron, and first Earl, Viscount, and Baron of the English creation, by his second wife, Mary, daughter and heiress of John Knowler, Esq., of Canterbury. He was born the 8th of January, 1773, and succeeded his father as second Earl, the 25th of September, 1792. He was never married, and, as his two brothers, the only other male issue of his father, are also deceased unmarried, the Earldom and other English titles become extinct, while the Irish Barony of Digby of Geashill passes to his Lordship's cousin, Edward St. Vincent Digby, Esq., of Minterne House, Dorsetshire, eldest son of the late Admiral Sir Henry Digby, G.C.B., and great-great-grandson of William, the fifth Baron Digby. Edward St. Vincent Digby, now Lord Digby, married the 27th of June, 1827, Theresa, eldest daughter of the present Earl of Ilchester, and has issue three sons and three daughters.

### THE REV. A. I. SUCKLING.



THE Rev. Alfred Inigo Suckling, L.L.B., of Woodton Hall, county of Norfolk, Rector of Barsham, Suffolk, was the only son of Alexander Fox, Esq., by his wife, Anna Maria, eldest daughter of Robert Suckling, Esq. He was born the 31st Jan., 1796, and, succeeding his maternal uncle, Lieut. Maurice William Suckling, in 1820, assumed the surname and arms of Suckling only. The rev. gentleman, who was educated at Pembroke College, Cambridge, married, the 31st Jan., 1816, Lucy Clementina, eldest daughter of Samuel Clarke, Esq., and has had issue four sons and six daughters. He died at St. Heliers, Jersey, on the 3rd inst. The family of Suckling, which the Rev. Mr. Suckling represented, was both ancient and distinguished, and was seated so far back as 1348 at Woodton, Norfolk. He also represented the old and knightly house of Shelton. The Rev. Dr. Maurice Suckling, the son of Robert Suckling, and his wife, Sarah Shelton, was the maternal grandfather of the great Lord Nelson, whose mother was born in the Rectory-house at Barsham. The Rev. Mr. Suckling, the subject of this notice, was descended from Robert, the elder brother of the Maurice, and counted among his ancestors many Royal and noble names. He was also descended from the famous architect Inigo Jones, whose granddaughter, Susannah Webb, married Captain Robert Suckling, who served at Minden. Sir John Suckling, the poet, was of the family, and also Nelson's brave uncle, Captain Maurice Suckling. The Rev. Mr. Suckling, just deceased, published an excellent and well-illustrated history of Suffolk, and his collections for illustrating the county of Essex have been given by Mr. Weale in his "Quarterly Papers on Architecture."

### SIR WILLIAM HAMILTON, BART.



SIR WILLIAM HAMILTON, Bart., of Preston, co. Haddington, the able and distinguished Professor of Logic and Metaphysics in the University of Edinburgh, was served heir male in general to Sir Robert Hamilton, of Preston, Bart., and was the third Baronet in possession, and eighth *de jure*. He was born in Glasgow, and was educated at Oxford, where he obtained first-class honours. He was admitted a member of the Scottish Bar in 1813, and was the author of several articles in the *Edinburgh Review*. He married, in 1839, his cousin, Janet, daughter of the late Hebert Marshall Esq., and had issue three sons and a daughter. Sir William died on the 9th inst., at 15, Great George-street, Edinburgh. He is succeeded in the Baronetcy by his eldest son, William, who was born in 1830. The family of Hamilton, which Sir William represented, sprang from Sir Gilbert de Hameldon, founder of the house of Hamilton in Scotland. The first Baronet, a staunch Cavalier, obtained his patent of creation the 5th Nov., 1673.

## *COUNTRY NEWS.*

### METEOROLOGICAL OBSERVATIONS AT THE HIGHFIELD HOUSE OBSERVATORY, NEAR NOTTINGHAM,

FOR THE WEEK ENDING MAY 13, 1856.

*The range of temperature during the week was 30°2.*

*The Weather.*—Fine, except on the 8th—showery; 12th, from 4 p.m. rain; and 13th, which was very rainy from 1 p.m.

*The direction of the wind* was—on 7th, N.E., became N.N.E at 7½ p.m., N. at 9½ p.m.; N.N.E. at 6½ a.m. on the 8th, N. at 4 p.m., N.E. at 6½ p.m., N. at 10 p.m.; N.N.E. at 6 a.m. on the 9th, in which quarter it remained till 7½ p.m. on the 12th, becoming N.N.E. at 8½ p.m.; E.N.E. at 11¼ a.m. on the 13th, sweeping through E. to S. at 1½ p.m, became S.S.W. at 2 p.m., S.W. at 2½ p.m., W.S.W. at 4½ p.m., S.W. at 7½ p.m., W.S.S. at 8 p.m., and S W at 9½ p.m.

*Gales* occurred on the 7th and 8th: a solar halo occurred on the 8th.

On the 9th the wild hyacinth came into flower; on the 10th the snowy mespilus and bird cherry in flower; 13th, cratægus monogina in flower.

ANGLO-FRENCH FREE-TRADE ASSOCIATION.—The *Staffordshire Advertiser* inserts a letter from Mr. John M'Gregor, M.P., who took a prominent part in the recent demonstration in the Potteries in favour of Free-trade with France, in which he says:—"I have had a long interview with the Emperor on the subject of freedom of trade; also with the First Minister of State and the Minister of Commerce, all favourable; and important commercial measures will soon be taken. Yesterday we seized all prohibitions should be abolished; nevertheless, persevere, and we will succeed."

LONGFORD ELECTION.—Mr. George Hughes, ex-Solicitor-General was returned on Wednesday without opposition, in the room of Mr. FOX, deceased.

SEVERN VALLEY RAILWAY MEETING AT STOURPORT.—On the 6th inst. a numerously-attended and influential public meeting was held in the Town-hall, Stourport, for the purpose of hearing explanations from Sir S. M. Peto, Bart., as to the present position of the Severn Valley Railway. Sir T. E. Winnington, Bart., M.P., who was called to the chair, reminded the gentlemen present that the town of Stourport owed its importance to the river and canal, formerly great arteries of commerce, but which were now superseded by railways. If, therefore, the present opportunity of completing the Severn Valley Railway were lost, the town would be unable to compete with other more favoured localities (Hear, hear). Sir S. M. Peto then explained the reasons which had induced him to take so active a part in the endeavour to resuscitate the Severn Valley Railway, and to take charge of the undertaking. The first thing he felt he ought to do was to ascertain whether the line, when constructed, would pay a fair dividend to those connected with it. A great deal of unnecessary work had been set down in the original plans, involving of course a greater expenditure than was really required. He, therefore, persuaded his colleagues to go to Parliament for powers of deviation and alteration. They did so, and the result was that the line could now be constructed at a cost of £15,000 per mile. Another great consideration for them was, that the line would include more than an average population as compared with other lines in the country, and he then explained the towns and districts through which it would pass. He found they would require 7800 additional shares to be taken, and he, therefore, made up his mind at once to come down to the locality, and see what he could do among his friends along the line (Great cheering). He did not believe his London friends would do much until they saw that shares were being taken up in the locality. With respect to the subscription for shares, he would not allow any person to pay any money till the whole 7800 shares were subscribed for. If that could not be done, he then would break up the company, and pay every one his due. In conclusion, Sir Samuel urged upon the landowners on the line the great benefit they would derive from its completion; and he quoted one of the Duke of Norfolk's farms, showing that the landowners and farmers in its locality had contributed 10-12ths of its entirety. Resolutions were passed in favour of the proposed undertaking, and, altogether, the meeting seemed very hearty and unanimous.

THE MINERS' STRIKE IN SCOTLAND.—This contest still continues and day by day the sufferings of the men and their families become more extreme. On Monday all the colliers at New Mains went in at the rebate rate, but the ironstone-miners still remain out. Indeed it is well known that a great body of the workmen would be only too ready to go to work at 4s. per day, but they are deterred by intimidation. Considering that between 20,000 and 40,000 men are idle, and meeting daily to discuss their grievances, their conduct, on the whole, has been very orderly, a very small number only having been apprehended for intimidation. But it is needless to say that the mining districts are in a most uneasy state, and timid people at least are enduring the deepest anxiety by reason of their fears for an outbreak. In the mean time every precaution has been taken to repress or meet any attempt at disturbance.

A SEA SERPENT.—Two men walking towards the New Quay at Lancaster, the other day, descried an unusual object lying in the river, apparently left by the tide. On examination it turned out to be a specimen of the "devil fish." It weighed two cwt., and from the head projected two horns a foot long. It was armed with formidable mouth teeth, similar to those of a shark. On opening it a large codfish was taken from the stomach.

A GIPSY WEDDING.—Considerable interest was excited in Bilston on Wednesday last by the marriage of two of this singular people. The bride and bridegroom were distantly related to each other, and claimed descent from the same royal family. The bride's family has been encamped in the neighbourhood of Bilston for some years. Both the parties are possessed of considerable wealth, and have gained respect by their quiet and regular conduct. The Church of St. Leonard was crowded by spectators, at the marriage service, which was performed by the Rev. H. S. Fletcher, assisted by the Rev. R. J. H. Mitchell. During the afternoon many of the most respectable inhabitants visited the camp, among all of whom the offer of a glass of wine was accepted, and hilarity all were received with politeness and attention, and wine in abundance was offered to the principal guests. Many were the congratulations the young gipsy couple receive. *—Birmingham Journal.*

A SINGING MOUSE.—On Friday night, about ten o'clock, the inmates of a house in Portferry were surprised to hear, as they supposed, a bird singing in an adjoining apartment. On proceeding in the direction whence the sounds came, they were astonished to see in an old birdcage, in which a bird had been kept about twelve months since, a small mouse, singing away with great composure. The notes produced were somewhat similar to those of the redbreast. Although the parties descried within a candle, the little songster continued its song uninterruptedly for a considerable length of time, gazing all the while on the spectators.—*Newry Examiner.*

THE IRISH POOR-LAW COMMISSION.—A compensation allowance has been granted to Mr. W. Stanley, the late Secretary to the Irish Poor-law Commission, the office having been recently abolished by Act of Parliament. Mr. Stanley has been in the public service, in one capacity or another, for upwards of forty years, and, according to the scale of compensation, he is to receive a pension of £633 6s. 8d. per annum; but, as this allowance is to be merged in the salary of a vacant office in the Inland Revenue Department, to which he has been nominated, the retired allowance granted to him will be saved to the country.

THE RAILWAY FORGERIES.—James Montgomery Knighting was brought up to Dublin, last week, on a writ of *habeas corpus*, for the purpose of having preferred against him a series of charges in relation to the forgeries of railway shares transfers. There were altogether eight fresh charges of forgeries; and, a number of witnesses having been examined for the prosecution, the prisoner was fully committed for trial at the next commission on the eighth charge proved, and which, in addition to the charges already brought under the public notice, make the aggregate amount of forgeries £14,170.

WELL-FLOWERING.—The Flowering of Tissington Wells, Derbyshire, took place, as usual, on Holy Thursday, when the Curate, the Rev. W. Gladstone, read prayers, and an appropriate sermon was preached by the Rev.—Dampier, of Leek, from the 10th verse of the 4th chapter of Ephesians. The colours of the well decorations were arranged with peculiar taste. By the liberality of Sir Henry Fitzherbert, Bart., there was, as usual, a most bountiful repast provided for visitors.

PAYING OFF A NATIONAL DEBT.—The Dutch First Chamber of the Netherlands was engaged last week discussing the bill for paying off ten millions of the national debt. M. Cremers objected to it on the ground that that sum might be better employed in public works, to which the Minister of Finance replied that the income of the State was in such a flourishing condition that it could both diminish the national burdens and encourage public works. No further opposition being made, the bill was unanimously passed.

INAUGURATION OF THE PEACE TROPHY AND SCUTARI MONUMENT AT THE CRYSTAL PALACE

## THE PEACE FETE AT THE CRYSTAL PALACE.

THE imposing ceremony of the inauguration of the Peace Trophy and the Scutari Monument, designed by Baron Marochetti, and appropriately erected in the Crystal Palace, took place on Friday, the 9th inst., in the presence of her Majesty. We gave a brief notice of the proceedings in part of our impression last week, and are now enabled to give a full report of what took place.

The time fixed for the arrival of the numerous spectators being eleven o'clock, from an early hour in the morning thousands of carriages, filled with gaily-dressed ladies and officers in uniform, thronged the whole line of road from town to Norwood; and before one o'clock every available spot commanding a view of the centre transept was crowded with spectators, most of whom were ladies. The centre transept had undergone many important alterations for the purpose of accommodating an increased number of visitors for this occasion. The orchestra was removed from the south end of the centre transept to the north side, immediately behind the Royal dais, where a permanent building, constructed upon acoustic principles, was substituted for the open platform, in use for the band at the other end of the transept. The whole of the floor was covered with red cloth and striped red and yellow drugget. A special gallery to the left of the dais was set apart for the Queen's household. At the south end of the transept special galleries were also set apart for the foreign Ministers and the Houses of Lords and Commons and their ladies. The open space to the right of the Queen was reserved for her Majesty's Ministers, and that to the left for the Crimean officers, who attended in uniform. The whole space under the south side of the centre transept was occupied by the visitors, who also crowded the various staircases leading to the galleries, and every available position, however small, from which even a passing glimpse of what was going forward could be obtained. The upper galleries were also placed at the disposal of the visitors, who, however, notwithstanding the excessive crowding below, evinced no disposition to avail themselves of the accommodation. The whole of the north end of the building, behind the screen concealing the Peace Trophy, was reserved exclusively for her Majesty's use while she was in the building. The Scutari Monument is erected in the nave, on the south side of the great transept, at the base of which, before the screen, stands Baron Marochetti's equestrian statue of Richard Cœur de Lion. The Peace Trophy stands immediately under the nave to the north, at the base of which, also before the screen, is placed the equestrian statue of the Queen, by the same artist.

The majority of the spectators having taken their places before twelve o'clock, there remained a painfully long interval of three hours and a half to be disposed of before the ceremony took place. The *ennui* and dissatisfaction usually evinced upon occasions of such protracted delays were not so apparent on this occasion as might have been expected, for when the people were tired of contemplating each other—an occupation which evidently afforded amusement for at least a couple of hours—the constant arrival of detachments of Crimean soldiers, who formed in line round the dais, and, above all, the magnificent performances of the Crystal Palace band, tended to keep up the excitement, and render everybody good-humoured. The bands of the Coldstream Guards and of the Royal Artillery also performed various selections from operas during the morning.

Punctually at the time appointed—namely, at half-past three—the Royal party, comprising her Majesty, the Duchess of Kent, Prince Albert, the Prince of Wales, the Princess Royal, the junior members of the Royal family, the Duke of Wellington, the Duchess of Sutherland, the Marquis of Breadalbane, Lord Spencer, General Grey, General Phillips, and Sir G. Wetherall, arrived at the Palace; and, entering by the north transept, passed to the dais, where they took their seats amidst enthusiastic cheers, which were gracefully acknowledged by her Majesty. As the Royal party took their seats on the dais the combined bands of the Crystal Palace, the Coldstream Guards, and the Royal Artillery struck up the National Anthem, the whole of the spectators rising and cheering at the same time. At the conclusion of the National Anthem the quartet from M. Costa's oratorio of "Eli"—"We bless you in the name of the Lord; hear them, Lord, in the day of trouble; God of Jacob, do Thou defend them; O preserve them, and keep them in peace; let them be blessed upon the earth"—was sung by Madame Rudersdorff, Mr. and Mrs. Lockey, and Mr. Thomas, with admirable effect. At the conclusion of the quartet the band played the "Marche Funèbre" from the "Sinfonia Eroica" of Beethoven, at the second part of which the business of the day commenced; the veil on the south side of the transept being lowered, the model of the "Scutari Monument" made in imitation of granite, with a weeping figure of an angel at each corner, was discovered.

The following words, by Mr. H. F. Chorley, were then sung to a "Russian air" by the vocalists in an orchestra which had been constructed for the occasion near the dais:—

First Verse.

Solo.—Madame Rudersdorff.

God, the all terrible! King, who ordainest
Great winds Thy clarions, the lightnings Thy sword
Show forth Thy pity on high where Thou reignest:
Give to us peace in our time, O Lord!

Second Verse.

Quartet.—Madame Rudersdorff, Mr. and Mrs. Lockey, and Mr. Thomas.

God, the all merciful! Earth has forsaken
Thy ways of blessedness, slighted Thy word;
Bid not Thy wrath in its terrors awaken:
Give to us peace in our time, O Lord.

Third Verse.

Solo.—Madame Rudersdorff.

So shall Thy children, in thankful devotion,
Laud Him who saved them from peril abhorr'd,
Singing in chorus from ocean to ocean,
"Peace to the nations, and praise to the Lord."

The hymn being concluded, the various bands played the march and chorus from Handel's oratorio of "Judas Maccabeus," "See the Conquering Hero Come," during the performance of which the veil before the Peace Trophy was lowered, amidst the most tremendous cheering, not only from the visitors, but from the various detachments of soldiers drawn up within the transept. The greatest curiosity had prevailed all the day to witness the celebrated Peace Trophy, which was provokingly hidden between two such effective screens that even the most cursory glance was denied to the inquisitive; consequently, when the screen was removed there was a general rush to get a good sight of it; and there is very little doubt that the most sanguine were satisfied by its appearance. It consists of a female figure, about 20 feet in height, clothed in gold and silver tissue. The arms are extended—one hand holding a branch of olive, and in the other some corn, representing peace and plenty. The figure is standing on a beautifully-ornamented and artistic pedestal, between 70 and 80 feet in height, of great solidity. Round the base of the pedestal are grouped some of the celebrated statues of the Early Italian school.

The soldiers present, comprising detachments of Coldstream Guards, of the Scots Fusiliers, of the Grenadiers, and Artillery, and of almost every regiment of the Line, then defiled round the dais, the bands playing French and Sardinian airs, which were followed by "Rule Britannia." This manœuvre was executed at the suggestion of her Majesty, who, during the performance of the National Air, descended from the dais with her party, and retired to the north end of the building. Before her departure she was presented by M. Negretti, the photographer, with a stereoscopic representation of the ceremony, taken a few minutes previously from one of the upper galleries, in spite of the gloominess of the day.

All the soldiers who appeared on the occasion were decorated with Crimean medals. A medal was also struck by the machine established on the premises, bearing on one side the trophies of the Allies, with the circumscription, "Fall of Sebastopol, September 8th, 1855;" and on the other the inscription, "The Allies give Peace to Europe, March 30th, 1856."

When the troops had passed round the dais, and taken up their former positions, the duet "O! Lovely Peace," from the same oratorio, was sung by Madame Rudersdorff and Mrs. Lockey:—

O! lovely peace, with plenty crown'd,
Come spread thy blessings all around,
Let fleecy flocks the hills adorn,
And valleys smile with wavy corn.

The combined bands then played the "Partant pour la Syrie," which was very much cheered, after which was played the Russian National Anthem, which was passed by in complete silence. "Rule Britannia" then followed, during the performance of which the Royal party withdrew to the north end of the building, from which they departed about half-past four o'clock, followed by the majority of the visitors, whom neither the fountains on the terrace nor the gastronomic resources of Messrs. Staples' establishment could induce to remain.

The musical arrangements on the whole were very satisfactory. Previously to the ceremony, and for some considerable time after its termination, the bands of the Coldstream Guards and Royal Artillery, in turns, enlivened the scene with strains of military harmony: "Il Trovatore," "Lucrezia Borgia," "Semiramide," and other popular works, supplied attractive pieces; while the Royal Artillery provided even a still greater treat in Mozart's fine overture to "Zauberflöte." This—although played rather slowly and sedately—was decidedly effective; and offered, besides, an agreeable contrast to Verdi's eternal "Miserere," which was introduced on two occasions. The band of the Crystal Palace, under the direction of Herr Manns, also did efficient service; and in the covered orchestra lately

ANGEL OF THE SCUTARI MONUMENT, BY MAROCHETTI, AT THE CRYSTAL PALACE.

erected for its accommodation sounded to much more advantage than we had anticipated. The addition of stringed instruments (suggested, we understand, by the new conductor) has proved a happy innovation. The unchanging monotony of the wind band alone must always in the end become tiresome.

It is estimated that the visitors who attended on the occasion were nearly 12,000 in number. This is a large figure, but not the slightest pressure or inconvenience was experienced; and too much praise cannot be given to the Sydenham authorities for the accommodation they afforded to so many spectators, all of whom could view at their ease the impressive ceremony that took place before them. Admission on payment of 10s. 6d., 1492; ditto by season tickets, 10,296: total visitors, 11,788.

### CALENDAR FOR THE WEEK.

SUNDAY, May 18.—Trinity Sunday. Bonaparte declared Emperor, 1804.
MONDAY, 19.—Anna Boleyn beheaded, 1536. Battle of La Hogue, 1692.
TUESDAY, 20.—Columbus died, 1506.
WEDNESDAY, 21.—Prince Menschikoff left Constantinople, 1854.
THURSDAY, 22.—Corpus Christi. Alexander Pope born, 1688.
FRIDAY, 23.—Allies landed at Kertch, 1855. Sir W. Molesworth born, 1810.
SATURDAY, 24.—Queen Victoria born, 1819.

### TIMES OF HIGH WATER AT LONDON-BRIDGE,
FOR THE WEEK ENDING MAY 24, 1856.

## THE ILLUSTRATED LONDON NEWS.

*LONDON, SATURDAY, MAY 17, 1856.*

We do not know whether the Government have any serious intention of ordering a General Illumination on the 29th inst., in celebration of the peace. We trust not, however; and that an illumination by the clubs, the Government offices, the public buildings, and the private tradesman of the Court, will be all that will be ordered or attempted on an occasion which, were it not for the celebration of her Majesty's birthday on the same evening, would by large sections of the people be considered inauspicious. To celebrate a peace that has already wounded the *amour propre* of the Emperor of Russia; that threatens, by its non-recognition of the Italian question, and by its insult to Belgium, to lead to new complications and difficulties in unexpected quarters, is to be joyful without judgment; and to laugh when to be serious might be more prudent or becoming. But if we are to have an illumination, we hope the Government, which orders these matters, will not issue any command or recommendation for the illumination of private houses. In such an immense city as London, and its suburbs, with two millions and a half of people, there must of necessity be a certain per centage of sick and dying persons. Will their chambers, if unilluminated, be free from the annoyance of blackguards and the window-smashers? We fear not. No respectable person in the metropolis cares for an illumination, with the single exception of the shareholders in gas companies and those who expect to make money by the sale of gas-fittings, or of oil, and candles, or the glaziers, who may or may not be innocent of any organisation for the breakage of the glass by which they thrive. We cannot even imagine what effect it is expected to produce by the illumination of the by-streets of London—by-streets of which we should suppose the inhabitants will be in the Parks to behold the greater splendour of the fireworks. If there is to be an illumination on a grand scale, why not illuminate the dome of St. Paul's? That would be a magnificent spectacle. Or, if other illuminations are required, there are the Monument, the Duke of York's Column, the Nelson Column, and—better than all—the Bridges. A tasteful and profuse illumination of the roadway and arches of London, Blackfriars, Southwark, Waterloo, Hungerford, and Westminster bridges would afford a *coup d'œil* of unexampled splendour; and be far better, and more consonant with the feelings of vast masses of the people, than any illumination of retired districts or back slums; and would have the additional advantage of providing no opportunity for mere ruffians and window-breakers. We throw out these hints for the consideration of the persons, whomsoever they may be, who have the ordering of these matters; but, whether they be attended to or not, we most earnestly deprecate the wanton and mischievous, as well as purposeless, idea of a compulsory illumination of private houses.

On Tuesday some gentlemen of the moneyed interest met the Chancellor of the Exchequer at the Treasury by invitation, when the right hon. gentleman gave them some additional information connected with the new loan of £5,000,000 for which they are asked to contract on Monday next. One thing he communicated gives a faint satisfaction. The Chancellor believes that this loan, with the continuance of the war taxes, which are fixed on us until April, 1858 (and he gives a significant hint that he is to rely next year on the Income-tax), will suffice to wind up the expenses of the war. He has no intention, at least, of funding any more, but he may require £2,000,000 in the last quarter of the present or the first quarter of the next year, to be raised by Exchequer Bills or Bonds, as the market may be, to square his accounts. The right hon. gentleman, when he has contracted his loan, will have added £29,000,000 to the funded debt; and he and his predecessor between them will have increased the unfunded debt—that is, Exchequer Bonds and Bills—about £15,000,000; making together about £44,000,000 increase of debt. The produce of the war taxes for the period they are likely to continue is estimated at £26,000,000; so that our two campaigns—the first, in 1854, having only been half a campaign—will have cost us, in addition to all the ordinary expenses of the Government, at least £35,000,000 each. It must be admitted that our Government, if efficient for no other purpose, is great at disbursing our money. If for such a vast expenditure we had anything to show beyond a few gun-boats, which may be as useless in our next contest as the great ships were in this—and beyond the Balaclava Railway, which we presume is to be left for the service of the Russians—the public might not be displeased at the cost; but, under present circumstances, it can only add to the conviction that the Government rather wastes than applies the power of the nation.

In February the Chancellor contracted a loan for £3,000,000, and it was then said, "Why not at once contract for all that you will want in the year?" The answer was, "We are uncertain whether we shall have peace or not, and uncertain, therefore, as to the amount we shall require." The conduct of the Government was reasonable. When the £3,000,000 was contracted, Consols were at 91¼, and the price given was £90 for every £100 of Consols; now Consols, partly in consequence of the peace, are at 93½. But a part of this rise is also due to the dividend which has been accumulating for eighty-four days—from Feb. 23rd to May 18th—and which may in round numbers be estimated at 15s., or equivalent to a rise in Consols of ¾ per cent. As the dividend is to be paid on the New Stock from the beginning of the year, the present biddings should bear about the same relation to the price of Consols now as the biddings in February bore to the price of Consols then. We must deduct the ¾ per cent for the advanced period and, may then conjecture that the Government will probably receive £92 for every £100. By waiting three months, therefore, the public will save about £2 per cent on £5,000,000. For so much providence we must give the Ministers credit, while on the whole we condemn their expenditure as enormous in proportion to their achievements.

Another circumstance deserving commendation is an alteration in their mode of proceeding. In February a mysterious kind of announcement was sent to the Bank, on a Friday—and by some individuals turned to advantage before it was made public—that the Government was in want of a loan, and would see parties on Monday to explain the particulars. The amount was conjectured to be large, and Consols suddenly fell 2 per cent, to rise 1½ after the sum to be borrowed was actually known, causing disturbance, loss, and vexation. On the present occasion there has been no mystery nor reserve. The Chancellor announced at once that he means to borrow £5,000,000 in Consols; that for every £100 in money he will give an annuity of 3 per cent, the interest to commence January 1, 1856; the biddings to be made in these annuities; that a deposit is to be paid of £10 per cent on May 22nd, and the subsequent payments are to be made of 20 per cent on June 12th, 20 per cent on June 27th, 20 per cent on July 24th, 10 per cent on August 28th, and 20 per cent (which will complete the loan) on September 18th. Thus, in announcing his loan, he announced at once all its conditions, all moneyed men knew equally well what was required, and the Funds were very little affected by the announcement. He will get, as we have seen, a better price for what he has to sell, and he has made and will make but little disturbance in the Money Market. If official men would always be open and straightforward, if they would only believe that the bulk of mankind possess common sense and common honesty, and may be relied on to take an enlightened view of their own and the public interest, they would find their task easier and would serve the nation better.

The differences between the United States and ourselves upon the recruiting question have long since been reduced to such infinitesimal proportions, that they would probably by this time have sunk into utter oblivion, but for the existence of other sources of discontent which serve to feed them. When people want to quarrel there is no cause too contemptible to quarrel about; and at the present moment the small affair of recruiting is evidently kept alive as an auxiliary to the larger quarrel, touching Central America.

A blue-book of 266 pages has just been issued, containing "Papers relative to Recruiting in the United States." All we can say of this ponderous volume is, that those who have the patience to wade through it will not rise from it with very exalted notions of the wisdom which rules the destinies of nations, either on this or on the other side of the Atlantic. On the one side we observe indications of haste, indecision, and uncertainty, in the midst of a temporary dilemma; on the other, an ungenerous endeavour to fix a quarrel where no sufficient cause had been given.

The simple state of the case between our Government and that of the United States is this. When we were in want of men to supply our losses in the Crimea, it was suggested that, amongst other places, we might go to America for them; and it was resolved to establish recruiting dépôts in the British States in North America. Precautions were at the same time ordered to be taken that nothing should be done to infringe the Neutrality Laws of the American Government.

After some little time doubts began to be entertained whether the instructions of the British Government had been, or could possibly be, so exactly and conscientiously carried out as to avoid all occasion for jealousy or uneasiness on the part of the United States; and the consequence was that, on the 22nd June, the British Government sent out orders to discontinue all further proceedings in the matter of enlistment for the Foreign Legion in any part of America.

On the 6th July Mr. Buchanan, on behalf of the American Government, made complaints that certain things had been done by British agents of a nature to violate the Neutrality Laws of the United States. To this Lord Clarendon (16th July) wrote a reply, stating the whole circumstances of the case so far as the British Government was concerned—a reply which was considered so satisfactory by Mr. Buchanan that, in writing to acknowledge its receipt, that gentleman said "he should feel much satisfaction" in transmitting it to his Government. "So strong," writes Lord Clarendon (April 30, 1856), "appears to have been the impression on the mind of Mr. Buchanan of the satisfactory nature of this communication that, when afterwards he received a despatch from Mr. Marcy, with renewed instructions to address remonstrances to the British Government on the subject of the recruiting proceedings, he abstained from acting upon these instructions, and withheld Mr. Marcy's despatch containing them from the knowledge of her Majesty's Government—obviously because he perceived by its date (the 15th of July) that it was long before the note of the undersigned (Lord Clarendon) of the 16th of July could have been received by Mr. Marcy, and because he concluded that, when that note should have been received, the Government of the United States would be satisfied with its contents."

It was not until the 5th of September that these pleasing anticipations were dispelled, and another letter of complaint, going over the same grounds, was received from Mr. Buchanan; to which, on the 27th, Lord Clarendon sent a reply, "repeating that her Majesty's Government had no reason to believe that any of her Majesty's servants, or agents duly authorised by them, had disregarded the injunction to respect and obey the laws of the United States;" but assuring of their regret if anything open to objection had occurred contrary to their intentions and positive instructions.

On the 1st of November came another despatch from the United States' Government still adhering to the assertion that things had been done by the British Government, or certain parties in its behalf, contrary to the Neutrality Laws of the States; and calling upon it to "take prompt and effective measures to arrest the proceedings, and to discharge from service those persons now in it who were enlisted within the United States, or who left the United States under contracts made there to enter and serve as soldiers in the British army." To this Lord Clarendon, in reply, after reiterating all that he had said before, observed that it would be impossible for the British Government to discharge any persons from its service who had entered it under the circumstances described, because no person had, to the knowledge of the Government, so entered it.

This, although plain and reasonable enough, did not prove satisfactory to the American Government. They insisted—and supported their assertion by reference to the circumstances at the trial of a German emigrant of the name of Hertz (a case supported by very questionable evidence)—that, in spite of all the precautions taken by the British Government in this matter, their instructions had been disregarded by certain British agents in America; they specifically made this charge against Mr. Crampton, her Majesty's Minister at Washington, and against her Majesty's Consuls at Cincinnati, Philadelphia, and New York;—and, to conclude, their first requirements as to discharging soldiers illegally enlisted being impossible, from the fact of there being no such soldiers, they demanded that the functionaries in question should be recalled from their posts by her Majesty's Government. This requirement, even in the absence of assurances from the gentlemen so complained of, of the utter groundlessness of the charges made against them, was of a nature which it would be impossible for the British Government to comply with, except under force of circumstances which happily do not, and we trust never will, exist.

We have to add, in conclusion, that Lord Clarendon, under date 30th April, addressed a very able and temperate statement to the American Government, containing a *resumé* of the whole case, which, we trust, may bring this foolish and undignified quarrel to an end.

In the historical sketch appended to the views of the Falkland Islands in our number of the 19th ult., we regret to find that Mons. Vernet feels aggrieved at the remark made respecting the unwarranted authority which it was stated he held in the Falkland Islands as representative of the State of Buenos Ayres. Nothing could be further from our intention than to make any observation which could hurt Mr. Vernet personally; but, as the sovereignty of Buenos Ayres over the Falkland Islands has never been recognised by any nation, and Great Britain having established *de facto* and *de jure* her rights over those Islands, it cannot be admitted that Buenos Ayres could delegate to any person a warrantable authority in them. We are fully aware of the great losses which occurred to Mons. Vernet by the untoward circumstances of his occupation, and should be glad to see justice done to the claims which we are persuaded he has on the British Government in several respects.

THE LATE GOVERNOR-GENERAL OF INDIA.—The Marquis of Dalhousie landed in England on Tuesday. He arrived at Spithead in the *Tribune* screw-frigate. She saluted the flag of the Commander-in-Chief, which the *Victory* acknowledged. The Commander-in-Chief went out to Spithead in the *Fire Queen* and paid his respects to the noble Lord. The health of his Lordship is reported to have improved of late, although he is still exceedingly weak, requiring to be moved in a cot. At four o'clock in the afternoon the *Tribune* came into harbour; but his Lordship did not land till near six o'clock. He then proceeded with his family to the George Hotel, Portsmouth. Here he will remain for a few days. On leaving the *Tribune* her crew manned yards, and, as the barge in which his Lordship and family were brought to shore passed the *Victory*, that ship fired a salute of nineteen guns. His Lordship was immediately carried to the carriage of the Commander-in-Chief, which was waiting, and drove to the George.

ILLNESS OF LORD PALMERSTON.—We regret to learn that the noble Viscount is labouring under symptoms of indisposition. On Thursday night week, on moving the address of thanks to the army and navy, Lord Palmerston was frequently interrupted by a cough, and on Friday night he was suffering from a severe cold. The Prime Minister remained in his place notwithstanding until the House of Commons went into Committee on the Police Bill, about nine o'clock, when he yielded to the entreaties of his colleagues, and went home. During the whole of the evening the noble Viscount kept his handkerchief to his face, and was evidently suffering from the combined effects of fatigue and indisposition. *Morning Herald.*

HEALTH OF LONDON.—Last week the births of 836 boys and 815 girls—in all 1651 children—were registered in London. In the ten corresponding weeks of the years 1846-55 the average number was 1521. Since the middle of April, when in an improved state of the temperature the deaths in London were reduced to little more than 1000 in a week, the mortality has shown some tendency to increase. Last week the deaths rose to 1154, the effect, probably, of atmospheric change. In the ten weeks corresponding to last week of the years 1846-55 the average number of deaths was 1009, which, if raised proportionately to the increase of population, becomes 1110. Hence it appears that the rate of mortality last week was above the average.

## NOTES OF THE WEEK.

THE Great Oyer of Poisoning, as the present session of the Central Criminal Court has been called, is being held, and William Palmer of Rugeley is upon his trial for murder. The Attorney-General opened the case in an address of four hours, and one in which the advocate's art—that of so sealing his art—was practised with a high degree of perfection. Nothing could be fairer than the speech, nothing more apparently simple than the way in which the chain of circumstances was unfolded. But the skill with which that chain was made to wind itself round the accused and the dramatic effect with which the more terrible portions of the narrative were introduced, were worthy of the advocate's forensic reputation. Before closing, and proceeding to call witnesses, Sir A. Cockburn alluded to the attempt which we intimated, some time ago, would probably be made for the defence, to confuse the minds of the jurors by bringing into conflict the medical evidence, so that an impression might be created that there is no such thing as absolute truth in science. For this attempt the prosecution is prepared. While we write, the witnesses for the Crown are under examination. Serjeant Shee's high oratorical powers will doubtless be exerted to the utmost for Palmer; but the final reply, which will dissipate the effect of mere rhetoric, and restore the case to all its naked horrors, is with the clear-headed, vigilant, adroit, Attorney-General, and it is difficult to imagine how the interests of justice can be better served, or the guilt or innocence of the accused brought into an intenser light. Lord Campbell, one of the Judges presiding, has already taken occasion to commend the fairness with which the examination in chief was being conducted. How long the trial may last it is difficult to say, but, as Sir A. Cockburn justly remarked, it is impossible to waste time in such an investigation. That an inordinate quantity of that class of writing known as penny-a-lining should be put forth in connection with an occasion of so much interest, was to be expected, and the tone of such writing will probably be acceptable to those for whom it is designed; but there is an entire and creditable absence of any attempt to forestal the verdict of the jury.

The sudden announcement by Sir Benjamin Hall that the performances of music in the Parks on Sunday afternoons are to cease has caused a great sensation, and it is by no means impossible that next week we shall have to chronicle a popular demonstration against the step thus taken. Lord Palmerston, whose avowed opinion in the House of Commons that the performances were not only harmless but beneficial, has given way to the remonstrances of the spiritual head of the Church of England, and to those of the parliamentary representatives of the Kirk of Scotland. The Sabbatarian views of one section of Dissenters have also been put forward by Mr. Baines; and the united voice represents to the Premier something which it would be more than disagreeable to face in Parliament. He, therefore, stops the music. Whether the band that performs before her Majesty, when at Windsor, on the Sunday afternoon, and also during her absence, will also be stopped, remains to be seen. It is also to be seen whether the police will take precautions, this year, against the ruffianism which was in no way connected with the people's Sunday grievance last summer, but which availed itself of a just complaint to run riot through the streets, and to destroy the property of those who have nothing to do with the interdiction of the popular recreation. It will be something new to find the police authorities acting with circumspection and promptness, and something surprising just now, when their heads must be bewildered with the anticipation of the 29th of the month.

The late Governor-General of India, Lord Dalhousie, has returned to England, we regret to read, in delicate health. The Court of Directors has met, and decided to confer upon his Lordship the pension of £5000 a year which he has asserted well earned as their servant, though Lord Aldworth's compliment to the ingenuity of the Company in securing "a salaried advocate" in the House of Lords against the time when the Indian question shall come up may have a constitutional significance. Sir J. W. Hogg, the chairman, was ready with his usual flow of indignation at such a hint; but then Sir James's indignation is so very prompt, and his primary argument "that answers every doubt so eloquently well," like the theologian's instant condemnation of an unorthodox questioner.

And, *apropos* of theology, three champions have been fighting a kind of triangular duel in the papers. Mr. Henry Drummond, who seldom misses an opportunity of a fling at the Church of Rome, has taken advantage of the recess to open fire upon poor Mr. Bowyer, who went over to that Church some years ago, and who is consequently, with all converts, a convertite. The question at issue is whether Ecclesiastical authority can supersede Divine law. There is no doubt that Popes have claimed, and casuists defended, their claim to this power; but it would seem not to be the recognised teaching of Rome, in these days. Mr. Bowyer repudiates it, but not in a manly, straightforward way—we may observe, indeed, that the Roman Catholic champions seldom do deal in bold and precise language; and Dr. Cumming comes up with "St. Liguori," and reasserts the original position. The dispute would be as ridiculous as most of such controversies did not something more turn upon it than the abstract teaching of the priesthood. If Pope Pius's right to release persons from oaths and obligations really were matter of belief among the Catholics, the consequences might be graver than any apparently involved in the present dispute, which otherwise might be remitted to the conclave now about to meet and consider why St. Januarius's pomatum liquefied so imperfectly this year.

The Sardinian Legislature has been taking the same course as our own—discussing the peace, and thanking its army. The principal speakers declared Russia to be humbled, and in so far as humiliation to Russia involves weakening of their enemy, Austria, they see reason for satisfaction. The conduct of England is cordially approved, and we are stated to have offered Sardinia the loan of a third million, which, however, she was enabled to dispense with. An interesting fact regarding the Sardinian army was, we think, told, for the first time, in Lord Palmerston's speech on the vote of thanks. He said, that after the battle in which the new allies behaved so gallantly, and in which we took no part, except with a battery of four guns which did much execution, General Codrington, on receiving the acknowledgments of the Sardinian General, presented him with that battery, in memorial of that day. This was a graceful and chivalrous act and we hope that, if Mr. William Williams moves to deduct the price of the metal out of Sir William's pay, the nation will raise the sum by subscription

ROYAL VISIT TO THE TURKISH EMBASSY.—The visit of a Sovereign to the house of an Ambassador is always regarded as an act of eminent distinction—at once a high compliment to the Monarch represented, and a mark of Royal favour and graceful condescension to his representative—the most gratifying that can be paid. When, therefore, we announce that on Tuesday, the 27th inst., her Majesty will honour his Excellency M. Musurus, the Turkish Ambassador at the Court of St. James's, with her presence at a ball to be given at the residence of the Embassy, in Bryanston-square, it will be readily understood that such a visit will be considered not merely in the light of a return for the compliment paid by his Imperial master to the British representative by his most unusual presence at a ball given by Viscount Stratford de Redcliffe, on the banks of the Bosphorus, but also as an almost singular instance of personal good feeling on the part of the British Sovereign towards the Ambassador himself and Madame Musurus.—*Morning Post.*

THE JEWS' FREE SCHOOL.—The annual dinner of the Jews' Free School was held on Monday evening at the London Tavern, where about 140 gentlemen were present, under the presidency of Sir Anthony Rothschild, president of the charity. Among the guests were the Rev. Dr. Adler, Chief Rabbi of the Jews, the Right Hon. the Lord Mayor, Sir Moses Montefiore, Mr. F. H. Goldsmid, Professor Hart, R.A., Professor Walev, M.A., Mr. De Symonds, &c. Donations were announced to the amount of £1000. The report stated that in the pendency of the Free School, which is conducted on the principle of the British and Foreign School, a most excellent and gratuitous education on nearly 1000 children, and which has merited the highest approbation from the Government Inspector.

## THE COURT.

HER Majesty and the Prince Consort, with the members of the Royal family, have availed themselves of the Parliamentary recess to gain a few days' retirement in the Isle of Wight, whither they proceeded on Saturday last.

On the previous day the Queen had been present at the Peace Celebration Fête at Crystal Palace; and on Saturday morning, before leaving London, her Majesty paid a visit to the Duchess of Gloucester, at Gloucester-house.

On Sunday her Majesty, his Royal Highness the Prince Consort, the Prince of Wales, Prince Alfred, the Princess Royal, and Princess Alice, attended Whippingham parish church. The service was performed by the Rev. G. Prothero.

On Monday her Majesty and his Royal Highness the Prince Consort, with the Prince of Wales, Prince Alfred, the Princess Royal, and Princess Alice, went to Portsmouth Dockyard to inspect the 8th Hussars, which regiment had arrived in the course of the day from the East, under the command of Brigadier-General Shewell. Her Majesty was received on landing by Vice-Admiral Sir George Seymour, Major-General Breton, and the naval and military authorities. The troops—consisting of the 8th Lancers, a detachment of the 17th Lancers, and invalids from different regiments—were minutely inspected by her Majesty, who remained in the dockyard till twenty minutes before seven o'clock.

On Tuesday morning his Royal Highness Prince Albert embarked on board the *Fairy*, attended by Captain Du Plat, and visited the forts at Hurst Castle, Sconce Point, and Freshwater. In the afternoon the Queen and the Prince rode out on horseback.

On Wednesday the Queen and the Prince drove out in the vicinity of Osborne.

THE RUSSIAN EMBASSY.—His Excellency the Baron Brunnow left town on Saturday, by the afternoon express on the South-Eastern Railway, *en route* for Frankfort. His Excellency slept at Birmingham's Royal Ship Hotel, and embarked on Sunday morning for Calais. Captain Smithett accompanied the Baron from Dover to the French coast. The appointment of Count Chreptowitsch as Russian Minister to the Court of St. James's is officially announced.

Her Royal Highness the Duchess of Kent went to Frogmore on Tuesday morning, attended by Lady Anna Maria Dawson. Her Royal Highness returned to her residence, Clarence House, St. James's, in the afternoon.

The Countess de Persigny will give a *soirée dansante* at Albert-gate House on the 20th inst., and a ball on the 3rd of June.

The Countess Bernstorff has issued cards for a "reception," at the residence of the Prussian Legation, on Saturday (this day).

The Earl and Countess of Westmoreland entertained at dinner, at their mansion in Cavendish-square, on Tuesday evening, his Highness the Grand Vizier and a distinguished circle of friends.

Viscount Palmerston left town with Viscountess Palmerston, after the Cabinet Council, on Saturday afternoon, for his seat, Broadlands, Hants.

## METROPOLITAN NEWS.

### THE BANDS IN THE PARKS.

On Saturday last the Archbishop of Canterbury addressed a letter to Lord Palmerston, pointing out the violation of the feelings of the people caused by the playing of the bands in the parks on Sunday, and the evil effects which (in the opinion of the Primate) had been produced in the minds of the people, and imploring him to reconsider his decision. Lord Palmerston has replied to this appeal, that his only intention in permitting the bands to play in the parks on Sundays was to give the people an innocent and healthy recreation between the hours of Divine service, and in the hope of keeping the working men out of the alehouses; but that as he found his plan had been received with so great repugnance; that as there was, at all events, so much difference of opinion, and that as even the working people themselves appeared to be indifferent on the subject, although he retained his own views and opinions, yet, in deference to public opinion and to the religious feelings of the community, he would order that the playing of the bands on Sunday should be discontinued.

The following letter has been addressed to Lieut.-Colonel Dickson by Sir B. Hall:—

9, Great Stanhope-street, May 12.

Dear Sir,—It is with much regret that I am under the necessity of informing you that I have received instructions not to allow the bands to play any more in the parks or gardens on Sunday afternoon. I beg again to thank you for your consideration in offering the band of your regiment for the gratification of the working classes of Spitalfields and Bethnal-green, and the classes in the latter neighbourhood of Victoria-park. I was very glad to meet you in Victoria-park on Sunday last, as you were thus a witness as well as myself to the excellent conduct of the 85,191 persons there assembled, and who so thoroughly enjoyed the music you were so good as to provide for them.—I am, dear sir, yours faithfully, BENJAMIN HALL.

THE PROTESTANT ALLIANCE.—The annual general meeting of the members of this body was held at Freemasons'-hall on Monday morning, the Earl of Shaftesbury in the chair. The report, which was read by the secretary, stated that the operations of the society during the past year had been varied and important. Several additional branches had been established in the provinces, but many of those already organised were far from exhibiting the activity which was required in the present day. It alluded to the various measures passed during the present and last Session bearing upon Romanism; to the Bible-burning cases at Kingstown; to the case of Achetti, imprisoned in Turkey; and to various other cases. The receipts for the year had amounted to £1088 14s., and the expenditure to within £17 of that sum. The meeting was addressed on the subjects of Maynooth, nunneries, and Italy, by the Rev. Dr. Cumming, Mr. O'Malley, Q.C., the Rev. W. K. Freemantle, Mr. G. H. Davis, and the Rev. C. Prest.

RAGGED SCHOOL UNION.—The twelfth annual meeting of this society was held on Monday evening, at Exeter-hall, under the presidency of the Earl of Shaftesbury. Notwithstanding the inclemency of the weather the hall was densely crowded. The noble chairman, having commended the objects of the society to the meeting and the public, called upon the secretary to read the annual report, which stated that additional schools had been opened in various localities, and the total number in operation was—128 Sunday-schools, with 17,227 scholars; 98 day-schools, with 14,043 scholars; 117 evening schools, with 8,000 ditto. The voluntary teachers, who last year numbered 1868, now numbered 2118; and the paid teachers 327. The amount which the schools raised, independently of grants from the Union, exceeded £20,000 a year, which, however, fell considerably short of their expenditure. The number of industrial classes in operation was 83, with an average attendance of 2000 persons. Of the shoeblacks there were now three brigades in London, numbering in all 108, who had earned in twelve months £2270, of which £1785 had been paid to the boys, £437 had been placed in the bank on their behalf, and £316 paid to the society. The number of boots and shoes cleaned was 843,783. The scholars placed in situations exceeded in number any former year; 15 boys had been sent abroad during the year. The finances had, owing to the war and other drawbacks, been in arrear, and were required to meet the expenses, and the committee had consequently drawn £1600 from the deposit fund. The report was unanimously adopted, and several gentlemen delivered addresses in advocacy of the objects of the society.

LIBERTY ALL OVER THE WORLD.—A "Congress of Reformers of All Nations" was held on Wednesday morning in St. Martin's Hall. The attendance was limited. Robert Owen, Esq., presided, and addressed the meeting at some length, enforcing his peculiar views with singular earnestness. A series of resolutions were unanimously passed by the meeting, and petitions were voted to both Houses of Parliament, with a memorial to her Majesty.

OPEN-AIR PREACHING.—The North London Evangelisation Society is holding open-air services in spots contiguous to most of the leading thoroughfares in this district of the metropolis. The Rev. W. H. Elliott is assisted by many of the clergy and laymen in this effort to reach the masses, and for several Sundays large audiences have been gathered, especially in the afternoon.

THE LATE ATTEMPTED ASSASSINATION IN RUPERT-STREET, HAYMARKET.—Two of the injured men, Rossi and Kudeo, have completely recovered from their wounds, and have left the hospital. The other two are likely to leave in the course of a few days. Up to the present time nothing has been heard of the assassin Foschini.

WILLS.—The will of the Hon. and Right Rev. Hugh Percy, Lord Bishop of Carlisle, was proved in London under £90,000 personalty within the province of Canterbury.—The Rev. W. Webb, D.D., late Master of Clare-hall, Cambridge, and Vicar of Lollington, £12,000.—Joseph Ferard, Esq., of Lissadell-house, £30,000.—Thomas Rae, of Napier-house, Cheltenham, £25,000.—Joseph Clark, of Old Stromford, £25,000.—Anthony Dawson, Esq., East Bonshouse, Devon, £14,000.—W. Batty, wholesale stationer, Aldersgate-street, £10,000.—James Maxton, M.D., of Cruff, N.B., £2000 within the province of Canterbury.—W. Stevenson, farmer, Croxton, £10,000.—We are authorised to state that the will of the late Lord Boston has been sworn under £70,000 personalty, and not under £30,000, as stated in our Journal of last week.

CHARITABLE BEQUESTS.—Mary Ann Chitty, of Norfolk, has bequeathed £100 to the Norwich District Visiting Society; and to the Norfolk and Norwich Hospital, Norwich Dispensary, Indigent Blind, Norwich Lying-in Charity, Provident Coal Society, Norfolk Clergymen's Widows Charity, Society for Promoting Christianity among the Jews, Propagation of the Gospel in Foreign Parts, Church Missionary Society—to each £50.

## NATIONAL SPORTS.

ROOK-SHOOTING is at present holding its brief ascendancy over the sportsman's heart and hand, before he sets out on his journey to London for the Derby, and the fireworks, which will, by-the-by, form an agreeable interlude between the two great Epsom days; and, from all we can hear, the young rooks are fine and plentiful, and very early. The owners of rookeries have found out that the only way to have plenty is not to spare powder and shot over them. No birds understand the theory of colonisation better; if they are only well thinned every May, they will never desert their chosen grove; but if they find themselves becoming too crowded, they will desert *en masse*. Not long since a very large rookery was strictly preserved for two years, and in the third year it would hardly carry three guns. Will Goodall's Cup, which we described about a fortnight since, was found to contain £360 when it was presented to him; and, knowing well that his friends "liked a sharp forty minutes," he did not give them a long speech, but it was one well worthy of him, and as good as Will Long's celebrated one, which is saying a great deal. Two thousand foxes have yielded up their breath and brushes to him and his hounds during the last nineteen years, of which 112 were killed last season; the best run of which he considered to be the one hour-and-five-minute one from Hogtree Wood.

Shrewsbury has once more been the scene of races, but its programme possessed little interest, beyond introducing us to Peeping Tom as the winner of the principal two-year-old stakes. Lord Wilton's star was also in the ascendant at Manchester with Fumicestone, and Blink Bonny, who will never stay a distance, won her maiden race at last after two very good efforts at Chester and York. Mr. Stirling Crawfurd's colours, which are no longer "all white," but "French grey, with orange garter," were unfurled here for the first time this year; but Church Langton had to strike them in his race, and West Langton finished a dead heat with Aleppo, which cannot be a Derby form. That very deserving and clever jockey, George Oates, was "up," and Mr. Crawfurd has now, by arrangement, the first call of his services.

Rifleman's Chester break-down has robbed the Ascot Cup of much of its interest, and it is rather remarkable that, the day after he broke down at Chester, Saraband, who beat him for the St. Leger, had his stable broken into, and was found wandering about the Chester streets late in the evening, without any body to own him! However, Mr. Parr's horses will stand anything, and he won a race cleverly next day, instead of taking cold; and will, no doubt, run very well in the Ascot Cup against Fandango, who is matched with Homily at even weights, over the Beacon, for the Challenge Cup and £200 a side in the First October.

Fly-by-Night's position is pretty steady, and not a few suspect that his lameness was a little exaggerated to reconcile the public to Faraletta taking his place in the 2000 Guineas, and that John Scott will still stand on him for the Derby. The friends of Cannobie are also pretty "fond," but though the Great Metropolitan was really sad truly "won in a canter" the field was never more miserable, and the jockeys who rode in the race with him at Newmarket maintain that he stopped the moment he was collared by Saraband. If Vandermeulls had been in a fashionable stable the remembrance of his magnificent last year, when he was anything but fit, would have brought him to 10 to 1 without anything else to help; but as it is, his owner cannot hedge at the price, and must bide his time till his horse is seen in the paddock. Ellington's chance must be quite out, as he has not grown, but never can run to hoof," a point on which he is really enormous. Birdin-Hand took ample revenge upon him in the Dee Stakes for his Champagne defeat, and if the weather continues damp we shall see this very nice-looking brown Birdcatcher play a creditable part at Epsom yet, in Tom Tennant's hands.

The Blackmoor Vale hounds have been sold by private contract, and the summer sales are coming forward at Tattersall's. On Monday five brood mares and eight Willesden yearlings, two of them by Longbow, will be sold; and on Thursday forty-eight hunters belonging to Lord Stopeltown, who will not just yet be successful in the mastership of the Pytcheley by Lord Althorp, although strong ultimate hopes are held out of such a consummation. The six Althorp yearlings are on the list for May 26th; that of the Marefield for June 2nd; thirteen of the Middle Park for June 5th; and the seventeen "Royals" for June 16th. Bath holds its meeting on Tuesday and Wednesday; and while the Somersetshire Stakes has a wretched scompiance, the two-year-olds will muster strong. Fly-by-Night and Coroner (each with 8 lb. allowed), Rogerthorpe, and Stork, are all in the Biennial Stakes, although the chances of two, if not of three, of them soming to the post seem somewhat scanty. Lothians and Edinburgh meeting is fixed for the same two days; Aldershott and North Hants for the 28th and 29th; and Harpenden for Friday.

The cricketing and boating worlds are also up and doing for the summer. The All England eleven meet twenty-two at Durham on Monday, and the United All England play fifteen of the University on the Magdalen ground, Oxford. Tuesday will witness the opening trip of the London Model Yacht Club, from Blackwall, at three p.m.; on Wednesday the Kanelagh Yacht Club have a sailing match, and Thursday is fixed for Kelly and Staikimeyer's sculling match, from Putney to Mortlake, for £100 a side; while on Saturday Queen's Printers row a pair-oared race, from Putney to Chiswick Eyot.

### SHREWSBURY SPRING RACES.—TUESDAY.

Herbert Stakes.—Philip, 1. General Picton, 2.
Selopian Stakes.—Illuminater, 1. St. Dunstan, 2.
Longmar Hall Stakes.—Peeping Tom, 1. Dexterity, 2.
Stanley Handicap.—Coris, 1. Whalebone, 2.
Great Cleveland Handicap.—Quince, 1. Mayboy, 2.
County Members' Plate. Westminster, 1. Athenstone, 2.
Queen's Plate.—Saucebox, 1. Ugly Mug, 2.
Selop Cup.—Surgeon-General, 1. Philip, 2.

### WEDNESDAY

Shropshire Sweepstakes.—Agra, 1. Athenstone, 2.
Biennial Stakes.—The Kersen Chief, 1. Sorceress, 2.
Corporation Handicap.—Wrederiek, 1. Roving Betsy, 2.
Hawkstone Cup.—The Cropper, 1. Lawn, 2.
Acton Round Stakes.—Queen, 1. Chess, 2.
Attringham Stakes.—Eardrop, 1.

### MANCHESTER.—WEDNESDAY.

Sapling Stakes.—Blink Bonny, 1. Double Gloster, 2.
Union Cup.—Pannieceling, 1. The Knight, 2.
Trafford Handicap.—Courtenay, 1. Rougeois, 2.
Produce Stakes.—Aleppo and West Langton ran a dead heat.
West Langton walked over and divided stakes with Aleppo.
Maiden Plate.—Pembedw, 1. Mariet, 2.

### THURSDAY

Corporation Stakes.—Fisherman, 1. Hospitality, 2.
Chesterfield Handicap.—Gay, 1. Courtenay, 2.
Manchester Cup.—Pretty Boy, 1. Yorkshire Grey, 2.
Two Year Old Stakes.—Lambourn, 1. Sanzisser, 2.
Queen's Guineas.—Heir of Lyrne, 1. Sassebox, 2.

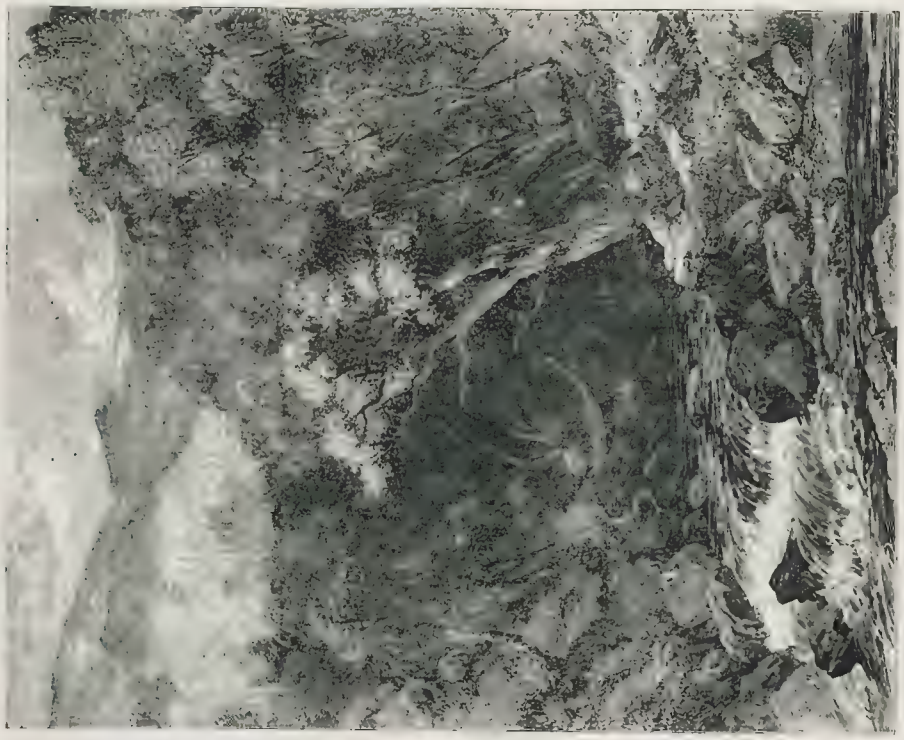
### FRIDAY.

Wilton Stakes.—Magniffer, 1. Mountain Daisy, 2.
Salford Borough Cup.—Pretty Boy, 1. Trumpeter, 2.
Derby Handicap.—Miss Julia f., 1. Lance, 2.
Stand Plate. Prince Plausible, 1.

### TATTERSALL'S.—THURSDAY

DERBY. 5 to 2 agst Wentworth (offered); 11 to 2 agst Cannobie (offered); 8 to 1 agst Faraletta (taken); 12 to 1 agst Fly-by-Night (taken and offered), 100 to 8 agst Rogerthorpe (taken); 30 to 1 agst Mr. Vernon's Birdcatcher colt (taken); 30 to 1 agst Bird-in-Hand (taken); 30 to 1 agst Vandermeulin (offered); 40 to 1 agst Iago.

ROYAL THAMES YACHT CLUB.—This club's regatta for the present season took place on Wednesday over the usual course—from Erith to the Nore Light and back. The very unfavourable state of the weather in the earlier part of the day deterred many from mustering at the appointed rendezvous; but those in whom the love of aquatic sport was stronger than the fear of a wetting were amply rewarded by the sight of one of the most closely-contested and exciting matches ever witnessed. The yachts to contend at the match were divided into two classes, those under and those exceeding 100 tons. For the first class a prize of the value of 100 sovereigns, in the shape of a most chaste and beautiful silver vase, was to be sailed for; while to the second class was given a prize worth seventy sovereigns. The following four vessels took their stations near the flag-boat at Erith:—*The Amazon* (well known as the winner of five prizes last year), the *Extravaganza*, the *Secret*, and the *Thought*. The start took place at seventeen minutes to twelve. The error of the one of displayed considerable alacrity, enabling her to get away first, followed by the *Amazon*, next the *Extravaganza*, the *Thought* being some distance in the rear. The order they started in was soon altered for at least five miles, when the *Amazon* became the leading boat—a position she did not lose for an instant during the remainder of the race. In the course of the next half-hour the *Thought* fell more astern, the *Amazon* increased her lead, and a sharp struggle took place between the *Extravaganza* and the *Secret* for the second place, which terminated, off Gravesend, in favour of the former. From this point the race continued without any material change of relative position till the vessels arrived at the Nore Light, which they rounded in the following order:—*Amazon*, *Extravaganza*, *Secret*, *Thought*. At the end of the race a most interesting struggle ensued. The yachts passed the flag-boat at Erith as follows:—*Amazon*, 5h. 48m. 7s.; *Thought*, 5h. 49m. 40s.; *Secret*, 5h. 54m 20s.: *Extravaganza*, 5h 56m. 0s



"RATHS IN CLAY TILT."—PAINTED BY W. BENNETT.—FROM THE EXHIBITION OF THE NEW SOCIETY OF PAINTERS IN WATER COLOURS.
(SEE PAGE 539.)

"GERFALCONS STRIKING A KITE."—PAINTED BY J. WOLF.—FROM THE EXHIBITION OF THE ROYAL ACADEMY.
(SEE PAGE 530.)

THE OPENING OF THE EXHIBITION OF THE ROYAL ACADEMY.—FROM A SKETCH BY OUR ARTIST.

"RAVINE IN GLEN TILT."—PAINTED BY W. BENNETT.

SOMBRE in tone, almost melancholy in its solitariness, this scene in Glen Tilt has yet the charm of grandeur, which the mountain crag, the wild forest, and the gushing stream suggest. Mr. Bennett in his fine water-colour portraiture of this wild and picturesque retreat betrays a feeling worthy of the spot, and has elaborated the various details with a discriminating brush.

"GERFALCONS STRIKING A KITE."
PAINTED BY J. WOLF.

THIS is an extremely spirited production, which will justly add to the reputation of the talented artist. The character of the various birds is well preserved—their eyes full of fire, and their plumage executed with a mastery of detail rarely surpassed. Exhibited at the Royal Academy.

"MARKET DAY."—PAINTED BY G. B. O'NEIL.

IN this production Mr. O'Neil—who has frequently commanded our admiration by efforts marked with genius, invention, and feeling—takes a higher flight and a wider range than any he has previously attempted. The picture, however, is to be seen at the Royal Academy Exhibition, where it will speak for itself. The "humours of a Country Fair" have been frequently sung and painted; they are here combined with those of the ordinary market-day; and, though diverse enough, the materials are harmoniously associated. The market-cart, and the old vegetable woman in the front, are truly rustic in character; and between them stands the bustle in all the splendour of office. In the background are a travelling booth, and the advertising-van of the Hippodrome in "full play." The village architecture, and costumes generally, are very pleasingly treated, and a genial air floats across the whole.

## NATIONAL PICTURE JOBBING.

AMONGST the minor Government Bills silently passing through the Parliamentary forms of legislation is one of too much importance to the world of art, and our character as an intellectual nation, to be passed over by the Press without a word of remark:—we allude to the Bill "to Extend the Powers of the Trustees and Directors of the National Gallery, and to Authorise the Sale of Works of Art belonging to the Public." The preamble of this bill declares that "Whereas it is expedient that power should be given to dispose of such pictures and other works of art under the care and ordering of the said Trustees and Directors as *they may adjudge to be unfit or not required for a National Collection*;" and the enacting part provides that

The Trustees and Director of the National Gallery, or any three or more of them, of whom the Director shall be one, present at any meeting specially assembled for that purpose, may, from time to time, with consent of the Commissioners of her Majesty's Treasury, order that any of the pictures and works of art for the time being under the care of the said Trustees and Director, which they may adjudge to be unfit for, or not required as part of, the national collection, to be sold.

There is a proviso that the sale shall be by auction, and the moneys accounted for to Parliament; and a further proviso that "such power of sale shall not extend to such pictures or other works of art as shall have been bequeathed or given for the benefit of the nation."

In fact, it is proposed to establish a Commission of "General Gaol Delivery" for our National Gallery, the judges being the Director and Trustees, "or any three of them, whereof the Director shall be one." The same authorities, therefore, will order pictures to be sold as "unfit, or not required," who had previously purchased, and the result cannot but be embarrassing; for should the "Trustees and Director," irritated by unfriendly criticism upon their purchases, or their labours of "restoration," resolve to sell as "unfit" or "misfit," and obtain a larger price than they had themselves given, here would be *prima facie* evidence in favour of retaining it; on the other hand, should there be a great falling off in value realised, the public discontent would be justified though at the public expense, and the incompetency of our public arbiters of taste fatally impugned. Then, again, if a purchased daub is to be driven from sight, no matter at what sacrifice, why should a gift or bequeathed picture retain its position on the walls of the National Collection?

In brief, we object to this national picture-dealing scheme, as unworthy of the nation and unworthy of art. In art all is precious; even faults have their value as examples; and the blundering purchases of "the Trustees and Directors for the time being" may serve as a useful lesson to their successors. In any case, the amount to be dealt with, if it were all saving, is too inconsiderable to be worthy consideration in a national point of view. It should be added that there is a fashion in art, as to schools, &c., which is always influencing the predilections of the ignorant and the prices of the market; and that, under the influence of this tyrannical arbiter, our National Gallery Trustees might find themselves always buying in a dear, and selling in a cheap, market. All things considered, we hope that a measure so uncalled for, and so open to misconstruction and misuse, may not be passed into a law, to make us in our art-speculations a byword amongst nations.

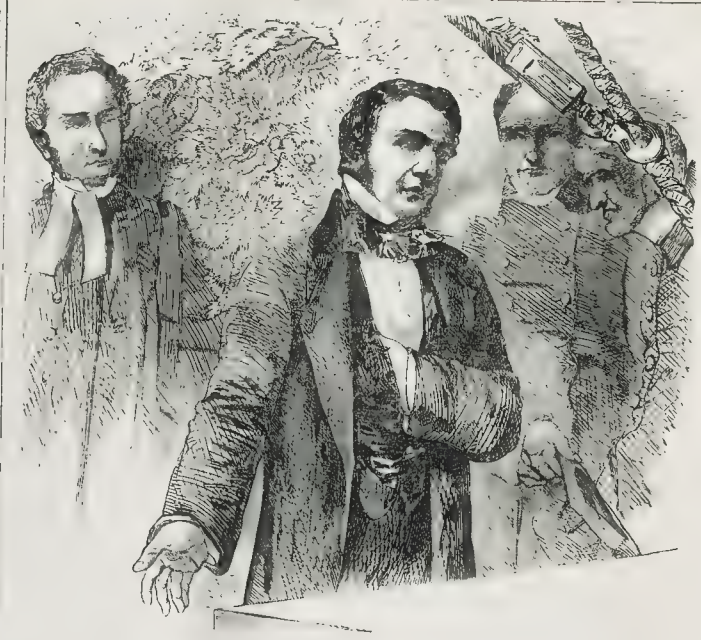
FORGERY OF BANK-NOTES.—Mr. Henry Bradbury delivered a lecture on Friday se'nnight, at the Royal Institution, Albemarle-street upon the "Manufacture of Bank-notes, in connection with the subject of Forgery." The audience was numerous and distinguished; the Duke of Northumberland presiding. One of the principal reasons which had led Mr. Bradbury to devote his attention to the subject was the fact that forgery was on the increase, that difference of opinion existed as to the soundest method to be employed for preventing it, that facilities were growing up to assist forgery, and that, further, there was a tendency to employ that method which in reality was most exposed to the operations of the forger. The main feature of the note—the engraving—and its security depended upon the vignette. The higher the quality of the artistic impress of the vignette, therefore, the greater the security of the note. In his opinion that artistic impress might be extended to the whole face of production. The great value of the vignette is that it is the counterfeitable seal of the note. It may be imitated, but its individuality, cannot. The eye of the banking clerk, or the man of business, would soon become familiar with the peculiarities of engraving. This proved in the case of the Plymouth Bank half a century ago: their bills were forged, their notes were not, simply on account of the vignette. When the vignette was added to the bills the forgeries ceased. The Bank of England note has always been characterised by simplicity, but carried to an extreme; its simplicity is too simple, not bearing upon the face of it those features which characterise the true art-point. The vignette is alike deficient in conception and execution. Surface printing having been chosen as the medium, the Bank authorities were restricted in the application of their art. In consequence of this the Bank of England note in its present form is unworthy of the Bank and nation. The great aim of the Bank has been to secure simple identity and ready recognition through the excellence of the paper, known by its peculiar colour, by its thinness and transparency, as well as by its feel crisp and tough, patent to the sense of touch alone. The basis of its security to the public rests on the bills the forgeries ceased

money. On the other hand, I think it improbable that Cook, who had nothing to look to but the money he had won at Shrewsbury and the money he had to take for the stakes, would give it all to the prisoner. The case, then, stands thus:—You have a man overwhelmed with debt, who has resorted to the desperate expedient of forging acceptances, who hoped to meet those acceptances by a policy of insurance, but is disappointed—who is told by his agent who has discounted his bills that he must rifle with him no longer —that writs are issued, and that he will only obtain from serving them a few days longer; but that if money is sent he will hold them over. The man had ruin staring him in the face; and not only pecuniary ruin, but also the penalties attached to forgery. It will be for you to say whether the prospect of getting the £1000 received after Cooke's death would have been a sufficient inducement for him to commit this offence But he seems to have had another and the additional object. No sooner was the breath out of Cook's body than he says Cook owed him £4000. His friend Cheshire to attest the document, but Cheshire refused. Cook had a valuable mare, Polestar; and the prisoner said he intended to have it. There was the assignment in Pratt's hands of Polestar; and if he could have got that the money to pay that of he might have obtained the horse, which at that time was worth £1500. The fact of Cook being mixed up with the proposal to insure the life of Bates would lead one to suppose that the mind in the prisoner's mind at the time

ear, and love of God (Cheers). He believed those who, with him, adhered to the principle that it was wise to draw payment from the labouring classes, so called, for the education of their children, were yet prepared to go along with the founders of this school when they were dealing with a class who were not called the labouring class—by whom he meant, independent of their vocation, persons who had fixed abodes—but with a floating sea of human life, in which were tossed

THE TESTIMONIAL PRESENTED TO DR. HASSALL, ON THURSDAY.
(SEE PRECEDING PAGE.)

up and down a large mass of less-fortunate beings, not inaptly termed "the Arabs of modern civilisation" great masses of energy and animal and mental life, but untamed and unreclaimed; and he did not for a moment question the wisdom of the principle with which they threw



THE RIGHT HON. W. E. GLADSTONE LAYING THE FOUNDATION-STONE OF THE SCHOOL IN GOLDEN-LANE.

open the doors of their school to that class of the population, and bade them come and receive freely the knowledge which they offered them (Cheers). Mr. Rogers had in a jocular way observed that among other inducements to his undertaking this work was the belief that he was to some extent laying the foundation of Christian eloquence in London, seeing that, dealing as he would do chiefly with the children of costermongers, he might go far to put an end to that coarse clamour which in this metropolis distracted the minds of those who had sermons to prepare, and prevented them producing efforts worthy of their theme. He (Mr. Gladstone) ventured to go one step beyond that, and say that he knew not why those schools should not lay the foundation of a great deal of other eloquence. He knew not why those ragged boys whom they caught in the street and sought to educate should not themselves, under the hands of skilful workmen, become contributors to that Christian eloquence the extension of which they all desired (Cheers). Mr. Rogers, in a pamphlet he had written, had referred to a day when it might fairly be proposed to connect this school with the hierarchy of schools above it, and had well remarked that "a child of this district would have an opportunity of acquiring a good sound practical education, without being a burden to his parents; and, if found worthy to be draughted off to Dulwich College, in accordance with the will and intentions of Alleyn, the Universities would be open to him; and who knows whether, at some future time, a denizen of this poor, despised, and degraded district of St. Thomas, Charterhouse, might not mount the woolsack or fill the see of Canterbury?" Such things had happened before now, and might occur again. In this free country the paths of preferment were open to all. It might be said that every man had "a clear stage and no favour." Many of those who had filled the see of Canterbury had been enabled to point to the lowliness of their origin. The Church, even in the worst possible times, had been ever ready to befriend the virtuous and the learned. There was no period when it had not been the privilege and the hope of the poor to rise to eminence by meritorious labours in her service. He hoped that it would never be otherwise, and that the path of the priesthood, adorned at that moment by so many conspicuous examples of piety and learning, would ever be the path in which man might gratify his natural tendency to expand his energies and bestow benefits on his fellow-creatures (Cheers).

The Dean of Salisbury moved a vote of thanks to the Lord President of the Committee of Council, for the liberal support which had been given to these schools. He stated that thirty-seven years ago the Marquis of Lansdowne had erected the infant schools which stood at no great distance from that spot.

Mr. Harry Chester returned thanks on the part of the Committee of Council.

The National Anthem was sung by the children of the Goswell-street Schools, who were afterwards regaled with tea and cakes on the ground

RUGELEY, STAFFORDSHIRE.—THE HIGH-STREET AND TOWNHALL.

SCENE FROM THE NEW BALLET OF "LES QUATRE SAISONS," AT HER MAJESTY'S THEATRE.

## REOPENING OF HER MAJESTY'S THEATRE.

Her Majesty's Theatre reopened on Saturday last. The closing of our time-honoured temple of the Lyrical Drama was a memorable event in the annals of Music in England; and equally memorable will be its present reopening. Future musical historians will draw a parallel between the occurrences of the last nine or ten years and those of a period of about equal length in the early part of the last century, when the establishment of a second Opera-house, in opposition to Handel, had the effect of ruining the great master's circumstances, breaking his health, and driving him to the verge of insanity; while his rivals derived no benefit from his defeat, for their theatre also fell to the ground, and Italian opera was for a time extinct in England. It remains to be seen whether the parallel will hold good to the end; for the contest between Her Majesty's Theatre and the Royal Italian Opera still continues, and its result may be different from that which took place a hundred years ago. Then London was quite unable to maintain two great Italian theatres; but such has been the growth of our immense metropolis that it is impossible to set limits to its power of supporting the most gigantic establishments. Both theatres have our wishes for their prosperity; for a vigorous competition is the surest way to produce good management on both sides.

When Her Majesty's Theatre reopened, it was found that, during the years it stood in melancholy desertion and silence, its preservation was by

"LUNA IN HER CAR," FROM "THE WINTER'S TALE," AT THE PRINCESS' THEATRE.—(SEE NEXT PAGE.)

no means neglected by the energetic lessee, who appears to have never lost hope of one day retrieving the fortunes of his house. He vindicated his legal rights against every assailant, and kept the theatre in as complete repair as if it were in daily use. The stories of internal dilapidation, rotten works, colonies of rats, and so forth, so industriously propagated, were found to be mere fabrications. The public, who crowded every part of the house on Saturday evening, the moment the doors were thrown open, saw with admiration and pleasure that there was no change or sign of decay; everything was as fresh, brilliant, and beautiful as ever; every object showed that this great fane of the dramatic muse had been constantly and religiously preserved

The "Cenerentola" was the opera selected for this interesting occasion, and a better choice could not have been made; for the piece is as gay and comic as its music is light and beautiful; and, moreover, we had, for its interesting heroine, the charming Alboni. The appearance of this (in many respects) unrivalled performer was eagerly expected, and more than realised the most sanguine anticipations of her admirers. During her absence from England, we have heard much of her continued progress, her Continental triumphs in new branches of her art, her changes both of voice and style, and her assumption of characters which formerly we should never have dreamed of her attempting. But the character in which she now appeared before us was one of her old favourite parts, and she acted and sang it with all the old charm with which she always can clothe it. When the rise of the curtain discovered her, sitting in her chimney corner blowing the kitchen fire, an acclaim of welcome burst from every part of the house. She was unchanged in her aspect—shorter, certainly, than consists with beauty of form—but her comely face and frank open expression were as pleasant as ever. The first sounds of her voice, the deep, thrilling notes of the old nursery ballad, hushed the audience into the deepest silence, followed at the end of the melancholy little ditty, by reiterated peals of applause. Throughout the piece she acted and sang as of old; acting with the most touching simplicity, and singing with exquisite grace and finish. She has of late greatly extended the compass of her voice, so as to be enabled to sustain soprano parts. This we had apprehended could not be done without some sacrifice of her incomparable contralto notes; but in this we were agreeably disappointed. Her low tones were as full and beautiful as ever, while in the higher part of the scale, she has gained additional flexibility and lightness. Her execution is as clear, round, and articulate, as the finest instrument, while it has a charm which no instrument can ever reach

Calzolari, who was a favourite singer at her Majesty's Theatre, seven years ago, when he was a very young man, has more than fulfilled the promise of excellence which he then gave. It is not too much to say that he is now one of the greatest tenors on the Italian stage. His voice is beautiful, and has received the highest cultivation. He belongs to the pure Italian school, a school which we are in some danger of losing, from the growing encroachments of German performers, and their manner of singing on the Italian stage. Calzolari sings Rossini's music as it was sung in Rossini's day—for we must speak of Rossini's day as one that is past, though he himself has survived it. As an actor, too, Calzolari has made progress: his personation of the *Prince* was intelligent, graceful, and manly. It unluckily happened that Belletti, who was to have performed the very lively part of *Dandini*, was unable to appear, and Signor Benevenano undertook it at very short notice. This was hard upon a stranger, whose future fortune would naturally depend a good deal on first impressions. In person, being large and heavy, he was not fitted for the part; but he performed it so well that he gained a very favourable reception. Signor Zucconi, another stranger, was *Don Magnifico*. His voice was deficient in power, but he acted with considerable humour, and sang like a good musician. The little parts of *Clotilda* and *Thisbe* were very nicely performed by two young ladies—Mdlles. Berti and Rizzi, who are evidently very pupils of good taste.

The orchestra, under the direction of Signor Bonetti, did its duty admirably. It is large, complete in every part, composed of good performers, and in a state of excellent discipline. We never heard vocal music better accompanied. The *mise en scène* was rich, tasteful, and worthy of this magnificent theatre.

The opera was followed by a divertissement, called "Les Quatre Saisons" Though not a regular ballet, it is a pretty piece, beautifully got up, and exhibiting the talents of four dancers—Mesdames Rosati, Katrine, Lizereux, and Ballon—who are really a brilliant constellation. M. Vaudris, too, showed himself to be a dancer of great merit.

Madame Alboni will play in the "Somnambula" on Monday, and in the "Favorita" on Thursday. Mdlle. Piccolomini and Marie Taglioni are daily expected.

## PRINCESS'.—"WINTER'S TALE."

WE this week present our readers with our promised Illustration from the classical allegory introduced into Mr. Kean's version of the "Winter's Tale." The jud cious closing of the third act with the trial-scene of *Queen Hermione* necessarily leaves the audience relating to Bithynia into the fourth act. A lapse of sixteen years was then to be supposed without the usual aid of the drop to indicate the interval. Fortunately as we have already recorded, the text of Shakspeare came to the assistance of the stage-conductors. *Time*, *Chorus*, specially entitled, appears in the book for the purpose of rendering some account of the interval. To this idea Mr. Kean wisely determined to give a classical form, and proceeded to invent a clever allegory that might render it more interesting. Accordingly, exchanging the Old Man with his scythe and hour-glass for the ancient *Chronos*, he determined to introduce his venerable figure midway between Night and Dawn, and thus to prepare for his advent by the excellent tableau represented in our Illustration. The chaste Moon and her attendant planets are here personified, and supposed to be sinking before the car of Phœbus, which is about to arise with all its morning glories. The reader is aware that the figures are derived from the study of Flaxman and the antique, and the general effect sufficiently commends itself to the cultivated taste. But some further description may be acceptable:—

Time, the Chronos of the Greeks, was, according to the ancients, measured and bounded by the sun and moon. Phidias placed the rising sun at one end of the eastern pediment of the Parthenon, and the sinking moon at the other. The two Gates of the Arch of Constantine at Rome were decorated with sculptures of the time of Tr jan representing the same subjects also. Eternity was personified on coins holding the moon in one hand and the sun in the other. Thus it will be found that the sun and moon are without accompaniment of time personified. The subject of the present Engraving is the opening tableau, "Luna Descending," introduced in the "Winter's Tale," at the Princess' Tiatre Luna, or rather Selene, according to the Greeks, appears in her chariot sinking into the sea. The stars personified by her in her descent; and the flying winged genius, with a fillet, often appears in ancient representations of this subject as a precursor similar to Aurora before the chariot of the Sun. The Stars are taken from a painted vase in the Musée Blacas, at Paris; other figures composed from bas-relief representations of the Moon visiting Endymion. The chariot of Selene is drawn by white oxen. In the centre beneath a female figure reclines, holding a cornucopia with fruits and flowers, and the share of a plough, symbolising the fertile Earth. This personification is rarely omitted in antique representations of Endymion, Prometheus, or the rape of Proserpine.

## *MUSIC.*

MARIE appeared at the ROYAL ITALIAN OPERA on Tuesday evening, for the first time this season. He performed his favourite part of *Gennaro*, in "Lucrezia Borgia." He was warmly welcomed by the audience, but more than one circumstance contributed to impair the éclat of his reappearance. He himself was evidently indisposed; his voice was affected by hoarseness; and, though he acted and sang with feeling and beauty, yet he did not display his usual fire and energy, and omitted some portion of the music. It appeared, however, that Ronconi, who ought to have appeared in the important character of *Duke of Ferrara*, was also indisposed, and the part was committed to the inferior hands of Zelger. Grisi, on the other hand, exerted herself to the very utmost, and exhibited even more than her usual power; but her almost unassisted efforts were unable to sustain the weight of the piece, which, accordingly, went off flatly, and with little effect. It is not surprising that this ungenial season should act injuriously on the delicate organisation of Italian singers.

AT the DRURY LANE OPERA, on Whit-Monday, there was a very good and successful performance of "Cinderella," which, it may be remembered, is a version of Rossini's "Cenerentola," by Mr. Rophino Lacy, brought out at Covent Garden some five-and-twenty years ago. Great liberties are taken with the original piece; much of the music is cut out, and many things are interpolated from "Guillaume Tell" and other operas; and the fairy machinery of the original nursery tale is introduced. With all these changes, it is a pleasant and amusing piece; and on the present occasion it was exceedingly well got up and performed. Miss Fanny Huddart played the part of *Cinderella* most agreeably, and her fine contralto voice was admirably suited to the music. Mr. Haigh, too, appeared to more than usual advantage in the character of the *Prince*; Mr. Durand was a grotesque and pompous *Don Magnifico*; and Mr. Manvers was an excellent *Dandini*. Altogether the production of this piece does great credit to the management.

THE TWO PHILHARMONIC SOCIETIES, the Old and the New, have had their concerts this week—one on Monday and the other on Wednesday evening at the Hanover-square Rooms. Both concerts were very good and very successful. At the Old concert the feature of peculiar interest was the performance by Mr. Cooper, of Spohr's dramatic concerto—a magnificent display of talent, which was sufficient to place Mr. Cooper at the head of the English violinists. At the New concert Madame Schumann performed a pianoforte concerto by her husband a work of undeniable genius, but in a style so peculiar that it is impossible, on a first hearing, to form a just appreciation of its merits. Howard Glover's cantata, "Tam o' Shanter," originally produced at one of these concerts last year, was now repeated with increased effect. Both these concerts were attended by crowded audiences.

THERE was a splendid performance, at the MUSICAL UNION on Tuesday morning. Quartets of Mozart and Mendelssohn were played by Messrs. Ernst, Cooper, Hill, and Piatti—a body of executants not to be surpassed in Europe. Moreover, Madame Clara Schumann, our musical lioness at present, played Mendelssohn's beautiful trio in C minor, with Ernst and Piatti; and, as a solo, Beethoven's air, with variations in C minor, Op. 36. As might be supposed, she was listened to with enthusiasm by the most crowded and brilliant assemblage of the season.

M. JULLIEN has engaged, for his series of Concerts in the provinces, a band of Zouave trumpeters, just arrived from the Crimea. They are likely to attract much attention, not only by their appearance and the military associations which they will excite, but by the very peculiar character of their music. Though the notes produced from their trumpets are but four, the effect of those notes is such that, on the field of battle, their shrill sounds have often struck terror into the hearts of the most daring enemies. They appeared on Wednesday at Jullien's Concert, in the Bellevue Gardens, at Liverpool, and their singular and striking performance made an immense impression on the audience. They not only played their own battle-calls and other martial pieces, but took part in "Zouave Quadrille," arranged by Jullien expressly for their instruments. There were above ten thousand persons in the gardens during the concert.

BEAUMONT INSTITUTION.—A grand vocal and instrumental concert was given at this institution on Thursday, the 8th inst., in aid of the library. It consisted chiefly of popular and familiar music, and gave great satisfaction. We have, however, one objection to find with it—it was too long; or, in other words, there was "too much of a good thing." The programme included nearly thirty songs, irrespective of encores, and though the concert was a long one, it unusually late hour. Quality rather than quantity is the thing required, but in this instance there were both. Sims Reeves was in fine voice, and sang the recitative and air "All is lost" from the "Sonnambula" magnificently. His B b in alt from the chest was thrown out with great power, and wrought the audience to a high pitch of excitement. The next song with which he favoured the audience was "My love is like a red, red rose," sung in an exquisite falsetto voice, and loudly applauded. He gave for the encore the beautiful little ballad of "Good Morrow," by Charles Mathew and Frank Mori, and sang it charmingly. He afterwards revived several old songs, and among others the "Bay of Biscay," which he delivered in his best dramatic style. Miss Louisa Vinning did full justice to Bishop's song, "Bid me discourse," and was encored, but declined. Her rendering of "Home, sweet home," was very simple and pathetic We never heard it better sung. "Where the bee sucks" was also a delightful performance, and was followed, as an encore, by "Gin a body." Miss Vinning is, in fact, a charming singer. We wish we could say as much for Miss Hallam. Her voice is not improving; though in ballads of a broad description, such as "Minnie" and "Charlie," she produces a certain effect. Mdme Amadei gave the drinking song from "Lucrezia Borgia" with her accustomed power; and Mrs. Sims Reeves sang "Nae luve nae langer" admirably. We must not forget to mention the young violinist, Mr. W. Cattermole, of Her Majesty's Theatre, who played Paganini's variations on the "Carnaval de Venise" in a most praiseworthy manner. Mr. Frank Mori conducted at the pianoforte.

WE learn that the children Brousil, who have already earned so great a reputation on the Continent, will shortly arrive in England to give a series of concerts. This remarkable family consists of six members, three girls and three boys; the most prominent of whom is Mdlle. Bertha, a young lady fourteen years of age, who performs on the violin. So great was the sensation they created in Austria and other parts of Germany that the Princess of Thurn and Taxis took them under her protection, and introduced them to the Court of the Empress Elizabeth of Austria. They afterwards gave a concert at Salzburg before the Empress Dowager, who called Master Aloys—a violin-virtuoso of seven years of age—her "little Mozart." Of their recent performances at Paris the Parisian newspapers speak in glowing terms, and they will doubtless excite in London a large amount of curiosity and patronage

## *THE THEATRES, &c.*

OLYMPIC.—A new piece in four acts, by Mr. Tom Taylor, was produced on Monday, the subject being taken from a French novel. It is entitled "Retribution"—a title already appropriated by more than one drama, but strictly expressive of the theme of the present. In the subject of the play we cannot think Mr. Taylor has shown his usual taste, though it must be confessed that it is worked up with skill, judgment, and effect. An injured husband is determined to take revenge in kind, and, like *Iago*, be "even with" his wrongor, "wife for wife." Assuming the name of *Ernest Fréval*, he visits the home of the seducer, and attempts the honour of his wife by insinuating suspicion and jealousy. He succeeds in bringing the lady to the point of yielding; but, in the moment of almost triumph, abandons his unworthy purpose. The working out of this plot occupies the first three acts, and gives to Mr. Wigan many opportunities for fine and subtle acting. The final act crowds together the results of this sinister state of things. The catastrophe is brought about by the agency of *De Mornac's* younger brother (Mr. Gaston Murray), who, really loving the tempted lady, is desirous of warning her of her danger, and does this on his knees, just as the husband himself, *De Beaupré* (Mr. G. Vining), is entering the chamber. A dual ensues; and the young man is carried dying to *De Mornac's* apartments. The wife also proceeds to the same spot, but conceals herself, and is followed by *De Beaupré*. Another duel here takes place between the two husbands, who fight in their shirt sleeves with foils, when the wronged husband is avenged. *De Mornac* seeks ungenerously to embitter his victim's pangs by impugning his wife's honour, but is falsehood, on her appeal, he ultimately withdraws, and thus the curtain descends on a well-arranged tableau. The scenery and dresses are new and good, and the acting throughout is excellent. Miss Herbert, as *Madame De Beaupré*, showed considerable talent, and much promise. The verdict of the audience on the merits of the play was by no means unanimous.

HAYMARKET.—Mr. Buckstone has provided for Whitsuntide playgoers another real Tom Thumb, in the person of Master Bundy, who is only twenty-seven inches in height and five years of age. For the purpose of introducing him the burlesque of "Tom Thumb" is enacted for an afterpiece, and the text of the part is boldly outspoken by the infant performer. He was well received.

SADLER'S WELLS.—Mr. Charles Dillon has given further proof of his powers in two additional characters—that of *Don Felix*, in "The Wonder," and that of *Don Cæsar de Bazan*, in the melodrama so denominated. In both parts he has succeeded in convincing us that, as an actor, he is "a ripe and good one," and likely to succeed with a refined metropolitan audience. We hear that he is to be the new lessee of the Lyceum Theatre, and will thus have hands for the full illustration of his extraordinary capacity for quiet and natural acting.

ASTLEY'S.—The Whitsun drama at this house is entitled "The Horse of the Cavern; or, the Mounted Brigands of the Abruzzi." It is produced with scenic and equestrian appointments, and is altogether a splendid affair. The marvels of the circle maintain their high character.

DRURY LANE.—MRS. W. J. Florence still continues in the ascendant, and on Monday appeared in another American farce, called "Mischievous Annie." It is merely a vehicle for the introduction of the actress in a number of eccentric parts, in which she imitates admirably a Spanish *danseuse*, a French opera singer, a Yankee boy and girl, a true-blue sailor with a hornpipe, and a Dutch organist. We may thus learn at one sitting the many things Mrs. Florence is capable of doing; and with these various attractions, Mrs. Florence ought to prove the "great bit" which she is described to be by managerial confession.

ADELPHI.—We find that Mr. Carter of this theatre will take his annual benefit on Wednesday, the 21st instant, and hope that he will "command," as he certainly "deserves, success."

THE POLYTECHNIC.—On Saturday several novelties were inaugurated for the forthcoming season, and the institution was attended by a numerous company. Mr. Pepper commenced the business of the evening with a lecture on the late controversy concerning the rotation of the moon on her own axis, which was illustrated by simple but appropriate apparatus. The Tyrolese instrument, called the zither, was then produced by Mademoiselle Mundie, and very satisfactory demonstration made of its peculiar powers; but much more interest was excited by the performance of Herr Zoon on the emmelynka, a small instrument played by the mouth, and in separate pieces, but capable of great variety and volume. After a lecture on a model of Sebastopol, the exhibition concluded with some dissolving views, illustrative of Bunyan's "Pilgrim's Progress," from pictures by Mr. David Scott, a Scotch artist, conceived and painted in a bold imaginative style, and accompanied with a lecture by the Rev. J. B. Brasted, describing the subject of the paintings. This part of the entertainment was very interesting, and received great applause.

THE PANOPTICON.—A grand concert has been added to the usual attractions for the benefit of holiday visitors. Mdmes. Anna Thillon, Miss Poole, Senora Marietta, Mr. Augustus Braham, Mr. Frank Bodda, and the Spanish Minstrels, are among the performers on the occasion.

LOVE'S ENTERTAINMENTS.—A change of piece was introduced on Monday, under the title of "Love's Lucubrations" In this the famous character of *Peter Patchleaf* was each lated with Mr Love's usual humour, and abundant), illustrated with ventriloquial varieties The entertainment is also made to embrace some capital original music, composed by Mr. Van Noorden, and played by Miss Julia Warman The rooms has been additionally decorated, and the costumes of the various assumptions are new, striking, and pleasing.

WOODIN'S ENTERTAINMENT.—Important additi ns have also been made to Mr. Woodin's "Olio of Oddities." Great as was the number of characters and sketches, it has been increased by about thirty additional ones, in order to secure novelty for the new season The great portion of these occurs in the first part, under the title of a "New Local Kaleidoscope Lyric—off by the Irish," and it consists of individuals, male and female, struggling to the front to secure first, second, and third class seats The sets contain about fifteen individuals, and while the number of persons is sketched off in that short space and well-sketched off too, with something to do, something to say, and frequently with a change of costume, is actually wholly. This is sharp work, but it is vigorously executed. *Miss Clara Chattaway*, too, has a few songs, including the last at present in vogue, the Coronet, the Royal Academy, the Mount Rotation, and such topics. *Herr Otto*, of Rosenberg, also, has a new German song New characters appear likewise by "Location Goodall" *Herr Formus as Mario*, and *Miss Wild Flower, as the Lady of the Lake*, come forward in full force—the latter in irresistible *travestie*, and in the complete effloresence of American eccentricity. These novelties will doubtless impart fresh life to Mr Woodin's entertainment

GREAT GLOBE.—Mr. Wyld has provided an interesting novelty for holiday sightseers, consisting of an ethnological collection, illustrative of contemporary history, including many Oriental figures, clothed and armed in Turkish needlework and apparel of the richest manufacture, among which shine out the ladies of the harem. The accessories are also the products of Turkish arts, and will add a little surprise the intelligent spectator by their beauty and completeness

ROYAL ACADEMY OF MUSIC.—The Earl of Westmoreland, the chairman of the Committee of Management of the Academy, having represented to the Queen that the funds of this institution were not at present adequate to carry out its artistic purposes, her Majesty, taking into consideration the great benefit already effected for art in this country by the Academy, although with limited means, has most graciously signified her intention of honouring with her presence a Grand Fancy Dress Ball, which will be given on Friday, the 6th of June, at the Hanover square Rooms. The proceeds will be for the benefit of the Academy. The list of patrons are the names of Prince Albert, the Duke of Cambridge, the Duchess and Princess Mary of Cambridge, the Duchess of Kent, the Duchess of Gloucester; and amongst the ladies patronesses are upwards of seventy distinguished members of the aristocracy. The ball will be unusually brilliant and attractive, the registration being that no gentleman will be admitted except in uniform, Court, or fancy dress, and many quadrilles of picturesque costumes are now being organised. The Grand Fancy Dress Ball bids fair, therefore, to be one of the events of the season, and it is to be hoped that the Academy will be strengthened by a large financial success.

A HORSE FAIR IN THE CRIMEA.—The horse fair held at Mackenzie Farm has proved a most utter failure. The Russians are so sure of being able to provide themselves with horses for next to nothing, that they are in no hurry to bid till the time of departure draws nigh, and the screw is put upon the English. Some hundreds of horses went up yesterday to the fair, and there was a considerable attendence of Russian officers on the ground, but they came to look, and not to buy Their largest offers ranged from £4 to £6. In one instance, however, £40 was given for a fine English mare. Horses and ponies were at a ruinous discount. Some mules and bât animals were sold for 8s. and 10s. a piece. Some had cost, probably, fifty and others a hundred times as much. A drove of three mules was sold for 7s. 6d., and have heard that fourteen mules were sold for £1. Our officers were greatly annoyed at the offers which were made to them. In one instance a gentleman had sent up his horse in charge of his servant, with a note written in French, "The price of his horse is £50." A Russian officer took the card, scratched out the 0, and offered five imperials for the animal. They told us they never paid more than 100 roubles for their best charger, and that those which they treated were English stallions and mares for breeding. What is to be done with the ponies, extra chargers, and bât animals no one knows, unless private speculators do something for the sake of large amounts as would be involved in the undertaking. For the information of Lord Panmure, however, it may be observed that the agent of a very large shipowner says he will undertake to carry horses to England at £20 a head in steamers, and at £18 a head in sailing-vessels. Many of the animals out here in the Land Transport Corps could not be replaced in England under £40 or £50, so that it would be worth the expense to send them home if there is any need for them. *Letter from the Camp, May 1.*

A SECTION of shareholders of the Chartered Bank of India, Australia, and China have memorialised the Board of Trade against the continuance of the undertaking.

## THE ACCIDENT AT THE WEST INDIA DOCKS, LIMEHOUSE

THIS alarming and extraordinary accident—which took place on the night of Tuesday the 6th inst.—still continues to excite the greatest interest, it is only by the presence of mind that some lives have been lost in the catastrophe. From the most authentic sources we have obtained the following particulars of the accident.

For some time past the outer gates of the dock nearest the river have been under repair, and could not be used, so that the whole pressure of the water in the dock was against the inner gate. This, however, was of improved and substantial construction, formed of timber 2½ feet thick, strongly riveted and bolted, and so built and hung as to offer the strongest resistance to the force of water within. In the course of the evening the wind blew very heavily from the N.E., right up the canal towards the Limehouse end, and, as usual, there was numerous craft in the vicinity of the dock in readiness to go out at the flood. About half-past nine the tide in the river was at the last ebb; the lock was almost dry; while on the other side of the closed gates in the lock there was a depth of some nineteen or twenty feet of water. Suddenly, without the least warning, the lock gates, which opened inwards, were forced outwards towards the river, by the pressure of water, with tremendous fury, and a scene of the most alarming and almost indescribable nature ensued. The ponderous heavy gates were literally carried away from their massive bearings by the force of the current, and swept into the river, and then came the numerous lighters and craft, which had been moored near the entrance.

Nothing could be done to bring them up. They came down with the torrent, which was rolling through the lock into the river, and many of them sank with their cargoes. The water swept along the canal with extraordinary velocity. Several of the small foreign grain laden schooners and galliots were carried away from their moorings, and getting foul of each other, lost spars, &c. In about ten minutes the water had run out of the entire length of the canal, upwards of a mile, and the whole of the shipping, barges, and ninety vessels, were aground. The damage, however, considering the fearful character of the accident, is comparatively small. A Dutch galliot laden with grain, and some ten or twelve barges, sunk in the dock, is the principal loss. These, however, do not include the lighters, which went down in the river off the entrance, at Limehouse. A great quantity of wreck was also washed out, but a large portion of it has been recovered by the Thames Police. It may be important to state that the large ships moored in the canal, on the water running out, settled down, and made beds for themselves in the mud, and at present they do not appear to have sustained any injury. Indeed, the larger class of shipping fared better than the smaller.

*AMUSEMENTS, &c.*

HER MAJESTY'S THEATRE.—MDME. ALBONI. On TUESDAY NEXT, MAY 20th, will be performed Bellini's Opera, LA SONNAMBULA, Amina, Mdme. Alboni. Elsa, Mdme Rosa. Teresa, Mdme Gravaglia. Rivino Signor Calzolari. Alessio, Signor Vairo; and Count Rodolfo, Signor Beneventano. To conclude with a Ballet Divertissement. LES QUATRE SAISONS. On THURSDAY, May 22nd, Meyerbeer's Sacrificing Night, in lieu of Saturday, April 26th, will be performed Donizetti's Opera, LA FAVORITA. Leonora, Mdme. Alboni; Inez, Mdme. Berti, Fernando, Signor Solvlani (his first appearance); Alfonso, Signor Beneventano; and Baldassare, Signor Soldi. To conclude with a Ballet Divertissement by Mdlles Bellon, Boschetti, Lisercaux, Katrina, Pierron, Gaby, Rosa, and M. Vaudris. Applications for Scores and Stalls to be made at the Box-Office of the Theatre, Colonnade Haymarket.

ROYAL PRINCESS' THEATRE.—On MONDAY and during the Week will be presented Shakspeare's Play of THE WINTER'S TALE; Leontes, by Mr. C. Kean. Characters by Mrs. C. Kean. Preceded by THE VICTOR VANQUISHED.

THEATRE ROYAL, HAYMARKET.—MONDAY, May 19 and during the Week, the Comedy of the EXIGENCIES. PERSA NENA and the Spanish Dancers in EL GAMBRINO. GRIMSHAW, HASSHAW, and SHADBOLT, and Master BUNDY as Tom Thumb.

ADELPHI THEATRE.—Monday, Tuesday, Thursday, and Friday LIKE AND UNLIKE (Mr. B. Webster Mr. Wright, Madame Celeste); with, first time, a New Farce, called A BOTTLE of SMOKE (Mr. Wright Miss Wyndham and Original Private Affairs. Wednesday—Green Bushes (Miss Madame Celeste), with the new farce. Saturday—Pas De (Wright) and the new farce.

ROYAL PANOPTICON, Leicester-square.—MONDAY CONCERTS. Admission One Shilling.—LAST TWO IN THIS SERIES—On MONDAY EVENING, MAY 19th, Mr. Sidebotham's Oratorio, ELIJAH. Vocalists, Miss Stabbach Mr. Lawler, Mr. Lindsay, Mr. Meacom Smith. Mr. LEE'S, and an Increased and selected Chorus. Chorus Conductor, Mr. Smythson Mr. E. T. Cooper, Pianist; and Mr. Lee, Organist. To commence at Eight o'clock. After the Oratorio, the Luminous and Chromatic Fountain. Admission, 1s.; Reserved Seats, 2s extra.

ROYAL POLYTECHNIC.—Picco's rival, HENRY LEROM, will perform on the Equestrian, or Child's Hob, in Organ, every Tuesday, Thursday, and Saturday Mornings, at 3 20; Evenings, at 8.30. Rapturous encores follow each of his brilliant movements. Also, on the same days and hours, Mr. Pepper's Ghosts with their as the exquisite harmony of the Pyrolean instrument called the Other or Zither. At the Lectures, three distinct sets of Dissolving Views, and the magnificent Model of Sebastopol, as usual. Admission to the whole, 1s.; Children and Schools, Half price.

BY COMMAND. Mr. GORDON CUMMING'S ENTERTAINMENT, as represented on the morning of the 3rd of May, 856, before his Royal Highness the Prince of Wales and his Royal Highness Prince Alfred, will be repeated Every Evening (except Saturday), at Eight. Morning Representation on Saturday, at Three o'clock. £20 Season Excursion Tickets available for the whole route to travel (first-class) by any of the Company's ships, and on the Royal Danish Railway, during the season.

These ships, well equipped, and carrying experienced servants, are commanded by persons well acquainted with the navigation of the Baltic and North Seas. Provisions, wines, &c., of best quality, on board at moderate charges. Forwarding, place of sailing, &c., apply at the Company's Office, 84, King William-street, or to J. S. FREEMAN, 214a, Oxford-street.

W. S. ANDREW, Secretary.

GENERAL DOMESTIC SERVANTS' BENEVOLENT INSTITUTION, 32, Sackville-street, Piccadilly.

The ANNUAL MEETING will be held at the HANOVER-SQUARE ROOMS, on TUESDAY, MAY 20th, at Two o'Clock for the CHAIR.

The Right Hon. Lord ROBERT GROSVENOR, M.P., President, in the Chair.

Cards of Admission may be obtained (free) of the Committee, and at the Office, 32, Sackville-street.

THOMAS DODSWORTH, Secretary

THE CONSERVATIVE LAND SOCIETY.—The WOODBURY-PARK ESTATE, Tunbridge Wells, West Kent, will be Allotted at the Offices, No. 33, Norfolk-street, Strand, next WEDNESDAY, MAY 21st, at Seven o'clock precisely. Plots for the Erection of Residences, Malvern, Maldon, St. Margaret's, Weybridge, Forest-hill, Tottenham, &c. Plans, price 6d., or 7s. per post, will be duly forwarded. Prospectuses gratis. CHARLES LEWIS GRUNDISEN, Secretary

TO CAPITALISTS and Others.—EAST COWES PARK, intervening between her Majesty's Royal Londons [illegible] Mansion and the Town of EAST COWES, is NOW LEASED and further developed under a Deed of Arrangement between the Proprietors

Capital £30,000, to be raised by Subscriptions of not less than £100 each (many of which are already subscribed for), payable by instalments

The Estate comprises 146 acres, has been expensively laid out, and Marine Residences and other Buildings have been erected, including a large Income, and possessing unusual productions and capabilities for greatly increasing it. The Splendid Mansion and Pleasure Grounds of twenty-two and a half acres formed in the centre; three miles of Iron Palisading, and other valuable Estate, and a Frontage to the Solent and Marine Parade proceed through this Private Estate direct to Osborne. The property has been valued by two eminent surveyors at about £200,000, and it is calculated will ultimately realise upwards of £300,000, with [illegible] increasing income. Each subscriber will become a Proprietor to the extent of his subscription, and will be remunerated out of the gross interest, and each subscriber to have the option of taking part of the Estate in Allotment.

[illegible] with [illegible] [illegible] be Sealed at the office of J. Weightman, Esq., [illegible] Parliament-street. Mr. Longmore, [illegible] East Cowes Park, and Mr. Ellis, [illegible] Plots on the Estate [illegible] personally or by letter, to the Secretary of the United Orders Assurance Company, 3, Hall-mall—where Prospectuses, Views, and Plans, may be obtained; the Surveyor's Reports, &c., inspected; Manufactured Portions of the Clay produce seen; and every information ascertained

PURE PALE SHERRY, 30s. per dozen; very fine dry Amontillado flavoured, 36s. to 42s.; fine old Port, 42s. to 48

ELM-TREE BLOWN DOWN IN HYDE-PARK, MAY 7TH, 1856.

## LARGE ELM-TREE BLOWN DOWN IN HYDE-PARK.

THAT sage economist, Evelyn, did not more sincerely lament the thinning of the woods at his own dear Wotton by the storm and the axe, than does the Londoner regret the loss of a fine old tree in the Parks. Of these delightful resorts Hyde-park is the most rural in character. It is for the most part high and dry, and is perhaps the most airy and healthy spot in the metropolis. The north west or Deer park, verging upon Kensington Gardens is truly rural. Many of the trees are very picturesque, and deer are occasionally seen here. The Serpentine has upon its margin some lofty elms; but from other portions of the Park many fine old timber trees have disappeared; and the famous Ring of Charles II's days can be but imperfectly traced. The Ring, from previous to the Restoration till far in the reigns of the Georges the fashionable haunt, was on the north of the present Serpentine and its site is now part of the Ranger's ground. Some of the old trees remain, with a few of the oaks traditionally said to have been planted by Charles II. Near the Ring was the lodge called "Prince Maurice's Head" and in later times the "Cake-house." A slight stream ran before it, and the house, approached by planks, presented a very picturesque appearance. The fall of one of what Evelyn would have called "that living gallery of aged trees," has supplied our Artist with the accompanying Illustration. During the high wind of Wednesday afternoon, the 7th inst., a venerable elm-tree fell a victim to its fury: it was one of the old denizens on the north side of the Serpentine, between the boat-house and the Government magazine, containing stores of ammunition and gunpowder. The circumference of the trunk of the fallen tree is about 18 feet.

SCENE OF THE LATE ACCIDENT AT THE CITY CANAL DOCK-GATES, BLACKWALL POINT.—(SEE PAGE 554.)

OPENING OF THE NEW CHURCH AT THE ROMAN CATHOLIC UNIVERSITY, DUBLIN.—(SEE NEXT PAGE)

## ST. LUKE'S TEMPORARY CHURCH, CAMDEN-ROAD, HOLLOWAY.

A TEMPORARY but substantial church has been erected in the Camden-road, near the City prison, Holloway (under the sanction of the Board of Works), by a committee formed of a few influential parishioners. The design of the building is novel, being in form a rotunda, eighty-four feet diameter and fifty feet high from the floor to underside of bell-turret. The floor rises from the centre, and the interior is fitted with pews to accommodate 1000 persons. The roof is one span, composed of 24 principals, framed and braced together, covered in with boards felted on the outside; and is surmounted by a bell-turret, containing a fine-toned bell, from the foundry of Messrs. Warner and Sons. The church is lighted by eight side windows and a circular skylight surrounding the bell-turret. The organ has been erected by Messrs. Jones and Son, of West Brompton. The church was opened for public worship on Sunday, 4th of May, with three services. The Rev. H. Hampton, M.A., from Liverpool, is the incumbent. The building and ground-plans were constructed by Mr. John Blizard, of Cheltenham, contractor for wooden buildings, and has been erected in the short space of ten weeks. It will be paid for by the pew rents only.

This church has been erected as a precursor to a permanent church to be built on ground adjoining, which has been given by Thos. Poynder, Esq., and contributions have been made to the amount of £1800. Church accommodation is much needed in this part of Islington, and the committee entertain hopes that in a short time the inhabitants and the liberal donors to such objects will respond to their requirements, and enable them to proceed with the building by their donations.

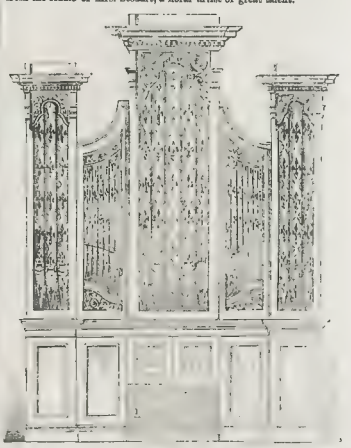
ST. LUKE'S TEMPORARY CHURCH, CAMDEN-ROAD, HOLLOWAY.

## TESTIMONIAL TO MR C. A. SAUNDERS, OF THE GREAT WESTERN RAILWAY.

A VERY gratifying testimonial of respect has just been presented to Mr C. A. Saunders by the heads of the several departments of the Great Western Railway. The presentation took place in the board-room of the terminus at Paddington, on the afternoon of Saturday week, when

TESTIMONIAL PRESENTED TO MR. C. A. SAUNDERS, GREAT WESTERN RAILWAY.

about 200 of the clerks and other *employés* on the line assembled: not more than that number out of about 1200 employed as managers and clerks on the line being able to be spared from their duties at one time. The testimonial, which had been got up so privately that Mr. Saunders knew nothing of it till within a few days of the presentation, consists of a pair of silver Claret Jugs and an elegant Epergne, supported by finely-modelled figures of Justice, Industry, and Wisdom. The plate was designed and executed by Messrs. Hunt and Roskell: the épergne is surmounted by some exquisite artificial flowers from the studio of Mrs. Stodart, a floral artist of great talent.



NEW ORGAN FOR ARCHBISHOP TENISON'S CHAPEL, REGENT-STREET. (SEE NEXT PAGE.)

The proceedings were opened by Mr. Gooch, locomotive superintendent who introduced Mr. Kelly to the meeting.

Mr. Kelly, passenger superintendent of the northern division, then read an address to Mr. Saunders, stating that the officers and principal clerks of the company, so large a portion of whom have for a great length of time been engaged with Mr. Saunders in this important undertaking, desired to offer a mark of their high appreciation of the able manner in which he had uniformly conducted the duties of the difficult and responsible office he had filled for twenty-three years; they having ever felt that, while Mr. Saunders had acted with the strictest impartiality towards all in the service, they could implicitly rely on always receiving from him the kindness of a friend. The epergne bears the following inscription:—

Presented by the officers and principal clerks of the Great Western Railway Company to CHARLES ALEXANDER SAUNDERS, Esq., as a mark of their sincere regard and esteem, and an acknowledgment of the great kindness they have at all times received from him. 19th April, 1856.

Mr. Saunders, who was loudly cheered, then returned thanks for this mark of the regard of the officers of the company. He had had the honour for three-and-twenty years to be connected with the company, and he could not

out express his gratitude to the heads of departments and other officers for the kind, considerate, and continuous support he had always received from them. He was deeply grateful for the assistance they had afforded him; and he could assure the gentlemen of the various departments that, next to the desire of making the company remunerative to the shareholders, the directors had the same wish of adding to the remuneration of their officers whenever occasion would permit. He felt that the company had now passed through all its difficulties; and that, with the completion of the line, it must take a stand which would be most satisfactory to the proprietors and the public

At the close of Mr. Saunders' address, by the request of one of the gentlemen present, the different officers present passed by Mr. Saunders in review order, and cordially shook him by the hand. Mr. Saunders then retired, amidst an enthusiastic demonstration.

## THE ROMAN CATHOLIC UNIVERSITY, DUBLIN.

### OPENING OF THE NEW CHURCH.

THURSDAY, the 1st instant, the feast of the Ascension of our Lord, was happily selected by the venerated and distinguished President of this institution as the occasion of opening for Divine worship the beautiful church recently erected within the precincts of the College, in Stephen's-green, specially for the use of the members and students of the University. The interior of this edifice, says the *Freeman's Journal*, presents many features dear to the admirer of Christian art in the olden times, when every peculiarity of Church architecture, every decorative ornament, however minute, possessed its own symbolic and beautiful meaning, illustrative of some one phase or another of the awful mystery of the Atonement, in the miracles of the SAVIOUR of Mankind on earth—the sacrifice of his saving blood on Calvary—his glorious resurrection and ascension—the foundation of his church, the descent of the Holy Spirit on his chosen disciples, and the triumphs of the faith in the sufferings and martyrdom of their successors.

At an early hour in the morning the requisite ritual ceremonies were performed of devoting and blessing to their holy purpose the altar and sanctuary of the church, which was opened at eleven o'clock for the celebration, for the first time, of the sacrifice of the mass within its walls. Shortly after the opening of the entrances leading to the body and gallery of the church every part of the building appropriated to the laity was thronged with a densely-crowded congregation, comprising numbers of the Roman Catholic clergy of Dublin and its vicinity.

Shortly after eleven o'clock the large body of clergy who attended on the occasion entered the sanctuary and proceeded to their assigned places in the lower choir. The organ and, composed of amateurs in sacred music, chanted the opening hymn appropriate to the day and occasion. From the doors leading from the sacristy into the sanctuary there issued the archpreistes, prelates, and dignitaries who took part in the ceremonies. The Lord Archbishop of Dublin, who presided, was conducted by his attendant clergy to the throne prepared for him at the gospel side of the sanctuary.

The Very Rev. Dr. Newman, Lord Rector of the University, occupied his appropriate seat. The Very Rev. Dean Flannery was also present. The secretary and professors attended in academic costume, and the students of the University, in a large body, also in their collegiate gowns, filled a spacious section of the church. The celebrant of the high mass was the Right Rev. Dr. Whelan, Lord Bishop of Bombay, assisted by the Rev. Dr. Quin, as assistant priest. The high mass was celebrated with every accessory of splendour. The sacred music of the mass comprised selections from the grand masses of Mendelssohn and other celebrated composers.

After the post communion of the high mass, the usual indulgence conceded by the church to the faithful on such occasions was proclaimed, the solemn pontifical blessing was given by his Grace the Lord Archbishop of Dublin, and the high mass concluded.

The Right Rev. Dr. Leahy, Lord Bishop Coadjutor of the diocese of Dromore, then ascended the pulpit, and, after invoking a blessing, proceeded to deliver a sermon appropriate to the occasion. His Lordship selected his text from the gospel of the day—St. Mark, ch. xvi., verse 19:—"And the Lord Jesus, after he had spoken to them, was taken up into Heaven, and sitteth at the right hand of God."

The sermon was heard with deep attention by all sections of the congregation. The Archbishop presiding, the other archpreistes, preistes, and clergy then left the sanctuary in procession, and the ceremonial concluded. Crowds of the congregation remained for a considerable time either in prayer or admiring the proportions and arrangements of this beautiful church.

## NEW ORGAN FOR ARCHBISHOP TENISON'S CHAPEL, REGENT-STREET.

THE Chapel situate in the rear of the houses on the east side of Regent-street, about midway of its length, was built at the charge of Dr. Thomas Tenison, first Rector of St. James (afterwards, anno 1691, Bishop of Lincoln, and in 1694 Primate), to serve as "a public chapel or oratory for daily Divine service;" and endowed with lands for its maintenance, as also that of a Grammar-school in connection therewith, for the gratuitous education of (now) forty boys, natives of the parish. The property is held and managed by nine trustees, the Rector and senior churchwarden of the parish for the time being *ex-officio* and principal acting trustees. By a diminution in the immediate revenues of the foundation consequent on the formation of Regent-street, and the large cost attending the construction of an entrance to the chapel by way of a vestibule from that street, added to the circumstance of the expenses of the chapel and school having of late years been considerably in excess of the income, the affairs of the trust had become in a state of pecuniary embarrassment. Soon after the appointment to the important living of St. James of the present Rector, the Rev. J. E. Kempe, M.A., in 1853, he set about, amongst other comprehensive matters of practical improvement, an endeavour to retrieve the affairs of the chapel, and to place it in a state of efficiency and usefulness on a level with the best-appointed churches of the metropolis; in which work he was ably seconded by his co-trustee—the senior churchwarden of the parish, Mr. Frederick Crace, of Regent-street. At the suggestion of the latter, they succeeded in prevailing upon the trustees to consent to the conversion of the dungeon like vestibule fronting Regent-street into a dwelling house and shop, substituting for the same an entrance from Chapel-court, adjoining, not less spacious on that point of access. And such is the value of household property on this spot, that by the alteration the trust became benefited by a net increase to its revenues of upwards of £250 per annum,* a circumstance which at once not only relieved the trust from pecuniary difficulty, but admitted of the reservation for the future of only a minimum portion of the accommodation of the chapel for letting, appropriating the larger portion to the free and unrestricted use of the parishioners. By means of part of a considerable fund collected by the Rector from a few of the more wealthy parishioners, for the purpose of "providing free church accommodation for the poor," the interior of the chapel was re-edified at a cost of upwards £1200, with new arrangement in the pewing and fittings; the free sittings, and those for letting, being without difference in appearance. By the alteration the interior of the edifice—formerly dull, darksome, and incommodious—was rendered convenient, light, and airy.

In order to complete the improvements in the chapel Mr. Churchwarden Grace undertook to furnish it with a new organ (the third new church organ this gentleman has been mainly instrumental in setting up in the parish since his official connection therewith), and, obtaining a grant of £50 from the trust funds as a nucleus, and a small donation from the trustees individually, succeeded, with the assistance of the Rev. A. P. Morris, one of the preachers of the chapel, in obtaining, by the subscriptions of the congregation and a few of the larger trading firms of the district, a fund already nearly sufficient to meet the expense. The organ was opened on Easter-day last, on which occasion Lord Bishop Jackson, of Lincoln, late the Rector of the parish, preached an appropriate sermon.

The late organ of the chapel was built by Byfield the elder, in 1750, was then of a single row of keys, with eight stops, and was always reputed as a good instrument for its size (the Byfield, in his early days, a workman of the celebrated Rene Harris, never made a bad one). Some additions were made to the organ at different periods, and, in 1848, a new tenor C swell was put in. But these enlargements, being all what are technically called "super work," were not for the better of the instrument; it still lacked the most important feature to a grand organ, viz, basis, whilst the upper range was discordantly noisy.

The new organ is of two full rows of keys and pedal, with ten stops to each of the former, and a single rank of open wood sixteen-feet pipes to the latter, presenting altogether four complete diapasons and two doubles. It is constructed on what is known as the German scale, the same as has within the last few years become generally adopted by all the best English builders, and approved of by all the first performers; and is arranged for the tuning on the system distinguished by the term "equal temperament," the system ever practised in Germany and France, but only now beginning to supplant the generally defective English mode of tuning by unequal temperament. All the approved mechanical contrivances of couplers, composition pedals, &c., are appended. The pipes of six of the steps of Byfield's portion of the old organ are incorporated in the new instrument; those mellowed in their tone by age are of excellent quality. The builders are Messrs. Gray and Davidson, whose well-earned high reputation furnishes sufficient guarantee that the organ will turn out a good one.

The extended compass downwards of the swell forms a somewhat original feature in an organ of the secondary class, as this one is, for the usual mode is to construct that division of such instruments minus the bass: a shortcoming the defect of which is more particularly obvious when the swell is coupled to the great organ—additional force being thereby imparted to the treble without a corresponding increase in the bass a mode of augmenting musical power not in accordance with the received principles of correct harmony. But in the organ here under consideration the compass of the great organ and the swell are uniform (CC to F in alt); so that, when the two divisions are united by the coupler, the augmentation of the power is equal throughout, the increased loudness having bass tones also—the latter the great essential not only to the effective rendering of organ music generally, but for giving efficient support to congregational psalmody, the primary object of the parochial church organ.

The case is the old one enlarged; but the decoration displays a novelty in its illuminated pipes in distinction from the universal custom in England of plain gilding, and is altogether in tasteful keeping with the style of the chapel.

* This property is freehold, and at the expiration of the Regent-street leases, in the next century, much other valuable property falls into this foundation.

# Memorabilia,

## LITERARY, ANTIQUARIAN, SCIENTIFIC, AND ARTISTIC.

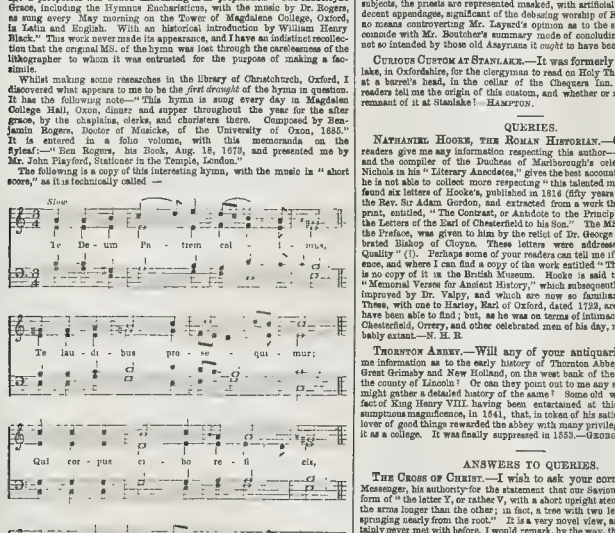
*A little chink may let in much light.*—OLD PROVERB.

### HYMN ANNUALLY SUNG ON MAY MORNING ON THE TOWER OF ST MARY MAGDALEN COLLEGE, OXFORD.

In the year of our Lord God, 1501, the "most Christian" King, Henry VII., gave to St. Mary Magdalen College the advowsons of the churches of Slymbridge, county Gloucester, and Fyndon, county Sussex, together with one acre of land in each parish. In gratitude for this benefaction the College was accustomed, during the lifetime of their Royal benefactor, to celebrate a service in honour of the Holy Trinity, with the collect still used on Trinity Sunday, and the prayer "Almighty and everlasting God, we are taught by Thy holy word that the hearts of Kings," &c.; and after the death of the King to commemorate him in the usual manner. The commemoration service ordered in the time of Queen Elizabeth is still performed on the 1st of May; and the Latin hymn in honour of the Holy Trinity, which continues to be sung on the tower at sun-rising, has evidently reference to the original service. The produce of the two acres above mentioned used to be distributed on the same day between the President and Fellows; it has, however, for many years been given up to supply the choristers with a feast, and entertainment in the College-hall. Some years ago a prospectus was issued announcing as in preparation "The Madeleyne Grace, including the Hymnus Eucharisticus, with the music by Dr. Rogers, as sung every May morning on the Tower of Magdalene College, Oxford, in Latin and English. With an historical introduction by William Henry Black." This work never made its appearance, and I have an indistinct recollection that the original MS. of the hymn was lost through the carelessness of the lithographer to whom it was entrusted for the purpose of making a facsimile.

Whilst making some researches in the library of Christchurch, Oxford, I discovered what appears to me to be the *first draught* of the hymn in question. It has the following note:—"This hymn is sung every day in Magdalen College Hall, Oxon, dinner and supper throughout the year for the after grace, by the chaplains, clerks, and choristers there. Composed by Benjamin Rogers, Doctor of Musicke, of the University of Oxon, 1585." It is entered in a folio volume, with this memoranda on the fly-leaf:—"Ben Rogers, his Book, Aug. 18, 1673, and presented me by Mr. John Playford, Stationer in the Temple, London."

The following is a copy of this interesting hymn, with the music in "short score," as it is technically called —



| | |
|---|---|
| Te adoramus, O Jesu, | Tibi, æterne Spiritus, |
| Te fili unigenite; | Cujus affluntis peperit |
| Tu qui sin dulgentias es | Infantem Deum Maria |
| Subire dignatus Virginis. | Æternum benedicimus. |
| Actus in crucem factus es, | Triune Deus, hominum |
| Irato Des Victima; | Saluba sator optime: |
| Per te, Salvator unice, | Immensum hoc mysterium |
| Vitæ spes nobis redit. | Gyanti ilagus canimus. |

The author of this hymn is unknown. It has been popularly supposed to be the "Hymnus Eucharisticus" written by Dr Nathaniel Ingelo, and sung at the civic feast at Guildhall, on the 5th July, 1660, while the King and the other exalted personages were at dinner; but this is a mistake; for the words of Ingelo's hymn, very different from the Magdalen hymn, still exist, and are to be found in Wood's collection in the Ashmolean Museum. The music, too, of the "Te Deum" is in a grand religious style, and not of a festal character.—EDWARD F. RIMBAULT.

### NOTES.

MONA, ISLE OF MAN.—The etymology of these names has already become a *vexata questio* in your "Memorabilia." I do not agree with any of the suggestions that have as yet been offered as to their origin. Two Monas are distinctly mentioned in classical authors: Mona (Isle of Man), in Cæsar; Monæ (Isle of Anglesea), in Tacitus. To the word Mona I should unhesitatingly assign a common derivation with monk, monastery, viz. *μόνος*, from the fact of both of the islands of this name being places of refuge for religious fugitives, or otherwise their places of resort; in connection with which fact are the first accounts we receive of them down to the end of the first century A.D., when the druidical prophets, priests, and philosophers were expelled by Agricola from the Southern Mona and took refuge in the Northern. The fact of the penultima of Mona being short (Vid. Andrews' Dict., &c.) may be added in confirmation of my opinion. For the modern appellation 'Isle of Man,' I will suggest two derivations: First, I think "Man" may be considered with great probability to be a corruption of the only word [Mon]a, Mon, Man; or, secondly, it is a corruption of [Men]saw *i. e.* Main an, "a little island," by which name the island was known in the language of the early Britons, and which we find Latinised into [Men]avia by Orosius. The Irish chroniclers tell us that Orbsenius, the Irish adventurer, who is reported in traditionary history to have led a band of followers thither, was surnamed [Man]ax or [Man]annan.—R. T. M., Oxford.

SHAKESPEARE READINGS.—With reference to No. 4 of your correspondent's emendations (ILLUSTRATED LONDON NEWS, 29th December, 1855), and the amended readings there quoted from the Perkins folio, and from Mr. Staunton's MS., I beg to remark that the real error is a plain and simple one—so simple as to prove itself. The passage to be amended is:—

> Every fairy take his gait,
> And each several chamber bless
> Through this palace with sweet peace,
> *E'er shall no safety rest,*
> *And the owner of it blest.*
> *Midsummer Night's Dream. Act V.*

Reverse the last two lines thus:—

> And the owner of it blest,
> Ever shall in safety rest,

And you have all right. A line of verse has jostled its neighbour—a very common press error. Does not this show that the folio emendation is conjectural and not authoritative?—C. R. W.

TALE OF A TUB.—The following scrap was pasted by the late Mr. Douce in his copy of "The Tale of a Tub," now in the Bodleian Library:—H. H., Oxford:—

Dean Swift would never own he wrote the Tale of a Tub. When Faulkner, the printer, asked him one day, if "he was really the author of it?" "Young man," said he, "I am surprised that you dare to ask me the question." The idea of the Tale of a Tub was, perhaps, taken from an allegorical tale of Rontenalle's on the Catholic and Protestant religion, published in Bayle's "Nouvelles de la Republique des Lettres," about the year 1696. Ferrant Pallavicinius Divortio Celeste (a satire against the abuses of the Popish power), he might, perhaps, have seen.

THE PINE-GROVE OF NINEVEH.—Mr. W. Boutcher appears to have confounded my observations with those of your correspondent of the previous week, I. B. S. I never asserted—on the contrary I repudiated the notion—that the sacred tree was a vine. My argument went to show that the cone is the acknowledged metonomy of wine (what else does it mean on the thyrsus of Bacchus!) and the basket the symbol of corn; that the attitude of the erect figure, holding with outstretched hands these emblems of cereal abundance is beautifully expressive of the act of invocation, and that he is invoking these blessings on the King before whom he stands, after a successful war or chase. I invite, and will readily yield to, any more probable interpretation. If Mr. Boutcher will read my remarks candidly, he will perceive that I only ventured to add, that *if* grapes were conventionally represented as cones it strengthened the opinion of the symbol. All the Assyrian sculptures are of a religious or political character, except those of hunting the lion and the urus (or wild bull), which appears to have been deemed analogous with, and of as much importance as, the conquest of an enemy. Such puerilities as grape gathering, or a King drinking, would be inconsistent on national monuments. Wherever the King holds a bowl, he is looking into it, as though performing some ceremony of divination. In no case is it represented as touching his lips. I may add that the eagle-headed winged figures before the sacred tree, are perhaps priests, masked and robed according to the attributes of the particular divinity they served. On Etruscan vases figured with bacchanalian subjects, the priests are represented masked, with artificial tails, and other less decent appendages, significant of the debasing worship of Bacchus. While by no means controverting Mr. Layard's opinion as to the sacred tree, I cannot coincide with Mr. Boutcher's summary mode of concluding that "if it were not so intended by those old Assyrians it *ought* to have been."—B. N.

CURIOUS CUSTOM AT STANLAKE.—It was formerly a custom at Stanlake, (pronounced locally, the corruption) to read on Holy Thursday, a "Gospel" at a barrel's head, in the cellar of the Chequers Inn. Can any of your readers tell me the origin of this custom, and whether or not there is still any remnant of it at Stanlake? HAMPTON.

### QUERIES.

NATHANIEL HOOKE, THE ROMAN HISTORIAN.—Can any of your readers give me any information respecting this author—the friend of Pope, and the compiler of the Duchess of Marlborough's celebrated "Apology." Nichols in his "Literary Anecdotes," gives the best account of him, and regrets he is not able to collect more respecting "this learned man." I have lately found six letters of Hooke's, published in 1816 (fifty years after his death), by the Rev. Sir Adam Gordon, and extracted from a work then said to be out of print, entitled, "The Confrast, or Antidote to the Principles disseminated in the Letters of the Earl of Chesterfield to his Son." The MS., Sir Adam states in the Preface, was given to him by the relict of Dr. George Berkeley, the celebrated Bishop of Cloyne. These letters were addressed to a "Lady of Quality" (!). Perhaps some of your readers can tell me if the MS. is in existence, and where I can find a copy of the work entitled "The Contrast." There is no copy of it in the British Museum. Hooke is said to have written the "Memorial Verses for Ancient History," which subsequently were altered and improved by Dr. Valpy, and which are now so familiar to most children. These, with one to Harley, Earl of Oxford, dated 1722, are the only letters I have been able to find; but, as he was on terms of intimacy with Pope, Allen, Chesterfield, Orrery, and other celebrated men of his day, many more are probably extant.—N. H. R.

THORNTON ABBEY.—Will any of your antiquarian readers give me information as to the early history of Thornton Abbey, situated between Great Grimsby and New Holland, on the west bank of the river Humber, in the county of Lincoln? Or can they point out to me any source from which I might gather a detailed history of the same? Some old writer mentions the fact of King Henry VIII. having been entertained at this abbey with such sumptuous magnificence, in 1541, that, in token of his satisfaction, this regal lover of good things rewarded the abbey with many privileges, and refounded it as a college. It was finally suppressed in 1539.—GEORGE S., Thornton.

### ANSWERS TO QUERIES.

THE CROSS OF CHRIST.—I wish to ask your correspondent, J. H. Messenger, his authority for the statement that our Saviour's cross was of the form of "the letter Y, or rather V, with a short upright stem affixed, but one of the arms longer than the other; in fact, a tree with two leafless branches both springing nearly from the root." It is a very novel view, and one which I certainly never met with before. I would remark, by the way, that the phrase "the accursed tree," placed by your correspondent between inverted commas, never once occurs in Scripture. It is true that in the Acts and Epistles the cross is spoken of four or five times as "a tree," and "the tree," but the word in the original is *ξύλον*, which strictly and literally means wood, or anything made of it. Now, in the Evangelists, the word used is always "cross," the original being *σταυρος*, a word evidently applied to mean cross from its reference to the letter T; and, from the fact of the superscription having been set up over our Saviour's head, a very strong inference may be drawn in favour of a middle piece on which to affix it. But on such a subject as this we may safely rely on tradition, which has handed down to us from the earliest ages the form we now recognise, and it is not probable that the likeness of so venerated an object should have become altered. I am, however, glad, from personal observation, to afford evidence as to the true form of our Saviour's cross the most conclusive. In one of the basement arches of the Coliseum at Rome, and in the second row from outside there is a brick one, which is (or was in 1844, when I was there) distinctly visible the figure of an angel holding in the left hand a perfect cross, of what is termed the Latin form. Now, as many of the captives brought from Jerusalem by Titus are known to have been employed in building the Coliseum, there can be very little doubt that this brick was carved by one of these captives, who, if not actually present at Our Lord's crucifixion, must have been at Jerusalem at the time, and cognisant of the circumstances connected with it. It is placed back behind an arch (which is now down), to escape the observation, probably, of the Roman overseers; and such a monument of Christian piety escaped the ruins of that pagan and barbarous building is exceedingly affecting. I cannot see how we can have any stronger evidence as to the form of the cross than that given by a contemporary; and I trust the above will prove satisfactory to your correspondent.—MICHAEL BRAZELY.

THE LAST PERSON BURNT IN ENGLAND.—In reply to the query of W. C. B. as to the date of the last person burnt in this country: On looking over a file of old Chester newspapers a short time ago I met with an account of the conviction of a man and woman for coining; the man was sentenced to be hanged, and the woman to be burnt alive. Her name I think was Margaret Sullivan. In a subsequent paper the particulars of her execution were given, and she was absolutely burnt alive. The date, I believe, was about the year 1766.—M. C.

THE BOSTON ALCHEMIST.—"Cosmopolite," in his remarks in a late number of the ILLUSTRATED LONDON NEWS respecting the burial place of Sir George Ripley, or, according to authentic records, Sir George De Ripley, is in error. Sir George was born at Ripley, in Yorkshire—now and for many centuries past the property and residence of the ancient family of Ingilbye, into whose possession it came near the close of the thirteenth century, by the marriage of Sir Thomas De Ingelby, one of the Justices of Common Pleas, with Catharine De Ripley, heiress of that estate. After the death of Ralph De Pagnel, to whom it previously belonged, William De Ripley had two parts of the manor for half a knight's fee. Then did, I believe, the old MS. still extant which says:—"Sir George Ripley was born at this place; and in his own account reckons himself related to the families of Yeversal, Ripley, Madley, Willoughby, Barham, Waterton, Fleming, and Tolthy. He was a canon of Bridlington, but dispensed with by the Pope to leave his canon place, and became a Carmelite anchorite at Boston, in Lincolnshire." Dr. Holland, in an unwarrantable attack upon Sir George, falsely places him at Ripley, in Surrey, and thus styles him:—"A ringleader of our alchemists, and a 'mistical impostor.'" Camden observes:—"This Sir George Ripley, after twenty years' study in Italy after the philosophers' stone, is said to have found it, *A.D.* 1470; and well he might, as a record in the Isle of Malta declares he gave an hundred thousand pounds yearly to the Knights of Rhodes for carrying on the war against the Turks."—J. T.

### TO CORRESPONDENTS.

OLD MR. MUSIC-BOOK, 1836.—Will "S." of Camberwell, who lately sent us a transcript from an ancient collection of "Ayres, Jigues, concertos," &c., &c., formerly belonging to Britton, the musical small-coal man, and afterwards to Ritson, oblige us with his address.

T. C. S., Dublin.—"Sale of Autograph Letters."—Our correspondent and the surviving relatives of the late Mr. Francis Moore, whom he represents, have somewhat mistaken the spirit of our observations. The remarks we fell called upon to make were not intended to apply to the collection of autographs belonging to that gentleman, which we have no reason to doubt was highly valuable and important from its historical associations, but to the supplemental collection; the public sale of which we, in common with every right-thinking person, hold, and still hold, to be a scandalous violation of the confidence and sanctity of private epistolary intercourse.

RAYMOND DELACOURT.—It is not clear from your note whether the pay to Laurence Dutton, &c., was ten pounds, or ten shillings, or ten pence. What does the warrant in question say, and where is it taken from?

R. T. M., Newton Heath.—Will "R. T. M." favour us with his name and address?

E. M., Dublin.—Must be good enough to re-write his communication respecting the "Calves Head Roll," his present copy for the most part is illegible.

JOHN JOSEPH B.—The medals in question are satirical, and of the sizes mentioned; but are very common.

H. "J. A. BUSSCHERER, F. S. A.—Dr. Rimbault's address is 29, St. Mark's Crescent, Gloucester-gate, Regent's-park.

RECEIVED. F. H. L., Hastings; Offy, T. W. Lupping, Castrian, A. I., K. E. M. H., J. W., An Old Macclesfield Scholar, E. C., Manchester, Sir F. Madden, Dr. Kennedy, H. J. K., Professor Wilson, W., Mayor, Sorn'aer, B. Blendell, Northfleet, A Lover of Genealogy, I. B. (Marlborough), I. Bamforth, D. N. E. W. A. A. H. P. (Bristol), Isabel, Miranda, J. R. C. (King's Lynn), M. C., An Old Subscriber, D. D., B. M. S., L. L. D.

## CHESS.

### TO CORRESPONDENTS.

T. M., CHARLES, and Others.—Correspondents sending Chess Problems for insertion should be particularly careful to write their own signatures, and the Solutions of the Problems, on the top of the diagrams and not on a separate paper.

H. W., Newcastle.—A very clever stratagem.

S. HUMPHRIES.—Impracticable, if Black for his first move play 1. B to K Kt 2nd.

F. M. M'C.—The "Chess-Player's Handbook," published by Bohn, of Covent garden.

N. L., Brighton.—The alteration you propose has been tried, and was found to be no improvement.

C. H. R.—The best Chess-men, both for use and appearance, are those called "The Staunton Chess-men," but you must beware of imitations. See notice to R. M. M'D.

LORENZ.—On the key-move of Enigma 936 is *Kt to K 2nd*; *if wh. P. moves 2 sq, Kt to K 3rd*; *if 2 sq, Kt takes K P*; of 935, *Kt to Q B 2nd*.

A YANKEE.—Your friend is a simpleton. If White take the Pawn, giving check, Black, in capturing the Rook with his Kt, *gives check also*, and thus prevents the mate. See our Solution and you will then have some idea of the beauty of the Problem.

G. T., Brighton.—An improvement on the last.

M. Lewis.—The games between Messrs. Millard and Cafman are not forgotten.

LAUWTON, Alma.—See notice above to "A Yankee."

C. G. Alex. Magoris.—The games played by Mr. Kendall and Mr. Ulthorn consulting together against Major von Heinsheim is a very dull affair. After the palpable bad defence of Major von H. at the beginning, he ought never to have been allowed a chance of recovering himself. Send us some better specimens of Anthon play than this, or we shall think it poor indeed.

E. S., of Hartlip. Only middling.

CHESHIRE, RURIS.—No 1 is poor, and we believe incorrect; for how can White mate if his adversary play, at the third move, B takes K Kt P? No. 2 can be solved by R to K B 7th for the first move.

G. F.—Your prudence and hundreds of others are exercised, at great cost of time and trouble, solely because we do not wish to disheaten young players; but you should be conscious require are the best compositions of the most skilful masters.

JOHN HOOD.—In the opening mentioned the second player, after taking the Kt, has a game

SOLUTIONS OF PROBLEM NO 635, by A. F., T. J. of Hanworth, Germanus, P. M. S., Barrem, Old Stager, M. P., W. W., F. P. S., H. T., are correct.

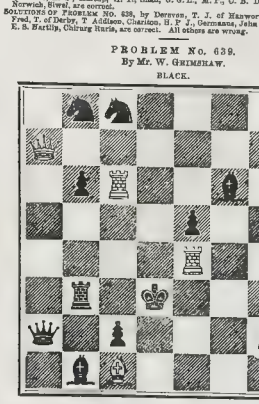
SOLUTIONS OF PROBLEM NO. 637, by T. J. of Hanworth, Germanus, Philo-Chess, P. T. W., Q. Yorke, E. S., Hartlip, H. T., Philo, R. D. L., W. G. L., C. B. D., Yarmouth, F. R. of Norwich, Sivvel, are correct.

SOLUTIONS OF PROBLEM NO. 638, by Derwen, T. J. of Hanworth, F. R. of Norwich, Fred, T. of Derby, T. Addison, Charlton, H. P. J., Germanus, John de Rixton, T. Simpson, E. S. Hartlip, Cuthrug Harris, are correct. All others are wrong.

### PROBLEM No. 639.

By Mr. W. GRIMSHAW.

BLACK.



WHITE.

White to play, and mate in three moves.

### CHESS IN NEW YORK.

A brilliant "Evans" between Messrs. LOYD and PERRIN.

*(Knows' Gambit.)*

| WHITE (Mr. P.) | BLACK (Mr. L.) | WHITE (Mr. P.) | BLACK (Mr. L.) |
|---|---|---|---|
| 1. P to K 4th | P to K 4th | 16. K Kt to K 4th (b) | K to Q 2nd |
| 2. K Kt to K B 3rd | Q Kt to Q B 3rd | 17. K Kt to K B 5th | K to Q B sq |
| 3. K to Q B 4th | K B to Q B 4th | (c) | |
| 4. P to Q Kt 4th | B takes Q Kt P | 18. Kt takes K R | Q takes Kt |
| 5. P to Q B 3rd | B to Q K 4th | 19. Q takes Q | Kt takes Q |
| 6. B to Q 4th | P takes P | 20. B to Q 2nd | P takes Q B P |
| 7. Castles | B to Q Kt 3rd | 21. Kt takes P | B takes Kt |
| 8. P to K 5th | P to Q 4th | 22. K R to K 5th (ch) | B to Q sq |
| 9. P takes P in passing | Q B P takes P | 23. K R takes K Kt | P to Q Kt 4th |
| 10. K R to K sq (ch) | K Kt to K 2nd | 24. B to K Kt 5th | K to Q Kt 2nd |
| 11. K Kt to Kt 5th | P to Q 4th | 25. B takes B | B takes B |
| 12. Q to K 5th | P to K Kt 3rd | 26. B takes R | Kt takes R |
| 13. Q to K B 6th | Q B to K 3rd | 27. R to Q B sq | P to Q Kt 5th |
| 14. Q to K Kt 7th (c) | K R to K Kt sq | 28. P to Q R 3rd | P tp Q R 4th |
| 15. Q takes K R P | P takes B | | |

And White, after a move or two, surrenders.

(a) The attack is maintained with uncommon vivacity up to this moment; but Mr. Perrin appears to have relaxed just when victory was within his power. Had he now taken off the Bishop with his Rook, he would have had very much the advantage in position. For example—

| | | | |
|---|---|---|---|
| 14. R takes B | P takes R (or R) | 17. Q takes K P (ch) | K to his sq (best) |
| 15. Q to K Kt 7th | K R to K Kt sq | 18. Kt takes K R P | |
| 16. Q to K B 7th (ch) | K to Q 2nd | And White must w.o | |

| | | | |
|---|---|---|---|
| 14. | P takes B | 17. Q takes P (ch) | K to his sq (best) |
| 15. Q to K Kt 7th | P takes R | 18. Kt to K 4th | |
| 16. Q to K B 7th (ch) | K to Q 2nd | And Black cannot save the game. | |

(b) This move loses the game. Have, as before, we should have taken the Bishop with the Rook. Let us see the probable result—

| | | | |
|---|---|---|---|
| 17. R takes B | P takes R | 19. Q takes K P (ch) | K to his sq (best) |
| 18. Q to K B 7th (ch) | K to Q 2nd | 20. Kt to K 4th | |
| And sqn White ought to win with ease. | | | |

Another smartly-fought affair between the same antagonists.

*(Queen's Gambit declined.)*

| WHITE (Mr. L.) | BLACK (Mr. P.) | WHITE (Mr. L.) | BLACK (Mr. P.) |
|---|---|---|---|
| 1. P to Q 4th | P to Q 4th | 13. Q R to Q sq | Q to K 2nd |
| 2. P to Q B 4th | P to K 3rd | 14. P to K 4th | P to K 4th |
| 3. K Kt to K B 3rd | Q Kt to Q B 3rd | 15. Q Kt to Q 5th | K Kt takes Kt |
| 4. P to K 3rd | K B to K 2nd | 16. K P takes Kt | Kt takes Q P |
| 5. K B to Q 3rd | K Kt to K B 3rd | 17. Kt takes Kt | Q B takes K B |
| 6. Castles | Castles | 18. Kt to K 5th | Q to K 3rd |
| 7. P to Q R 3rd | P to Q Kt 3rd | 19. Q R takes Q B | Q R to Q sq |
| 8. P to Q Kt 4th | P to Q B 3rd | 20. Kt takes B | P takes Kt |
| 9. Q B to Q B 3rd | Q B to Kt 2nd | 21. Q to Q B 5th | P to K B 4th |
| 10. to Q 2nd | P to K R 3rd | 22. Q K takes K P | Q to Q Kt 5th |
| 11. Q B to Q Kt 2nd | Q P takes P | 23. Q to Q 5th (ch) | |
| 12. K B takes P | K B to Q 3rd | | |

And, after a few more moves, Black surrendered.

### CHESS ENIGMAS.

No. 984.—By J. of Bridport.

White to play, and mate in four moves.

THE GREAT NAVAL REVIEW:—THE GUN-BOATS PASSING THROUGH

NE-OF-BATTLE SHIPS.—DRAWN BY G. H. ANDREWS.—(SEE NEXT PAGE.)

## THE GREAT NAVAL REVIEW.

THE grand panoramic picture presented by our Artist upon the preceding pages is thus described:—At half-past one her Majesty's yacht slowly steamed out to the eastward, to about two cables' length ahead of the squadrons, and there became stationary again. At this moment the whole flotilla of steamers, with company on board, decked with flags of every colour of the rainbow, and each keeping a somewhat independent course, came in sight, and the scene for the first time became positively animated. The gun-boats were now seen creeping up in succession outside of the port division of the fleet, and the four squadrons of these tiny messengers of death (which look like Thames steam-boats and so insidiously carry their heavy armament under an air of nautical innocence), passed round the *Duke of Wellington*, inside the Royal yacht, and made their way round the *Royal George*, skirting the starboard division of the line-of-battle ships, and passing on to their allotted stations in shore. The way in which these little boats darted round the squadron, the clear white smoke (the Welsh coal was a great improvement) looking like so many puffs from a cigar, was exceedingly pretty.

## SARDINIAN NOTE ON THE AFFAIRS OF ITALY.

TURIN, May 8.

The following is a translation of the "verbal note" presented by the Sardinian Plenipotentiaries to the Ministers of France and England on the 27th of March, 1856:—

At the moment when the glorious forces of the Western Powers tend to assure the benefits of peace to Europe, the deplorable state of the provinces under the government of the Holy See would, above all, of the Legations, call for the special attention of the governments of her Britannic Majesty and of his Majesty the Emperor of the French.

The Legations have been occupied by Austrian troops since 1849. The state of siege and martial law have been in vigour since that time without interruption. The Pontifical Government only exists in name, since above its legates an Austrian general takes the title, and exercises the functions of civil and military governor. Nothing evinces that this state of things will terminate, since the Pontifical Government is so convinced of its impotence to preserve public order as in the first days of its restoration, and Austria asks for nothing better than to render her occupation permanent. Here, then, are the facts which present themselves: a deplorable situation ever existing, always in a country nobly peopled, and in which conservative elements abound; impotence of the legitimate Sovereign to govern; a permanent danger of disorders and anarchy in Central Italy—extension of Austrian dominion in the Peninsula beyond what the treaties of 1815 had provided.

The Legations before the French Revolution were under the high sovereignty of the Pope; but they enjoyed privileges and franchises which rendered them, at least in the internal administration, almost independent. At the same time the clerical dominion was even then so antipathetical that the French army was received in 1796 with enthusiasm

Detached from the Holy See by the Treaty of Tolentino, those provinces formed a part of the Republic, afterwards of the kingdom, of Italy until 1814. The organising genius of Napoleon changed their aspect as by enchantment. The French laws, institutions, and administration in a few years developed wealth and civilisation. For this reason, in these provinces, all the traditions, all the sympathies are fixed on that period. The government of Napoleon is the only one that survives in the memory, not only of enlightened classes, but of the people. His memory recalls an impartial justice, a strong administration, a state altogether of prosperity, of riches, and of military greatness.

At the Congress of Vienna they hesitated a long time about replacing the Legations under the government of the Pope. The statesmen who sat there, although preoccupied with the thought of re-establishing the ancient order of things above every other, felt, nevertheless, that they were thus leaving a hotbed of disorders in the midst of Italy. The difficulty in the choice of a Sovereign to whom to give those provinces, and the rivalry which might be brought forth by their possession, made the balance preponderate in favour of the Pope; and Cardinal Consalvi obtained, but only after the battle of Waterloo, this unexpected concession.

The Pontifical Government, at its restoration, took no account of the progress of ideas and the profound changes that the French *régime* had introduced in this part of its States. From that a struggle between the Government and the people was inevitable. The Legations have been the prey of an agitation more or less secret, but which at any opportunity may break out into revolution. Three times Austria intervened with her armies to re-establish the authority of the Pope, constantly repudiated by his subjects.

France replied on the second Austrian intervention by the occupation of Ancona, on the third by the taking of Rome. Every time that France has found herself in presence of such events, she has felt the necessity of moderating the state of things, which is a scandal for Europe and an immense obstacle to the pacification of Italy.

The "Memorandum" of 1831 proves the deplorable state of the country, the necessity and urgency of administrative reforms. The diplomatic correspondence of Gaeta and Portici carry the impression of the same feeling. The reforms which Pius IX. himself initiated in 1846 were the fruit of his long sojourn at Imola, where he could judge with his own eyes of the effects of the deplorable *régime* imposed on those provinces.

Unfortunately, the counsels of the Powers, and the good intentions of the Pope, were destroyed by the obstacles which the clerical organisation opposed to any species of innovation whatever. If there is one fact that is clear from the history of latter years, it is that any attempt to apply the principle of possibility, of reform by the Pontifical Government responding to the wants of the time and the reasonable desires of the population.

The Emperor Napoleon III., with that true and firm *coup d'œil* which is his characteristic, has perfectly affirmed and clearly indicated in his letter to Colonel Ney the solution of this problem, "Secularisation and the Code Napoleon.

But it is evident that the Court of Rome will combat to the last extremity, and with all the means in its power, the execution of these two designs. It well knows how to accommodate itself by apparently accepting civil and even political reforms, sure of rendering them illusory in practice; but it also sees that secularisation and the Code Napoleon introduced into Rome itself, where the edifice of its temporal power has its foundations, would bare it to the roots, and cause it to fall, by cutting away the principal support—"clerical privileges and canonical right." Nevertheless, if it cannot be hoped to introduce a true reform exactly in that centre where the union of the temporal authority with spiritual power is so interlaced that it is impossible to disconnect them without running the risk of destroying them, it may at least be realised in those parts which show themselves less resigned to the clerical yoke, which is a burning torch of turbulence and corruption, which furnishes a pretext for the permanent occupation of the Austrians, exsites diplomatic complications, and disturbs the European equilibrium.

We are of opinion that it is possible, but on the condition of separating, at least administratively, those parts from the State of Rome. In such manner an apostolic principality would be formed of the Legations, under the high dominion of the Pope, but ruled by its own laws, having its own tribunals, finance, and army. We consider that in such an epoch as possible that one of the traditions of the Napoleonic kingdom will be sure to produce soon a considerable moral effect, and will be a great step towards re-establishing tranquility among those populations. Without flattering ourselves that combinations of this nature can last eternally, we consider, however, that for a long time it would be sufficient for the end proposed to pacify those provinces, and give satisfaction to the wants of the people, and thereby assure the temporal Government of the Holy See without the aid of a permanent foreign occupation.

We will indicate briefly the essential points of the project, and the means of giving them effect:—

1. The Provinces of the Roman State situate between the Po, the Adriatic, and the Apennines (from the province of Ancona to that of Ferrara), although remaining subjects to the high dominion of the Holy See, shall be completely secularised and organised as regards administrative, judicial, military, and financial matters, in such a way as to be separated from the remainder of the State. Nevertheless the diplomatic and religious relations will remain exclusively the concern of the Court of Rome

2. The territorial and administrative organisation of this principality to be established in the form in which it was under the reign of Napoleon I. until 1814. The Code Napoleon to be promulgated, except the necessary modifications in the titles regarding the relations between Church and State.

3. A lay pontifical vicar to govern these provinces, with ministers and a council of state. The position of the vicar named by the Pope to be guaranteed for ten years at least. The ministers, the counsellors of state, all the government officers to be named by the pontifical vicar. Their legislative and executive powers never would extend to religious matters, nor to mixed matters that are not previously determined, nor in fine to whatsoever regards political international relations.

4. These provinces to contribute a fair proportion to the maintenance of the Court of Rome and to the service of the public debt actually existing.

5. An indigenous army to be organised immediately by means of the military conscription.

6. Besides the communal and provincial councils, a general council to be formed for the examination and regulation of accounts.

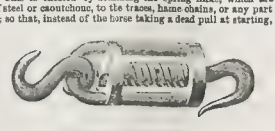
Now if the means of execution are considered they will be found not to present so many difficulties as at first might be supposed. In the first place, the idea of an administrative separation of the Legations is not new at Rome. It was proposed several times by diplomatists, and even advocated by some members of the Sacred College, though in terms more restricted than those necessary to make it a serious and durable work.

The irrevocable will of the Powers and their determination to put an end without delay to the foreign occupation will be two motives that will determine the Court of Rome to accept this plan, which in the main respects its temporal power and leaves intact the actual organisation of the centre and the greater part of its states. But, once admitted as a principle, it will be necessary that the execution of the project should be confided to a high Commissioner named by the Pope, and clear that if this last should not be left to the Pontifical Government it would find in its traditional government the means of falsifying entirely the new institutions. Now it cannot be concealed that should the foreign occupation cease without these reforms being frankly executed, and with a certain force being established, there would be every reason to fear a renewal of seditions, quickly followed by the return of the Austrian army. Such an event would be the more deplorable, inasmuch as the effects would seem to be irremediable, and without any attempt at improvement. It is, therefore, only on the conditions above enunciated that we consider the cessation of foreign occupation possible, which might be effected in this way.

The Pontifical Government has actually two regiments of Swiss and two of natives, altogether about 8000 men. These soldiers are sufficient to maintain order at Rome and in the provinces not comprehended in the administrative division above mentioned. The new indigenous troops, organised by means of the conscription in the secularised provinces, would assure tranquility there. The French might leave Rome and the Austrians the Legations. Nevertheless, the French troops returning by land to their own country might, in passing, halt temporarily in the detached provinces. They should remain for a time previously agreed upon, and sufficient to assure the formation of the new indigenous troops which would be organised with their assistance.

## PATENT STEEL AND INDIARUBBER HARNESS STRINGS.

THE patentee of this very useful, and indeed, humane invention, is Mr. W. Rice, of Boston, Lincolnshire. The object is to lessen the labour both in carriage and draught horses, and to prevent the breaking of traces and chains. This is effected by attaching the spring links, which are made either of steel or caoutchouc, to the traces, hame chains, or any part of the harness; so that, instead of the horse taking a dead pull at starting, which



often brings him down or fractures some portion of the harness, the load comes gradually to the shoulder and is equally adjusted on both sides of the neck. When it is considered how much suffering, to say nothing of cost, this simple invention will relieve from the State, we shall be surprised if, wherever it is known, the harness spring of Mr. Rice is not generally adopted.

BAYEN'S INTERPRETER AND ITINERARY TO THE CRIMEA.—Under this title has just been published a very useful little volume, by Thomas Bryon, formerly an officer in the Russian civil service, intended to meet the requirements both of military men and civilians who may have occasion to visit the late seat of operations in Southern Russia. It is, indeed, the first attempt at a hand-book for Eastern travel which has yet been made; and the manner in which it has been executed is such as fairly to recommend it to all whom it may concern. The author, being an old traveller, commences with some "Salutary rules to be observed in the Crimea," the practical importance of which cannot be doubted. This is followed by a table of distances of various ports, towns, rivers, &c., in the Crimea, and a variety of other geographical information; and afterwards comes a series of vocabularies in Tartar, Russian, Circassian, Arab, Persian, and Turkish, comprehending all matters of most likely requirement to the traveller. The book may be safely recommended as a valuable *vade mecum* for the Oriental tourist.

THE NAVAL REVIEW.—(*To the Editor of* THE ILLUSTRATED LONDON NEWS.)—Seeing in your number of Saturday last a paragraph extracted from the *Berry Post*, stating that on the occasion of the naval review at Spithead, the report of the firing of the heavy guns was plainly heard at Newmarket, I beg to inform you that on that day I distinctly heard in a southerly direction, at about 12 25 a most continuing roar, without intermission for more than five minutes, which I have no doubt proceeded from the mighty war-ships which at about that time thundered forth a salute to their Royal mistress. I felt convinced at the time that such was their origin, and the same day conversed with several gentlemen who heard the reports as plainly as myself, and concurred with me as to their nature. Some even asserted that they felt a slight tremor in the earth. My attention was first attracted, I thought it was distant thunder, but, on listening more attentively, plainly perceived that it was not the sustained roll of thunder, but, a series of distinct reports, following immediately upon each other. From the distinctness with which the discharges were heard here, I should say they would be audible much further north, perhaps even to some of your readers in Yorkshire, who may, like myself, have refrained from writing you until their impression received the countenance of some less distant observer. The fact is interesting as a remarkable instance of the extraordinary distance to which sound is sometimes conveyed. I am your obedient servant, AUDITOR, Markfield, near Leicester, May 6, 1856.

SIR WILLIAM HAMILTON.—The University of Edinburgh has suffered an immense loss in the death of its most distinguished Professor on the morning of Tuesday, the 6th inst. For years he had been in delicate health, and with energy of mind undiminished, struggled bravely against an attack of paralysis that affected the whole of his right side from the eye to the foot With some little assistance from a reader he regularly every year went through the arduous duties of his chair, climbing with difficulty a steep staircase to his lecture-room, and his spirit was so indomitable that his class was known to the last as the best worked and most enthusiastic in the whole University. He had just concluded the usual winter session in his accustomed health, and the news of his death, which in the last instance we believe arose from congestion of the brain, will take his friends and pupils by surprise. He had projected so many works which have been promised to the public for years that it would seem at first as if he had died before his time. But he may be said to have accomplished in the system of thought which he developed in his lectures and in his contributions to the *Edinburgh Review*, and the works on which he was engaged were chiefly either editorial or historical, which called for powers of memory and research possessed by many, rather than for powers of thought possessed by few. His research was, indeed, enormous, and, amid the general poverty of Scottish scholarship he achieved a reputation as one of the most learned men of his time. In scholastic literature his erudition was probably unrivalled, and, unless some of his pupils undertake to arrange his notes, immense stores of information from the most recondite sources are lost to the world. He was always adding to these stores, and not long before his decease he might be seen stretched on a sofa, his right eye in a shade, and his right arm in a sling, with some ponderous tome of the middle ages before him; in this way, indeed, he submitted to the drudgery of making an index to one of Dugald Stewart's treatises, which he was preparing for the press. Sir William's lectures will, we suppose, be published; they are very carefully written out, and when these are given to the world the public will have some better idea of his systems, both of metaphysics and of logic, than can now be gathered from the fragments which have already appeared.—*Times*

LOLA MONTEZ AT THE DIGGINGS.—Lola Montez is playing at the Victoria Theatre, *Black Diggings*. A *drama* had taken place between her and Mr. Seekamp, editor of the *Ballarat Times*. It appears that a writer in the *Times* had made some remarks reflecting on the character of Lola as a woman, and not as an actress, and a few evenings afterwards the editor (Mr. Seekamp) called at the United Service Hotel, where she was residing. Hearing he was below, she came down stairs with a whip, and laid it on his back with hearty good will. Mr. Seekamp retaliated with a riding-whip, and ere long the combatants had each other literally by the hair. Both of the parties were imposed, and they were separated, but not before life-preservers and revolvers had been produced. At the theatre next evening Lola Montez was enthusiastically received, and at the close of the performance made the following very characteristic speech:—"I thank you most sincerely for your friendship. I regret to be obliged to refer again to Mr. Seekamp, but it is not my fault, as he again in this morning's paper repeated his attacks upon me. You have heard of the scene which took place this afternoon. Mr. Seekamp threatens to continue his charges against my character; and I offered, though a woman, to meet him with pistols; but the coward who could beat a woman ran from a woman. He says he will drive me off the diggings; but I will change the tables, and make Seekamp *Be-camp*" (Applause).

A BAZAAR in aid of the funds of the Hospital for Consumption, at Brompton, will take place on the 3rd of June, and two following days, in the Regent's-park.

## *EPITOME OF NEWS—FOREIGN AND DOMESTIC.*

Her Majesty will hold a Drawingroom at St. James's Palace, on Thursday, the 29th of May next, at two o'clock, to celebrate her Majesty's birthday. No presentations will take place at the Drawingroom.

The rumour of a *réunion* of foreign Sovereigns, in the course of the present summer, at Berlin, is again revived with more explicitness. Among those named are the Emperor Napoleon, the Emperor of Austria, and the Emperor of Russia.

The Grand Dukes Nicholas, Alexander, and Wladimir have been appointed to the Colonelcies of the new regiments of the Caucasus.

Among the personages who are shortly to visit Paris is the Queen-Dowager of Denmark, Caroline Amelia, widow of the late King Christian VIII. She is to leave Copenhagen towards the middle of May, and will travel under the title of Countess of Oldenburg.

On Tuesday, the 27th inst., her Majesty will honour his Excellency, M. Musurus, the Turkish Ambassador at the Court of St James's, with her presence at a ball to be given at the residence of the Embassy, in Bryanston-square.

The King of Bavaria has proposed a prize of 100 ducats for the best dramatic piece in verse represented in his kingdom during the present year.

Prince Oscar of Sweden is expected to arrive at Brussels on his way from the North to Paris

Lady Torrens has entered upon the occupation of the apartments in Hampton Court Palace, granted to her by her Majesty, in consideration of the services of her late husband, Major-General Sir Arthur Torrens, K.C.B.

It is now looked upon as certain that the Prince of Prussia will be deputed by the King of Prussia to be present at the coronation of the Emperor Alexander in Moscow.

The Duke of Victory entered Saragossa on the 11th inst., amidst salvos of artillery, and in the midst of an immense crowd, who received him with enthusiasm.

Prince Torlonia, the colossus of Roman bankers, has left the Eternal City for Naples, whence he proceeds with the Princess, his family, and suite, to Paris, and it is reported that his establishment will be broken up and the firm closed.

Prince Albrecht, son of the King of Prussia's brother, of the same name, who, after making a tour in Italy, has landed at Marseilles, will visit Brussels, after paying his respects to the French Emperor.

General the Hon. Charles Grey, bearer of the autograph letter from her Majesty to the Emperor Alexander, accompanied by his Aide-de-Camp Captain Fletcher, Scots Fusilier Guards, left London on Monday evening *en route* to St. Petersburg.

Baron de Budberg, the Russian Minister at Berlin, who was hitherto only a Councillor of State, has been promoted to the rank of Privy Councillor

M. J. Lefebvre, formerly Deputy for the Seine and Regent of the Bank of France, died on Friday after a severe illness.

The Queen of Spain has invited the ex-Regent of Portugal to visit Madrid.

The expenses of the celebrated "Dyce Sombre" case in the Court of Chancery have already amounted to £80,000, and the case is not yet concluded. The proceedings connected with it have extended over twelve years.

The Archduke William and the General of Cavalry Count Schlick are to represent Austria at the coronation of the Emperor Alexander II.

Prince Dolgorouki, the Minister of War, is destined for the post of Russian Minister at Paris.

The Swedish Ambassador at St. Petersburg is reported again to have demanded from his Sovereign his letters of recall. The Ambassador's personal influence is said alone to have prevented an open rupture on the part of Russia when the Swedish treaty with the Allied Powers became known.

Prince Richard Metternich has been appointed Envoy Extraordinary and Minister Plenipotentiary at the Court of Saxony and the Grand Ducal and Ducal Saxon Courts. The Prince, who is well known to the English and French nobility, is the eldest son of the celebrated Austrian statesman of the same name.

The Queen has been pleased to appoint Matthew Talbot Baines to be the Parish Charity Commissioner for England and Wales, in the room of Lord John Russell, resigned.

General Kalergis has been honoured by the Emperor of the French with a private reception.

Viscount Ebrington is suffering from a severe ophthalmic attack, which will, we fear, prevent all attention to business for some time to come.

The appointment of Count Chreptowitsch as Russian Minister to the Court of St. James's is officially announced.

Baron Brunnow left town on Saturday last, by the afternoon express on the South-Eastern Railway, *en route* for Frankfort.

The Duke and Duchess of Hamilton, with the youthful Marquis of Douglas and family, have left Nice for Paris, in which capital the Duke and Duchess purpose making a short tour, on their way to London for the season.

M. Hubner, the Austrian Ambassador in Paris, has, by order of his Sovereign, presented M. Granier de Cassagnac, a writer in the *Constitutionel*, with the Order of Francis Joseph, for his services in supporting Austrian interests in France.

Admiral Elliott has resigned the Governorship of Trinidad, to which office Mr. Keate, the Lieutenant-Governor of Grenada, has been promoted. Mr. Power, now Lieutenant-Governor of St. Lucia, is transferred to Grenada, in succession to Mr. Keate.

Captain Forbes had been put on his trial before the Chief Justice at Melbourne for the loss of the *Schomberg*, and acquitted, without his Honour thinking it necessary to hear any evidence for the defence.

Mr. Layard, M.P., left London last week to take charge of some pending negotiations, and to arrange several important matters connected with the recently-established Ottoman Bank, of which he is chairman.

Baron Bruck left Vienna on the 8th inst. for Trieste, to inspect the railroad which is now being constructed between that city and Laibach. Before his returns the Minister of Finance will also take a trip to Venice.

Mr. G. Hadfield, M.P., has seceded from the "Religious Liberty Parliamentary Committee," because Sir W. Clay, the Chairman of that Committee, has accepted the Government amendments on the Church-rates Bill.

Count Waldkirch is about to leave Munich for Madrid, officially to demand the hand of the Infanta Maria for Prince Adalbert of Bavaria, the heir-presumptive to the throne of Spain.

Count Coronini has received telegraphic instructions to begin on the 15th to move his head quarters and a part of the troops across the Wallachian frontier into Austria.

The Highland Society of Newcastle have resolved to present Sir Colin Campbell with a large and elegantly-chased silver snuff-box, inlaid with gold, as a mark of their high estimation for his distinguished services in the Crimea.

It is said that the Count de Morny refuses to accept any salary as Ambassador to St. Petersburg.

On Sunday last Mr. Sheridan Knowles preached two sermons on behalf of the Day and Sunday Schools about to be built in Cross-street, Islington.

The subscription to enable Mr. C. Gavan Duffy to qualify for the Melbourne Legislature has reached £405 7s. About £3000 will be required.

Lablache has been unwell in Paris but has now recovered, and will arrive in London next week to appear at the Royal Italian Opera.

The Lady Superior of "All Saints' Home," in Mortimer-street, having to give evidence against a thief at Marlborough-street Police-office, the other day, "intoned" her statement.

A treaty of commerce and navigation, based on the principle of reciprocity, has been concluded between Austria and Holland.

Several persons connected with the St. Petersburg Theatre have left for Paris, to engage artists for the coronation fêtes.

It has been considered expedient to limit the future admission of strangers to view Woolwich Arsenal to Tuesdays and Fridays.

The Trustees of the British Museum have recommended to the Lords of the Treasury that a grant of £5000 should be made for decorating the interior of the new reading-room.

A picture in tempera, by an early Florentine master, Sandro Botticelli, has been placed in the National Gallery. It is circular in form, and represents the Virgin with the Child in her arms, and two youthful adoring figures at the sides, one apparently St. John the Baptist, the other an angel.

Mrs. Smith O'Brien and family are at present sojourning in Kilkee. Smith O'Brien, along with his eldest son, is travelling in Greece. He intended, in the course of the year, to visit America; but is now expected in Limerick on the new of a fortnight.

The city of Edinburgh having been promised £600 of the sum set apart for national pyrotechnic displays in celebration of the peace, the magistrates have arranged that the demonstration shall take place there also on the 29th inst., the fireworks to be exhibited from the rocks of Arthur's Seat, overhanging the Royal Park.

**LE COPISTE ELECTRO-CHIMIQUE.—** A New and Simple System for Copying Letters without a Press, by the mere contact of the hand, rendering it available for Travellers. Rolled from 18s., in wood cases from 22s.—PAPETERIE MARION, 159, Regent-street.

**CAUTION.—PATENT EVER-POINTED** PENCILS.—S. MORDAN and Co. are daily receiving complaints of the various imitations of their truly useful invention. S. M and Co. therefore caution all Purchasers not to see that the Patentees' name be stamped legibly on the case. A majority of the counterfeits are constantly pressed on the public, as they yield a greater profit to the vender, but will be found of no certain use.
Perhaps the above caution is even more strictly necessary when Cumberland Lead Tablets are purchased for refilling the Pencil-case. Unless these have been most accurately gauged to the exact size of the pencil point, they will be found utterly useless.
Each box of Genuine Lead Tablets is stamped "Warranted S. Mordan and Co."—Manufactory, 37, City-road, London.

**FUNN ARTS.—S. MORDAN and CO.** beg to inform the Public that they are enabled to supply any genuine pure CUMBERLAND LEAD PENCIL without a particle of grit or any other impurity. S. M. and Co. have no hesitation in asserting that such excellent pencils in every respect have never yet been produced, and the gentlemen of the trade highest testimonials from the first artists, architects, and engineers have been received. The following is an abbreviated list:—

| | |
|---|---|
| Charles Barry, Esq., R.A. | Copley Fielding, Esq., F.W.C.S. |
| C. L. Eastlake, Esq., P.R.A. | W. Wyon, Esq., R.A. |
| E. K. Brunel, Esq., F.R.S. | David Roberts, Esq., R.A. |
| Clarkson Stanfield, Esq., R.A. | J. R. Willmore, Esq., A.R.A |
| B. Westmacott, Esq., R.A., F.R.S. | H. T. Wyatt, Esq., Director |
| S. Prout, Esq., F.S.A. | Government School of De- |
| Philip Hardwick, Esq., R.A. | sign. |

Each Pencil is stamped with their name.

Robert Hisbens, Esq. (2nd time).
John Robert Mowbray, Esq., M.P.
Edmund Peyps, Esq., (4th time).
This Society has been in active operation for upwards of Two Centuries, and has annually assisted by Pensions and Donations about 1200 persons Clergymen, their Widows, Aged Single Daughters, and Children. To Clergymen disabled by age or sickness, or in necessitous circumstances from other causes over which they have no control, pecuniary assistance is afforded either temporarily or periodically. To Widows and Aged Single Daughters of deceased Clergymen pensions are granted, varying in amount from £5 to £25 per annum, and to Widows and Daughters who may be in temporary difficulty only, donations are made according to circumstances. To Children of Clergymen donations are granted for their education, apprenticeship, and outfits in life
During the last year 1855 there have been distributed amongst these several classes; but so numerous are the applications who annually apply for assistance, that the funds permit only of very limited, and often unsatisfactory, grants being made.
The Governors, grateful for the means which enable them to effect such a labour of good, would earnestly invite the continuance of that support which the Corporation has so long received from the Clergy and Laity.
Donations and Annual Subscriptions will be gratefully received by C. J. Mayer, Esq., Registrar of the Corporation, and Treasury of the Festival, 2, Bloomsbury-place; Messrs Hoare, Bankers, 37, Fleet-street; Messrs. Ransom, Bankers, 1, Waterloo-place, and Mr. Edmund Faseman, the Collector, 7, Shaftesbury-crescent, Pimlico.
Persons becoming Donors or Subscribers prior to the Festival may obtain Tickets for the Cathedral from Mr. Mayer, Hovington, Bloomsbury-place; Messrs. Grant and Griffith, west corner of St. Paul's Churchyard; and Tickets for the Dinner will be issued by any one of those gentlemen.

**ONE THOUSAND POUNDS CONSOLS** have recently been transferred to the CORPORATION of the SONS of the CLERGY by a kind Friend, for the purpose of adding £3 annual y to the Pensions of Clergymen's Widows, who from time to time may be, or are one of the highest class of Pensioners by the Corporation (provided the sum shall be not less than £50 per annum, with preference to the widow aged and infirm) and to such Pensioners the intention of the donor being to use of his own name—Any one desirous of benefiting which may elect from others, to raise some of the Pensions of the Corporation to an amount which, it is hoped, will be fully adequate in all cases to the support of the Pensioners, will be a substantial and lasting gift to the "sons of the clergy."
The two years of the Corporation are greatly indebted to the benefactions of those who have made wills in favour of the Society, and the Governors trust that many other charitable individuals may be induced to promote the Society's objects in the same manner when he has to now
CHARLES JOHN BAKER, Registrar
2, Bloomsbury-place, April, 1856.

**SOCIETY for the DISCHARGE and RELIEF** of PERSONS IMPRISONED for SMALL DEBTS THROUGHOUT ENGLAND and WALES Established 1772.
President—The Earl of Romney
Treasurer—Benjamin Bond Cabbell, Esq., M.P., F.R.S
Auditors—Capel Cure, Esq., and H. Harwood Harwood, Esq.
At a Meeting of Governors, held in Craven-street, on Wednesday, the 7th day of May, 1856, the cases of 44 Petitioners were considered, of which 36 were discharged, 5 relieved, 2 adjourned, and 1 referred for inquiry
Since the Meeting held on the 2nd of April, Twenty-six Debtors, of whom 22 had wives and 65 children, have been discharged from the Prisons of England and Wales: the expense of whose liberation, including every charge connected with the Society, was £548 14s. 6d.; and the debts, £1,373 16s. 8d.
BENEFACTION RECEIVED SINCE THE LAST REPORT.—
Miss Anne Hawkins, per Messrs. Hoare (A.) £3 2 0

London: Printed and Published at the Offices, 198, Strand, and 26, Catherine-street, in the Parish of St. Clement Danes, in the County of Middlesex, by WILLIAM LITTLER, 198, Strand, aforesaid —SATURDAY, MAY 17, 1856

# THE ILLUSTRATED LONDON NEWS

No. 801.—VOL. XXVIII.] SATURDAY, MAY 24, 1856. [WITH A SUPPLEMENT, FIVEPENCE.

## THE NEW BUDGET.

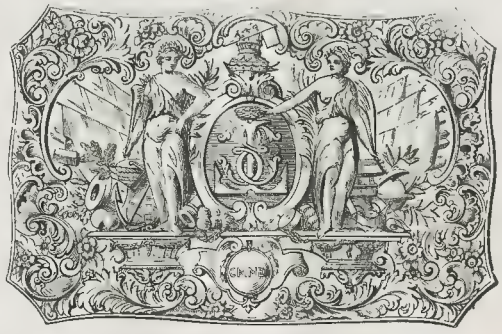
THE annual balance-sheet of the nation is always a document of curiosity and interest. The Chancellor of the Exchequer made his first estimate early in February, whilst we were still at war, and whilst there was every probability that hostilities would be continued during several campaigns. The peace concluded by diplomacy, on the pressure of France and Austria, rendered it necessary that the Finance Minister should make a second statement. This task was performed by Sir Cornewall Lewis on Monday last. The most sanguine of relief, and the most impatient of fiscality, could not have anticipated much retrenchment under the circumstances; and few ventured to anticipate any change in the form of raising the revenue. It would have been unreasonable to expect that our expenditure, based on the continuance of war, would cease with the termination of hostilities; for troops have to be brought home, and pending contracts to be completed. Though nominally at peace, the nation has learned by bitter experience the folly of being unarmed and defenceless, whilst all Europe heaves with the throes of past and still present commotions. For these and other reasons, a Peace Budget was expected by no one.

The following abstract, which we have made as succinct as was possible with lucidity, will show what burdens the people of Great Britain have borne, or have yet to bear, on account of the war. The Chancellor of the Exchequer commenced his statement by observing that the deficiency on the last financial year was £3,560,000, more than covered by the loan of £5,000,000, of which £3,500.000 was received last year, and £1,500,000 in the current year. Connected with that operation was the funding of £3,000,000 of Exchequer Bills which has been effected.

| | |
|---|---|
| The expenditure in the past year was ... | £88,428,000 |
| Revenue ... ... ... ... | 65,705,000 |
| Excess of Expenditure over Revenue ... | 22,723,000 |
| Add loan to Sardinia ... ... ... | 1,000,000 |
| Add redemption of hereditary pensions ... | 213,000 |
| Total excess of expenditure over revenue ... | 23,936,000 |

To cover this, there had been raised in Exchequer Bills and Bonds £26,478,000, which gave a surplus over the deficiency of £2,542,000.

| | |
|---|---|
| The total war expenditure in 1854-55 and 1855-56 was ... ... ... | £155,120,000 |
| The total peace expenditure in 1852-53 and 1853-54 was ... ... ... ... | 102,032,000 |
| Difference against war . | £53,088,000 |



GOLD BOX PRESENTED WITH THE FREEDOM OF THE CITY OF LONDON TO ADMIRAL SIR EDMUND LYONS.

| | |
|---|---|
| The revenue in the two years of war was ... | £125,200,000 |
| Ditto ditto of peace ... | 108,018,000 |
| Increase during the war ... | £17,182,000 |

But to this increase of war revenue, arising from war taxes, must be added:—

| | |
|---|---|
| Additions to funded and unfunded debt ... | £33,604,000 |
| Surplus income of two years of peace . . | 5,986,000 |
| | £36,772,000 |

This aggregate presents the total sum applicable to the War expenditure, over and above the total sum applicable to the Peace expenditure. The estimated expenditure of the present year compared with the expenditure of the two years immediately preceding the peace shows an excess of £24,500,000, which, added to £53,088,000 set down above as "difference against war," gives a total War expenditure of £77,588,000. That, then, is the sum it has cost us to blockade the Baltic during two seasons, and to assist the French in capturing the Malakoff, and the south side of Sebastopol.

From the past we look to the future. In the Budget submitted to the House of Commons before Easter, when immediate peace was not foreseen, were the following items:—

| | |
|---|---|
| Army estimates ... ... | £34,998,000 |
| Navy estimates ... ... | 19,876,000 |
| | £54,874,000 |

This sum represents what we should have had to disburse for the two services had the war continued. In consequence of peace those estimates have been revised, and they now stand thus:—

| | |
|---|---|
| Army ... .. | £20,747,000 |
| Navy . . . . | 16,568,000 |
| | £37,315,000 |

The total reduction on the two services amounts

DEPUTATION OF CIRCASSIAN CHIEFS TO THE SULTAN.—(SEE NEXT PAGE.)

to £17,539,000, the saving on the Army being £14,251,000; and on the Navy £3,308,000.

| | | | | |
|---|---|---|---|---|
| The gross expenditure for 1856-57 is put down at | | | | £82,113,000 |
| Net ditto | ... | ... | ... | 77,525,000 |
| Difference | . | . | ... | 4,588,000 |

This requires explanation, and it is a very satisfactory one, for the difference between the gross and net revenue exactly expresses the cost of collecting the revenue, which item never appeared in any former Budget; and it is only an act of bare justice to state that this wise and honest reform in the mode of making up the public accounts is due to the perseverance of Mr. Williams, M.P. for Lambeth.

The Income and Property Tax, in its fullest stringency, is to be continued during the present and the next year, in consequence of the wording of the Act of Parliament, which sanctioned it till the April succeeding, not the signature, but the ratification, of a treaty of peace. It remains, therefore, at 1s. 4d. in the pound, or £6 13s. 4d. per cent. Its estimate net yield is calculated at £16,900,000.

| | | |
|---|---|---|
| The estimated deficiency of the year is | ... | £6,873,000 |
| Less loan contracted last Monday .. | | £5,000,000 |
| Actual deficiency ... | ... | £1,873,000 |

or, in round numbers, £2,000,000, to meet which a power of borrowing £2,000,000 in Exchequer Bills, will be asked for.

The Exchequer Bills outstanding on the 19th May, last Monday, amounted to £20,124,000, but of these the Commissioners for the Reduction of the National Debt hold £5,000,000, so that there remain in the hands of the public only £15,124,000.

From the above figures it appears that the people of Great Britain have already incurred liabilities to the amount of nearly eighty millions sterling in defence of the independence of Turkey, and of the equilibrium of Europe. To this outlay will, in all human probability, have to be added at least twenty, if not forty, millions more, in maintaining our military and naval forces in such a state of readiness and efficiency as may enable us to play a leading part in any of the complications and difficulties that may arise out of the Peace which the British people accepted, but which they certainly did not make. For the loss of this actual eighty millions, and of this probable one hundred millions, Great Britain has gained nothing but the satisfaction of having performed an act of imperative duty, and of having vindicated its claim to be considered one of the two or three greatest Powers in the world. If to this satisfaction could have been added that of believing in a secure as well as honourable peace, the people of all ranks and classes would, we are certain, have borne with the utmost cheerfulness the burdens and penalties of the past, and have considered themselves fully indemnified for all the sacrifices which they have made, and all the blood and treasure which they have poured out. But it is rather too much to expect them to be particularly joyous when a war so costly has brought them so small a return, and when the peace is unaccompanied by any confident belief in its stability. The official mind may rejoice, for it may well be glad that the war is over; but to expect more from the people than a quiet acquiescence in a *fait accompli* is, under the circumstances, to expect too much.

## PRESENTATION OF THE FREEDOM OF THE CITY TO ADMIRAL LYONS.

On Tuesday a special Court of Common Council of the city of London was held, for the purpose of presenting the freedom of the City to Admiral Sir Edmund Lyons, Bart., G.C.B., agreeably to the resolution unanimously passed in the court on the 28th of February last. The court had a remarkably brilliant appearance, a number of ladies from the other end of the metropolis having honoured it with their presence. Sir Edmund Lyons was introduced by Mr. Deputy Dakin and Mr. Alderman and Sheriff Kennedy, the mover and seconder of the resolution, and was received with hearty cheers.

The freedom of the City, in a gold box, valued at 100 guineas, was then presented to him, in testimony of the admiration of the court of his distinguished services. Sir John Key having addressed Sir Edward, and handed the box to the gallant Admiral amidst vociferous cheering, Admiral Lyons made an eloquent speech in reply, in which he expressed how deeply sensible he was of the distinguished honour which had been conferred on him by those whom he had now the privilege of addressing as fellow-citizens.

The whole court rose and cheered the gallant Admiral at the close of his address, and the Lord Mayor immediately intimated that the proceedings of the day were at an end. His Lordship then invited the whole company to lunch at the Mansion house, and entertained them in the Egyptian-hall.

We have, upon the preceding page, engraved the Box in which the freedom was presented. It is of standard gold. The size is 4¾ in. long, 3 in. wide, and 1⅞ in. deep. In the centre of the engraved subject or design on the lid is a monogram formed of the letters "E. L." the second letter, reversed, representing an Anchor, supported by Victory and Fame, and surrounded by a naval trophy. The City arms are engraved in the front; and at the sides, and corners, and back, nautical emblems are introduced. At the bottom of the box are the Admiral's full arms, crest, supporters, and motto; with the Crimean medal and the different orders attached. The design, which is very characteristic, and the workmanship, reflect much credit upon the taste and judgment of Mr. Clarke, goldsmith and jeweller, King William-street, City, by whom the Box has been manufactured.

The following inscription is engraved inside the cover:—

Salomons, Mayor. A Common Council holden in the Chamber of the Guildhall of the city of London, on Thursday, the 28th day of February, 1856.

Resolved unanimously, That the freedom of this ancient city, in a gold box of the value of one hundred guineas, be presented to Admiral Sir Edmund Lyons, Bart., G.C.B., in testimony of its admiration of his distinguished services.

## DEPUTATION OF CIRCASSIAN CHIEFS TO THE SULTAN.

The silence which the Treaty of Peace observes about Circassia has caused great disappointment, which is fully shared by Circassia itself. The simple news that peace had been concluded produced a very strong excitement there. The mountaineers flocked down in thousands to Anapa, where a Turkish Governor, Sefer Pacha, a Circassian by birth, resides. Several hundred chieftains met to discuss and draw up an address to the Sultan, the Queen of England, and the Emperor of the French, in which they asked that the independence of their country should be recognised, and expressed their resolution to maintain their independence under any circumstances. A deputation of twelve chiefs was chosen, who took this address to Constantinople, and presented it to the Sultan. What this deputation of Circassians wants is only the recognition *de jure* of what they have always possessed *de facto*. The connection between the Turkish empire and Circassia Proper—that is, the parallelogram between Anapa, the rivers Kuban and Laba, and the mountains of Elbruz and Cape Fitzunda, about fifty miles to the north of Soukum Kaleh—was more of a religious than a political character, the Sultan being recognised as the Suzerain Lord by the different tribes, rather as the successor of the Caliphs than as Padishah; and, with the exception of a few military establishments on the coast, the Ottoman empire could never boast of any possessions in the country.

A curious proof that Circassia Proper was always considered by the rulers of the Ottoman empire as independent consists in the fact that that country has been, even before the Russians ever made any claim to it, one of the chief slave markets for Constantinople; which could not have been the case had it been considered part of the empire, as, according to the laws, it is strictly forbidden to sell a born subject of the Sultan belonging to the Mahometan religion. It seems to be, therefore, a natural conclusion that the Turks could never cede a right to any other Power which they never possessed themselves. But, besides this, there exists likewise no proof of a cession of Circassia in any of the treaties concluded between Russia and the Turkish empire.

By recognising the independence of the Circassian tribes, the *status quo ante bellum* would be only diplomatically sanctioned; while the denying of it would amount to a recognition of the claims of Russia to the right of sovereignty over the Caucasian tribes, and put her thus in Asia in a far better position than she was before the war.

In the address which the Circassian chiefs took to Constantinople they expressed their desire that their independence should be recognised under the *suzeraineté* of the Sultan. There are two reasons which led to this wish. The first is the recollection of their old nominal allegiance to the head of Islamism, which has grown considerably by the religious movement lately arisen under the guidance of the Naib of Schamyl; and the other is the desire of finding support against the threatening political consequences of this same religious movement. With the exception of the two northernmost provinces of Circassia—Shapsook and Nagoltsk—the feudal powers of the chiefs and nobles (Tschecs and Uzdens) has until lately been preserved.

## *FOREIGN AND COLONIAL NEWS.*

### FRANCE.

*(From our own Correspondent.)*

PARIS, Thursday.

The period named for the celebration of the christening of the Prince Imperial is now said to be from the 15th to the 19th of June, but the number of dates already spoken of for the festival in question leave the matter as much in doubt as ever. The removal of the Empress to St Cloud is said to have in some degree improved her general health and strength, but there is no doubt but that the unfortunate results of her confinement are of a nature to cause her yet much and protracted inconvenience. The ceremony of the baptism is to take place at four o'clock, and at seven the Emperor is to honour with his presence a magnificent banquet at the Hôtel de Ville, to which three hundred guests are to be invited. The city of Paris counts upon rendering this one of the most splendid of the fêtes to take place on this occasion. The Comtesse de Montijo, who, in consequence of the state of the Empress's health, deferred her departure after that of the Duc and Duchesse d'Alba, whom she was to have accompanied, has now returned to Madrid.

At St. Cloud the Emperor is making a variety of improvements and embellishments; and at Villeneuve l'Etang he is building some Swiss chalets, from designs executed by himself.

In our last week's letter we stated by mistake that the Archduke Maximilian of Austria was to arrive on the 15th instant, instead of the Prince Oscar of Sweden, whose arrival had been originally named for that day. Great attention is being paid to the Archduke Maximilian, who, contrary to the plan adopted by the King of Wurtemburg and the Duc de Brabant, presents himself officially, and receives the Corps Diplomatique in due form. A ball at St. Cloud and a grand review are talked of as likely to take place during the young Duke's stay, and a dinner is to be given at St. Cloud to the Prussian Legation and the Prussians of distinction assembled in Paris.

The Comtesse Walewska has received the decoration of the Ladies of the Noble Order of Maria-Luisa—an order worn by the Empress.

A proposition has emanated from M. C. Dupin, senator, for the erection of a vast column as a memorial to the army of the East, surmounted by a statue of the Emperor. This monument is proposed to be placed at the extremity of the Boulevard of Sebastopol, on the left bank of the Seine. An idea has also been conceived for uniting the forest of St Germain with the woods of Versailles, by buying up certain houses and grounds that now divide them, and planting over the space these at present occupy. This plan, if carried into execution, will form one of the finest forests in Europe.

The most melancholy accounts continue to arrive from the provinces of the inundations that are taking place, and of their disastrous consequences. The Seine is greatly swollen, both above and below Paris; all the bureaux and other buildings on the brink are submerged, and the cellars of the houses, those of the Hôtel de Ville included, filled with water. Between Charenton and Paris the people are occupied night and day in preventing the wood and other property on the banks from being carried away. On the Loire and the Cher the injury done to agriculture, buildings, and other possessions is terrible, both as to value and extent. It was feared that the frequent and heavy hailstorms of the last fortnight had caused fatal mischief to the vine-crop, but fortunately the last accounts state that the reports on this subject were exaggerated.

A variety of dénégations, more or less indignant, have been drawn from various members of the great bodies of State by the declaration of their participation in different industrial speculations. The Emigration and Colonisation Company, whose assertion that among its subscribers were some *placed on the steps of the Throne* drew down upon it the attack of the *Moniteur*, alluded to in our last week's letter, has addressed a reply to the official journal, stating that it alluded, not to the members of the Imperial family, but to the Prince Royal of Prussia, the Prince de Moutdar, &c. The *Moniteur* not having thought proper to insert this letter, the company has, it appears, sent in an assignation to the administration of the Government organ to demand its publication as a right.

The Vaudeville has a new piece by a very young writer, M. Charles de Courcy, which, notwithstanding the improbability of the plot, and the very little sympathy excited by the character of the hero, has sufficient merit to ensure it an undoubted success. In it appears, for the first time, Mdlle. Dinah Felix (youngest sister of Rachel)—an actress of considerable promise.

### AMERICA.

The *Arabia* steam ship, with advices from New York via Halifax to the 8th inst., arrived at Liverpool on Sunday.

In the Senate a debate had taken place on the Central American question, some of the speakers urging the Executive to acknowledge Walker.

In the House of Representatives Mr. Clingman, Democrat, North Carolina, submitted a resolution:—

That, for the better protection of the persons and property of American citizens, under the law of nations, and as secured by existing treaty stipulations with reference to the thoroughfares or lines of travel between the waters of the Atlantic and Pacific Oceans, the President be authorised to employ any part of the land or naval forces of the country, and call for and use any number of volunteers, that might be necessary to provide for the safety of passengers and others of the United States' citizens in those localities; and that such force might be used by him in aid of the local authorities, or otherwise, to ensure the observance of such rights as the Government of the United States and its citizens might be entitled to enjoy.

Objection was made to the introduction of the resolution. During the discussion,

Mr. Jones, of Tennessee, said that he understood the resolution authorised the President to take possession of Central America, but he did not want it then. Several voices thereupon exclaimed, "We do; let's take it!"

Mr. Campbell, of Ohio, wished to amend the resolution looking to the annexation of the British provinces; but this was declined, and the House, without taking any action on the subject, adjourned.

The President and members of the Cabinet held a consultation on the 5th on Nicaraguan affairs. It is thought the outside pressure will compel the Administration to receive the new Minister. Mr. Soulé, in a speech at the New Orleans meeting on the 28th ult., announced with much positiveness that the United States' Government would recognise that of General Walker.

### THE WAR IN NICARAGUA.

Intelligence from Nicaragua by telegraph, viâ Panama, states that Greytown was blockaded by the British ship *Eurydice* on the 20th ult. The steamers *Isabel* and *Charles Morgan* had reached Greytown from New Orleans, and landed 500 men for Walker. A brig from New Orleans was expected at Greytown for Walker, and would be stopped on her arrival by the *Eurydice*. The United States' steamers *Fulton* and *Merrimac*, with her Britannic Majesty's steamer *Termagant* were daily expected, with two French ships, to join the blockade. In the Santa Rosa fight Walker lost twenty-six men, and Costa Rica fifteen men and four officers. President Mora invaded Nicaragua with 2500 men, and was to attack Walker in Rivas about the 19th ult. Two thousand men left Cognipeque, Salvador on the 14th, to help Costa Rica.

The New York *Times* examines closely the various accounts of Walker's position, and finds on the 1st of April he commanded at the most not more than 800 men, and so distributed as to enable him to bring only 500 to bear in the way of attack upon any given point. Five hundred of these were at Rivas, 120 at Granada, 60 at Leon, 30 at Saus Carlos, 50 at Castillo, and 40 at the mouth of the Serapiqui. On the 3rd of April he was obliged to abandon Rivas through want of food, and to return to his old head-quarters at Granada, uniting his command of 500 with the 130 (probably reduced to 100) under Lieutenant-Colonel Piper, who had been left in charge of that town. It was at this place and thus conditioned that on 7th April he received news of the invasion of Nicaragua by the Costa Ricans, and the occupation of Rivas by 2000 of their force. He determined instantly to march against them, and it is reasonable to conclude that for an effort so desperate he took with him every soldier who could be spared from the defence of the city. He set out on the morning of the 8th, and the *Nicaraguense* reports his march to have been made with 500 men, which included 100 native troops. He made his attack upon Rivas on the morning of the 11th, maintained a struggle of seventeen hours, and then retired, with a loss of thirty killed, and of wounded or missing some sixty or seventy more. Thus reduced he fell upon Granada, and there the latest advices leave him with probably less than 500 effective men under his command.

## *THE COURT.*

The arrival of his Royal Highness Prince Frederick William of Prussia, as suitor for the hand of the Princess Royal of England, has been the chief incident in Court life during the week. His Royal Highness landed at Dover at midnight on Tuesday, and on the following morning travelled to Portsmouth, where his Royal Highness was met by the Queen and Prince Consort, accompanied by the Princess Royal. The illustrious party proceeded together to Osborne.

The Court movements of the week are thus chronicled by official authority:—

Her Royal Highness the Duchess of Kent arrived at Osborne on Friday evening last on a visit to the Queen and the Prince.

On Sunday the Queen and Prince, the Prince of Wales, Prince Alfred, and the Princess Royal, attended Divine service at Whippingham Church. The Rev. G. Prothero officiated.

On Monday her Majesty and his Royal Highness the Prince Consort, accompanied by the Prince of Wales, Prince Alfred, and the Princess Royal, crossed over in the *Fairy*, and proceeded up the Southampton Water to the spot appointed for the erection of the Royal Victoria Hospital, near Netley Abbey, of which her Majesty laid the first stone. Her Majesty received an address from the Corporation of Southampton, and returned a gracious answer. After the ceremony of laying the first stone the Royal party re-embarked in the *Fairy*, and returned to Osborne.

On Tuesday her Majesty reviewed the regiments of militia in garrison at Portsmouth and Gosport, on Southsea-common. The Queen and Prince, accompanied by Prince Arthur, Princess Helena, and Princess Louise, landed at the King's-stairs, from the Royal yacht *Fairy*, at five o'clock; where Vice-Admiral Sir George Seymour, Major-General Breton, Sir George Wetherall, Sir Richard Airey, and the officers of the staff, received her Majesty, and where two of the Queen's carriages were in waiting to convey the Royal party to the review-ground. His Royal Highness Prince Albert accompanied her Majesty on horseback. On arriving on the ground her Majesty reviewed the troops under the command of Major-General Breton. The Royal party re-embarked in the *Fairy* at ten minutes before seven o'clock, and returned to Osborne.

The Duke of Wellington, as Master of the Horse to her Majesty, has issued cards for a grand full-dress banquet, on the 31st inst., to celebrate the Queen's birthday, at Apsley-house.

The Earl Spencer will give the customary banquet, in celebration of the Queen's birthday, to the officers of the Lord Steward's department, at Spencer-house, on Thursday next, and not on the 31st, as will be the case with the other members of the Ministry.

The Earl of Shaftesbury has had the Lord Lieutenancy of the county of Dorset, vacant by the demise of Lord Digby, conferred upon him by her Majesty.

## OBITUARY OF EMINENT PERSONS.

### LORD ADOLPHUS FITZCLARENCE.

REAR-ADMIRAL LORD ADOLPHUS FITZCLARENCE, G.C.H., who died on the 17th inst., at Newburgh-park, Sir George Wombwell's seat, near Easingwold, Yorkshire, was the second son of King William IV. His mother was Mrs. Jordan, the celebrated actress, who died at St. Cloud, in France, the 8th July, 1816. He was born the 18th Feb., 1802, and entered the Royal Navy soon after he had completed his sixteenth year as midshipman on board the *Spartan*. Passing through the intermediate grades, he rose to that of Post Captain in 1824; and in February, 1826, he was appointed to command the *Ariadne* in the Mediterranean; and in July, 1828, when commanding the *Challenger*, he conveyed the late Earl of Dalhousie, then Governor-General of Canada, from Quebec to England, and subsequently, in the *Pallas*, took that nobleman as Commander-in-Chief to the East Indies. When William IV. ascended the throne Captain Adolphus Fitzclarence was given the command of the *Royal George* yacht. He was also made Groom of the Robes to the King, with the rank of Groom of the Bedchamber, and shortly after he was advanced, with the other children of the King by Mrs. Jordan, to the rank of a Marquis's younger son. In January, 1833, he was made a Lord of the Bedchamber, and for a time held the offices of Deputy Ranger of Bushy Park and of Windsor Home Park. Lord Adolphus continued to retain the command of the Queen's yacht until he got his flag rank of Rear-Admiral, in 1853, when he was succeeded in the Royal yacht command by Captain the Hon. Joseph Denman.

In 1833 Lord Adolphus conveyed to the late King of Prussia a beautiful miniature frigate—a present from William IV., and he was on that occasion created a Knight of the Red Eagle of Prussia, the first class. He was also a Knight Grand Cross of the Royal Hanoverian Guelphic Order, to which he was nominated in 1852. His Lordship had declined the offer of the Lieutenant-Governorship of Greenwich Hospital. Lord Adolphus Fitzclarence, whose death is very generally deplored, was the last survivor of those four noble brothers who all inherited the amiable and benevolent disposition of their Royal father, and were all popular, and everywhere enjoyed affection and esteem.

WILLS.—Probate of the will of the Most Noble Charles, Duke of Norfolk, Earl Marshal, and Hereditary Marshal of England, was sworn under £100,000 personalty within the province of Canterbury.—Sir Hyde Parker, Bart., £20,000.—Joseph Neeld, Esq., M.P., £250,000.—W. G. T. Tyssen Amherst, Esq., of Diddington-park, £30,000.—James Urquhart, £90,000.—Charles Walton, ship and insurance broker, £70,000.

CHARITABLE BEQUESTS.—The late Mrs. Phillis Stephens only survived her husband, William Stephens, Esq., four days, and by her will has left the same amount of legacies—namely, £2000—as was bequeathed under his will, payable at her decease, by which the following societies will receive under each will the under-mentioned bequests, viz.: Royal Berkshire Hospital, £500; British and Foreign Bible Society, £500; Parent Church Missionary, £500; Irish Church Missionary, £200; Parent Church Pastoral Aid, £200; Green Girls' Charity-school, Reading, Berks, £200; Reading Medical Dispensary, £200; Sunday School in connection with Trinity Church, Reading, £100.

FATAL EXPLOSION IN WOOLWICH ARSENAL.—Last Saturday afternoon, at half-past three o'clock, another lamentable explosion occurred in the Laboratory department of Woolwich Arsenal, by which four men were killed and seven persons severely wounded. The explosion took place in the sheds in the centre of the Laboratory-square, where the composition for filling percussion-caps was made. The windows and panes of the various offices and workshops in the laboratory were entirely destroyed. The new saw-mills are also destroyed, and the total extent of damage is immense. William Powell, who was injured by the explosion in a rocket-shed a fortnight since, died last week at the Royal Ordnance Hospital

## IMPERIAL PARLIAMENT.

### HOUSE OF LORDS.—MONDAY.

COSTA RICA.

The Earl of ELGIN asked if there was any truth in the statement which had appeared in the papers respecting a promise of a supply of arms being made by the Government of this country to the Government of Costa Rica?

The Earl of CLARENDON stated that, since the attack of Walker on that country, its Government had several times applied to this country for assistance; but all these applications had been refused, and our Government had expressed their determination not to interfere in the affairs of Central America—in fact, to do nothing more than send such a force to the coast of South America as might suffice for the protection of British subjects and property. It was represented by Mr. Wallerstein that a slight force would suffice for the protection of British subjects, and also to repel the aggression of Walker; and he asked if the War Department of this country would supply them with arms? The answer referred to was sent; but since that time Mr. Wallerstein was dead, and nothing had been done. He (the Earl of Clarendon) had since communicated with the United States' Government on the subject, and Mr. Crampton reported a conversation upon it with Mr. Marcy, on the 15th March, to the effect that the United States' Government entirely disapproved of the proceedings. In answer to that he had suggested that there could be no better plan than for the English and United States' Governments to unite for the protection of their respective subjects (Hear, hear).

INDIA.

The Earl of ALBEMARLE moved for the appointment of a Select Committee to examine into the administration of the Indian empire. The noble Earl supported his motion by some prolonged comments upon the anomalous conditions and injurious results with which the existing government of India was now carried on.

Earl GRANVILLE opposed the motion, which, after some remarks from the Earl of ELLENBOROUGH, was negatived without a division.

### HOUSE OF COMMONS.—MONDAY.

THE BANDS IN THE PARKS.

To various questions touching the discontinuance of musical performances in the parks,

Lord JOHN MANNERS stated that the prohibitory injunction was intended to operate only with regard to the performances by military bands in the metropolitan parks, and would not extend to the similar exhibitions in garrison or other towns in the provinces. On a deputation of Scottish members had, he added, waited upon the Government with any remonstrances on the subject of these performances.

THE BUDGET.

The House having resolved itself into Committee of Ways and Means, The CHANCELLOR of the EXCHEQUER rose to make his financial and financial statement to the House. Reverting to the expenditure of the past year, he cited the balance sheets lately presented, which showed that the total outlay in the twelve months ending on the 31st of March last had been £58,428,000, while the revenue from taxation had amounted to £55,764,000 showing a deficit of £2 723 000. During that year a sum of £26,475,000 had been borrowed, partly by loans in Canada, and partly upon Exchequer Bills and Bonds, with the effect of not merely providing for the deficiency in the year's revenue, but also of augmenting the Treasury balance, which stood at the beginning of the financial year at £3 349, 000, and had increased at the end of it to £5,600,000. With respect to the cost of the war. Sir G. C. Lewis instituted a comparison between the expenditure and income of the last years of peace, as contrasted with that of the period which had elapsed since the outbreak of hostilities. In the two years 1853-3 and 1853 4 the amount received from all sources of revenue had been £52,800,000, which had satisfied all demands and left a surplus of about £6,916,000. In the past two years of war £125,200,000 had been realised from the taxes, showing an increase of £17,182,000 beyond the previous revenue; which augmentation, in addition to the previous surplus, securing surplus, and a sum of £23,604,000 of borrowed money, had been swallowed up by the expenses of the contest. The estimated outlay incurred on account of the war and in anticipation of another campaign during the current twelvemonth was £54,000,000. The war altogether, therefore, would have cost £77,338 000, of which about £23,500,000 would be defrayed from revenue, and £42,900,000 added to the public debt, a large proportion taking the form of unfunded and floating securities. Of this large expenditure he reminded the House a considerable portion was represented by a permanent result in the shape of augmented naval armaments, of arsenals amply stocked with every material for warlike operations, and of an army largely increased in numbers and thoroughly equipped for service. Besides the provision for national expenditure, the Government had in the past year advanced £1 000 000 on loan to Sardinia, and designed to ask Parliament to advance £1,000,000 in the present twelvemonth, in pursuance of the convention entered into early in 1855 Passing on to the anticipated outlay and income of the current year, the Chancellor of the Exchequer remarked that the revised estimates recently presented to Parliament shewn a reduction of £17,525,000 accomplished since the conclusion of peace upon the army and navy alone. The total estimated cost of the different items of expenditure as compared with the previous year, shewn a reduction of £17,525,000 accomplished since the conclusion of peace upon the army and navy alone. The total estimated cost of the different items of expenditure as compared with the previous year, was as follows: For interest on the funded debt, £27,835,000, interest on floating securities, £1,025,000; charges on the Consolidated Fund, £1,750,000; for the army, £20,747,800; navy, £14,500,000; miscellaneous civil service expenditure, £6,800,000; the total estimated outlay for supply service was £44,115,800; and the gross expenditure, excluding cost of collection, &c. (but inclusive of the one million loan to Sardinia, and two millions vote of credit for contingencies), was £77,525,000 Adverting to revenue, Sir G. C. Lewis explained the returns, and dwelt upon the buoyancy exhibited by various branches of receipt, and especially those belonging to those items which had been temporarily enhanced for the avowed purpose of supplying the demands of the war. During the current twelvemonth, he proceeded to state, the net produce from Customs was expected to be £22,524,000, from Excise £16,348,899, from Stamps £7,000,000, from Land and Assessed Taxes £2,895,000, from Property and Income Tax £16,900,000, from Post-office £1,070,000, from Crown Lands £260,000, and from miscellaneous sources £1,000,000. On the whole, he anticipated to obtain a gross revenue of £71,740,000, and a estimates of £67 189,000 Compared with the gross amount of expenditure, this total showed a deficit of £6,373,000. To fill up this sum £1,500,000 had been received as balance of a loan of £3,000,000 concluded, but only partially paid up, during the bygone year; and a new loan of £3,000,000 had been contracted that very morning at a price of £93 for every £100 Consols Stock. After mentioning, as a proof of the vast resources of the country, that Messrs. Rothschild had received proffers on account of this new loan amounting to not less than £40,000,000 sterling, of which ten per cent, or £4,000,000, was actually paid in cash, the right hon. Baronet stated that for the residue of the deficiency, being about £2,000,000, he designed to ask leave to borrow money either in Exchequer Bonds or Exchequer Bills, according to the aspect of the Money Market at the time, with a similar provision for the further two millions which he wished to obtain by way of margin, to meet any unforeseen excess in the cost of different services. Explaining the process by which, the Income-tax, the Tea-duties, and other imposts would be successively reduced, according to existing arrangements, in consequence of the termination of hostilities, he intimated formally, while these exceptions, no reduction could for some time to come be prudently sanctioned as to any branch of revenue, not even excepting the duty on fire insurances. The Chancellor of the Exchequer concluded by moving some remarks upon the general principles of finance, accompanied by a brief history of the recent changes and remissions in various duties, and of the reductions to be anticipated in the gross amount of the National Debt consequent upon the falling in of sundry series of terminable annuities.

A formal resolution, sanctioning the terms of the new loan of £3,000,000, was then moved from the chair.

Mr. ALCOCK regretted that the Finance Minister still intended to maintain the duty on fire Insurances at its present exorbitant tariff.

Mr. HADFIELD promised, as the fitting opportunity, to propose that this impost should be reduced from 3s to 1s per centum.

Mr. E. BALL contended for a reduction in the malt-duty.

Mr. M. GIBSON enforced the necessity of economical and financial reform. He wished to see the paper-duty and all taxes upon literature and education entirely abolished, and hoped that the expenditure upon military and naval armaments would be rapidly brought down to the level at which it stood before the war. He contended that the maintenance of the duty on paper was utterly inconsistent with the desire which had so frequently expressed in Parliament for the diffusion of knowledge among all classes of the people. He therefore gave notice to the Government that, whether there was a deficiency or a surplus of revenue, he should feel it his duty on a fitting occasion again to ask that House to repeal the duty on paper.

Mr INGRAM and Mr. Disraeli rose at the same moment, but cries of "New Member!" made the latter give way.

Mr. INGRAM said he was quite prepared to go into the question of the paper-duty, but as the right hon. member for Manchester had intimated that he would call the attention of the House to that subject on a future occasion, he (Mr. Ingram) would defer the observations he wished to make until the right hon. gentleman brought forward his motion. He regarded the paper-duty as a most obnoxious tax, and thought nothing in statements he would be able to adduce would satisfy the House that it ought to be abolished.

Mr. DISRAELI exhorted the Government, when the excitement of war had passed away, to embark upon a course of wise and rigid economy, and controvertist the assumption that a large warlike force should be kept on foot in time of peace by way of preparation for the contingency of war. The best mode of preparing for hostilities was to economise resources and extend commerce during peace. It was, however, possible to maintain a very efficient army without rendering it either extensive in number or burdensome in cost, and as a feeder to this army he considered the preservation of a militia force highly advantageous. Mr. Disraeli then adverted to the Sardinian Loan, commenting upon the relationships between the British Government and the Sovereign of Piedmont, especially as affected by the tripartite alliance concluded between England, France, and Austria.

Lord PALMERSTON explained the import of the treaty in question, in which he remarked Mr. Disraeli had suspected mysterious meanings that did not exist, and discovered dangers that had no foundation in fact. There was nothing in the convention with Austria which prevented the Governments of England and France from maintaining cordial alliance with Sardinia, and pledged them to oppose in any way the efforts that might be made by any of the Italian States to achieve freedom and independence.

Sir F. BARING expressed a general approval of the financial scheme just promulgated by the Chancellor of the Exchequer.

Mr. GLADSTONE continued the discussion relative to Sardinia, eulogising the policy which had been pursued by that country, and invoking the sympathy of the British Legislature and public in behalf of the efforts it was making to consolidate its free constitution and dom-stic prosperity. Adverting to the budgetary statement just presented, Mr. Gladstone remarked that the Finance Minister had

RECEPTION OF THE ARCHDUKE MAXIMILLIAN OF AUSTRIA BY PRINCE NAPOLEON, AT THE STRASBOURG RAILWAY TERMINUS, AT PARIS.

the principal monuments of the capital, went to the Louvre, and examined its contents in great detail. In the evening the Prince expressed a desire to dine with his suite in some *restaurant* of the Palais Royal. Count Bacciocchi, First Chamberlain to the Emperor, ordered the dinner at the Trois Frères Provençeaux, and was invited by the Archduke to partake of it. In the evening the Prince went to the Grand Opera, where the "Corsaire" was performed.

On Tuesday a grand review took place on the Plain of Satory, near Versailles, in honour of the Imperial and Royal guests of the Emperor When the last great military spectacles were represented on the same spot before the Prince President of the French Republic, few imagined that within a few years the same President, transformed into Emperor, would have a Prince of the Imperial House of Hapsburg riding in his train. St Cloud has presented a series of fêtes during the Imperial visit: on Wednesday there was a concert, and on Thursday a ball.

INSPECTION OF THE ROYAL SAPPERS AND MINERS AT BROMPTON BARRACKS, CHATHAM, BY SIR JOHN BURGOYNE.

## INSPECTION OF THE ROYAL SAPPERS AND MINERS.

The half yearly inspection of the Royal Engineer Corps of Sappers and Miners took place on the 14th inst., at the Brompton Barracks, Chatham. More than ordinary interest attached to the occasion, from the presence of Lieutenant-General Sir John Burgoyne, G.C.B., R.E., Inspector-General of Fortifications, who directed in person the military evolutions of the day. After reviewing the troops on the lines above St. Mary's, the whole of the Royal Corps of Engineers were paraded in the Barrack-square, Brompton; when their kits and accoutrements underwent a minute inspection by the gallant General, attended by his Staff, Colonel Savage, and commanding officer. General Burgoyne expressed himself to the Colonel Commandant as being highly satisfied with the appearance and condition of this distinguished branch of the service.

A handsome *déjeuner* was provided by the officers in honour of the occasion.

## IMPROVED LONDON STREET ARCHITECTURE.

The solid and striking pile of building at the west corner of Arundel-street and the Strand—a view of which is given below—affords a most

IMPROVED LONDON STREET ARCHITECTURE: NO. 184, STRAND.

satisfactory illustration of the progress of street architecture. The site is an interesting and remarkable spot. Here stood old Arundel House, famous in the annals of art and science. From hence Chapman and Hall poured forth the flood of Dickens's popular novels At this corner, on the occasion of the funeral of the late Duke of Wellington, was erected, under Mr. H. E. Abraham's direction, a temporary building which accommodated upwards of 3000 spectators

The structure lately erected, from the designs of Mr. H. E. Abraham, occupies the site of eight houses—four in the Strand, and four in Arundel street. It has a frontage of 65 feet in the Strand and 103 feet in Arundel-street; and is 75 feet high at the highest part in Arundel-street, at the south extremity of 52 feet from the Strand; from this point the building has a height extending but to the level of the string-course of the one-pair story; on a continuation of which stands a light and handsome balustrade, and behind it a dome 38 feet in diameter, which lights and ventilates the rear of the ground-floor of the premises.

The style of architecture is Italian of the Vignola school, contrasting strongly without injury with the effect of the Palladian design by the same artist on the east side of Arundel-street—a view of which has also appeared in our pages. A masculine effect has been the aim of the architect, who, denying himself columnar aids, has depended upon force of projection and unbroken lines for his success. A bold rusticated basement, with expression for the apertures, consisting of scabbled keystones and quoins, and surmounted by a strongly-defined block cornice, is an appropriate substructure for the prominent system of fenestration of the one-pair story over it. This is relieved from heaviness by open balustrading and curved and angular pediments heads and handsome trusses, which afford variety. Above, in more repose, and separated by moulded strings of strong profile, are three stories of ample height; the attic windows having continued architraves, instead of resting on a string, preparing by their solidity for the projection over them. The principal cornice has been designed to leap forward from the building, rather than to overwhelm it with huge projection; but is, nevertheless, the most striking feature in the design. A handsome and original balustrade formes the sky line. Balustrades, when open, are always handsome.

A free use of the best and most subtantial material has been consigned to the architect by Messrs. Smith and Son, who, while determining to grace their enterprise with a work of art, have had the genuine good taste to avoid all meretricious display, and to raise a building in harmony with the solid character of their undertakings.

What the nature of those undertakings is which have required such an important outlay in building—amounting to more than £20,000—we will now proceed to describe.

The names W. H. Smith and Son appear on the literary refreshment-stalls at most of the principal railway stations throughout the country; but this branch of their business, and the advertising in connexion with it, form but an unimportant branch of the trade carried on by the firm.

The building may be regarded as a sort of newspaper clearing-house. About two years ago Messrs Smith and Son had accumulated in their hands so large a proportion of the trade in the supply of the daily morning papers to persons resident in the country, that the proprietors of the newspapers found it advisable to secure to them an early delivery of the papers for distribution in the country, and the smaller newsagents in London entered into arrangements with the firm to fold, pack up, and dispatch their papers for them. A large portion of the country is accordingly supplied through the office of Messrs. Smith and Son directly or indirectly, and the care and labour necessary for the punctual dispatch of the many thousand papers which pass through their office daily greatly exceed that which is required in the Post-office itself, with which this is in some degree a competing establishment.

The duties of the day commence at five a.m. At that hour the papers, wet from the printing-machines, are brought in carts successively, and as rapidly as they are printed, to Messrs. Smith's office. They are then placed on tables, and a large staff of clerks and porters are employed in counting the requisite numbers, and in placing them in covers already addressed and sorted, for dispatch by the respective trains which leave London for all parts of England, between 6 and 9 30 every morning

In this way 650 parcels for conveyance by railway, and many thousands of papers addressed separately for the Post-office, amounting altogether to about 7,000 sheets per diem, are dispatched, so as to arrive at their respective destinations with the regularity which the reader of the daily newspaper knows so well how to appreciate.

Messrs. Smith and Son do not act as the arms and legs of the other London agents with regard to the evening or weekly papers, as the same degree of exertion is not required to ensure their dispatch by post or railway as with the morning papers; but the requisitions of their country correspondents make their office a busy scene in the afternoons, particularly on Fridays, when the ILLUSTRATED LONDON NEWS, and others of the weekly papers, are issued for dispatch to the country.

The growth of Messrs. Smith's business is almost as remarkable as that of the newspaper interest itself. Fifty years ago the *Times* contained about as much matter altogether as is now to be seen in one of its pages; so that the increase is not less than sixteen-fold. Weekly papers were almost unknown; and generally the circulation of newspapers was confined to the privileged or governing classes. Messrs. Smith's business then employed two or three servants—their staff now exceeds three hundred and fifty.

To accommodate this numerous staff, to keep the right man or boy in the right place during the short period that can be allotted for the pressing work, in which minutes are as valuable as hours at the last push, space and arrangement were indispensable requisites; and a glance at the ample area of the ground story, with its gallery in the rear, the expansive domed ceiling acting as a rapid ventilator, and the lightness and business-like effect of the interior generally, satisfies the spectator that a complete knowledge of system and diffusion of labour has pervaded the designs of Messrs. Smith and Son, and been well enforced by them. The builders were Lucas Brothers.

There are several other news agents in the metropolis who do a gigantic business—but none, we believe, who carry on so large a trade as Messrs. Smith and Son.

## *CHURCH, UNIVERSITIES, &c.*

TESTIMONIALS.—The Rev. Henry Blacket, Curate of Kettering, has received from his bible classes an elegantly-bound copy of "Kitto's Daily Bible," illustrations, in eight vols.—The churchwardens and inhabitants of Tredington, in the county and diocese of Worcester, have raised by voluntary subscription, and presented to the Rev. E. Eliot, B.C.L., Fellow of New College, Oxford, an elegant silver salver, as a testimony of their regret upon his resigning the curacy.

CLERICAL APPOINTMENTS.—*Archdeaconry:* The Rev. R. H. Cobbold to the Archdeaconry of Ningpo. *Rectories.* The Rev. J. Maddy to Down Hatherley, Gloucestershire; Rev. C. R. Hassall to Fasterne, near Shipston. *Vicarages:* The Rev. J. S. Byers to Elsenham, Essex; Rev. R. Ainsworth to Stoke with Stowe, Warwickshire. Rev. J. E. Clarke to St. Michael's, Derby; Rev. C. H. Newmarch to Wardley, near Upping. Pam. *Incumbency:* The Rev. J. L. Court to Little Brickhill, near Fenny Stratford.

## THE BALLOT.

DIVISION HOUSE OF COMMONS, TUESDAY, MAY 20

Motion made, and Question put, "That leave be given to bring in a Bill to protect the electors of Great Britain and Ireland, by taking the Votes by way of Ballot."—Mr. Henry Berkeley. The House divided—Ayes, 111; Noes, 151.

MINORITY IN FAVOUR OF THE BALLOT.

## THE PEACE CELEBRATIONS.

Next Week, MAY 31, will be published,

A SPLENDID DOUBLE NUMBER

OF

THE ILLUSTRATED LONDON NEWS,

CONTAINING

A SERIES OF SUPERB ENGRAVINGS

OF THE

ILLUMINATIONS AND DISPLAYS OF FIREWORKS

IN COMMEMORATION OF THE PEACE;

Including Views of the following Public Buildings Illuminated:—The Horse Guards, Ordnance Office, and Office of the Minister at War; the National Gallery, and British Museum; Somerset House, and the General Post Office; the Royal Exchange, and the East India House, the Mansion House, &c.

ALSO

The Grand Display of Fireworks in the Parks and on Primrose-hill; Peace Rejoicings in the Provinces, &c,

ALSO

Portraits of their Royal Highnesses the Princess Royal, and Frederick Prince of Prussia.

In Addition to the Two Sheets will be given the

LARGE PICTURE MAP OF THE BALTIC,

AND A

FOUR-PAGE ENGRAVING OF THE FLEET,

DRAWN BY E. DUNCAN.

Price of the Two SHEETS and the LARGE MAP and PRINT, 10d.; Stamped, 1s.

## THE ILLUSTRATED LONDON NEWS.

*LONDON, SATURDAY, MAY 24, 1856.*

THE streets are already giving indications of the splendour with which they are destined to shine on the 29th, and the apparatus is fixed in many places for the illumination, which, however, is not to be more general than the will of the inhabitants may render it. Government will give no order to light up; and, as the occasion is to be one of "rejoicing," it is only fair that; people should not be expected to "rejoice" against their inclinations, in a heavy expenditure. Those who can afford to "Welcome Peace" in gas letters six feet in length will be sufficiently numerous to contribute to the general splendour of the metropolis without calling on those who, if forced to illuminate, would wear black looks while their houses put on a glittering exterior. The satisfaction to be obtained from the fireworks ought to be of a very exalted nature to compensate for the danger and inconvenience generally attending them. Already some lamentable accidents have occurred in the factories where these instruments of national happiness are being prepared, and it is to be hoped that the joy of the public—if it feel any joy, which we very much doubt may not be marred by some still more serious calamity. The display must be brilliant indeed that will compensate in the smallest degree for the lives already sacrificed in the preliminary arrangements. We trust, too, that in regard for the public tranquility the Government will take measures for the effectual preservation of the peace of the metropolis during the multitudinous gathering which it has invited. A grand ceremonial by daylight—like the funeral of the Duke of Wellington, or the entry of the Emperor and Empress of the French—is a very different thing from a nocturnal celebration. The men of red-tape have, somehow or the other, got it into their heads that the people of London are particularly elated at the peace. They argue that, as the people rejoiced at the close of the war in 1814 and 1815, they must be equally delighted at the close of the war in 1856; and that as there were fireworks and illuminations, and a grand jubilee, on the former occasion, they are bound to follow the precedent on the other, and expend £8600 or £10,000 in a very irrational and extravagant manner. But the circumstances of the time, the temper of the people, and the state of the metropolis, are very different in 1856 from what they were in 1814, though Rede-peism may not be aware of the change which Time has operated. The population of London has nearly doubled itself in the interval; and the inconvenience and danger to be apprehended from crowds swarming in the streets at midnight have increased in the same ratio, and ought to be guarded against with corresponding care. The Government should also remember that by its unfortunate conduct upon another question, which more particularly interests the feelings, or it may be the prejudices or the passions, of the Londoners, it has excited against itself a very considerable amount of ill-will; and that violent and injudicious persons on the one hand, or on the other the ruffians who delight in tumult and in the plunder which they expect to arise out of it, may, by their conduct, cause serious disturbance and breaches of the peace. Such occurrences—deplorable at all times—would be more especially to be lamented if they occurred at night, and upon an occasion set aside as one of rejoicing. Thursday night will, no doubt, be one of splendour in the principal thoroughfares—though, as regards the spectacle, the Government, by the non-illumination of the bridges, and of the columns in Trafalgar-square and the York steps, will miss a good opportunity for making it really beautiful and effective. But there is safety as well as splendour to be considered, and the night will be one of much anxiety, if not of terror, in many parts of the metropolis. We have the utmost confidence in the good behaviour of the great bulk of the people, both by night and by day; but great mischief may be done by a few evil-minded persons. We therefore reiterate our hope that effectual measures will be taken for the preservation of the peace; and that our somewhat pig-headed and uncourteous officials will remember that a force which may have been sufficient for the purpose in 1814 will be insufficient in 1856.

THE wealth of England is in a continuous state of accumulation, nor does it find sufficient employment within its own shores. It travels to foreign lands, seeking either the profits of commerce or the dividends which arise from permanent investment. Railways form the favourite speculation of modern times, and British gold is about to plant iron roads throughout Italy and Russia. These securities may be sound and lucrative; and they who believe that the time has arrived when the lion will lie down with the lamb and the sword be converted into the pruning-hook, may also entertain a very serious conviction that future Czars will never turn them into instruments of war or aggression. There are, however, other outlets for British capital than the continent of Europe—outlets more simple, more solid, more remunerating; and they possess this collateral advantage, that, when filled, they would react upon the mother country, and stimulate and reward the industry of our manufacturing districts. We allude to British India, with its 150,000,000 of inhabitants, constituting the noblest market on the habitable globe, and where, proper facilities being afforded, England would obtain richer resources than all the gold mines of Australia can afford. The East India Company, after a long delay, has fairly commenced the work of improvement, by constructing railways and electric telegraphs; but the revenues of the Company are too feeble to enable them to carry out the principle of material progress to an extent commensurate with the wants and capabilities of the country. Hence it is that the auxiliary aid of private enterprise is most desirable where the field for its exercise is as inviting as it is unbounded.

We are aware of the mineral wealth of India, but our present purpose is to direct attention to its agriculture. There is no doubt that the products of the soil under the rule of the native princes exceeded those realised under the government of the Company, because the former bestowed constant attention on irrigation, which the latter, till recently, neglected. Formerly, tanks and reservoirs existed all over Central and Southern India. Their remains may be traced over the fertile cotton-grounds of Candeish, and their ruins are visible in the delta of the Godavery; generally speaking, it is calculated that throughout the whole Madras Presidency only one-fifth of the ancient works of fertilisation remain. The magnificent scale on which those works were constructed is astonishing even to the European mind.

"The Emperor Feroze," says Dr. Buist, in his "Notes on India," "constructed about the year 1350 a magnificent canal, for the purposes of irrigation, from the base of the mountains to the neighbourhood of Delhi, 200 miles in length, by means of which a vast tract of country was made fertile as a garden, and above a million of people provided with bread. Two centuries after this the illustrious Akbar devoted himself to the construction of new canals for the purpose of irrigation, and the clearing out of those formed by his predecessors, and which had fallen into decay. He made the subject a regular part of his system of government, and left a canal behind him, which has come down to our times, providing for a complete series of arrangements, and a large array of officers for their extension and management. The Shah Jehan, seventy years later, took up with enthusiasm the plans of his predecessor, and was nobly seconded in his efforts by Ali Murdan Khan, celebrated over the East for his skill and taste in architecture. The success of their labours was magnificent; tradition still enlarges on the vastness of the returns derived from the canals brought into existence by them, which were such as, from a single canal, to pay for the maintenance of twelve thousand horsemen."

The first canal operations of the East India Company commenced in 1821; among the latest are those on the Godavery Delta, which have been applied not only to irrigation, but also to navigation. Of these a very instructive account has been published by Colonel Arthur Cotton, from which it is very evident that enterprises of this nature are highly remunerating to capitalists, most beneficial to the natives, and admirably calculated to develop the general resources of India. He thus describes the locality:—

The Godavery river, in the delta of which they (the works) are situated, rises in the Western Ghauts, not far from Bombay, about 3000 feet above the sea, and, flowing in an unusually direct course about 800 miles, enters the Bay of Bengal at the port of Coringa, a good harbour, and the only one on

the east coast of the peninsula, 400 miles north of Madras. The country drained by it is 130,000 square miles in extent. The extreme discharge of the river is about 100,000 cubic yards per hour, and its least about half a million.

It is evident that the soil of a tropical delta, exposed to a powerful sun, requires, as the first condition of fertility, a copious supply of water. The works on the Godavery will irrigate 12,000,000 acres, giving two crops annually, yielding a million and a half sterling, and providing work and wages for one-fourth more cultivators than could be employed without these improvements. The transit of goods, costing by land 3½d. per ton per mile, will be reduced by one-eighth of a penny when carried by canal. The saving here effected, and the passenger traffic, are put down at a million. The channel leading from the river or harbour to the port of Coringa was opened in 1851, when 752 boats passed through it; but in 1855 the number had increased to 8340, besides 2270 rafts of timber and bamboos. Within this brief period Colonel Cotton claims credit, 1st, for an increase of revenue of 25 per cent in a season of severe drought; 2nd, an increase of trade to the extent of 600 per cent—that increase continuing unchecked in a season when other districts could not have supplied themselves with food; 3rd, the increase of internal transit, probably fully twentyfold.

When the works contemplated are fully completed, they will afford a cheap communication between the coast and about ten millions of people; and, as connected with a rich wheat and cotton district, Coringa and its port must rise into commercial importance. It is calculated that a single square mile flooded with salt water, with an evaporation of nearly two yards deep, will make about 140,000 tons of salt in a season, perfectly white, at a cost of 2s. per ton; and this prime requisite of Hindoo life might be sold in the interior, paying a Government duty of one pound per ton, for 25s., where, at present, dirty black salt sells at £8 per ton, the duty being £2 10s. In this district coal has been found; the supply of timber is unlimited, and iron ore of the richest quality abounds. All that is wanted are capital and skill to render the delta of the Godavery and the port of Coringa one of the most flourishing territories in the world.

India is an unbounded field of enterprise. The Western Irrigation Company is already in existence, and the Bombay Government has granted to them three-fourths of the increase of revenue from the lands irrigated. According to the estimates of Colonel Cotton* "this would have already realised to a company in the delta of the Godavery twenty-five per cent, while the works were yet in progress." All the evidence shows that hydraulic works in India afford a safer and more remunerating investment for capital than any railway in Europe; and, if by irrigation and canalisation we enrich the natives of India, we are opening up markets for our manufactures which can never be closed by hostile tariffs. Too little attention has been directed to this splendid country, whose immense population, industrially elevated, would prove more valuable customers to British trade than all other nations united with whom we at present hold commercial relations.

---

We stated last week, in anticipation of the terms on which the £5,000,000 Loan would be negotiated, that the Chancellor of the Exchequer, by postponing it from February, when he was urged to borrow all that he would want for the year, had saved the public 2 per cent on the whole sum. In fact, however, the Loan was on Monday negotiated on more favourable terms than we had expected, and the Chancellor has saved the public 3 per cent on the sum, or £150,000. The terms offered by the contractors were to give £100 in money for every £108 3s. in Consols, which, with the dividend from January, was nearly equivalent to Consols being at 92¾. But the Chancellor of the Exchequer's minimum was above this. He would give only £107 10s. 7d. in Consols for every £100 in money, equivalent to Consols being at 93. After a little consideration the Chancellor's offer was accepted, and he must be considered, although the scrip of the new Loan has since been at a premium of 2¼, to have made a very good bargain for the public.

PREPARATIONS FOR PEACE REJOICINGS.—The preparations at Somerset house, the Ordnance-office, Pall-mall, the War Department, Admiralty, Horse Guards, and other public offices, are on a most extensive and magnificent scale. In the City great activity prevails, and some hundreds of workmen are employed in erecting gas fittings at the Bank of England, the Guildhall, Mansion-house, East India-house, Custom-house, the halls of the various companies, and the establishments of banking and other companies. In anticipation of the immense concourse that will press into the Green-park, the authorities have deemed it advisable to form five additional openings into that park; three from Piccadilly—one opposite Devonshire-house, another facing Down-street, the third opposite Apsley-house, the fourth on Constitution-hill, facing the entrance to the park from Grosvenor-place, and the fifth near Buttery-house. Each of these is sixty feet in width. It being estimated that the quantity of gas which will be required on the night of the illumination will be nearly double that used on ordinary occasions, the various gas companies have made arrangements to preclude the possibility of there being any deficiency in that article on the night in question; and in the leading thoroughfares additional pipes are being laid down close to the kerb.

THE SONS OF THE CLERGY.—The 202nd festival of the Sons of the Clergy, which was instituted two centuries ago (in 1655), took place on Wednesday, in St. Paul's Cathedral. The anniversary was celebrated, as usual, by a full choral service—in which the choirs of her Majesty's Chapel Royal, St. Paul's, Westminster Abbey, and St. George's (Windsor) assisted—under the direction of Mr. Goss, organist of St. Paul's Cathedral. The members and friends of the corporation, to the number of about 150, dined together in the evening in Merchant Taylors' Hall, Threadneedle-street, under the presidency of the Lord Mayor. The society now assists annually, by pensions and donations, about 1200 persons, including clergymen, their widows, aged single daughters, and children. The total amount of voluntary subscriptions to the funds of the society during the year was £10,176, exclusively of the permanent income from real and personal property.

COLLEGE FOR THE BLIND.—A preliminary meeting, at which the Rev. DR. HUNDLE, of Liverpool, presided, was held on the 8th inst., for the formation of an institution in the neighbourhood of the metropolis, to be called "The College for the Blind." The principles of the foundation are to be those of the Established Church; but the specific teachings of the Church shall not be insisted upon in the case of pupils whose parents or guardians object to it; and that on Sunday the parents or guardians of such pupils shall be at liberty to send them to any place of worship they please. It is remarkable that, whilst there are several institutions of an eleemosynary nature for the blind of the poorer classes, there is no establishment where blind members of the independent classes can be sent as pupils. It is well known that the blind are very partial to the society of their fellow-sufferers, and it is believed that the proposed college would be of very great advantage to many families unable to provide a tutor for a blind child at home.

THE WOUNDED ITALIANS.—We are glad to find, upon inquiry at the Charing-cross Hospital, that the four Italians so seriously wounded by the assassin Foschini have, under the judicious care of Mr. Hancock, perfectly recovered from their wounds, and have left the hospital.

* "Profits upon British Capital expended on Indian Public Works, &c." By Colonel Arthur Cotton, late Chief Engineer of Madras. London: Richardson Brothers, Cornhill.

## MUSIC.

IN our last Number we recorded the auspicious reopening of HER MAJESTY'S THEATRE, and the triumphant début of Alboni; for in the light of a début her appearance, after so long an absence, may be regarded. On Thursday of last week she had another triumph as *Rosina* in the "Barbière di Siviglia"—a character suited in every respect to her powers both as a singer and an actress. She sings the music, which is written for a mezzo soprano voice, precisely as the composer has written it, and without resorting to those transpositions, alterations of passages, and other shifts by which the generality of singers who perform the part are compelled to resort. Her *aria d'intrata*, "Una voce poco fa," was an exquisite display of the most graceful and finished execution. The air which she introduced into the singing lesson—a pretty melody of Hummel's, with variations—was so marvellously brilliant, so full of life and original fancies, that it threw the house into a tumult of astonishment and delight. She was attired in a dark Spanish dress, which became her figure admirably, looked exceedingly well, and acted with lady like elegance and spirit—all that the character requires. She was called for between the acts and at the end of the opera, and cheered most enthusiastically. As a whole this most gay and agreeable of all comic operas was well performed—Calzolari being *Count Almaviva*, Belletti *Figaro*, and Lablache *Bartolo*. The first two were capital; the third was at least respectable. The "Barbière" has the peculiarity of having but one female character.

On Saturday night the "Barbière" was repeated with the same éclat as before; and on Tuesday *Adelina* appeared as *Amina*, in "La Sonnambula," for the first time in England. She has latterly, on the Continent, beaten herself to the performance of soprano parts; having, by assiduous application and practice, effected a great extension in the upper part of her voice, without, however, losing the beautiful low tones with which nature has gifted her. She has also entered upon a more ambitious career as an actress, essaying with success characters which demand greater dramatic power than she formerly seemed to possess. Of these characters *Amina* is one; *Leonora*, in the "Favorita," is another; and *Fidès*, in the "Prophète," is a third. *Amina* we have now seen, and the others we trust we shall see shortly. In the performance of this interesting heroine Alboni certainly showed qualities as an actress—the power of expressing feeling and even passion—for which at one time we should not have given her credit; but, dramatically speaking, she is certainly not equal to Grisi, Jenny Lind, Persiani, Sontag, and other favourite representatives of the part. Musically speaking, however, she is not surpassed by any of them, not even by Lind herself. Her soprano voice, so beautifully joined to her natural contralto register that it is impossible to perceive the slightest break in the continuity of her entire scale, gives her a compass almost unlimited; a power which she uses in the incomparable richness, variety, and originality of her florid embellishments. She sang the brilliant finale, "Ah, non giunge!" as no one has been able to sing it since the days of Malibran. At its conclusion the house rang with acclamations; and, when called upon to repeat it, she did so with new variations, still more rich and fanciful than before. The part of *Elvino* was well supported by Calzolari; and Signor Beneventano, one of the strangers, appeared to advantage in *Count Rodolpho*. His action was easy and gentlemanlike, and he sang the well-known air, "Vi ravviso," very beautifully.

On all the evenings we have mentioned the house was as crowded, and had as brilliant and fashionable an aspect, as on the opening night.

NOTHING in the way of novelty has recently been produced at the Royal Italian Opera. But the series of weekly concerts set going at the CRYSTAL PALACE is to be taken in connection with that theatre, for these concerts were originated by Mr Gye, with the view of enabling him to defray the immense expenses of his establishment, and thus to keep his company, orchestra, and chorus together. This object, we understand, he has accomplished for the present season. The whole musical strength of the Royal Italian Opera is engaged by the Crystal Palace Company, who receive the proceeds, paying Mr. Gye a certain fixed sum, of great amount and sufficient for his purpose; while the concerts promise to be a good speculation for the Crystal Palace shareholders. Twelve weekly concerts have been announced, and the first of them took place on Friday, last week. They are excellently got up; judicious provision having been made for the accommodation of the audience as well as the effect of the music. The orchestra is placed in front of the great curtain which divides the tropical department, with a proscenium, like that of a theatre; while the vast space in front of the orchestra is partly covered overhead with oiled cloth, which diminishes the echo, and favours the transmission of sound. The acoustical properties of this extemporised concert-hall are admirable. On the day above mentioned every note of the music distinctly reached the ears of an assemblage estimated at six thousand persons. There must necessarily be great sameness in concerts of this kind. As all the performers belong to the Royal Italian Opera, the music, of course, consists almost entirely of songs, concerted pieces, and choruses from the various operas performed at that theatre. To the regular opera-goers such performances cannot, in a mere musical point of view, have much attraction. They derive an additional interest, however, from the beautiful locality in which they are held; and moreover, the great bulk of the audience are by no means regular opera-goers; and things, to others trite and familiar, to them have all the freshness of novelty. At this concert Grisi, Jenny Ney, Mme. Masral, Didiée, Mario, Gardoni, Graziani, and Formès, sang many of their most favourite pieces, accompanied by the magnificent orchestra. The madrigal "Down in a flowery vale," was an exquisite performance, and was loudly encored. Mozart's aria, "Della sua pace," sung by Signor Gardoni, was also very effective; as was the scena from the "Freischutz" by Mdme. Jenny Ney. Mdme. Rosio displayed her powerful voice to advantage in the cavatina, "Ernani Involami;" and Didiée, Didiée, whose fine impersonation of *Orsini*, in "Lucrezia Borgia," is familiar to most opera-goers, sang the "Brindisi" with great éclat. One of the most refined performances, however, was the duet from "Linda di Chamouni," sung by Signor Gardoni and Mdlle. Graziani. The two voices mingled in the most charming manner, leaving the audience at a loss which to admire most—the pure and birdlike soprano of the one, or the rich tenor of the other. Signor Graziani gave his "Il Balen," which, as usual, was encored; and Mario, though not announced, sang the serenade from "Don Pasquale" in a delightful manner. The day (in the midst of a course of wet and gloomy weather) was bright and genial, and everything conduced to the general satisfaction.

BENEDICT'S ANNUAL CONCERT, at Exeter-hall, on Wednesday evening, was crowded to the doors with fashionable people, attracted by the never-failing magic of Jenny Lind's name. The prices being very high, the fortunate *bénéficiaire* must have pocketed a good round sum. The concert, however, might easily have been better. Madame Goldschmidt sang little, and what she did sing was not much calculated to bring out those powers of style and expression which are the great and peculiar charm of this incomparable artist. Her first piece was a duet with Belletti, composed by Benedict on Styrian airs; the second, a scena from Rossini's opera, "Il Turco in Italia;" and the third, Meyerbeer's little French duet, "La Mère Grand," which she sang with Madame Viardot. In all of them she sang with great brilliancy—her *tours de force* and feats of vocal strength were, indeed, often marvellous; and her efforts were rewarded with enthusiastic applause. There was a concerted piece for full orchestra; and instrumental solos were played on the piano, by Messrs. Goldschmidt and Benedict, on the violin, by Ernst, and on the violoncello, by Piatti.

A VOCAL AND INSTRUMENTAL CONCERT took place on Wednesday last at the Réunion des Arts, which was distinguished by a selection of classical music. The performances of Madame Mattmann, a German pianiste new to this country, occasioned great excitement. The audience were evidently unprepared for so brilliant an entertainment, and testified their admiration by unmistakable signs.

MADAME PUZZI'S ANNUAL CONCERT, at Willis's Rooms, on Saturday last, was, as usual, attended by a great assemblage of fashionable company; this lady having a very extensive connection, and being held in great esteem as an excellent vocal instructress. She was assisted by all the principal singers of Her Majesty's Theatre, together with several others. Mdme. Viardot, Reichardt, and several other eminent artists. Many beautiful pieces (chiefly from Italian operas) were sung, and warmly applauded.

## THE THEATRES.

ADELPHI.—A very pleasant little farce, called "A Bottle of Smoke," was produced at this theatre on Thursday night. *Lucy Morton* (Miss Wyndham) is the occupant of a room on the second floor in the neighbourhood of Soho, and gains her livelihood by painting flower pieces for sale in the bazaars. Her little room is the perfection of neatness, and her landlady, *Mrs. Brown* (Mrs. Stokes), gives her an excellent character before her introduction to the audience. *Mrs. Brown* has been invited to tea, and whilst arranging the tea things confesses to her dislike to some invisible minx who occupies her third floor. *Miss Merton* has (of course) a lover—*Mr. Edward Cambrison* (Mr. Wright), a well-to-do linendraper, and proprietor of Merino House. He is somewhat of a jealous temperament, and is slightly disturbed at the absence of *Lucy*, and on her return makes this feeling apparent to his lady-love. A little tiff ensues, and *Cambrison*, by way of atonement, runs off to Hanway-yard to purchase muffins. *Lucy* has a secret, and during *Mr. Cambrison's* absence she retires to her bedchamber, taking with her a favourite fuchsia—her room is filled with flowers—the first gift of *Mr. Cambrison*. Laden with muffins, *Mr. C.* returns; but his jealousy is again aroused by the smell of tobacco, and the distant glimpse of a stout gentleman entering the house of *Mrs. Brown* on a visit (as we afterwards learn) to the invisible minx aforesaid. *Lucy* re-enters, and *Cambrison* is becoming reassured of her fidelity, when, picking up the handkerchief of the lady, he detects the smell of tobacco. He becomes furious, and the lady indignant. *Lucy* leaves the room in a huff, and *Cambrison* retreats to the landing to await the egress of his rival. *Lucy's* secret is now revealed. She brings forth her pet fuchsia, which has appeared of late drooping and unhealthy; and, having consulted the editor of the *Gardener's Chronicle*, she is told that the disease may be arrested by the free use of tobacco. To preserve *Cambrison's* treasured gift she has purchased a cigar, and the use of this leads to an equivoque which very agreeably brings the "Bottle of Smoke" to a successful termination. Mr. Wright never acted better. He was very funny, and the grotesque tenderness which he displayed throughout was very amusing. *Lucy Morton* was admirably played by Miss Wyndham. There is a naturalness about the acting of this young lady which is very gratifying, and attention to the minor details of her characters which merits commendation; and we are glad to have the opportunity of declaring her complete success as *Lucy Morton*. The piece was put upon the stage with great care, and its reception on Thursday night must have been most satisfactory to all concerned.

CREMORNE GARDENS.—The new pictorial additions, and the amusements of the circus and ballet theatre, in these gardens, prove very attractive. The large building, 300 feet in length, is nearly completed in the Ashburnham grounds: here will be the American Flower Show, the plants for which cover nearly an acre of ground.

## NATIONAL SPORTS.

EPSOM and its great yearly problem, which is to be solved at three p.m. on Wednesday, for the seventy-sixth time since Sir Charles Bunbury led his Diomed back to scale, quite overshadows every other description of sport for the week. Oxford will have a busy bosting time of it from Monday till Saturday; the Royal Mersey Yacht Club will hold their opening trip on Thursday; and the M.C.C. and ground will play Kent, at Lord's, on Monday: but other important fixtures, aquatic and cricketing, there are none.

Lambourne is in the Woodcote Stakes at Epsom on Tuesday, in which Trieclor, Apathy, and Rohallion figure; but the other minor races at this meeting possess no great interest, with the exception of the Cup, where Sultan, Typee, Mangaree, Stork, and Saucebox are engaged, the Two-Year-Old Stakes, in which Madame Clicquot has 5 lb. extra; and the Great Surrey Foal Stakes, which includes Tyre, West Langton, The Prince, and Peter Wilkins in its ranks.

The Derby betting at Bath, which has always been to Epsom what Warwick was of yore to Doncaster, ran all in favour of Artillery and Coroner, while the support accorded to Wentworth and Fazzoletto was not very decided. If the weather takes up after this deluge of wet we shall have the ground in magnificent order, and already the good people of Worcestershire are beginning to see large green four-horse vans dashing over their crazy bridge, and reminding them that the great Surrey carnival is once more at hand. Although little can be known for certain before Tuesday, it does not at present seem likely that more than twenty-three out of the 213 nominations will descend in the awful Mr. Hibbard into the fatal glen. Taking them as they stand on the list we should select Sugarplum, Pretty Boy, Fly-by Night, The Courtier, Bird-in-Hand, West Langton, Fazzoletto, Artillery, Wentworth, Newington, Dundee, Prince, Puck, Rohallion, Ellington, Rogerthope, Mr. Verdant Green, Yellow Jack, Astrologus, Aleppo, Coroner, Cannobie, Vandermeulin, Early Morn, and Peter Wilkins as those who will compose the future field. Fly-by-Night and Fazzoletto reached Leatherhead on Wednesday night; and it is said that Nat and Bartholomew will ride them. Sim Templeman rides Cannobie instead of Bird-in-Hand, for whom he was originally engaged, as the party did not think he made enough use of the horse in the Two Thousand, and put up "Ben" at Chester in consequence. Vandermeulin is said to have been beaten in his trial with King of Trumps, we believe that it *may* be arranged for Job Marson to ride Bird-in-Hand, and Joe Dockeray Vandermeulin. George Oates will, of course, be on West Langton; Basham on Artillery; T. Sherwood on one of Mr. Drake's horses (about whose relative goodness there is much reserve), and perhaps Sly on the other; Wells on Coroner; probably John Mann on Mr. Verdant Green; Aldcroft on Ellington; Alfred Day on Wentworth; Sam Rogers, we believe, on Rogerthope; and Ashmall on Peter Wilkins.

Newmarket sends only one horse; to wit, the "great mystery man," Mr. Verdant Green, who many declare is certain to immortalise Cuthbert Bede's works in the Epsom beta-roll of winners. He looks well, and has been kept in work in secret; and in the absence of a regular trial they have had a most satisfactory "dust-up" among their string, which is said to have given Messrs Hobson and Goodwin the highest hopes, especially as the field is so moderate this year. Fly-by-Night is also in capital form, and we still think that he will be John Scott's horse on the day, and that the commoner will beat the peer of that ilk in their places. Wentworth impresses us with strong Dervish ideas; and, as they have really nothing good at Danebury to try him with, we feel a presentiment that his trial will prove a mere Coldrenick one. His race, like that of Cannobie's at Newmarket, is a bad omen for his backers. Yellow Jack can stay for a week, but he has no speed; and Coroner is, we should fancy, rather small for his work, although we have seen a "Little Wonder" and "Velocipede pony" win here. Artillery we have never liked, and he, too, has no trial horse; while we have reason to think that Newington will be Mr. Gratwicke's chosen one. Bird-in-Hand is the most racing-looking animal of the lot, and has been backed of late in his favour; and hence, if the ground continues sound, there are many things which would surprise us less than seeing him just turn the Ascot table on to Fly-by-Night.

Scarcely a bet has been laid on the Oaks; and if, out of the 137, Irishmadeina (Nat), Mary Copp (Bartholomew), Olleaflus, Flyaway, Kalipyge, and Mincepie (with A. Day on the best), one of Mr. Howard's (Wells), Byrsa, Tyne (G. E. Sharp), Bonner and Buxom, Comedy, and four or five others appear at the post, it will be about the mark. Still, although we have to wait for the long climes of Mary Copp, the 2400-guinea mare, has made the race such an utter toss-up that the field may be a very large one. We expect no medium in it, seeing that, as things now stand, the £8800 or so may be destined for some owner who really never dreams of having anything more than a very third-rate filly in his stable. If ever there was a year in which an owner ought not to grudge an extra £40 to take his filly to Epsom, and pay a "pony" and a jockey for a start, that year has clearly arrived.

BATH AND SOMERSET COUNTY RACES.—TUESDAY.

Lansdown Stakes.—Curious, 1. Romeo, 2.
Three-year-old Biennial Stakes.—Stork, 1. King Cob, 2.
Two-year-old Biennial Stakes.—Lambourn, 1. The Vigil, 2.
Somersetshire Stakes.—Orva, 1. Alonzo, 2
Members' Plate.—Freckles, 1. Wantage, 2.

WEDNESDAY.

Aristocratic Handicap.—Sirocco, 1. Anthracite, 2.
Western Stakes.—Curious, 1. The Dingo, 2.
Bath Handicap.—Speed the Plough, 1. Alonzo, 2.
Grand Cup.—Sheridan, 1. King Cob, 2.
Shoots.—Heats 2, 1.
Dynham Park Handicap.—Romeo, 1. Curious, 2.

TATTERSALL'S.—THURSDAY.

EPSOM DERBY.—8 to 1 agst Wentworth (taken), 8 to 1 agst Fazzoletto (taken), 10 to 1 agst Cannobie (offered), 9 to 1 agst Artillery (taken), 11 to 1 agst Vandermeulin (taken), offered), 12 to 1 agst Coroner (offered), 16 to 1 agst Fly-by-Night (offered), 20 to 1 agst The Prince (taken); 30 to 1 agst Ellington (taken); 40 to 1 agst Verdant Green (taken); 50 to 1 agst Puck (taken); 100 to 1 agst Rogerthope (taken), 1000 to 15 (allowed) against Aleppo, 1000 to 10 agst Peter Wilkins.

## PICTURE SALE AT MESSRS. CHRISTIE AND MANSON'S.

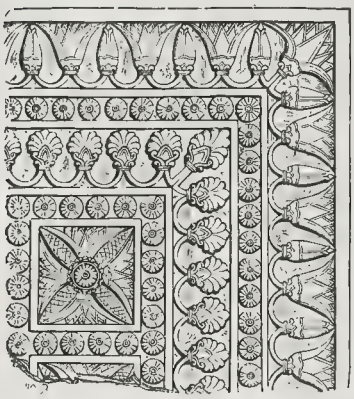
THE scene engraved upon the next page is one of the great attractions of every London season; for to the man of art, letters, and leisure, "Christie's" is as much a national establishment and favourite lounge as the Royal Academy or the Opera. We are compelled, by pressure of the week's news, to defer until next week an historical *resumé* of the important collections which have been dispersed in the room in King-street by Messrs. Christie and Manson, and by their predecessors. We shall add, at present, that the accompanying Illustration has been recently sketched, and contains portraits of well-known *habitués* of the rooms.

PICTURE SALE AT MESSRS. CHRISTIE AND MANTON'S, KING-STREET, ST. JAMES'S.—(SEE PRECEDING PAGE.)

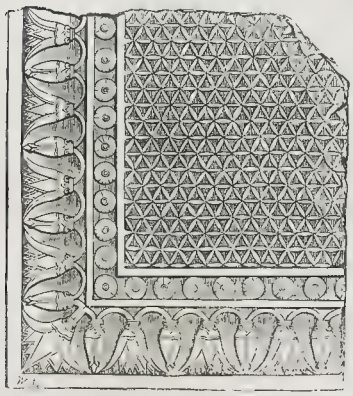
## THE BRITISH MUSEUM.

### ADDITIONS TO THE ASSYRIAN SCULPTURES.

ANOTHER fine collection of Assyrian sculptures has arrived in England, and has been deposited in the British Museum. A portion only of them is now exhibited, but arrangements are in progress to admit the public into the cellars where they must remain until a becoming gallery is provided for them. They consist of about seventy slabs, chiefly selected from the North Palace at Kouyunjik, discovered in 1854 by Mr. Hormuzd Rassam, the companion and friend of Mr. Layard. It must be not a little gratifying to that pioneer of Assyrian research to find, through his example, an Oriental—generally indifferent to all works of art—so thoroughly interested in the undertaking, and impregnated with the English energy to carry his individual labours to a successful conclusion. In 1852 Mr. Rassam was appointed by the Trustees of the British Museum to take charge of the excavations at Nineveh, and returned once more to Mosul. The difficulties he had to encounter were by no means slight. For several years his predecessor had tunnelled through the most promising spots of the Assyrian mounds, and accumulated the works which have astonished and gratified the English nation. If success attended



PAVEMENT SLABS FROM ASSHUR-BANI-PAL.



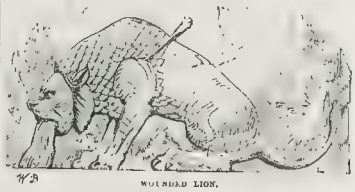
the new expedition, the result would have been received as a natural consequence; but, if unsuccessful, no amount of energy, perseverance, or labour would have shielded the conductor of the expedition from undeserved blame, more freely bestowed, too, perhaps, because he was a foreigner in an English man's position. And yet the discoveries are in a great measure the result of good fortune, which no intelligence can command. The appearance of the mounds is nearly uniform. There are but slight undulations on the surface—sometimes, it is true, indicating the position of the ancient remains beneath, but as often leading the explorer to extensive barren operations. We may likewise rest assured that Mr. Layard had previously profited by every hint which the appearance of the ground afforded. The site of the Northern Palace whence these, the finest sculptures, have been procured was the lowest and the least-promising part of the mound. It had been long ago tried by Mr. Layard, who only came upon a drain, and then abandoned the trench. At the commencement of his labours Mr. Rassam cut several trenches there; but, finding no trace of sculpture, considered the excavation of it useless, and removed all his workmen to the southern part and centre of Kouyunjik, and to the large mound of Nimroud; meanwhile the second French expedition at Khorsabad had discovered scarcely anything but plain mud walls, human-headed bulls, and small metal articles; and M. Place, wishing to possess for the Louvre a collection of smaller and more varied sculpture, Sir H. Rawlinson, with liberality which does him honour, transferred to him the whole of the northern portion of Kouyunjik. M. Place was prevented by circumstances from availing himself of the offer, and confined his operations to Khorsabad. Mr. Rassam for months unceasingly exerted himself, but found nothing to return the nation for the money it had granted until three months before his appointment ceased, when, almost in despair, he tried once more an old abandoned trench on the north side of the mound. He had not proceeded a yard before he came upon the first of a series of chambers and passages lined with the most exquisite bas-reliefs which have yet reached England. With redoubled energy he prosecuted his work, and previous to leaving Assyria he had the satisfaction of uncovering what then appeared the whole of the palace of Assur-bani-pal, the grandson of Senacherib, and to pack and dispatch to England a selection, made by Sir H. Rawlinson, from the best fruits of Assyrian sculpture. Until the arrival of the slabs in England there was little chance of Mr. Rassam's exertions being appreciated, and, now that they have reached us, he is far away on the shores of the Red Sea. We, therefore, more readily bear testimony to the value of his services, and record our gratification, for his sake, as well as for the nation's, that success at last rewarded his perseverance and dispelled the anxiety which he must have suffered during so many months of discouraging labour.

The slabs from the walls of the North Palace are less injured by fire than those of the other palaces; the sculptures are in higher relief, more elaborate and diversified. We have a continuous series, with but one break, of twenty-three slabs, depicting a Royal Lion hunt. The animals are portrayed in every variety of posture, and are sculptured with surprising vigour. In one case the lion has sprung upon the King's chariot, and, foiled in his revenge, madly grasps in his terrible jaws the chariot-wheel, while the King, guarded by spearmen, dispatches him. On other slabs the lions are spread about in various attitudes of lingering agony, pierced to death by the Royal huntsman. A lioness is most beautifully portrayed resting on her fore paws, with outstretched head, vainly endeavouring to gather up her wounded limbs. Several lions are shown, bristling with arrows, vomiting blood (see Engraving). There is a very vigorous scene of a lion at close quarters with the King, who stabs him in the throat with a dagger. We find also in these sculptures good evidence that the Kings of Assyria were not genuine hunismen. They did not seek the lion and hunt him in his own jungle, but had him trapped and reserved for special occasions. A cage containing a lion is shown on one slab, surmounted by a small box holding a man, whose office it was to raise a sliding door, and afford egress to the lion. At the opposite end of the cage is a bar, like the pole of a carriage, to which beasts were doubtless harnessed to drag the "sport" to some convenient spot, where, surrounded by double lines of spearmen and dogs, shown on these slabs, the King, with little danger, let fly his arrows at the noble beasts.

THE KING IN HIS CHARIOT.

On three slabs an Assyrian campaign against some nomadic tribe is delineated. The Assyrians are attacking their encampment, setting fire to their tents and people, and carrying off the women captive. The Arabs wear no head-dress, and simply a cloth round their loins. They ride on dromedaries, and are easily distinguished from their conquerors. Seven other slabs of this series were made over to the French, and now lie perishing at the bottom of the Tigris. Three continuous slabs represent architectural subjects—a triple wall, with crenelated battlements; a temple, with its columns resting on the backs of human-headed bulls and lions, or dogs, &c. In some instances the bases of the columns are large sculptured forms mouldings, precisely similar to those found in the North Palace at Kouyunjik, at Khorsabad, and at the South-West Palace at Nimroud. The capitals are much decayed, but resemble two Ionic capitals, one surmounting the other. Various conjectures have been started as to the materials of which the original columns were composed. It is generally supposed to have been wood, which was consumed by the fire, or has rotted away since the destruction of the palaces. It was difficult, however, to reconcile the inferior appearance of this material with the marble-lined walls. M. Place lately discovered at Khorsabad, near a pair of these vases, a roll of thin copper, which may remove the difficulty we have mentioned. In its decoration is imitated the trunk of a palm-tree. Close beside it he found some scraps of thin gold, which fitted exactly over the raised ornament on the copper. It seems probable, therefore, that the wood columns were coated with the latter metal to receive a thin covering of fine gold—(He overlaid the posts with fine gold—II. Chronicles iii, 7).

One of these architectural slabs portrayed a viaduct over a stream, consisting of three arch-shaped, pointed openings, but they are not arches, having no radiating points or voussoirs. They are formed by horizontal courses projecting beyond each other as they rise, as in the Treasury of Atreus at Mycenæ. The truly formed arch was, nevertheless, known both to the Assyrians and Babylonians, and still exists perfect at Khorsabad and Mughyer, Lower Chaldea, in a building erected some 1000 years B.C. On the same slab is represented an altar and a memorial statue very similar to that found in the South-East Palace at Nimrood, which also forms part of the present collection. There are likewise four interesting slabs portraying a garden containing an African, with feathered head dress, leading a tame lion, and surrounded by many curious botanical specimens. We have engraved two of these slabs. A lion and lioness are depicted amongst various trees and flowers. There is a palm-tree with its characteristic trunk:



WOUNDED LION.

the grape-vine climbs round what we should imagine to be a fir-tree, were it not that none grow even in the mountains adjoining Nineveh, much less in the vicinity of the date palm. In another room in this Northern Palace the sculptures recorded the Conquest of Susiana. Half of the slabs relating to it are now in the British Museum, the remainder are with the ill-fated French collection. We have selected a specimen of this series. It is most elaborately cut, and full of rich detail. The King is in

MODERN CHALDEAN AND ANCIENT ASSYRIAN.

PART OF THE GARDEN.

his chariot with two attendants—one driving, the other holding an umbrella. An attendant walks by the side, and two more follow with fans. Four or five pavement-slabs are exhibited in the small room adjoining the Assyrian Gallery in the British Museum. We have engraved two specimens. They are admirably cut, and the relative proportions of the different ornaments well studied.

Shortly before Mr. Rassam left Assyria he discovered also the entrance to the South-East Palace at Nimroud, where are the two colossal statues which we have already engraved (ILLUSTRATED LONDON NEWS, Nov. 3rd, 1855). Here he also found the statue of the god Nebo, bearing across its breast an inscription, stating that the statue was executed by a sculptor of Calah (Nimroud), ordered by Ishak-Nebo, Governor of Calah (Pul), King of Assyria, and to his lady. *Summuram i*, Queen of the Palace.

In Mr. Layard's valuable "Handbook to the Assyrian Court of the Crystal Palace" he notices a similarity between the Chaldean language and that of the ancient Assyrians:—"A corrupted dialect of the same tongue is still spoken by the Nestorian Chaldean tribes who inhabit the mountains of Kurdistan and the neighbourhood of the ruins of Nineveh." It has frequently been remarked that the modern Jehab tants of Nubia closely resemble those depicted on the Egyptian walls. Not less remarkable is the likeness between the modern Chaldeans and the old Assyrians. To il nstrate this perfectly we give, side by side, sketches of a Chaldean merchant of Mosul, and a head from one of the Nineveh sculptures.

Besides these Assyrian slabs there has likewise reached England a collection of Babylonian antiquities, collected by Mr. Loftus, for the Assyrian Excavation Fund, and in a few months we may expect the concluding cargo of Assyrian sculptures—those found by Mr. Loftus, in a distinctly separated portion of the North Palace, and the inscription on by that gentleman from the Sennacherib bulls recording the Assyr an campaign against Hezekiah.

*The range of temperature during the week* was 31·0°.

*The Weather.*—On the 14th and 15th, rainy; 16th, fine; 17th, rainy afternoon; 18th, showery; 19th and 20th, very fine.

*The direction of the wind* was—on 14th, S.S.W., became S. at 5 a.m., S.S.E. at 8 a.m., W. at 10 a.m., W.S.W. at 1 p.m., W.S.W. at 2 p.m., W. at 3 p.m., W. at 12 a.m. on 15th S., at 8½ a.m., S.S.W., at 10 a.m., W., 1 p.m., N.W. at 8 a.m., N.N.W. at 11½ a.m., W.N.W. at 12½ p.m., N.W. at 2½ p.m., W. at 6 p.m., N.W. at 8½ p.m., W. at 10½ p.m. ——, W. at 2½ a.m. on 17th, S.W. at 6½ a.m., S. at 9½ a.m., S.W. at 1½ p.m., W. at 1½ p.m., S.W. at 6½ p.m., S.S.W. at 8 a.m. on 18th, S. at 8 a.m., S.W. at 10½ a.m., S. at 10½ a.m., S.S.W. at 11½ a.m., W. at 5½ p.m., N.W. at 10½ a.m. on 19th, W. at 6½ p.m.; S.W. at 4½ m. on 20th, S.S.W. at 8½ p.m., and S. at 9½ p.m. On the 14th, 17th, and 18th, much negative electricity during the remainder of the week, positive. Hailstorms on the 14th, 17th, and 18 h; thunder on the 14th, 16th, and 17th. A mock moon at 2 32 a.m. on the 19th; a solar halo on the 17th; and a lunar halo on the 20th.

On the 18th, violent S.W. gale from 11½ a.m. till 5 p.m.; then the gale became W.; ceased at 8½ p.m. Most violent at 2 p.m., being 10½ lb. on the square foot.

E. J. LOWE.

EXTRAORDINARY STATE OF THE WEATHER.—The tops of several mountains in the Dublin and Wicklow range are now covered with snow. On Saturday last the weather was very severe, several heavy showers having fallen in rapid succession. A tremendous flood rolled down the Liffey near its source, between one and two o'clock, and it was computed comparatively little rain had fallen during the morning. The flood spread over the fields in the neighbourhood of Kilbride, and soon dispersed the anglers who had collected in considerable numbers along that beautiful stream.

ALTAR-CHAIRS FOR MANCHESTER CATHEDRAL.—Two elaborately carved oak altar-chairs have just been presented to this cathedral church, by William Andrews, Esq., of Elm Tree Farm, Pendleton, near Salford. Decorated; portions being copied from examples in Canterbury and Winchester Cathedrals, and ably executed by the Patent Carving Company at Lambeth. Which last-named firm has also presented an altar-cloth of crimson velvet, with the sacred monogram embroidered in the centre.

THE CHEAP NEWSPAPER PRESS.—Upon the repealing of the newspaper stamp duty several cheap daily newspapers were printed and issued in Nottingham. In a short time most of them declined; not even the great interest attached to the war in the Crimea could keep them alive. The most spirited paper, however—the *Daily Express*, as it was called, published at a halfpenny—survived, and was printed daily until Wednesday last, when it also died.

THE SUNDAY MUSIC QUESTION IN LEEDS.—Several gentlemen at Leeds last week organised themselves into a committee to provide Sunday music for the people on Woodhouse Moor; and, the expense having been speedily guaranteed by private subscription, a placard was issued on Saturday announcing that the band would play on the moor on Sunday afternoon, and continue to do so on each succeeding Sunday until further notice—*Manchester Guardian*. The *Leeds Mercury* of Monday contains a long article from Mr. Edward Baines, assigning four reasons, in large type, against the proposed performance; and entreating the promoters to "relinquish an intention which appears to have originated in a resentful hatred and wilful opposition to the cherished rights of great numbers of their fellow-townsmen."—[Woodhouse Moor is a large piece of open ground, known as the "lungs of Leeds," situated about two miles from the town, and a favourite place of resort among all classes of the inhabitants.]

## *NAVAL AND MILITARY INTELLIGENCE.*

UPWARDS of 200 labourers were last week discharged from the gun-factory department in Woolwich Arsenal.

THE Russian trophies have been removed from the Dial-square of the Arsenal at Woolwich, and stored. The guns are to be cut up, and, after going through a certain analytical process, will be smelted and mixed with British gun-metal for casting purposes.

AN order from the Horse Guards has been read to the whole of the troops belonging to the provisional battalion at Chatham, three successive parades, inviting candidates for the corps of Permanent Instructors in Musketry, in accordance with the regulations published some time since by direction of Lord Hardinge.

ORDERS have been issued by the Adjutant-General to commanding officers of regiments of Militia to send a return of the exact state of the corps at the time of its disembodiment, and all books received from any public department, relating to the custody of the Adjutant. It is intended to commence the reduction by the disembodying, without delay, of the several Scotch regiments.

THE Adjutant-General, by a circular to commanding officers, has authorised extra practice ammunition at the rate of six rounds per man, per annum, for the purpose of promoting emulation between individual companies and regiments by shooting matches for prizes.

THE steam gun-boats at Devonport are to be fitted with suitable spars and sails for a sea voyage, to render them independent of steam; and it is said they are to take an experimental cruise in the Channel.

The *Cadmus*, 20, one of the new class of steam screw-corvettes introduced into the navy, was launched on Monday afternoon, at Chatham dockyard, in the practice of ancient custom of spectators. This vessel was laid down exactly twelve months ago, and has been built under the direction of Mr. F. J. Laire, master shipwright, under the superintendence of Sir Baldwin Walker, C.B., surveyor of the navy, and his sub surveyors. Her armament will consist of twenty 8-inch 60 cwt. gun nine feet in length, and one 68 pounder, of 95 cwt. and ten feet in length. She is to be immediately fitted for sea.

The Lords of the Admiralty have instructed the Commandant of the Royal Marines at Woolwich to assemble a board of officers, for the purpose of making such arrangements as they may see fit for placing the marine canteens on the same footing as those of other branches of the Army—namely, to discontinue the sale of spirits and have a fixed weekly rent, instead of the present privilege money for every ten men per month.

## THE TRIAL OF WILLIAM PALMER.

*(Continued from page 547.)*

### THE DEFENCE.

Mr. Serjeant Shee then addressed the jury for the defence. He said that only once before had it fallen to his lot to defend a fellow-creature on trial for his life. Such a task was calculated to try the coolest temper, and he was conscious of the greatest terror of mind lest any part he might consign the prisoner to a murderer's death and to public ignominy. It would be useless for him to conceal what they knew perfectly well, and which all their endeavours could not banish from their minds. They knew that during six long months an opinion had prevailed that John Parsons Cook had died from poison, and that the people had come to the conclusion that he died by the hands of the prisoner. The authorities had felt so much alarm lest popular prejudice might render the trial unfair to the prisoner, that an Act of Parliament was passed, at the instance of the Government, bringing the trial before the fairest possible tribunal, and placing it in the hands of the law-officers of the Crown, instead of leaving it in private hands. Everything which the Legislature and the law-officers could do to secure a fair and impartial trial in this case had been done; and, if justice should fail, it must be upon the law and the jury. He had no doubt that the jury would give a calm attention to the case, and be entered upon the discharge with the most decided conviction that truer words never were spoken than when the prisoner at the bar said "Not Guilty." He thought he should be able to prove this by grappling with the prosecution at every step, and he would not leave unnoticed a single point adverted to by the Attorney-General. The ground taken by the prosecution was that Palmer prepared the body of Cook for death by the administration of antimony, and then dispatched him by the more fatal poison of strychnine. Before, however, he proceeded to grapple with the case of the Attorney-General, he wished to return to its proper place in the discussions a fact which, though it did not conceal d by the Attorney-General, had been thrown too much into the shade; viz., that strychnine was not found in the body of John Parsons Cook. If he died from strychnine he died between two hours and three

to him for that which he was doing so openly. Before he concluded he had to make an observation with reference to the note-book of Palmer which had been brought forward, containing his remarks on strychnine. This book had been Palmer's when a medical student, and on it he (Serjeant Shee) had found something in the prisoner's writing which had had great weight with him. He had no doubt that the jury would agree with him in believing that a man who was firmly and fondly attached to a young wife had in that affection the best safeguard and antidote against crime. That William Palmer was such a man seven years ago, faithfully and fondly loving his young wife, was proved by a short note written in this book, which was as follows—

Dear Anne, I snatch a few moments from my studies in order to write to your dear, dear, little self. I need scarcely say that my greatest inducement to pursue my studies is, that I may shortly be able to press your dear form to my arms. Your ever affectionate WILLIAM.

A note in this book had been made use of to show that the prisoner was a savage, heartless desperado, and he (Serjeant Shee) had made use of it to show that he was a man who loved his wife for herself with a pure affection, in which, as he had said, he possessed the best safeguard and antidote against guilt. On the evidences laid before them they would not believe him guilty. They must also not suppose he was deserted by his friends in the hour of dreadful trial; his brother had nobly stood by him, and his aged mother and sister were anxiously awaiting their verdict. He trusted the jury would retire with minds to a capacity to estimate the high duty which they had to perform. If they believed him guilty, they would then have to give a verdict for the Crown; but, they might depend upon it, the time would come when the prisoner's innocence would be proved, and they would then deeply regret not having given due consideration to his case.

The learned Serjeant then resumed his seat, having spoken for seven hours and a half.

The prisoner during the delivery of the address appeared eagerly to watch its effect on the jury, and showed some signs of emotion when allusion was made to his wife.

The court adjourned at ten minutes past six o'clock until next day.

THURSDAY.

Mr. Thomas Nunneley was called and examined by Mr. Grove, Q.C. He said he was a Fellow of the Royal College of Surgeons, and Professor of Surgery at the Leeds School of Medicine. He had been in practice twenty-five years, and had a large practice. He had seen cases of tetanus, both idiopathic and traumatic, in the course of his experience. He had heard all the medical evidence given in the case of Cook. Judging from the symptoms described, he was of opinion that Cook's death was caused by some convulsive disease. Supposing death to have been caused by a dose of strychnine not more than sufficient to cause death, it would have been detected in the system by proper analysis. No amount of putrefaction would destroy strychnine, and to say the substance was indestructible would be within ordinary bounds. Upon an empty stomach the action of strychnine would be quicker than on a full stomach.

[We shall give a full report of the remainder of the trial next week.]

THE ILLUSTRATIONS

The road to Rugeley from the railway-station separates the two Churches of Rugeley. The Old one, on the right hand, is a picturesque ruin, adjoining which is the residence of Mrs. Palmer. On the left, and facing the Old Church, stands the New Church; and near the entrance of the churchyard is the Grave of Cook, with nothing to denote it but the mound of earth, shown in the foreground of the Engraving under the shade of the small yew-trees. In the background is the Old Church, in the square tower of which was deposited the body of Cook when it was exhumed for the purpose of further examination. The Grave of the Palmer Family is situated at the back of the Church. It is a plain stone vault, surrounded by iron railings, as shown in the Engraving. It is the grave in which Mrs. Palmer was buried.

Passing the Talbot Arms Inn, in the direction of the Townhall, and taking the first turning to the left, you come to what was the Post-office, kept by Mr. Cheshire, situated in a long street of houses, nearly all of the character of the one shown in the Engraving.

The accompanying Sketch of the town of Rugeley was taken from the railway-line. The hill to the left is called Style-coppice, and at the other side of it is Brandecott, the seat of the Marquis of Anglesey, who is at present lord of the manor of the celebrated Cannock-chase, a wild tract of country about 20 miles in length and from one to seven in breadth; it was formerly a hunting-ground for, and belonging to, the old Bishops of Lichfield; this is to the south west of Rugeley, and about one mile in extent. The Trent winds along at the bottom of the railway. To the north-west is Shugborough, the seat of the Earl of Lichfield; and to the north is the park of Lord Bagot.

*METROPOLITAN NEWS.*

Female Servants' Home.—The twentieth anniversary of this excellent society was held at Exeter Hall on the 15th inst. The chair, in the absence of the Earl of Effingham, was taken by the Rev. Joseph Brown. The report, read by the Secretary, recommended twenty-one servants for rewards, having continued their years of service with the same situation: seventeen, bible and sovereign, for three years and upwards; prayer-book and society's certificated testimonial to two, for six years and upwards; and to two the society's silver medal, for nine years and upwards. The report stated that 410 inmates had been received into the Home during the past year, making a total of 6409; and that 3014 had registered free of expense 45,275 since the establishment. One hundred and eighty servants attended the annual tea-party.

Health of London.—In the week ended on Saturday the deaths of 1094 persons, namely, 538 males and 556 females, were registered in London. In the corresponding weeks of ten years, 1846-55, the average number of deaths was 1003; which, if raised by a tenth part for comparison with the deaths of last week, which occurred in a period of population, becomes 1122. It appears that the rate of mortality last week was slightly below the average. Last week the births of 859 boys and 801 girls, in all 1656 children, were registered in London. In the ten corresponding weeks of the years 1846-55 the average number was 1497.

The Licensed Victuallers' Asylum.—The twenty-eighth anniversary festival of this asylum was held at the Highbury Barn Tavern, on Wednesday; John Johnstone, Esq. (of the firm of Messrs. Charrington and Co.) in the chair. The festival was attended by nearly two hundred of the licensed victuallers' trade. From the report it appears that since the last festival, during the past year, contributed to the funds of the asylum. At the general meeting the business of the institution there received a portion of which had been added to the sum already deposited in the funds of brewers at 5 per cent interest, making the money to receive, up to the present time, amount to £12,000.

Society of Friends of Foreigners in Distress.—The grand public festival of the benevolent society, engendering, society took place with considerable eclat at the London Tavern, on Wednesday evening. Basil Cripps, Q.C. occupied the chair; and near him were seated the Earl of Harrowby, Lord Robert Grosvenor, M.P., Right Hon. H. Labouchere, the Chevalier Bottier, the Swedish Consul, the Tuscan Consul, and many other distinguished foreigners and Englishmen. Upwards of £3000 was subscribed in the course of the evening.

Royal Medical Benevolent College.—The governors and friends of this excellent institution assembled in large numbers on Tuesday last to elect six pensioners and six foundation scholars. The event excited great interest among the governors from the large number of applicants to fill the vacancies. There being sixteen widows and forty-four orphan children, much regret was generally expressed that the funds of the institution did not admit of a larger number being immediately elected. The chair was occupied by the noble President of the College, Earl Manvers, who has always evinced the utmost anxiety for the prosperity of the institution. On Thursday the prizes were awarded to the pupils who had distinguished themselves by the Lord Bishop of Winchester.

The Peace Society.—On Tuesday evening the anniversary of the Peace Society took place at the Finsbury Chapel. Mr. Hindley, M.P., in the chair. The attendance was very small. The report stated that 160 meetings had been held during the year, and 200,000 publications circulated. The receipts had been £1678, and the expenditure about £1300. The Rev. J. Burnet, Mr. E. J. Collins, Mr. J. Sturge, and the Rev. A. O'Neal addressed the meeting, and, a collection having been made, the proceedings terminated.

A Public Library for Paddington.—A public meeting of the ratepayers of Paddington was held on Monday evening, for the purpose of considering a proposal for the introduction of the Public Libraries Act into the parish. A rate of a halfpenny in the pound for the first year and a farthing in the pound afterwards would be sufficient for the purpose. Colonel Sykes moved that a free public library be established. The Rev. Mr. Boone opposed the proposition as needless and unexpedient. Beresford Hope supported the motion, and after some other speeches and considerable noise and confusion the motion was declared to be lost, as two-thirds of the ratepayers present did not support it, in accordance with the terms of the Act.

Royal Geographical Society.—The anniversary meeting will be held on Monday next, the 26th inst., at one o'clock p.m., when the President, Admiral Beechey, will present the founder's gold medal to Mr. Dallas, the American Minister, on behalf of Dr. Kane, of the United States; and the patron's gold medal to Dr. Philip Barth, of Hamburg. The President will then deliver the annual address on the "Progress of Geographical Science and Discovery." The anniversary dinner will take place in the evening, at seven o'clock precisely, at the Freemasons' Tavern.

TOWN AND TABLE TALK ON LITERATURE, ART, &c.

There is a picture bill before Parliament (introduced on Monday night) which if carried will, in its working, prove injurious to the Gallery it is designed to assist. It is called "A Bill to Extend the Powers of the Trustees and Directors of the National Gallery, and to authorise the Sale of Works of Art belonging to the Public." By this bill Sir Charles Eastlake and the trustees may at once transfer to Christie and Manson's rooms, for sale by hammer, any pictures or pictures given to the nation by Sir George Beaumont, or any picture or pictures given to the nation by Mr. Vernon. As soon as the bill has passed they may, in their infinite wisdom, sell the very three pictures bequeathed to the nation by the poet Rogers. No, no, what will be the effect of this? People will not make requests that may be sold to-morrow. Those making their last wills will be shy of leaving pictures to the caprice of half a dozen trustees and one director, and that director all-powerful. A director only loving Dutch art would sell the Italian school to get money to buy more Dutch pictures. King George IV., Lord Farnborough, and Sir Robert Peel, who only cared for Dutch and Flemish pictures, would have sent Titians and Tintorettos to the nearest auction mart. Mr. Lord and Mr. Sterling would (perhaps) overload us with Velasquez and Murillo. Mr. Ruskin would overwhelm us with the Venetian school. Mrs. Jameson would give us ten thousand virgins, all anterior to Raphael. Mr. Cuningham and Mr. Morris Moore would quarrel about what should be, and what should not be, sold. Lord Stanhope would be inclined to overstock us with portraits of British worthies. Poor Sir Charles Eastlake! As if he has not enough already to irritate him in connection with his office in the National Gallery! Here, however, is a new subject of annoyance. More Morris Moores (if this bill is passed) lie in wait for you, Sir Charles!

The bill, it is said (for it is much canvassed), might have a good effect if it was strictly limited to the sale of pictures acquired by purchase, together with the right of transfer of gifts and bequests to Government galleries in Edinburgh, Dublin, Manchester, Liverpool, &c. It is desirable, certainly, to sell the so-called Holbein. It is perhaps desirable to get rid of the new Paul Veronese. But we confess we should be sorry to see any one picture presented to the nation by Sir George Beaumont or Mr. Vernon exposed for sale to the highest bidder.

Less than fifty years ago and the majority of the members of the Royal Academy would have voted that Hogarth was not a painter, and that the "Marriage à la Mode" (that wonderfully *painted* story) was unsuited for a National Collection. Fuseli called Wilkie a pot-and-pan painter. Sir Martin Archer Shee, as President of the Royal Academy, recommended Lord Grey not to purchase the Lawrence collection of drawings; and thus that storehouse of the *first* thoughts of the greatest painter was lost to the nation. Fifty years ago and the Trustees of the British Museum had the power of selling duplicate books. Now they have not the power—and why? It was found that they had sold very rare books, in matchless condition—part of the old Royal Library of the Kings of England of which they had no duplicate, and of which in some instances they have even now no copy at all. We repeat that we only utter a very general opinion when we express a hope that this bill will not in its present shape be allowed to become the law of the land. Rumour speaks of more than one well-known collector who has sent for his solicitor to amend his will, that what was meant for the nation will now be given—like Doncaster Berry—to Oxford, and not to the British Museum; or, like the Standish collection, cross the Channel and adorn Imperial Paris.

Sir Joshua Reynolds' famous picture of "Puck," which the nation shamefully let slip, was bought by the sole survivor of the many sitters to Sir Joshua. Appropriately enough, the noble purchaser, and the last of the sitters to our noble painter, was in the room when the picture was knocked down to him. Lord Fitzwilliam remembers *standing* to Sir Joshua, and whoever has been at Wentworth House will never forget the exquisite portrait of the graceful boy no more than they will forget those noble twin-portraits on one canvas of Strafford and his secretary. "Puck," neglected by the trustees of the National Gallery, is now one of the many glories of the mansion of an English nobleman.

There is a little (unnecessary) envy expressed about a recent purchase of classic ground—ground made classic (outside of Eton and Harrow) by no less a person than William Shakspeare. On what was once the high road and direct line from Dover to London, may be seen a very sensibly-built, cozy, unpretending red-brick house (of the Queen Anne period), with lawn in front—a haha—some cedars (that Evelyn would have loved), and a little timber, barely enough to find wood for an outrigger on the Thames above Putney. Shakspeare is said to have given to the ground on which this unpretending brick-built dwelling stands an interest beyond what Matthew Marshall or Baron Rothschild could in dreams realise for its supposed worth. Delightful, most delightful, indeed, is it to look at. This house has a pleasant aspect, with an air smacking of the Thames and the Medway. The rising ground on which this modest mansion lifts its head is called Gadshill. Classic ground, indeed. Men from Moscow and Pekin visit Gadshill for the sake of Shakspeare and Sir John Falstaff. It was once, in auctioneer phraseology, a most desirable property. Your purse-proud citizen might have found a good investment for his money in such a house. But now the high road for man from Paris and Pekin is not by Rochester and Gravesend. The only high-road is by the rail; and Gadshill—

Poetic fields encompass me around—

became (most fortunately for what we have to tell) a little depreciated in the market. Merchants and Stock-Exchange men have (we are happy to think) taken a different line of country; and that red-brick, cozy, well built, comfortable house on the sheltered summit of everybody's Gadshill, has been bought by no less a person than Charles Dickens. It is said, and in print, that our distinguished novelist was born in the immediate neighbourhood of this classic ground. He was born, we are told, at Rochester—but we refer to statistics and not authors. But this is a mistake. Mr. Dickens was born at Portsmouth. He was educated at Rochester; and from a boy it has been a dream, now happily fulfilled, that "some day" a certain Queen Anne brick built house in Kent would be his. Mr. Dickens has bought his house, and the red brick building on Gadshill will not be replaced (this the sailors tell us) by a stuccoed mansion in the doubtful taste of the Batty Langleys of the present day.

Mr. Ruskin has just put forth a very mild but clever pamphlet on the pictures in the present Royal Academy Exhibition, and the Exhibition at the Old Society of Painters in Water Colours. This year he is without vinegar. He is in love with Holman Hunt and *Don* Lewis. He has made up his unnecessary quarrel with Mr. Roberts, and sees a thousand beauties (and not unreasibly so) in pictures by known and by unknown men. If we are at times inclined to quarrel with him for a false opinion (always expressed in excellent English) we are as apt—yes, apter—to admit the good sense of what he says about modest pictures that deserve more attention than critics are inclined to give them. With one paragraph in his pamphlet we are a little offended, and this for his own sake. The reference to the *Quarterly Review* and his own private affairs have given unnecessary occasion to a few stupid jokes.

The new reading-room in that true National Gallery of the United Kingdom, the British Museum, is—thanks to Mr. Sydney Smirke, Mr. Panizzi, and Mr. Winter Jones—very nearly ready. Government has given a further sum of £6000 for gilding the ceiling, not the backs of books. It will be a noble and, better still, a most useful addition. Look at Mr. Sydney Smirke's two elevations of it in the present Royal Academy Exhibition. There will be table-room for 302 readers—each reader having elbow-room of four feet three inches by two feet three inches, with an immediate access (oh delightful thought!) to three circular galleries containing (think of this, Mr. Toovey!) one hundred thousand volumes. We ought, with such opportunities, to have more great works in literature. We shall now get rid of the Museum flea and the Museum headache.

Mr. Thackeray is once more in London, having changed his Yankee dollars into Piastres and Wyon sovereigns. He looks well, is full of his old drollery, and has caught a little Yankee accent, which, like the lisp of the Black Douglas and Sir Walter Scott, "becomes him wonder well."

NEWSVENDERS' BENEVOLENT AND PROVIDENT INSTITUTION.

The annual meeting and supper of this institution were held at the Freemasons' Tavern, on Tuesday evening; Mr. Herbert Ingram, M.P., in the chair. At the meeting the report of the committee was read, in which they expressed their gratitude for the support of the press, and took the opportunity of acknowledging donations from the proprietors of several daily and weekly papers, including one of £20 from Mr. E. T. Smith, proprietor of the *Sunday Times*; and a no £20 from the same gentleman as lessee of the Theatre Royal, Drury-lane, in the form of theatrical tickets. The report was adopted, and the usual votes of thanks were given to the several officers. The latter were re-elected, with the exception of the secretary, Mr. Cole, who retired, in consequence of other occupations; and the appointment of Mr. Saul, jun., in his place by the committee was unanimously confirmed. The appointment of Miss Hawkins as a pensioner was proposed by Mr. Garratt, who stated that she had known her for twenty-five years, and Mr. Spilling, who had known her for forty years. Both gentlemen spoke of Miss Hawkins in terms of the highest eulogy. She was elected unanimously.

The company then adjourned to the supper-room. Among the gentlemen near the Chairman was Mr. P. Murrough, M.P., Mr. Mark Lemon, Mr. Peter Cunningham, Mr. W. Dawson, Mr. T. B. Crompton, Mr. John Timbs, Mr. E. Evans, Mr. John Hutton, Mr. L. Wild, and Mr. F. Terry.

After the usual loyal and patriotic toasts,

The Chairman proposed the toast of the evening, "Success and Prosperity to the Newsvenders' Benevolent and Provident Institution," and he was glad to see that it was provident as well as benevolent. For, he was quite sure that if it did not provide against the reverses of life it could not long be prevalent (Great applause). There was a necessity that it should be provident in order that it might be lasting (Hear, hear). He considered that the newsvenders, as a body, were, without exception, the most industrious body of men in London; and, as they were liable to the same misfortunes as the rest of the community, there was the same necessity that they should have a provident and benevolent institution as for any other trade or body, and he was, therefore, pleased to see that the society prospered as it did. Another fact that the newsvenders were so industrious a body was really a matter worth a few remarks. Half-past seven in London would rather go without their breakfast than without their newspaper (Laughter, and "Hear, hear"); and the newsvenders had to make up for the deficiency of the newspaper proprietors, who sometimes did not get out their paper in time (A laugh), so that the newsvender had to run about all over the town for hours from the necessity of making up for the shortcoming of the proprietors (Laughter). The way in which the *Times* was distributed was marvellous. If the newsvenders contrived that everybody should see it before ten o'clock he did not know, but everybody knew that the thing was done. It was astonishing what efforts were made by the newsvenders to get the papers distributed when the publication was late. This extra trouble the proprietors gave them, and he, as one of the proprietors, felt bound to acknowledge it, and thank them for their exertion (Hear). He knew very well what hard work a newsvender had in carrying on his business for long hours and in all sorts of weather. He had been a newsvender himself, and he believed that when he was at Nottingham there was not in the whole kingdom a more industrious newsvender than he was (Laughter, and great applause). As one instance, he might mention that there was among his customers a gentleman who wanted his paper very early, and he (Mr Ingram) was so anxious that this gentleman should not be disappointed that he walked five miles (and of course had to walk five miles back in one occasion he got up at two in the morning to travel to London to get some copies of a paper, because there was no post to bring them and he was determined that his customers should have the paper (Hear, hear, and "Bravo, Ingram"). And his industry had its reward, for he sold over 1000 of that paper in Nottingham alone (Applause). But that was not the only reward of his exertions. It was from the experience he had as a newsvender, and in the sale of those very papers, that he thought of the paper with which he was now connected (*Applause*). These matters were personal, but, as they had a certain relevance to the question in hand, he thought it not improbable that they might be interesting to the meeting in connection with the interests of the trade to which they related (Applause, and "Go on"). He used to notice that even a very bad number of an old number of a paper would make it sell more than usual (A laugh), and it occurred to him that if they had a number of good engravings, and put them in every number, a paper conducted on such a principle would succeed (Great applause). That was the origin of the Illustrated London News, and, whatever was his present position, it was simply owing to his connection with the news trade (Applause). The very title was suggested by the fact that many of his customers, especially the more illiterate, would come and ask for the London news. They did not care whether he gave them the *Dispatch* or *Bells Life*, or anything else absolutely so long as it contained the London news. So he thought if that name suited the common people it would suit all classes, and he called his paper "the *London News*," putting "Illustrated" before it on account of the pictures (Much laughter and applause). After some humorous remarks on the energetic character of the newsvenders of London, Mr. Ingram concluded amidst continued cheering, and the toast was drunk with much enthusiasm.

Mr. Terry, treasurer, in replying for the society, took occasion to mention, as an example of the fitness of the application of the funds to the original purpose, that on the death of a vice-president, and one of the founders of the institution, his wife was thrown into a position of some difficulty, and twice received £10 from the funds of the institution. Much as it was to be regretted that she should stand in need of such aid, it was gratifying to know that when needed it was supplied by the very institution which that philanthropic gentleman had aided to establish (Great applause). Mr. Terry, in a highly eulogistic speech, proposed "The health of the Chairman, Herbert Ingram, Esq., M.P."

In seconding this motion, Mr. L. Wild took occasion to remark in strong terms of commendation on the service done by Mr Ingram to the trade. He was not like one who stepped into another man's trade, and got on by working that other out. Mr. Ingram had opened a new field for himself (Hear, hear), and by doing so had added a new branch to the trade. They must all own that the Illustrated London News had added greatly to their business (Great applause). It formed one-half the trade of most of the newsvenders (Unanimous cheers), and he contended that the whole trade were under great obligations to Mr. Herbert Ingram for the service he had done them by means of his paper.

The toast was drunk with the usual honours, and with much enthusiasm.

The list of subscribers was then read, headed by Mr. Ingram with a contribution of twenty-five guineas (Much applause).

Mr. Mark Lemon rose amidst great applause. He said: Mr. Chairman and gentlemen, the duty assigned to me is so easy and so pleasurable that it will require no great ingenuity to perform it upon my part, to your turn, to take your proper share of it. It is something, gentlemen, to have made a name wherever the English language is spoken or read—a name that will endure so long as the English language continues to be spoken and read to be a "household word" in every English home (Applause). But it is something more to remember those who, less successful in the "battle of life," may chance to be on the lists of the severely wounded (Much sensation). This has been done by your President, Mr Charles Dickens (Immense and prolonged applause). I am sure, gentlemen, that I should ill intrude on your time if I did more than propose his health as that of a trustee and the president of the institution.

The toast was drunk amidst loud and prolonged applause.

Mr. Peter Cunningham, in an amusing speech, proposed "The House of Commons, coupled with the name of Mr. P. Murrough;" who responded in appropriate terms.

It was announced by the secretary that upwards of £100 had been collected at this meeting; and, after some further toasts had been well received and aptly acknowledged, the meeting separated at a moderately early hour.

THE NEW NAVAL UNIFORMS.

In the large Illustration upon the next page we have engraved the New Uniform which, according to Circular No. 246, dated Admiralty, 11th April, 1856, "in pursuance of her Majesty's pleasure, are in future to be worn by officers of the Royal Navy."

First is the Dress Uniform of the Admiral, which, and the appointments are the same as those of the Admiral of the Fleet, except that there are to be three rows only of distinction lace on the sleeves, and the epaulets have lace straps with three stars, within the crescent, above them the crossed sword and baton, surmounted by a crown. The coat is of dark blue cloth, white collar; the trousers are of blue cloth, with 1½ inch gold lace down the outside seam; the embroidery of the epaulets and the sword-knot and belt is very handsome, especially the gold oak-leaves and acorns, and the clasp, with crown, anchor, and laurel. The sword, with solid hilt, half basket guard, crown and anchor badge, and lion-head backpiece, is superb. The long slings to the sword-belt are new.

The Captain's and Lieutenant's are dress uniforms. In that of the Midshipman, as well as the Cadet, the dirk is restored, and no swords are worn; the dirk to be according to pattern. The uniform can only be worn on the sleeve embroidering it should be stated that the curve above the cuff is new and striking.

For the information on these points afforded to our Artist we have to ask Messrs. G. and W. H. Gillott and Hasell, tailors, 36, West Strand.

THE NEW NAVAL UNIFORMS

THE ROYAL THAMES YACHT CLUB.—THE YACHTS PASSING GRAYS.

## ROYAL THAMES YACHT CLUB MATCH.

This, the first match of the season of this distinguished club, took place, as we noticed last week, on Wednesday, the 14th inst., and afforded one of the best yachting contests that has ever been witnessed on the Thames. The first prize, value £100, was a tall silver cup and cover; and the second, value £70, a large centre épergne for the table, made by the Messrs. Garrard, of the Haymarket.

Though the morning was most threatening, there was a good muster of yachtsmen on board the *Prince of Wales* and *Orwell*, the two steam-vessels which accompanied the match. The wind was all that could be desired for the sports, a fine wholesome breeze blowing from the S.W. by W. The course of the vessels was from Erith, round the Nore Light, and back to Erith. On the arrival of the party at the starting-place, the following vessels were found at their starting-buoys:—

FIRST CLASS exceeding 30 tons.

| | | | | |
|---|---|---|---|---|
| Amazon .. | .. | 46 .. | London .. | Alfred J. Young, Esq. |
| Extravaganza .. | .. | 49 .. | Poole .. | Sir F. P. Shalley, Bart. |

SECOND CLASS exceeding 20 tons, and not exceeding 35

| | | | | |
|---|---|---|---|---|
| Thought .. | .. | 29 .. | London .. | George Coope, Esq. |
| Secret .. | .. | 33 .. | Plymouth .. | Henry J. Waring, Esq. |

Half-minute time per ton for *difference* of tonnage in each class.

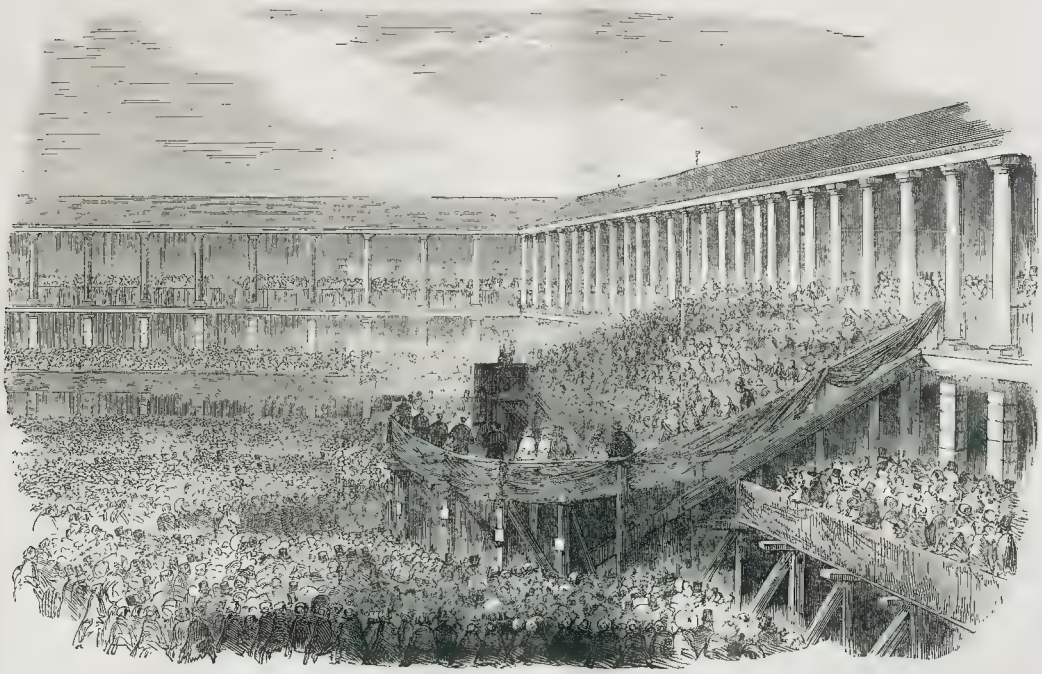
Two others had been entered for the match—the *Cyclone*, a new and untried vessel, and the celebrated *Phantom*; but the *Cyclone* had split her mainsail in a gale of wind, off the Lizard, a day or two previously, and the *Phantom* had been taken on shore to clean her bottom at Gravesend that morning, when it was found that the plank of her rudder had given way.

Of the vessels which were to start, the *Amazon* was preferred to the *Extravaganza*, and the *Thought* to the *Secret*. The duties of commodore devolved upon Mr. R. Green, the vice, owing to the absence of Lord Alfred Paget, who was detained in London.

The yachts were moored in one line—the *Thought* first to windward then the *Secret*, *Amazon*, and *Extravaganza*. At 11h. 41m. the start took place.

The *Secret* was off first, then the *Amazon*, and next the *Extravaganza*. The *Thought* was very slow in getting away, and her antagonist was nearly at the point before she had well got away from the starting-buoy.

The first three vessels soon hoisted jib-headed topsails, but the *Thought* kept her topmast housed, and all went away at a great pace with the wind on the starboard quarter: after passing Purfleet the *Thought* began to improve her position with the *Extravaganza*. The *Secret*, beautifully handled, continued to lead till she arrived off Grays, where she was passed to leeward by the *Amazon*; at East Tilbury the *Extravaganza* obtained the second place; and thence to the Nore Light the *Thought* shewed her great running powers by rapidly decreasing the distance between herself and the leading boats.



SUNDAY-SCHOOL JUBILEE COMMEMORATION IN THE PIECE HALL, HALIFAX.—FROM A PHOTOGRAPH BY HAIGH.—(SEE NEXT PAGE.)

The times of the Nore Light was thus :—

| | H. | M. | S. |
|---|---|---|---|
| Amazon ... ... ... | 2 | 20 | 0 |
| Extravagance ... ... | 2 | 50 | 0 |

| | H. | M. | S. |
|---|---|---|---|
| Secret ... ... ... | 2 | 17 | 45 |
| Thought ... ... ... | 2 | 17 | 30 |

Soon after rounding, the *Extravagance* carried away her jib-sheet block, which considerably stopped her way. The *Secret* weathered and forereached her, and again increased the distance between herself and the *Thought* (which had come up with the *Extravagance*) by half a mile.

The *Amazon* fetched in above Mucking Flat Lighthouse, where she was obliged to go about, being then a mile and a mile ahead. In the Lower Hope the *Thought* passed the *Extravagance* to wind ward, and in Gravesend Reach came up to the *Secret*. The latter made a short tack to windward, when the *Thought* gradually overreached her, and left her, and in this order they finished a very quick race at Erith :—

| | H. | M. | S. |
|---|---|---|---|
| Amazon ... ... ... | 5 | 44 | 30 |
| Thought ... ... ... | 5 | 48 | 30 |

| | H. | M. | S. |
|---|---|---|---|
| Secret ... ... ... | 5 | 53 | 0 |
| Extravagance ... ... | 5 | 54 | 45 |

The first prize was presented to the owner of the *Amazon* by the Vice-Commodore, with a well-merited eulogium upon the skill displayed in the navigation of the *Amazon*. She was sailed and piloted by her own captain, Timothy Walker. The second prize was handed over to Mr. Pittock, the captain of the *Thought*, the owner not being present, with many compliments for his excellent sailing of that vessel. The owner of the *Amazon* returned thanks, and proposed "The Ladies," and the company returned to town highly gratified with the day's sport. There was an excellent collation on board, and the band of the Royal Horse Guards Blue, under Mr. Fulton.

## THE HALIFAX SUNDAY-SCHOOL JUBILEE.

THE fifth commemoration of the Sun'ay-school Jubilee in Halifax took place on Whit-Tuesday, on the Halifax Cricket Ground, Hall, built for a purpose which has now wholly changed its character, but never fully used except on these occasions memorations. Upon this occasion the additional accommodation for spectators was ran a gigantic scale. The great Hall was found incapable of holding something over five thou and people, but standing room was found for three thousand more, by the erection of temporary wooden platforms, ranging almost entire round the building. The orchestra for the music and, put up on the east side of the hall, reached from the basement story to the fi ur of the topmost gallery.

The procession of the several schools to the hall was an imposing scene. The gates of the hall were opened for spectators at twelve o'clock, and in a short the whole of the galleries from east to west, from north to south, were lined with occupants. By eleven o'clock every street leading to the south and west gates was packed with a dense mass of human beings, all impatiently waiting. Then came, four abreast, in every direction, headed by bands in every costume, and playing various tunes, and with banners in every variety, size, and colour. For an hour and a half, without interruption or delay, the living streams continued to pour in, and flood the area of the hall. Twelve o'clock came; you guessed through the archway of the west gates, and there was the same crowd as existed during the doors, there was the same surging of feet, and apparently the same line of scholars fluted between you and the high You looked on that open archway, on that eager crowd, and on an endless train of children. At length the gates were shut, and the crowd had been forced into place; the last straggling band had seated itself upon the orchestra; and everything was ready for Mr Dean, the conductor.

The interior of the hall at this point of the proceedings was strikingly grand. It was utterly impossible to rest the eye upon a foot of vacant ground, or to discover the least break in the lines of spectators filling the galleries. The vast area, thick with scholars, presented an immense flower-bed: the showy bonnets, capes, and dresses of the girls contrasting admirably with the dark hats, coats, and coats of the boys. Standing above the orchestra, looking below, in front, to the right and to the left, you saw on every s ats a sea of up-turned faces, a multitude of swinging banners, a distracting flutter of silks, satins, and ribbons, and a ceaseless motion of parasols. It was a scene to be remembered. The company in the reserved seats included members from the principal families in the town and district.

The Independent denominations (says the *Halifax Courier*) were represented by 22 schools, numbering 3000 and 3600 scholars; the Wesleyans sent 17 schools, comprising 697 teachers and 2698 scholars; the Methodist New Connection had 11 schools present, embracing 609 teachers and 2386 scholars; the Methodist Free Church and Wesleyan Reformers assembled to the number of 10 schools, compris ng 653 teachers and 2341 scholars; the Baptists sent seven schools, including 417 teachers and 2133 scholars; the Primitive Methodists had present eight schools, numbering 490 teachers and 1831 scholars; the Wesleyan Association had three three schools, in which were 182 teachers and 670 scholars; and under the head "various" there were six schools, with 142 teachers and 410 scholars, making a total of 94,787 teachers and scholars. Besides these there were 500 instrumental and 336 vocal performers; making a total again of 26,623 for the area of the hall. It is this number we add the 9500 spectators accommodated in the galleries, we shall have a grand total of 33,823 persons congregated within the walls of one building.

At about a quarter to one o'clock the conductor entered his box, amidst a deafening cheer, the drums and trumpets of their sons of Mars. In the moment or two Mr. Dean turned towards the orchestra, when the monster brass band at once uplifted their bright and shining instruments; one wave of the baton invoked a preliminary roll of the drums, and in a trice, from every part of the hall, the introductory movements by the corneta succeeded, and then came a majestic crash of instruments, such as had never been heard in Halifax before, to the tune of "Bergamo," to which the Jubilee hymn was sung.

A placard was then raised bearing the words "All Sing"—the conductor turned round, and so faced the vast sea of upturned faces; and then forth rolled the volume of sound in the first verse of the hymn, added to that from the band.

We have not space for the details of the performance of the three hymns. At the close of the first part the children, accompanied by the full band, sang, with grand effect, the national anthem. On the present occasion there were 1000 less than the 100th Psalm. Refreshments were handed to the children, and the instrumentalists proceeded in a body to the Old Fellows' Hall, where an excellent lunch was provided of 1200 lb. of beef, 1 cwt. of cheese, 480 large currant buns, 120 loaves 2 lb each, 96 gallons of ale, and 20 gallons of coffee. Meanwhile, 24,000 currant cakes were distributed to the children. The beverage supplied was pure water, which was conveyed into the hall by pipes, and ten taps were placed in various parts of the hall, and drawn into 5000 pint-pots.

The first waver of the baton before commencing the National Anthem was a signal for the removal of hats and caps, the multitudinous effect of which was very significant of a mass of loyal teachers and children. The noble hymn was sung with heart and soul, not by the entire audience joining in the chorus. At its conclusion cheers loud and long burst forth from every part of the hall, which were renewed when a large placard was exhibited on the orchestra with "Mr. Dean" printed upon it. That gentleman bowed his acknowledgments

At the conclusion of the National Anthem the children began to file off to their respective schools, and the audience slowly dispersed.

## STOPPAGE OF THE BANDS IN THE PARKS.

Notwithstanding the rain—which with very short intervals descended in torrents during nearly the whole day—the various parks in the metropolis were attended by persons of all classes in great numbers. But it was anticipated that some of the violence of last summer might be repeated, it was decided by the Commissioners that large numbers of police should be sent into the neighbourhood of the various parks, but that they should not be called out unless their services were required, so that any unpleasant collisions might be avoided. The consequence of this was that very few constables were seen in any of the parks. In Kensington-gardens, where by far the greatest number of people assembled, a large number of "roughs" banded themselves together, rushing up the enclosures and pulling down the railings in the merriment and the same time whirling, hooting, and shrieking, for the purpose of creating confusion and committing robberies. Several of the trees were injured, in consequence of the branches being pulled off to be used as sticks by the disorderly The scene was at its height a little after four o'clock, when down came the heaviest shower of the day, which had the effect of nearly clearing the park.

On Monday night a crowded meeting of the inhabitants of St. Pancras was held for the purpose of adopting measures for the recent stoppage of the playing of the bands on Sunday. Mr. W. D. Cooper presided. Mr. Tapping, barrister, moved a resolution expressive of regret and indignation that the bands had been withdrawn. Only about a dozen bands were held up against the resolution, which was carried by an overwhelming majority Sir Benjamin Hall, who was present, addressed the meeting amidst tremendous cheering. He stated his readiness to meet his opponents on this question, and by fair as open argument to justify what he had done. The Sunday bands had been put a stop to in deference to the public feeling manifested against Sunday desecration He did not think it worth while to find fault with the way in which some of the petitions had been got up, but he felt he had the right to call attention to the prayers of many of them. One was that steam-boats should be put down on a Sunday (Laughter and "Shame!"); another, that railway trains should cease to run (Renewed laughter). What was more absurd was, that the gates of all the parks should be closed, and even the Post-office should be again closed on Sundays throughout the kingdom. (Loud cries of "Shame, shame!") He had had recently a deputation to wait upon himon this subject, and they not only wished the park gates to be closed against carriages on Sundays, but they said skating in the parks was a great sin. He (Sir B. Hall) said if that were so, why did they not ask him to put skating down? (Hear, hear.) That was, to use rather a vulgar phrase, "a choker." (Laughter, and cries of "A white choker!") He had been told, in the lobby of the House of Commons, that if he had confined the band to Kensington he would not have been interfered with. It was his aggressive policy which was objected to. Until the band was good for one place why not for another? If good for the West-end, why not for the East also? He urged the people to decent and orderly conduct on the sunset way to defeat their opponents. A deputation was appointed to wait on Lord Palmerston, and to arrange for an open-air demonstration. A resolution in favour of a Saturday half-holiday was negatived, and, after votes of thanks to Sir B Hall and the chairman, the meeting separated.

On Monday night a public meeting of the Islington tanners of Westminster was held in the Great Hall, Broadway, for the purpose of taking into consideration the discontinuance of he music in the parks on Sundays. Sir John V. Shelley, M.P., presided. The large hall was crowded A resolution expressing deep regret and indignation of the meeting at the withdrawal of the bands was a most unanimously adopted; as was a resolution in favour of a proper organisation to carry the views of the meeting into effect.

On Wednesday evening, pursuant in a requisition received by Sir James John Hamilton, Bart., and Mr J. A. Nicholay, churchwardens of Marylebone, bearing the signatures of 800 ratepayers, a public meeting of the inhabitants was held in Hall's Assembly-room, Paddington-green, for the purpose as to the recent stoppage of Sunday music in the parks and Kensington-gardens. Mr. Churchwarden Nicholay was called to the chair, and about 3000 persons were assembled. Sir Benjamin Hall was present, and his appearance on the platform was the signal for great enthusiasm Among the persons present were Lord Raynham, Messrs. P. Graham, D'Ifanger, Soden, Whitmore, Stewart, Potter, Cohen, Hedges, and other members of the vestry and ratepayers well known to the district Resolutions were passed expressing regret that the Prime Minister had, by yielding to the solicitations of a party and a population in his own personal convictions, deprived the working classes of this metropolis of a means of innocent enjoyment and healthful recreation. It was also resolved that a deputation should be appointed to wait upon Lord Palmerston to urge upon his Lordship the propriety of revoking the order for the discontinuance of the bands, and that a memorial should be presented to the Queen praying that she will be graciously pleased to direct that the music in the parks on Sunday shall be resumed

MANCHESTER ART EXHIBITION, 1857.—On Tuesday afternoon a meeting of gentlemen whose names appear in a list of subscribers to a guarantee fund for an Exhibition of the Art Treasures of the United Kingdom, proposed to be held in Manchester in 1857, took place in the Mayor's parlour at the Manchester Town-hall. A report of the steps taken since the preliminary meeting was read, from which it appears that the list of subscribers to the guarantee fund contains the names of fifty-six gentlemen for £1000 each, and sixty gentlemen for £500 each, making the total sum guaranteed £82,000. The report having been read, it was unanimously resolved that an exhibition, to be entitled an Exhibition of the Art Treasures of the United Kingdom, shall be held in Manchester in 1857. Resolutions were afterwards agreed to constituting the subscribers to the guarantee fund a general council, with the Earl of Ellesmere as president, and requesting the following noblemen to give their patronage :—The Earls of Derby, Stamford, Sefton, Ellesmere, Wilton, Dudley, Burlington, Belcarres, and the Bishop of Manchester.

ROYAL PANOPTICON.—The gardens and premises of this institution have added to its attractions the recently-arrived Walpole Islanders—consisting of a party of six men, four squaws, and an interesting child three months old. The evening's entertainment is diversified by a concert by the Spanish minstrels, each also performing solos on the flute and piano, and a diaramic view of Central America; the whole concluded by the display of the luminous fountain. During the lecture delivered on Tuesday, while Mr. Parkinson was illustrating the nature of thunder and lightning by the aid of the gigantic electrical machine, the Canadian Indians, who were present, stated their views of the marvels that presented themselves. The appearance of electrical fire that passed over the surface of the glass plate they ascribed to the direct manifestation of the Great Spirit, whose power, they added, was not confined to their own "happy hunting-grounds;" and, like the Mexican Indians, when they first heard the reverberations of the Spanish firearms, they thought that the lecturer had the power of controlling the elements.

GRAND SCULLERS' MATCH.—The Snatch for £100 aside between Kelly, of Fulham, and Mackinney, of Richmond, was rowed on Thursday. Kelly, who took the lead at starting, won easily by a considerable distance.

## MONETARY TRANSACTIONS OF THE WEEK.

*(From our City Correspondent.)*

THE leading feature in the Money Market this week has been the taking the new loan of £5,000,000. The price paid by the contractors, Messrs. Rothschild, was 98, or a fraction over the amount referred to in our letter last week It may be remarked, however, that our price was within ⅛ 9d. of that first offered by the contractors, and that, had they been disposed to go to the extra penny, the terms would not have been accepted. No cheque on Consols. It is stated that the subscription-lists showed an amount equal to £40,000,000; consequently, the deposit of ten per cent on the previous £5,000,000, a large portion of which has been repaid to the subscribers. There has been a firm business done in the Scrip, at from 1¼ up to 1⅝ and ⅞ premium.

The candid statement made by the Chancellor of the Exchequer respecting the probable future drain upon the Money Market has given some confidence to the leading lobbyers. They have, consequently, operated largely, and the quotations generally have evinced much firmness during the week, under the favourable and considerable influence upon the Unfunded Debt, and prices have again given way, though they slightly improved on Thursday. It is a pretty general impression in the City that the Chancellor of the Exchequer will not be called on "call."—that the Chancellor will be compelled to raise the rate of interest upon it to 3d. per diem.

The imports of bullion have been £180,000 from the West Indies, £293,000 from Australia, and £70,000 from America. Amongst the shipments are over £540,000 to India, China, and Egypt. This continuous drain upon our resources is likely to have an effect on this country, because it will be a powerful of the means of keeping the Continental exchanges in check by an export of silver. Gold is still arriving from the Continent, as well as from Turkey, in to all quantities

The Consol Market on Monday was tolerably active. The Reduced Three per Cents remained 93¾ up to 93⅞; Consols, for Money, 93⅞ to 94⅛; Ditto, for the Account, 93⅝ to 94⅜; New Three per Cents, 1855, 93⅛; Bank Stock was 214½ to 214, Long Annuities, 1885, marked 17 1-16; Indian Bonds, 4s. dis ; Consols Scrip, 1¼ to 1⅜ premium; Exchequer Bills (March), par; Ditto (June), 2s. 4s. discount. The annexed prices were realised on the following day, with a very firm market:—Bank Stock, 213½ to 213; Three per Cents Reduced, 93¼; Three per Cent Consols, for Transfer, 94⅛ ⅜, Ditto, for Account, 94⅛ up to ⅜; New Three per Cents, 93⅛ to 93⅜; New Two-and-a-Half per Cents, 78; India Stock, 231 to 230; Long Annuities, 1885, 17⅛; Consols Scrip, 1⅜ to 2⅜ prem ; Exchequer Bills, March, par; June, 6s 2s. 5s. prem. The following on Wednesday were tolerably numerous :—Bank Stock, 214 to 214 ; Three per Cents Reduced, 93⅞ to 93¾; Consols, 94⅛ ⅜, Ditto, Account 94⅜ ½; Consols Scrip, 1⅜ ⅝ prem ; Long Annuities, 1885, 3 3-16; Ditto, 1885, 17 1-16; India Stock, 230 to 229; India Bonds, 5s. dis ; Exchequer Bills, par to 5s. dis.; Exchequer Bonds, 98¾ ⅞. On Thursday the Directors of the Bank of England removed the additional 1 per cent imposed in October last on the acceptance of paper having more than sixty days to run. The minimum charge is now, therefore, 6 per cent for all classes of bills. The large amount of gold taken into the Bank this week—over £400,000—have, no doubt, induced the Directors to make the important change, which must prove a great relief to the mercantile classes. The Consol Market was steady, yet prices fluctuated :—The Three per Cents opened at 94⅜ ⅝, and closed at 94⅜ ⅝ ; for the Account the business was done at 94⅜ ½ ; the new Three per Cents, The New Three per Cents realised 93¾ ⅞; and the Reduced, 93 to 93¼. Bank Stock advanced to 216½; Exchequer Bills, 1s. prem. to 2s. dis.; Ditto Bonds, 98¾ ⅞.
